REQUEST FOR APPLICATION FORM

PLEASE PRINT

NAME .....

STREET .....

CITY .....

PROVINCE OR STATE ..... ZONE .....

COUNTRY .....

An application for admission to McGill University may be obtained by completing this form, checking the appropriate square below, and returning the form to the appropriate address.

NOTE: REQUESTS FOR APPLICATION FOR THE 1978-1979 SESSION SHOULD NOT BE MADE TO THE ADMISSIONS OFFICE UNTIL AFTER NOVEMBER 1, 1977.

RETURN TO:

Admissions Office
McGill University
F. Cyril James Building
845 Sherbrooke St. West
Montreal, PQ
Canada H3A 2T5

- ☐ Arts (including Bachelor of Social Work)
- ☐ Education
- ☐ Engineering (including Architecture)
- ☐ Management
- ☐ Nursing
- ☐ Physical and Occupational Therapy
- ☐ Science

RETURN TO APPROPRIATE FACULTY OR SCHOOL:

(See Section 3 for appropriate address)

- ☐ Dentistry
- ☐ Law
- ☐ Medicine
- ☐ Music
- ☐ Religious Studies
- ☐ Education – Graduate Department
- ☐ Graduate School of Library Science
- ☐ Management – Graduate Department
- ☐ School of Social Work (Master of Social Work)

Summer Session ☐ and/or French Summer School ☐ and/or Continuing Education ☐

All other Graduate Studies, return to Faculty of Graduate Studies and Research, Dawson Hall, 853 Sherbrooke St. West, Montreal, PQ Canada H3A 2T6

Please indicate field(s) of graduate study .....

RETURN TO:

The Registrar
Macdonald College, PQ
Canada H0A 1C0

- ☐ Agriculture
- ☐ Food Science

If Faculty Announcement also required, please indicate here. ☐

If residence application form also required, please indicate here. ☐

1.5 History

The Hon. James McGill, a leading merchant and prominent citizen of Montreal, who died in 1813, bequeathed forty-six acres of land and £10,000 to the already existing 'Royal Institution for the Advancement of Learning' upon condition that the latter erect "upon the said tract or parcel of land, an University or College, for the purpose of education and the advancement of learning in this Province"; and further upon condition that "one of the Colleges to be comprised in the said University shall be named and perpetually be known and distinguished by the appellation of 'McGill College'."

Owing to a lack of funds and persistent opposition, the complete University, which had been planned by the Royal Institution, was not built, but after years of litigation and effort a Royal Charter was granted in 1821 and the University of McGill College was opened in 1829 with what remained of James McGill's legacy as its endowment, and teaching started in the Faculties of Medicine and Arts. The Medical Faculty grew steadily, and after an amended Charter was secured in 1852 a new era of progress began for the Faculty of Arts with the appointment in 1855 of Sir William Dawson as Principal, a position which he held for thirty-eight years.

Since 1855 the University has grown vigorously, presently comprising twelve Faculties and eight schools. In 1899 the Royal Victoria College was opened, a gift of Baron Strathcona, to provide separate teaching and residential facilities for women students. Gradually, however, classes for men and women were merged, and now the University is wholly coeducational. In 1907 Macdonald College was established at Ste. Anne de Bellevue, as a residential college for Agriculture, Household Science, and, originally, the School for Teachers, which is now the Faculty of Education and located on the Montreal campus. The University's general development was greatly facilitated by the generosity of Sir William Macdonald, whose gifts to the University include a Physics Building, a Chemistry and Mining Building, and an Engineering Building, in addition to the college named after him.

At present some twenty thousand students are taking regular university courses. New buildings have been erected or acquired to provide the undergraduate and research facilities needed by the increased student body, and include residences, gymnasium, swimming pools and winter stadium as well as a University Centre and a concert hall.

The University is also active in providing courses and programs to the community through the Centre for Continuing Education where over thirteen thousand students are registered.

1.6 Incorporated and Affiliated Colleges

INCORPORATED COLLEGES

Macdonald College

Macdonald College is situated at Ste. Anne de Bellevue, about twenty miles from Montreal. It consists of the Faculty of Agriculture which includes the School of Food Science.

Vice-Principal – L.E. LLOYD, B.Sc.(Agr.), M.Sc., Ph.D.(McG.)

The Royal Victoria College

3425 University Street

The Royal Victoria College, a non-teaching college of McGill University, provides residential accommodation for women students.

Warden – Donna R. Runnalls, B.A. (U.B.C.), B.D. (McG.), Ph.D. (Tor.)

AFFILIATED THEOLOGICAL COLLEGES

The Montreal Diocesan Theological College

3473 University Street

Principal – H. St.-C. Hilchey, M.A. (Tor.), B.D., D.D. (Wycliffe Coll.)

The United Theological College of Montreal

3473 University Street

Principal – J. A. Boorman, B.A. (Alta.), M.A., Ph.D. (Col.)

The Presbyterian College of Montreal

3495 University Street

Principal – Donald N. MacMillan, B.A. M.A. (McG.), B.D. (Presbyterian Coll., Montr.), Ph.D. (Edin.).

NOTE: The above three colleges train students for the ministry and grant certificates for ordination but they have remitted their degree-granting powers to the University.

1.7 Government

McGill University is a Corporation created by a Royal Charter granted by the Crown of the United Kingdom, a general supervisory power being retained by the Crown and exercised through the Governor-General as *Visitor*.

The *Governors* of the University constitute the Royal Institution for the Advancement of Learning, a corporation existing under the laws of the Province of Quebec. In them is vested the management of

finances, the appointment, in consultation with Senate, of Professors, and other duties. Twenty-five of the Governors are elected by the Board from amongst those nominated by its Nominating Committee; five are elected by the Graduates' Society; five are elected by Senate amongst its members, three elected by the non-academic staff from amongst its members, and three elected by students from amongst the student body. The Board elects the Chancellor of the University and also, from amongst its members, a Chairman to preside at its meetings, who may also be the Chancellor. The Chancellor and the Principal are *ex officio* members.

The *Chancellor* is Presiding Officer of Convocation and of Joint Sessions of the Board of Governors and the Senate.

The *Chairman of the Board of Governors* is President of the Royal Institution for the Advancement of Learning.

The *Principal* is the academic head and chief administrative officer. He is appointed by the Board of Governors after consultation with Senate. He also holds the office of *Vice-Chancellor* of the University and is, *ex officio, Chairman* of Senate.

Senate consists of eighty-four voting members: The Chancellor, the Principal, the Chairman of the Board of Governors, the Vice-Principals, the Deans of the Faculties, the Dean of Students, the Director of Libraries, the Director of the Centre for Continuing Education, the President of the Students' Society, all *ex officio*, forty-one members elected by their Faculties, five Governors elected by the Board (including the Chairman of the Board), two librarians elected by librarians performing the function of librarian in the University's library system, and fourteen students elected by the students. The Senate is the highest academic authority of the University and has control over admission, courses of study, discipline, and degrees.

The carrying out of the regulations of Senate along with primary responsibility for the conduct of the educational work of the University is entrusted to the various Faculties and Schools.

STUDENT GOVERNMENT

All students registered in the University are members of the Students' Society except for students governed by the constitution of the Macdonald College Students' Society and those students registered in the Faculty of Graduate Studies and Research who are non-resident students or full-time members of the teaching staff.

A new constitution for the Students' Society has recently been approved by the students and has been submitted to the University Senate for ratification.

Full details of the constitution, officers and committees of the Students' Society are available from the Students' Society.

1.8 University Libraries

The McGill University Library system comprises five areas as follows:

(1) THE HUMANITIES AND SOCIAL SCIENCES AREA LIBRARY

THE McLENNAN LIBRARY COLLECTION:

a) *A RESEARCH COLLECTION*, concentrated on the social sciences and humanities as well as other subjects – monographs, journals, documents, microfilms.
b) *A REFERENCE COLLECTION* of encyclopaedias, dictionaries, bibliographical aids, indexing and abstracting services, etc.
c) *A CURRENT PERIODICALS READING ROOM*, housing approximately 3,000 titles.
d) *A GOVERNMENT DOCUMENTS COLLECTION AND READING AREA.*
e) *A RARE BOOKS AND SPECIAL COLLECTIONS DEPARTMENT.*

THE BLACKADER-LAUTERMAN LIBRARY OF ARCHITECTURE AND FINE ARTS houses approximately 52,000 items, numerous periodicals and architectural drawings.

THE EDUCATION LIBRARY contains approximately 100,000 items together with a Curriculum Laboratory holding tapes, films and other teaching aids and a collection of children's books. There is also a Physical Education library in the Currie Gymnasium.

THE ISLAMIC STUDIES LIBRARY contains approximately 80,000 items and a good collection of journals dealing with many aspects of the Muslim world, past and present, with particular emphasis on the Humanities. About one half of the works are in English and other Western languages, and there is a good collection in Arabic, Persian, Turkish, Indonesian, and Urdu.

THE LIBRARY SCIENCE LIBRARY contains over 82,000 volumes of books and journals in the fields of publishing and library science.

THE MUSIC LIBRARY contains some 28,000 items, including reference books and periodicals, scores, tapes and records with listening facilities for records and tapes.

THE RELIGIOUS STUDIES LIBRARY contains 65,000 items in the fields of theology, philosophy, church history, and related subjects.

THE HOWARD ROSS LIBRARY OF MANAGEMENT contains more than 184,000 items in the fields of management, economics, industrial relations and business.

THE SOCIAL WORK LIBRARY contains nearly 32,000 items in the fields of social work, community organization, social sciences, and psychology. While the collection is mainly for the use of students of the School other students may read in the Library.

(2) THE LAW AREA LIBRARY

THE LAW LIBRARY contains over 179,000 items, including virtually all Canadian works, and the principal law reports of the United Kingdom, France and the United States, as well as a selection of reports from elsewhere.

(3) THE LIFE SCIENCES AREA LIBRARY

THE BLACKER-WOOD LIBRARY OF ZOOLOGY AND ORNITHOLOGY. This is an internationally known collection of some 71,000 items.

THE BOTANY AND GENETICS LIBRARY serves some of the needs of the Biology and Psychology Departments. It contains more than 16,000 books, periodicals, government publications and pamphlets.

THE DENTISTRY LIBRARY provides 10,000 books and periodicals for faculty and student use.

THE MACDONALD COLLEGE LIBRARY at Ste. Anne de Bellevue contains almost 217,000 volumes in the fields of agricultural and environmental sciences including food science.

THE MEDICAL LIBRARY contains over 170,320 items and receives approximately 2,000 current journals. This library is noted for its collection in the field of ophthalmology and its retrospective collection of European medical publications. It is open to all who have need to use its collections.

THE NURSING LIBRARY contains approximately 23,000 volumes and 200 periodical titles. Although the emphasis is on nursing literature, the collection reflects the entire curriculum, including economics, education and the social sciences.

THE OSLER LIBRARY OF THE HISTORY OF MEDICINE contains a collection of about 31,500 items in the history of medicine and allied science, and has, as a nucleus, the 8,000 volumes bequeathed to McGill by one of its most famous pupils and teachers, Sir William Osler. It is especially this portion which is rich in 15th, 16th, 17th, and 18th century medical books. The Library is constantly adding to the collection, especially new books on the history of all aspects of medicine and medical people. Undergraduates and all interested persons may use the Library.

(4) THE PHYSICAL SCIENCES AND ENGINEERING AREA LIBRARY

THE ENGINEERING LIBRARY OF 33,000 items contains an extensive collection of books, reference material and periodicals in the fields of civil, electrical and chemical engineering for the use of undergraduates, graduate students and faculty in Engineering.

THE PHYSICAL SCIENCES LIBRARY houses the Baillie Library of Chemistry, the A.N. Shaw Library of Physics, the Mining, Metallurgy, Geology and Chemical Engineering collections and contains the greater part of the University's collection in the physical sciences and houses in excess of 94,000 volumes of books, periodicals and government publications.

THE MATHEMATICS LIBRARY in Burnside Hall has a collection of approximately 6,200 items, mostly journals.

(5) THE UNDERGRADUATE AREA LIBRARY

THE UNDERGRADUATE LIBRARY. This is an open access circulating collection of approximately 118,000 items and is located in the Redpath Library building. Services include Reference, Reserves, Circulation and a Periodicals Reading Room. The audio-visual room and drop-in centre are located on the second floor. The Audio-Visual Room is furnished with 225 carrels equipped with audio-visual devices such as slide projector, tape recorder, filmstrip and super-8-loop projectors and television screens.

1.9 University Museums

THE PETER REDPATH MUSEUM

Built in 1882, this was the first specially designed museum building in Canada. Its extensive collections, begun in the 1850's by the founder, Sir William Dawson, have been augmented over the years by gifts and bequests and are constantly expanding through curatorial field research. They are used for basic reference in graduate and undergraduate teaching and are not open to the public.

The Museum's holdings, which now include over a million scientific specimens, are especially rich in invertebrate palaeontology, specific areas of vertebrate palaeontology, palaeobotany, malacology, ornithology and ethnology. Particularly notable are the Carpenter Collection of Mollusca, the Dawson Collections of Palaeontology, the Ferrier Collection of Minerals, and the African ethnological collection.

THE McCORD MUSEUM

This museum with one of the leading collections of Canadiana in the country, stems from the bequest of David Ross McCord in 1919. Notable accessions, including the Notman Photographic Archives, have been added over the years illustrating the history of Canada in general and Quebec and Montreal in particular. The Museum, at 690 Sherbrooke Street West, is open to the public on Fridays, Saturdays and Sundays from 11 a.m. to 6 p.m. Research is by appointment only, from Monday through Thursday.

THE LYMAN ENTOMOLOGICAL MUSEUM AND RESEARCH LABORATORY

Located on the Macdonald College campus, this institution has the largest insect collection of any Canadian University, and is second in both numbers of species and specimens only to the Canadian National Collection of insects, Ottawa. As its main function is research and not exhibition, it is not generally open to the public, but interested parties are encouraged to visit by appointment.

THE McGILL UNIVERSITY HERBARIUM

Established in 1820, the McGill Herbarium was combined with the Macdonald College Herbarium in 1972 to establish the 100,000 specimen McGill University Herbarium and is situated on the Macdonald Campus. It contains some of the earliest collections made in Canada. The collection is devoted to Quebec and eastern Canadian flora but specimens from the Arctic and sub-Arctic of Canada, Greenland, Sweden, Lappland and Siberia are well represented. Research facilities are available to any student or botanist working on northern plants.

OTHER COLLECTIONS

In addition to the above there are other collections and exhibits of a specialized nature, ordinarily open only to students but to which access may be gained by application to the department concerned. These include the Anatomical, Medical, Pathological and Zoological Museums.

Appointments for conducted tours may be made to see the Rutherford Collection of Experimental Physics.

1.10 *Research Institutes, Centres and Programs*

The Institutes and similar groups listed below carry out research and teaching in a number of specialized fields. In most of them facilities are available for qualified students who wish to take higher degrees.

INSTITUTE OF AIR AND SPACE LAW

The Institute provides for advanced study and research in air and space law and related problems of international law.

Director – Dr. Nicolas M. Matte.

ALLAN MEMORIAL INSTITUTE OF PSYCHIATRY

A Psychiatric Institute for teaching, research, and treatment. McGill University undertakes responsibility for the training and teaching facilities, and the Royal Victoria Hospital for the clinical work. Research facilities are provided for clinical and laboratory studies of clinical conditions and biochemical, physiological and psychological study of various aspects of behavioural disorders in animal and man.

Director – PROFESSOR M. DONGIER.

ANAESTHESIA RESEARCH DEPARTMENT

Electrophysiological and neurochemical studies on synaptic transmission in the brain: the aim is to identify the naturally occurring chemical transmitter and receptor substances and to analyse their modes of action and how these are influenced by general anaesthetics and other drugs acting on the central nervous system.

Director – PROFESSOR K. KRNJEVIC.

ANTHROPOLOGY OF DEVELOPMENT PROGRAM

The program coordinates and furthers research and teaching on the process of socio-economic development as it affects small communities in the Canadian north and in low-income countries.

Director – PROFESSOR R. F. SALISBURY.

ARTIFICIAL ORGANS RESEARCH UNIT

This unit concentrates on interdisciplinary research using physiology, biophysics, biochemistry, enzyme engineering, chemistry and polymer chemistry towards novel approaches in clinically useful physiological support systems. The present research emphasis is on artificial cells, artificial kidney, artificial liver, detoxifier, enzyme replacement therapy and biomaterials.

Director – PROFESSOR T. M. S. CHANG

AVIATION MEDICAL RESEARCH UNIT

The Unit deals with physiology of spatial orientation, vision and postural control.

Director – PROFESSOR G. MELVILL JONES

BELLAIRS RESEARCH INSTITUTE
St. James, Barbados

This is a multidisciplinary institute offering research opportunities in terrestrial and marine biology, geology, geography, climatology, and chemical and physical oceanography for researchers with academic interests in the tropical environments of Barbados.

Director – PROFESSOR FINN SANDER.

BIOMEDICAL ENGINEERING UNIT

The Unit is involved in research, teaching and consultation in the applications of engineering methods and computer technology in medicine and biology. Current research is concerned with neuromuscular control, sensory mechanisms, auditory and vestibular systems, neural communication, signal analysis, sensory aids, diagnostic evaluation of vestibular, cardiac and respiratory systems, and respiratory gas transport mechanisms. The Unit operates a

McGILL UNIVERSITY LIBRARY

DEC PDP-11/70 computer system which provides real-time computing facilities for medical research users and serves as host for a developing network of laboratory minicomputers.

Director – PROFESSOR J. S. OUTERBRIDGE.

BRACE RESEARCH INSTITUTE

The Institute is concerned with the utilization of solar and wind energy for the supply and purification of water in order to improve the productivity of arid areas.

Director, Field Operations – T.A. LAWAND

McGILL CANCER RESEARCH UNIT

McGill University Cancer Research Unit is supported by the National Cancer Institute of Canada. Principal field of research is tumor-immunolgy.

Director – DR. MARTIN G. LEWIS.

INSTITUTE OF COMPARATIVE LAW

The Institute of Comparative Law is devoted to graduate study and research in comparative public and private law, principally in civil and commercial law. Special attention is paid to international business law and related fields.

Director – PROFESSOR PAUL A. CREPEAU.

COMPUTING CENTRE

The Computing Centre provides information processing facilities for McGill instuctional, research and administrative purposes. Current equipment includes two IBM 370 Model 158 computers. One is utilized primarily as a time-sharing system with terminals at many locations on campus. The other computer is utilized primarily for batch processing with card input and printed output available at several locations on campus and at Macdonald College.

Director – PROFESSOR W. D. THORPE.

CENTRE FOR CONTINUING MEDICAL EDUCATION
1110 Pine Ave. West

The Centre was established to promote, integrate and organize programs in continuing medical education for the various departments of the Faculty of Medicine and the McGill teaching hospitals.

Director – DR. K. G. DAWSON

DAIRY HERD ANALYSIS SERVICE
(Livestock Population Genetics)

Macdonald College

Research in the dynamics of donesticated livestock populations with particular emphasis on the physiological and environmental factors that affect the estimation of the relative genetic merit of individual and groups of animals.

Director – PROFESSOR J. E. MOXLEY.

McGILL UNIVERSITY PROJECT FOR DEAF CHILDREN

This project is concerned with the identification and management of deafness in early infancy. Both basic and clinical research is undertaken. The work includes study of prosthetic devices, evaluation of training procedures and the development of testing techniques. Both clinical and research aspects of the project are designed to afford practical experience for graduate students of aural rehabilitation and education of hearing-impaired children.

Director – PROFESSOR DANIEL LING.

CENTRE FOR DEVELOPING AREA STUDIES

The Centre coordinates research and graduate studies on development topics mainly in the social sciences but also in the applied sciences.

Director – PROFESSOR R.F. SALISBURY

CENTRE FOR EAST ASIAN STUDIES

The Centre coordinates teaching and research activities in East Asian Studies and administers Honours and Major programs under the direction of the East Asian Advisory Committee.

PAUL T. K. LIN.

FOSTER RADIATION LABORATORY

The Laboratory houses the experimental nuclear physics group and its research program is centred around a 100 MeV proton synchrocyclotron. The main theme of the current research activities is focused on the study of the nuclei lying far from the beta stability line. The level structure β-decay, electromagnetic transition, delayed proton and alpha decay properties of these nuclei are investigated using very high speed pneumatic target transport systems, recoil gas jet sweeping system, an on-line mass spectrometer and a super-conducting beta ray spectrometer. The Laboratory is also equipped with excellent facilities for conventional β-γ spectroscopy studies and subnanosecond lifetime measurements.

Director – PROFESSOR S.K. MARK.

FRENCH CANADA STUDIES PROGRAM

This program is engaged in the study of French Canada at the undergraduate and graduate levels, by research, and extension and public education programs.

Director – PROFESSOR MAX DORSINVILLE.

GAULT ESTATE
422 rue des Moulins
Mont St. Hilaire

The Estate, a legacy from the late Brigadier A. Hamilton Gault, consists of 2700 acres of forested mountain 20 miles east of Montreal, including Lac Hertel and its complete drainage basin. The entire property is protected as a Federal Bird Sanctuary.

The twelve-hundred acre western sector, with four summits linked by a 15 mile network of trails, is open daily throughout the year to members of the University and the visiting public. No motorized vehicles are permitted beyond the parking area except on official business. No camping is permitted at any time. Twelve hundred acres on the eastern shore of the lake form a Biological Reserve, to which access is restricted by permit for approved field research in the natural sciences.

Comfortable dormitory facilities are available for up to 32 persons, for classes and for individuals involved in ecological studies. A Day-Conference Centre is provided at Manoir Gault on Lac Hertel for groups of up to 50 persons. This can be used in conjunction with the dormitories. All arrangements must be made by written application to the Warden.

The Estate is also headquarters for the Mont St. Hilaire Nature Conservation Centre, which conducts a year round bilingual nature interpretation program for all ages. The Centre is supported entirely by outside funds, including grants from industry and fees for services rendered, and cooperates with educational institutions and community organizations to provide teacher training and counselling services in outdoor education.

Warden and Director of the Nature Centre – ALICE E. JOHANNSEN.

GEOTECHNICAL RESEARCH CENTRE

Research interests include fundamental soil mechanics, soil-water interaction, frozen soils, soil freezing and frost heave, thermal soil properties and mechanics, soil dynamics and soil-structure interaction, soil stability and constitutive behaviour, ground water recharge' mobility and trafficability, and other related problems in soil engineering.

Director – PROFESSOR RAYMOND N. YONG.

SCHOOL OF HUMAN COMMUNICATION DISORDERS
Beatty Hall, 1266 Pine Ave. West

The School of Human Communication Disorders offers both professional and research training in speech and hearing disorders at the graduate level. In addition to the teaching of specific techniques for diagnosis and therapy, special emphasis is placed upon understanding of fundamental principles and critical evaluation of current methods.

Director – PROFESSOR K.K. CHARAN.

INDUSTRIAL RELATIONS CENTRE

The Centre provides information, evening seminars, research on industrial relations; general labour relations, public conferences; publishes newsletters surveying developments in industrial relations in Canada, as well as research reports; maintains a computerized analysis of more than 1,300 Canadian collective agreements. Membership from the community includes crown corporations and Government agencies, industrial firms, hospitals and labour unions.

Director – PROFESSOR FRANCES BAIRSTOW.

INSTITUTE OF ISLAMIC STUDIES

McGill University's Institute of Islamic Studies is concerned with the disciplined study of Islamic civilization throughout the scope of its history and its geographical spread. It gives attention to the origins of Islam, to the rise of the civilization in which Islamic faith was the vivifying factor, to the forces which shaped the civilization and the changes it has undergone. It is also concerned with the contemporary dynamics of the Islamic world as Muslims seek to relate their heritage from the past to the radical situation of modernity.

Director – PROFESSOR C.J. ADAMS.

CENTRE FOR LEARNING AND DEVELOPMENT

The Centre for Learning and Development helps to improve the learning environment, teaching practices and learning methods at all levels of education. At present its activities focus on university education and include dissemination of relevant information, consultation, workshops, and research.

Director – PROFESSOR G.L. GEIS.

McGILL MAGNET LABORATORY

This laboratory contains facilities for the production of intense magnetic fields, both continuous and pulsed, for the use of research workers whose scientific programs can benefit from their use.

Director – PROFESSOR D.R. STEVENSON.

MANAGEMENT INSTITUTE

The Management Institute provides a variety of services to managers in business, government and non-profit institutions. It offers courses and seminars designed to help middle and senior management people keep abreast of current developments in analytical and decision-making techniques, and to provide a better appreciation of the integrative problems of general management.

Other activities include the Presidents' Seminar, Operation Catalyst and the McGill Conference on Industry and Government.

Director – PROFESSOR R.N. MORRISON.

MARINE SCIENCES CENTRE

The Centre is interdepartmental in scope, emphasizing the interdisciplinary nature of the science of oceanography. Excellent laboratory and library facilities are available, and opportunities for field work exist in the Arctic, the Gulf of St. Lawrence, the Canadian eastern seaboard, and at the Bellairs Research Institute in Barbados. Special research interests include the physics of sea ice, the energy exchange

McGILL UNIVERSITY LIBRARY

between atmosphere and hydrosphere, marine climatology, the dynamics of sea water, marine bacteria, growth and life cycles of marine organisms, marine productivity, marine biogeography and sedimentation, and marine pollution.

Chairman – PROFESSOR M.J. DUNBAR.

McGILL-MONTREAL CHILDREN'S HOSPITAL LEARNING CENTRE
3640 Mountain St.

The Learning Centre has developed a comprehensive program to assess, treat and plan for children with specific learning disabilities. Research into cognitive defects is continuous and the programs in the Centre are constantly reviewed.

Director – DR. SAM RABINOVITCH.

INSTITUTE FOR MINERAL INDUSTRY RESEARCH – OCCUPATIONAL HEALTH AND SAFETY UNIT

Research at this Institute is concerned with all aspects of working environments which affect health and safety. This includes studies of dusts, ventilation, noise, chemical hazards and underground illumination.

Director – DR. G.W. GIBBS.

MONTREAL NEUROLOGICAL INSTITUTE AND HOSPITAL

The Montreal Neurological Institute and Montreal Neurological Hospital are concerned with undergraduate and graduate teaching in neurology, neurosurgery and the neurosciences, research in basic and clinical sciences related to the nervous system, and clinical care for patients with disorders of the brain and nerves.

Director – PROFESSOR WILLIAM H. FEINDEL.

MORGAN ARBORETUM
Macdonald College

Established in 1947 and located at Macdonald College, the Arboretum has 600 acres of woodland devoted to the study of woodlot management and the place of private forestry in the eastern Canadian economy; the study of forest values and their conservation; teaching, research, demonstration, and conservation education. About 100 acres have been planted in reforestation projects involving many coniferous and broad-leaved species. In addition, the Arboretum has an excellent collection of specimens of Canadian and foreign trees and shrubs.

Curator – PROFESSOR J.D. MacARTHUR.

McGILL CENTRE FOR NORTHERN STUDIES AND RESEARCH

The Centre encourages, promotes, undertakes and co-ordinates McGill's research and training programs relating to the North. In particular it is developing the interdisciplinary aspects of research. The function of the Centre is to assist in the interchange of information among those engaged in Northern studies and research, to maintain records of all pertinent projects in the University, to provide information on the University's capacity to undertake Northern research, to prepare and assist others in the preparation of research proposals and the assembling of teams, and to serve as a liaison with other research and teaching organizations, industry and government.

At its Purvis Hall headquarters, the Centre maintains an Arctic Information Unit, which includes a specialized library, bibliographic and reference service, maps, photographs and other information sources.

The Centre encourages students to develop a continuing interest in the North and to follow careers relating to it. It co-ordinates lectures, seminars and academic courses on northern topics.

Director – PROFESSOR TREVOR LLOYD.

INSTITUTE OF PARASITOLOGY
Macdonald College

A cooperative venture of the National Research Council and the University for the study of parasitology in man and animals; it also cooperates with public authorities in diagnosis and the practical applications of parasitology and is the National Reference Centre for Parasitology.

Director – PROFESSOR NEIL A. CROLL.

PHONETICS RESEARCH LABORATORY
(Department of Linguistics)

Research in acoustic phonetics and speech perception. Spectrographic analysis of speech, production of synthesized speech by means of an Electronic Vocal Analog. Languages investigated include English, French, Cree, Mohawk, Czech, Hungarian.

Director – PROFESSOR ANDRE RIGAULT.

PULP AND PAPER RESEARCH INSTITUTE OF CANADA

A separately incorporated non-profit research organization affiliated with McGill University and also with the Canadian Pulp and Paper Association and Department of the Environment but with its own board of control. Principal fields of research: pulp and paper technology, mechanical and chemical pulping, paper making, process control, product quality and environmental pollution. Also provides facilities to graduate students working in various departments of McGill University on research projects of interest to the pulp andpaper industry.

President – DR. PIERRE R. GENDRON.

SHASTRI INDO-CANADIAN INSTITUTE

McGill University is a founding member of the Shastri Indo-Canadian Institute, a cooperative, voluntary organization, incorporated in Ottawa, whose members are the National Library and Canadian colleges and universities with an interest in Indian studies. Its

objectives are to enhance the mutual understanding between India and Canada by supporting and promoting development of Indian Studies at Canadian institutions of higher learning. This is presently being done mainly by the provision of fellowships for persons residing in Canada to conduct scholarly research in the humanities and social sciences, and by the acquisition of Indian publications for scholarly use in Canada, and by summer programs to introduce undergraduates and school teachers to the field.

Executive Officer – Mrs. KAY DE LA RONDE.

SOCIAL SCIENCES STATISTICS LABORATORY

The laboratory promotes quantitative research in the social sciences with technical and specialized assistance.

Director – PROFESSOR J.C.R. ROWLEY.

McGILL SUB-ARCTIC RESEARCH LABORATORY
Schefferville, Quebec

This laboratory at Schefferville in the centre of the Nouveau-Québec/Labrador peninsula provides facilities for year round environmental research, currently specializing in biogeography, ecology, hydrology, microclimatology, pedology, permafrost and snow studies.

Director – PROFESSOR F.H. NICHOLSON.

SCHOOL OF URBAN PLANNING

The objective of the School of Urban Planning is to produce qualified professional urban planners, for both the public and private sectors. Students are expected, on completion of the program, to have acquired basic planning skills, a broad view of urban studies and a field of specialization. To achieve these objectives teaching and research activities are organized within the context of the broader urban studies and research effort at McGill.

Director – PROFESSOR DAVID FARLEY.

2 ADMISSION

Director – PEGGY SHEPPARD, B.Ed.(McG.), B.A.(Sir G. Wms.)

Admissions Office
McGill University
F. Cyril James Building
845 Sherbrooke St. West
Montreal, PQ H3A 2T5

2.1 General

The academic year at McGill runs from mid-September until early May, with approximately two weeks' vacation at Christmas. While most students enter in September, it is possible to be considered for admission to certain programs in January and interested students should contact the Admissions Office in August 1977 for further information.

The deadlines for submission of applications for admission are March 1 for admission in September and November 1 for admission in January. All applications must be accompanied by a nonrefundable fee of $15.00 in Canadian funds payable by certified cheque or money order to McGill University.

Admission is selective, and students are reminded that fulfilment of the minimum requirements does not guarantee acceptance.

Although our Admissions Officers are always pleased to meet prospective students, a personal interview is not required for admission.

2.2 University Program

Quebec students who have completed a CEGEP program and who have obtained the Diploma of Collegial Studies are eligible to apply for entrance to the first year of a three-year University program (90 credits in most faculties) leading to one of the following degrees: Bachelor of Arts, Bachelor of Commerce, Bachelor of Education, Bachelor of Engineering, Bachelor of Civil Law (95 credits), Bachelor of Music, Bachelor of Science, Bachelor of Science in Agriculture, Bachelor of Science (Agricultural Engineering), Bachelor of Science (Architecture), Bachelor of Science in Food Science, Bachelor of Science in Nursing, Bachelor of Science in Physical Therapy, Bachelor of Science in Occupational Therapy, Bachelor of Social Work, Bachelor of Theology, or to a five year program leading to a degree in Medicine. After the Bachelor of Science (Architecture) degree, one additional year of study is required for the Bachelor of Architecture degree; a university degree is required for admission to the Bachelor of Laws program.

Students who have completed an appropriate level of education outside the province of Quebec may be considered for entrance to a university program requiring three or four years of study (90 to 120 credits).

2.3 Entrance Qualifications

QUEBEC

Holders of the Diploma of Collegial Studies are considered for admission to the first year of an undergraduate program (90 credits in most faculties). Collegial students should refer to the "Structures d'Accueil aux Études Universitaires de Premier Cycle" to ensure that they are registered in an appropriate pre-university program.

PROVINCES OF CANADA OTHER THAN QUEBEC

Entrance to the Faculties of Arts, Education and Management:

Ontario Grade 13 students may be admitted directly to a 90 credit university program if they have completed five academic subjects (6 credits are granted for each subject with the exception of mathematics, each course of which receives 3 credits). English should be included in the student's program; the four elective courses should be appropriate to the program which the student wishes to enter at McGill. Students wishing to enter the Faculty of Management should include functions and relations and calculus as part of their Grade 13 program. (Calculus II, Integral Calculus, is completed during the first year of study at McGill).

Students having only four subjects will be required to make up an additional six credits at McGill.

Students from provinces other than Quebec, Ontario*, and Newfoundland who have completed Grade 12 in academic subjects appropriate to the Faculty which they wish to enter may be considered for admission to a university program in Arts, Education, or Management requiring the completion of 120 credits (normally four years of study). Students from Newfoundland are required to have completed Grade 11 plus one full year of an appropriate undergraduate program at Memorial University or elsewhere.

Entrance to the Faculty of Science:

All programs in the Faculty of Science require that the student complete the equivalent of introductory college level courses in biology, calculus, chemistry, and physics. Students who have completed these courses with satisfactory performance prior to admission are given credit and/or exemption.

Ontario Grade 13 courses in biology, chemistry, and physics are accepted for exemption and each is allowed 6 credits. Grade 13 courses in mathematics are allowed 3 credits each; students who have included calculus in their program are required to complete calculus II at McGill unless they pass the Placement Test which may be written at McGill prior to registration. A maximum of 30 credits can be obtained for all Grade 13 work. Students planning application to the Faculty of Science should follow a pre-science academic program including mathematics and chemistry prior to Grade 13. A student who has completed Grade 13 is considered for admission to a university program requiring the completion of the difference between 120 credits and the number of credits which have been granted. For example, a student who has completed biology, chemistry, physics, two (or preferably three) courses in mathematics, and one non-science academic course, all at the Grade 13 level, enters a program requiring the completion of 90 credits.

Students from provinces other than Quebec, Ontario, *and Newfoundland who have completed Grade 12 in appropriate subjects may be considered for admission to a university program requiring the completion of 120 credits (normally four years of study). Students should have completed a course in functions or trigonometry and a course in chemistry at the Grade 11 or 12 level (preferably Grade 12 level). A course in physics is strongly recommended. Students from Newfoundland are required to have completed Grade 11 plus one full year of an appropriate undergraduate program at Memorial University or elsewhere. Further information may be obtained by writing to the Admissions Office.

*Exceptions are sometimes made in the case of Grade 12 students with an average of over 80% in appropriate subjects. Such students may apply to a program requiring the completion of 120 credits in the following faculties and schools: Arts, Education, Engineering, Management, Nursing, Physical and Occupational Therapy, Science.

Entrance to the School of Nursing and the School of Physical and Occupational Therapy:

Ontario Grade 13 students are considered for entrance on essentially the same basis as applicants to the Faculty of Science (see above). However, as organic chemistry (3 credits), electricity and magnetism (3 credits), and calculus II (3 credits) are prerequisite courses which must be taken in addition to the regular degree program, students are considered for admission to four-year, rather than three-year, programs. A student who manages to complete both organic chemistry and calculus II during the summer after Grade 13 will be given consideration for admission to a three-year program, although preference will be given to those students who have completed all the prerequisite courses. If admitted lacking electricity and magnetism, the student would probably be required to take the course during the summer after first year. It is very unlikely that it could be taken concurrently.

Admission from other Canadian provinces is as for Science. Students who are admitted to a 120 credit program in Nursing, Physical Therapy, or Occupational Therapy take basic science courses in their first year. These students **must** also complete a course in organic chemistry during the summer after their first year of study if they are to advance to the first year of the professional program.

Entrance to the Faculty of Engineering and School of Architecture:

Students who have completed Grade 13 Ontario, Grade 12 in other Canadian provinces, or first year university in Newfoundland and who have a strong foundation in mathematics (including a course in trigonometry or functions), chemistry, and physics may be considered for admission to a four year program (eight semesters) in the Faculty of Engineering.

Students who have completed Grade 12 and/or Grade 13 Ontario and either a three-year program in technology at a community college or institute of technology, the first year of a four year program at a university, or an equivalent qualification may be considered for admission to a three year (six semester) program in the Faculty of Engineering. Applicants who have not completed all the appropriate prerequisite courses to qualify them for admission to a three-year program, but who are otherwise admissible on the basis of their academic record, may be considered for admission to a program requiring one or two additional semesters to complete the degree.

It is not possible to apply for admission to Architecture on the basis of Grade 12, Grade 13, or first year university in Newfoundland. Application to the School of Architecture can be made after one year of study in either the Faculty of Engineering or the Faculty of Science.

Entrance to other Faculties:

High school graduates are not eligible to apply for admission to the Faculties of Dentistry, Law, or Medicine. A minimum of two to three years of study in the Faculties of Arts or Science is required before seeking admission to Dentistry. A Bachelor's degree is necessary to enter the Faculties of Law and Medicine. A minimum of one year of study in the Faculty of Arts is required before a student may seek entry to the School of Social Work.

NON-CANADIAN APPLICANTS

Entrance to the Faculties of Arts, Education and Management:

High school graduates from the UNITED STATES may be admitted to an undergraduate program requiring the completion of 120 credits in the Faculties of Arts, Education, and Management. All applicants should have followed academic programs designed for university entrance. Applicants to the Bachelor of Commerce program should present a strong background in mathematics, including a course in trigonometry or functions. Students who have passed Advanced Placement examinations in appropriate subjects with a grade of "3" or better will be granted some advanced standing.

Students from the UNITED KINGDOM and COMMONWEALTH countries may be admitted directly into a university program requiring the completion of 90 credits (three years) in the Faculties of Arts, Education, and Management if they have completed three Advanced Level papers. An average grade of "C" or better, with no paper having a grade lower than "D"' is required; however, if admitted having an Advanced Level paper with a grade of "D", no credit is granted for that paper. It is expected that most students will have completed five G.C.E. papers at the Ordinary Level; one Ordinary Level paper must be English Language.

Students who have fewer than three Advanced Level papers can be offered admission; however, these students will be required to complete additional credits to fulfill the degree requirements.

Applicants to the Faculty of Management must have Advanced Level results in mathematics.

Students with very good grades in at least five appropriate Ordinary Level papers PLUS one full year of formal schooling beyond Ordinary Level, in a suitable academic program at a recognized school or college, may be considered for entrance to an undergraduate program requiring the completion of 120 credits (four years) in the Faculties of Arts, Education, and Management.

MEMORIAL UNIVERSITY LIBRARY

Entrance to the Faculty of Science:

The programs in the Faculty of Science have been designed on the assumption that the student has completed, or will complete at McGill, the equivalent of introductory college-level courses in biology, chemistry, physics, and mathematics. These courses are referred to as prerequisite courses.

Graduates from Grade 12 in the UNITED STATES are considered for admission to a university program requiring the completion of the difference between 120 credits and the number of prerequisite credits they have earned. An Advanced Placement science course is considered the equivalent of 6 prerequisite credits; a grade of "3" or better is required for Advanced Placement credit to be granted. All applicants should have a strong background in mathematics (including a course in trigonometry or functions), chemistry, and physics. Biology is also desirable in the case of a student applying to one of the biological or health science programs.

Students from the UNITED KINGDOM and COMMONWEALTH countries are normally required to have completed examinations in five different G.C.E. subjects including English, chemistry, mathematics and physics, at least two of which must be at the Advanced Level. An average grade of "C" or better, with no more than one subject having a grade of "D", is also required. Such students are considered for admission to a university program requiring the completion of the difference between 120 credits and the number of prerequisite credits they have earned. Each G.C.E. Advanced Level paper in a science subject (biology, chemistry, mathematics, physics) with a grade of "C" or better is granted the equivalent of 10 prerequisite credits; a maximum of 30 credits can be granted for Advanced Level results, (a maximum of 10 credits is granted for papers in mathematics).

Students with very good grades in at least five appropriate Ordinary Level papers PLUS one full year of formal schooling beyond Ordinary Level, in a suitable academic program at a recognized school or college, may be considered for entrance to an undergraduate program requiring the completion of 120 credits.

Entrance to the School of Nursing and the School of Physical and Occupational Therapy:

Graduates from Grade 12 in the UNITED STATES are considered for admission on the same basis as for Science (see above). Students who are admitted to one of these programs take basic science courses in their first year. These students must also complete a course in organic chemistry during the summer after their first year of study if they are to advance to the first year of the professional program.

Students from the UNITED KINGDOM and COMMONWEALTH countries must have completed G.C.E. Advanced Level examinations in biology, chemistry, mathematics, and physics, and must have achieved a grade of "C" or better in each if they wish to be considered for admission to a three-year program of study.

Students who lack these qualifications but who meet the entrance requirements for the Faculty of Science may apply for admission to that Faculty. Upon completing one year of study in appropriate courses they may then apply for admission to a three-year program in Nursing, Physical Therapy, or Occupational Therapy.

Entrance to the Faculty of Engineering and School of Architecture:

Graduates from Grade 12 in the UNITED STATES are considered for admission to a university program requiring the completion of eight semesters. Applicants should have a strong background in mathematics (including a course in functions or trigonometry), chemistry, and physics. Students who have passed Advanced Placement examinations in mathematics, chemistry, or physics, with a grade of "3" or better receive some credit towards their program. It is not possible to apply for admission to Architecture on the basis of Grade 12; a minimum of one year of preparatory study in either Engineering or Science is required.

Students from the UNITED KINGDOM and COMMONWEALTH countries may apply for admission to a three-year program in Engineering or Architecture if they have passes in five G.C.E. Ordinary Level papers, including English, mathematics, physics, and chemistry, two years of study in the Sixth Form, and passes in Advanced Level papers in mathematics and physics. Applicants should have a grade of "C" or better in mathematics and physics. The program of study in the Sixth Form must have included one full year of English literature and composition, at least one full year of chemistry (a pass at the Advanced Level is desirable), and an acceptable course in the humanities or social sciences. Students lacking these latter requirements may be considered for admission to programs with one or two additional semesters to complete the requirements for a degree.

Students who have completed one year in the Sixth Form and who have results for one paper in mathematics at the Advanced Level may be considered for admission to a four-year program.

Admission to the School of Architecture is competitive and applicants are selected primarily on the basis of academic standing. Unless the student has achieved particularly outstanding results in Advanced Level papers in chemistry, mathematics, and physics, it is not possible to offer admission to Architecture prior to the completion of further studies in either Science or Engineering. Practical experience in architectural work is not required but may influence the Admissions Committee in selecting candidates.

Entrance to Other Faculties:

Students who have completed high school programs are NOT ELIGIBLE to apply for admission to the Faculties of Dentistry, Law or Medicine; a Bachelor's degree is necessary. Students may seek a transfer to a 90 credit (three-year) program in Social Work after they have successfully completed one year of study in the Faculty of Arts. As the number of students who can be admitted to these programs is severely limited, all students should realize that the completion of undergraduate studies in Arts or Science will not ensure eventual admission to any of the professional programs mentioned.

National Certificates Accepted for Admission:

Some of the national certificates accepted for admission to McGill are listed below. Depending upon the particular certificate, students are considered for admission to three or four year programs in most Faculties. It is not possible to apply for admission to Dentistry, Law, or Medicine on the basis of any of the certificates listed. In most instances, it is not possible to apply for admission to Architecture without further preparatory study.

Students requiring more specific information relative to entrance requirements should write to the Admissions Office. Admission is selective and better than average grades are required for admission.

COUNTRY – CERTIFICATE

Australia – Higher School Certificate; University Matriculation Certificate
Belgium – Certificat d'Humanités
Czechoslovakia – Vysvedceni o Maturitni Zkousce
France – Baccalauréat
Germany – Zeugnis der Reife
Greece – Akadimaiko or Apolitirion
Hong Kong – Advanced Level results
India – Bachelor's degree (with First Division standing)
International Baccalaureate – Certificate of Baccalaureate*
Iran – Sixth Year Secondary Education Certificate
Iraq – Baccalaureate
Israel – Matriculation Certificate
Italy – Diploma di Maturita Classica; Diploma di Maturita Scientifica
Lebanon – Lebanese Baccalauréat (2ième partie)
Mexico – Bachillerato Unico
Netherlands – Getuigschrift (Gymnasium or Lyceum)
Norway – Examen Artium
Pakistan – Bachelor's degree (with First Division standing)
Poland – Swiadectwo Dojrzalosci
Sweden – Avgangsbetyg
Switzerland – Federal Maturity Certificate, Type A, B, or C.
United Arab Republic – General Secondary School Certificate
United Kingdom and Commonwealth – Advanced Level results
Vietnam – Vietnamese Baccalauréat (2ième partie)

*A maximum of 30 credits is granted for international Baccalaureate results. No credit is granted for Physical Science; students who have written the Physical Science examination may receive credit for physics and/or chemistry by writing a Placement Test at McGill prior to registration.

2.4 Additional Entrance Requirements

1) Application for admission to undergraduate programs must be made on forms supplied by the Admissions Office BEFORE MARCH 1 if the student is applying for entrance in September. Supporting documents should be sent as soon as they are available if they cannot be sent with the application.

2) STUDENTS FROM THE UNITED STATES must write College Entrance Examination Board tests including the Scholastic Aptitude Test and three other Achievement Tests appropriate to the program which they wish to enter at McGill. Applicants to a science or engineering program should select a minimum of two tests from biology, chemistry, mathematics, and physics.

Students from the Eastern United States may obtain information about the tests by writing to:
The College Entrance Examination Board
Box 592
Princeton, New Jersey 08540

Students from the West should write to:
The College Entrance Examination Board
Box 1025
Berkeley, California 94701

STUDENTS FROM OVERSEAS are advised to write CEEB Aptitude and Achievement tests to support their application.

3) APPLICANTS WHOSE MOTHER TONGUE IS NOT ENGLISH, and who have not completed a CEGEP program in the province of Quebec, must submit acceptable evidence of facility in English BEFORE THEIR APPLICATION FOR ADMISSION CAN BE CONSIDERED. The following evidence is acceptable: G.C.E. Ordinary and Advanced Level examinations in English literature or composition; The Test of English as a Foreign Language (TOEFL); The University of Michigan English Language test.

TOEFL is preferred by the University; it is administered by the College Entrance Examination Board and is easily available throughout the world.

IT IS THE STUDENT'S RESPONSIBILITY TO MAKE THE NECESSARY ARRANGEMENTS WITH THE EXAMINING BOARD TO WRITE THE TEST IN THE COUNTRY OF RESIDENCE. Full information about the Test and a registration form may be obtained by writing to: Test of English as a Foreign Language, Box 899, Princeton, New Jersey 08540, U.S.A.

MCGILL UNIVERSITY LIBRARY

2.5 Transfer Students

Each year McGill University admits well-qualified students transferring from other universities and colleges. These students must be those who would have been eligible to enter McGill as Freshmen and who have maintained a better than average academic standing in university work. In most Faculties, 60 credits or four semesters of work must be completed if a degree is to be granted; in the Faculty of Arts, the minimum requirement is 45 credits. The student's admissibility and the number of credits which can be granted are determined only once a formal application and all the necessary supporting documents are received.

2.6 Mature Student Admission

Residents of Canada who will be 23 years of age or older by September 1 (for admission to the Fall Session) or January 1 (for admission to the Winter Session) and who lack the academic background normally required for admission may apply for entrance as mature students. An admissions policy for mature candidates is in effect in the Faculties of Arts, Education, Engineering, Management, Music, and Science.

Individuals interested in being considered for entrance under this policy should contact the Admissions Office for further information.

2.7 Health Requirements for New Students

Along with the letter of acceptance to the University, all students will receive a Medical Questionnaire complete with a return envelope addressed to the Health Service. The student is requested to complete this questionnaire and to return it in the envelope at the earliest possible date. There may be additional requirements in certain faculties and schools.

An appointment will be made for all new students to be seen by a physician at the University Health Service as early as possible during their first academic year. At this interview the health of the student will be reviewed and if it is thought necessary, the student will be medically examined. The examination may include X-ray and other appropriate laboratory or diagnostic tests. Re-examination may also be required in the interest of the student or of others attending the University.

COMPULSORY HEALTH INSURANCE FOR NON-CANADIAN STUDENTS

All full-time non-Canadian students must take out a Health Insurance policy, which is available on a group basis. In general, the policy provides for payment towards hospital, surgical, medical, diagnostic, and other medical expenses.

Full details and application forms are provided at registration.

2.8 General Information for Non-Canadian Students

Students who do not wish to live permanently in Canada must first obtain a student visa from a Canadian Embassy or Consulate in their area. They must present to the Embassy or Consulate both their letter confirming acceptance at McGill and proof that they are capable of assuming all financial responsibilities during their stay.

The above procedures reflect a new Immigration Bill which has been presented to the Canadian Government and if adopted will affect non-Canadian students studying in Canada. These students **must** contact a Canadian Embassy or Consulate in their area to ensure that they have the proper documentation before coming to Canada.

Non-Canadian students should ensure that they have adequate hospitalization and medicare coverage before they come to McGill University since they will not be eligible for Québec Medicare.

2.9 Registration

Registration for the Fall Session takes place early in September and lectures begin shortly thereafter. Complete information is sent with the letter of admission, and Faculty counsellors are available in the weeks preceding the commencement of lectures to assist in the selection of courses.

2.10 Language Policy

The language of instruction at McGill is English. Students may write term papers and examinations in French, but competence in English is essential to succeed. A summer course, English 110-150C, is offered and it is recommended that students who lack fluency in English take this summer course *before* embarking on a program of study at McGill. Information and application material may be obtained by writing directly to the Summer Session Office.

2.11 Language Requirement for Professions

Quebec law now requires that candidates seeking admission to provincially-recognized professional corporations* must possess a working knowledge of the French language, i.e. be able to communicate verbally and in writing in that language.

To demonstrate this capability, a candidate will normally be required to pass an examination set by the Régie de la langue française, unless he or she can show that three years of instruction in a French post-primary school have been completed. The professional corporation will require this proof of

attendance or of successful completion of the Régie examination.

This examination shall test the candidate's mastery of oral and written comprehension and expression in French. The contents may vary in accordance with the current terminological requirements of the profession or professional group. Examinations will take place four times a year, and they may be attempted an unlimited number of times.

In special cases where the candidate can clearly demonstrate to the Régie by means of an interview that a true mastery of French exists, the examination requirement may be waived.

Information on the testing program of the Régie may be obtained by writing to: Régie de la langue française, 800, Place Victoria, 16e étage, Montréal, PQ, H4Z 1G8, Telephone 873-6571.

Students who need to acquire a functional level of proficiency in French may register in courses at either the French Language Centre, 3438 McTavish Street, Telephone 392-5727, for courses during the day, or at the Centre for Continuing Education, 772 Sherbrooke Street West, Telephone 392-4901, for courses in the evening.

Students already proficient in French but who wish to keep up practice may register in courses at the Department of French Language and Literature, 3460 McTavish Street, Telephone 392-4577, or at the Centre d'études canadiennes-françaises, 3475 Peel Street.

* McGill degrees and diplomas currently give access to corporations regulating the activities of the following professional groups:

Advocates
Agronomists
Architects
Chartered Accountants
Chartered Administrators
Chartered Appraisers
Chemists
Dentists
Dieticians
Engineers
Industrial Administration Accountants
Industrial Relations Counsellors
Licensed General Accountants
Notaries
Nurses
Occupational Therapists
Physicians
Physiotherapists
Psychologists
Social Workers
Speech Therapists & Audiologists
Urbanists
Vocational Guidance Counsellors

3 ACADEMIC INFORMATION

3.1 Faculties and Schools

The twelve faculties and eight schools in McGill University offer the following degrees and diplomas: (Further details of programs in each faculty and school are given in the appropriate faculty or school announcement.)

3.2 Faculty of Agriculture

See Macdonald College, section 3.10.

3.3 Faculty of Arts

Dean – R. VOGEL, B.A. (Sir G. Wms.), M.A., Ph.D. (McG.).
Dawson Hall
853 Sherbrooke St. West
Montreal, PQ H3A 2T6

DEGREES OFFERED

Bachelor of Arts (B.A.)
Bachelor of Social Work (B.S.W.)
The undergraduate work of the University in Humanities and Social Sciences is done in the Faculty of Arts.

DEGREE PROGRAMS IN ARTS

A student may take an Honours degree in any department, requiring a degree of high concentration within one discipline and restricted to students who maintain a high level. All other students will choose an area of concentration (usually a "Major", but in some instances called a "Faculty" Program). The "Major" or "Faculty" Program can be in a single discipline or in one of several interdisciplinary fields. Full details of these programs will be available either in departments or from academic advisers, and general descriptions are available in the *Announcement of the Faculties of Arts and of Science.*

Listed below are the various programs leading to the B.A. degree.

Honours and Major Programs are offered in the following subjects:

Anthropology
Art History
Classics
East Asian Studies
Economics
English
French
Geography
German
Hispanic Studies
History
History and Philosophy of Science
Italian
Jewish Studies
Linguistics
Mathematics
Middle East Studies
Philosophy
Political Science
Psychology
Religious Studies
Russian
Sociology

McGILL UNIVERSITY LIBRARY

Joint Honours are also available. Please consult the appropriate departments.

In addition, the following **interdisciplinary majors and concentrations** are offered:

African Studies
Canadian Studies
Classics and Linguistics
French Canada Studies
Humanistic Studies
Industrial Relations
Latin American Studies
Modern Languages
Modern Literature
North American Studies
Faculty program in Mathematics and Philosphy
Faculty Program in Psychology and Mathematics
Faculty Program in Psychology, General

Social Work: The undergraduate program of professional studies begins in the first year of the three-year program. For further information see the *Announcement of the Faculties of Arts and of Science.*

ENTRANCE REQUIREMENTS

See Section 2.

3.4 Faculty of Dentistry

Dean – E.R. AMBROSE, D.D.S. (McG.), F.I.C.D., F.A.C.D., F.R.C.D.(C) (until June 1, 1977)
Strathcona Anatomy and Dentistry Building
3640 University Street
Montreal, PQ H3A 2B2

DEGREES OFFERED

Doctor of Dental Surgery (D.D.S.)
Period of Study in the Faculty for the degree is four years.

Granted under the Faculty of Graduate Studies and Research:
Master of Science in Prosthodontics and Restorative Dentistry (M.Sc.)*
Two additional years after the D.D.S.
Master of Science in Oral Surgery (M.Sc.)*
Three additional years after the D.D.S.

**Pending full authorization.*

ENTRANCE REQUIREMENTS

The minimum requirement for admission to the study of dentistry is the satisfactory completion of EITHER the Collegial program in the Province of Quebec OR two full years in a four-year program leading to the B.A. or B.Sc. degree (or the equivalent thereof). In each instance the program must include one full year course in each of the following subjects: mathematics; physics, with laboratory; inorganic or general chemistry, with laboratory; organic chemistry, with laboratory; general biology or zoology, with laboratory (one half year of botany and one half year of zoology will be accepted but not one year of botany alone).

Canadian applicants are requested to write the Canadian Dental Association Aptitude Test and have the results sent to the Faculty. Detailed information may be obtained from the Administrator, Dental Aptitude Test Program, The Canadian Dental Association, 1815 Alta Vista Drive, Ottawa, Ontario, K1G 3Y6.

Candidates applying from the United States should write the American Dental Association Aptitude Test and have the results sent to the Faculty.

APPLICATIONS

Application forms for admission to the Faculty may be obtained from the Secretary of the Faculty. The deadline date for receipt of applications is March 1 of the year in which the candidate is seeking admission.

Entering students are advised to make themselves familiar with the specific regulations of the province or state in which they intend to practise upon graduation and to take the necessary steps to become registered.

For details see the *Announcement of the Faculty of Dentistry.*

3.5 Faculty of Education

Dean – GEORGE E. FLOWER, B.A., M.A. (McG.), Ed.D. (Harv.)
3700 McTavish Street
Montreal, PQ H3A 1Y2

The Faculty of Education is responsible for the professional education of teachers. It offers a variety of programs by which candidates are prepared for a teaching career in the elementary and secondary schools of Québec. Successful completion of any of these programs qualifies the eligible candidate for a Teaching Permit issued by the Québec Department of Education. For details see the *Faculty of Education Announcement.*

Graduate work leading to the Master of Arts in Education, Master of Education, and Doctor of Education degrees is offered under the authority of the Faculty of Graduate Studies and Research of McGill University. For details see the *Announcement of the Faculty of Graduate Studies and Research, Section G''.*

DEGREE OFFERED

Bachelor of Education (B.Ed.)

DEGREE PROGRAM

The three-year program leading to the B.Ed., degree is available with the following options:
Elementary – Pre-School.
Elementary – Early Childhood.
Elementary – Later Childhood.
Secondary – Major in one Teaching Subject.
Secondary – Two Subject Option.

Special Areas – Art, French, Physical Education, Home Economics, Religious Studies (Protestant, Catholic or Jewish) and Vocational Education.

The B.Ed. (Elementary Option) is available also on a part-time basis to those who:

(a) hold a teaching certificate valid in Québec or its equivalent; and
(b) have Quebec Diploma of Collegial Studies standing or its equivalent (i.e. a minimum of 13 years of attested studies).

ENTRANCE REQUIREMENTS

Successful completion of a Diploma of Collegial Studies program or equivalent. (See Section 2, Entrance Qualifications).

McGILL DIPLOMA IN EDUCATION PROGRAM

A one-year program leading to the McGill Diploma in Education and to a teaching permit for elementary or secondary schools and for Technical-Vocational and Business Education subjects in secondary schools. Eligible candidates must normally possess a university degree with a major (six full courses) in one subject taught in elementary or high schools or a minimum of three full courses in each of two such subjects.

McGILL DIPLOMA IN EDUCATIONAL ADMINISTRATION

A part-time program, the equivalent of one full year of study, is available in Educational Administration for teachers possessing a university degree, a teaching certificate and administrative experience.

CERTIFICATE PROGRAMS

One-year programs leading to a Québec Teaching Permit in the following options:

Technical-Vocational (Secondary)
Business Education (Secondary)

Candidates for these options must possess a Diploma of Collegial Studies or its equivalent in the appropriate field of study. Appropriate work experience is also required. Similar 30 credit programs are available in these options on a part-time schedule for candidates who meet admission requirements (above) and who are employed as teachers of these subjects in Québec high schools.

A part-time 30 credit program leading to a **Certificate in Second Languages (English or French)** is offered to certified teachers who possess oral and written competence in the language they wish to teach as a second language in an elementary school. Normally candidates must be recommended by the employing school board. Other applicants should contact the Chairman of the Department of Education in Second Languages.

A 30 credit in-service program leading to Provincial Certification at secondary or elementary levels (except in Physical Education) is offered for candidates who possess a Québec Provisional Teaching Authorization and a contract to teach full time with a recognized school board.

SPECIALIZED PROGRAMS

The Faculty also offers specialized programs designed for certified teachers as follows:

Diploma in Special Education
Diploma in Reading Instruction
Kindergarten Diploma
Diploma in Educational Media

These programs meet provincial standards in regard to the upgrading of teacher classification and they may also be used as credit towards the McGill B.Ed. degree. (For specific information concerning any or all of these programs please refer to the *Faculty of Education Announcement).*

NOTE

It should be emphasized that possession of a bare passing standard will not automatically guarantee acceptance into the Faculty of Education. Preference will be given in any of the above programs to candidates having a second-class standing or better. Satisfactory letters of reference are also required and candidates for certain options may be required to attend an interview. All candidates for a Québec Teaching Permit must also demonstrate fluency in the language of instruction (English or French).

APPLICATION FORMS

Application forms for full-time programs and further information concerning admission requirements may be obtained from:

Admissions Office
McGill University
F. Cyril James Building
845 Sherbrooke St. West
Montreal, PQ H3A 2T5

Application forms for part-time programs may be obtained from the Student Affairs Office of the Faculty of Education.

3.6 Faculty of Engineering (Including the School of Architecture and the School of Computer Science)

Dean – GERALD W. FARNELL, B.A. Sc. (Tor.), S.M. (M.I.T.), Ph.D. (McG.), Eng.
Macdonald Engineering Building
817 Sherbrooke St. West
Montreal, PQ H3A 2K6

Degree programs outlined below are described in detail in the *Announcement of the Faculty of Engineering.*

ARCHITECTURE

Director – DEREK DRUMMOND, B.Arch. (McG.).

Degrees Offered

1) Bachelor of Science (Architecture), (B.S. (Arch.)).
2) Bachelor of Architecture (B.Arch.).

Period of Study

B.Sc. (Arch.): a minimum of three years.
B. Arch.: a minimum of one year after the McGill B.Sc. (Arch.) degree.

Entrance Requirements

Entrance requirements include successful completion of a Diploma of Collegial Studies in the Physical Sciences, or equivalent. Enrolment in the School is limited and admission is based on academic standing and aptitude (see Section 2).

Privileges of Holders of the Degree of Bachelor of Architecture

The Province of Québec Association of Architects admits Canadian holders of the degree of Bachelor of Architecture to membership, and thereby to practice in the province, after completing two years' apprenticeship under conditions specified by the Association and after passing an examination in professional practice.

The School of Architecture is recognized by the Royal Institute of British Architects and the instruction given meets the requirements of the Board of Architectural Education of that body.

For complete details of program, courses, rules governing attendance and promotion, etc., see the *Announcement of the Faculty of Engineering.*

ENGINEERING

Degrees Offered

1) Bachelor of Engineering (B.Eng.), in the departments of Chemical, Civil, Electrical, Mechanical, and Mining and Metallurgical Engineering and Applied Geophysics.
2) Bachelor of Engineering (B.Eng.) (Honours), in the departments of Electrical and Mechanical Engineering.

Period of Study

A minimum of three years is required.

Programs

1) The Regular Program is designed to prepare candidates for a wide variety of careers in engineering. Graduates with high standing and an interest in university careers or other research activities are encouraged to continue their studies at the graduate level.
2) An Honours Program, available in the departments of Electrical and Mechanical Engineering, is designed particularly for students who intend to pursue research careers in these fields. Admission is at the discretion of the departments and is normally granted only to students who have demonstrated high ability in mathematics and physics at the collegial level.

Students who fail to maintain honours standing are required to transfer to the Regular Program.

Entrance Requirements

Entrance requirements are based on successful completion of a Diploma of Collegial Studies in the Physical Sciences or equivalent (see Section 2).

For complete details of programs, courses, rules governing attendance and grading, etc. see the *Announcement of the Faculty of Engineering.*

Privileges of Holders of the Bachelor of Engineering Degrees

Holders of these degrees are eligible for membership in numerous organizations in Canada and abroad. More detailed information can be obtained from the chairmen of the departments concerned.

SCHOOL OF COMPUTER SCIENCE

Director – G. MARSAGLIA, B.Sc. (Colorado), Ph.D. (Ohio State)

Degrees Offered (Faculty of Graduate Studies and Research)

1) Master of Science (M.Sc.)
2) Master of Science (Applied) (M.Sc. (A.))
3) Doctor of Philosophy (Ph.D.)

Undergraduate Courses

The School of Computer Science offers a number of undergraduate courses. Further information can be obtained from the *Announcements of the Faculty of Engineering* and *the Faculty of Science.*

Postgraduate Programs

The requirements for entrance into and for successful completion of the Master's and Doctor's programs offered by the School of Computer Science may be found in the *Announcement of the Faculty of Graduate Studies and Research Section "E", Physical Sciences and Engineering.* A list of the postgraduate courses offered by the School is published in the same Announcement.

3.7 *Faculty of Graduate Studies and Research*

Dean – W.F. HITSCHFELD, B.A.Sc. (Tor.), Ph.D. (McG.), F.R. Met. S.
Dawson Hall
853 Sherbrooke St. West
Montreal, PQ H3A 2T6

The Faculty of Graduate Studies and Research offers programs leading to diplomas and degrees as follows:

DIPLOMAS

Air and Space Law
Advanced Social Work Practice
Engineering Aspects of Arid Land Development
Epidemiology and Health
Geological Sciences
Mining Engineering

MASTER'S DEGREES

The Degree of Master of Architecture (M.Arch.) may be obtained in the following fields:

Architectural Design
Housing

The Degree of Master of Arts (M.A.) may be obtained in the following subjects:

Anthropology
Art History
Classics
Communications
Comparative Literature*
Economics
Education
English
French
Geography
German
Hispanic Studies
History
Islamic Studies
Italian
Linguistics
Mathematics
Music
Philosophy
Political Science
Psychology
Religious Studies
Russian
Sociology

**Pending full authorization.*

The Master's Degree in Business Administration (M.B.A.)
The Master's Degree in Education (M.Ed.)
The Degree of Master of Engineering (M.Eng.) may be obtained in the following fields of Engineering:

Chemical
Civil
Electrical
Mechanical
Mining and Metallurgical Engineering and Applied Geophysics

Master's Degrees in Law:

1) **The Degree of Master of Civil Law (M.C.L.)** is offered in the Institute of Comparative Law.

2) **The Degree of Master of Laws (LL.M.)** is offered in the Institute of Air and Space Law and in the Institute of Comparative Law.

The Master's Degree in Library Science (M.L.S.)

The Master's Degree in Music (M.Mus.)

The Master's Degree in Sacred Theology (S.T.M.)

The Degree of Master of Science (M.Sc.) may be obtained in the following subjects:

Agricultural Chemistry
Agricultural Engineering
Anatomy
Animal Science
Biochemistry
Biology
Chemistry
Computer Science
Crystallography
Electrical Communications
Entomology
Epidemiology and Health
Experimental Surgery
Fluid Mechanics
Geography
Geological Sciences
Geophysics
Glaciology
Human Communication Disorders
Marine Sciences
Mathematics
Medicine, Experimental
Meteorolgy
Microbiology and Immunology
Microbiology (Macdonald College)
Mining and Metallurgical Engineering and Applied Geophysics
Neurology and Neurosurgery
Oral Surgery*
Otolaryngology
Parasitology
Pathology
Pharmacology
Physics
Physiology
Plant Science
Prosthodontics and Restorative Dentistry*
Psychiatry
Psychology
Radiology
Renewable Resources
Wildlife Biology

**Pending full authorization*

The Degree of Master of Science (Applied) (M.Sc. (A.)) may be obtained in the following subjects:

Computer Science
Geological Sciences (Engineering Geology, Mineral Exploration)
Health Sciences (Rehabilitation)*
Human Communication Disorders
Medical Radiation Physics*
Microbiology and Immunology
Nursing
Psychology

**Pending full authorization.*

The Master's Degree in Social Work (M.S.W.)

The Master's Degree in Urban Planning (M.U.P.)

DOCTOR'S DEGREES

The Doctor's Degree in Civil Law (D.C.L.)

The Doctor's Degree in Education (D.Ed.)

The Doctor's Degree in Music (D.Mus.)

The Degree of Doctor of Philosophy (Ph.D.) may be obtained in the following subjects:

Agricultural Chemistry
Agricultural Engineering
Anatomy
Animal Science
Anthropology
Art History
Biochemistry
Biology
Chemical Engineering
Chemistry
Civil Engineering
Classics
Communications
Computer Science
Economics
Electrical Engineering
English
Entomology
Epidemiology and Health
Experimental Medicine
Experimental Surgery
French
Geography
Geological Sciences
German
History
Human Communication Disorders
Islamic Studies
Linguistics
Marine Sciences
Mathematics
Mechanical Engineering
Meteorology
Microbiology and Immunology
Microbiology (Macdonald College)
Mining and Metallurgical Engineering and Applied Geophysics
Neurology and Neurosurgery
Parasitology
Pathology
Pharmacology
Philosophy
Physics
Physiology
Plant Science
Political Science
Psychology
Religious Studies
Renewable Resources
Russian
Sociology

For complete information on all programs see the *Announcement of the Faculty of Graduate Studies and Research.* Application forms may be obtained from the Faculty Office.

GRADUATE FELLOWSHIPS

Inquiries about graduate fellowships, etc. which are open to graduates of other universities as well as of Canadian universities should be addressed to the Fellowships Office, Faculty of Graduate Studies and Research. See also the *Postgraduate Fellowships, Bursaries and Prizes Announcement* available from the Faculty Office. Inquiries about assistantships should be directed to the individual Departments.

3.8 *Faculty of Law*

Dean – JOHN E.C. BRIERLEY, B.A. (Bishop's), B.C.L. (McG.), D.U. (Paris)
Chancellor Day Hall
3644 Peel Street
Montreal, PQ H3A 1W9

DEGREES AND DIPLOMA OFFERED

Bachelor of Civil Law (B.C.L.), and Bachelor of Laws (LL.B.).
Under the authority of the Faculty of Graduate Studies and Research the degree of Master of Civil Law (M.C.L.) is granted for advanced study in law, the degree of Master of Laws (LL.M.) for studies in the field of international air law and comparative law, and the degree of Doctor of Civil Law (D.C.L.) for higher studies in law. A graduate diploma in Air and Space law is also offered.

PERIOD OF STUDY

Period of study of the B.C.L. or LL.B. degree: Three years for one degree or four years for both degrees.

Students proceeding to the Québec Bar and notarial profession are required to take additional training after graduation from the Faculty.

Students studying for the Bachelor of Laws degree (LL.B.) may proceed thereafter to the Bar Admission program of one of the Common Law provinces.

ENTRANCE REQUIREMENTS

To be qualified for admission to the Faculty a student must have obtained second class standing in the B.A. or equivalent degree from a university or college which is recognized by McGill University, or a diploma with a high standing from a Québec College of General and Professional Education (CEGEP), or a Diploma of Collegial Studies from a Québec university, and have substantial fluency in both the French and English languages. In exceptional cases students who do not intend to practise either the legal or notarial profession may be admitted to the Faculty with lesser academic qualifications if they are qualified to pursue with advantage the study of law. In all cases, admission is at the discretion of the Faculty. Between applicants who apply for admission to the LL.B. program, preference is given to those intending to proceed to both the LL.B. and B.C.L. degrees. Students entering the Faculty with a CEGEP diploma must take the B.C.L. degree before they are permitted to proceed to the LL.B. degree. *The attention of candidates holding CEGEP diplomas is drawn to the fact that admission to the Bars of the other provinces may require additional years of pre-law university education. In particular, the Law Society of Upper Canada requires an additional pre-law university year for those holding CEGEP diplomas.*

Candidates for admission to the Québec Bar must be Canadian citizens and must hold a diploma from a Québec College of General and Professional Education (CEGEP), or a Diploma of Collegial Studies from a Québec university, or a B.A. degree or its equivalent from a university or college of which the degree is recognized jointly by Laval, McGill, Montreal, Ottawa and Sherbrooke Universities and, in addition, by the Bar.

Candidates for admission to the Québec notarial profession must be Canadian citizens and hold a diploma from a Québec College of General and Professional Education (CEGEP), or a Diploma of Collegial Studies from a Québec university, or a B.A. of a university or college whose degree is recognized jointly by Laval, Montreal, McGill, Sherbrooke and

Ottawa Universities for admission to their law courses, and also by the Board.

Candidates for the Bachelor of Laws degree (LL.B.) seeking entrance to the Bar Admission program of any of the Common Law provinces must satisfy the regulations of the particular Common Law province to the Bar admission course or program to which entrance is sought.

For details concerning staff, curriculum and also higher studies in the Institutes of Air and Space Law and Comparative Law see the *Announcement of the Faculty of Law*.

APPLICATIONS

The deadline for receipt of applications is February 1 of the year in which the candidate is seeking admission. Application forms may be obtained from the Faculty Admissions Office. All inquiries should be addressed to the Faculty.

3.9 Graduate School of Library Science (in the Faculty of Graduate Studies and Research)

Director – VIVIAN S. SESSIONS, A.B., M.A. (Mich.), M.S. (Lib.Sc.) (Col.)
McLennan Library
3459 McTavish St.
Montreal, PQ H3A 1Y1

DEGREE OFFERED

Master of Library Science (M.L.S.)
Period of Study. Two years.

ENTRANCE REQUIREMENTS

A B.A. or B.Sc. from a recognized university. Applicants are expected to have a knowledge of at least one language other than English. Academic standing of at least "B" (or second class) is required. For details see the *Announcement of the Graduate School of Library Science*.

3.10 Macdonald College

Macdonald College, PQ
H0A 1C0

Macdonald College, which was founded and endowed by the late Sir William C. Macdonald, is incorporated with McGill University. It is situated twenty miles west of Montreal, at Ste. Anne de Bellevue, Quebec. It consists of the Faculty of Agriculture, which includes the School of Food Science.

All programs leading to the Bachelor's, Master's and Doctoral degrees are under the control of the Senate of McGill University; the Diploma program in Agriculture is under the sponsorship of the Québec Ministry of Agriculture and is administered by the Faculty of Agriculture.

FACULTY OF AGRICULTURE (Including the School of Food Science)

Dean – L.E. LLOYD, B.Sc.(Agr.), M.Sc., Ph.D.(McG.)

The work of the agricultural departments of the College falls into three main divisions: teaching, research, and extension. Teaching and research form the major part of their work. Extension activities are coordinated by the Extension Department and fall under the following: community programs, extension film library, extension courses, Macdonald Journal and an Information Service.

The School of Food Science is an integral part of the Faculty of Agriculture. The main function of the School is to provide professional education in Food and Consumer Sciences, including Home Economics.

DEGREES OFFERED

Bachelor of Science in Agriculture (B.Sc. (Agr.)).
Bachelor of Science in Agricultural Engineering (B.Sc. (Agr. Eng.)).
Bachelor of Science in Food Science (B.Sc. (F.Sc.)).

DIPLOMA OFFERED

Diploma in Agriculture.

ENTRANCE REQUIREMENTS

The diploma of Collegial Studies in science or its equivalent is required for entrance to the degree programs.

By special agreement, the Nova Scotia Agricultural College, Truro, N.S., has arranged to provide their students with a program of studies permitting transfer to the Faculty of Agriculture at Macdonald College. Students who have completed such a program of study with satisfactory standing in courses equivalent to the Diploma of Collegial Studies will be admitted to the appropriate years in the Faculty provided that their overall averages and their grades in individual courses are considered satisfactory by the Committee on Admissions.

Students from outside Québec who have completed Senior Matriculation or the equivalent will be considered for admission to a 120 credit program. If admitted they will be granted credit for some of the work done at the Senior Matriculation level and will be required to do additional Science and Mathematics.

Students transferring from other faculties or universities will be granted credits towards their degree for courses which they have passed at a satisfactory level and are considered equivalent to courses offered by the Faculty.

Successful completion of Québec Secondary V is required for admission to the 24-month Diploma in Agriculture program.

APPLICATION DATE

Applications for admission to the Faculty of Agriculture and the School of Food Science may be submitted until July 1 for fall admission and November 1 for January admission and may be obtained from The Registrar, Macdonald College, PQ H0A 1C0.

PROGRAMS OF STUDIES

The three-year program involves a total of at least 90 credits depending on the major chosen. Each major requires: (1) a certain number of required "core" credits, (2) credits elected in consultation with the Professor in charge of the major, and (3) free credits elected by the students.

The following programs of study are offered by the Faculty of Agriculture and the School of Food Science.

Bachelor of Science in Agriculture, B.Sc. (Agr.)

A 90 credit program from the Diploma of Collegial Studies leading to professional qualification in Agricultural Science (Agricultural Economics, Animal Science, General Agricultural Science, Plant Science, Soil Science) or in one of its related specialized branches in the Biological Sciences (Botanical Sciences, Environmental Biology, Microbiology, Zoological Sciences) and Renewable Resources Development (Environmental Conservation, Agricultural Land Planning and Development, Community Resource Development, Landscape Design, Resource Economics and Planning, Wildlife Resources).

Bachelor of Science in Agricultural Engineering, B.Sc. (Agr.Eng.)

A 96 credit program from the Diploma of Collegial Studies leading to professional qualification in Agricultural Engineering. Holders of this degree are eligible for membership in professional engineering societies.

Bachelor of Science in Food Science, B.Sc. (F.Sc.)

A 90 credit program from the Diploma of Collegial Studies leading to the professional qualifications necessary for dietetics, or food science as well as the following regions in the Food and Consumer Sciences Area: Food Chemistry, Food Administration, Nutrition, and Consumer Services. Joint programs with the Faculty of Education leading to the B.Ed., Major in the Teaching of Home Economics and with the Faculty of Management leading to the B.Com., Major in Food Services Administration are also offered.

Diploma in Agriculture

A two-year program in practical agriculture designed to prepare students for careers in agricultural production and management.

Postgraduate Programs in Agricultural Science

These lead to the degrees of Master of Science and Doctor of Philosophy, with study and research in one or more of the Departments of the Faculty or the School of Food Science. The program of studies and examinations are controlled by the Faculty of Graduate Studies and Research.

3.11 *Faculty of Management*

Dean – STANLEY J. SHAPIRO, A.B. (Harv.), M.B.A., Ph.D. (Penn.).

Samuel Bronfman Building
1001 Sherbrooke St., West
Montreal, PQ H3A 1G5

DEGREES, CERTIFICATES AND DIPLOMAS OFFERED

Bachelor of Commerce (B.Com.).

Certificate in Management (offered through the Centre for Continuing Education, in cooperation with the Faculty of Management, in a wide variety of areas).

Diploma in Management.

Diploma in Management (Tourism).

Master of Business Administration (M.B.A.) (Faculty of Graduate Studies and Research).

Aims of the Undergraduate Program

Management means getting things accomplished as effectively as possible. The ideal manager is a well-rounded person, with strong character, good judgment, breadth of vision and thorough competence in the management skills – behavioural and quantitative – which are being developed in this age of rapid technological change.

When everything is changing at such a fantastic pace, it is no longer possible to train good managers by simply passing on to them wisdom developed in a past age. Experience can still be a great teacher, but only if intelligently interpreted and applied. Concepts must not be static; managers must be developed who can meet new challenges as they arise.

The different qualities required in a competent manager are teachable in varying degrees. The aim of the program is to give students an opportunity to master new management techniques, and also to broaden their outlook by optional courses in a wide variety of disciplines. There are certain management skills which constitute "core" subjects which every manager should have – but beyond these, students are encouraged to follow lines of interest through which they will emerge broadly educated. A good manager must be able to understand and to work with both the generalists and specialists that are required in our complex society.

DEGREE PROGRAMS AND REQUIREMENTS

GENERAL PROGRAM

The three-year program involves a total of 90 credits. Of these
(1) 42 credits are in "Primary Core" subjects, required of all students. Included are Accounting, Behavioural Science, Computers, Economics, Finance, Marketing, Mathematics, Operations Research, Policy, and Statistics.
(2) A further 18 credits are chosen for deeper study in a particular Management Concentration Group. These groups include Accounting, Computers and Systems, Finance, Industrial Relations, International Business, Marketing, Organizational Behaviour and Personnel, Policy, Small Business and Entrepreneurship, and Quantitative Methods.
(3) A further 12 to 18 credits are chosen from courses offered in other Faculties to help round out the student's overall background, and
(4) the remaining credits are chosen from the "Secondary Core" and unrestricted elective offerings.

Students who have adequate academic background in certain Core subjects will be given exemption from the required courses involved and will replace these courses by other courses offered by the Faculty.

An option of the General Program allows students to spend their middle year on the Macdonald College campus following an integrated program to qualify for the Food Services Administration option.

MAJOR AND HONOURS PROGRAMS

Major programs are available within the Faculty in Economics, Economics and Political Science, Industrial Relations, Mathematics and Psychology and Management Information Systems.

Honours programs are available within the Faculty in Economics, and Economics and Accounting.

ENTRANCE REQUIREMENTS

A Québec applicant to the Bachelor of Commerce Program will generally be considered to satisfy the admission requirements if he has successfully completed a two-year pre-university CEGEP program. Included in this program should be CEGEP Mathematics courses 101, 103, 105 and 203. Students who have been prevented from including all four Mathematics courses in their programs due to timetable difficulties, program re-orientation, etc., will be given serious consideration if they have good standing in at least 103 and 203. Students are strongly advised to include a wide variety of courses in their CEGEP programs and to not concentrate on business and management subjects before entering the B.Com. program. Students from other provinces and countries will be considered for admission at a level commensurate with their academic attainments.

Individuals at least 23 years of age who have not completed CEGEP studies or their equivalent may be considered for admission as mature students.

Students wishing to enter the Bachelor of Commerce program may obtain application forms from:

Admissions Office
McGill University
F. Cyril James Building
845 Sherbrooke St. West
Montreal, PQ H3A 2T5

TRANSFER STUDENTS

Students presently enrolled in another Faculty of this University wishing to transfer to the Bachelor of Commerce program must apply in writing not later than July 1 to:

The Secretary of Admissions
Bachelor of Commerce Program
Faculty of Management
Samuel Bronfman Building
1001 Sherbrooke St. West
Montreal, PQ H3A 1G5

DIPLOMA PROGRAM

For details see *Announcement of the Centre for Continuing Education.*

GRADUATE PROGRAM

Master of Business Administration
Faculty of Graduate Studies and Research

Period of Study: Two years. (The second year may also be completed on a part-time basis over a three-year period).

Entrance Requirements

A Bachelor's degree with A or at least B average standing from an accredited college or university, a high score on the Princeton Admission Test for Graduate Studies in Business, and two letters of recommendation from current or former university teachers.

For further details of the above, see the *Announcement of the Faculty of Graduate Studies and Research, Section "I" or the Announcement of the Faculty of Management, Master of Business Administration.*

3.12 Faculty of Medicine

Dean – SAMUEL O. FREEDMAN, B.Sc., M.D., C.M.(McG.), F.R.S.C., F.R.C.P. (C), F.A.C.P.

McIntyre Medical Sciences Building
3655 Drummond Street
Montreal, PQ H3G 1Y6

DEGREES AND DIPLOMAS OFFERED

Doctor of Medicine and Master of Surgery (M.D., C.M.).

McGILL UNIVERSITY LIBRARY

The degrees of M.Sc. and Ph.D. in Medical and Allied Sciences are granted under the authority of the Faculty of Graduate Studies and Research. For information see the *Announcement of the Faculty of Graduate Studies and Research.*

Diplomas for advanced study in Anesthesia and Psychiatry are granted under the authority of the Faculty of Graduate Studies and Research. Information is available from the Associate Dean (Postgraduate Education) of the Faculty of Medicine.

Period of Study in the Faculty for the Degree of M.D., C.M.: Four years.

Licence to Practise: The provincial Medical Boards define the requirements of fully licensed medical practitioners in each province. Final-year medical students wishing to apply for the examination of the Medical Council of Canada must do so before March 15. Details of the requirements of registration must be obtained from the Medical Board in the province where the student intends to practise.

ENTRANCE REQUIREMENTS

A. The Four-Year Program in Medicine

Applicants must be proceeding towards the satisfactory completion of a course of study leading to the Bachelor's degree at a recognized college or university. All successful candidates must be in receipt of the Bachelor's degree prior to registration in the first year of the medical curriculum.

Scientific Requirements:

Physics – One full course with laboratory work.

Biology – One full course including studies of biology at the cell and molecular level.

Chemistry (General), one full course with laboratory work.

Chemistry (Organic), one full course with laboratory work.

In addition, one full course in Physiology (human and/or mammalian) with laboratory work is recommended.

Cultural Requirements:

In addition to the scientific requirements applicants are encouraged to have an adequate preparation in English literature and composition, mathematics, and a working knowledge of the French language.

In selecting courses, in addition to the specific requirements listed above, an intending medical student should plan his pre-medical program as a whole, and in accordance with a definite educational objective. Emphasis should be placed on the broad educational value and the intellectual training afforded, rather than on the factual content of such pre-medical curricula; the student is therefore advised to select a major field which appeals to him; this major field may be selected from the natural or social sciences or the humanities. Certain subjects though not essential have been found valuable in medical study and may be included as electives if the curriculum in the major field permits: psychology, sociology, genetics, anthropology, mathematics or languages.

B. The Five-Year Program in Medicine

Canadian citizens and landed immigrants resident in the Province of Québec, completing the two-year program in the Québec Colleges of General and Professional Education (CEGEP), are eligible to apply for the five-year program providing they have taken the following science courses: one full year course in General Chemistry with laboratory work, one half year course in Organic Chemistry with laboratory work, one full year course in Physics with laboratory work and one full year course in General Biology. A full year course in Mathematics is also recommended. Persons having attended other technical schools or university programs before attending CEGEP are not eligible to apply for the five-year program nor are persons attending any collegial or premedical program that is not a Québec CEGEP.

Students in the five-year program will be registered in the Faculty of Science for the first year (Med-P year). Providing that a satisfactory academic standing has been maintained, the student proceeds into the four-year medical curriculum. Such applicants may complete the scientific entrance requirements for the four-year program during the Med-P year.

C. Equivalent (Advanced) Standing

Students are admitted only to the first and second years. A limited number of transfer students from other medical schools may be accepted into Phase IB or Phase II programs. For details see *Announcement of the Faculty of Medicine*

APPLICATION FOR ADMISSION TO THE FOUR YEAR PROGRAM

Application for admission to the Faculty of Medicine must be made on the special application forms available only from the Office of the Associate Dean (Admissions), Faculty of Medicine, Room 609, McIntyre Medical Sciences Bulding. All requests for application materials will be assigned to a mailing list. The materials will be forwarded during the month of September. Applications for the first-year class of September 1978 will be available after September 1, 1977. Applicants to the Four-year and Advanced Standing programs will be asked to complete a Stage I application which is reviewed by members of the Admissions Committee. Selected applicants will be invited to complete a Stage II application. There is no fee for the Stage I application. The Stage II application must be accompanied by a non-returnable fee of $15.00 in the form of a cheque or money order payable to McGill University. Applicants currently enrolled at McGill University are not required to pay this fee. The deadline for Stage I application is January 15, 1978 and for the Stage II application, March 1, 1978. Although the great majority of the entering class is below the age of 27, older applicants will be considered.

Application Procedures for the Five-Year Program

Application for admission to the five-year medical program must be made on the application forms available only from the office of the Associate Dean (Admissions), Faculty of Medicine. Applications for the five-year Program for September 1978 will be available after October 1, 1977.

Medical College Admission Test

All applicants are required to take the New Medical College Admission Test. *For those applying to the four-year medical program the test must be taken prior to the close of Stage I applications, January 15, 1978 (see below).* This test is conducted by the American College Testing Program (P.O. Box 414, Iowa City, Iowa 52240) at various centres in the spring and fall of each year. *Candidates for the fall 1978 entering class must present scores from the New 1977 MCAT.* The 1977 MCAT fall date is October 1, 1977. The fall postmark registration deadlines are September 2 for those candidates testing in the United States, Canada and Puerto Rico; and August 29 for those testing in foreign countries. Registration materials will be available on college campuses about February 1, 1977. *Registration packets should not be mailed too close to the postmark deadline since past experience has shown that packets are sometimes postmarked a day or two after they have been put in a mail box.* No late applications will be accepted.

Applicants to the five-year medical program must write the New Medical College Admission Test in the spring of their second collegial year. Registration packets will be available from the Faculty of Medicine admissions office about February 1, 1978, as well as information concerning deadlines for this test.

It is realized that English is not the first language of many applicants to this Faculty and this fact will be taken into account in assessing the results of this test.

Final Selection

After a review of the submitted application material, the Admissions Committee decides which applicants will be invited to come to the Faculty of Medicine offices for interviews with Committee members. The Admissions Committee judges applicants on the basis of academic achievement (entire academic record and MCAT) as well as personal qualities and attitudes.

During the past few years, the Admissions Committee has selected an increasing number of Québec students. 20% of the entering class are accepted from applicants outside the Province of Québec. There are a total of 160 students in the first-year class.

Accepted students for the 1976 entering class had the following credentials: mean G.P.A. (Based on 4 being the high) 3.58, M.C.A.T. percentile scores, VA. 68, QA. 76, GI. 63, SCI. 76.

For further details see the *Faculty of Medicine Announcement.*

3.13 Faculty of Music

Dean – PAUL PEDERSEN, B.A. (Sask.), M.Mus., Ph.D. (Tor.)

Strathcona Music Building
555 Sherbrooke St. West
Montreal, PQ H3A 1E3

DEGREES AND DIPLOMAS OFFERED

Bachelor of Music (B.Mus.)
Master of Arts (M.A.) (Faculty of Graduate Studies and Research)
Master of Music (M.Mus.) (Faculty of Graduate Studies and Research)
Doctor of Music (D.Mus.) (Faculty of Graduate Studies and Research)
Licentiate in Music (L.Mus.)
Concert Diploma

PERIOD OF STUDY

B.Mus. degree – normally three years after the completion of the Diploma of Collegial Studies or its equivalent.
M.A. degree – minimum one year after B.Mus.
M. Mus. degree – minimum one year after B. Mus.
D.Mus. degree – two years after the M.Mus.
Licentiate – normally three years.
Concert Diploma – two years after the Licentiate.

UNDERGRADUATE PROGRAMS

Bachelor of Music

The degree of Bachelor of Music can be obtained in any one of the following fields:

Composition

Major and Honours programs are offered in Composition. The Honours program is considered prerequisite for graduate studies in Composition.

Music History

Major and Honours programs are offered in Music History. The Honours program is considered prerequisite for graduate studies in Musicology.

Performance

Major and Honours programs are offered in Music Performance. The Honours program is considered prerequisite for graduate studies in Performance.

Theory

An Honours program is offered in Music Theory. This program is considered prerequisite for graduate studies in Theory. Interdisciplinary programs are

offered which combine Music Theory with studies in one of English, Linguistics, Mathematics, Philosophy or Psychology. The purpose of these programs is to prepare the student for graduate studies combining Music Theory with the other discipline.

School Music

Major programs are offered with two concentrations: Keyboard/Choral and Orchestral Instruments. These programs are prerequisite to studies in Education leading to certification as a Music Specialist in the Public School System.

Designated Major

Special programs of study in music may be proposed in consultation with Faculty advisers. Such special proposals must be approved by the Chairmen's Committee and by Faculty Council.

DIPLOMA PROGRAMS

Licentiate in Music

The Licentiate in Music program is specially designed for those instrumentalists and singers who wish to concentrate on their practical subject while limiting their theoretical studies to basic areas in History, Theory and Ear Training.

Concert Diploma

This is a post-Licentiate diploma available only to specially gifted instrumentalists and singers who have the proven talent and capacity for a professional career as performers.

For details of these programs, please consult the *Announcement of the Faculty of Music.*

GRADUATE PROGRAMS

Graduate studies in music are offered by the Faculty of Music in conjunction with the Faculty of Graduate Studies and Research as follows:

Master of Arts:

Studies leading to the M.A. degree are available in the fields of Musicology and Theory.

Master of Music

Studies leading to the M.Mus. degree are available in the fields of Composition and Performance.

Doctor of Music

Studies leading to the D.Mus. are available in the field of Composition.

For details of these graduate programs, please consult the *Announcement of the Faculty of Graduate Studies and Research.*

GENERAL INFORMATION

The McGill Faculty of Music is located in the Strathcona Music Building. The Faculty's facilities include classrooms; teaching studios; practice rooms; a library of books, scores and recordings; reading rooms; listening booths; an Electronic Music Studio; a recital hall and the Maurice Pollack Concert Hall.

Montreal is not only a most stimulating city because of its bilingual, bicultural character, but it is also a music centre of the first order. The many concerts by the world's celebrated artists and ensembles at the Place des Arts; the annual concert series by the Montreal Symphony Orchestra, the McGill Chamber Orchestra, Société de Musique Contemporaine du Québec, etc.; opera and ballet presentations; the T.V. and radio concerts of the Canadian Broadcasting Corporation's French and English production centres; the presence of the Canadian headquarters of the Jeunesses Musicales with its beautiful concert hall and music camp at nearby Mont Orford; international music competitions; summer concerts – all these and many other events and attractions offer a unique opportunity for first-hand experience and study to the young music student.

Music Credit Options in Other Faculties

The Faculty of Music offers two series of courses that may be taken for credit by students in other faculties. One series is a sequence of professional courses that deal with music theory and history and is part of the undergraduate music curriculum. These courses are open to those who have the necessary prerequisite studies in music. Selected Faculty of Music ensembles are open to students from other faculties by audition.

The courses in the other series are designed to meet the needs of those students who are interested in cultural and historical studies in music.

ADMISSION

Inquiries concerning admission to all programs should be directed to the Administrative Assistant (Admissions), Faculty of Music, Strathcona Music Building, 555 Sherbrooke St. West, Montreal PQ H3A 1E3.

Application forms may be obtained from the Faculty of Music. Completed applications *must be returned to the Faculty of Music* before March 1 of the year in which the candidate hopes to gain admission. Late applications will be considered if space still remains for admission.

ENTRANCE REQUIREMENTS

Because the following requirements are written for Québec students, applicants from elsewhere should refer to section 2. Students from other provinces, the United States and overseas will be accepted into a program comprising approximately 120 credits or less depending on their music qualifications.

Bachelor of Music Programs

Students from Québec applying for entrance to the Bachelor of Music program will be required to hold the Diploma of Collegial Studies with a concentration in music, or its equivalent. Applicants with a deficiency may be admitted on a probationary basis.

All applicants must pass an entrance audition.

For further details concerning entrance requirements, please consult the *Announcement of the Faculty of Music.*

Licentiate Program

A candidate must have completed secondary school and must pass an entrance audition.

Concert Diploma Program

In order to qualify for admission to the Concert Diploma program, the candidate must have the Licentiate in Music of the McGill Faculty of Music or its equivalent and must pass an audition to satisfy the panel that he or she has the talent for a professional career as a concert performer.

Masters' Programs

Applicants must hold the Bachelor of Music degree with Honours in the appropriate area of specialization from this University, or its equivalent. Entrance examinations in Music Theory and History may be required. Applicants are requested to submit samples of their undergraduate work in their area of specialization. An audition is required of all applicants for the M.Mus. in Performance.

Doctor of Music Program

Applicants must hold the Master's degree in Composition from this University or its equivalent, and must be of a high degree of accomplishment as a composer. Scores and/or tapes must be submitted by the applicant.

3.14 School of Nursing (in the Faculty of Medicine)

Director – JOAN M. GILCHRIST, B.N., M.Sc. (Appl.) (McG.), N.

Wilson Hall
3506 University St.
Montreal, PQ H3A 2A7

DEGREES OFFERED

1) Bachelor of Science in Nursing (B.Sc. (N)). A three-year program combining general and professional courses with nursing experience in McGill Teaching Hospitals and selected community agencies.

2) Master of Science (Applied) (M.Sc. (A.)). A two-year program under the Faculty of Graduate Studies and Research with opportunity to specialize in Nursing Practice or in Research in Nursing and Health Care. In addition, students select either the Administration of Nursing Services or Curriculum Development and the Teaching of Nursing as a focus of study.

ENTRANCE REQUIREMENTS AND APPLICATIONS

1) Bachelor of Science in Nursing.

a) For those with DCS (Health Sciences), entrance requirements and application procedures are the same as those for the regular B.Sc. program. See entries in Admissions Sections. Introductory courses in psychology and sociology are added to the curriculum if these have not been taken as options in CEGEP.

b) For those with DCS (Nursing) or its equivalent from a College or Institute outside of Québec, the following are prerequisite for entrance: CEGEP courses – Mathematics 101 (or other post secondary mathematics course), Mathematics 103, Chemistry 101, Chemistry 201; license to practice nursing; work record.

c) For those with a hospital school diploma, the following are prerequisite for entrance: CEGEP courses – As in b) PLUS Biology 301, 401 (preferred), English or French – 2 courses, Humanities – 2 courses, Psychology 110, 210; license to practice nursing; work record.

Application forms may be obtained from:
The Admissions Office
McGill University
F. Cyril James Building
845 Sherbrooke St. West
Montreal, PQ H3A 2T5.

2) Master's Degree. Applicants must have completed a baccalaureate program comparable to the B.Sc. (N) program offered at McGill. Non-nurses holding a baccalaureate degree comparable to B.Sc. or B.A. programs offered at McGill may be admitted to a Qualifying year. For details please see the *Announcement of the School of Nursing or the Announcement of the Faculty of Graduate Studies and Research.*

3.15 School of Physical and Occupational Therapy (in the Faculty of Medicine)

Director – HELEN M. GAULT, Dip. Ed. P.T. (Eng.), B.Sc. (P.&O.T.) (McG.)

3654 Drummond Street
Montreal, PQ H3G 1Y5

Physical Therapy is the art and science of physical treatment and rehabilitation utilizing physical,

chemical, electrical and electromagnetic properties in conjunction with the manual skills of massage and therapeutic exercises for an individual who manifests physical and psychological disorders. The scope of the profession includes patient evaluation, research, education, treatment planning, treatment delivery, and consultation in the clinics and community settings in cooperation with the medical and paramedical professions and the social agencies concerned.

Occupational Therapy is the art and science of directing man's response to selected activity for the purpose of promoting and maintaining health, to prevent disability, to evaluate behaviour and to treat patients with physical or psychological dysfunction. The occupational therapist

a) cooperates with other health professionals, social agencies and the patient, to determine the patient's overall treatment.
b) establishes the occupational therapy program for the patient according to precise short and long-term goals and supervises this program modifying it to the needs of the patient.
c) acts as a consultant in such matters as community health or architectural barriers,
d) takes part in fundamental and clinical research.

DEGREES OFFERED

Bachelor of Science in Physical Therapy (B.Sc. (Phys. Ther.)).

The full curriculum consists of three academic years from a college program in the health sciences or equivalent. Included during the three year program are courses in science together with professional training in physical therapy. Clinical experience is provided in the teaching hospitals of the Faculty of Medicine, McGill University, and other affiliated centres.

Bachelor of Science in Occupational Therapy (B.Sc. (Occ. Ther.)).

The full curriculum consists of three academic years from a college program in the health sciences or equivalent. Included are courses in science together with professional training in occupational therapy. Clinical experience is provided in the teaching hospitals of the Faculty of Medicine, McGill University, and other affiliated centres.

Master of Science (Applied) (M.Sc.(A.)).

A two-year program in Health Sciences (Rehabilitation) is available under the Faculty of Graduate Studies and Research. The full curriculum consists of two years of study for graduates who hold a Bachelor of Science degree in one of the Health Sciences (Rehabilitation) disciplines or equivalent and who have had two years of clinical experience in the related discipline.

This program is awaiting full authorization.

ENTRANCE REQUIREMENTS

Completion of a Diploma of Collegial Studies in biological sciences or equivalent is required for admission to the Bachelor of Science in Physical Therapy or Bachelor of Science in Occupational Therapy programs.

3.16 Faculty of Religious Studies

Dean – JOSEPH C. McLELLAND, B.A. (McM.), M.A. (Tor.), B.D. (Knox), Ph.D. (Edin.), D.D. (Montr. Dioc. Coll. and Knox)

William and Henry Birks Building
3520 University Street
Montreal, PQ H3A 2A7

DEGREES OFFERED

Bachelor of Theology (B.Th.)
Master of Sacred Theology (S.T.M.),
Master of Arts (M.A.) and Doctor of Philosophy (Ph.D), in Religious Studies (Granted through the Faculty of Graduate Studies and Research).
Major and Honours B.A. in Religious Studies granted through the Faculty of Arts.

PERIOD OF STUDY AND ENTRANCE REQUIREMENTS

B.Th. Program

90 credits (three years) following Collegial diploma or equivalent; 60 credits (two years) following a Bachelor's degree or at least one full year of post-Collegial studies in Arts.

S.T.M. Program

Two years following a B.A. with major in religious studies or theology (second class standing) or one year after an approved B.Th. or M.Div. degree.

M.A. Program

Two years after an approved Bachelor's degree or equivalent.

Ph.D. Program

Two years after an approved Master's degree or equivalent.

For details, see the Faculty of Religious Studies Announcement.

3.17 Faculty of Science

Dean – S. ORVIG, B.Sc. (Oslo), M.Sc., Ph.D. (McG.)

Dawson Hall
853 Sherbrooke St. West
Montreal, PQ H3A 2T6

DEGREE OFFERED

Bachelor of Science (B.Sc.)

PERIOD OF STUDY

The degree program normally requires three years of study after the Diploma of Collegial Studies. Acceleration may be possible in some cases as student progress is determined on a credit system.

ADMISSION

See Section 2.

STUDY PLANS

Three types of study plan are available: Faculty Programs, Major Programs and Honours Programs.

A Faculty Program is an approved coherent selection of courses giving the student a useful concentration in a recognized area. Three fifths of the student's course load in a Faculty Program is specified, the remaining courses being freely elected from those offered in the Faculties of Science and Arts.

Major programs are more specialized than Faculty programs and are usually centred around a specific discipline or department. Between three and four fifths of the course load is specified in the program and the student is free to elect the remaining courses from among the offerings in the Faculties of Science and Arts.

Honours Programs require the student to maintain academic performance at a high standard in addition to involving a very high degree of specialization.

Faculty Programs are available in:

Anatomical Sciences
Biochemistry
Biogeography
Biology
Chemistry
Chemistry and Biological Sciences
Climatology
Dynamics of the Oceans and Atmosphere
Earth Physics
Geomorphology
Hydrology
Marine Geology
Mathematics and Biology
Mathematics and Chemistry
Mathematics, Chemistry and Physics
Mathematics and Computer Science
Mathematics and Physics
Mathematics and Psychology
Microbiology and Immunology
Paleobiology
Physics
Physiology
Psychology
Quaternary Studies

Major sequences are available in:

Anatomical Sciences
Biochemistry
Biology
Chemistry
Crystallography
Geography
Geological Sciences
Mathematics
Meteorology
Microbiology and Immunology
Physics
Physiology and Physics
Psychology
Solid Earth Geophysics

Honours sequences are available in:

Anatomical Sciences
Biochemistry
Biology
Chemistry
Crystallography
Geography
Geological Sciences
Mathematics
Meteorology
Microbiology and Immunology
Physics
Physiology
Psychology
Solid Earth Geophysics

Interdepartmental Honours Program in Immunology:

In conjunction with the Departments of Biochemistry, Microbiology and Immunology, and Physiology

Minor

A Minor in Computer Science is available in combination with many of the above programs.

3.18 School of Social Work (in the Faculty of Graduate Studies and Research)

Director – M. KATZ, B.A. (Sir G. Wms.), M.S.W. (McG.), Ph.D. (Col.)

3506 University Street
Montreal, PQ H3A 2A7

DEGREES AND DIPLOMA OFFERED

In the Faculty of Arts:
Bachelor of Social Work (B.S.W.)
In the Faculty of Graduate Studies and Research:
Master of Social Work (M.S.W.)
Diploma in Advanced Social Work Practice

ENTRANCE REQUIREMENTS

The B.S.W.

Students are admitted to the three-year program in the Faculty of Arts after completion of a Diploma of Collegial Studies or equivalent on a competitive basis. Students with a Bachelor's degree with strong preparation in social and behavioural sciences may be admitted to a special B.S.W. program consisting of two summers plus a full academic year.

The M.S.W.

Students may be admitted to a one-year M.S.W. program upon completion of the B.S.W. with B standing.

The Diploma in Advanced Social Work Practice

This program is available to persons who hold a M.S.W. degree with high standing, and three years' experience in practice.

For details see the *Announcement of the School of Social Work*.

3.19 Summer Session

Summer Session offers a wide range of undergraduate courses in the Faculties of Agriculture, Arts, Education, Engineering, Management, Music, Religious Studies and Science and graduate courses predominantly in the Faculty of Education.

The 1977 Summer Session structure will be as follows:

Part I May 9 – June 17
First Term May 9 – May 27
Second Term May 31 – June 17

Part II July 4 – August 12
First Term July 4 – July 22
Second Term July 26 – August 12

Three-credit courses are usually offered two hours a day for three weeks, while six credit courses are offered two hours a day for six weeks.

Summer Session registration for Parts I and II begins Monday, March 21. Students may register up to the first day of a course.

In order to register, a student must submit to Summer Session a registration form, a certified cheque to cover the tuition fees **AND**

McGill Students –An authorization form signed by the Associate Dean of the Faculty in which the student is registered.

Visiting Students –A letter of permission from the Registrar or other appropriate official of the home University.

Special Students –A waiver form releasing McGill University from the obligation to recognize the credits for which a student is registering towards a degree.

Acceptance into the Summer Session does not guarantee admission to McGill. Students wishing to apply to McGill for admission in September must do so before March 1.

Students admitted conditionally to McGill will be required to sign a waiver and will fall under the category of Special Students. The signing of the waiver in no way guarantees admission to McGill.

Students in possession of their final letters of acceptance will be required to submit an authorization form signed by the Associate Dean of the Faculty into which they have been admitted.

Please note that the French Summer School, The Accountancy Summer School and the Centre for Continuing Education will offer summer courses which are not administered by the Summer Session Office. Individuals interested in these specific programs, briefly listed below, should contact the respective offices concerned.

Full information concerning course offerings, applications, and requirements may be obtained from:

Summer Session Office
McGill University
F. Cyril James Building
845 Sherbrooke St. West
Montreal, PQ, Canada H3A 2T5
(514) 392-6740

3.20 Summer Schools

ACCOUNTANCY SUMMER SCHOOL

The Faculty of Management (Accountancy) invites applications from students both from Montreal and elsewhere for the summer school. The full curriculum of 90 hours will be spread over three weeks with six hours of courses per day per five-day week.

Montreal students are not required to live on campus though they are encouraged to do so. Students may take individual courses instead of registering for the whole school.

The following courses will be taught by professors and professional accountants under the direction of Professor Ronald G. Laybourn of the Faculty of Management:

Financial Accounting, Theory
Theory applied in Problems
Cost and Management Accounting,
Theory and Problems
Modern Auditing and Analysis
of Accounting Systems
Investigations and Reports
Principles of Management:
Planning and Control
Federal Income Tax

Full information may be obtained from:

The Accountancy Summer School
Faculty of Management, McGill University
Samuel Bronfman Building
1001 Sherbrooke St., West
Montreal, PQ Canada, H3A 1G5

FRENCH SUMMER SCHOOL

The French Summer School, a residential school with an entirely French-speaking staff, was established in 1904 and held its sixtieth session in 1976. Courses are offered at two levels (undergraduate and graduate) in three divisions: undergraduate, graduate and M.A.

The program is designed for:

1) Undergraduates who have completed two years towards the B.A. degree with a major in French; students whose knowledge of French is considered satisfactory but who are not majoring in French may also be admitted (Division B).

2) Those having obtained a B.A. degree or its equivalent with sufficient background in the French Language who wish to take courses at the graduate level especially in Language and Civilization. (Division C).

3) Graduates who are presently working towards an M.A. or a Ph.D. at universities other than McGill (Division C).

4) Teachers of French, at the Elementary or Secondary School, College or University level, who desire an effective "refresher" (Division B or C).

5) Graduates who wish to work towards an M.A. (with or without thesis) at McGill University by attending sessions at the French Summer School. (Division D).

6) Graduates who wish to work towards the M.Ed. (Teaching French as a Second Language) at McGill University, and taking the program organized jointly by the French Summer School and the Faculty of Education (Division D).

The courses carry credits towards McGill degrees; these credits are also transferable to other North American universities and colleges.

Extracurricular cultural and social activities play a major role in the program. These activities are supplemented by the rich and varied resources of French-speaking Montreal. The teaching staff lives in the same residences as the students and mingles freely with them. The exclusive use of French at all times, in and out of class, is absolutely compulsory.

For complete information concerning applications, admission requirements and detailed booklet, please write to:

The Secretary
French Summer School
McGill University
Peterson Hall
3460 McTavish St.
Montreal, PQ H3A 1X9
(514) 392-4678

3.21 Centre for Continuing Education

Director – J.A. DUFF, M.A. (Cantab.), C.A.

Strathcona Hall
772 Sherbrooke St. West
Montreal, PQ H3A 1G1 392-5244

In addition to the instruction offered by faculties as part of their degree and diploma offerings, the University offers more than 400 evening courses to 13,000 students through its Centre for Continuing Education in Montreal. These include the following:

CHARTERED ACCOUNTANCY PROGRAM

Diploma of the Order of Chartered Accountants of Québec (C.A.)

COMMUNITY SERVICES

Occupational Preparation
Courses for Practising Social Workers

LANGUAGES

Certificate of Proficiency in English, French, German, Italian, Russian, Spanish. Certificate of Proficiency in Translation of English into French – French into English.

Diploma in Translation of English into French – French into English.

Non-certificate courses in Arabic, Chinese, Croatoserbian, Modern Greek, Japanese, Portuguese

LIBERAL ARTS – GENERAL

Human Behaviour
Canadian Studies
Special Courses for Women

MANAGEMENT – GRADUATE PROGRAMS

Diploma in Management (MBA I)
Diploma in Management (Tourism)

EDUCATION

Bachelor of Education (part-time)
Diploma in Special Education
Diploma in Reading
Certificate in Second Language Teaching
Diploma in Kindergarten
Diploma in Educational Media

ENGINEERING

Certificate in Computer Programming
Certificate in Textile Technology
Master's Degree in Engineering – Power Systems Option
General Engineering courses

MANAGEMENT – UNDERGRADUATE AND CERTIFICATE PROGRAMS

Bachelor of Commerce (part-time).

McGill Certificates in Administration, Appraisal of Real Estate, Banking, Business Communications, Insurance Brokerage, Marketing, Systems Design, Transportation.

Programs leading to certificates of the Administrative Management Society, the Appraisal Institute of Canada, the Association for Systems Management, the Canadian Association for Physical Distribution Management, the Canadian Credit Institute, the Canadian Institute of Management (Québec), the Canadian Institute of Traffic and Transportation, the Canadian Institute of Travel Counsellors, the Canadian Public Relations Society (Québec), the Corporation of Certified General Accountants of Québec (C.G.A.), the Corporation of Chartered Administrators of Québec, the Corporation of Industrial Accountants of Québec, the Institute of Canadian Bankers, the Institute of Chartered Secretaries and Administrators, the Institute of Internal Auditors, the Insurance Brokers Association of the Province of Québec, the International Association of Business Communicators, the Montreal Personnel Association and the Trust Companies Institute of Canada.

PROFESSIONAL DEVELOPMENT

Development programs for practising professionals.

3.22 The Academic Year

Generally speaking McGill's academic year is made up of two sessions, the fall/winter or regular session and the summer session. These are subdivided, where appropriate, into the fall term (September to December), the winter term (January to May) and the two parts of the summer session (mid-May to end of June and early July to mid-August).

3.23 Credit System

Most faculties (exceptions: Graduate Studies and Research, Law, Medicine, Dentistry) use a credit system to determine student standing. While certain minor variations are described in the faculty announcements, the credit system is as set out here.

Graduate students do not have grade averages calculated and must achieve a grade of "B" or better for a course to be counted towards their degree.

Students in Medicine and Dentistry also do not have averages calculated. They are promoted on a year by year basis. The Faculty of Law calculates an Honours Point Average. Further details may be obtained in the respective faculty announcements.

In faculties using the credit system each course is assigned a credit rating reflecting the amount of effort it demands of the student. This will often represent the number of weekly contact hours the course requires. In general a three credit course indicates three hours of lectures (which may or may not include laboratory periods, conference, etc.) per week for one term.

In undergraduate faculties a minimum of 90 credits must be accumulated for a degree though some programs such as "Honours" programs may require a higher total.

The course promotion system is used to evaluate student progress. A grade point average (GPA) is calculated by multiplying the course credit value by the numeric value of the grade and dividing the sum of the grade points earned by the number of credits attempted.

Example

	Credits Attempted	Grade		Numeric Value	Earned Grade Points
Course 1	6	A	=	4	24
Course 2	4	B	=	3	12
Course 3	3	C	=	2	6
Course 4	3	D	=	1	3
Course 5	3	F	=	0	0
Course 6	6	A	=	4	24
Course 7	6	B	=	3	18
	31				87

$$\text{Sessional GPA} = \frac{87}{31} = 2.81$$

Other letter grades and their impact on averages are explained in the next section.

Some Faculties such as Agriculture and Engineering calculate semestrial averages and assess student standing at the end of each semester. In these cases students will be given or denied permission to pursue their studies at the end of each semester.

A cumulative grade point average will be calculated comprising the student's entire record at McGill in a degree/diploma program.

Grades of A, B and C are deemed to be satisfactory passes, D a conditional pass and F a failure. Certain courses have been approved for Pass/Fail (P/F) grading. In almost all programs, required or prerequisite courses must be passed with C standing. Grades of D or F continue to be used in the calculation of the CGPA even after a subsequent mark is submitted.

Standing will be determined by the grade point average achieved by the student.

Satisfactory Standing

A student enters the University in satisfactory standing and remains in this standing unless his/her GPA for any year drops below 2.0.

Probationary Standing

A student whose GPA drops to between 1.5 and 1.99 (in some faculties between 1.2 and 1.99 for the first year) is placed in probationary standing. A student in probationary standing must return to satisfactory standing within one year by obtaining a GPA of 2.5 or CGPA of 2.0, otherwise he/she will be placed in unsatisfactory standing.

Faculties impose a limit on the number of credits for which students in probationary standing may register. This is usually 12 credits per term.

Unsatisfactory Standing

A GPA of less than 1.5 (in some faculties 1.2 in the first year) places a student in unsatisfactory standing.

Students in unsatisfactory standing must withdraw. They may be readmitted to probationary standing upon appeal to the faculty. Students in unsatisfactory standing for the second time will be required to withdraw permanently.

Cumulative grade point averages are restarted at zero when a student changes degree programs, e.g. B.Eng. to B.Com.

Degree Requirements

Holders of a Québec Diploma of Collegial Studies must complete a total of 90 credits (i.e. have passed courses whose total credit value is 90) to be eligible for a degree, must have passed satisfactorily all courses required by their program, and have a CGPA at McGill of at least 2.0

Out-of-Province students will have the minimum number of credits required for their degree indicated on their acceptance letter. To be eligible for a degree, they must in addition pass satisfactorily all courses required by their program, and have a CGPA at McGill of at least 2.0.

Transfer Credits

In certain cases, credit may be granted for courses taken at other universities after a student's initial registration at McGill. Approval of the Dean or the Associate Dean is necessary and should generally be obtained in advance. Advanced standing for previous courses is described in the Admissions section.

Transfer credits are not calculated in the GPA or CGPA and the grades are not entered on the student's McGill transcript of record.

3.24 Definition of Letter Grades

All courses taken at McGill and all results obtained appear on the transcript of record.

The following is an explanation of the letter grades used (not all of these grades are used by every faculty) and of their impact on average calculations:

A, B, C	Satisfactory Pass (See Credit System, Section 3.23)
D	Conditional Pass
F	Failure
P	Pass
J	Absent (Included as F in averages)
K	Incomplete (No average calculated if "K" on record)
KF	Incomplete Failed (Included as F in averages).
KK	Completion not required (Not counted in averages).
K*	Incomplete-extension granted (No average calculated)
L	Deferred (No average calculated)
L*	Permitted to complete course (No average calculated)
W	Withdrew (Not included in averages)
WF	Withdrew failing (Not included in averages)
WL	Permitted to withdraw from a deferred examination (Not included in averages)
R	Pass at undergraduate level (Course credit in Music)
S	Satisfactory (Medicine only – no averages calculated)
U	Unsatisfactory (Medicine and Music only – included as F in Music averages)
Q	Course continued in next term
&&	Grade not yet available (No averages calculated)
--	No grade – student withdrew from the University

3.25 Student Categories and Course Loads

The following categories are used by all faculties except,

(1) Medicine and Dentistry, whose students must be full-time;

(2) Graduate Studies and Research whose categories are listed in that faculty's announcement.

Full-time Students

In most faculties, full-time students in Satisfactory standing take a minimum of 12 credits per term.

Full-time students in Probationary standing take a maximum of 12 credits per term.

Part-time Students

Part-time students carry fewer than 12 credits per term.

Special Students

A special student takes regular credit courses, but is not working towards a degree. To qualify for this status in most faculties a student must hold an undergraduate degree and have a specific approved plan of study. Applications must be made at the Office of the Dean or Associate Dean.

Visiting Students

A visiting student is one who is taking courses at McGill for credit at another university. Applications must be made at the Office of the Dean or Associate Dean.

3.26 Course Numbering Guide

Course numbers consist of seven characters in the following format: 123-456A

The first three characters indicate the teaching unit responsible for offering a course. This is usually but not always a specific department. The following is a list of teaching unit codes currently in use:

FACULTY OF ARTS

History	101
Comparative Literature	102

McGILL UNIVERSITY LIBRARY

Spanish	697
Translation	698
Liberal Arts	700
Nursing	720
Social Work	730

The fourth character indicates the level of the course according to the following scheme:

D	Diploma courses at the collegial level
1–4	Years in Medicine, Dentistry, Law. For others, 2 through 4 refer to courses usually taken at the undergraduate university level.
5	Post degree diploma courses plus courses taken by both graduates and undergraduates
6	Master's level
7	Doctoral level
O	Non-credit

The fifth and sixth characters are used to enumerate courses taught by the same teaching unit and at the same level. The numbers may also be used to indicate other information such as which courses are for honours students, which for majors or for areas of teaching within a teaching unit.

The last character indicates when and by whom a course is given. The following list indicates, in sequence, the terms during which a course is offered and refers to courses given **during the day and/or evening.**

A	Fall term
B	Winter term
D	Fall and Winter terms
X	Fall term (Continuing Education)
Y	Winter term (Continuing Education)
Z	Fall and Winter terms (Continuing Education)
L	Summer session part I.
C	Summer session part II.
U	Summer session (Continuing Education)
G	Summer and Fall terms
H	Fall and Winter terms and summer session
E	Winter term and summer session
J	Winter term, summer session and the following Fall term
K	Summer session, and the following Fall and Winter terms

3.27 Course Changes

Students wishing to make changes to the courses for which they are registered (dropping a course, adding a course) must do so through their faculty's student records office.

3.28 Withdrawal from Course

Withdrawal from a course after the change of course period will be allowed by the Dean or the Associate Dean up to the date specified in the faculty announcement. Students who have not officially withdrawn from courses they are no longer attending will have a failing grade recorded at the end of the session.

3.29 Withdrawal from the University

The responsibility for initiating withdrawals rests solely with the student. Neither notification of the course instructors nor discontinuance of class attendance will suffice. A student who wishes to withdraw officially from the University during the academic year must secure permission from the Office of the Dean or the Associate Dean. The appropriate form will be supplied. A student considering withdrawal is strongly urged to consult his or her Academic Adviser before making a final decision. Tuition fees for the term in which the student withdraws are refundable according to the regulations set out in the fees section. As the Student ID card is the property of the University, it must be surrendered at the time of withdrawal and attached to the withdrawal form.

3.30 Examinations

Students may write term papers and their answers to examinations in English or French, except in the case of certain language and literature courses.

Class Tests

Members of the teaching staff may from time to time give interim class tests if they think them necessary.

Final Examinations

Final examinations are held during an examination period following the term in which the course is given. In some courses there is no final examination; standing in these courses is determined on the basis of term work and class tests.

Supplemental Examinations

There is a supplemental examination period during the month of August. A student may receive permission to write supplemental examinations in courses in which he/she obtained a D or an F. It should be noted that supplemental examinations are not necessarily available in all courses. It is the student's responsibility to determine this by checking with the instructor, and to avail himself/herself of this privilege at the time of the next supplemental examination period. The supplemental result will not erase the D or F originally obtained which was used in calculating the GPA. Both the original mark and the supplemental result will be calculated in the CGPA (i.e. the taking of a supplemental examination has the same effect on a student's GPA as does repeating the course). Written application to write a supplemental examination must be received at the Dean's or Associate Dean's Office. Special permission is required if a student wishes to write supplementals totalling more than 6 credits. A fee of $10.00 for each supplemental paper is payable to the Cashier as soon as the application has been approved. A student who does not intend to write the supplemental for which he/she is registered

should officially withdraw, otherwise a grade of "J" (Absent) will be recorded ("J" counts as an F in CGPA calculations).

In certain cases, a student may be permitted to write one supplemental examination during the April-May examination period in a first term course in which he/she has obtained a D or an F, if the course is also given in the second term. No attempt is made to avoid conflict between this supplemental and the student's required final examinations, and in the case of such a timetable conflict the student will be required to postpone the supplemental to the August period.

Depending on the course, the supplemental result may or may not include the same proportion of class work as did the original grade. The instructor will announce the arrangements to be used for the course early in the term.

Deferred Examinations

A student who, for reasons such as illness or family affliction, has been unable to write one or more examinations, may receive permission to write deferred examinations in their stead which will normally be written in the next supplemental examination period. The Dean's or Associate Dean's office must be informed within one week of the examination of the reasons for absences. An "L" will appear on the Report of Standing in place of a grade in such courses, and will be replaced by the grade obtained in the deferred examination after it has been written.

Reassessment of a Grade

If students wish marks checked or their examination papers re-read, they must apply in writing to the Office of the Dean or Associate Dean.

Any request to have a term paper reassessed must be made directly to the professor concerned.

Credit by Examination

In certain cases a student may apply to write the final examination in order to obtain credit in a course for which he or she has not registered (this is possible only in those courses where there is no other assessment than the final examination).

Special Facilities

Students with visual or other disabilities should consult the office of the Associate Dean about the possibility of special examination facilities.

3.31 Incomplete Courses

If, in the instructor's opinion, there is sufficient reason to permit a delay in the submission of required term work, an extension of deadline of up to four months after the end of the course may be granted the student. In this case, the instructor will submit a grade of "K" (incomplete). If a new grade is submitted within the deadline by the instructor, this will appear on the student's Faculty reports and verification forms following the K and will replace the K on the student's official transcript.

If the required work is not completed before the deadline the grade of KF will be recorded in the same way as the grade above. (KF denotes a failed course and has the same effect on the GPA as an F.)

In exceptional circumstances, and with the approval of the Associate Dean, the four month deadline may be extended further, in which case the grade of K* will appear.

A student who has not, without accepted excuse, participated or written the final examination in a course for which he or she has registered may be given a grade of J (absent).

3.32 Academic Credit Transfer Agreement

Regular full-time undergraduate students (first cycle*) and regular full-time or part-time graduate students (second and third cycles**) registered at McGill may, with the written permission of the Dean of their Faculty, register for up to 40% of a full course load in each academic year at any university in the province of Québec. These courses, weighted, graded, and successfully completed according to the standards of the university giving the courses, will be fully recognized by McGill for the purpose of the degree for which the student is registered.

This privilege will not be granted automatically; the courses should form a required part of the student's program and be unavailable at McGill.

Students wishing to take advantage of this agreement should consult their Associate Dean for details, and are informed that this agreement is subject to the following conditions:

i) that the other universities concerned may, at their discretion, refuse the registration of a student for any of its courses;

ii) that the obligation of the student to follow the curriculum laid down by McGill is not affected.

iii) that the student is responsible for ensuring his/her timetable at McGill permits him/her to take courses at any of the other universities concerned;

iv) that the universities concerned are not responsible for special arrangements in cases of examination timetable conflicts.

Students may take advantage of this agreement by completing the TRANSFER CREDIT form available from the Registrar's Office. This form permits the student to collect the required academic authorizations and that of the Director of Finance; ensures automatic fee transferral from the home university to the host university; and ensures the automatic reporting of marks and credits to the home university.

McGill UNIVERSITY LIBRARY

*(i.e. Bachelor degrees in architecture, arts, law, commerce, education, engineering, music, nursing, occupational and physical therapy, science, agriculture, food science, and theology).

**(i.e. master's or doctoral degrees).

3.33 Policy Concerning Access To Records

Reports of standing, statements of account and all other correspondence are sent directly to the student who retains full control as to who has access to his or her record or account. No progress report or any other information is sent to parents and/or sponsor unless specifically requested by the student. Transcripts of record, if required, must be requested by the student and are released only with the permission of the student. Students may not receive official transcripts which must go directly to the university or employer concerned. One free copy of the transcript is sent to the student stamped "For Student Use". The University will only issue complete transcripts recording all work attempted and results obtained in any and all programs, and partial transcripts will in no circumstances be issued. See Section 4.1 for fee.

4 FEES

The University reserves the right to make changes without notice in the published scale of fees.

Fees are not refundable, except under special conditions. See "Regulations Concerning Withdrawal" below.

4.1 University Fees

Tuition fees are based on a per credit charge of $19 per credit and this fee includes all the regular charges of the University for registration, tuition, laboratories and libraries. In addition, Student Services fees of $70 and Students' Societies fees of from $25-$49 are separately assessed for all students taking 24 or more credits and must be paid at the same time as the tuition fees. A normal academic load of 30 credits would be $570 in tuition fees ($19 × 30) plus fees for Student Services and Students' Societies. The faculties of Medicine, Dentistry and Graduate Studies and Research are not presently on the credit system and their tuition fees are listed separately below.

FULL TIME STUDENTS (Degree Candidates)

Credit System Faculties and Schools

$19.00 per credit plus $70.00 Student Services, and Students' Societies fees as follows:

	Students' Societies
Agriculture (including Food Science)	$34
Arts – B.A.	28
B.S.W.	30
Education[1]	28
Engineering ($49 for Architecture)	35
Law[2]	40
Management	33
Music[3]	27
Nursing – B.Sc. (N)	33
B.N.[4]	32.50
Physical and Occupational Therapy	26
Religious Studies (candidates for ordination are exempted from tuition fees)	25
Science	28

Other Faculties and Schools

Dentistry: Tuition fees of $570.00 plus Student Services of $70.00, Students' Societies fees of $26.50 (including Dental Review) and rental of laboratory and clinical equipment as follows:

1st year:	$100.00
2nd year:	175.00
3rd year:	225.00
4th year:	225.00

Medicine: Tuition fees of $719.00 plus Student Services of $70.00 and Students' Societies fees of $25.00.

Graduate Studies:	*Tuition*	*Student Services*	*Students' Societies*[6]
1st year Master's	$570.00	$70.00	$29.50[5]
2nd year Master's	285.00	35.00	29.50[5]
Beyond 2nd year Master's	40.00	35.00	29.50[5]
1st to 3rd year Doctorate	570.00	70.00	29.50
Beyond 3rd year Doctorate	40.00	35.00	29.50

The Graduate Studies Announcement should be consulted for further information.

1 Students in one year Diploma or Certificate programs are not assessed on the credit system but will be charged tuition fees of $570.00.

2 Includes $6.00 for Law Journal and $12.00 for course materials.

3 Students electing further courses in individual practical instruction above the requirements of the program will be charged an additional $420.00 per year or $210.00 per term.

4 Fees not assessed per credit. Standard tuition fee of $570.00 will be charged.

5 Students in M.S.W. program pay $31.50 Students' Societies fees.

6 All students in the Faculty of Graduate Studies and Research except those registered as "non-resident" or "additional session" students who have chosen not to obtain valid I.D. cards are charged the Student Services and Students' Societies fees.

PART TIME, SPECIAL AND VISITING STUDENTS

Where the credit system is applicable, $19.00 per credit will be assessed. Otherwise the charge will be $114.00 per full course and $57.00 per half course.

In addition, the following fees will be assessed **per term:**

a) If taking 9 credits and over:
Student Services $35.00
Students' Societies $14.00
(average fee, actual varies by Faculty)

b) If taking more than 5 but less than 9 credits:
Student Services ..... $20.00 I
Students' Societies ..... $ 5.00

c) If taking 5 credits or less:
Student Services ..... $10.00 I
Students' Societies ..... $ 5.00

SPECIAL FEES AND PENALTIES

II Application for Admission $15.00
Late Registration 25.00
Late payment fee (after specified date):
1st 30 days 10.00
After 30 days 25.00
III Graduation Fee 15.00
Duplicate Student Identity Card 5.00
Duplicate diploma 10.00
IV Certified transcript of student's record:
First copy with each order 2.00
Additional copies made at the same time, each 50
Re-reading examination paper 10.00
Supplemental examinations, each paper 10.00
Changes in course (Arts, Science, B.Com., Music) each change after specified change of course period 5.00

I **Excludes Athletics: At the discretion of the Director of Athletics, a student may participate in the Athletics program upon payment of an additional $30.00.**

II **Students already at McGill who are making application to a professional faculty or to the Faculty of Graduate Studies and Research are not required to pay this fee.**

III **Graduation fee: Applications by students who expect to graduate at the Spring Convocation must be filed by April 1st of each year and by those who expect to graduate at the Fall Convocation by October 1st of each year. An application form will be mailed to each eligible student and must be returned to the Registrar's Office together with the graduation fee of $15.00 by the appropriate date listed above. This fee will cover all expenses in connection with graduation including academic dress. It is the student's responsibility to inform the appropriate faculty or school that he or she expects to graduate in order to ensure that his or her name is included in the graduation list.**

IV **The University will only issue complete transcripts recording all work attempted and results obtained in any and all programs, and partial transcripts will in no circumstances be issued.**

4.2 Regulations for Payment of Fees

NEW STUDENTS

Students entering the University for the first time and those returning in Graduate Studies are required to pay their fees for the term in which they are registered either by mail or in person at the Accounting Office within 10 days after registration. For students registering in September the second instalment is due by January 15, 1978.

RETURNING STUDENTS

Returning students from the previous year (except in Graduate Studies) must pay one half of the total required fee by mail or in person to the Accounting Office before August 19, 1977, otherwise they will not be permitted to register. Instructions for paying fees in advance will be mailed to all returning students, either with their Sessional Reports of Standing or a short time later. Students who have been notified by the University of the award of a scholarship, bursary or student loan, and who require this award for payment of the first instalment of fees, must obtain permission to delay payment of fees from the Student Aid Office.

The second instalment is due by January 15, 1978. A late payment fee as stated above is charged for payment after this date.

LATE REGISTRATION

Students registering late must pay their fees at the time of registration.

As soon as possible after the prescribed dates for the payment of fees the Chief Accountant will send to the Registrar's Office a list of the registered students who have not paid their fees. Reports of Standing, transcripts of records and diplomas will be withheld until such time as the fees are paid or a satisfactory arrangement is made with the Chief Accountant.

4.3 Regulations Concerning Withdrawal

A student who wishes to withdraw from the University or from certain courses must secure the permission of the Dean of Associate Dean of his or her Faculty. The Office of the Associate Dean will supply the necessary form which must be completed and submitted. As the Student ID card Is the property of the University, students withdrawing from all their courses must attach their Student Identity Card to the withdrawal form. A student considering withdrawal is strongly advised to consult the Dean or Associate Dean before making a final decision.

Tuition fees for the term in which the student withdraws are refundable as shown below and apply to *individual course* withdrawal as well as to *complete* withdrawal from the University. The effective date for refunds will be the date on which the official withdrawal form was completed. Dates of notification of the course instructors or of discontinuance of class attendance will not suffice. If a student wishes to discuss the refund policy applicable to a special case, he/she must consult the Registrar's Office.

Student Services and Students' Societies fees are not refundable after October 21 for the Fall term and after February 17 for the Winter term.

Fall Term	**Refunds**
Up to October 21	100% **(Minimum charge of $50 in the case of complete withdrawal)**
October 22 – 31	50%
November 1 – 18	25%
After November 18	No refund
Winter Term	
Up to February 17	100% **(Minimum charge of $50 in the case of complete withdrawal)**
February 18 – 28	50%
March 1 – 17	25%
After March 17	No refund

4.4 Room and Board Charges in University Residences

The rates for the regular session (7 September to 29 April) in 1976-77 were $1895 for single room and all meals (Royal Victoria College only) and $1708 for room and five-day meal plan (Co-Ed Residences only). Students in faculties with longer school years paid proportionally more. Residents are not accepted on a room-only basis. Fees for a limited number of double rooms were approximately $200 less than those quoted above.

The sessional fees include a house fee of $10.00 collected by the University on behalf of the Residents' Council of each hall, and a $10.00 key deposit (Royal Victoria College only) which is refunded at the end of the session, and at the Co-Ed Residences a $3.00 Inter-Residence Council fee.

These rates did not include meals during a 16-day period at Christmas, nor did the rate for the 5-day meal plan include meals on certain holidays like Thanksgiving, Mid-Term, Easter, etc. Students may, however, occupy their rooms free of charge during the Christmas holiday period.

On weekends and holidays individual meals for residents were served on a cash basis.

The residence fees for the 1977-78 session have not been set by the time this Announcement went into print. A correct fee sheet will be sent with the residence contract when an offer of accommodation is made. New rates will be calculated from those of the 1976-77 session plus inflation.

OTHER REGULATIONS

Students accepted for residence must pay a security deposit of $50.00. The conditions under which this deposit is returned are specified in the Residence Contract. The deposit is returned by mail in late spring to those who stayed the full academic session. Deductions, however, are made for wanton damages to the premises by the resident or by anyone when the particular individual responsible cannot be determined.

PAYMENT OF FEES

All students: Fees may be paid in two instalments – the first before August 1, and the second before January 15.

5 RESIDENTIAL FACILITIES

5.1 Types of Residences

McGill offers two types of residence accommodation;

1. Royal Victoria College houses undergraduate women.
2. Co-Educational Residences, consisting of Douglas, Gardner, McConnell and Molson Halls, each of which houses both men and women, undergraduates and graduates.

LOCATION

The Co-educational Residences are located on the wooded slopes of Mount Royal, adjacent to the University playing fields. They are approximately two blocks away from the main campus, and a ten-minute walk from the centre of downtown Montreal.

Royal Victoria College is on campus close to the major shopping and cultural areas of the city. Bus and subway stops are nearby.

ACADEMIC STAFF

The academic staff of each hall consists of a Residence Director or Warden, Assistant Directors, and Residence Fellows or Dons. One of the main functions of the academic staff is to get to know students individually and, if a student requests it, to give advice on personal or academic matters.

ROOMS AND FACILITIES

Except for a few double rooms, all rooms are for single occupancy and in each, besides a bed, there is a desk, chair, chest of drawers and closet. Linen and towels are supplied at Royal Victoria College only and are exchanged weekly. In all halls residents are expected to make their own beds and keep their rooms in order. Each hall has coin-operated automatic washers and dryers, as well as ironing facilities; an outside dry cleaning firm also calls regularly at the residences. Telephones located on each floor are operated through hall switchboards; in addition, each room is wired for a private telephone. There is storage space for ski equipment, trunks, and suitcases in every hall. Limited parking space is available in the co-ed complex only.

The halls have TV, music, sewing, and stereo rooms, and a well-stocked library of magazines, books and newspapers. The co-ed residences have calculating and typing rooms, a sauna and universal gym; R.V.C. has the use of a swimming pool located within the building.

MEAL SERVICE

Residents at Molson, McConnell and Gardner halls take their meals together in a large centrally located dining hall. Douglas Hall and the Royal Victoria College have their own dining rooms. Students at Royal Victoria College have a 19 meals a week plan while the Co-Ed Residences have a 15 meals or five day meal plan. Bag lunches are available. There are kitchenettes on every wing of the co-ed residences where residents may keep food and prepare hot or cold snacks at any time. In addition, vending machines in every hall dispense soft drinks, sweets and pastries. Students in the co-ed residences can rent small refrigerators for their rooms.

DIETS

Limitations of facilities do not permit catering for special religious diets in the dining halls, although the kitchens will seek to meet special needs whenever possible. Temporary diets because of sickness may be prepared on doctors' orders.

HEALTH

In case of illness residents are usually referred to the University Health Service nearby. However, there is a nurse on duty every day in the residence dispensary or infirmary, and, at the Co-Ed Residences, live-in nurses who keep evening office hours and who are also available for emergency treatment any time.

GOVERNMENT

Each hall has a Residents' Council, elected yearly by the residents at a designated time during the academic year. It is the job of Council to gather hall opinions, set policy, supervise financial affairs, and organize sporting and recreational activities within the residences.

GUIDELINES

McGill's residences are run for the convenience and advantage of the students living in them. What "rules and regulations" do exist are decided upon and administered by the students themselves. Basically, living together in any community requires just a single rule: respect for the rights of others. In each hall there is a House Committee which is elected from the student body at the beginning of each year to deal with any problems that may arise.

APPLICATION AND ADMISSIONS

Please note that the procedure governing residence admissions is entirely separate from that of University admissions. Application forms for both the Royal Victoria College and the Co-ed Residences are mailed out with all academic application forms. Residence application forms accompanied by an application fee of $5.00 should be returned to the appropriate address below at the same time as the application for admission to McGill and in no case later than May 1:

Residence Manager
Royal Victoria College
3425 University Street
Montreal, PQ H3A 2A8

The Secretary
Co-ed Residences, McGill University
3935 University Street
Montreal, PQ H3A 2B4

The University is able to house in residence only a small fraction of its students. Because of the growing popularity of residence living, only a few hundred rooms become vacant each year. It is imperative, therefore, that students seeking residence accommodation apply early and fill out the residence application thoughtfully. The deadline for applications is May 1. All late applications are automatically placed on a waiting list and not considered until late August.

Among the applications that arrive on time, final selections are made with the following factors in mind: age, course of study, national origin and special circumstances.

ROOM AND BOARD CHARGES

(See Section 4.4)

McGILL UNIVERSITY LIBRARY

PARKING ON UNIVERSITY GROUNDS

The University does not permit students to park automobiles or motorcycles on the Montreal campus. Limited parking at monthly rates is available for students living in residences.

OFF-CAMPUS HOUSING SERVICE

Students unable to secure a room in residence should apply in person to the
Off-Campus Housing Service
Dean of Students' Office
3465 Peel Street

This office maintains an up-to-date computer listing of available off-campus housing, including the names of families willing to take in student boarders and other students seeking roommates.

Students living off-campus may purchase a meal card entitling them to eat regularly at the Co-ed Residences. Individual meals can be purchased both at the Co-Ed Residences and at the Royal Victoria College by both men and women students living off-campus.

UNIVERSITY HOUSING FOR MARRIED STUDENTS

The University maintains a limited number of apartment units in several nearby locations for married students. As the demand for these apartments greatly exceeds the number of vacancies occurring each year, applications are restricted to married, full-time undergraduate students and graduate students who have not yet attained the Ph.D. or M.D. degree or equivalent. Further information and application forms may be obtained from the Real Estate Office, Apt. P.1, 3474 Hutchison St., Montreal, PQ, H2X 2G7.

6 STUDENT SERVICES

6.1 Office of the Dean of Students

The Dean of Students has the responsibility for the provision of and the coordination of all student services and works closely with the Students' Society in the interests of all students. The Dean, and Associate Dean are available for consultation with individual students who may wish to discuss problems not already provided for by one or other of the existing services or other agencies on campus. The Office of the Dean of Students maintains an "open-door" policy and students are invited to make use of these services at any time.

Location:..... 3465 Peel St.
General Information:.....392-5364

6.2 Orientation Service

The Orientation Service is a pre-registration counselling service designed to assist incoming students in selecting their courses and to introduce new students to the various aspects of the University. The service operates Monday to Friday, 9:00 a.m. to 4:00 p.m., from August 15 until September 2.

The objectives of the program are: to provide information and advice on courses and programs of study according to the students' vocational expectations, interest, ability and aptitude; to acquaint students with the many services available at McGill and to encourage their use; to tell students about registration procedures and offer suggestions which might facilitate the process; to provide the kind of information new students need to resolve academic and other problems (i.e. change of course, etc.); to familiarize students with the geography of the campus, and to introduce them to the libraries; to provide the opportunity for incoming students to meet individual members of the academic staff in an informal and friendly-atmosphere.

Incoming students are invited to participate in a one-day orientation session consisting of the following:

A group meeting in the morning to discuss registration procedures, student services, the program for the day and questions of a general nature.

McGill students conduct campus tours in the morning and in the afternoon. The staff of both the Redpath and McLennan libraries provide an introduction to the libraries.

A Social Hour is held daily between 3:00 and 4:00 p.m. Academic staff and representatives of Student Services drop in to enjoy a cup of coffee and chat with the students. The students in turn are given the opportunity to learn more about the University and discuss programs on a friendly basis.

6.3 Academic Counselling in the Faculties

(See Faculty Announcements)

6.4 Athletics

McGill's facilities for athletics, physical education, and recreation are centred in the Sir Arthur Currie Memorial Gymnasium, the Percival Molson Memorial Stadium, the McGill Winter Stadium and the Garfield Weston Pool. Sports facilities in the gymnasium include basketball, squash, badminton, and volleyball courts; swimming pool; facilities for gymnastics, wrestling, fencing, judo, and track.

The athletic instructional program provides a learning environment for men and women students in a variety of leisure time sports.

Numerous intramural and recreational sports clubs provide opportunities for students to participate in sports for relaxation and to represent their faculty or residence on intramural teams of their choice.

On the intercollegiate level McGill participates in sports sponsored by the Québec Universities Athletics Association and the Ontario Women's Intercollegiate Athletics Association.

Complete information concerning the McGill athletics facilities and intercollegiate, intramural, and recreational sports programs may be obtained from the Athletics Office in the Currie Gymnasium.

See also "Health Service" below.

6.5 Chaplaincy Service

A pastoral service is available through the campus chaplains independent of McGill administration. This service exists to serve the needs of all McGill students, families and staff. The service is related to areas such as problems of faith, pre-marriage counselling, marital problems, value systems and personal relations. Open meetings on a variety of religious and campus topics are regularly sponsored by the Chaplains. Social Service projects are sponsored in conjunction with Hillel, Newman and S.C.M. Yellow Door and opportunities are offered to work with the poor, aged, children and prisoners.

At 3484 Peel Street there is a lounge and reading area where books and periodicals are available to students free of charge. Information concerning individual denominational services is available.

Location:.....3484 Peel St.
General Information:.....392-5890

6.6 Student Aid & Foreign Student Advisor's Office

The Student Aid section of this office handles all matters relating to financial assistance whether University, Provincial or Federal. Non-Canadian students requiring certification of registration and/or letters of advice to Foreign Exchange Control Boards obtain these from this office.

The Foreign Student Advisor section of this office deals with all matters which may affect non-Canadian students such as problems with the Canadian Department of Manpower and Immigration and information concerning the necessity of the compulsory health insurance.

Location:.....3465 Peel St.
General Information:.....392-5256

6.7 Student Counselling Service

The Service provides a place where students of all faculties may discuss any problem confidentially. Among the services offered are individual and group therapy, awareness groups, human relations training, marital and sexual therapy, psychological assessment, vocational testing, effective reading courses, educational and career planning and the Educational and Career Information Library. The service is free to the McGill Community.

Location:.....522 Pine Ave. W.
General Information and Appointments:.....392-5119

6.8 Health Service

When students enrol at McGill University they have available to them a full range of medical service provided by the McGill University Health Service. Medical clinics operate daily, five days of the week from 9:00 a.m.-5:p.m. A physician is always on call at night and on weekends and can be contacted by dialing the Health Service number. There are both male and female physicians on staff as well as a competent staff of college health nurses.

This service is available to all full-time students, undergraduate and post-graduate. Students are asked to bring their Medicare cards or equivalent. *All information is completely confidential and forms no part of any University record.*

Many students are seen for discussion about sexual life, contraception, drug problems and venereal disease. We urge students who suspect that they have V.D. to consult us. We invite students who are concerned about a drug problem to contact the Health Service and most particularly the Mental Health Section.

Part of the Health Service consists of a *Mental Health Service* which makes available to students psychiatric and psychological help. Students who wish to come are advised to make an appointment. If a psychological emergency arises the student should come directly to the Mental Health Service or phone immediately. All contacts by students with their service are kept completely confidential.

PARTICIPATION IN ATHLETICS: **A student in any academic year wishing to participate in heavy contact athletics, e.g. football, will be required by the Athletics Department to undergo a physical examination at the University Health Service.**

In order to ensure medical coverage while a student at McGill, Canadian students from provinces other than Québec are advised to consult with the medicare and hospital insurance offices of their own province before coming to McGill. This is particularly important since residents of other provinces are not covered by Québec Medicare and Hospitalization while studying at McGill.

Non-Canadian students, whether undergraduate or postgraduate, are obliged to enrol in a medical and hospital insurance program. Consequently, the student and his or her dependents are covered to a large extent for medical and hospital expenses during the academic year. Information concerning this program can also be obtained at the general office of the Health Service.

Location: **517 Pine Avenue West**
Appointment and General Office 392-5441
Mental Health Section.....392-5449

6.9 Off-Campus Housing Service

Available to all McGill students, this service operates on a year-round basis. Up-to-date listings of various types of accommodation in the downtown area and residential areas on bus and metro routes are maintained with the use of McGill's computers. Students wishing to make use of the service are asked to apply in person.

Location:..... Room 401, 3465 Peel St.
General Information:.....392-4554

6.10 Tutorial Service

The Tutorial Service operates during the fall and spring terms. Students may be tutored by senior honours and graduate students specializing in the majority of fields within the Faculties. Sessions are approximately one hour in length and normally two or three students are tutored at each session. The cost to the student is minimal and depends on the number of students in the group.

Location.....Royal Victoria College, 3425 University Street.
General Information:.....392-6741

6.11 Student Placement

The Canada Manpower Centre provides a comprehensive placement service to McGill students in the areas of part-time, summer and permanent employment. The principal aims of the service are to encourage employers to make available a wide variety of job opportunities to McGill students; to assist students in finding suitable employment, by providing information on the labour market and arranging interviews with prospective employers; to encourage students to prepare for a career by doing their own research into the labour market, through library facilities, seminars, summer and part-time jobs.

Location:..... 762 Sherbrooke St.W.
General Information:.....283-4411

6.12 Additional Services

BOOKSTORE

The McGill University Bookstore, located in the Bronfman Building at 1001 Sherbrooke Street, West, provides a comprehensive stock of current textbooks, reference material and academic supplies as well as items of general interest. It is administered by a Senate committee representing the students, the faculty and the administration.

EXTRA-CURRICULAR ACTIVITIES

There are over 250 activities and clubs which students may join. These include international clubs, religious groups, political clubs, fraternities, communications (Radio McGill), the McGill Daily and some 50 miscellaneous groups (such as science clubs, literary, theatrical and musical societies, chess and bridge clubs, and the Voyageurs' Society). The University Centre, at 3480 McTavish Street, provides club rooms for these activities in a modern four-storey building with cafeterias, a ballroom, lounges and an experimental theatre. Similar facilities exist at Macdonald College. Activities for graduate students centre in David Thomson House at 3650 Peel Street.

STUDENT ORCHESTRA, CHOIR, AND WIND ENSEMBLE

The Student Orchestra and Choir of the Faculty of Music as well as the McGill Wind Ensemble have some vacancies for amateur musicians. Advanced instrumentalists (strings, winds, harp, percussion), or experienced choir singers who would like to become regular members of the Orchestra, the Choir, or the Wind Ensemble, should contact the office of the Faculty of Music for further information (Telephone 392-4501).

7 SCHOLARSHIPS AND FINANCIAL AID

ENTRANCE SCHOLARSHIPS

In general the University's system of entrance scholarships is designed to enable good students from all parts of Canada to attend McGill. The policy of the University is to recognize and honour scholarship, and the University Scholarships Committee selects scholarship winners from among those students who have obtained or who expect to obtain *a first class academic standing.*

Every student who has been selected for an Entrance Scholarship receives an honorary $100 award. Such a student in financial need may have this amount substantially augmented. Scholarships such as the J.W. McConnell Memorial and Morris W. Wilson Memorial Scholarships will be awarded to scholars who need full tuition, board and residence. J.W. McConnell Entrance Scholarships in Science and Engineering may provide for tuition, books, board and residence or a lesser amount depending upon need.

Entrance Scholarships are open to Canadian citizens, landed immigrants with one year's residence in Canada, and graduates of Canadian high schools, colleges and other educational institutions. Students from schools outside

Canada are ineligible for entrance scholarships. Entrance Scholarships are awarded only to full-time students in a program of study leading to an undergraduate degree, and applicants must be entering the First year of such a program.

Students should apply for an Entrance Scholarship by completing the Application for Entrance Scholarship. These forms may be obtained from the Admissions Office and must be submitted by March 1 for September awards and by November 1 for January awards. Students who have completed this application will be considred automatically for every entrance scholarship for which they are eligible. As many as 250 entrance scholarships may be awarded in any one academic year.

AWARDS TO McGILL STUDENTS IN COURSE

Once a student is in course at McGill all undergraduate scholarships, prizes and medals are awarded on the year-end examination results, and *no applications are required.*

The University Scholarships Committee is responsible for awarding Entrance Scholarships, University Scholarships and Special-Named Awards. The Committee is also responsible for overseeing all scholarship policy of the University and is composed of Chairmen of Faculty Scholarships Committees, representatives from the University at large and student members.

Faculty scholarships and awards are made by Faculty Scholarships Committees. Scholarships are awarded only to full-time students taking a program of study leading to a degree. Scholarships are awarded or renewed only if an adequate scholarship standing is attained.

Students whose University Scholarships have been renewed and who need financial assistance should apply directly to the Student Aid and Foreign Student Advisor's Office.

All awards, with the exception of prizes, are credited to the tuition fee accounts of students for the following academic year.

Full information concerning undergraduate awards and bursaries is contained in the *Undergraduate Scholarships, and Awards Announcement* which may be obtained from the Registrar's Office.

Inquiries concerning undergraduate scholarships should be referred to the Scholarships Office in the Registrar's Office.

BURSARIES AND LOANS

Applications for McGill bursaries and loans should be directed to the Student Aid and Foreign Student Advisor's Office, McGill University, 3465 Peel Street, Montreal, PQ H3A 1W7. These awards are made on the basis of financial need.

All applicants for aid are also expected to apply for maximum government grants or other assistance for which they may be eligible.

PROVINCIAL BURSARIES AND LOANS

In all cases, a basic qualification is that the applicant must be a Canadian citizen or a landed immigrant with one year's residence and domiciled in the province to which he or she applies.

In all provinces, except Québec and Ontario, the provincial authority listed below administers the Canada Student Loan Plan (Federal) as well as their own programs. The addresses are as follows:

Québec: Apply after May 1, at the Student Aid Office, McGill University, 3465 Peel Street, Montreal, PQ H3A 1W7.

Ontario: Apply after May 1 to the Ministry of Colleges and Universities, Students Awards Branch, Mowat Block, Queen's Park, Toronto, Ont. M7A 2B4.

New Brunswick: Department of Youth & Welfare, Fredericton, N.B.

Yukon Territory: The Students Financial Assistance Awards Committee, c/o Superintendent of Education, Box 2703, Whitehorse, Yukon, Y1A 2C6.

Northwest Territories: Director of Education, Government of the Northwest Territories, Yellowknife, N.W.T. X0E 1H0.

For the Provinces of Newfoundland, Prince Edward Island, Nova Scotia, Manitoba, Saskatchewan, Alberta, British Columbia: write to the Provincial Department of Education.

United States Citizens

The National Defence Loan is not tenable in Canada, but several states have long term loan plans which are tenable here. Students should inquire at the Department of Education in their state capital and also at local banks which may operate a Higher Education Loan Plan.

GRADUATE FELLOWSHIPS

Full information concerning postgraduate awards is contained in the *Postgraduate, Fellowships, Bursaries and Prizes Announcement* which may be obtained from the Fellowships Office, Faculty of Graduate Studies and Research, or from the Registrar's Office.

Inquiries about graduate fellowships, etc., which are open to graduates of other universities as well as of Canadian universities should be addressed to the Fellowships Office, Faculty of Graduate Studies and Research. Inquiries about assistantships should be directed to the individual Departments.

McGILL UNIVERSITY LIBRARY

8 1977 – 78 CALENDAR OF DATES

In most faculties and schools lectures begin on Sep. 12, 1977, and end on Apr. 14, 1978. Spring examinations begin on Apr. 17, 1978.

1977

May 9, Mon.	Last day for holding Doctoral orals for Spring Convocation.
May 9, Mon., to June 17, Fri.	Summer Session Part I.
May 23, Mon.	VICTORIA DAY. Administrative offices will be closed.
May 26, Thurs.	Health Sciences Convocation.
May 30, Mon.	Summer Session Part I First term examinations.

CALENDAR FOR SESSION 1977-78

1977

June 16, Thursday & June 17, Friday	Supplemental examinations.
June 24, Friday	ST. JEAN BAPTISTE DAY. Administrative Offices closed.
July 1, Friday	CANADA DAY. Administrative Offices closed.
August 25, Thursday	Students registering for 372-420A report for class at 9:00 a.m.
September 5, Monday	LABOUR DAY. Administrative Offices closed.
September 6, Tuesday	Students registering for 375-401A and 349-418A report for class at 9:00 a.m.
September 9, Friday	Fall term registration for all new students 9:00 a.m. to 12:00 noon, and for returning students 2:00 to 4:00 p.m.
September 12, Monday	Lectures begin for the Fall term.
September 15, Thursday	Track meet.
September 22, Thursday	Open Students' Society meeting. Classes cancelled from 2:00 to 3:00 p.m.
October 7, Friday	Last day for course changes for Fall term (A) courses.
October 10, Monday	THANKSGIVING DAY. Classes cancelled. Administration Offices closed.
October 14, Friday to October 16, Sunday	Fall Royal and Open House.
October 15, Saturday	Annual Reunion Macdonald Branch of McGill Graduates Society.
October 28, Friday	Last day for dropping courses without academic penalty.
November 8, Tuesday	Fall Convocation. Classes as usual.
November 9, Wednesday	Scholastic Awards Banquet.
December 9, Friday	Last day of lectures for Fall term in all programs.
December 13, Tuesday to December 21, Wednesday	Fall Term Examination Period.

1978

January 4, Wednesday	Winter term registration for all January Admission students.
January 5, Thursday	Lectures begin for winter term.
January 25, Wednesday to January 28, Saturday	Winter Carnival. Classes as usual except January 25, Ski Day. Classes cancelled.
February 7, Tuesday	Last day for course changes for Winter term courses.
February 10, Friday	Macdonald College Founder's Day (Sir William C. Macdonald born February 10, 1831, died June 9, 1917).
February 24, Friday	Last day for dropping Winter term (B & D) courses without academic penalty.
February 25, Saturday to February 28, Tuesday (incl.)	Mid-term holiday. Classes cancelled.
March 16, Thursday	Open Students' Society Meeting. Classes cancelled 2:00 to 3:00 p.m.
March 24, Friday to March 27, Monday (incl.)	EASTER. Classes cancelled. Administrative Offices closed.
March 31, Friday	Project presentations.
April 12, Wednesday	Last day of lectures in all programs.
April 18, Tuesday to April 27, Thursday	Winter Term Examination Period.
May 1, Monday to May 12, Friday	Surveying School of the Department of Agricultural Engineering (336-214L).
June 3, Saturday	Convocation.

1 THE COLLEGE

1.1 ADMINISTRATIVE OFFICERS

UNIVERSITY

ROBERT E. BELL, C.C., B.A., M.A.(U.B.C.), Ph.D.(McG.), D.Sc.(U.N.B., Laval, Montr.) LL.D. (Tor.), D.C.L.(Bishop's),F., .S., F.R.S.C.
Principal and Vice-Chancellor

EIGIL PEDERSEN, B.A.(Sir G. Wms.), M.A. (McG.), Ed.D.(Harv.) **Vice-Principal(Academic)**

LEO YAFFE, B.Sc., M.Sc.(Man.), Ph.D.(McG.), F.C.I.C., F.A.P.S., F.R.S.C.
Vice-Principal(Administration)

ALLAN McCOLL, D.F.C., B.Com.(McG.), C.A.
Vice-Principal(Finance)

EDWARD J. STANSBURY B.A., M.A., Ph.D.(Tor.)
Vice-Principal(Planning)

W.F. HITSCHFELD, B.A. Sc.(Tor.), Ph.D.(McG.) F.R.(Met.S.) **Vice-Principal(Research)**

LEWIS E. LLOYD, B.Sc.(Agr.), M.Sc., Ph.D.(McG.)
Vice-Principal(Macdonald College)

COLIN M. McDOUGALL, D.S.O., B.A.(McG.)
Secretary-General

JEAN-PAUL SCHULLER, B.A.(Ott.) **Registrar**

PEGGY SHEPPARD, B.Ed.(McG.), B.A.(Sir G. Wms.) **Admissions Office, Director**

1.2 ADMINISTRATIVE OFFICERS

MACDONALD COLLEGE

LEWIS E. LLOYD, B.Sc.(Agr.), M.Sc., Ph.D.(McG.)
Vice-Principal

WILLIAM C. SHIPLEY, B.Sc.(Agr.), M.A.(McG.)
Secretary and Coordinator of Administrative Services

JEAN DAVID, L.S.A.(Montr.), Ph.D.(Calif.)
Student Adviser and Registrar

MRS. MURIEL WRIGHT, (Mrs. G.T.F.) B.A., B.Ed.(Sask.), B.L.S.(McG.) **Librarian**

MISS JUANITA BOSELLI, B.A., D.I.A.(Sir G. Wms.)
Director of Stewart Hall

WILLIAM R. ELLYETT, B.A.(Sir G. Wms.), B.Ed.(P.E.)(McG.) **Director of Brittain Hall**

MARTIN VAN LIEROP, B.Sc. (Agr.)(McG.)
Director of Extension

KATHLEEN CLYNES
Librarian, McLennan Travelling Library

RUDI DALLENBACH, Dip. Agr., Dip. Comm.
Director of Macdonald College Farm

1.3 INSTRUCTIONAL STAFF

LLOYD, LEWIS E., B.Sc.(Agr.), M.Sc., Ph.D.(McG.)
Dean of the Faculty and Professor of Animal Science.

DAVID, JEAN, L.S.A.(Montr.), Ph.D.(Calif.)
Associate Dean of the Faculty and Professor of Horticulture

ALI-KHAN, FELICITY (Mrs. Z.)., B.Sc. (Hons.) (Canterbury), Ph.D.(McG.)
Assistant Professor of Entomology

ANASTASSIADIS, PHOEBUS A., B.Agr.(Athens), M.Ed.(Rutgers), Ph.D.(McG.)
Professor of Agricultural Chemistry

APPLETON, PETER L. B.A.(Carl.), M.Sc.(Alta.)
Lecturer in Agricultural Economics

BAKER, BRUCE E., B.Sc.(Bishop's), D.Sc. (Laval)
Professor of Agricultural Chemistry

BARRETT, RON, B.A.(Bishop's).
Lecturer in Agricultural Chemistry

BARTHAKUR, NAYANA N., B.Sc.(Gauh.), M.Sc.(Allahabad), Ph.D.(Sask.)
Associate Professor of Agricultural Physics

BEVERIDGE, H. J. THOMAS, B.S.A., M.Sc., Ph.D.(U.B.C.)
Assistant Professor of Food Science

BIBLE, BERNARD B., B.S.(Ohio State), M.S., Ph.D.(Mich. State)
Associate Professor of Horticulture

BIDER, J. ROGER, B.Sc., M.Sc., Ph.D.(Montr.)
Professor of Wildlife Biology

BLACKWOOD, A. CLARK, B.Sc., M.Sc.(Alta.), Ph.D.(Wisc.), F.R.S.C.
Professor of Microbiology (on leave)

BROUGHTON, ROBERT S., B.S.A., B.A.Sc.(Tor.), S.M.(M.I.T.), Ph.D.(McG.)
Professor of Agricultural Engineering

BUCKLAND, ROGER B., B.Sc.(Agr.), M.Sc.(McG.), Ph.D.(Maryland) **Associate Professor of Animal Science (on leave)**

CHEVRIER, MICHELINE, B.A., M.A.(Montr.)
Assistant Professor of Sociology

COMMON, R. HADDON, B.Sc., M.Agr.(Belf.), Ph.D., D.Sc., (Lond.), D.Sc., LL.D.(Belf.), F.R.I.C., F.A.I.C., F.R.S.C.
Emeritus Professor of Agricultural Chemistry

COULMAN, BRUCE, B.S.A., M.Sc.(Sask.) Ph.D.(Man.) **Assistant Professor of Agronomy.**

McGILL UNIVERSITY LIBRARY

COUTURE, MARCEL J. B.Sc.(Agr.)(McG.), M.Sc.(Agr.)(Guelph)
Lecturer, Agricultural Economics and Assistant Director Diploma Program

DeVOE, IRVING W., B.Sc.(Aurora), Ph.D.(Oregon)
Associate Professor of Microbiology

DION, H. GEORGE, B.S.A. (Sask.), Ph.D. (Wis.), D.Sc.(Laval), F.A.I.C.
Professor of Soil Science (on leave)

DONEFER, EUGENE, B.S., M.S.(Corn.), Ph.D.(McG.) **Professor of Animal Science**

DOUGLAS, RICHARD H., B.Sc.(Alta.), M.A.(Tor.), Ph.D.(McG.) **Professor of Agricultural Physics**

DOWNEY, BRUCE R., D.V.M.(Tor.)
Lecturer in Animal Science

DuPORTE, E. MELVILLE, D.Sc. (Carl.), B.S.A., M.Sc., Ph.D.(McG.)
Emeritus Professor of Entomology

ESTEY, RALPH H., B.Ed.(U.N.B.), M.S.(Maine), D.I.C.(Imp. Coll.), B.Sc.(Agr.), Ph.D.(McG.), F.L.S. **Professor of Plant Pathology**

FANOUS, MAMDOUH A., B.S. (Cairo), M.Sc., Ph.D.(Okla. State) **Associate Professor of Agricultural Physics and Chairman of the Department of Agricultural Chemistry and Physics**

FARMER, FLORENCE A., B.H.S., M.Sc., Ph.D.(McG.) **Professor of Food Science**

FLEMING, MARION (Mrs. D.E.), B.Sc. (H.Ec.)(Man.)
Sessional Lecturer in Food Science

FORGRAVE, LYNN, B.Sc.(Bishop's), M.Sc.(McG.),
Director Farm Practice Diploma Program.

GARINO, ENRIQUE, J., B.Sc.(Agr.), M.Sc.(McG.)
Lecturer Animal Science Diploma Program.

GENDRON, GHISLAIN, B.A., B.Sc.(Laval), M.S., Ph.D.(Wis.) **Associate Professor of Agronomy**

GEROLS, JACQUELINE (Mrs. P.), L.-ès-L.(Bordeaux), M.A. (Montr.)
Assistant Professor of French

GODFREY, ALLAN R., B.A.(Hons.)(Alta.), M.A.(Tor.)
Assistant Professor of English (Faculty of Arts)

GRAHAM, DONALD W. B.Sc.(Agr.)(McG.), M.L.A. (Harvard)
Assistant Professor Landscape Design

GRANT, WILLIAM F., M.A.(McM.), Ph.D.(Virginia), F.L.S. **Professor of Agronomy**

HARTSOCK, THOMAS G., B.S., M.S., Ph.D.(Penn. State) **Assistant Professor of Animal Science**

HENNEBERRY, CELIA L.(Mrs. G.O.),B.H.S.(McG.), M.Sc.(Vermont), P.Dt.
Associate Professor of Food Science

HENNEBERRY, GERALD O., B.Sc.(Dal.), M.Sc. (McG.)
Associate Professor of Agricultural Chemistry

HILL, STUART B., B.Sc.(Swansea), Ph.D.(U.W.I.)
Assistant Professor of Entomology

HUECKEL, HANS J., B.Sc.(Agr.) (McG.), S.M.(M.I.T.), Ph.D.(Calif.)
Assistant Professor of Agricultural Chemistry

IDZIAK, EDMUND S., B.Sc.(Agr.), M.Sc., (McG.) D.Sc. (Delft)
Associate Professor of Microbiology and Director of the School of Food Science

INGRAM, JORDAN M., B.Sc.(Agr.), M.Sc.(McG.), Ph.D.(Mich. State)
Associate Professor of Microbiology

JONES, ARCHIBALD R. C., B.Sc.F.(Tor.), M.Sc.(Syr.)
Associate Professor Woodland Resources

KENNEDY, BRIAN W., B.Sc. (Agr.), M.Sc.(McG.), Ph.D.(Corn.)
Assistant Professor of Animal Science

KEVAN, D. KEITH McE., B.Sc.(Edin.), A.I.C.T.A. (Trin.), Ph.D.(Nott.), F.R.S.(E.), M.I. Biol.
Professor of Entomology, Director of Lyman Entomological Museum and Research Laboratory (on leave)

KLINCK, HAROLD R., B.S.A.(Tor.), M.Sc., Ph.D.(McG.) **Professor of Agronomy**

KNOWLES, ROGER, B.Sc.(Birm.), Ph.D.(Lond.)
Professor of Microbiology

KOK, ROBERT, B.E.Sc., Ph.D.(W. Ont.)
Assistant Professor of Agricultural Engineering

LAGUË, PAUL C., B.A.(Montr.), B.S.A. (Laval), M.S., Ph.D.(Corn.)
Assistant Professor of Animal Science

LAWSON, NORMAN C., B.Sc.(Glasgow), Dip.Agr. (Reading), M.Sc., Ph.D.(McG.)
Associate Professor of Agronomy and Director of Diploma Program

LOCKE, DONALD F., B.Sc.(Agr.)(McG.), M.S. (Agr.)(Purdue)
Lecturer in Agricultural Economics.

MacARTHUR, JAMES D., B.Sc.F. (U.N.B.) F.E.
Associate Professor of Woodland Resources and Curator, Morgan Arboretum

MacEACHERN, GORDON A., B.Sc.(Agr.)(McG.), M.S., Ph.D.(Purdue)
Associate Professor of Agricultural Economics and Chairman of the Department

MacFARLANE, DAVID L., B.S.A., M.Sc. (Sask.), Ph.D.(Minn.)
Emeritus Professor of Agricultural Economics

MacKENZIE, ANGUS F., B.S.A., M.Sc.(Sask.), Ph.D.(Corn.)
Professor of Soil Science (on leave)

MacLEOD, ROBERT A., B.A., M.A.(U.B.C.), Ph.D.(Wis.), F.R.S.C.
Professor of Microbiology and Chairman of the Department

MACONOCHIE, HELEN L. (Mrs. A.K.), M.A.(Tor.), P.Dt. **Associate Professor of Food Science**

MARTIN, KATHARINE (Mrs. S.L.B.), B.H.S.(McG.)
Sessional Lecturer in Food Science

MARTIN, PAUL A., B.Sc., D.V.M., M.Sc., Ph.D.(Ill.)
Assistant Professor of Animal Science

MARTIN, RAYMOND, B.A.(Collège Ste-Marie), B.Sc.(U.Q.A.M.), M.Sc.(McG.)
Lecturer in Agronomy

McFARLANE, JOHN E., M.A.(Sask.), Ph.D.(Ill.)
Professor of Entomology

McKYES, EDWARD, B.Eng., M.Eng., Ph.D.(McG.)
Associate Professor of Agricultural Engineering

MEEROVITCH, EUGENE, B.Sc.(St. John's Univ., Shanghai), M.Sc., Ph.D.(McG.)
Professor of Parasitology (Faculty of Science)

MILLETTE, J.F. GERARD, B.Sc.(Agr.), M.Sc. (McG.), Ph.D.(Penn. State)
Associate Professor of Soil Science

MONCRIEFF, PATRICK M., B.Sc., M.Sc.(Alta.)
Lecturer in Agricultural Economics

MOXLEY, JOHN E., B.Sc.(Agr.), M.Sc., (McG.) Ph.D.(Corn.)
Professor of Animal Science

MURPHY, M. ELIZABETH (Mrs. S.M.), M.Ed.(McG.)
Lecturer in Food Science

MUTCH, DOUGLAS A., B.A.(Hons.)(McG.)
Lecturer in Agricultural Economics

NEILSON, HELEN R., M.B.E., B.H.S., M.Sc., (McG.) P.Dt. **Professor of Food Science (on leave)**

NIKOLAICZUK, N., B.Sc., M.Sc.(Alta.), Ph.D.(Ohio State) **Professor of Animal Science)**

NORRIS, ERIC R., B.S.A., (Tor.), M.Sc. (Guelph), Ph.D.(Mich. State)
Professor of Agricultural Engineering

PARNIS, ELIZABETH (Mrs. A.), B.Sc.(Liverpool), M.Sc. (McG.)
Assistant Curator, McGill University Herbarium

PELLETIER, REAL L., L.S.A.(Montr.), Ph.D.(Wis.), M.Sc. (McG.) **Professor of Plant Pathology**

PERRON, LOUIS, B.L.A.(Corn.)
Sessional Lecturer in Horticulture

PETERSON, JEAN F., B.A.(Grinnell), M.Sc., Ph.D.(Nebr.)
Assistant Professor of Plant Pathology

RAYMOND, DIANE A., B.Sc.(H.Ec.)(Man.), M.Sc.(Drexel), P.Dt.
Associate Professor of Food Science

ROWLES, WILLIAM, B.Sc.(Sask.), M.Sc., Ph.D.(McG.)
Emeritus Professor of Agricultural Physics

SACKSTON, W.E., B.S.A.(Man.), M.Sc.(McG.), Ph.D.(Minn.) **Professor of Plant Pathology**

SCHUEPP, PETER H., Dipl. Sc. Nat. (Zurich), Ph.D.(Tor.)
Associate Professor of Agricultural Physics

SHYMKO DOLORES, B.A., B.Ed.(Alta.), M.A.(Calgary), Ph.D.(Tor.)
Assistant Professor of Food Science

STEPPLER, HOWARD A., B.S.A.(Man.), M.Sc., Ph.D.(McG.), F.A.I.C.
Professor of Agronomy and Chairman of the Department of Plant Science

STEWART, ROBIN K., B.Sc.(Agr.), Ph.D. (Glas.)
Professor of Entomology and Chairman of the Department

TANNER, CHARLES E., B.Sc.(Purdue), M.Sc., Ph.D.(McG.) **Professor of Parasitology (Faculty of Science)**

TAPER, CHARLES D., M.S.A.(U.B.C.), Ph.D.(Man.)
Associate Professor of Horticulture

TITMAN, RODGER, B.Sc.(McG.), M.Sc.(Bishop's), Ph.D.(U.N.B.)
Assistant Professor of Wildlife Biology

TOUCHBURN, SHERMAN P., B.S.A., M.S.A.(U.B.C.), Ph.D.(Ohio State)
Professor of Animal Science and Chairman of the Department

VAN LIEROP, MARTIN, B.Sc.(Agr.)(McG.)
Assistant Professor of Renewable Resources and Director of Extension

VICKERY, VERNON R., B.Sc.(Agr.), M.Sc., Ph.D. (McG.) **Professor of Entomology and Curator, Lyman Entomological Museum and Research Laboratory**

VISWANATHAN, MURI A., B.Sc.(Agr.) (Madras), Assoc. I.A.R.I. (New Delhi), Ph.D.(McG.)
Assistant Professor of Plant Pathology

WARKENTIN, BENNO P., B.S.A. (U.B.C.), M.S.(Wash.), Ph.D.(Corn.)
Professor of Soil Science

WATSON, ALAN K., B.Sc.(Agr.), M.Sc. (U.B.C.), Ph.D.(Sask.)
Assistant Professor of Agronomy

McGILL UNIVERSITY LIBRARY

WIGDOR, SAMUEL, B.Sc.(McG.), B.Sc.(Agr.), M.S.(Mich. State)
Sessional Lecturer in Horticulture

WOODLAND, DENNIS W., B.A., M.A.(Walla Walla), Ph.D.(Iowa State)
Associate Professor of Plant Pathology and Curator, McGill University Herbarium

YULE, WILLIAM N., B.Sc.(Glasgow), Ph.D. (Nottingham)
Associate Professor of Entomology

1.4 MACDONALD COLLEGE

Macdonald College, which was founded and endowed by the late Sir William C. Macdonald, is incorporated with McGill University. The Faculty of Agriculture, which includes the School of Food Science, is located on the Macdonald College campus at Ste. Anne de Bellevue.

Ste. Anne de Bellevue, Québec, is twenty miles west of Montreal, and can be reached by Canadian Pacific Railways, provincial highways No. 2 and No. 20 and the Trans-Canada highway. Travellers by air book to the Montreal International Airport at Mirabel, and drive to Dorval, which is approximately ten miles east of the College. The Anglican Church of Canada, the United Church of Canada, the Roman Catholic Church and the Presbyterian Church all have churches nearby. Students of all religious denominations are free to enter Macdonald College. Branches of the Bank of Montreal and of the Banque Canadienne Nationale serve the community.

POST OFFICE

The College has its own post office and mail should be addressed to Macdonald College Campus of McGill University, Macdonald College, P.Q., H0A 1C0. The address for freight and express parcels, and for telegrams, is Macdonald College, Ste. Anne de Bellevue, P.Q.

FACULTY OF AGRICULTURE

The work of the Faculty falls into three main divisions: teaching, research, and extension in Agricultural Sciences, Biological Sciences and Renewable Resources Development. Teaching and research form the major part of their work. Extension work is undertaken by departments as the need or opportunity may arise.

SCHOOL OF FOOD SCIENCE

The School of Food Science is an administrative unit within the Faculty of Agriculture. The function of the School is teaching to provide the professional qualifications necessary for dietetics and food technology and to provide strong academic training in consumer services, home economics education, nutrition, food chemistry and hospitality management.

THE INSTITUTE OF PARASITOLOGY

The Institute of Parasitology, attached to the Faculty of Science, is located at Macdonald College. Research on animal parasites and the instruction of graduate students are the main functions of this Institute.

THE LYMAN ENTOMOLOGICAL MUSEUM AND RESEARCH LABORATORY

Originally established in 1914 and formerly housed in the Redpath Museum, the Lyman Entomological Museum was moved to the Biology Building, Macdonald College, in 1962. It houses the largest University collection of insects in Canada, second only in size to the National Collection. The Museum has also an active graduate research program in association with the Department of Entomology. Study facilities are available, on request from the Curator, to all bona fide students of entomology.

BRACE RESEARCH INSTITUTE

The Brace Research Institute, attached to the Faculty of Engineering, is located at Macdonald College. The principal area of activity is research into water supply for arid areas, including desalination of saline water. This involves the use of solar, wind and biomass energies, greenhouse agriculture and appropriate technology.

2 GENERAL INFORMATION

2.1 FACILITIES

A new building, named the Macdonald-Stewart Building, after the late Sir William Macdonald and Mr. and Mrs. David M. Stewart is under construction to house the major part of the Faculty.

Sir William Macdonald planned so well for future needs that the facilities of Macdonald College for instruction in agriculture and food science are still provided almost entirely in the buildings constructed in 1905. The picturesque brick buildings and red-tile roofs of the Chemistry, Biology, Agriculture and Main Buildings, together with Stewart, Laird and Brittain Halls (residences for women and men), and the well laid out grounds on the shore of Lac St. Louis, combine to provide a campus which is attractive and functional. These facilities are now shared with John Abbott College.

Laboratory and lecture rooms are well supplied with modern and efficient teaching facilities, while the reference section of the Library and the research laboratories associated with the various science departments are well equipped to permit the vigorous investigation of problems at the post-graduate level.

The land associated with the College consists of approximately 1,600 acres, at the western end of the Island of Montreal, and is in the Town of Ste. Anne de Bellevue. The campus proper consists of about 200 acres south of Routes 2-20. The College farm represents a wide variety of the soils of the Ottawa St. Lawrence Valley Lowland. The principal purpose of the farm is to provide facilities for teaching, demonstration, and applied research by the various departments of the faculty.

The Morgan Arboretum, established in 1945, has 540 acres of natural woodlands and plantations set up and operated as a model for integrated multiple use forestry. It combines forest production with intensive recreational use in an urban region. The northern hardwood forest is used for research, teaching, and demonstration projects relating to forest resources and values. Groups of all the Canadian native trees and many useful and important exotics are also present. The Arboretum features a botanical trail, a bird sanctuary, twelve miles of wooded trails, a variety of forest ecosystems, soil and water conservation projects, forest operations such as reforestation, plantation management, timber harvesting and maple syrup production, and related forestry-wildlife ecological activities. An intensive nature interpretation program is offered for school children.

MACDONALD COLLEGE LIBRARY

The collection includes research and teaching materials for the agriculture, biology, environment and food sciences. It is a depository for many government publications and subscribes to 1016 serial titles. Among its special collections is the Lyman entomological book and journal library. The total collection now numbers 85,000 volumes of books and journals, and 17,000 volumes of government documents.

2.2 EXTENSION DEPARTMENT

The Extension Department functions as liaison between the Faculty of Agriculture and those involved in agriculture, including Federal and Provincial Departments and agencies. The Extension Department also serves the community on a provincial, federal and international level by providing information, education and assistance in community development to the rural population and other interested groups or organisations.

COMMUNITY PROGRAMS DIVISION

This division is responsible for the Macdonald College extension activities in rural communities. Through the organization of seminars and workshops in the community, through consultation with individuals and groups, the resources of Macdonald College and the University are made available to those without daily access to the campus. In addition, radio items and newspaper columns provide a link between the campus and the agricultural community.

This division also coordinates and encourages the extension services of various departments of Macdonald College. These are represented by such activities as the Soil Testing Service, the Dairy Herd Analysis Service and the Agricultural Engineering Consulting Service. Each of the College's departments welcomes requests for information on subjects relating to agriculture and food science.

EXTENSION FILM LIBRARY

The Extension Department operates a film library service for schools, community organizations and individuals. Advice with respect to program planning and the use of audio-visual aids with special emphasis on films is available from the Library. A rental fee is charged for films and other audio-visual aids.

EXTENSION EVENING COURSES

Over 40 courses are offered in a wide variety of technical and popular subjects. These courses are generally offered in the evening during the regular academic year.

As well, several conferences, workshops and seminars are held each year at the College. The Department also cooperates with regional school boards and community schools in planning programs and assisting in adult education programs.

MACDONALD JOURNAL

The Macdonald Journal, published monthly, concentrates on articles on agriculture, related sciences, government policies and rural community affairs. Articles and reports written by Macdonald College staff, the Ministry of Agriculture of Quebec (M.A.Q.) and other contributors keep its subscribers up to date on new developments in agriculture and related areas.

COLLEGE TOURS

Visits to the College from individuals or groups with a common interest in the farm and the home, are always welcomed.

Groups of fifteen or more requiring meals are asked to give two weeks advance notice and to confirm the numbers in the group not later than three days before arrival. All requests for visiting privileges should be addressed to the Extension Department, P.O. Box 237, Macdonald College, P.Q., H0A 1C0, who will be pleased to quote rates for meals, if required.

2.3 STUDENT PLACEMENT SERVICE

The Canada Manpower Service, in cooperation with Macdonald College, has established a Student Placement and Career Counselling Office on the campus to bring together graduating students and

potential employers. In addition to permanent employment, the Service also endeavours to assist both undergraduates and employers interested in summer employment and part-time work. The Placement Office operates on a year-round basis, and its services are available to both students now registered and graduates of earlier years.

2.4 SUMMER SCHOOL

Courses are available at Macdonald College during the summer session. See the McGill University Summer Session Announcement, available from the Registrar's Office, Macdonald College.

2.5 REGISTRATION

Students are required to register at the times indicated in the calendar for the program and year in which they have been accepted, and before entering residence to obtain a residence card during registration. Registration at a later date is permitted only to those who obtain the consent of the Dean of the Faculty or the Director of the School of Food Science.

All students entering for the first time are required to register in advance of upper classmen. This period is devoted to a program of orientation, in which efforts are made to familiarize them with their physical and cultural surroundings, and to acquaint them with the scope of the various fields of learning at the College. Attendance at all sessions of New Students Orientation is compulsory.

Upon registering students are required to sign the following declaration: "I hereby accept and submit myself to the rules and regulations of Macdonald College, and of the Faculty or School thereof in which I am registered, and to any amendments thereto which may be made while I am a student of the College, and I promise to observe the same."

Students are not permitted to enter any class until they have registered.

2.6 FEES

The University reserves the right to make changes without notice in its published scale of tuition, board and room, and other fees. Fees are refundable as described under the heading: Regulations Concerning Payment and Remission of Fees.

TUITION AND OTHER FEES

In the 1974-75 academic session, the College introduced a new system of tuition fee assessment based on a per credit charge where applicable. In 1977-78, this fee will be $19.00 per credit and will include all the regular charges such as registration, tuition, laboratories and libraries. Student Services fees and Students' Societies fees are separately assessed in a manner appropriate to those two functions and must be paid at the same time as the tuition fees.

A student who is taking an academic load of 30 credits would pay $570 in tuition fees ($19 × 30) plus fees for Student Services and Students' Societies. Tuition fees will vary according to the number of credits taken but Student Services and Students' Societies fees per term will be as shown below for all full-time students. There are no tuition fees for the diploma in Agriculture.

FULL TIME STUDENTS (PER TERM)

Diploma in Agriculture	No tuition fees
Student Services	$35.00
Macdonald Students' Society	9.00
Centennial Centre	7.50
Undergraduate Societies	
Agriculture	$1.00
Food Science	.50
Class Fee	1.00

PART TIME, SPECIAL AND VISITING STUDENTS

The tuition fee assessment is $19 per credit. In addition, the following fees per term will be assessed:

a) If taking 9 to 11 credits:	
Student Services	$35.00
Macdonald Students' Societies	18.50
b) If taking more than 5 but less than 9 credits:	
Student Services	20.00
Macdonald Students' Societies	5.00
c) If taking 5 credits or less:	
Student Services	10.00
Macdonald Students' Societies	5.00

*Foreign Students see p. 13 and below

FOREIGN STUDENTS HEALTH INSURANCE

Compulsory Health Insurance ..... $85 for single and $150 for married students.

SPECIAL FEES AND PENALTIES

Application for Admission (not refundable)	$15.00
Late registration (unless excused by the Dean or Director)	25.00
Late payment during first thirty days after registration	10.00
Late payment after thirty days	25.00

Residence application fee (not refundable)	5.00
Key deposit (refundable upon return of keys)	10.00
Residence caution deposit Refundable in total or in part	50.00
Graduation Fee**(including those who graduate *in absentia)*	15.00
Duplicate diploma	10.00
Certified transcript of student's record:	
First copy	2.00
Additional copies made at the same time, each	.50
Re-reading examination paper	10.00
Supplemental examination, per paper	
– written at College	10.00
– written elsewhere	25.00

**Graduation fee: Applications by students who expect to graduate at the Spring Convocation must be filed by April 1st of each year and by those who expect to graduate at the Fall Convocation by October 1st of each year. An application form will be mailed to each eligible student and must be returned to the Registrar's Office, McGill University, together with the graduation fee of $10.00 by the appropriate date listed above. This fee will cover all expenses in connection with graduation including academic dress. It is the student's responsibility to ensure that his or her name is included in the graduation list by notifying the Registrar's Office, Macdonald College.

BOARD AND RESIDENCE

Board and residence are paid separately. The fees, per session, exclusive of the Christmas holidays, are:*

The Dining Room is open 5 days per week exclusive of statutory holidays designated by the University. Students buy individual meals on a cafeteria basis and pay cash or with tickets sold in book form.

Approximate cost for session, $750.00

Room (double occupancy) $610.00

Students are not encouraged to remain in residence during the Christmas holidays. However, if special permission to remain in residence has been obtained from the Residence Business Office due to exceptional circumstances the room cost for this period will be $22.00 for a week or any part of a week.

Single Rooms

There are a few single rooms available in each residence at an additional cost of $60.00.

APPROXIMATE COST PER SESSION

Course	Total Fees	Board (optional)	Residence	Textbooks Supplies, etc. (estimate)	Total

SUNDRY

Books

The prescribed textbooks, and classroom and laboratory supplies, may be purchased at the College Book Shop – estimated minimum cost is $200.00.

Supplies

Materials and supplies required for classes in Textiles and Clothing are provided by the students concerned and purchased at the direction of the instructor.

Uniforms

Uniforms are required for food laboratories; students in the B.Sc. (F.Sc.) program will be advised of the uniform requirements on acceptance or promotion.

REGULATIONS CONCERNING PAYMENT AND REMISSION OF FEES

1. Fees for tuition and residence are due and payable to the Cashier at the time of registration. A

late fee of $10.00 is charged for payment during the first 30 days after registration and $25.00 thereafter.

2. Fees may be paid in two instalments, one at the beginning of the session, and one by January 15. Information on payment of fees is available from Office.

In special cases of hardship, application may be made for financial assistance. See section on Scholarships, Prizes, Bursaries and Loan Funds.

3. As soon as possible after the dates prescribed for the payment of fees indicated in 2 above, a list of the registered students whose accounts with the Cashier are in arrears will be sent to the Dean or Director of the Faculty or School concerned, on receipt of which the Dean or Director may suspend these students from attendance; they will not be readmitted to classes until the account is settled, or a satisfactory arrangement is made with the Cashier.
4. Students who have fees or other accounts outstanding at the end of the session will not be entitled to reports of standing, transcripts of records or diplomas, until these accounts are paid.
5. A student who withdraws from the College during the course of the academic year must do so at the Registrar's Office and return his or her identity card. If in residence he/she must return his/her residence card to the Residence Office.
6. In the case of students who leave the College before the end of the academic year, but receive full credit for the year towards their degree, there shall be no refund of tuition fees.
7. In the case of students who leave during the academic year and do not receive credit beyond the period of their attendance, tuition fees shall be remitted on the basis of a formula based on length of attendance.
8. Residence fees are payable for the full academic year and will not be refunded, except in special circumstances.
9. Avoidable breakage or damage to College property or equipment by a student is charged to him on receipt of a report from the chairman of the department concerned.

The Cashier's Office is open to receive payments from 9 a.m. to 12:00 noon and 1:30 p.m. to 4:30 p.m., Monday to Friday.

All cheques, money orders, etc., should be drawn to the order of "Macdonald College," and should be made payable in Canadian funds.

2.7 RESIDENCE

Men students in residence live in Brittain Hall, named in honour of the late Dr. W.H. Brittain, Vice-Principal of Macdonald College from 1935 to 1955. The residence for women is Stewart Hall, named in honour of the late Mr. and Mrs. Walter M. Stewart, long-time friends and benefactors of the College. Laird Hall, named in honour of the late Dr. Sinclair Laird, Director of the School for Teachers from 1913 to 1949 is a co-ed, residence for graduate students and seniors.

Each residence is under the control of a director who is appointed from the staff. All applicants for residence and inquiries concerning the residences should be addressed to the Residence Office, P.O. Box 214, Macdonald College, P.Q., H0A 1C0.

APPLICATION FOR RESIDENCE ACCOMMODATION – NEW STUDENTS

A form for applying for residence accommodation and detailed information about the residence are sent to prospective students when they are accepted in the Faculty of Agriculture or the School of Food Science. When the form is received from the College it must be completed and returned immediately to the Residence Office, P.O. Box 214, Macdonald College, PQ, H0A 1C0. A $5.00 application fee (not refundable) must accompany the application for residence accommodation. The caution deposit of $50.00 is paid when the student receives a final residence acceptance and is refundable in total, or in part, at the end of the academic year. The College guarantees to refund the $50.00 deposit if the applicant cancels the room reservation at least three weeks prior to the date of registration.

APPLICATION FOR RESIDENCE–RETURNING STUDENTS

Returning students in the upper years must reserve residence accommodation on the form available from the Residence Office. This must be submitted by March 15th together with the $5.00 application fee.

*Please note that is is not possible to alter any of the terms of the original application (i.e. a student wishing to leave Residence during a semester) except by paying a fee of $100.00 in addition to any amounts owing to date under the original contract. (application for Residence)

Should the student find a replacement for her/him in Residence, the $100.00 fine will be eliminated.

ROOM OCCUPANCY

Students will not be admitted to residence before the date set for registration. Students from foreign countries or students from a distance may be admitted early in exceptional circumstances. Permission must be requested by letter and a reply obtained in writing from the Residence Office before the student leaves home.

Students who return to write supplemental examinations will be admitted to residence on a specified date and must make application to the Residence Office on the form sent by the Registrar's Office with notice of the examination schedule.

Student officers may be admitted before the opening date of courses, if permission is granted by the Residence Office.

Students from a distance may remain in residence during the Christmas holidays, provided permission is granted by the Residence Office.

Students must vacate their rooms at the end of the regular session. The residences are used in the summer for meetings, conferences and summer school and the rooms must also be available for cleaning and maintenance. Only under exceptional circumstances will a student be granted permission to remain in residence during the summer months. Exceptions may be made for students who are employed at the College. In all cases permission must be requested from the Residence Office.

RESIDENCE FEES

Residence fees cover only the regular periods when classes are in session. An additional fee is charged for the Christmas holiday period and for residence accommodation during the supplemental examination period in June.

NON-RESIDENT STUDENTS

Students living at home or out of residence are subject to College discipline as outlined under CONDUCT AND DISCIPLINE. The Student Affairs Discipline Committee of the Students' Council is responsible for the maintenance of good order and discipline in all areas on the campus and at student sponsored activities away from the campus.

Non-resident students may not stay overnight in any residence without permission of the Residence Office. Common rooms are provided for non-resident students in the Centennial Student Centre.The athletics facilities (gymnasium and pool in both the men's and women's residences are available to non-resident students at appropriate times.

Meals are available in the College dining room for non-resident students.

Lockers are available in the basement of the Student Centennial Centre for non-resident students. These may be arranged for at the Student Centennial Centre one week after registration.

STUDENT AUTOMOBILES

Students will be allowed to park automobiles on the campus provided they observe the parking regulations and other rules applicable to students' automobiles. Students are required to obtain a permit on registration day. Permits will not be issued to students who do not carry car insurance for public liability, property damage and personal injury. Students must part in Student Parking Areas only.

2.8 EXTRACURRICULAR ACTIVITIES

The program of extracurricular activities is designed to complement the program of studies and to promote both fellowship and wider experiences for the student.

A wide program of athletics is available to men and women, particularly at the intramural level, supervised by qualified instructors. There are facilities for track and field, football, hockey, basketball, volleyball, woodsmen, tennis, badminton, aquatic sports, curling, and ice skating on Glenfinnan Rink.

The Macdonald College Students' Council sponsors a newspaper. The Harvest, a Yearbook, Clan Macdonald, a photography department, a Winter Carnival which is highlighted by a widely attended international woodsmen's competition and numerous other activities. Dances and informal get-togethers are features of student life with the Centennial Centre a favourite meeting place.

Macdonald College can also boast of a Student Union Building. At the corner stone laying ceremony in October of 1967 it was fittingly named "Centennial Centre". The building includes many facilities for extracurricular activities, recreation and relaxation, including a lounge, snack bar, meeting and board rooms, book shop, publication offices, ball room, and areas set aside for table tennis, billiards, a bar area, and a discothèque. The Centennial Centre is a students' facility and students are active in all facets of planning and management of this attractive focal point of campus life.

On Founder's Day, which is celebrated each year on February 10, a special dinner and a musical or dramatic program are provided through the generosity of Mr. and Mrs. David M. Stewart. The Memorial Assembly is another annual event, held to commemorate the sacrifices of Macdonald men and women in two World Wars.

2.9 UNIVERSITY HEALTH SERVICE

The University Health Service comprises a main clinical centre at 517 Pine Avenue West, and an infirmary at Royal Victoria College. Equal importance is placed on the physical and mental health of students and the medical staff are appropriately qualified to deal with both aspects. Medical clinics operate daily, five days of the week from 9:00 a.m. – 5:00 p.m. Students will be reimbursed for travel expenses to the University medical clinics, the Lakeshore General Hospital, the Pincourt Medical Centre or the Clinique Médicale Dorion, upon application to the Registrar's Office.

PARTICIPATION IN ATHLETICS

A student wishing to participate in athletics in any academic year must first obtain a permit from the University Health Service. Permission will depend upon the initial medical report from the student's own physician, supplemented by such other medical examination as may be thought necessary in the Health Service. A student who has received medical attention for an illness or accident must be declared fit by the Health Service before he may again participate in athletics.

MEDICAL EXPENSES

The cost of medical examinations carried out at the Health Service and of Medical care obtained through its general or mental health clinics is covered in part by University Funds. Residents of Québec will be covered for services under Medicare. Non-Québec Canadian Students are strongly urged to obtain comprehensive health insurance in their home province. The cost of drugs prescribed by the Health Service will be borne by the student.

FOREIGN STUDENTS

All full-time foreign students (including landed immigrants during their first year at the University) must take out the Health Insurance policy which is available on a group basis at the cost of $85.00 per single student or $150.00 for a married student per year. They are required to pay the annual premium with the first instalment of their fees. The University will forward these premium payments to the Insurance Company. In general, the policy provides for payments towards hospital, surgical, medical, diagnostic and other medical expenses. Students should make themselves aware of the limitations of such a policy.

Location:	517 Pine Avenue West
Appointment and General Office	392-5441
Mental Health Section	392-5449

2.10 McGILL COUNSELLING SERVICE

Professional counsellors are available to assist the students on the Macdonald Campus. Application should be made through the Registrar's Office, in person or by phone (local 216).

2.11 CONDUCT AND DISCIPLINE

"The Vice-Principal of Macdonald College and its Dean of Students each have jurisdication over all offences committed by students registered at Macdonald College and over all offences committed by students on or about Macdonald College. Directors of residences have jurisdiction over all offences committed in or about their respective residences". McGill University – Code of Student Disciplinary Procedures, 1965).

The Macdonald College practice has been to delegate the disciplinary function to the students in the first instance. The Students' Council has accepted this responsibility and has designated committees to act on its behalf. These committees are (1) the Student Affairs Disciplinary Committee for affairs outside of residence, (2) the Women's Residence Committee, (3) the Men's Residence Committee and (4) the Post Graduate Sub-committee on Discipline. The final committee of student appeal is the judicial wing of the Students' Council, namely (5) the Student Disciplinary Board. Serious breaches of discipline are referred to the University Committee on Student Discipline.

Students found guilty of improper conduct, violation of rules or wilful causing of damage to persons or property, shall be liable to discipline as set forth in the Code of Disciplinary Procedures approved by the Senate of McGill University in 1965, a copy of which is available on request from the Vice-Principal of Macdonald College. The Code specifies that disciplines may include: imposition of fines or assessments for damage caused by individuals or groups; posting of security for good behaviour; reprimand; imposition of conduct probation; suspension or expulsion from classes or residence; expulsion from the University.

Any student who is unwilling to submit to the demands of college life, or whose work is definitely unsatisfactory, may be placed on probation, or may be required to withdraw from the College.

All students registered at Macdonald College are obliged to inform themselves of the rules and regulations of the College. A few of these are listed below but the main body of them will be found in the Residence Handbook or in other documents distributed at registration.

Possession or consumption of liquor by students is forbidden on the campus, except in authorized places and with special permission.

Initiation or hazing in any form is forbidden.

Unauthorized entrance to Residence or College buildings is forbidden. Violation of this rule is sufficient reason for expulsion.

Gambling is not permitted on College grounds.

Tampering with fire fighting equipment is forbidden.

Students are not permitted to bring firearms into the Residence nor is the use of firearms allowed on College property.

3 SCHOLARSHIPS, PRIZES ETC.

3.1 GENERAL

Students registered in the Faculty of Agriculture and the School of Food Science are eligible for Entrance and other Scholarships. Prizes, Bursaries and Loans which are open to all students at McGill University are described in the Undergraduate Scholarships and Awards Announcement obtainable from the Registrar, McGill University, 845 Sherbrooke St. West, Montreal, P.Q. H3A 2T5, or the Registrar, Macdonald College, P.Q. H0A 1C0. In addition, the following loans and special awards are available to students registered in Agriculture and Food Science.

3.2 DEGREE PROGRAMS

3.2.1 Scholarships

3.2.1.1 CANADIANS AND LANDED IMMIGRANTS

A scholarship is granted for distinguished academic standing. In addition to Entrance Scholarships open to all students at McGill University (see Undergraduate Scholarships and Awards Announcement), the following scholarships are open to students in the Faculty of Agriculture and the School of Food Science.

ELIZA M. JONES SCHOLARSHIPS IN AGRICULTURE AND FOOD SCIENCE. – Established by a bequest of the late F.P. Jones in memory of his mother.

Eleven scholarships of $700 each awarded yearly as follows: four scholarships to accompany the Macdonald and Stewart Medals in first and second years; two scholarships to high ranking students entering in January from CEGEP or the equivalent, one for Agriculture, one for Food Science; two scholarships to students entering from the Nova Scotia Agricultural College at any level; and three scholarships to high ranking students at any level.

MACDONALD BRANCH OF THE McGILL GRADUATES SOCIETY ENTRANCE SCHOLARSHIPS. – Five scholarships of $1000 each will be available to students entering Bachelor's degree programs in the Faculty of Agriculture and in the School of Food Science. Each applicant will be considered on his or her own merits taking into account all or any of the following: academic achievement, participation in athletics, student affairs activities or community service projects. Applications must be submitted prior to August 1 each year.

UNIVERSITY SCHOLARSHIPS. – After one year at the University, University Scholarships may be awarded by the University Scholarships Committee to students in any year of any undergraduate faculty for exceptionally distinguished work in the regular University examinations. No application is required.

All University Scholarships are renewable if in the opinion of the University Scholarships Committee, the holders maintain a sufficiently high academic standing.

University Scholarships carry a nominal recognition ($100) of their outstanding achievement. Where there is financial need, however, winners should apply, as soon as possible, to the Student Aid Office, McGill University.

HOLLIS J.M. FISKE SCHOLARSHIP. – A scholarship of $625 to be awarded to a student in the First or Second years of the B.Sc. (Agr.) program for academic achievement on registration in the succeeding year of the course. Preference will be given to a Canadian.

RALSTON PURINA SCHOLARSHIP. – A scholarship of $650 to be awarded to a student in the Agricultural Engineering, Animal Science or Food Science options entering the senior year. In selecting the winning student, consideration will be given to high academic standing, a record demonstrating good citizenship, sincerity of purpose in agriculture as the chosen field and demonstrated financial need.

HUBBARD FARMS SCHOLARSHIP – An annual award of $750 for a worthy undergraduate showing sincerity of purpose in any area of poultry science. If there is no suitable undergraduate candidate, the award will be given to a deserving graduate student working in poultry science.

3.2.1.2 OVERSEAS STUDENTS

Non-Candian students are ineligible for entrance scholarships. Overseas students and non-Canadians from North America are expected to present evidence to immigration authorities that they have adequate funds for their studies in Canada. After completing one year of study at the University, students are eligible for scholarships awarded annaully on the results of the sessional examinations.

COMMONWEALTH AND COLOMBO PLAN SCHOLARSHIPS. – These are rarely available for undergraduate studies, but undergraduates from countries where higher educational facilities are inadequate in their chosen area of study should inquire at their national departments of education.

FOREIGN GOVERNMENT SCHOLARSHIPS. – Several non-Canadian Governments have regional or federal government plans for sending selected students to study in Canada.

3.2.2 Bursaries

A bursary is a financial award which does not have to be repaid. It is made, on the basis of need, to a student whose academic achievement makes him worthy of support. Bursaries are not awarded to students with G.P.A. of less than 2.4 in their previous year's work. In addition to bursaries open to all students at McGill University the following bursaries are open to Faculty of Agriculture and School of Food Science students. Apply to the Registrar's Office, Macdonald College, before September 15th, if you think you might be eligible for bursaries marked with an asterisk.*

*ALUMNI BURSARIES. – Two bursaries ($200 each) offered by the Macdonald branch of the McGill Graduates' Society, one for a student in the B.Sc. (Agr.) program and one for a student in the B.Sc. (F.Sc.) program at the First or Second year levels.

ANNETTE S. HILL MEMORIAL BURSARIES. – Established in 1962 to assist young men of the Protestant faith and of good character from the Maritime Provinces or the Province of Ontario to obtain a college education. Apply to the McGill Student Aid Office or to the Registrar, Macdonald College.

*BETA SIGMA PHI BURSARY. – A bursary of $500, to be awarded annually for three years, commencing in 1975 to a student in the School of Food Science who has satsifactorily completed First or

Second year and is in need of financial assistance to continue in the program.

THE STEWART BROWN BURSARIES. – To be awarded to worthy students who are applying for admission or who are already in course in the Diploma or Degree programs in the Faculty of Agriculture. The bursaries are restricted to Canadian and landed immigrant students. The value of the bursaries will range from $300 to $1500, depending on financial need.

CHILDREN OF WAR DEAD (EDUCATION ASSISTANCE) ACT. – Under this Act fees and monthly allowances are provided for children of veterans whose death was attributable to military service. Inquiries should be directed to the nearest District Office of the Department of Veterans Affairs.

*HOTEL AND RESTAURANT SUPPLIERS ASSOCIATION BURSARY. – A Bursary of $200 to be awarded to a student in the School of Food Science who has satisfactorily completed First or Second year and is in need of financial assistance to continue in the program.

*MARCIA L. GAIRDNER BURSARY. – A Bursary of $200 value established in memory of Marcia L. Gairdner (nee Millard), B.Sc. (H.Ec.) 1968 by her parents and her brother, awarded annually to a student in need of financial assistance, in the second year of B.Sc. (F.Sc.) program. Preference will be given but not necessarily restricted to a candidate who attended either Ridgemont or Rideau High School in Ottawa.

*STE. ANNE DE BELLEVUE WOMEN'S UNIVERSITY CLUB BURSARY. – A Bursary of $300 is donated by the Ste. Anne de Bellevue Women's University Club to a woman student in any year of any program in the Faculty of Agriculture or the School of Food Science who is in good standing academically and need financial assistance.

*JANET MORRISON ROBB BURSARY FOR WOMEN. – The income for one year from an endowment established by the late Hon. James A. Robb, formerly M.P. for Chateauguay-Huntingdon and Minister of Finance, Canada, in memory of his daughter, Janet Morrison Robb, wife of Hugh Harvie Donald.

Preference is given to women students resident in either of the counties of Chateauguay, Huntingdon, or Beauharnois, who are daughters of widows or widowers of limited or moderate means, or daughters of disabled Canadian soldiers who have seen active service.

FISHER TRUST FUND. – In the memory of the late Hon. Sydney A. Fisher, formerly M.P. for Brome County and Minister of Agriculture, Canada. Two grants, normally of $150 each, awarded to students in either the degree or the diploma programs in Agriculture. Under certain conditions, consideration will also be given to applicants in the School of Food Science. Available only to candidates whose parents and guardians have been domiciled in Brome County for at least twelve months prior to the registration date of the study year for which financial assistance is requested. These awards will be continued from term to term only upon favourable report from the Dean of the Faculty of Agriculture or the Director of the School of Food Science.

Application forms may be obtained from Mr. Stanley Quilliams, Secretary, Fisher Trust Fund Trustees, Foster, Que. Completed application forms should reach him by September 1.

KETCHUM BURSARY. – $200, offered by the Ketchum Manufacturing Company Limited of Ottawa to a worthy student entering the last or second to last year of the degree program in Animal Science. Consideration is given to the applicants' need for assistance.

CANADIAN FEED MANUFACTURERS' ASSOCIATION BURSARY. – $200, awarded annually to a worthy student who has completed at least one year in the Animal Science major. Consideration will be given to students with financial need and good academic standing.

THE WILLIAM ROWLES BURSARY. – $300 each year from a fund set up in honour of Professor Emeritus William Rowles, who was for many years an outstanding teacher of physics and mathematics in the Faculty of Argriculture. To be given to a student in good academic standing who has financial need.

*THE COLONIZATION SOCIETY'S REGIONAL BURSARIES, available to graduates from the following schools: Gaspesia, New Carlisle; Alexander Galt, Lennoxville; Massey-Vanier, Cowansville; Chateauguay Valley, Ormstown; Richmond, Richmond; Pontiac, Shawville; Philemon Wright, Hull; Laurentian, Lachute.

These bursaries are open to students who register in either the degree course or the diploma course in Agriculture. Preference will be given to students from farm families. Apply to the Registrar, Macdonald College, by September 1.

CANADIAN INSTITUTE OF FOOD SCIENCE AND TECHNOLOGY BURSARY. An award of $500. to a student entering the final year of the B.Sc.(F.Sc.) program who has exhibited high academic standards and is in need of financial assistance.

RENEWABLE RESOURCES BURSARY. $500. to be awarded in May each year to a worthy senior Undergraduate of Postgraduate student whose research deals with the interaction of wildlife and agriculture. Tenable for students on the Macdonald campus.

3.2.3 Medals, Prizes and Awards

3.2.3.1 B.Sc. (F.Sc.) PROGRAM

Medals

STEWART MEDALS. – Named in recognition of the long and continued support and interest of the late Mr. and Mrs. Walter M. Stewart in the academic progress and welfare of Macdonald College students, and awarded for academic achievement to the students ranking highest in the First and Second years of the B.Sc. (F.Sc.) program.

GOVERNOR GENERAL'S MEDAL. – His Excellency the Governor General of Canada donates a medal to be awarded to the student in Food Science who ranks highest in the graduating class.

Prizes

MARGARET A. MILTON MEMORIAL PRIZE. – A prize of $100 established in memory of Margaret Ann Milton, B.Sc. (H.Ec.) 1965, awarded annually to a student in the Second year of the B.Sc. (F.Sc.) program, based on the results of the final examinations.

NORAH E. HOLCOMB MEMORIAL PRIZE. – An entrance award of $100 given in memory of Mrs. Norah E. Holcomb, supervisor of Home Economics in Montreal. To be awarded to a student who has achieved academic excellence and enrols in the first year of the two-year program at Macdonald College leading to the B.Ed. degree in Home Economics.

MRS. ALFRED WATT MEMORIAL PRIZE. – Value $100, established by the Québec Women's Institutes as a memorial to a distinguished Canadian, Mrs. Alfred Watt, M.B.E., who introduced the idea of Women's Institutes in England and Wales and was President of the Associated Country Women of the World from 1930 to 1947. Awarded to a student from rural Québec in the First or Second year of the B.Sc. (F.Sc.) program who shows qualities of leadership and is worthy of financial encouragement to complete her program.

FREDERICA CAMPBELL MACFARLANE PRIZE. – $100, donated by the Québec Women's Institute in memory of the late Frederica Campbell Macfarlane, graduate in Institution Administration, 1912, Superintendent of the Québec Women's Institute from 1913 to 1919. Open only to students from a rural district of the Province of Québec, and awarded on the results of the final examinations in any year of the B.Sc. (F.Sc.) program.

HARRISON PRIZE. – A prize established by an endowment under the will of the late Dr. F.C. Harrison, Principal of Macdonald College from 1910 until 1926; awarded for academic excellence to a student in the graduating year of the B.Sc. (F.Sc.) program.

CLASS OF 1953 BOOK PRIZE. – Graduates of the class of 1953 (Agriculture and Food Science) have established a fund, the proceeds of which are used to provide a prize in books for the student with the highest standing in all the courses of the Second year curriculum. Awarded in the B.Sc. (Agr.) program in odd-numbered years; in the B.Sc. (F.Sc.) program in even-numbered years.

3.2.3.2 B.Sc. (Agr.) PROGRAM

Medals

MACDONALD MEDALS. – As a tribute to Sir William Macdonald, and in recognition of academic achievement, the late Mr. and Mrs. Walter M. Stewart of Montreal established two medals for annual competition, to be awarded to the students with the highest aggregate standing in the First and Second years respectively of the B.Sc. (Agr.) program.

GOVERNOR GENERAL'S MEDAL. – His Excellency the Governor General of Canada donates a medal to be awarded to the student in Agriculture who ranks highest in the graduating class.

GRAY MEDAL. – A medal and a prize of $100, in honour of Prof. P.H.H. Gray, longtime Chairman of the Department of Microbiology, to be awarded annually to the student majoring in Microbiology who has demonstrated academic excellence and the most promise in the graduating year.

HARRISON MEDAL. – A medal and a prize of $100, in honour of Principal F.C. Harrison, first Chairman of the Department of Microbiology, to be awarded annually to the student majoring in Microbiology who has demonstrated academic excellence and the most promise in the second year.

Prizes

CHEMICAL INSTITUTE OF CANADA PRIZE. – A medal and a prize of $25 for the student in the Chemistry option with the highest standing at the end of the Second year.

EMILE A. LODS MEMORIAL PRIZE. – A prize of $100 given in memory of Emile A. Lods, M.S.A., D.Sc., F.A.I.C., and awarded to a student in the Second year of the university program majoring in Agronomy.

LOCHHEAD MEMORIAL PRIZE. – A prize established by an endowment in memory of William Lochhead, B.A., M.Sc., the first Professor of Biology at Macdonald College. It is awarded to a student whose major interest is in entomology and who has emphasized entomological and directly related courses in the undergraduate program. If there is no suitable candidate, the Chairman of the Department of Entomology and Zoology may recommend a graduate student for this prize. The prize, in value equal to the revenue from the endowment, is to be in books, selected by the winner.

CLASS OF 1953 BOOK PRIZE. – Graduates of the class of 1953 (Agriculture and Household Science) have established a fund, the proceeds of which are used to provide a prize in books for the student with the highest standing in all the courses of the Second year curriculum. The prize will be awarded in the B.Sc. (Agr.) program in odd-numbered years; in the B.Sc. (F.Sc.) program in even-numbered years.

CUTLER SHIELD. – The late Professor Garnet H. Cutler, the first lecturer in Cereal Husbandry, Macdonald College, donated a bronze challenge shield which is held for one year by the student majoring in Agronomy with the highest aggregate in the final year.

CANADIAN SOCIETY OF ANIMAL PRODUCTION BOOK PRIZE. – Awarded to a student entering the final year who has achieved academic excellence, in Animal Science, Nutrition or Food Science in the penultimate year.

McGILL UNIVERSITY LIBRARY

RAYMOND L. CONKLIN PRIZE. – A prize in the amount of the yearly interest from an endowment established by Raymond L. Conklin, D.V.M.. To be awarded to a student in the First or Second years who has achieved high academic standing.

THE RICHARD LEVESQUE MEMORIAL PRIZE. – Value $100, to be awarded to a student entering his final undergraduate year of a B.Sc. (Agr.) program. To qualify, students should have high academic standing and preference is given to a student who is active in the campus sports program and participates in student organizations.

MODERN DRAINAGE SYSTEM INC. PRIZE IN AGRICULTURAL ENGINEERING. – A prize of $500 awarded each year to a student who registers in the second last or last year of the Agricultural Engineering Major. In selecting the winning student, consideration will be given to high academic standing, participation in extra-curricular activities, and interest in the agricultural drainage or agricultural machinery industries.

JEFF MILLS MEMORIAL PRIZE: Value $250, awarded to a deserving student entering 2nd or 3rd Year in the Faculty of Agriculture. Jeff Mills was killed tragically at the age of 25. He was an outstanding athlete and student at the Macdonald Campus. He had a multitude of friends who respected his individuality and capability of accomplishment by concentrated effort. The Prize will be given to a student possessing similar characteristics.

LYNDEN LAIRD LYSTER MEMORIAL AWARDS IN PARASITOLOGY. – A Scholarship/Bursary award is available to an undergraduate student for excellence in Parasitology. Apply to the Director of the Institute of Parasitology.

3.2.4 Loans – General Information

A loan is a form of financial aid to supplement a student's resources (where his or her earnings potential justifies the prospect of reasonably early repayment). An academic record of at least a C average (G.P.A. of 2.0) is required as a condition of eligibility. In general, loans are available only to Canadian students or students with landed immigrant status, and as a general rule not to freshmen students.

Students applying for loans from funds available at the university are required first to apply for Government aid through their home province and otherwise demonstrate that they have exhausted all their possible sources of help, e.g. family, etc.

Students who have financial problems and are unable to pay the full amount of fees due at registration and who are not assured of sufficient funds to pay the second instalment due in January should apply for loan assistance before registration, in order to assure themselves of funds to complete the year. In any case loan applications in the Faculty of Agriculture must be made before September 30, to the Registrar's Office. Applications made after this date will not be considered, except in cases of emergency.

The Registrar's Office will supply application forms for loans from Québec or Ontario governments, to students who did not apply directly before registration. Application forms should be completed by the students, with requested documentation attached, and handed back to the Registrar's Office. 'Institution Section' will be completed and sealed by the Registrar's Office and the document mailed directly to the appropriate government office.

LOAN FUND OF THE MACDONALD BRANCH OF THE McGILL GRADUATES' SOCIETY. – Through the generosity of the graduates of Macdonald College, loan funds have been made available for deserving students. Students who have a G.P.A. of at least 2.4 in their previous year's work will be eligible for loans of up to $500 per year.

The Graduates' Society Loan Funds bear interest at the rate of 4½%, and are limited to Canadian citizens. Applications are to be made to the Registrar's Office.

KIWANIS CLUB OF MONTREAL STUDENT LOAN FUND. – An interest-bearing loan fund for students in Agriculture at Macdonald College established to assist worthy students who are in need of financial help to further their education. Open to students contemplating entering the College as well as by students already enrolled. The loans are to be repaid, in whole or by instalments, as soon as the recipient is able to do so. Except in special cases the maximum loan is $500. Application for a Kiwanis Club loan is to be made to the Registrar's Office, Macdonald College.

3.3 DIPLOMA PROGRAM

3.3.1 Scholarships

MACDONALD BRANCH OF THE McGILL GRADUATES SOCIETY SCHOLARSHIPS. – Two scholarships of $500 each available to students admitted to the Faculty of Agriculture in the program leading to a Diploma in Agriculture. Each applicant will be considered on his or her own merits, taking into account all or any of the following: academic achievement, participation in athletics, student affairs activities or community service projects. Applications must be submitted prior to August 1 each year.

3.3.2 Bursaries

QUEBEC LANDSCAPE GARDENERS' AND NURSERYMEN'S ASSOCIATION BURSARY. – A bursary of $200 to be awarded to a student entering the Second Year of the Diploma Program who is interested in pursuing a career in ornamental horticultural work. Applicants must apply in writing to the Director of the Diploma Program before September

1, indicating study and career interests. The bursary will be awarded on academic performance, extra-curricular activities, financial need and interest in a career in Horticulture.

QUEBEC WOMEN'S INSTITUTE BURSARY. – $100 for the student entering the Second year of the Diploma Program, who: (1) is a professional farmer's son (or daughter) from the Province of Québec, (2) has spent at least one season (seed time to harvest) in his or her father's employ on the farm, (3) intends to return to his or her father's farm for at least one year on completion of the course or to manage his or her own farm, (4) and who, if more, than one candidate meets the above three requirements, takes the highest proficiency in agricultural subjects in the First or, if he or she is the only candidate, obtains at least Class II standing in these subjects.

If no student can qualify for the above, this bursary will be made available as an entrance bursary to the First year of the Diploma program.

ELLIN BEIT-SPEYER BURSARY. – Miss Ellin Beit-Speyer, of Springmount Jersey Farm, Massawippi, Que., provides a bursary of $200 to a student in the First or Second year of the Diploma Course.

Participation in Club activities, farm background and need will be considered in making the award. Apply to the Registrar's Office before September 1.

FISHER TRUST FUND and THE COLONIZATION SOCIETIES REGIONAL BURSARIES, described in the section for degree programs, are also applicable to Diploma students.

3.3.3 Medals

MINISTER OF AGRICULTURE OF QUEBEC MEDALS. – The Honourable Minister of Agriculture for the Province of Québec offers annually a gold and a silver medal to the Diploma in Agriculture students ranking first and second respectively in the graduating class.

3.3.4 Prizes

THE RALSTON-PURINA DIPLOMA PROJECT PRIZE. – A prize of $50 is given annually by Ralston-Purina of Canada Limited for the best project submitted by a student registered in the Diploma Project Course.

3.4 GRADUATE SCHOLARSHIPS AND FELLOWSHIPS

Financial assistance is available for graduate students in the form of fellowships, teaching and research assistantships. Application is made to the Fellowships Office of the Faculty of Graduate Studies and Research, McGill University, on forms obtained from that Office. The deadline for Fellowships and Scholarships is February 1.

Graduate students should refer to the McGill Announcement of Postgraduate Fellowships, Bursaries and Prizes, available from the Registrar's Office, McGill University, or from the Registrar, Macdonald College, P.Q. H0A 1C0.

THE WALTER M. STEWART AWARDS IN AGRICULTURE. – Awards totaling $4,000 from a fund established by the late Walter M. Stewart. To be awarded annually to students studying at the postgraduate level at Macdonald Campus. Preference will be given to graduates from Québec Universities. If there are no suitable candidates at the postgraduate level in a particular year the $4,000 will be awarded to undergraduate students in the Faculty of Agriculture who have achieved high academic standing.

DEPARTMENT OF EDUCATION POSTGRADUATE SCHOLARSHIPS. – Scholarships for predoctoral (postgraduate) studies and for work leading to higher degrees in artistic, scientific or technical training are awarded for one year at a time to residents in the Province of Québec. The number of scholarships is determined by a jury. Candidates wishing to take part must obtain the application form from: Direction générale de l'enseignement supérieur, Ministère de l'Education, 1035 rue de la Chevrotière, Québec, P.Q. G1R 5A5.

THE SIR VINCENT MEREDITH FELLOWSHIP IN AGRICULTURAL ECONOMICS. – The Fellowship valued at $2,500 per year is tenable for a two-year period. The fellow must qualify for admission to graduate work in Economics at the Ph.D. level as set out in the Announcement of the Faculty of Graduate Studies and Research of McGill University, and will be required to pursue research or thesis work on an approved subject in the area of Agricultural Economics. Limited teaching or other duties attach to the tenure of this Fellowship. Inquiries and applications should be addressed to the Department of Agricultural Economics, Macdonald College, prior to March 15.

LYNDEN LAIRD LYSTER MEMORIAL AWARD in PARASITOLOGY. – An award of $3,000 to an outstanding post-graduate student in Parasitology. Apply to the Director of the Institute of Parasitology.

OTHER GRADUATE FELLOWSHIPS. – A number of Graduate Fellowships are available to students entering the Faculty of Graduate Studies and Research. Further particulars may be obtained from the Fellowships Office of the Faculty of Graduate Studies and Research, McGill University.

4 ACADEMIC PROGRAMS & CURRICULUM

4.1 PROGRAMS

The programs in the Faculty of Agriculture and the School of Food Science are normally of three years' duration following the completion of a 2 year post-secondary Collegial program (CEGEP) in the Pure and Applied Sciences or the Health Sciences or its equivalent.

PROGRAMS IN AGRICULTURE

Bachelor of Science in Agriculture (B.Sc.(Agr.))

A three-year program from the Diploma of Collegial Studies leading to professional qualification in Agricultural Science or in one of its related specialized branches in the Biological Sciences and Renewable Resources.

Bachelor of Science in Agricultural Engineering (B.Sc.(Agr.Eng.))

A three-year program from the Diploma of Collegial Studies in Pure and Applied Sciences leading to professional qualifications in Agricultural Engineering.

Diploma in Agriculture

A two-year program in practical agriculture designed to prepare students for careers in farming or work closely associated with agriculture at the production level.

Postgraduate Programs in Agricultural Science

These lead to the degrees of Master of Science and Doctor of Philosophy, with study and research in one or more of the departments of the Faculty or the School of Food Science. The program of studies and examinations are controlled by the Faculty of Graduate Studies and Research.

PROGRAMS IN FOOD SCIENCE

Bachelor of Science in Food Science B.Sc.(F.Sc.))

A three-year program from the Diploma of Collegial Studies leading to the professional qualifications necessary for Dietetics and Food Science, as well as the following disciplines in the Food and Consumer Sciences area: Food Chemistry, Nutrition, Food Services Administration; Food Management; Home Economics Education, and Consumer Services.

NOTE 1. Students with a CEGEP diploma in Social Sciences with Chemistry, Pure and Applied or Health Sciences may enter the Home Economics Education Program which qualifies for the B.Ed. degree majoring in Home Economics.

NOTE 2. Students wishing to enter the Food Services Administration program which qualifies them for the B.Com. degree must meet the requirements for entry into the Faculty of Management. Elective courses in Chemistry and Biology are highly recommended.

4.2 GENERAL ENTRANCE REQUIREMENTS

Recognized CEGEP programs for admission are:

Courses	Pure and Applied Sciences (terms)	Health Sciences (terms)
English or French	4	4
Humanities	4	4
Mathematics	4	3
Physics	3	3
Chemistry	2	4
Biology	1	2
Electives	6	4

Canadian students who do not have a CEGEP diploma may be acceptable into a 120 credit (4-year) degree program. Normally these students hold a senior matriculation certificate.

All candidates for admission must furnish medical certificates of physical health on forms supplied by the College.

Applications for admission from Canadian students should be received before July 1st (for September registration) or November 1st (for January registration) of the academic year in which they are to be considered for acceptance and must be accompanied by a non-refundable fee of $15.00 in Canadian funds payable by certified cheque or money order to Macdonald College.

NON-CANADIAN STUDENTS

Foreign Students with higher than average marks are admissible if they have successfully completed 'A' Level examinations in Chemistry, Physics and Mathematics with a grade of "C" or better and five 'O' Level passes including one Biology and one English. Equivalents of the above can also be considered for admission.

Applications for admission from students whose homes are outside Canada must be received before March 1st (for September registration) and August 1st (for January registration) of any year if they are to be considered for acceptance for that academic year and must also be accompanied by the application fee of $15.00. No decision on these applications will be made by the Committee on Admissions before March 1 (August 1st) and the applicant will be notified whether or not his/her application is accepted as soon after that date as possible.

Non-Canadian students must obtain a student visa from a Canadian Embassy or Consulate in their area. They must present to the Embassy or Consulate both their letter confirming acceptance at Macdonald College and proof that they are capable of assuming all financial responsibilities during their stay.

CLASSES OF STUDENTS

Full-Time Students

Full-time students in Satisfactory standing take a minimum of 12 credits per term.

Full-time students in Probationary standing take between 10 and 12 credits per term, and may add to this load a repeated course in which a grade of "D" was originally obtained.

Part-time Students

Part-time students carry fewer than 12 credits per term (fewer than 10 credits per term for students in Probationary standing). New students apply through the Registrar's Office and the applicant must have the qualifications to enter a full-time program. Full-time students who wish to become part-time must consult the Office of the Associate Dean. Certain programs must be completed within a specified number of years; such information is available from the Associate Dean.

Special Students

A special student takes regular credit courses, but is not working towards a degree. To qualify for this status a student must hold an undergraduate degree and have a specific approved plan of study. Applications must be made at the Office of the Associate Dean.

Visiting Students

A visiting student is one who is taking courses at McGill for credit at another university. Applications must be made at the Office of the Associate Dean.

4.3 ACADEMIC STANDING – B.Sc. (Agr.), B.Sc. (Agr. Eng.) and B.Sc. (F.Sc.)

All students are required to give satisfactory evidence of mastery of the material of lecture and laboratory. Examinations are normally held at the end of each course but other methods of evaluation may also be used. The grade assigned for a course represents the standing of the student in all the work of the course.

Examinations and papers may be written in either of the two official languages of Canada.

Upon payment of a fee of $10.00 a student may apply to the office of the Dean of the Faculty to have an examination re-read.

CREDIT SYSTEM

All courses carry a credit value. In general, a three credit course indicates three hours of lectures (which may or may not include laboratory periods, conference, etc.) per week for one term. Courses are graded by letter. Ratings of 4, 3, 2, 1, and 0 are attached to the letter grades of A, B, C, D, and F, respectively. The letter grade F is a failure. The letter grade only appears on the transcript.

The grade points for each course are calculated by multiplying the credit value of the course by the student's earned grade rating. Standing in each term will be determined on the basis of a grade point average (GPA) computed by dividing the sum of the grade points earned for the term by the total course credits attempted.

The cumulative grade point average (CGPA) will be the grade point average calculated using the student's entire record in a degree program. A failed course will continue to be used in the calculation of the CGPA even after the course is repeated and passed, or if a supplemental examination is taken.

ACADEMIC CREDIT TRANSFER

Exemption may be obtained for a course taken and passed at another university, upon approval of the instructor concerned. No grade will be recorded but the credit value established by the Faculty will be granted.

Full time students may, with the written permission of the Dean of the Faculty, register for up to 40% of a full course load in each semester at any university in the province of Québec. These courses, successfully completed according to the standards of the university giving the course, will be recognized for the purpose of the degree. Further details are found in the section entitled "Academic Credit Transfer Agreement" in the *General Announcement.*

GRADUATE COURSES AVAILABLE TO UNDERGRADUATES

Undergraduates wishing to take such courses must have a CGPA of at least 2.5.

STANDING

The program for the degree will normally be completed in 3 academic years or 6 semesters. For the purpose of student classification, the years will be termed U1, U2 and U3.

Year 1, 0-29 completed credits at initial registration

Year 2, at least 30-59 completed credits at registration

Year 3, at least 60 credits at registration

A student's academic standing is based on his CGPA which is calculated on the courses taken while registered as a full-time or part-time undergraduate in a degree program. If the CGPA drops below 2.00, the student is in academic difficulty.

STUDENTS IN ACADEMIC DIFFICULTY

1. When a student's CGPA (or SGPA in the first term of his/her program) drops below 2.00, he/she is advised to withdraw. If he/she chooses to reregister, he/she is on probation until the CGPA is raised to 2.00.

2. A student on probation is advised to register for not more than 12 credits per term. He/she is not permitted to be on probation for more than one term unless he/she obtains a SGPA of 2.50 or higher.
3. A student who does not raise his/her CGPA to 2.00 (or obtain a SGPA of 2.50) while on probation is not permitted to register. He/she is required to withdraw from the degree program for at least one term. If after this, the student wishes to be readmitted he/she must apply in writing to the Committee on Academic Standing.

SUPPLEMENTAL EXAMINATIONS

A student who has failed a course may either reregister for and repeat the course, or he/she may apply to write one supplemental examination and will receive the grade earned. If a student applies to write a supplemental examination and does not write, he/she gets a "J" unless the Registrar has been informed in writing at least one week in advance that he/she does not intend to write. In the case of an elective course, the student may substitute another elective. Supplemental privileges or reregistration are available for students who wish to upgrade a course in which a grade of D has been obtained.

Supplemental examinations may be written at the June supplemental period or at the next regular final examination period, i.e. December for first term courses and April for second term courses. In addition, by arrangement with the instructor, an examination may be made available at the end of a term in which there is no regular end of term examination in that course.

A student may register only twice in any course.

DEGREE REQUIREMENTS

To be eligible for a degree a student must have passed all required courses and also any specified electives recommended by his/her adviser. He/she must have accumulated at least 90 credits (B.Sc.) (Agr.) and B.Sc. (F.Sc.) or 96 credits (B.Sc.)(Agr. Eng.) of which at least 45 credits must be taken at McGill University and have a CGPA of at least 2.00.

LANGUAGE REQUIREMENT FOR PROFESSIONS

Québec law now requires that candidates seeking admission to provincially-recognized professional corporations* must posses a working knowledge of the French language, i.e. be able to communicate verbally and in writing in that language.

To demonstrate this capability, a candidate will normally be required to pass an examination set by the Régie de la langue française, unless he or she can show that three years of instruction in a French post-primary school have been completed. The professional corporation will require this proof of attendance or of succesful completion of the Régie examination.

This examination shall test the candidate's mastery of oral and written comprehension and expression in French. The contents may vary in accordance with the current terminological requirements of the profession or professional group. Examinations will take place four times a year, and they may be attempted an unlimited number of times.

In special cases where the candidate can clearly demonstrate to the Régie by means of an interview that a true mastery of French exists, the examination requirement may be waived.

Information on the testing program of the Régie may be obtained by writing to: Régie de la langue française, 800, Place Victoria, 16ième étage, Montréal, Québec, H4Z 1G8, Telephone 873-6571.

Students who need to acquire a functional level of proficiency in French may register in courses at either the French Language Centre, 3438 McTavish Street, Telephone 392-5727, for courses during the day, or at the Centre for Continuing Education, 772 Sherbrooke Street West, Telephone 392-4901, for courses in the evening.

Students already proficient in French but who wish to keep up practice may register in courses at the Department of French Language and Literature, 3460 McTavish Street, Telephone 392-4577, or at the Centre d'études canadiennes-françaises, 3475 Peel Street.

* McGill degrees and diplomas currently give access to corporations regulating the activities of the following professional groups:

Advocates
Agrologists
Architects
Chartered Accountants
Chartered Administrators
Chemists
Dentists
Dietitians
Engineers
Industrial Administration Accountants
Industrial Relations Counsellors
Licensed General Accountants
Notaries
Nurses
Occupational Therapists
Physicians
Physiotherapists
Psychologists
Social Workers
Speech Therapists & Audiologists
Urbanists
Vocational Guidance Counsellors

ACADEMIC ADVISERS

Before registration, every student entering the Faculty must select a major program of study. He/she must consult with the Academic Adviser of his/her chosen program for the selection and time-tabling of required and elective courses. The Academic

adviser will continue to act as his/her adviser during his/her studies in the Faculty.

4.4 ATTENDANCE AND CONDUCT IN CLASSES

Matters of discipline connected with or arising from the general arrangement for teaching are under the jurisdiction of the Dean of the Faculty or Director of the School concerned.

Students may be admonished by a professor or instructor for dishonest or improper conduct or may be reported to the Dean or Director concerned for disciplinary action.

Punctual attendance at all classes, laboratory periods, tests, etc., is expected of all students. Absences can only be excused on the ground of necessity or illness, of which proof may be required. Special attention is called to the fact that the completion of all laboratory work is obligatory and the opportunity to make up work missed can only be provided in the case of properly excused absences.

The Faculty has the power to refuse examinations to those students who persist in absenting themselves from classes without permission.

Students are requested not to make application for additional leave either before or after holiday periods, as such leaves can only be granted in case of illness or other exceptional circumstances.

4.5 CURRICULA

Curricula for the B.Sc. (Agr.) in Agricultural Sciences

Programs leading to professional qualification in agricultural science with specialization in Agricultural Economics, Animal Science, Plant Science, Soil Science and General Agricultural Science.
Prof. S.P. Touchburn, Coordinator

AGRICULTURAL ECONOMICS MAJOR

The curriculum constitutes a comprehensive and systematic program in the application of economics and management to problem–solving in the agricultural–food system and related resource systems. The complete package would serve to equip the student for decision making both within the firm and in top management, if not on graduation then after a few years experience. Qualified graduates are in demand at all levels within the private business, and public service sectors of the Canadian Economy.
Professor Gordon A. MacEachern, Academic Adviser

Required courses, 41 credits

COURSE NUMBER	SUBJECT	CREDITS
330-211B	Principles of Plant Science	2
334-200A	Principles of Economics I	3
334-201B	Principles of Economics II	3
334-231B	Economics of Agriculture	3
334-430B	Agriculture, Food and Resource Policy	3
334-435A	Agriculture Economic Research Methods and Special Problems	3
334-442B	Economics of Food Systems Development	3
342-250A	Principles of Animal Science	2
360-201A,B	Statistical Methods I	3
372-210A	Principles of Soil Science	3
Two of the following three courses:		
334-230B	Economics of Marketing	3
334-332A	Farm Production Economics	3
334-333B	Resource Economics	
And two of the following three courses:		
334-410A	Land and Resource Appraisal	3
334-440A	Advanced Agriculture and Food Marketing	3
334-450B	Agri-Business Management	–
		40

Elective Courses

To be selected in consultation with Academic Adviser with emphasis on courses in the agricultural sciences. A total of 90 credits necessary to meet the requirements for the degree.

MacDonald Library

ANIMAL SCIENCE MAJOR

The curriculum in Animal Science involves intensive training in both the basic and applied biological sciences as related to domestic animals. Concentration in either Animal Genetics, Nutrition or Physiology is possible within the Animal Science major. Graduates are professionally qualified and generally enter agricultural industries, mainly sales and marketing, government service (Provincial or Federal), extension, teaching or post-graduate studies. Students in the Animal Science major may apply for entrance to the pre-veterinary semester at the Ontario Veterinary College.

Academic Advisers: Prof. S.P. Touchburn (U3), Prof. T.G. Hartsock (U2), Prof. P.A. Martin (U1)

Required courses, 59 credits

**Students with a particular interest in the area of Agronomy may take any 2 of the following courses. (340-331A, 340-332B, 340-333A, 340-439A) in place of 330-211B.*

Elective courses: 34 credits selected in consultation with Academic Adviser.

GENERAL AGRICULTURAL SCIENCES MAJOR

The curriculum is designed to provide a general scientific and applied background for modern agriculture without the requirements of a specialized program and to develop an appreciation of applied agriculture in its on-farm environment. Graduates may be employed in agri-business, agricultural extension and communications, sales and marketing, teaching or farm management.

Prof. B.B. Bible, Academic Adviser

366-490D	Project	3
372-310B	Soil Chemistry and Fertility	3

Free electives: to meet the minimum requirements of 90 credits for the degree.
NOTE: Students taking the Plant Science Major may not take 330-211A – Principles of Plant Science for credit.

SOIL SCIENCE MAJOR

The soil science major provides a program of specialization in soil science combined with application to an area of soils use such as soil fertility and crop growth (soils and crops orientation), or conservation of soil and water (soil conservation orientation). Students planning graduate study and a career in research should choose the soil research orientation.
Prof. A. F. Mackenzie, Academic Adviser

McGILL UNIVERSITY LIBRARY

Required courses, 36 credits

COURSE NUMBER	SUBJECT	CREDITS
330-211B	Principles of Plant Science	2
342-250A	Principles of Animal Science	2
334-231B	Economics of Agriculture	3
360-201A, B	Statistical Methods I	3

372-420A	Soil Survey	3
372-491A	Project I	3
372-493B	Project II	3
372-496D	Seminar	2
		36

GENERAL SOIL SCIENCE ORIENTATION

Primary electives: 39 credits selected from an approved list in consultation with the Academic Adviser. Free electives: to meet the minimum requirement of 90 credits for the degree.

SOILS AND CROPS ORIENTATION

Primary electives: 33 credits selected from an approved list in consultation with the Academic Adviser. Free electives: to meet the minimum requirement of 90 credits for the degree.

SOIL CONSERVATION ORIENTATION

Primary electives: 24 credits selected from an approved list in consultation with the Academic Adviser. Free electives to meet the minimum requirement of 90 credits for the degree.

SOIL RESEARCH ORIENTATION

Primary electives: 21 credits selected from an approved list in consultation with the Academic Adviser. Free electives to meet the minimum requirement of 90 credits for the degree.

Curriculum for the B.Sc. (Agricultural Engineering)

The curriculum integrates the fundamentals common to all branches of engineering with the agricultural and biological sciences. It allows students to proceed from an understanding of why and how certain conditions affect plants and animals to the design of systems that enhance the condition of the environment and improve food handling and processing methods. Graduates have the academic qualifications for registration as professional engineers in any province in Canada.

Prof. R. S. Broughton and R. Kok, Academic Advisers

Required courses, 61 to 65 credits

COURSE NUMBER	SUBJECT	CREDITS
336-210A	Mechanics I	4
336-211B	Mechanics II	4
336-212A	Graphics	3
336-216B	Materials Science	3
336-312A	Circuit Analysis	3
336-341B	Strength of Materials	4
336-490D	Project	3
372-210A	Principles of Soil Science	3
360-202A	Calculus	3
360-207A	Linear Algebra and Vector Analysis	4
360-205B	Differential Equations	3
360-201A, B	Statistical Methods I	3
360-203A	Digital Computing I	3

305-240A	Thermodynamics	3
305-346A	Heat Transfer	3
	or	
302-311A	Heat Transfer	4
303-321A	Fluid Mechanics	3
	or	
305-330A	Fluid Mechanics	4
	or	
336-305B	Fluid Mechanics	4
336-418B	Soil Mechanics and Foundations	3
	An Animal Science Course	2 or 3
	An Agronomy or Horticulture Course	2 or 3
	An Economics Course	3
		61-65

Electives selected in consulation with Academic Adviser.

A. Advanced Agricultural Engineering – 20 or more credits from:

COURSE NUMBER	SUBJECT	CREDITS
336-214L	Surveying	2
336-215B	Principles of Hydrology	3
336-314A	Agricultural Structures	3
336-315B	Machine Design	4
336-320A	Systems for Processing Food Products	3
336-321B	Unit Operations in Food Processing	3
336-322B	Food Production and Processing Waste Management	3
336-323A	Physical Properties of Biological Materials	3
336-324B	Industrial Processes in the Food Industry	3
336-411B	Off-Road Power Machinery	3
336-412A	Agricultural Machinery	3
336-413B	Materials Handling Systems	3
336-416B	Engineering for Land Development	3
336-419B	Structural Design	3

In special cases graduate level courses may be taken.

B. Other courses from Faculties of Agriculture or Engineering to round out the student's program and meet the requirement of a minimum of 96 credits for the degree.

Curricula for the B.Sc. (Agr.) Degree in Biological Sciences

This area of specialization covers many aspects of biology and gives first, a training in fundamentals of science and second, an opportunity to develop specialization. All students are required to take certain 'core' courses followed by required and elective courses related to the chosen specialty to meet a credit total of 90. The aim of the program is to develop expertise in applications of biology based on fundamental aspects.
Professor D. W. Woodland, Coordinator

Core Courses Required for all major areas of spcialization. (22 credits)

COURSE NUMBER	SUBJECT	CREDITS
332-211A	Biochemistry I	2
332-212A	Biochemistry laboratory	2
344-200A	Biology of Organisms I	3
344-201B	Biology of Organisms II	3
344-202B	Cellular Biology	3
344-205B	Principles of Ecology	3
356-201A	Introduction to Genetics	3
360-201A, B	Statistical Methods I	3
	Total	22

McGILL UNIVERSITY LIBRARY

BOTANICAL SCIENCES MAJOR

Botanical Sciences offers foundation courses for those who like to work with green plants or fungi. This is the option for anyone planning a career in some aspect of Botany, Mycology or Plant Pathology.
Prof. R. H. Estey, Academic Adviser

Required courses, 37 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core Courses	22
346-252B	Plant Anatomy and Histology	2
346-356A	Systematic Botany	4
346-353A	Plant Physiology	4
366-490D	Project	3
366-496D	Seminar	2
		37

Elective courses: At least 24 credits selected from the following list in consultation with the Academic Adviser.

COURSE NUMBER	SUBJECT	CREDITS
344-306B	Biological Instrumentation	3
346-251A	Plant Histological and Cytological Methods	3
346-355A, B	Special Topic in Botanical Sciences	2
346-451A	Plant Ecology	3
346-454B	Plant Morphology	3
356-202B	Advanced Genetics	3
362-230B	The Microbial World	3
362-331B	Microbial Ecology	3
366-301B	Introductory Mycology	3
366-355A, B	Special Topic in Plant Pathology	2
366-402A	General Plant Pathology	3
366-403B	Diseases of Field and Forest Crops	3
366-404B	Diseases of Horticultural Crops	3
366-405A	Intermediate Mycology	3

Free electives: to meet the minimum requirements of 90 credits for the degree.

ENVIRONMENTAL BIOLOGY MAJOR

This program aims at training scientists with basic knowledge in Biology and strong emphasis in Ecology. As ecologists they will be best equipped to investigate the scientific aspects of the relationships between organisms and their environment and they will be less oriented towards the political and sociological components of the ecosystem.
Prof. R. K. Stewart, Academic Adviser

BIOLOGICAL ORIENTATION

Required courses, 30 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core courses	22
344-495D	Seminar	2
360-203A	Digital Computing I	3
	Project (in an appropriate department)	3
		30

Elective courses: A minimum of 30 credits selected from the following list in consultation with the Academic Adviser.

COURSE NUMBER	SUBJECT	CREDITS
336-215B	Principles of Hydrology	3
338-201A	Introductory Meteorology	3
346-356A	Systematic Botany	4

346-451A	Plant Ecology	3
349-307A	Natural History of the Vertebrates	3
349-311B	Ethology	3
349-312A	Principles of Systematic Zoology I	3
349-315A	Biology of Inland Waters I	3
349-316B	Biology of Inland Waters II	3
349-418A	Terrestrial Animal Ecology I	3
349-419B	Terrestrial Animal Ecology II	3
350-444B	Soil Fauna Ecology	3
360-206A	Mathematical Methods in Ecology	3
360-610A	Statistics Methods II	3
362-230B	The Microbial World	3
372-210A	Principles of Soil Science	3
375-401A	Fisheries and Wildlife Management	4
375-410B	Wildlife Ecology	3
	An appropriate Physiology Course	

Free electives: To meet the minimum requirements of 90 credits for the degree.
Prof. R. H. Douglas, Academic Adviser

PHYSICAL ORIENTATION

Required courses, 45 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core Courses	22
332-339A	Introductory Physical Chemistry	3
338-201A	Introductory Meteorology	3
338-301B	Biothermodynamics	3
344-495D	Environmental Biology Seminar	2
360-202A	Calculus	3
360-203A	Digital Computing I	3
372-210A	Principles of Soil Science	3
	Project (in an appropriate Department)	3
		45

Elective courses: A minimum of 24 credits from the following list in consultation with the Academic Adviser.

COURSE NUMBER	SUBJECT	CREDITS
332-222B	Introductory Analytical Chemistry	3
336-215B	Principles of Hydrology	3
338-303A	Principles of Atomic and Nuclear Physics	3
338-304B	Physical Basis of Climate	3
338-308B	Biometeorology	3
338-404B	Radiation Biophysics	3
346-451A	Plant Ecology	3
360-205B	Differential Equations	3
360-206A	Mathematical Methods in Ecology	3
360-207A	Linear Algebra and Vector Analysis	4
360-610A	Statistics Methods II	3
362-230B	The Microbial World	3
372-330B	Physical Properties of Soils	3
375-410B	Wildlife Ecology	3
	An instrumentation course	
	An appropriate physiology course	

Free electives: To meet the minimum requirements of 90 credits for the degree.

MICROBIOLOGY MAJOR

Students receive training in fundamental principles and applied aspects of Microbiology. Successful graduates are competent to work in government and industrial research laboratories and in the pharmaceutical, fermentation and food industries.
Prof. R. A. MacLeod, Academic Adviser

Required courses, 46 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core Courses	22
344-306B	Biological Instrumentation	3
348-330A	Technical and Research Writing	3
362-200A	Laboratory Methods in Microbiology	3
362-230B	The Microbial World	3
362-337D	Frontiers in Microbiology	1
362-338A	Molecular Biology of Microorganisms	3
362-492D	Project	5
362-495D	Seminar	3
		46

Elective courses: A minimum of 24 credits selected from the following list in consultation with the Academic Adviser.

332-222B	Introductory Analytical Chemistry	3
332-230A*	Organic Chemistry I	3
332-324A	Quantitative Inorganic Analysis	3
338-301B	Biothermodynamics	3
360-202A	Calculus	3
362-331B	Microbial Ecology	3
362-341B	Mechanisms of Pathogenicity	3
362-438A	Immunology	3
362-442A	Food Microbiology and Sanitation	3
366-301B	Introductory Mycology	3
366-406A	Virology	3

Free electives: To meet the minimum requirements of 90 crecits for the degree.
**Replace by another elective if already taken at CEGEP.*

ZOOLOGICAL SCIENCES MAJOR

This program is a three-pronged one. By careful course selection the candidate may emphasize general zoology, entomology or soil and fresh water zoology. Students are given a basic background to proceed into various areas of zoological research and into professional work in entomology and applied zoology. Those who plan careers in animal taxonomy, zoological field work pest control, etc., are especially advised to consider this area of specialization.

Prof. S. B. Hill, Academic Adviser

Required courses, 31 to 33 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core Courses	22
349-206B	Histological Techniques in Zoology	3
or		
344-306B	Biological Instrumentation	
349-490D	Zoology or Entomology Project	3 or 5
or		
349-491D		
349-496D	Seminar and Literature Review	3
	Total	31-33

Elective courses: A minimum of 39 credits selected in consultation with the Academic Adviser. Check the Announcement for years in which alternating courses are offered.
21 to 27 credits from the following courses in Entomology and Zoology

COURSE NUMBER	SUBJECT	CREDITS
349-307A	Natural History of the Vertebrates	3
349-308A	Comparative Morphology of the Vertebrates	3
349-311B	Ethology	3
349-312A	Principles of Systematic Zoology I	3
349-313B	Principles of Systematic Zoology II	3
349-315A	Biology of Inland Waters I	3

349-316B	Biology of Inland Waters II	3
349-418A	Terrestrial Animal Ecology I	3
349-419B	Terrestrial Animal Ecology II	3
349-422A	Parasitology I	3
349-423B	Parasitology II	3
350-330A	General Entomology	3
350-331A	Insect Morphology I	3
350-332B	Insect Morphology II	3
350-350B	Insect Development and Physiology	3
350-440B	Systematic Entomology	3
350-442A	Arachnida and Other Terrestrial Arthropods	3
350-444B	Soil Fauna Ecology	3
350-446B	Apiculture	3
350-452A	Economic Entomology I	3
350-453B	Economic Entomology II	3
350-454A	Pest Insects	3

In addition:
3 to 12 credits from: Animal Science, Nutrition & Dietetics, Genetics
3 to 12 credits from: Agriculture, Agronomy, Botany, Horticulture, Microbiology, Plant Pathology
3 to 9 credits from: Renewable Resources Development, Soil Science, Woodland Resources
3 to 9 credits from: Chemistry, Mathematics, Physics
Free electives: To meet the minimum requirements of 90 credits for the degree.

Curricula for the B.Sc. (Agr.) Degree in Renewable Resources Development

Students registered in any of the 6 Majors of this Group can expect to gain a comprehensive overview of renewable resources, the socio-economic implications of development and planning as well as a thorough knowledge of the basic science disciplines involved.

Professor A. R. C. Jones, Coordinator

Core of required courses for all major areas of specialization – 26-28 credits.

COURSE NUMBER	SUBJECT	CREDITS
334-200A	Principles of Economics I	3
334-333B	Resource Economics	3
344-205B	Principles of Ecology	3
352-300A	Communications – Extension Methods	3
360-201A, B	Statistical Methods I	3
370-230A	Introductory Sociology	3
375-300B	Renewable Resources	3
375-491D	Seminar	2
375-496D	Project I (or a project in an approved Dept. or Division)	
or		
375-497D	Project II	3-5
		26-28

AGRICULTURAL LAND PLANNING AND DEVELOPMENT MAJOR

This major prepares the student to carry out development and experiment with solutions of integrated resource management in terms of optimal land use under any given set of economic, social and ecological conditions.

In consultation with the academic adviser the student selects a program that includes the following required and elective courses.

Prof. J. F. G. Millette, Academic Adviser

Required courses, 46-48 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core	26-28
336-215B	Principles of Hydrology	3
338-201A	Introductory Meteorology	3
372-210A	Principles of Soil Science	3

372-250A	Geology and Geomorphology	3
372-321A	Principles of Soil Rating	3
372-325B	Principles of Land Planning	2
372-420A	Soil Survey	3
		46-48

Elective courses

Primary electives: a minimum of 14 credits selected from the following list in consultation with the Academic Adviser.

COURSE NUMBER	SUBJECT	CREDITS
334-410A	Land and Resource Appraisal	3
336-214L	Surveying	2
336-416B	Engineering for Land Development	3
336-418B	Soil Mechanics and Foundations	3
358-332D	Landscape Architecture	3
370-341A	The Urban Community	3
370-360B	Rural Sociology	3
372-330B	Physical Properties of Soils	3
374-200B	Forest Resources	3
375-448A	Topics in Landscape I	2
375-449B	Topics in Landscape II	2

Free electives may be selected from all courses offered on the Macdonald College Campus or on the Montreal Campus of McGill University in consultation with the Academic Adviser to meet the minimum requirement of 90 credits.

COMMUNITY RESOURCE DEVELOPMENT MAJOR

An interdisciplinary study of the development, use and management of natural and community resources for human needs. Integration of the physical, social, economic and institutional approaches to the development of an area's resources. Emphasis on public policy considerations affecting resource use and the attempts by citizens and government agencies to increase the economic opportunity and quality of life of communities and their surrounding regions.

Prof. M. Chevrier, Academic Adviser

Required Courses: 32-34 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core courses (less 372-230B)	26-28
336-215B	Principles of Hydrology	3
372-210A	Principles of Soil Science	3
		32-34

Primary Electives: a minimum of 24 credits from the following courses to constitute a primary area of specialization, to be chosen by the student with the approval of the Academic Adviser.

COURSE NUMBER	SUBJECT	CREDITS
330-211B	Principles of Plant Science	2
334-231B	Economics of Agriculture	3
334-430B	Agriculture, Food and Resource Policy	3
342-250A	Principles of Animal Science	2
360-203A	Digital Computing I	3
352-301B	Community Development	3
370-360B	Rural Sociology	3
372-321A	Principles of Soil Rating	3
374-200B	Forest Resources	3
375-333A	Physical and Biological Aspects of Pollution I	3
375-334B	Physical and Biological Aspects of Pollution II	3
375-411B	Recreation Resources Management	3
330-410B	Comparative Agriculture	3
330-310B	Food for Man-Agriculture and Society	3

354-303A	Agriculture et Ressources Renouvelables dans les Pays Francophones	3
375-200B	Conservation	3

Free Electives: to meet the minimum of 90 credits for the degree

---

ENVIRONMENTAL CONSERVATION MAJOR

This major is designed to give the student a general background in the areas of renewable natural resources -air, water, land, forests and wildlife. Not only the physical, but also the social and political ramifications of resource development are examined Courses equip the student with the information and skills to qualify him to make informed choices and to function in a variety of resource development and management positions.
Academic Adviser

Required Courses, 35-37 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core Courses	26-28
336-215B	Principles of Hydrology	3
338-201A	Introductory Meteorology	3
372-210A	Principles of Soil Science	3

Primary Electives: a minimum of 24 credits selected from the following list.

COURSE NUMBER	SUBJECT	CREDITS
330-211B	Principles of Plant Science	2
338-308B	Biometeorology	3
346-451B	Plant Ecology	3
349-315A	Biology of Inland Waters I	3
349-316B	Biology of Inland Waters II	3
356-203A	Heredity, Evolution, and Society	3
362-230B	The Microbial World	3
362-331B	Microbial Ecology	3
372-321A	Principles of Soil Rating	3
372-325B	Principles of Land Planning	2
372-420A	Soil Survey	3
374-200B	Forest Resources	3
375-200B	Conservation	3
375-333A	Physical and Biological Aspects of Pollution I	3
375-334B	Physical and Biological Aspects of Pollution II	3
375-401A	Fisheries and Wildlife Management	4
375-414A	Policy and Politics of Renewable Resources Development	3
375-437B	Assessing Environmental Impact	2
375-448A	Topics in Landscape I	2
375-449B	Topics in Landscape II	2

Free electives: to meet the minimum of 90 credits for the degree.

LANDSCAPE MAJOR

This major draws together a body of knowledge from the biological sciences and the human, social and behavioural fields. Skills and resources are related through the design process. Research, analysis of information, synthesis and concept development form a part of this process. Through a knowledge of the natural sciences, the student will examine and plan projects in a variety of urban and regional landscapes. This program is of interest to students planning to continue with studies leading to professional careers in Landscape Architecture and the related fields.
Prof. D. W. Graham, Academic Adviser

Required courses, 39-41 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core courses	26-28
336-215B	Principles of Hydrology	3
372-210A	Principles of Soil Science	3

MACDONALD UNIVERSITY LIBRARY

375-448A	Topics in Landscape I	2
375-449B	Topics in Landscape II	2
358-332A	Landscape Architecture	3
	Total	39-41

Primary Electives: A minimum of 30 credits from the following list.

COURSE NUMBER	SUBJECT	CREDITS
*301-001A	History of Architectural Theory I (Montreal Campus)	3
*301-102B	History of Architectural Theory II (Montreal Campus)	3
*301-012A	Freehand Drawing I (Montreal Campus)	1
*301-013B	Freehand Drawing II (Montreal Campus)	1
*301-214A	Freehand Drawing III (Montreal Campus)	1
*301-230B	Landscape (Montreal Campus)	2
*301-235A	Site Usage (Montreal Campus)	2
*301-431B	Civic Design (Montreal Campus)	2
334-410A	Land and Resource Appraisal	3
336-210A	Mechanics I	4
336-212A	Graphics	3
336-214L	Surveying	2
336-416B	Engineering for Land Development	3
346-451A	Plant Ecology	3
370-341A	The Urban Community	3
370-360B	Rural Sociology	3
372-321A	Principles of Soil Rating	3
372-325B	Principles of Land Planning	2
372-420A	Soil Survey	3
374-200B	Forest Resources	3
375-411B	Recreation Resource Management	3

* Approval of instructor required.

Free electives may be selected from all courses offered on the Macdonald Cdlege Campus or on the Montreal Campus of McGill University in consultation with the Academic Adviser to meet the minimum requirement of 90 credits.

RESOURCE ECONOMICS AND MANAGEMENT MAJOR

Students in this Major will concentrate on the interaction of social and economic systems and their impact on the human environment through the emphasis on economics and management courses.
Academic Adviser

Required courses, 26-28 credits

Primary electives: at least 30 credits from the following courses constitute a primary area of specializatiion These are chosen by the student and approved by the academic adviser. Introductory courses in economics and management must be elected early in the course sequences to meet prerequisite requirements to other courses.

COURSE NUMBER	SUBJECT	CREDITS
*154-250D	Intro. Economic Theory	6
*154-302D	Money and Banking	6
*154-425D	Economics of Ecology	6
*154-317D	Economic Statistics	6
*280-221A	Behavioural Science	3
*280-222B	Behavioural Science	3
*280-330D	Elements of Marketing	6
*280-410D	Commercial Law	6
*280-300D	Management Accounting	6
*160-211D	Comparative Government	6
334-231B	Economics of Agriculture	3
360-203A	Digital Computing I	3
360-202A	Calculus	3

Secondary electives: at least 18 credits of related courses from any area of specialization that can be related to renewable resources development, including the area of primary interest.
Free electives: to meet the minimum requirements of 90 credits for the degree.
**Offered on the McGill campus.*

WILDLIFE RESOURCES MAJOR

This Major concentrates on the biological resources emphasizing the co-development of competence in wildlife ecology and other complementary disciplines. It leads to work in resource planning, wildlife socio-economics, wildlife administration, wildlife management and wildlife resource evaluation.
Prof. R. Titman, Academic Adviser

Required courses, 47-50 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core courses:	26-28
346-356A	Systematic Botany	4

356-203A	Heredity, Evolution and Society	3
374-200B	Forest Resources	3
374-330A	Private Forestry	3
374-440B	Silviculture	3
375-200B	Conservation	3
375-411B	Recreation Resource Management	3
375-420A	Topics in Ornithology	3
375-437B	Assessing Environmental Impact	2

Secondary electives: a minimum of 18 credits in related courses selected in consultation with Academic Adviser.
Free electives: to meet the minimum requirement of 90 credits for the degree.

Curricula for the B.Sc. (F.Sc.) Degree in Food and Consumer Sciences

This area of specialization offers the student a number of related Majors in the field of Food and Consumer Sciences. Depending on the Major completed, the student is a) prepared to serve the community in all types of consumer information services, b) has the necessary background to become a Home Economics Specialist Teacher, c) can enter the professions of dietetics, food technology, or food administration, d) can proceed to a career in research and development, or e) do graduate work in the different scientific fields.

Prof. E.S. Idziak, Coordinator

Core courses: Required by all students taking the non-professional Majors within the Food and Consumer Sciences area of specialization – 14–16 credits.

COURSE NUMBER	SUBJECT	CREDITS
332-211A	Biochemistry I	2
332-212A	Biochemistry Laboratory	2
360-201A,B	Statistical Methods I	3
362-230B	The Microbial World	3
377-490D	Food and Consumer Sciences Project I	3
or		
377-491D	Food and Consumer Sciences Project II	5
		13–15

Students entering without any organic chemistry must take Organic Chemistry I (332-230A) in their first term.

CONSUMER SERVICES MAJOR

This Major is directed to subject matter dealing with areas of consumer interests and problems. By a judicious selection of electives, students may concentrate on nutrition, economics, communications arts, etc., as related to consumer education. Graduates find careers in Consumer Information Services, Marketing Research and the Communication Media.

Prof. C.L. Henneberry, Academic Adviser

Required courses, 37–39 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core courses: (page xx)	13–15
334-200A	Principles of Economics I	3
334-201B	Principles of Economics II	3
344-202B	Cellular Biology	3
376-214A	Food Fundamentals I	3
376-217B	Food Fundamentals II	3
381-330A	Consumer Education I	3
381-331B	Consumer Education II	3
386-232A	Textiles – Natural and Man-made Fibres	3
		37–39

Elective courses: To meet the minimum requirements of 90 credits for the degree. Chosen in consultation with the Academic Adviser.

NUTRITION MAJOR

The graduate from a nutrition Major has a narrow but challenging and unlimited future. Normally the graduate will continue on to further studies preparing for careers in research or as specialist in nutrition for government agencies, particularly those agencies concerned with the maintenance of the good health of our society.

Prof. H.J. Hueckel, Academic Adviser

Required courses, 53–55 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core courses: (page xx)	13–15
332-222B	Introductory Analytical Chemistry	3
332-324A	Quantitative Inorganic Analysis	3
332-451A	Food Analysis I	3

332-234B	Biochemistry II	3
342-323A	Mammalian Physiology	4
342-330A	Fundamentals of Nutrition	3
342-331B	Fundamentals of Human Nutrition	3
344-200A	Biology of Organisms I	3
344-202B	Cellular Biology	3
376-214A	Food Fundamentals I	3
382-207B	Normal Human Nutrition	3
382-436A	Applied Human Nutrition	2
382-443A	Diet Therapy	4
		53–55

Elective courses: To meet the minimum requirements of 90 credits for the degree, chosen in consultation with the Academic Adviser.

FOOD CHEMISTRY MAJOR

This selection of courses is intended for those who look to careers as food or foodstuffs chemists in industry or the public services. The selection is also appropriate for those who may wish to proceed to graduate work in food science, biochemistry, nutritional sciences, or clinical chemistry.
Prof. B.E. Baker, Academic Adviser

Required courses, 55 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core courses: (Page xx)	15
332-231B	Organic Chemistry II	3
332-222B	Introductory Analytical Chemistry	3

377-495D	Food and Consumer Sciences Seminar I	1
		55

Elective courses: To meet the minimum requirement of 90 credits for the degree. Chosen in consultation with the Academic Adviser.

FOOD ADMINISTRATION MAJOR

A wide choice of management careers exists in the Food Industry. Graduates may choose from opportunities in food service areas of public restaurants, cafeterias, catering services, in-plant feeding, the armed services, institutional operations, as well as in the related fields of sales and advertising.
Prof. D.A. Raymond, Academic Adviser

Required courses, 51–53 credits.

COURSE NUMBER	SUBJECT	CREDITS
	Core Courses (page xx)	13–15
334-200A	Principles of Economics I	3
334-201B	Principles of Economics II	3
344-202B	Cellular Biology	3

376-214A	Food Fundamentals I	3
376-217B	Food Fundamentals II	3
380-242A	Management theories and practices	3
380-343B	Accounting and Cost Control	3
380-345D	Food Service Production Management	4
380-446A	Personnel Management	4
382-212B	Basic Nutrition	3
384-422A	Instructional Communications	3
		51–53

Elective courses to meet the requirement of 90 credits for the degree. Chosen in consultation with the Academic Adviser. Note: For continuing students only. For new students see the curriculum for the B.Com. degree majoring in food services administration (page xx).

Majors leading to membership in professional associations

DIETETICS MAJOR

Requirements for admission to the Corporation of Dietitians of Québec and the Canadian Dietetic Association include a Bachelor's degree with credits in specified courses, plus supervised clinical experience in areas of nutrition, administration and community nutrition. Graduates are qualified for position in health service institutions and may elect to specialize in one area of dietetic practice after graduation.
Professors H.L. Maconochie, Academic Adviser

Program for students registered in U-1 1975-76

Required courses, 81–83 credits

COURSE NUMBER	SUBJECT	CREDITS

382-441A	Diet Therapy I	3
382-442B	Diet Therapy II	3
384-320B	Instructional Communications	3
		81–83

Electives: to make up 90 credits required for the degree.

Program for students registered in U-1 1976-77 and subsequent years

The curriculum extends over seven semesters (terms) with general and professional courses (stages of professional formation) in each year. There are four levels of these courses, Levels I and II extend the winter term from

May to early June. Level IV (seventh term) consists of 16 weeks of supervised clinical experience, following completion of the baccalaureate program. Each stage of professional formation serves as a prerequisite for the following one. They are listed in sequence according to the number and letter. The student must successfully complete each level before proceeding to the next.

Required courses, 97 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core courses (Page xx)	13
332-234B	Biochemistry II	3
342-323A	Mammalian Physiology	4
342-330A	Fundamentals of Nutrition	3
342-331B	Fundamentals of Human Nutrition	3
342-424B	Metabolic Endocrinology & Gastro-Intestinal Physiology	3
344-202B	Cellular Biology	3
376-214A	Food Fundamentals I	3
376-217B	Food Fundamentals II	3

382-410D	Stage of Professional Formation Level IV	15
382-436A	Applied Human Nutrition	2
382-443A	Diet Therapy	4
384-422A	Instructional Communications	3
		97

Electives: to make up 106 credits required for the degree, Psychology and Sociology are recommended.

FOOD SCIENCE MAJOR

The course selection reflects the requirements for membership in the professional association of Food Technologists. Graduates find employment in the areas responsible for product quality control, food processing management, industrial research and development, or they may continue to do graduate studies in the applied sciences.
Prof. H.J.T. Beveridge, Academic Adviser

Required courses: 64–66 credits

COURSE NUMBER	SUBJECT	CREDITS
	Core courses: (page xx)	13–15
332-222B	Introductory Analytical Chemistry	3
332-234B	Biochemistry II	3

376-341B	Chemistry of Food Products II	3
377-497D	Food and Consumer Sciences Seminar	3
		64–66

Elective courses: To meet the minimum requirement of 90 credits for the degree. Chosen in consultation with Academic Adviser.

Curriculum for the B.Ed. Degree Majoring in Home Economics

This program leads to a B.Ed. degree majoring in home economics. The student registers for two years in the School of Food Science (Macdonald Campus) followed by one year in the Faculty of Education (Montreal Campus). Graduates also receive a Teaching Permit for secondary schools in Québec which is replaced by a Teaching Certificate after two years of successful teaching. This program also prepares the student for extension communications positions in home economics.
Mrs. E. Murphy, Academic Adviser

Required courses, 42 credits

COURSE NUMBER	SUBJECT	CREDITS
370-341A	The Urban Community	3
376-214A	Food Fundamentals I	3
376-217B	Food Fundamentals II	3
378-332A	Family Studies Development	3
378-331B	Family Management	3
381-330A	Consumer Education I	3
381-331B	Consumer Education II	3

386-232A	Textiles – Natural and Man-made Fibres	3
*426-298A	Applied Design	3
*436-375A/B	Approaches to Teaching Housing and Design	3
		42

*(Presented by Faculty of Education on Macdonald campus)

Elective courses: To meet the minimum requirements of 60 credits. Chosen in consultation with Academic Adviser. A further 30 credits will be taken in the Faculty of Education for completion of the degree.

Major leading to a B.Com. Degree in Food Services Administration

Careers in hotel, motel, and tourist management and in the management of restaurants, cafeterias, food service category and related areas are open to graduates of this major.
Prof. D.A. Raymond, Academic Adviser

Required courses at Macdonald College – 31 credits

COURSE NUMBER	SUBJECT	CREDITS
362-442A	Food Microbiology and Sanitation	3
376-214A	Food Fundamentals I	3
376-217B	Food Fundamentals II	3
377-490D	Food and Consumer Sciences Project I	3
380-242A	Management theories and practices	3
380-345D	Food Service Production Management	4
382-212B	Basic Nutrition	3

PLUS THREE ELECTIVES: Selected from the following

334-230B	Economics of Marketing	3
368-301A	Psychology	3
370-342B	Social Processes and Social Institutions	3
370-350A	Research Methods for Social Surveys	3
375-411B	Recreation Resource Management	3
376-413B	Product Development	3
380-446A	Personnel Management	4
384-422A	Instructional Communications	3

4.6 ASSOCIATED COLLEGES

By special agreement, the Nova Scotia Agricultural College, Truro, N.S., has arranged to provide their students with a program of study permitting transfer to the upper years in Agriculture or Food Science at Macdonald College. Students who have completed such a program of study with satisfactory standing in courses equivalent to those of the B.Sc. (Agr.), the B.Sc. (Agr.Eng.) and the B.Sc. (F.Sc.) curricula will be admitted to the appropriate years of the program, provided that their overall averages, and their grades in individual courses are considered satisfactory by the Committee on Admissions.

4.7 REQUIREMENTS FOR GRADUATION

The minimum requirements for graduation are a C.G.P.A. of 2.00 with the minimum credit requirements for the major. Students majoring in Agricultural Engineering are also required to have at least 650 hours experience in some phase of agricultural engineering work approved by the Agricultural Engineering Department. No summer work or practical experience requirements need be met in the case of students registered in other majors.

5 DESCRIPTION OF COURSES

5.1 AGRICULTURE

330-211B PRINCIPLES OF PLANT SCIENCE. (2 Credits; 3 lectures). Plants as the basic food resource for man. The relation between plants and different segments of the ecosystem with respect to ability to manage the system.
Professors Taper and Steppler

330-310B FOOD FOR MAN-AGRICULTURE AND SOCIETY. (3 Credits; 2 lectures and one 2-hr. conference). This course will develop understanding and awareness of agriculture's role in society. The nature of agriculture, the impact of changes in agricultural technology on society and on environment, use of natural resources by agriculture, and present and future role of agriculture in developed and less developed countries will be examined.
Professor Steppler

330-310A Same as above. Given on the Montreal Campus.

330-410B COMPARATIVE AGRICULTURE. (3 Credits; 2 lectures and 1 conference). A study of international agriculture; physical, biological and social resource bases for agriculture in developing countries; land tenure and marketing; technology transfer and aid programs; sugar, cassava and animal production systems; rural development programs.
Professors Donefer, Steppler, van Lierop and Warkentin

330-495D SEMINAR AND ASSIGNMENT. (2 Credits; 1 lecture). Preparation, presentation and discussion of reports upon approved agricultural subjects chosen in consultation with staff members of the departments concerned.
Professor Bible

5.2 CHEMISTRY

332-110A INORGANIC CHEMISTRY. (3 Credits; 3 lectures). The course will be comprised of discussions and problems in writing and balancing equations, chemical equilibrium and mass action, stoichiometry, colligative properties and solution laws.
Professor G.O. Henneberry

332-211A BIOCHEMISTRY I. (2 Credits; 3 lectures, Prerequisite: 332-230A). Chemistry of carbohydrates, lipids, proteins and nucleic acids; enzymes coenzymes and enzyme kinetics; introduction to intermediary metabolism.
Professor Hueckel

332-212A BIOCHEMISTRY LABORATORY. (2 Credits; 1 lecture, 1 lab. Corerequisite: 332-211A or equivalent). The laboratory use of ionic strength and pH; the chemical properties of carbohydrates, lipids, proteins and enzymes; the instruction of laboratory techniques such as titration, chromatography, the use of the analytical balance and the pH meter.
Professor Hueckel

332-222B INTRODUCTORY ANALYTICAL CHEMISTRY. (3 Credits; 2 lectures and 1 lab.). An introduction to practical qualitative and quantitative Chemistry. The lecture material will cover hydrolysis reactions; sampling and sample preparation; the theory of acidimetry; methods of group separation.
Professor G.O. Henneberry

332-230A ORGANIC CHEMISTRY I. (3 Credits; 3 lectures and 1 lab.). Fundamental concepts of organic chemistry; structure, nomenclature and properties of typical aliphatic and aromatic compounds, lipids, carbohydrates and proteins. Laboratory work includes exercises on recrystallization, distillation, extraction, chromatography and some simple organic preparations.
Professor Baker

332-231B ORGANIC CHEMISTRY II. (3 Credits; 2 lectures and 1 lab.; Prerequisite: 332-230A). Introduction to organic synthesis and reactions of functional groups of aliphatic, aromatic and hetercyclic compounds. Basic concepts of Sn1 and Sn2 displacement reactions, resonance, geometrical and optical isomerism, free radicals and polarimetry. Laboratory work inoludes the preparation, purification and studies on the properties of several organic compounds.
Professor Baker

332-234B BIOCHEMISTRY II. (3 Credits; 3 lectures and 1 lab.; Prerequisite: 332-232A). Regulation of anabolism and catabolism in man and domestic animals; the action of hormones; alimentary digestion and absorption; urinary and fecal excretion.
Professor Hueckel

332-324A QUANTITATIVE INORGANIC ANALYSIS. (3 Credits; 1lectures and 1 lab.; Prerequisite: 332-222B). A development of the quantitative methods introduced in Chemistry 332-222B. The course will consist of discussions and practical work in redoximetry; ion exchange resins; potentiometric analysis; colorimetry and some of the theory of I.R. and N.M.R. analyses.
Professor G.O. Henneberry

332-333A CHEMICAL SYNTHESES AND LAB. TECHNIQUES. (3 Credits; 2 lectures and 1 lab.; Prerequisite: 332-231B). Principles of organic synthesis. Stress will be laid on laboratory procedures and methodology.
Professor B.E. Baker

332-339A INTRODUCTORY PHYSICAL CHEMISTRY. (3 Credits; 3 lectures and 1 lab.). Introduction to kinetic theory, thermodynamics, properties of liquids and solids; chemical equilibrium and the law of mass action, phase rule, properties of solutions, surface and colloid chemistry, chemical kinetics, photochemistry, electrochemistry and radioactivity.
Professor Anastassiadis

332-340B ADVANCED PHYSICAL CHEMISTRY. (3 Credits; 2 lectures and 1 lab.; Prerequisite: 332-339A). An advanced course in thermodynamics, molecular structure, kinetics, properties of electrolytes, absorption, macromolecules and quantum aspects of physical chemistry.
Professor Anastassiadis

332-434B CHEMICAL STRUCTURE AND INSTRUMENTATION. (3 Credits; 2 lectures and 1 lab.; Prerequisites: 332-333A, 360-202A). Modern concepts of atomic and molecular structures. Bond energies and reaction mechanisms. Determinations of purity and structure of chromatographic and spectrometric techniques.
Professors Baker and Anastassiadis

332-451A FOOD ANALYSIS I. (3 Credits; 2 lectures and 1 lab.; Prerequisite: 332-232A). Proximate analysis. Chemical examinations of sugars, starches, cereals, oil seeds, fat and fat products, fruits, dairy and meat products. Vitamins, food colours, flavours. Contaminants. Physiochemical methods used in food analysis.
Professor Anastassiadis

332-452B FOOD ANALYSIS II. (3 Credits; 2 lectures and 1 lab.; Prerequisite: 332-451A). A specialized course on the principal analytical techniques used for analysis of carbohydrate, lipid, protein and vitamin constituents of foods and feedstuffs, and for detection and determination of chemical additives and contaminants.
Professor Beveridge

5.3 ECONOMICS

334-200A PRINCIPLES OF ECONOMICS I. (3 Credits; 3 lectures). To introduce students to Canada's economic system, and the application of economic and management principles within the firm, household or organization. Emphasis throughout is on problem-solving and decision-making by conscious application of a systematic body of knowledge to individual and firm problems.

334-201B PRINCIPLES OF ECONOMICS II. (3 Credits; 2 lectures; 1 conference; Prerequisite: 334-200A or equivalent). To develop an understanding of the overall economic system, how it works, and the instruments used to solve social problems. Emphasis will be on decision-making involving the entire economic system and segments of it.

334-230B ECONOMICS OF MARKETING. (3 Credits; 3 lectures; Prerequisite: 334-200A or equivalent). To promote an understanding of marketing principles and practices, their relationship to the agriculture-food system, and the economic impact on all segments of this system. Emphasis is placed on the application of marketing principles in problem-solving and in developing marketing and communication skills of the individual.

334-231B ECONOMICS OF AGRICULTURE. (3 Credits; 2 lectures; 1 conference; Prerequisite: 334-200A or equivalent). To develop an understanding of the structure and scope of Canada's agriculture-food system, the principles of operation and financing its components, linkages, functions. Focus to be on management of the various components and the entire system, types of problems confronted now and in the future.

334-332A FARM PRODUCTION ECONOMICS. (3 Credits; 3 lectures; Prerequisite: 334-200A or equivalent). To develop a full understanding of production systems, functions, principles) and production management, particularly in agri-business and the farm firm. The focus is to be on problem-solving.

334-333B RESOURCE ECONOMICS. (3 Credits; Prerequisites: 334-200A or equivalent). To develop a full understanding of the role of resources in the environment, use of resources, and management of economic resources within the firm or organization. Again, the focus is to be on problem-solving, case studies involving private and public decision-making in organizations.

334-410A LAND AND RESOURCE APPRAISAL. (3 Credits; 3 lectures). To introduce students to methods and concepts of land and resource evaluation, techniques for making choices between various land uses, and to provide relevant educational information that will enable today's students to participate fully in Canadian land use and environment decisions.

334-430B AGRICULTURE, FOOD AND RESOURCE POLICY. (3 Credits; 3 lectures). A senior course that will examine Canadian, provincial and international agriculture, food and resource policy, programs and their implications. Focus is also given to policy and program analysis and planning techniques, implementation and evaluation procedures.

334-435A AGRICULTURAL ECONOMICS RESEARCH METHODS AND SPECIAL PROBLEMS. (3 Credits; 3 lectures). A senior course dealing with research and problem solving methodology in organizing research, collecting, tabulating, analyzing and presenting evidence for resource, agriculture and food industry decision-makers. Special problems will be selected for developing research skills applicable to problem solving in marketing, production and policy.

334-440A ADVANCED AGRICULTURE AND FOOD MARKETING. (3 Credits; 3 lectures). A senior course in agriculture and food marketing, management and policy, including a detailed study of the conduct of marketing functions, commodity marketing) grocery products, retail and food service marketing, encompassing the total Canadian agriculture and food marketing system, from producer to consumer.

334-442B ECONOMICS OF FOOD SYSTEMS DEVELOPMENT. (3 Credits; 3 lectures). A senior course focusing on the description, analysis and factors affecting the design and development of present and future food systems in Canada and world-wide. Major emphasis is on the socio-economic dimensions and development planning of alternative agriculture-food systems.

334-450B AGRI-BUSINESS MANAGEMENT. (3 Credits; 3 lectures). A senior course in management and agricultural business dealing with agri-business firm engaged in agricultural production and marketing, and related farm supply business. The focus of the course is on agri-business, organization, operation and financial management and agri-business policy in today's complex and changing international environment.

334-495D PROJECT. (3 Credits). Under the supervision of a staff member of the Department of Agricultural Economics. Project topic will concern the economics of agriculture, food, or resource development. An agreement between the students and involved staff members must be reached prior to registration.

5.4 AGRICULTURAL ENGINEERING

NOTE: Instructors may refuse registration in a course to any student who does not have, in their opinion, and adequate background in the area.

336-210A MECHANICS I. (4 Credits; 3 lectures and 2 hours labs or problems). Non-concurrent force systems; analysis of simple trusses and multi-force frames; friction; shearing forces and bending moments in beams and frames; centres of gravity; solution of problems by energy methods.
Professor McKyes

336-211B MECHANICS II. (4 Credits; 3 lectures and 2 hours labs or problems; Prerequisite: 336-210A). Kinematics, dynamics, energy, momentum, relative motion, the moment of momentum of particles and rigid bodies; the inertia tensor; introduction to vibrations.
Professor Kok

336-212A GRAPHICS. (3 Credits; 2 lectures and 2 2-hour labs.). Solution of two- and three-dimensional geometry problems by graphical techniques, charts and nomography; graphical calculus.

336-214L SURVEYING. (2 Credits; 2 weeks following second term). Use of engineer's tape, level, transit, plane table, hand level, and compass for land measurement, differential levelling, topographic mapping, surveying computations and preparation of plans.
Professor Broughton

336-215B PRINCIPLES OF HYDROLOGY. (3 Credits; 3 lectures and one 2-hour lab.). Measurement and analysis of components of the water

cycle. Precipitation, mass curves, intensity – duration – frequency relationships. Energy balance, evapotranspiration from lakes, soil and vegetal covers. Interception, infiltration, ground-water and wells. Runoff hydrograph components. Estimation of water quantities and water flow rates for design of water control projects. Snowmelt, basin yield.
Professor Broughton

336-216B MATERIALS SCIENCE. (3 Credits; 2 lectures and 1 2-hour lab.) Relation between structure and properties in ceramic and organic materials. Bonding, structures, imperfections. Phase diagrams. Shaping, joining and testing of materials. Heat treatment, work in hardening and annealing of metals, introduction to physical metallurgy and processes. Failure theories.
Professor McKyes

336-305B FLUID MECHANICS. (4 Credits; 3 lectures and one 2-hour lab. or problems. Prerequisites: 336-211B, 360-202A). Properties of fluids; principles of flow of incompressible and compressible fluids; pressure boundary layers; conduit and open channel systems; simple applications to turbo machinery.
Professor Broughton

336-312A CIRCUIT ANALYSIS. (3 Credits; 3 lectures and one 2-hr. lab. or problems. Prerequisite: 360-205B). General circuit laws and d.c. circuits; electromagnetic circuits; inductance and capacitance; natural and forced response of circuits; analysis of single phase and three phase networks; electromechanical, electrochemical and electron energy conversion; electrical instruments.

336-314A AGRICULTURAL STRUCTURES. (3 Credits; 3 lectures and 2-hr. lab.). Analysis and design of structures to house animals and plants and to process and store animal and plant products. Introduction to environmental control systems and animal waste management.

336-315B MACHINE DESIGN. (4 Credits; 3 lectures, 2 hours-problems; Prerequisite: 336-341B.).(Offered in alternate years, given in 1977-78). Design of shafting, bearings, gear, belt and chain drives, clutches, brakes, vibrations, fasteners, welded joints, frames. Principles and practices of Engineering Drawing will be adhered to in laboratory submissions.

336-316B INSTRUMENTATION AND MEASUREMENT. (3 Credits; 2 lectures and 1 conference). Problems of measurement, with principles behind use of instruments in chemical and physical measurements, and the errors inherent in such analyses. Laboratory practice in instrumentation and measurement techniques.
Professors Norris, Henneberry, Schuepp and Mackenzie

336-320A SYSTEMS FOR PROCESSING FOOD PRODUCTS. (3 Credits; 3 lectures and one 2-hr. lab.). Principles and use of electrical, piping, steam, refrigeration, hydraulic power; materials handling, environmental control and plant management systems in the food industry; pumps and valves.
Professor Kok

336-321B UNIT OPERATIONS IN FOOD PROCESSING. (3 Credits; 3 lectures and one 2-hr. lab.; Prerequisite: 336-320A or 302-211A). (Offered in alternate years, given in 1978-79). Heat and mass transfer, differential contact processes, distillation, absorption, extraction, drying, evaporation crystallization, filtration, centrifugation, sedimentation.
Professor Kok

336-322B FOOD PRODUCTION AND PROCESSING WASTE MANAGEMENT. (3 Credits; 2 lectures and one 2-hr. lab.). (Offered in alternate years, given in 1978-79). Characteristics of waste; storage, transport and disposal, treatment processes, aspects of pollution control.

336-323A PHYSICAL PROPERTIES OF BIOLOGICAL MATERIALS. (3 Credits; 2 lectures and one 2-hr. lab. Prerequisite: 336-341B). (Offered in alternate years, given in 1977-78). An engineering analysis of the structure, physical attributes, mechanical and rheological propertities of biological materials, emphasizing the relationship of these properties to production and processing of agricultural products and food. Mathematical models considering size, shape, volume, surface area, density, quasistatic and dynamic viscoelastic behaviour; non-Newtonian fluid models; optical properties; behaviour of granular materials.
Professor Norris

336-324B INDUSTRIAL PROCESSES IN THE FOOD INDUSTRY. (3 Credits; 3 lectures and one 2-hr. lab.). (Offered in alternate years, given in 1977-78). Industrial Processes used in the dairy, meat, canning, fermentation, grain, sugar, fish and poultry industries. The process flow sheet, specialized machinery, microbiological aspects and waste treatment of each will be discussed.
Professor Kok

336-341B STRENGTH OF MATERIALS. (4 Credits; 3 lectures and one 3-hr. lab.; Prerequisite: 336-210A). Stress, strain, resilience, elastic and plastic properties of materials; bending moment and shear force diagrams; bending and shear stress; deflections; simple, fixed and continuous beams, torsion and helical springs, reinforced concrete beams; columns, bending and direct stress; general case of plane stress; Mohr's circle.

336-411B OFF-ROAD POWER MACHINERY. (3 Credits; 2 lectures and one 3-hr. lab.; Prerequisite 336-211B). (Offered in alternate years, given in 1977-78). Mechanics of wheels and tracks; terrain vehicle mobility and soil trafficability; vehicle stability, steering forces and steering geometry; compression and spark ignition engines; fuels and lubricants, introduction to combustion.
Professor McKyes

336-412A AGRICULTURAL MACHINERY. (3 Credits; 3 lectures and 1 lab.). Study and analysis of machines for tillage, harvesting, crop processing and handling. Field tests, load studies, design requirements; design of machines and components for agricultural applications.
Professor Norris

336-413B MATERIALS HANDLING SYSTEMS. (3 Credits; 3 lectures; Prerequisites: 360-201A and 360-203A). (Offered in alternate years, given in 1977-78). Systems and equipment for handling agricultural and food products. Introduction to work study methods and operations research.

336-416B ENGINEERING FOR LAND DEVELOPMENT. (3 Credits; 3 lectures and one 2-hr. lab. or design problems; Prerequisites: 336-214L, 336-215B and 336-305B). (Offered in alternate years, given in 1978-79). The engineering aspects of irrigation, drainage, erosion control and land clearing, water conservation, projects, dam and reservoir design and integrated development projects.
Professor Broughton

336-418B SOIL MECHANICS AND FOUNDATIONS. (3 Credits; 2 lectures and one 3-hr. lab.; Prerequisite: 336-341B). (Offered in alternate years, given in 1978-79). The exploration of subsoils, strength theories, granular and cohesive soils, foundation design, settlement calculation, consolidation, slope stability, Atterberg limits, triaxial testing, direct shear testing, compaction, soil freezing, frost heaving.
Professor McKyes

336-419B STRUCTURAL DESIGN. (3 Credits; 3 lectures and one 3-hr. lab. or design problems; Prerequisites: 336-341B, 303-213A). (Offered in alternate years, given in 1978-79). Structural Design in steel and timber; application of complete design procedures to working stress design; plastic design for ultimate loading.

336-490D PROJECT. (3 Credits; 1 lecture). Presentation of oral and written reports on approved Agricultural Engineering projects. Library and laboratory research will be required.
Professor McKyes and Staff

Graduate courses available to undergraduates:

336-504B INSTRUMENTATION AND CONTROL. (3 Credits; 1 lab. 2 conferences; Prerequisite: 336-312A). Principles and operation of instrument systems used for measurement and control in agricultural processes and research.
Professor Norris

336-511A AGRICULTURAL AND EARTHMOVING POWER MACHINERY. (3 Credits; 2 lectures and 2 labs.; Prerequisite: 336-418B). (Offered in alternate years, given in 1978-79). An advanced treatment of off-road vehicle design. Topics include performance characteristics, internal combustion engines analysis of power transmission devices, distribution of stresses between wheeled or tracked vehicles and soil, mobility and pull efficiency, soil cutting, earthmoving, plowing, ripping and transport, wheel and track steering geometries, vehicle morphology.
Professor McKyes

336-602B ENVIRONMENT CONTROL IN AGRICULTURAL STRUCTURES. (3 Credits; 3 lectures and one 2-hr. lab.; Prerequisites: 305-040A, 305-246A). (Offered in alternate years, given in 1977-78).

336-605B FUNCTIONAL ANALYSIS OF MACHINES. (3 Credits; 3 lectures; Prerequisites: 336-211B and 336-323A). (Offered in alternate years, given in 1978-79).
Professor Norris

The following courses to be taken with the Faculty of Engineering, McGill Campus. (See Faculty of Engineering Announcement for descriptions.)

305-346A HEAT TRANSFER. (3 Credits; 3 lectures and 1 hr. problem).

or

302-311A HEAT TRANSFER. (4 Credits; 3 lectures).

305-330A FLUID MECHANICS. (3 Credits; 3 lectures and 1 hr. lab.) if 336-305B not taken.

305-240A THERMODYNAMICS I. (3 Credits; 3 lectures and 1 hr. problem).

5.5 PHYSICS

338-112A INTRODUCTORY PHYSICS I. (3 Credits; 3 lectures and one 2-hr. lab.). Accelerated motion. Newton's Laws. Force, work and energy, power; momentum. Conservation principles. Circular motion. Simple harmonic motion. Waves and sound. Gases and gas laws.
Professor Douglas

338-114B INTRODUCTORY PHYSICS II. (3 Credits; 3 lectures and one 2-hr. lab.). Electric and magnetic properties of matter: electrostatics, electric currents, the link between electric and magnetic phenomena. Matter on the smallest scale: Bohr atom, quantum effects, the nucleus, radioactivity.

338-201A INTRODUCTORY METEOROLOGY. (3 Credits; 3 lectures). The atmosphere – its properties (structure, motion, geostrophic, gradient), and thermodynamics (stability, dry and moist). Clouds and precipitation. Air masses and fronts; synoptic analysis. Radiation and the global radiation budget; large-scale wind systems.
Professor Douglas

338-301B BIOTHERMODYNAMICS. (3 Credits; 3 lectures and 1 conference). The laws of thermodynamics and their application to living systems.
Professor Barthakur

MACDONALD CAMPUS LIBRARY

338-303A PRINCIPLES OF ATOMIC AND NUCLEAR PHYSICS. (3 Credits; 3 lectures and 1 conference). This course deals with contributions made by the 20th century physical sciences towards understanding of the atomic concept; classical and quantum-mechanical models of molecules, atoms and nuclei; wave- and corpuscular-theory of electro-magnetic radiation; particle-wave duality; natural and artifical radioactivity.
Professor Schuepp

338-304B PHYSICAL BASIS OF CLIMATE. (3 Credits; 3 lectures and 1 conference; Prerequisite: 338-201A). (Offered in alternate years, given in 1977-78). Global energetics; radiation, latent heat and the hydrologic cycle. General circulation; semi-permanent, and migratory centres of high and low pressure; air-masses and fronts. Regional circulations (e.g. monsoon). Local circulations. Factors affecting microclimate.
Professor Douglas

338-308B BIOMETEOROLOGY. (3 Credits; 3 lectures and 1 conference; Prerequisite: 338-201A). (Offered in alternate years, given in 1976-77). Radiative, convective and evaporative energy exchange on the microscale. Applications to ground, crop and forest, to individual members of the plant/forest community, and to animals. Plants and animals as radiators, convectors, evaporators. Hazards (heat loads, frost, etc.). Growing-degree-days and other integrative indicators.
Professor Douglas and Staff

338-404B RADIATION BIOPHYSICS. (3 Credits; 3 lectures). (Offered in alternate years, given in 1976-77). Electromagnetic radiation, interaction of radiation with matter; radiation dosimetry; biological effects of ionizing radiation; target theory; principles of radiation protection; bioluminescence; biological action of light; x-ray diffraction of protein and nucleic acids. (This is intended to be an interdisciplinary course, with some lectures supplied by the Biologists.)
Professor Schuepp and Guest Lecturers

338-405B ELEMENTARY TRACER TECHNIQUES. (3 Credits; 3 lectures and 1 3-hr. lab.; Prerequisite: 338-303A or equivalent). Operation and theory of various radiation detectors; ionization chambers, G-M counter, proportional counter, solid and liquid scintillation counters, and autoradiography; counting statistics, measurements of environmental radioactivity; practice of radiological safety.
Professor Barthakur

5.6 AGRONOMY

340-331B CEREAL CROPS. (3 Credits; 3 lectures and 1 3-hr. lab. period). Textbook. *Cereal Crops* by Leonard and Martin (Collier-Macmillan Ltd.). An intensive study of cereal crops (small grains, corn, etc.), including historical development, economic importance, botanical relationships, geographical distribution of types and cultivars; cultural practices in cereal crop production; quality factors associated with grading, processing and utilization of cereal crop products.
Professor Klinck

340-332B INDUSTRIAL CROPS. (3 Credits; 3 lectures and 1 3-hr. lab.). A study of temperate and subtropical crops grown for oil, fibre, sugar and other industrial products. Attention is given to historical development and economic importance, botanical types and cultivars, cultural practices, quality factors, grading, processing and utilization.
Professor Gendron

340-333A FORAGE CROPS. (3 Credits; 3 lectures and 1 3-hr. lab.). An intensive study of the scientific information available relevant to forage crop production. The plant materials will be studied from a morphological, physiological and ecological point of view. Cultural practices, seed production, conservation methods and quality evaluation will all be considered.
Professor Coulman

340-350C EXPERIMENTAL METHODS IN AGRONOMY. (2 Credits; Summer session). A course designed to provide the student with practical knowledge of handling experimental plant materials in Agronomy. Practice in preparation and establishment of research plots in the field and in controlled environment rooms, recording and analysing data from crop measurements, harvesting and processing research materials, crop hybridization, preparation of reports.
Staff

340-434A WEED BIOLOGY AND CONTROL. (3 Credits; 3 lectures and 1 3-hr. lab.). A study of the biology of undesirable vegetation – weeds – as related to the principles of prevention and physical, biological, managerial and chemical control.
Professor Watson

340-435B PLANT BREEDING. (3 Credits; 3 lectures and 1 2-hr. lab.). Problems, methods and the interpretation of results, in the breeding and improvement of plants.
Professor Coulman

340-436B CROP ADAPTATION AND DISTRIBUTION. (3 Credits; 3 lectures and 1 3-hr. lab.). (Offered in alternate years, given in 1977-78). Factors influencing crop adaptation and their effect on distribution.
Professor Gendron

340-439A FIELD MANAGEMENT. (3 Credits; 3 lectures and 1 3-hr. lab.). Application of soil science and biology to crop production. Limiting factors to crop yields and treatments to overcome limitations. Use of fertilizers and manures, herbicides, crop rotation, tillage, drainage and irrigation, etc. to overcome limitations and to conserve soil productivity.
Professor Gendron

340-440A SEED DEVELOPMENT, PRODUCTION AND ANALYSIS. (3 Credits; 2 lectures and 1 3-hr. lab.). (Offered in alternate years, given in 1977-78). The development and life processes of seeds in relation to seed production, processing and storage. A study is made of seed characteristics and their utilization in seed separation, analysis and grading. Attention is given to seed marketing services, seed certification systems and seed laws.
Professor Klinck

340-490D PROJECTS. (3 Credits; 1 lecture). Directed study on an approved problem, requiring both oral and written presentation. U2 and U3 students must attend all oral presentations.
Staff

5.7 ANIMAL SCIENCE

342-250A PRINCIPLES OF ANIMAL SCIENCE. (2 Credits; 3 lectures). Scientific principles underlying the livestock and poultry industries i.e., breeding, physiology, nutrition and disease – and their influence upon management practices. Emphasis is placed on the adjustment of environment to the animal.
Professor Touchburn and Staff

342-301B PRINCIPLES OF ANIMAL BREEDING. (3 Credits; 3 lectures and 1 2-hr. lab.; Prerequisite: 356-201A). The qualitative and quantitative aspects of genetics as they apply to the economic improvement of domestic mammals and birds. Areas covered include animal domestication, animal cytology, mendelian traits of economic importance, principles of population genetics, statistical tools to describe populations, environmental effects, selection and mating sytems.
Professors Moxley and Kennedy

342-312B ANIMAL PATHOLOGY. (3 Credits; 3 lectures). An introductory course of Animal Pathology. Includes discussion of causative agents, the development of the disease process, degenerative changes, protective mechanisms, factors influencing spread of disease and the control of disease.
Professor Downey

342-323A MAMMALIAN PHYSIOLOGY. (4 Credits; 3 lectures and 1 3-hr lab.; Prerequisite: 344-202B). A study of the functions of various organs in mammals including the nervous system, muscle, blood, the cardiovascular system, respiration, gastro intestinal and metabolic systems, urinary systems, the endocrine glands and the reproductive system.
Professor Laguë

342-330A FUNDAMENTALS OF NUTRITION. (3 Credits; 3 lectures; Prerequisites: 332-232A and 332-234B). A discussion of the nutrients; water, carbohydrates, lipids, proteins, minerals and vitamins, with particular emphasis on their functions in and essentially for the animal organism.

342-331B FUNDAMENTALS OF HUMAN NUTRITION. (3 Credits; 3 lectures and 1 2-hr. lab.; Prerequisite: 342-330A). Emphasis on applied quantitative aspects of human nutrition. Nutrient utilization, evaluation and requirements, as related to dietary standards.
Professor Donefer

342-332B APPLIED ANIMAL NUTRITION. (3 Credits; 3 lectures and 1 2-hr. lab.). Classification of feedstuffs based on their function in rations; discussion of digestibility and utilization of nutrients, energy and nutrient requirements for maintenance, production and reproduction and integration of these into feeding programs for livestock and poultry.
Professors Donefer, Hartstock and Touchburn

342-422B REPRODUCTIVE PHYSIOLOGY. (3 Credits; 3 lectures and 1 3-hr. lab.; Prerequisite: 342-323A). Comparative physiology of reproduction in laboratory and domestic animals. Hypothalamic, pituitary and gonadal interrelationships, synchronization of estrus, artificial insemination, livability of spermatozoa and ova "in vivo" and "in vitro", ova transplantation, prenatal and early post-natal development and infertility problems are discussed.
Professor Martin

342-424B METABOLIC ENDOCRINOLOGY AND GASTRO-INTESTINAL PHYSIOLOGY. (3 Credits; 3 lectures and 1 3-hr. lab.; Prerequisite: 342-323A). A detailed study of the matabolic endocrine system and its role in the maintenance of homeostatis, and study of the physiology of digestion.
Professor Laguë

342-432A ADVANCED ANIMAL NUTRITION. (3 Credits; 2 lectures and 1 2-hr. lab.; Prerequisite: 342-330A and 342-332B). Critical discussion of criteria for nutritive evaluation of feedstuffs, current practices and development of feeding programs, specific aspects of ruminant nutrition, discussion of feed additives.
Professors Hartsock, Donefer and Touchburn

342-450A DAIRY CATTLE PRODUCTION. (3 Credits; 3 lectures and 1 2-hr. lab.). The application of biological principles of genetics, physiology, nutrition and pathology as well as principles of economics and engineering and the integration of these principles, through management, for the maximum production efficiency of milk and meat by dairy cattle. Recent developments in livestock production will be emphasized. Trips to dairy farms and related enterprises will comprise part of the laboratory work.

342-452A BEEF CATTLE AND SHEEP PRODUCTION. (3 Credits; 3 lectures and 1 2-hr. lab.). The application of biological principles of genetics, physiology, nutrition and pathology as well as principles of economics and engineering and the integration of these principles, through management, for the maximum production efficiency of beef and

sheep. Trips to beef and sheep farms and related enterprises will comprise part of the laboratory work.
Professor Donefer and Staff

342-454A SWINE PRODUCTION. (3 Credits; 3 lectures and 1 2-hr. lab.). The application of biological principles of genetics, physiology, nutrition and pathology as well as principles of economics and engineering and the integration of these principles, through management, for the maximum production efficiency of swine. Trips to swine farms and related enterprises will comprise part of the laboratory work.
Professor Hartsock

342-456B POULTRY PRODUCTION. (3 Credits; 3 lectures and 1 2-hr. lab.). (Not given in 1977-78). The application of biological principles of genetics, physiology, nutrition and pathology, as well as principles of economics and engineering and the integration of these principles, through management, for the maximum production efficiency of poultry meat and eggs. Trips to poultry farms and related enterprises will comprise part of the laboratory work.
Professor Buckland

342-490D PROJECT IN ANIMAL SCIENCE. (3 Credits). A project to be completed under the supervision of a staff member of the Department of Animal Science. An agreement between student and ~~the~~ involved staff member must be reached prior to registration.
Professor Touchburn

342-495 SEMINAR. (2 Credits; 1 lecture and 1 lab.). Instruction on the preparation, presentation and discussion of critical reviews of topics important to Animal Agriculture to be followed by student presentation of above reviews.
Professors Hartsock and Touchburn

Graduate courses available to undergraduates

G342-604A POPULATION GENETICS IN ANIMALS. (3 Credits). (Offered in alternate years, given in 1977-78).

G342-605B ESTIMATION OF GENETIC PARAMETERS. (3 Credits). (Offered in alternate years, given in 1978-79).

G342-606B SELECTION INDEX AND ANIMAL IMPROVEMENT. (3 Credits). (Offered in alternate years, given in 1977-78).

G342-607A LINEAR MODELS IN AGRICULTURAL RESEARCH. (3 Credits).

G342-631D EXPERIMENTAL TECHNIQUES IN NUTRITION. (6 Credits). (Offered in alternate years, given in 1977-78).

G342-632D ADVANCED NUTRITION. (6 Credits). (Offered in alternate years, given in 1978-79).

G342-650D ADVANCED ANIMAL BIOCHEMISTRY. (6 Credits).

G342-603A PHYSIOLOGICAL GENETICS OF DOMESTIC ANIMALS. (3 Credits). (Offered in alternate years, given in 1978-79).

5.8 BIOLOGY

344-120A GENERAL BIOLOGY. (3 Credits; 3 lectures). The basis of life in terms of structures and processes; the cell, tissues, organs, systems, organisms, societies; plant and animal structure, common functions of metabolism, nutrition, growth, perception, reproduction; introduction to embryology, ecology, genetics, evolution. Higher animals and plants are emphasized.

344-200A BIOLOGY OF ORGANISMS I. (3 Credits; 3 lectures and 1 lab.). The major taxonomic divisions of living organisms; the Protozoa with special reference to holozoic and saprozoic forms; animal embryology as an introduction to the Metazoa; a survey of the structure and biology of the major invertebrate phyla, with emphasis on animal parasites and entomology.
Professor McFarlane and Staff

344-201B BIOLOGY OF ORGANISMS II. (3 Credits; 3 lectures and 1 lab.). Comparative evolutionary review of the plant kingdom, excluding the angiosperms, except for embryology and seed germination. Plant evolution, including some fossil genera, isotopic age determination, continental drift sequential evolution and telome theory. Pollination as a case study of plant evolution.
Professor Woodland and Staff

344-202B CELLULAR BIOLOGY. (3 Credits; 3 lectures and 1 demonstration). The aim of this course is to develop a working concept of cellular biology in procaryotic and eucaryotic cells, including their interaction with viruses. This concept includes structure, function and replication of theoretical cell types with the emphasis on structure and structurally related function. Some examples of specialized cells are then provided to illustrate some of the differences between cell types.
Professor Devoe and Staff

344-205B PRINCIPLES OF ECOLOGY. (3 Credits; 2 lectures and 1 conference). This introductory course is designed to give the student an understanding of the interactions of organisms and the physical environment. Ecological principles will be discussed at the level of the individual, the population and the community.
Professors Stewart, Knowles and Bider

344-306B BIOLOGICAL INSTRUMENTATION. (3 Credits; two 3-hr. labs.). Physical and chemical methods applied to biology including theory and practice of modern instrumentation as applied to pH, chromatography, spectroscopy, centrifugation, radioactivity and electrophoresis.
Professors Ingram and Peterson

344-495D ENVIRONMENTAL BIOLOGY SEMINAR. (2 Credits; 1 lecture). Presentation of papers on, and discussion of, topics from the field of Environmental Biology.
Professor Stewart

5.9 BOTANY

346-251A PLANT HISTOLOGICAL AND CYTOLOGICAL METHODS. (3 Credits; two 2-hr. labs). (Offered in alternate years, given in 1976-77). A laboratory lecture course dealing with methods for the study, measurement and reproduction of plant cells and tissues by various physico-chemical means, including microscopy and photography.
Professor Estey

346-252B PLANT ANATOMY AND HISTOLOGY. (2 Credits; 2 lectures and one 2-hr. lab.). A detailed study of cells, cell division, tissues and their development, and the general anatomy of vascular plants.
Professor Estey

346-356A SYSTEMATIC BOTANY. (4 Credits; 2 lectures and two 3-hr. labs.). Principles of classification and identification of vascular plants with special emphasis on those families of economic and practical importance; also an introduction to modern taxonomic methods. Field trips.
Professor Woodland

346-353A PLANT PHYSIOLOGY. (4 Credits; 3 lectures and one 3-hr. lab.). Respiration, photosynthesis, mineral nutrition, nitrogen nutrition, water relations, translocation of solutes, development and reproduction.
Professor Pelletier

346-355A, B SPECIAL TOPIC IN BOTANICAL SCIENCES. (2 Credits; 1 conference). A course of independent study by the student with the guidance of a person of recognized competence in the general area of the chosen topic.
Staff

346-451A PLANT ECOLOGY. (3 Credits; 3 lectures and 1 3-hr. lab.). A study of the major vegetation units; the influence of environmental factors on the evolution, distribution, and succession of plant communities, and on the distribution, form and function of plant species. Methods of ecological analyses.
Professor Woodland

346-454B PLANT MORPHOLOGY. (3 Credits; 3 lectures and 1 lab; Prerequisite: 344-201B or equivalent). (Offered in alternate years, given in 1978-79). This course is a comparative study of plant structure and reproduction in algae, fungi, bryophytes and vascular plants emphasizing both fossil and living groups. Laboratory attention will be given to preserved, living and fossil material of the plant groups discussed in lectures.
Professor Woodland

346-455A SPECIAL TOPIC IN THE BOTANICAL SCIENCES. (2 Credits; 1 conference). A course of independent study by the student with the guidance of a person of recognized competence in the general area of the chosen topic.
Staff

346-490D PROJECT. (3 Credits; 1 lecture and equivalent 1 3-hr. lab.). Each student is assigned a botanical problem entailing individual investigation, preparation of report in publication form, and oral presentation of a scientific paper.
Staff

346-496D SEMINAR. (2 Credits; 1 lecture). (Plant Pathology and Botany). Written and oral presentation of critical reviews of important topics and current research articles in Plant Pathology and Botany for group discussion.
Staff

Graduate Course available to undergraduates with permission:

367-650D ADVANCED SYSTEMATIC BOTANY. (6 Credits; 2 lectures, 1 lab.). (Offered alternate years, given 1978-79).

5.10 ENGLISH

348-310B STUDIES IN THE MASS MEDIA. (3 Credits; 3 lectures). An exploration of the uses and absuses of language in such modern communication media as newspapers, magazines and advertising. In addition, the course will study McLuhan and the devices of semantics and logic particulary as they apply to the appraisal of the mass media.
Professor Godfrey

348-330A TECHNICAL AND RESEARCH WRITING. (3 Credits; 3 lectures). A practical course in scientific writing with emphasis on basic writing competence and the techniques of clear exposition. In addition, study will be made of certain scientific articles and essays and the means by which they stimulate interest and attention.
Professor Godfrey

348-343A THE SHORT STORY. (3 Credits; 3 lectures). A study and discussion of representative short stories with particular reference to their theme and techniques.
Professor Godfrey

5.11 ZOOLOGY

349-206B HISTOLOGICAL TECHNIQUES IN ZOOLOGY. (3 Credits; 1 lecture, 1 3-hr. lab. and project). A practical course in the use of a variety of animal tissue techniques. Priority given to students who require this course for their major.
Professor McFarlane

349-307A NATURAL HISTORY OF THE VERTEBRATES. (3 Credits; 3 lectures and 1 3-hr. lab.). (Offered in alternate years, given in 1977-78). A general review of the higher taxonomic groups of vertebrates along with the prochordates. Major emphasis is on the diagnostic characters which serve to separate the groups, and also their evolution and distribution.
Professor Bider

349-308B COMPARATIVE MORPHOLOGY OF THE VERTEBRATES. (3 Credits; 2 lectures 1 3-hr. lab. and project). (Offered in alternate years, given in 1978-79). An overview of the morphological adaptations, and their evolution, of the vertebrates. Major differences between vertebrates and invertebrates; the early embryology, supporting systems including the axial skeletal system and paired structures; muscular, digestive, circulatory and nervous systems; sensory systems of vision, acoustics, and taste, the endocrines; and the tegumentary system.
Professor Ali-Khan

349-311B ETHOLOGY. (3 Credits; 2 lectures, 1 3-hr. lab.). Study of the behaviour of invertebrate and vertebrate animals, including innate behaviour, learning, motivation, agonistic behaviour, rhythms, social organization and communication.
Professors Hartsock, Stewart and Titman.

349-312A PRINCIPLES OF SYSTEMATIC ZOOLOGY I. (3 Credits; 3 lectures, and assigments). (Offered in alternate years, given in 1977-78). Introduction to animal taxonomy; 'the New Systematics'; the species concept; variation; speciation; reproductive isolation; evolution; phylogeny; phenetics: zoological nomenclature; methodology, etc.
Professors Kevan and Vickery

349-313B PRINCIPLES OF SYSTEMATIC ZOOLOGY II. (3 Credits; 2 lectures, 1 conference and project; Prerequisite: 349-312A). (Offered in alternate years, given in 1977-78). Present and past factors affecting the areal, regional and world distribution of animal groups and species, with particular reference to the post-Mesozoic fauna; related aspects of evolutionary and phylogenetic theory, e.g., adaptation, mimicry, parallel and convergent evolution, etc., 'Continental Drift', climatic and topographical variation, dispersal, etc.
Professors Kevan and Vickery

349-315A BIOLOGY OF INLAND WATERS I. (3 Credits; 2 lectures and 1 3-hr. lab.; Prerequisite: Any basic Botany or Zoology). General nature and history of limnology; divisions of inland waters; properties of fresh water; habitats; zones; nutrient cycles; biota; adaptations; seasonal variation; distributions; pollution; succession and evolution of fresh water environments. Some field excursions will be arranged.
Professor Ali-Khan

349-316B BIOLOGY OF INLAND WATERS II. (3 Credits; 2 lectures and 1 3-hr. lab.; Prerequisite: 349-315A). (Offered in alternate years, given in 1977-78). A continuation of Biology of Inland Waters I, covering in greater detail those areas related more particularly to animal life, with particular reference to invertebrates (especially insects); faunal groups according to systematic position and habitat; identification; distribution within water bodies; locomotion, food relations; effects of environment; indicators of pollution.
Professor Ali-Khan

349-418A TERRESTRIAL ANIMAL ECOLOGY I. (3 Credits; 2 lectures, 1 3-hr. lab. and one week field laboratory prior to fall term; Prerequisite: 344-204B). A more advanced course in animal ecology considering concepts and methods in physiological and population ecology by using case studies from land environments.
Professor Stewart

349-419B TERRESTRIAL ANIMAL ECOLOGY II. (3 Credits; 2 lectures and 2 conferences; Prerequisite: 349-418A). A more advanced course considering concepts and methods in synecology using case studies, mainly from land environments.
Professor Stewart

349-422A PARASITOLOGY I. (3 Credits; 2 lectures and 2 3-hr. labs.; Prerequisite: 344-200A). (Offered in alternate years, given in 1978-79). The systematics, morphology, biology and ecology of the parasitic protozoa and flatworms with emphasis on economically and medically important species.
Professor Meerovitch

349-423B PARASITOLOGY II. (3 Credits; 2 lectures and 1 3-hr. lab.; Prerequisite: 349-422A). (Offered in alternate years, given in 1978-79). The systematics, morphology, biology and ecology of the parasitic roundworms and arthropods with emphasis on economically and medically important species.
Professor Meerovitch

349-490D PROJECT. (3 Credits; 1 lab.). A problem involving literature review and private investigation will be allotted to each student taking the course.
Professor Stewart and Staff

349-491D PROJECT. (5 Credits; 1 lab.). A problem involving literature review and private investigation will be allotted to each student taking the course.
Professor Stewart and Staff

349-496D SEMINAR AND LITERATURE REVIEW. (3 Credits; 2 lectures). Presentation of papers on, and discussion of, topics from selected fields of Zoology (including Entomology) and of research reports; reviews of recent literature.
Professor Hill and Staff

5.12 ENTOMOLOGY

350-330A GENERAL ENTOMOLOGY. (3 Credits; no lectures, one lab.; modular course with directed project). Each student plans, in consultation with the instructor, his or her program from a wide range of modules. The modules are designed to introduce insect structure, physiology, development, systematics, evolution, ecology and control. The course stresses interrelationships, integrated pest control and information storage and retrieval.
Professor Hill

350-331A INSECT MORPHOLOGY I. (3 Credits; 2 lectures, 1 lab. and project). (Offered in alternate years, given in 1977-78). A course discussing in depth the morphology of the integument and associated organs of insects and relating structure to function.
Professors Ali-Khan and Kevan

350-332B INSECT MORPHOLOGY II. (3 Credits; 2 lectures, 1 lab. and project; Prerequisite: 350-331A). (Offered in alternate years, given in 1977-78). A course discussing in depth the morphology of the internal organs, sense organs and development of insects and relating structure to function.
Professors Kevan and Ali-Khan

350-350B INSECT DEVELOPMENT AND PHYSIOLOGY. (3 Credits; 2 lectures and 1 lab. Prerequisites: 332-211A, 332-212A, 344-200A and 344-202B). (Offered in alternate years, given in 1977-78). Course first examines growth and development, with emphasis on the changes in the integument or cuticle, the organ system of central importance in insects (and other arthropods). This leads to a consideration of insect form and the kind of development found throughout the orders of insects. The course continues with the relation of insects to their environment, including such topics as respiratory mechanisms, nutrition, excretion, chemoreception, group effects and pheromones.

350-440B SYSTEMATIC ENTOMOLOGY. (3 Credits; 1 lecture, 1 lab. and project; Normal Prerequisite: 350-330A). (Offered in alternate years, given in 1978-79). The classification of the principal orders, suborders and super-families of insects; use of keys; collecting methods.
Professors Kevan and Vickery

350-442A ARACHNIDA AND OTHER TERRESTRIAL ARTHROPODS. (3 Credits; 3 lectures, 1 lab.; Prerequisite: 344-200A). (Offered in alternate years, given in 1978-79). The morphology, biology and general systematics of land arthropods other than true insects with special emphasis on those living on the ground and in the soil; some parasitic and other forms are also considered. Parathropods, land crustaceans, millipedes, centipedes, collembolans, scorpions, spiders, mites, ticks, etc.
Professors Kevan and Hill

350-444B SOIL FAUNA ECOLOGY. (3 Credits; 3 lectures, I lab; Prerequisite: 344-205B). (Offered in alternate years, given in 1978-79). Introduction to the fauna of soil and litter, its biology, ecology and role in soil formation and amelioration; particular attention is paid to certain groups of worms and insects and especially to collembola and mites; methods of sampling, extraction, and identification.
Professors Hill and Kevan

350-446B APICULTURE. (3 Credits; 2 lectures and one lab.). Theory and practical application in beekeeping. Social insects; development of social behaviour; coevolution of flowering plants and social insects; life and behaviour of honeybees; insect pollination; honey production; properties of honey; practical beekeeping. Demonstrations and written assignments essential.
Professor Vickery

350-452A ECONOMIC ENTOMOLOGY I. (3 Credits; 3 lectures; Prerequisite: 350-330A). A survey of non-chemical methods of insect pest control including biological control agencies such as predators, parasites and pathogens. Manipulation of environmental and behavioural factors are discussed under methods of physical, cultural and genetic control. The uses of biochemical agencies such as pheromones, sterilants and repellents are considered in relation to modern concepts of integrated control, pest management, and legal restrictions.
Professor Yule

350-453B ECONOMIC ENTOMOLOGY II. (3 Credits; 3 lectures; Prerequisite: 350-330A). A survey of chemicals used in pest control, their development, formulation, application, hazards in use, effectiveness, risks of ecological side-effects and environmental contamination associated with their use. Considerations of selectivity, specificity, resistance, compatability, safety, and conformation to acceptable legal and scientific standards are made in the form of recommended usage in modern agriculture, forestry and public health fields.
Professor Yule

350-454A PEST INSECTS. (3 Credits; 2 lectures, 1 lab.). A survey of important pest insects of the world, their current status and control with special reference to Canadian conditions. Each species will be taken as representative of a taxonomic group of real or potential pests. Interrelations of life-histories, biology, economic importance and control will be stressed.
Professor Yule

5.13 EXTENSION METHODS

352-300A COMMUNICATIONS – EXTENSION METHODS. (3 Credits; 2 lectures and 1 2-hr. lab.). An introductory survey course in communication techniques including journalism skills (newswriting, design, etc.), strategies of change, and extension methods (meetings, panel discussions, etc.)
Professor Van Lierop

352-301B COMMUNITY DEVELOPMENT. (3 Credits; 2 lectures and 1 lab.). The principles and processes of area resource development will be studied by readings, lectures, group discussions and case studies. Guest lecturers from organizations and agencies involved in community resource development will be invited to participate.
Professor Van Lierop

5.14 FRENCH

354-200A PRACTICAL FRENCH I. (3 Credits; 3 lectures). Introductory French course for students who have not attended High School in Quebec. Preparatory work for postgraduate students who intend to meet second language requirements in French.
Professor Gerols

354-201B PRACTICAL FRENCH II (3 Credits; 3 lectures). Continuation of 354-201B.
Professor Gerols

354-300A, B TECHNICAL FRENCH. (3 Credits; 3 lectures; Prerequisite: 354-200A,B or equivalent). An introduction to the language of the Food Sciences. Oral practice and translation structured to meet the requirements for admission to Professional Associations in Québec, including the Ordre des Chimistes and Corporation des Diététistes.
Professor Gerols

354-302B INTRODUCTION TO FRENCH CANADIAN LITERATURE. (3 Credits; 3 lectures; Prerequisite: 354-200A,B or equivalent). A survey of French Canadian Literature and Civilization. Study of two novels and two plays by modern French Canadian writers. This course will be conducted in French.
Professor Gerols

354-303A AGRICULTURE ET RESSOURCES RENOUVELABLES DANS LES PAYS FRANCOPHONES. (3 Credits, 3 lectures; Prerequisite: 354-200A, B or equivalent). A course designed for students in Agriculture who wish to acquire a basic technical vocabulary. This study of agricultural terminology will take place within a survey of Agriculture in French-speaking countries.
Professor Gerols

5.15 GENETICS

356-201A INTRODUCTION TO GENETICS. (3 Credits; 3 lectures and 2 hr. lab.). The modern concepts of genetics are presented so that present and future developments in biology may be understood and appreciated.
Professor Coulman

356-202B ADVANCED GENETICS. (3 Credits; 3 lectures; Prerequisite: 356-201A). A detailed study of the genetic material, gene action, and population genetics.
Professor Grant

356-203A HEREDITY, EVOLUTION AND SOCIETY. (3 Credits; 3 lectures). Inheritance, variation and evolution in plants, aninals and man. Social implications of genetics and evolution. Not open to students who have taken 356-201A or equivalent.
Professor Grant

Graduate courses available to undergraduates with permission:

367-610A CYTOLOGY.

367-611B CYTOGENETICS.

367-612B MICROBIAL GENETICS.

367-613A MUTAGENESIS AND RADIATION BIOLOGY.

177-675B or 177-775B STATISTICAL METHODS IN GENETICS.

5.16 HORTICULTURE

358-332A LANDSCAPE ARCHITECTURE. (3 Credits; 1 3-hr. lab.; Prerequisite: 336-214E). Description characteristics and identification of ornamental plants, nursery practices and care of plant material. A brief history of gardens and architecture. Landscape design, plans, sketches, drafting, and construction specifications, as applied to rural and urban homes, estates, parks and playgrounds, etc.
Mr. Perron

358-335B FLORICULTURE. (3 Credits; 2 lectures and 1 2-hr. lab.; Prerequisite: 346-353A). (Offered in alternate years, given in 197778). Construction and equipment of greenhouse and related structures. Principles involved in the propagation of all horticultural plants. Production of florists' crops including harvesting, storage and marketing, as well as costs of production and distribution.
Mr. Wigdor

358-338A POMOLOGY I. (3 Credits; 2 lectures and 1 2-hr. lab. Prerequisite or concurrent: 346-353A). Small fruits. The biology of small fruit species, and the technology of small fruit production; major aspects, significant research, recent advances.
Professor Taper

358-339B POMOLOGY II. (3 Credits; 2 lectures and 1 2-hr. lab. Prerequisite 346-353A). Orchard Fruits. The biology of orchard species, and the technology of tree fruit production;major aspects, significant research, recent advances.
Professor Taper

358-430A VEGETABLE PHYSIOLOGY I. (3 Credits; 2 lectures and 1 2-hr. lab). Application of plant physiology and other sciences to the production of vegetable crops. Original literature is used to illustrate the principles involved. Crops discussed include: tomato, pepper, eggplant, cucumber, muskmelon, squash, pumpkin, beans, peas, sweet corn, asparagus and rhubarb. Selected vegetable

crops are grown by students in the laboratory to amplify lecture topics.
Professor Bible

358-431B VEGETABLE PHYSIOLOGY II. (3 Credits; 2 lectures and 1 2-hr. lab.). Application of plant physiology and other sciences to the production of vegetable crops. Original literature is used to illustrate the principles involved. Crops discussed include: lettuce, celery, cabbage, brussels sprouts, cauliflower, broccoli, kale, radish, spinach, beet, onion, carrot, and potato. Selected vegetable crops are grown by students in the laboratory to amplify lecture topics.
Professor Bible

358-443A STORAGE AND HANDLING OF HORTICULTURAL CROPS. (3 Credits; 2 lectures and 1 2-hr. lab.). The post-harvest chemistry and physiology of horticultural crops as they affect quality and marketability; handling methods at and after harvest; principles and practices in pre-cooling, storage, transportation and packaging.
Professor David

358-444B FRUIT AND VEGETABLE PROCESSING. (3 Credits; 2 lectures and 1 2-hr. lab.). The principles and practices of food processing with emphasis on canning, freezing and dehydration, survey of the newer methods of food preservation such as the use of radiation and antibiotics; quality control, grading and sanitation are discussed.
Professor David

358-495D SEMINAR. (2 Credits; 1 lab.).
Professor Taper and Staff

5.17 MATHEMATICS

360-201A, B STATISTICAL METHODS I. (3 Credits; 3 lectures and 1 2-hr. lab.). Measures of central tendency and dispersion; normal distribution; estimation and testing hypotheses; analysis of variance for simple experimental designs; regression and correlation; binomial, chi-square and Poisson distribution; non-parametric tests.
Professor Fanous

360-202A CALCULUS. (3 Credits; 3 lectures and 1 conference). Partial differentiation; multiple integrals; vector calculus; infinite series.
Professor Barthakur

360-203A DIGITAL COMPUTING I. (3 Credits; 2 lectures, 1 2-hr. lab.). Introduction to Fortran Programming; numerical and non-numerical application of computers; computer oriented mathematics.
Professor Ogilvie

360-205B DIFFERENTIAL EQUATIONS. (3 Credits; 3 lectures; Prerequisite: 360-202A). Techniques for solution of ordinary 1st and 2nd order equations; systems of equations; introduction to partial differential equations; applications to biological, chemical and engineering systems.
Professor Schuepp

360-206A MATHEMATICAL METHODS IN ECOLOGY. (3 Credits; 3 lectures). An introduction to mathematical tools used in building models of biological and ecological systems. These include probability theory, set theory, vector and matrix algebra, differential and difference equations.
Professors Barthakur and Schuepp

360-207A LINEAR ALGEBRA AND VECTOR ANALYSIS. (4 Credits; 4 lectures). Basic vectors; 3-D Geometry; Applications to mechanics; basic matrices; simultaneous linear equations; linear programming; linear transformations; vector analysis.
Professor Kok

360-301A NUMERICAL METHODS. (3 Credits; 3 lectures; Prerequisite: 360-202A). Numerical analysis and solution of problems arising in environmental science. Linear programming. Practice and instruction on prgrammable desk calculators.
Professor Schuepp

360-303B DIGITAL COMPUTING II. (3 Credits; 3 lectures; Prerequisite: 360-203A). More advanced Fortran, including the use of magnetic tapes and disks. Further applications of computers in simulation, linear programming, critical path techniques.

360-401A MATHEMATICAL STATISTICS I. (3 Credits; 3 lectures). (Offered in alternate years, given in 1977-78). Probability, random sampling; mathematical models; basic concepts of estimation and testing hypotheses; frequency distribution.
Professor Fanous

360-402A MATHEMATICAL STATISTICS II. (3 Credits; 3 lectures; Prerequisite: 360-401A). (Offered in alternate years, given in 1978-79). Correlation and regression; principles of testing hypotheses and estimation; small sample distributions; simple experimental designs; stratified sampling, sequential analysis.
Professor Fanous

Graduate courses available to undergraduates by permission:

360-610A, B STATISTICAL METHODS II. (3 Credits; 3 lectures and 1 2-hr. lab.).
Professor M.A. Fanous

360-612B MATHEMATICAL METHODS. (3 Credits; 3 hours to be arranged).
Professors Schuepp and Kok

360-613B TECHNIQUES OF STATISTICAL ANALYSIS. (3 Credits; 3 hours to be arranged).
Professor M.A. Fanous

5.18 MICROBIOLOGY

362-200A LABORATORY METHODS IN MICROBIOLOGY. (3 Credits; and two 3-hr. labs.). A practical application of techniques relating to morphology and physiology, enrichment, isolation and identification of selected classes of microorganisms.
Staff

362-230B THE MICROBIAL WORLD. (3 Credits; 3 lectures and one 3-hr. lab.). The occurrence and importance of microorganisms (especially bacteria) in the biosphere. Principles governing growth, death and metabolic activities of microorganisms. An introduction to the microbiology of soil, water, plants, food, man and animals.
Professor MacLeod and Staff

362-331B MICROBIAL ECOLOGY. (3 Credits; 3 lectures and one 3-hr. lab.). A detailed study of microorganisms in the animal, soil, fresh water and marine environments. Population regulation in pure and mixed cultures and in natural communities in homogeneous and discontinuous environments. Principles of biochemical ecology in relation to biodeterioration, pollution, biogeochemical cycles.
Professor Knowles and Staff

362-337D FRONTIERS IN MICROBIOLOGY. (1 Credit; irregular meetings). This course involves the preparation of a comprehensive term paper based on a search of the literature on a topic assigned to include an area of recent development new to the student.
Staff

362-338A MOLECULAR BIOLOGY OF MICROORGANISMS. (3 Credits; 3 lectures and one 3-hr. lab.). Principles of microbial molecular biology including cell structure, growth, nutrition, intermediary metabolism, catabolic and anabolic reactions and genetics. The laboratory includes isolation, induction and assay of selected enzymes plus special individual projects to illustrate various aspects of molecular biology.
Professor Ingram and Staff.

362-341B MECHANISMS OF PATHOGENICITY. (3 Credits; 2 lectures, 1 conference, one 3-hr. lab.; Prerequisite: 362-230B). (Offered in alternate years, given in 1978-79). A study of the means by which bacteria cause disease in man and animals. Includes response of host to invading bacteria, modes of action of exo- and endotoxins, modes of actions of antibiotic resistance in bacteria.
Professor DeVoe.

362-438A IMMUNOLOGY. (3 Credits; 2 lectures and 1 3-hr. lab.). A review of the host defence mechanisms with particular reference to antigen-antibody reactions. The nature of antigens and antibodies, the mechanism of antibody formation, polymorphism, hypersensitivy and transplantation are discussed.
Professor Tanner

362-442A FOOD MICROBIOLOGY AND SANITATION. (3 Credits; 3 lectures and 1 3-hr. lab.). Consideration of microorganisms, and their products, of importance to the food industry. These will be discussed in terms of production of foods, preservation and processing of foods, facility sanitation and waste disposal, potential for causing food poisoning outbreaks.
Professor Idziak

362-491D PROJECT. (3 Credits; equiv. 2 3-hr. labs.). A project involving laboratory work. May be elected by any final year students other than Microbiology Major.
Staff

362-492D PROJECT. (5 Credits; equiv. 3 3-hr. labs.). A project involving laboratory work assigned each Microbiology Major student in his final year.
Staff

362-495D SEMINAR. (3 Credits; equivalent of 1 lecture).
Staff

Graduate courses available to undergraduates with permission:

362-760D TOPICS IN MICROBIAL PHYSIOLOGY. (6 Credits; 2 lectures). (Offered in alternate years, given in 1978-79).
Professor Ingram

362-761D SOIL MICROBIOLOGY. (6 Credits; 2 lectures). (Offered in alternate years, given in 1978-79).
Professor Knowles

362-762D MICROBIAL BIOCHEMISTRY. (6 Credits; 2 lectures). (Offered in alternate years, given in 1977-78).
Professor MacLeod

362-764A READING AND CONFERENCE. (3 Credits; 2 conferences). (Offered in alternate years, given in 1977-78).
Staff

362-765B READING AND CONFERENCE. (3 Credits; 2 conferences). (Offered in alternate years, given in 1977-78).
Staff

362-766A READING AND CONFERENCE. (3 Credits; 2 conferences). (Offered in alternate years, given in 1978-79).
Staff

362-767B READING AND CONFERENCE. (3 Credits; 2 conferences). (Offered in alternate years, given in 1978-79).
Staff

5.19 PLANT PATHOLOGY

366-301B INTRODUCTORY MYCOLOGY. (3 Credits; 2 lectures and 1 3-hr. lab.). A lecture and laboratory course dealing with elements of the biology and physiology of fungi; their cultural characteristics and the identification of selected species.
Professor Estey

366-355A, B SPECIAL TOPIC IN PLANT PATHOLOGY. (2 Credits; 1 conference). A course of independent study by the student, guided by a plant pathologist who has specialized in the general area of the chosen topic.
Staff

366-402A GENERAL PLANT PATHOLOGY. (3 Credits; 2 lectures and 1 3-hr. lab.). A study of common diseases, with emphasis on disease expression, causation, ecology, and principles underlying plant disease control. An introduction to methods of studying plant diseases in the laboratory and field.
Professor Viswanathan

366-403B DISEASES OF FIELD AND FOREST CROPS. (3 Credits; 2 lectures and 1 3-hr. lab.; Prerequisite: 366-402A). (Offered in alternate years, given in 1977-78). The distribution, economic importance, symptoms, causes, and principles underlying control of diseases of major field and forest crops.
Professor Viswanathan

366-404B DISEASES OF HORTICULTURAL CROPS. (3 Credits; 2 lectures and 1 3-hr. lab.; Prerequisite: 366-402A). (Offered in alternate years, given in 1976-77). The distribution, economic importance, symptoms, causes, and principles underlying control of diseases of major horticultural crops.
Professor Viswanathan

366-405A INTERMEDIATE MYCOLOGY. (3 Credits; 2 lectures and 1 3-hr. lab.). A lecture and laboratory study of the higher fungi, and others of general interest or importance, that are not dealt with in the introductory course.
Professor Estey

366-406A VIROLOGY. (3 Credits; 2 lectures and 1 3-hr. lab.). A study of the viruses affecting animals, bacteria and plants, with main emphasis on the chemical and physical properties of viruses; virus infection; and virus epidemiology. Laboratory culture of viruses, their isolation, and characterization by chemical and physical methods. Priority given to students who require this course for their major.
Professor Peterson

366-490D PROJECT. (3 Credits; 1 lecture and 1 3-hr. lab.). Each student is assigned a plant pathological or botanical problem entailing individual investigation, preparation of a report in publication form, and oral presentation of a scientific paper.
Staff

366-496D SEMINAR. (2 Credits; 1 lecture). Written and oral presentation of critical reviews of important topics and current research articles for group discussion.
Staff

Graduate courses available to undergraduates with permission:

367-632B PLANT VIRUS DISEASES. (3 Credits; 2 lectures and 1 lab.).
Professor Peterson

367-634A NEMATOLOGY. (3 Credits; 2 lectures and 1 lab.).
Professor Estey

367-635B NEMATODE DISEASES OF PLANTS. (3 Credits; 2 lectures and 1 lab.).
Professor Estey

5.20 PSYCHOLOGY

368-301A PSYCHOLOGY. (3 Credits; 3 lectures). A study of the general characteristics of physical, social, emotional and intellectual development, the psychology of learning, and the growth and development of personality.
Professor Shymko

368-350B HUMAN SEXUAL DEVELOPMENT. (3 Credits; 2 lectures and one 2-hr. conference). (Offered in alternate years; given in 1978-79). An analysis of available research related to human sexuality from the areas of developmental psychology, sociology, and medicine. The course will consider social issues associated with sexuality from an historical and psychosociological viewpoint.
Professor Shymko

5.21 SOCIOLOGY

370-230A INTRODUCTORY SOCIOLOGY: SOCIETY TODAY. (3 Credits; 3 lectures). The study of man in his relationship to human groups and institutions. The patterns and arrangements of human societies, their development and change. Major theoretical views of sociology and basic sociological concepts related to contemporary conditions and problems.
Professor Chevrier

370-240B THE SOCIAL DEVELOPMENT OF THE INDIVIDUAL. (3 Credits; 3 lectures; Prerequisite: 370-230A). The social nature of man. Language and communication. Socialization. Self, personality and social character in the sociological perspective.
Professor Chevrier

370-341A THE URBAN COMMUNITY. (3 Credits; 3 lectures; Prerequisite: 370-230A). Population phenomena and their implications for the organization of society. Human ecology. The structure of urban communities in industrial and developing countries. Urban planning. City government. Social institutions in the urban setting.
Professor Chevrier

370-342B SOCIAL PROCESSES AND SOCIAL INSTITUTIONS. (3 Credits; 3 lectures; Prerequisite: 370-230A). (Given in 1977-78). Sociological theories of society. Systems of stratification, classes and mobility. Social control and the maintenance of order. Bureaucracy and modern organization. Power, authority and the political order. The realm of ideas: education, science, religion and ideologies. Social change and the future of society.
Professor Chevrier

370-350A RESEARCH METHODS FOR SOCIAL SURVEYS. (3 Credits; 2 lectures; Prerequisites: 360-201A and 360-203A or equivalents). Methodology in social research. Research design. Sampling.

Social measurement. Data collection, analysis and interpretation. The research report.
Professor Chevrier

370-360B RURAL SOCIOLOGY. (3 Credits; 3 lectures; Prerequisite: Sociology 370-230A). Settlement patterns and their social significance. The major social systems of the rural community. Farms and Farmers. Government policies. Rural life in traditional societies and in urbanized societies.
Professor Chevrier

5.22 SOIL SCIENCE

372-210A PRINCIPLES OF SOIL SCIENCE. (3 Credits; 3 lectures and one 3-hr. lab.). Origin, development and classification of soils, chemical and physical properties related to crop production, soil conservation and land use.

372-230B THE PHYSICAL ENVIRONMENT. (3 Credits; 3 lectures and one 3-hr. lab.) Description and classification of soils, geomorphology and landscape, organic matter, water and nutrients. The hydrologic cycle, surface drainage, ground water, water quality. Energy balance at the ground surface, evaporation, temperature regimes, freezing temperatures, micro-climate, meteorological records.
Professor Warkentin

372-250A GEOLOGY AND GEOMORPHOLOGY. (3 Credits; 3 lectures and one 3-hr. lab.). (Offered in alternate years, given in 1977-78). Geology, petrology and stratigraphy of the common igneous, sedimentary and metamorphic rocks. Principles of geomorphology related to landscape features and their interpretation. Weathering, mass wasting, erosion and deposition.

372-310B SOIL CHEMISTRY AND FERTILITY. (3 Credits; 3 lectures and one lab.; Prerequisite: 372-210A). Chemical composition of soils, origin and chemistry of plant nutrients, influence of soil properties on nutrient absorption and plant growth, instrumental analysis, other analytical techniques.

372-321A PRINCIPLES OF SOIL RATING. (3 Credits; 3 lectures). A study of soil as a main constraint in its utilization by man for agriculture, forestry, recreation, wildlife, urban development, industrialization, engineering projects, social and economic assets. Review and evaluation of various systems of rating soils for the aforementioned uses.
Professor Millette

372-325B PRINCIPLES OF LAND PLANNING. (2 Credits; one 2-hr. lab.). A study of the principles involved in land planning. Includes an historical review, discussion of ecological, social, economic, political and legal factors involved in making decisions for the best and most appropriate use of land. Study of specific cases, field trips or visits or group discussion.
Professor Millette

372-330B PHYSICAL PROPERTIES OF SOILS. (3 Credits; 2 lectures and one 3-hr. lab.). Soil structure; fluxes of water, heat, gases and solids in soils; physical properties and plant growth; applications to soil dynamics.
Professor Warkentin

372-420A SOIL SURVEY. (3 Credits; lectures and two weeks of soil mapping before term begins). Technique of taking soil descriptions and establishing mapping units. Preparation of soil, land use and other interpretation maps. Interpretation of aerial photographs.
Professor Millette

372-491A PROJECT I. (3 Credits). Selection of research problem, formulation of hypothesis, elaboration of objectives, outline of the method of approach and of the experimental techniques, major review of literature pertaining to subject investigated. All work performed in frequent consultation with research director.
Staff

372-493B PROJECT II. (3 Credits). Execution of experimental work, preparation of report containing accomplishments from Project I, plus discussion, conclusion and summary concerning experimental results. Oral presentation of completed report. All work performed in frequent consultation with research director.
Staff

372-496D SEMINAR. (2 Credits; 1 lecture). Discussions of selected topics in Soil Science.
Staff

5.23 WOODLAND RESOURCES

374-200B FOREST RESOURCES. (3 Credits; 3lectures and project). A survey of the contribution of the forest resource to the national economy. An overview of world forests, the history and development of forestry, forest influences, forest industry, management, harvesting methods, and mechanization systems. Discussions of research, education, mutliple use and environmental forestry practices with guest lecturers.
Professor Jones

374-210A, C METHODS OF ENVIRONMENTAL INTERPRETATION. (3 Credits; 2 lectures and 1 lab.). (Summer session 3 weeks; 2-hr lecture and field trip each day). For peope interested in conducting effective field study trips; organization and operation of studies, class preparation, field methods, basic information and sources, functions of tour guides, utilization of different study areas, special problems and possibilities for follow-up class work. Field work at the Morgan Arboretum.

374-330A PRIVATE FORESTRY. (3 Credits; 3 lectures and one 3-hr. lab.). Trees and forest of eastern Canada; forest ecology; products; multiple use of

potentials; silviculture, management, and marketing; diverse objectives of forest owners, management alternatives; relation to agriculture; analysis of management problems; present and future socio-economic significance of this segment of land resource.
Professor MacArthur

374-440B SILVICULTURE. (3 Credits; 2 lectures; 1 conference; Desirable Prerequisites: 346-451A, 374-330A; or consent of instructor). A generalized treatment of applied forest ecology and current silvicultural practices with emphasis on Eastern Canadian conditions. The principles of regeneration, nursery practice, planting, tending and harvesting of natural and artifical stands.
Professor MacArthur

5.24 RENEWABLE RESOURCES DEVELOPMENT

375-200B CONSERVATION. (3 Credits; 3 lectures). An ecological, economic, ethical and political evaluation of man's effect on his environment and the ultimate values of his ingenuity and present rate of progress.
Professor Bider

375-300B RENEWABLE RESOURCES. (3 Credits; 3 lectures). The production, exploitation, and utilization of agricultural, forestry, fisheries and wildlife resources. The geography of the resources as well as the populations which exploit them and the markets which consume them.
Professor Bider and Staff

375-333A PHYSICAL AND BIOLOGICAL ASPECTS OF POLLUTION I. (3 Credits; 3 lectures). The environmental contaminants which cause pollution; sources, amounts and transport of pollutants in water, air and soil; waste management.
Professor Warkentin and Staff

375-334B PHYSICAL AND BIOLOGICAL ASPECTS OF POLLUTION II. (3 Credits; 3 lectures). Genetic effects of pollutants; legislation for pollution control; energy environment; economic aspects of pollution control; management for environmental quality.
Professor Warkentin and Staff

375-401A FISHERIES AND WILDLIFE MANAGEMENT. (4 credits; 3 lectures, one 2-hr. lab and one week field laboratory prior to fall term). Principles of fisheries and wildlife management are considered and current practices of research and management are discussed.
Professors Titman and Bider

375-410B WILDLIFE ECOLOGY. (3 Credits; 3 lectures, assignments, and occasional field trips). Principles of animal ecology as they relate particularly to North American birds and mammals. Topics covered include species distribution, population dynamics, predation, geographic speciation, habitat selection and social behaviour.
Professor Titman

375-411B RECREATION RESOURCE MANAGEMENT. (3 Credits; 3 lectures). Outdoor recreation management principles as related to regional resources, needs, programs, opportunities, policies and administration in the public and private sectors, economic aspects.

375-414A POLICY AND POLITICS OF RENEWABLE RESOURCES DEVELOPMENT. (3 Credits; 2 lectures one conference). This course will answer the following questions: How are policies made and implemented? Who makes policy decisions? How are desirable goals achieved within the political system?

375-415A LAW AND THE PROTECTION OF FAUNA AND FLORA. (2 Credits: 2 lectures). A study of the various federal, provincial and municipal laws affecting wildlife habitat. Topics include: laws to protect wild birds and animals; the regulation of hunting; legal protection of trees and flowers, sanctuaries, reserves, parks; techniques of acquiring and financing desirable land, property owner rights.
Messrs. R.W. Carswell and D. Guthrie

375-420A TOPICS IN ORNITHOLOGY. (3 Credits; 3 lectures and occasional field trips; Prerequisite: 349-307A or permission of instructor). Taxonomic relationships and evolution of birds will be outlined. Zoogeography, reproduction, migration and population processes of North American birds will be examined.
Professor Titman

375-437B ASSESSING ENVIRONMENTAL IMPACT. (2 Credits; 2 lectures). The course will be divided into two parts. The first part will involve an examination of the theories and procedures of various methods of assessing environmental impact. The second part of the course will involve an examination of the environmental impact statements of programs and projects already in existence to examine the accuracy with which they were able to predict consequences and attenuate undesirable effects.

375-445A SPECIAL TOPICS IN RENEWABLE RESOURCES I. (2 Credits). Students will pursue topics that are not otherwise available in formal courses. An individualized course of studies will be followed under supervision of a member of staff qualified in the appropriate discipline or area selected by the student.
Staff

375-446B Same description as 375-445A.

375-448A TOPICS IN LANDSCAPE I. (2 Credits; Conference). Students will pursue topics that are not otherwise available in formal courses. Projects will be selected by the students for an interdisciplinary group approach to problem solving – applied

through research, analysis of information, and development of concepts. The design process will be applied to actual landscape problems in the region about the Campus.
Professor Graham

375-449B TOPICS IN LANDSCAPE II. (2 Credits; Conference). Continuation of Topics in Landscape I.
Professor Graham

375-450A,B SPECIAL TOPICS IN RENEWABLE RESOURCES DEVELOPMENT. (2 Credits). Students will pursue topics that are not otherwise available in formal courses. An individualized course of studies will be followed under the supervision of a member of staff qualified in the appropriate discipline or area.
Staff

375-492D SEMINAR. (3 Credits). Includes basic lectures on synthesis and interpretation of multifaceted subjects; preparation and publication of one semi-technical article; participation in two oral presentations of technical subjects all under the supervision of academic or staff adviser.
Staff

375-496D PROJECT I. (3 Credits). Development of research techniques through selection of problem, formulation of hypotheses and objectives, research design, review of pertinent literature, experimental work, discussion and conclusion of results with oral presentation of completed report, all in consultation with research director.
Staff

375-497D PROJECT II. (5 Credits). Same as 375-498D with a more elaborate research program.
Staff.

5.25 FOODS

376-214A FOOD FUNDAMENTALS I. (3 Credits; 3 lectures and 1 lab.). An introduction to the practices followed in selection, preparation and conversion of foods with reference to the basic physical and chemical changes in the food constituents. Development of an awareness and a recognition of food quality standards.
Professor C.L. Henneberry

376-217B FOOD FUNDAMENTALS II. (3 Credits; 3 lectures and 1 lab.; Prerequisite: 376-214A). Advanced techniques of food production and an understanding of meal management including planning, preparation, service and evaluation. The historical cultural, sociological and economic factors in the development of food patterns.
Professor C.L. Henneberry and Mrs. Fleming

376-312A ADVANCED FOODS. (3 Credits; 3 lectures and 1 lab.; Prerequisite: 376-214A). The study of less common foods and their application. The preparation and service of foods appropriate to the formal menu. An understanding of meal management including planning, preparation, service and evaluation. Library research and the interpretation of food in relation to cultural, historical, sociological, economic or other factors.
Mrs. Fleming

376-340A CHEMISTRY OF FOOD PRODUCTS I. (3 Credits; 3 lectures and 1 3-hr. lab.; Prerequisite: 332-232A) A study of the composition, chemistry and technology of milk, meat and eggs. Analytical methods, processing procedures and market quality.
Professor Beveridge

376-341B CHEMISTRY OF FOOD PRODUCTS II. (3 Credits; 3 lectures and 1 3-hr. lab.; Prerequisite: 332-232A) A study of the composition, chemistry and technology of selected food products derived from cereals, oil seeds, sugar cane and sugar beet, sea weed and spice plants. Analytical methods, processing procedures and market quality.
Professor Beveridge

376-413B PRODUCT DEVELOPMENT. (3 Credits; 3 lectures and 1 lab.). Offered in alternate years, given in 1977-78). Representatives from food industry will present research procedures used to develop new products. Students will prepare a report on the development of a new product, incorporating an analysis and evaluation of the production, processing equipment and sanitation requirements and a summary of consumer acceptance and market feasibility of the product.
Professors Idziak and Raymond

5.26 FOOD AND CONSUMER SCIENCES

377-490D FOOD AND CONSUMER SCIENCES PROJECT I. (3 Credits). A project involving a review of the literature, experimental work and submission of a report. Assigned to students in their final year.
Coordinator, Academic Adviser and Staff

377-491D FOOD AND CONSUMER SCIENCES PROJECT II. (5 Credits). A project involving a review of the literature, experimental work and submission of a report. Assigned to students in their final year.
Coordinator, Academic Advisers and Staff

377-495D FOOD AND CONSUMER SCIENCES SEMINAR I. (1 Credit). Oral presentation of a selected topic within the field of Food and Consumer Sciences.
Staff

377-496D FOOD AND CONSUMER SCIENCES SEMINAR II. (2 Credits). Oral presentations of selected topics within the field of Food and Consumer Sciences.
Staff

377-497D FOOD AND CONSUMER SCIENCES SEMINAR III. (3 Credits). Oral presentations of selected topics within the field of Food and Consumer Sciences.
Staff

5.27 HOME ECONOMICS

378-331B FAMILY MANAGEMENT. (3 Credits; 3 lectures; Prerequisite: 376-214A, 376-217B and 381-330A). The influence of values, goals, resources, needs on family decision making processes. Basic accounting, bookkeeping and budgeting. Time and motion studies of routine tasks. Practical application of management principles, for low income families, handicapped, etc.
Mrs. Murphy

378-332A FAMILY STUDIES – DEVELOPMENT. (3 Credits; 3 lectures and 1 conf.; Prerequisite: 370-230A or 368-301A). A study of the development of the individual in the family from birth to old age. The recognition and understanding of variations in developmental environment and human potential.
Professor Shymko

378-333B FAMILY STUDIES – RELATIONSHIPS. (3 Credits; 3 lectures and 1 conf.; Prerequisite: 370-230A or 368-301A). (Offered in alternate years, given in 1977-78). An understanding of the role of the family in society. The interaction and interrelationships of family members of varying ages. An analysis of various family structures and problems.
Professor Shymko

5.28 INSTITUTIONAL ADMINISTRATION

380-242A MANAGEMENT THEORIES AND PRACTICES. (3 Credits; 3 lectures). An introduction to contemporary management theories and practices and their effect on the organizational structure and administrative functions of a dietary department.
Professor Raymond

380-343B ACCOUNTING AND COST CONTROL. (3 Credits; 1 lecture). An introduction to the basic principles and concepts of responsibility accounting and cost control, analysis and utlization of financial statements and control system data for decision making.
Professor Raymond

380-345D FOOD SERVICE PRODUCTION MANAGEMENT. (4 credits; 1 lecture 1 3 hr. lab.). Application of the theories and principles of management to quantity food production and service. Development of standards and specifications related to purchasing food and food production equipment. Planning food facilities.
Professor Raymond

380-442A ORGANIZATION AND MANAGEMENT. (3 Credits; 3 lectures). An introduction to the theories and principles of management with emphasis on the function of management and its application in the food service/hospitality industry.
Professor Raymond

380-443B FOOD SERVICE PRODUCTION MANAGEMENT. (4 Credits; 2 lectures and two 3-hr. labs.). Application of the principles and theories of Scientific Management to quantity food production and service. Development of standards and specifications related to purchasing food and food production equipment. Planning food facilities.
Professor Raymond

380-444A PERSONNEL MANAGEMENT I. (3 Credits; 3 lectures). The fundamentals of organizational behaviour, employee development and the leadership role.
Professor Neilson

380-445B PERSONNEL MANAGEMENT II. (3 Credits; 3 lectures). Organizational environment and the management of people at work. The nature of collective bargaining, the roles of unions and management.
Professor Neilson

380-446A PERSONNEL MANAGEMENT. (4 Credits; 3 lectures, 1 conference). The management of people at work. Employee development and the leadership role. The nature of collective bargaining, the role of unions and management.
Professor Neilson

5.29 CONSUMER SERVICES

381-330A CONSUMER EDUCATION I. (3 Credits; 3 lectures and 1 lab.). Role of the consumer in the economy; factors which influence consumer demands and satisfactions; problems in modern buyer/seller relationships.
Professor C.L. Henneberry

381-331B CONSUMER EDUCATION II. (3 Credits; 3 lectures and 1 lab., Prerequisite 381-330A). A study of the management of human and material resources with respect to selection of equipment, planning work space to save time and energy, management of credit, savings, investment and budgeting.
Professor C.L. Henneberry

5.30 NUTRITION AND DIETETICS

382-207B NORMAL HUMAN NUTRITION. (3 Credits; 3 lectures, 1 conference). Application of the Canadian Dietary Standard to meet the normal nutrient requirements for growth, pregnancy, lactation and aging. Evaluation of nutritional status and assessment of food consumption patterns.
Professor Farmer

382-208 STAGE OF PROFESSIONAL FORMATION – LEVEL I. (4 Credits; six weeks directed experience, following second term). Two modules, consisting of 3 weeks directed experience each, in the areas of nutrition and food service administration. This clinical experience to be provided in participating health service institutions.

382-212B BASIC NUTRITION. (3 Credits; 3 lectures). The scientific basis for the dietary recommendations for energy, protein, minerals and vitamins for adults. This course is intended for students who wish to take a single course in human nutrition.
Professor Farmer

382-305A NORMAL HUMAN NUTRITION. (3 Credits; 3 lectures). (Prerequisites: 342-331B or 382-212B). Application of known nutrient requirements in the feeding of infants, children, adolescents, women during pregnancy and lactation, and the elderly. Natural toxicants, pesticide residues, health foods and food additives will be discussed for nutrition education of the public. This course is for students majoring in Home Economics and Dietetics.
Professor Farmer

382-309B STAGE OF PROFESSIONAL FORMATION – LEVEL II. (7 Credits; two days per week, second term plus four weeks following examination period). Two modules consisting of 4 weeks of directed experience, each in the areas of nutrition and food services administration. This clinical experience to be provided in participating health service institutions.

382-409B STAGE OF PROFESSIONAL FORMATION – LEVEL III. (7 Credits; ten weeks, second term). Three modules consisting of 5 weeks directed experience in Nutrition, 3 weeks experience in Administration and 2 weeks experience in Community Nutrition in health service institutions.

382-410D STAGE OF PROFESSIONAL FORMATION – LEVEL IV. (15 Credits: 16 weeks following the completion of the Baccalaureate program). Three modules consisting of 7 weeks directed experience in Nutrition, 6 weeks experience in Administration and 3 weeks experience in Community Nutrition, in health service institutions.

382-435B APPLIED HUMAN NUTRITION. (3 Credits; 3 lectures). Class projects include diet surveys, computer dietary calculations, interviewing for diet counselling, and the preparation of posters, puppets, food models, games, exhibits, videotapes, etc. Lecture topics include nutritional status, problems of world feeding and the results of the Nutrition Canada Survey. This course is planned for students majoring in Dietetics.
Professors Farmer and Maconochie

382-436A APPLIED HUMAN NUTRITION. (2 Credits; 2 lectures). Computer dietary calculation, interviewing for diet counselling. Preparation of illustrative material for nutrition teaching. Nutrition Canada Survey, natural toxicants, pesticide residues, health foods and food additives will be discussed for nutrition education of the public.
Professor Farmer

382-441A DIET THERAPY I. (3 Credits; 2 lectures and one lab.). Dietary modification in treatment of pathological conditions including gastro-intestinal, liver, renal, circulatory and metabolic disorders. Laboratory periods for lectures in hospitals.
Professor Maconochie

382-442B DIET THERAPY II. (3 Credits; 2 lectures and one lab.). Seminars in which recent developments in dietetics are presented and discussed by the students. Visits to clinics, hospital dietary departments and presentation of a case study. Laboratory periods for the preparation and discussion of special diets.
Professor Maconochie

382-443A DIET THERAPY. (4 Credits; 3 lectures, 1 conference). Dietary modification in treatment of pathological conditions including gastro-intestinal, liver, renal, circulatory and metabolic diseases.
Professor Maconochie

5.31 COMMUNICATION ARTS

384-422A INSTRUCTIONAL COMMUNICATIONS. (3 Credits; 3 lectures and 1 lab.; Prerequisite: 376-214A). Understanding of the instructional communications principles and methodology and the application to small group instructions and demonstrations. Explorations of the use of audio-visual aids and the mass media in this context. Laboratory work will provide opportunities to apply and evaluate student understanding of the principles.

5.32 TEXTILES AND CLOTHING

386-220B CONTEMPORARY CLOTHING CONSTRUCTION. (3 Credits; 2 labs.). Principles and techniques of garment construction. The application of these principles in the construction of garments using the commercial pattern and in the making of a sample laboratory manual.
Mrs. Martin

386-232A TEXTILES – NATURAL AND MAN-MADE FIBRES. (3 Credits; 3 lectures and 1 lab.). A consumer-oriented study of the history, properties, characteristics and performance limitations of natural and man-made fibres; yarns; fabric constructions; finishing and finishes, mixtures and blends.
Mrs. Murphy

386-320A ADVANCED CLOTHING CONSTRUCTION. (3 Credits; 2 lab.; Prerequisite: 386-220B). Principles and techniques of advanced clothing and

their application in the construction of custom tailored or semi-tailored garments while exploring the structural potential of contemporary fabrics.
Mrs. Martin

386-321B APPAREL DESIGN. (3 Credits; 2 labs.). Practical study of garment design by the Flat Pattern method. An introduction of drafting and draping. Experiments in applied design through mediums such as batik, tie-dying and creative stitchery.
Mrs. Murphy

386-322B PSYCHOLOGICAL AND SOCIAL BASES OF CLOTHING. (3 Credits; 3 lectures). A study of the function and use of clothing at different stages in the life cycle of the individual. The use of colour and styling as an expression of personality. Historical and contemporary perspectives of dress as a reflection of social rank and life styles.
Mrs. Murphy

386-433B TEXTILES CHEMISTRY. (3 Credits; 2 lectures and one lab.). An introduction to the chemistry of cellulose, protein and synthetic fibres; dye stuffs and dyeing; finishing chemicals and their uses.
Professors Anastassiadis and Henneberry

6 GRADUATE PROGRAMS

Graduate work, under the Faculty of Graduate Studies and Research, McGill University, Montreal, may be undertaken at Macdonald College, in Agricultural Engineering, Agronomy, Animal Science (Animal Breeding, Animal Physiology or Nutrition), Chemistry, Economics, Entomology, Genetics, Horticulture, Microbiology, Parasitology, Plant Pathology, Soil Science and Wildlife Biology. The advanced courses of study offered lead to the degrees of Master of Science and Doctor of Philosophy.

A number of scholarships and student assistantships are available.

The Faculty of Graduate Studies and Research issues an Announcement giving full information regarding graduate courses, theses, registration, etc., in connection therewith, which will be sent on application to the Dean of the Faculty of Graduate Studies and Research, McGill University, Montreal or to the Registrar, Macdonald College, P.Q. An announcement entitled Postgraduate Fellowships, Bursaries, and Prizes is also available.

7 DIPLOMA IN AGRICULTURE

Director – Professor N.C. Lawson. As of September 1976, a new program has been introduced under the sponsorship of the Ministry of Agriculture for Québec. The new program is designed to educate and train people to operate and manage commercial farms. Emphasis is being placed on practical training as an integral part of this program. Students spend 24 months in the program. Two academic terms are followed by a summer practical term, then two more academic terms followed by a second summer practical term. Further details, including the syllabus of courses, can be obtained by contacting the Director of the Program, Dr. N. Lawson, 457-6580, Local 255, or the Director of Farm Practice, Mr. L. Forgrave, 457-6580, Local 255 or by writing to the Director, Diploma program in Agriculture, P.O. Box 335, Macdonald College, P.Q. H0A 1C0. Interested persons should contact one of the above for an appointment to determine their eligibility for the program.

McGILL UNIVERSITY LIBRARY

CALENDAR FOR SESSION 1977-78

1977

May 9, Monday to June 17, Friday	Summer Session, Part 1.
May 23, Monday	Victoria Day – Administrative Offices closed.
June 8, Wednesday	Convocations: 9:30 a.m. Faculty of Arts and School of Social Work 2:30 p.m. Faculty of Science
June 24, Friday	St. Jean Baptiste Day – Administrative Offices closed.
June 25, Saturday to August 7, Sunday	French Summer School.
July 1, Friday	Canada Day – Administrative Offices closed.
July 4, Monday to August 12, Friday	Summer Session, Part II.
August 1, Monday	Deadline for applications for Special and Visiting Students
August 8, Monday to August 18, Thursday	Supplemental examination period.
August 15, Monday to September 2, Friday	Freshman Orientation and preregistration counselling.
September 5, Monday	Labour Day – Administrative Offices closed.
September 6, Tuesday	Registration – B.Sc.
September 7, Wednesday	Registration – B.Sc., a.m. B.A., p.m.
September 8, Thursday	Registration – B.A.
September 9, Friday	Registration – B.A. and B.S.W., a.m.
September 12, Monday	Lectures begin in all years of Arts and Science
September 26, Monday to September 30, Friday	Change of course period.
September 27, Tuesday	Late registration.
October 10, Monday	Thanksgiving – Lectures cancelled – Administrative Offices closed.
October 14, Friday	Deadline for withdrawing ("W") from "A" (fall term) courses.
November 8, Tuesday	Fall Convocation.
November 25, Friday	Deadline for withdrawing ("W") from "D" (full year) courses.
December 9, Friday	Last day of lectures in Arts and Science
December 12, Monday to December 16, Friday	Class tests in "D" courses in Arts and Science
December 25, Sunday	*Christmas – Closing of Administrative Offices to be announced.*

CONCORDIA UNIVERSITY LIBRARY

1978

January 1, Sunday	New Year's Day – Closing of Administrative Offices to be announced.
January 3, Tuesday to January 13, Friday	Examinations in fall term courses in Arts and in Science
January 13, Friday	January Registration (for students entering in January ONLY)
January 16, Monday	Winter term lectures begin in Arts and in Science
January 23, Monday to January 27, Friday	Change of course period for "B" (Winter term) courses ONLY.
February 10, Friday and February 11, Saturday	Mid-term weekend holiday (Winter Carnival) – Lectures cancelled.
February 17, Friday	Deadline for withdrawing ("W") from "B" (winter term) courses.
March 24, Friday to March 27, Monday (incl.)	Easter – Lectures cancelled – Administrative Offices closed.
April 14, Friday	Last day of lectures in Arts and in Science.
April 17, Monday to May 5, Friday	Examinations in Winter term and full year courses in Arts and in Science.
May 22, Monday	Victoria Day – Administrative Offices closed.
June 6, Tuesday and June 7, Wednesday	Convocations

1 GENERAL INFORMATION
Faculty of Arts
Faculty of Science

APPLICATIONS AND ADMISSIONS

The Faculty of Arts and the Faculty of Science offer programs leading to the degrees of B.A., B.Sc. and B.S.W.

The academic year at McGill runs from mid-September until early May, with approximately two weeks vacation at Christmas. The normal period of admission is in September, however, it is possible to be considered for admission to certain programs in January, and interested students should contact the Admissions Office in September 1977.

The deadlines for submission of applications are March 1 for admission in September and November 1 for admission in January. All applications must be accompanied by a non-refundable fee of $15.00 payable by certified cheque or money order in Canadian funds made out to McGill University.

Admission is selective, and students are reminded that fulfilment of the minimum requirements by no means guarantees acceptance.

Although our Admissions Officers are always pleased to meet prospective students, a personal interview is not required for admission.

Applicants whose mother tongue is not English, and who have not completed a CEGEP program in the Province of Québec, must submit acceptable evidence of facility in English before an application for admission can be considered. The following evidence is acceptable: the G.C.E. Ordinary and Advanced Level examinations in English literature or composition; the Test of English as a Foreign Language (TOEFL); the University of Michigan English Language test.

TOEFL is preferred by the University; it is administered by the College Entrance Examination Board and is easily available throughout the world. It is the student's responsibility to make the necessary arrangements with the examining board to write the test in the country of residence. Students who cannot obtain a TOEFL bulletin and registration form locally should write well in advance for them to:Test of English as a Foreign Language, Box 899, Princeton, New Jersey 08540, U.S.A.

General Information for Non-Canadian Students

A pamphlet describing immigration regulations in detail and containing notes and guidance to students from other countries is available from Canadian immigration offices, Canadian Embassies and British Consular offices, or from the Immigration Branch, Department of Citizenship and Immigration, Ottawa, Canada. Local immigration officers will be ready to give advice and help.

A useful handbook entitled *University Study in Canada* can be obtained from Canadian Embassies, Consulates, and the office of High Commissioners and Trade Commissioners. A leaflet entitled *Notes for Foreign Students Who Wish to Attend a Canadian University* may be obtained from The Association of Universities and Colleges of Canada, 151 Slater St., Ottawa, Ontario K1P 5N1

Further information may also be found in the McGill University *General Announcement*, available from the Registrar's Office.

Professional Studies

Students intending to proceed into Dentistry, Education, Law, Medicine or Religious Studies should consult the Faculties concerned about their prerequisites for admission. Students proceeding into graduate professional studies should note that admission is not automatic and that application forms must be submitted in advance of the prescribed dates. Requirements needed for admission to the Graduate School of Library Science or the School of Social Work may be obtained from these schools.

ENTRANCE QUALIFICATIONS

Québec Students

Holders of the Diploma of Collegial Studies are considered for admission to the first year of an appropriate three year program (90 credits).

Collegial students should refer to the "Structures d'Accueil aux Etudes Universitaires de Premier Cycle" to ensure that they are registered in an appropriate pre-university program.

Entrance to The Faculty of Arts

Although it is preferable to begin a specialization at CEGEP, the Faculty feels that the basic courses in English and Humanities remain the minimum requirements for many programs.

Students planning to enter Psychology should take Biology 301 and 401 or Biology 921, Mathematics 337 or Mathematics 103 and 307, and Psychology 102 during their CEGEP years.

Entrance to The Faculty of Science

The Québec Diploma of Collegial Studies (D.C.S.) in Pure and Applied Science (or its equivalent) is the normal pattern of preparation for programs in both physical and biological sciences.

Students with a D.C.S. in the Health Science stream are accepted to programs in the biological sciences. Those with a Health Science D.C.S. wishing a program in the physical sciences should also take Mathematics 201-105*.

Physical Sciences: Students who intend to continue their studies in the physical sciences are strongly urged to take Mathematics 201-303* (Calculus III) as part of their CEGEP program.

Biological Sciences: Those proceeding in the biological sciences are strongly urged to take Chemistry 202-202* (Organic Chemistry I), and to select Biology 101-301 and 101-401 as part of their CEGEP program.

NOTE: For students interested in Psychology, Biology 301 and 401 or Biology 921, Mathematics 337 or Mathematics 103 and 307, and Psychology 102 are recommended.

Although the pattern of study described above is strongly recommended, students who have obtained a D.C.S. with a concentration other than Pure and Applied Science or Health Science may be considered for admission.

**CEGEP course numbers – standard throughout the Province of Québec.*

Provinces of Canada Other Than Québec

Entrance to The Faculty of Arts

Ontario Grade 13 students may be admitted to a 90-credit program if they have completed five academic subjects. (6 credits are granted for each subject with the exception of mathematics, each course of which receives 3 credits.) English should be included in the students' program; the four elective courses should be appropriate to the program which the student wishes to enter at McGill. Students having only four subjects will be required to make up an additional six credits at McGill.

Students from provinces of Canada other than Québec, Ontario† and Newfoundland who have completed Grade 12 in appropriate academic subjects may be considered for admission to a program requiring the completion of 120 credits (normally four years of study).

Entrance to The Faculty of Science

All programs in the Faculty of Science require that the student complete the equivalent of introductory college level courses in biology, calculus, chemistry, and physics. Students who have completed these courses with satisfactory performance prior to admission are given credit and/or exemption.

Ontario Grade 13 courses in biology, chemistry, and physics are accepted for exemption and each is allowed 6 credits. Grade 13 courses in mathematics are allowed 3 credits each; students who have included calculus in their program are required to complete Calculus II at McGill unless they pass the Placement Test which may be written at McGill prior to registration. A maximum of 30 credits is allowed for all Grade 13 work. Students planning application to the Faculty of Science should follow a pre-science academic program including mathematics and chemistry prior to Grade 13. A Student who has completed Grade 13 is considered for admission to a program requiring the completion of the difference between 120 credits and the number of credits which have been granted. For students short more than one basic science, this additional deficiency will be added to the calculated minimum credit requirement. Thus, a student who has completed biology, chemistry, physics, two (or preferably three) courses in mathematics and one non-science academic course, all at the Grade 13 level, enters a program requiring the completion of 90 credits.

Students from provinces other than Québec, Ontario † and Newfoundland who have completed Grade 12 with appropriate subjects may be considered for admission to a program requiring the completion of 120 credits (normally four years of study). Students should have completed a course in functions or trigonometry and a course in chemistry at the Grade 11 or 12 level (preferably Grade 12 level). A course in physics is strongly recommended.

NOTE: Applicants to the Faculty of Science from outside Québec who believe they have taken the equivalent of one or more introductory college level science courses but who do not have acceptable certification of their performance in these courses, should inquire at the Admissions Office as to their eligibility to take Placement Examinations at McGill for credit. These examinations may only be written up to the end of the first course change period after the student enters the Faculty. It is recommended the student arranges to take them before Registration if possible.

† *Exceptions are sometimes made in the case of Grade 12 students with an average of over 80% in appropriate subjects. Such students may apply to a program requiring the completion of 120 credits.*

Non-Canadian Applicants

General Information

Students from the United States must write College Entrance Examination Board tests including the Scholastic Aptitude Test and three other achievement tests appropriate to the program which they wish to enter at McGill. Applicants to a science program should select a minimum of two tests from biology, chemistry, mathematics and physics.

Students from the Eastern United States may obtain information about the tests by writing to:

The College Entrance Examination Board
Box 592
Princeton, New Jersey 08540

Students from the West should write:
The College Entrance Examination Board
Box 1025
Berkeley, California 94701

Students from Overseas are advised to write CEEB Aptitude and Achievement tests to support their application.

Entrance to The Faculty of Arts

Students from the United Kingdom and Commonwealth countries may be admitted into a program requiring the completion of 90 credits (three years) with five General Certificate of Education papers in different subjects with three at the Advanced Level. An average grade of C or better with no paper having a grade lower than D is required. One of the five (or four) G.C.E. papers must be English Language.

Students with very good grades in five appropriate Ordinary Level papers PLUS one full year of formal schooling beyond Ordinary Level may be considered for entrance to an undergraduate program requiring the completion of 120 credits (usually four years).

High School graduates from the United States may be admitted to an undergraduate program requiring the completion of 120 credits. All applicants should have followed academic programs designed for university entrance. Students who have passed Advanced Placement examinations in appropriate subjects with a grade of "3" or better will be granted some advanced standing.

Entrance to The Faculty of Science

The three-year programs in the Faculty of Science have been designed on the assumption that the student has completed, or will complete at Mc Gill, the equivalent of introductory college-level courses in biology, chemistry, physics and mathematics.

Students who have completed Grade 12 in the United States are considered for admission to a program requiring the completion of the difference between 120 credits and the number of prerequisite credits they have earned. An Advanced Placement science course is considered the equivalent of 6 prerequisite credits, a grade of "3" or better is required for Advanced Placement credit to be granted. All applicants should have a strong background in mathematics (including a course in trigonometry or functions), chemistry, and physics. Biology is also desirable in the case of a student applying to one of the biological or health science programs.

Students from the United Kingdom and Commonwealth countries are normally required to have completed examinations in five different G.C.E. subjects including English, chemistry, mathematics, and physics, at least two of which must be at the Advanced Level. An average grade of "C" or better, with no more than one subject having a grade of "D", is also required. Each G.C.E. Advanced Level paper in a basic science subject (biology, chemistry, mathematics, physics) with a grade of "C" or better is granted the equivalent of 10 prerequisite credits; a maximum of 30 credits can be granted for Advanced Level results (a maximum of 10 credits is granted for papers in mathematics). Such students are considered for admission to a program requiring the completion of the difference between 120 credits and the number of prerequisite credits they have earned. For students short more than one basic science, this additional deficiency will be added to the calculated minimum credit requirement.

Students with very good grades in five appropriate Ordinary Level papers PLUS one full year of formal schooling beyond Ordinary Level in a suitable academic program at a recognized school or college may be considered for entrance to an undergraduate program requiring the completion of 120 credits. The five Ordinary Levels should include English, a second language, mathematics, and one of biology, chemistry or physics.

NOTE: Applicants to the Faculty of Science from outside Québec who believe they have taken the equivalent of one or more introductory college-level science courses, but who do not have acceptable certification of their performance in these courses, should inquire at the Admissions Office as to their eligibility to take Placement Examinations at McGill for credit. These examinations may only be written up to the end of the first course change period after the student enters the Faculty. It is recommended the student arrange to take them before Registration if possible.

Students From Other Countries

Students from other countries are advised to consult the General Announcement or the Admissions Office for specific information of the status of their national education certificates.

TRANSFER STUDENTS FROM OTHER UNIVERSITIES

McGill University accepts applications from students wishing to transfer from other universities. At least sixty credits towards graduation must be earned at McGill for students proceeding to the B.Sc. degree; at least forty-five McGill credits are normally required for the B.A. degree.

Such applications are considered when the student's cumulative grade point average (CGPA) is 3.0 or higher, and when the course background suits the intended program at McGill.

MATURE STUDENT ADMISSION POLICY

Residents of Canada who will be 23 years of age or older by September 1 (for admission to the Fall Session) or January 1 (for admission to the Winter Session) and who lack the academic background normally required for admission may apply for entrance as mature students.

Individuals interested in being considered for entrance under this policy should contact the Admissions Office for further information.

HOLDER OF A BACHELOR'S DEGREE

Students wishing to obtain a B.A. degree who already have a Bachelor's degree will, if admitted, be required to complete a minimum of 60 credits for the second degree. For students wishing a B.Sc. degree, the minimum is 60 credits plus completion of any basic science courses (Biology, Chemistry, Mathematics, Physics) not previously taken.

SPECIAL AND VISITING STUDENTS

A student seeking admission as a Special or Visiting student in the Faculty of Arts or of Science should refer to page 13.

READMISSION

A student wishing to return to the Faculty of Arts or Faculty of Science after an absence of a portion of an academic year or more must follow the procedures outlined in the section on Faculty Regulations, page 13.

INTER-FACULTY TRANSFER

In certain cases students will be permitted to transfer from another Faculty to Arts or to Science. Information and inter-faculty transfer forms are available at the Office of the Associate Dean.

FINANCIAL INFORMATION

The University reserves the right to make changes without notice in the published scale of fees.

Fees for the semester in which a student withdraws from the University are refundable under conditions described in the *General Announcement.*

Any inquiries regarding fees should be made at the Registrar's Office, F. Cyril James Administration Building.

FEES

Tuition fees of $19.00 per credit are charged. For example, a student who is taking an academic load of 30 credits would pay $570.00 in tuition fees ($19.00 x 30). Tuition fees vary according to the number of credits taken and are assessed on a term basis. Student Services and Students' Societies fees for all students taking 24 or more credits are $70.00 and $28.00*.

*B.S.W. students pay $30.00 for Students' Societies.

Part-Time, Special and Visiting Students

All Part-Time, Special and Visiting Students are assessed $19.00 per credit. In addition the following fees are assessed:

	Student Services	*Student Societies*
9-11 credits per term	$35.00	$14.00
6-8 credits per term*	$20.00	$ 5.00
5 credits or less*	$10.00	$ 5.00

**Excludes Athletics. At the discretion of the Director of Athletics, a student may participate in the Athletics program upon payment of an additional $30.00.*

Special Fees

Application for Admission	$15.00
Late Registration	25.00
Late Payment fee (after specified date):	
1st 30 days	10.00
After 30 days	25.00
Graduation (including academic dress for those *in presentia)*	15.00
Duplicate Student Identity Card	5.00
Duplicate diploma	10.00
Certified transcript of student's record:	
First copy with each order	2.00
Additional copies made at the same time, each	.50
Re-reading examination paper	10.00
Supplemental examinations, each paper	10.00
Late change of course	5.00
Residence fees (see General Announcement)	

REGULATIONS FOR PAYMENT OF FEES

New Students

Fees are payable in two instalments. Students entering the University for the first time are required to pay their first instalment either by mail or in person at the Accounting Office within 10 days of registration. For students registering in September the second instalment is due before January 15th.

Returning Students

Returning students must pay one half of the total required fee by mail or in person to the Accounting Office before August 19th, 1977, otherwise they will not be permitted to register. Instructions for paying fees in advance will be mailed to all returning students, either with their Sessional Reports of Standing or a short time later. Students who have been notified by the University of the award of a scholarship, bursary or student loan, and who require this award for payment of the first instalment of fees,

must obtain permission to delay payment of fees from the Student Aid Office.

The second instalment is due by January 15th, 1978. A late payment fee as stated above is charged for payment after this date.

Late Registration

Students registering late must pay their fees at the time of registration.

As soon as possible after the prescribed dates for the payment of fees the Chief Accountant will send to the Registrar's Office a list of the registered students who have not paid their fees. Reports of Standing, transcripts of records and diplomas will be withheld until such time as the fees are paid or a satisfactory arrangement is made with the Chief Accountant.

SCHOLARSHIPS AND FINANCIAL AID

Full information concerning scholarships and financial aid is available in the *Undergraduate Scholarships and Awards Announcement* which may be obtained from the Registrar's office.

STUDENT SERVICES AND RESIDENTIAL FACILITIES

A variety of student services and residence accommodation, co-educational and for women, are available. For details see the General Announcement available from the Registrar's office.

REGISTRATION

GENERAL INFORMATION

Registration takes place early in September for students entering in September and in January for students entering in January; lectures begin shortly thereafter. Complete information for the use of newly accepted candidates is sent with the letter of admission, and is specified on the Report of Standing for returning students eligible to re-register.

Incoming students in programs requiring 96 or fewer credits who have made their choice as to area of study may proceed directly to the appropriate Academic Adviser for completion of a Study Plan Form before registration (see page 13, 14, Faculty Regulations.) Students who have not decided on their area of study or who are seeking additional advice should first consult an adviser in the Student Affairs Office, Dawson Hall, for guidance. Students admitted to a 97 to 120 credit program will, in most cases, be assigned to an adviser in the Office of the Associate Dean for completion of a Study Plan Form before registration.

Students must come to the specified place for registration at the appropriate date and time, and must bring with them the following:

Returning Students:
- Report of Standing (if the student is returning in satisfactory or probationary standing);
- if applicable, a permission to register form and/or deferred or supplemental results;
- letter of readmission;
- student I.D. card;
- approved study plan form.

New Students:
- letter of admission;
- approved study plan form.

TIMETABLE

An official lecture timetable is available before and at registration. A preliminary version of the timetable (omitting lecture locations) is available at the time of publication of the *Announcement.*

It is the responsibility of each student to make sure at the time of registration that there is no conflict in the timetable of courses which he proposes to follow and to obtain sectioning cards for all courses listed in the timetable as requiring them.

Students arriving late for lectures may be denied entrance by the instructor.

LATE REGISTRATION

There will be a period of registration for those unable to register at the stipulated time. (See Calendar of Dates, page 3). There will be a late registration fee of $25.00.

COURSE NUMBERING SYSTEM

Courses are given a 7 place designation. The first three digits specify the department by a numerical code (see table below), the next three digits form the course number proper, and the final letter indicates the term or terms during which the course is offered; most courses follow this pattern:

A – Fall term
B – Winter term
D – Full session
G – Summer session and Fall term
J – Winter term, Summer session, and Fall term
L – Summer session, Part I
C – Summer session, Part II

To illustrate: 189-223A designates Mathematics (189) course 223 given in the Fall term; 180-222A, B denotes Chemistry (180) course 222 given in either the Fall or Winter terms; 204-201D designates Psychology (204) course 201 given over the full session; 183-499G denotes Geography (183) course 499, a field course which begins in the Summer session and ends in the Fall term; 186-231J denotes Geological Sciences (186) course 231, a

field course which begins in the Winter term, continues through the Summer session and ends in the Fall term.

DEPARTMENTAL CODES

101 – History
102 – Comparative Literature
104 – Linguistics
107 – Philosophy
110 – English
111 – African Studies
112 – East Asian Studies
114 – Classics
117 – East Asian Languages and Literature
123 – Art History
125 – French (formerly 126)
127 – French Language Centre
129 – German
132 – Italian
135 – Jewish Studies Program
141 – Russian and Slavic Studies
144 – Hispanic Studies
151 – Anthropology
154 – Economics
157 – Centre d'Etudes Canadiennes-Françaises
160 – Political Science
166 – Sociology
177 – Biology

507 – Biochemistry
516 – Experimental Medicine
528 – Microbiology and Immunology
546 – Pathology
549 – Pharmacology
552 – Physiology

FACULTY REGULATIONS

GENERAL INFORMATION

Arts

The Faculty of Arts offers Major and Honours programs in a wide range of fields as well as a series of interdisciplinary majors. In cooperation with the Faculty of Science, B.A. Faculty Programs are also offered in four areas. (See page 19, 20).

In a Major Program, 54 credits must normally be approved as part of that program, and the student may select his or her remaining courses from the offerings of the Faculties of Arts and of Science.

Honours programs involve a high degree of specialization, and require the student to satisfy specific departmental Honours requirements while maintaining a good academic standing. Joint Honours programs are available in many related disciplines. Consult departmental listings.

Students may take for elective credit any course described (except where otherwise indicated) in the Announcement of the Faculties of Arts and of Science subject to course restrictions, see page 11. In certain cases, a student is permitted to chose an elective course from another Faculty, e.g. Education, Management, etc. Approval of the Academic Adviser and, in some cases, the Associate Dean is necessary.

Science

There are three types of programs: Faculty Programs, Major Programs and Honours Programs.

A Faculty Program is an approved coherent selection of courses giving the student a useful concentration in a recognized area. Three-fifths of the student's course load in a Faculty Program is specified, the remaining courses being freely elected from those offered in the Faculties of Science and of Arts. A student in a Faculty Program may thus choose a pattern of study which can range from one yielding a broad education to one specializing in particular interests.

Major Programs are more specialized than Faculty Programs, and are usually centred around a specific discipline or department. Between three-fifths and four-fifths of the course load is specified in the program and the student is free to elect the remaining courses from the offerings of the Faculties of Science and of Arts.

Honours Programs require the student to maintain academic performance at a high standard in addition to involving a very high degree of specialization. They are designed for those students wishing an intensive preparation for graduate studies.

Students may take for elective credit any course described (except where otherwise indicated) in the Announcement of the Faculties of Arts and of Science subject to course restrictions, see page 11. In addition, 6 credits of elective courses from Faculties other than Science and Arts which are not described in this Announcement may be chosen in any one period from September through August, to a maximum of 18 credits in their degree program. Students must have the necessary prerequisites and permission of the instructor. It is the responsibility of the student, in cases of potential overlap of material between a course for which he has already received credit and a course he or she proposes to

take, to determine from the Office of the Associate Dean whether or not additional credit can be obtained for the proposed course.

GRADUATION

The student must complete Faculty and Program requirements in order to graduate. It is the responsibility of the student to ensure that he or she has met all Faculty requirements before graduation. Each student should check with his or her Adviser early in the graduating year if he or she has any questions about whether he or she will meet all program requirements by graduation time.

It is essential that students indicate the expected date of graduation on the registration card in the final year and verify this date on the course cards and verification forms. The Student Affairs Office should be notified immediately when a final year student changes the expected date of graduation.

Faculty Requirements

The minimum credit requirement of each student for his or her degree is determined at the time of acceptance and is as specified in the letter of admission. In addition to completing the minimum credit requirement, each candidate for a degree must have achieved a minimum CGPA of 2.0. The minimum residency requirement for a B.A. degree is 45 credits and for a B.Sc. degree is 60 credits.

Note: In the case of certain students in the Faculty of Science, specified basic science requirements (biology, chemistry, mathematics, physics) must be fulfilled as indicated in the letter of acceptance.

Departments may recommend to Faculty that a student be awarded Honours or First Class Honours under the following conditions: that the student complete all requirements imposed by the department, and that the CGPA at graduation be 2.8 to 3.49 for Honours and 3.5 or better for First Class Honours. Some Honours programs have additional requirements which must be met before a student is recommended for Honours or First Class Honours (see the departmental entries).

Students in a Major or Faculty program who complete at least 60 credits at McGill and graduate with a CGPA of 3.5 or better will be awarded their degrees with "Great Distinction"; those with a CGPA between 3.3 and 3.49 will receive their degrees with "Distinction."

Program Requirements

To fulfill the requirements of a Faculty, Major or Honours Program, a student must pass all required courses in his or her program with a grade of C or better.

A student who has failed to obtain a satisfactory grade in a course required in his or her program must either pass the supplemental examination in the course (if available) or repeat the course. If the course is taken as an option in his or her program, the student may choose to replace it with another option.

The mark achieved in the repeated course or attempted supplemental will count into the GPA and the CGPA, together with the original mark. However, if the student achieved a "D" in the original course, and thus already received credit for the course, he or she will not receive additional credit for passing the course again.

A student may choose to substitute another course for one in which he or she has received a grade of "F", "J" or "D" under the following guidelines: In the case of a required course in a program, specifically designated by course number, substitution will be allowed only in special cases, and the student should consult his or her Adviser. An optional course within a program may be replaced only by another option. (If a student chooses to substitute another option for a course in which he or she has received a grade of D, credit for the first course will still be given but as an elective.)

COURSE RESTRICTIONS

Students in the Faculties of Arts and of Science are permitted to take for credit any courses described in this Announcement unless otherwise indicated and subject to the general rule that no course so taken may duplicate substantially any other course for which the student receives credit. Prerequisites and other kinds of restricting information are stated in each course description and/or in the general department entry.

Other restrictions include courses that require the permission of the instructor because of space limitations or because the course is normally open only to students in a particular program or to Honours students.

No credit at McGill will be given to a student repeating the material contained in a course already passed at CEGEP or another university.

GRADING AND CREDIT SYSTEM

All courses carry a credit rating indicated beside the course title in the Announcement listing.

Courses are graded either by letter grades or in percent with the following correspondences: A (80–100%), B (65–79%), C (55–64%), D (45–54%), F (0–44%). All reports of standing, verification forms, transcripts and other documents will show both letter grades and reported percentage grades. Grades A, B, C are termed satisfactory passes, D a conditional pass and F a failure. Certain courses have been approved for Pass/Fail (P/F) grading.

Although the grade of D is a passing grade, a grade of C or higher (Satisfactory Pass) must be achieved in all courses specified as required courses for an Honours, Major or Faculty Program. Moreover, no student may register for a course for which he or she has not passed all the prerequisite courses with a grade of C or better, except by permission of the instructor concerned.

Numerical equivalents of 4,3,2,1, 0 are attached to the grades of A, B, C, D, F respectively. The earned grade point for each course is calculated by multiplying the credit rating of the course by the numerical equivalent of the letter grade earned. Standing will be determined on the basis of a grade point average ((GPA) computed by dividing the sum of the grade points accumulated during the year by the total course credits attempted.

The cumulative grade point average (CGPA) will be the grade point average calculated using the student's entire record at McGill in a degree program. Grades of D or F continue to be used in the calculation of the CGPA even after the course is repeated or a supplemental examination is taken.

Example: A new student has taken the following courses and receives the indicated grades:

	Credits	*Mark*	*Grade*	*Grade Points*
Art History 123-315D	6	77%	B	18
Chemistry 180-212A	4	62%	C	8
English 110-314A	3		A	12
Geography 183-315B	3	50%	D	3
History 101-328B	3	42%	F	0
Philosophy 107-420D	6		A	24
Psychology 204-211D	6	78%	B	18
	31			83

$$\text{Sessional GPA} = \frac{83}{31} = 2.68$$

Supplemental Examination				
History 101-328B	3		C	6
Total	34		Total	89

$$\text{CGPA} = \frac{89}{34} = 2.62$$

Transfer Credits

In certain cases, credit may be granted by Faculty for courses taken at other universities. Approval by the Associate Dean is necessary and should be obtained in advance of taking the course. It is the student's responsibility, on completion of course(s), to ensure that transcripts from the other University are sent to the Associate Dean of the appropriate faculty, Dawson Hall.

NOTE: Grades for transfer courses are not entered on the student's McGill transcript and are not included in the calculation of the GPA or CGPA.

ACADEMIC STANDING

Satisfactory Standing

A student enters the University in satisfactory standing and remains in this standing unless his or her GPA for any year drops below 2.0.

Probationary Standing

A student whose GPA drops to between 1.5 and 1.99 (1.2 and 1.99 for the entering year) is placed in probationary standing.

A student in probationary standing must return to satisfactory standing at the end of the next academic year by obtaining a GPA of 2.5 or CGPA of 2.0, otherwise he or she will be placed in unsatisfactory standing.

Unsatisfactory Standing

A GPA of less than 1.5 (1.2 in the first year if the student enters U1) places a student in unsatisfactory standing.

Students in unsatisfactory standing may not reregister in the Faculty without special permission. They may be readmitted after appealing to the Committee on Student Standing and considered in probationary standing for the next academic session. A student in unsatisfactory standing for the second time must withdraw permanently.

Honours

To be registered in an Honours program after first year, a student must have attained a GPA and CGPA of at least 2.8 in the previous year, unless the student has special permission from his or her Department and the Associate Dean. Departments may impose additional Honours requirements. These, where applicable, will be found with the departmental Honours program descriptions.

STUDENT CATEGORIES AND COURSE LOADS

Degree Candidates

The normal course load per term is 15 credits. Students in satisfactory standing may take up to 17 credits per term. A load of up to 19 credits per term is permitted students whose GPA is above 3.0.

Students in probationary standing take a maximum of 12 credits per term, except that they may add to this load a repeated course in which a grade of D, J or F was originally obtained.

Students who wish to carry fewer than 12 credits per term are considered to be part-time and must consult the Office of the Associate Dean, Dawson

Hall. Certain programs must be completed within a specified number of years; such information is available from the Departments concerned and from the Office of the Associate Dean.

Special Students

A special student takes regular credit courses, but is not working towards a degree. This status normally requires a student to hold an undergraduate degree and to have an approved plan of study. Applications must be made at the Office of the Associate Dean, Dawson Hall, before August 1. Special student status may be granted only for a limited period of time.

Visiting Students

A visiting student is one who is taking courses at McGill for credit towards his or her program at another university. Applications must be made at the Office of the Associate Dean, Dawson Hall, before August 1. Visiting student status may be granted for a maximum of one year.

STUDENT RECORDS

Personal Information

It is important that every student keep his or her official record up to date.

Any change or correction in name, home address and telephone number, Montreal address and telephone number should be reported to the Office of the Associate Dean, Dawson Hall, as soon as possible.

Verification of Program

Each student is responsible for his or her registration in the proper courses and programs and is expected to pick up his or her verification form at the Office of the Associate Dean, Dawson Hall in October and February (exact dates will be announced during the change of course periods). It is the student's responsibility to check the verification form for errors and return it, signed, to the Office of the Associate Dean, Dawson Hall.

Students who expect to graduate in January or June of the current academic year or November of the following academic year should check that the expected date of graduation on the form is correct.

TRANSCRIPT OF ACADEMIC RECORD

Certified transcript(s) of a student's academic record may be obtained by applying to the Registrar's Office, F. Cyril James Building. Transcripts are not available from the Office of the Associate Dean, Dawson Hall. A student may, however, photocopy his or her verification form before returning it during a verification period (see above), for use as an unofficial academic record.

All courses taken at McGill and all results (both letter grades and reported percentage grades) obtained appear on the transcipt.

The following is an explanation of the symbols used:

A, B, C		satisfactory pass
D	–	conditional pass
F	–	failure
P	–	pass
K	–	incomplete.
KF	–	failed to meet the extended deadline for submission of work in a course; counts as a failure in the GPA and CGPA.
KK	–	not required to complete course.
K*	–	further extension granted.
J	–	absent; the student is registered for a course but does not write the examination or do other required work. The J will be calculated as a failure in the GPA and CGPA.
W	–	withdrew; a course dropped, with permission, after the change of course period. Does not enter into the GPA calculation.
WF	–	withdrew failing; a course dropped, with special permission after Faculty deadline for Withdrawal from Course. The student's performance in the course at that stage being on the level of an F. Does not enter into GPA calculation.
L	–	deferred examination.
L*	–	permitted to defer examination for more than the normal period.
WL	–	Faculty permission to withdraw from a deferred examination.
Q	–	Course continued in next term.
&&	–	Grade not yet available (no averages calculated).
--	–	No grade – student withdrew from the University.

NOTE: Although students register in only one program, some students may also complete the courses required in a second program. Recognition of this situation on the final transcript of such a student is possible in the form of a notation that the student has also completed the second program. A student wishing to arrange for this recognition on his or her transcript should consult the Office of the Associate Dean before registering for the final year.

ADVISERS

It is essential that each student consult with an adviser in the Office of the Associate Dean, Dawson Hall and/or in a Department and complete a study plan form before registration, as explained below:

General Counselling

General program and course information is available at the Office of the Associate Dean. Students

who are undecided as to their program or who may wish to change programs may consult a counsellor at Dawson Hall or may seek further information from a department in their general area of interest. The student will subsequently be referred to an Academic Adviser (see below) for approval of his or her program and completion of a study plan form before registration.

Academic Advisers

Each program has appointed Academic Advisers who will meet with students and approve their programs by signing the study plan form in Honours, Major and Faculty programs. (See the departmental listings for their names and/or locations).

When meeting with an Academic Adviser, every student should bring:

- Report of Standing (if the student is returning in satisfactory or probationary standing);
- if applicable, a permission to register form and/or deferred or supplemental results;
- letter of admission or re-admission.

All students should consult this Announcement and the lecture timetable before this meeting and should bring these documents with them.

New Students

Students admitted to a program requiring 96 or fewer credits must consult an Academic Adviser and must present their transcripts and letters of admission to facilitate program planning.

A Students admitted to a program requiring 97-120 credits will normally be considered in a Freshman Program until they complete their first year and must consult an adviser in the Office of the Associate Dean, Dawson Hall (telephone 392-5084) to obtain advice and complete a study plan form before registration.

SPECIAL TERMS APPLIED TO COURSES

Required Course: A course which, if satisfactorily passed, will be counted as completing part of the credit total constituting the student's program.

Option: A course or sequence of courses that may be selected as part of an Honours, Major or Faculty program.

Elective: A course which a student selects to fulfill part of the credit requirements for his or her degree but which is not counted as part of the Honours, Major or Faculty program in which he or she is registered (See page 10. General Information for elective courses outside the Faculties of Arts and of Science; also page 11, Course Restrictions).

Prerequisite: Course A is prerequisite to course B if a satisfactory pass in course A is required for admission to course B.

Corequisite: Course A is corequisite to course B if course A must be taken concurrently with (or prior to) course B.

Linked Courses: Two one-term courses where no credit will be given for either course unless both are taken.

CHANGE OF COURSE

Students who wish to change a course (change from one course to another, add a course, drop a course) for which they are registered must obtain change of course cards from the Office of the Associate Dean within the change of course period. Such changes must not introduce conflicts in the timetable nor destroy the required sequence of courses and must be approved by the instructor of any new course added and by the Honours, Major or Faculty program adviser.

Change of Course Period *

A courses (fall term) – Monday, September 26 to Friday, September 30, 1977.
D courses (full year) – Monday, September 26 to Friday, September 30, 1977.
B courses (winter term) – Monday, January 23 to Friday, January 27, 1978.

**Students who wish to change a course after the change of course period may apply to the Office of the Associate Dean until October 7, 1977 for "A" and "D" courses, and February 3, 1978 for "B" courses and must pay a fee of $5 for each change. After these dates no change of course will be allowed.*

Change of Section

Many courses with large enrolments are given in several sections at different times. For any change of section within the same course, the Department concerned should be consulted. Such changes need not be reported to the Associate Dean's office, Dawson Hall.

WITHDRAWAL FROM COURSE

Withdrawal from a course after the change of course period will be allowed (the student must apply at the Office of the Associate Dean) up to the following dates:
A courses (fall term) – Friday, October 14, 1977.
D courses (full year) – Friday, November 25, 1977.
B courses (winter term) – Friday, February 17, 1978.

The transcript will show the course with the symbol of W, but the course will not be counted in the GPA.

After the deadline listed above, the Associate Dean may, under exceptional circumstances, grant permission for a student to withdraw from a course. (Permission will not be granted merely because a

student is doing unsatisfactory work). W or WF as appropriate will appear on the transcript, but will not be calculated in the GPA.

LANGUAGE POLICY

The language of instruction at McGill is English. Students may if they wish write term papers and answers to examinations in French (except in the case of certain language and literature courses), but competence in English is essential to success at the University. It is recommended that students who lack fluency in English take a course in English as a second language at McGill's Summer Session or elsewhere before embarking on a university program of studies.

There are no language requirements in either faculty. English-speaking Québec students are encouraged to develop proficiency in French.

Language Policy For Professions

Québec law now requires that candidates seeking admission to provincially-recognized professional corporations must possess a working knowledge of the French language, i.e. be able to communicate verbally and in writing in that language.

To demonstrate this capability, a candidate will normally be required to pass an examination set by the Régie de la langue française, unless he or she can show that three years of instruction in a French post-primary school have been completed. The professional corporation will require this proof of attendance or of successful completion of the Régie examination.

EXAMINATIONS

Students will be informed, by the end of the change of course period, of the evaluation method to be used in each course.

No student will be permitted to write an examination in any course unless he or she has fulfilled the requirements of the course to the satisfaction of the instructor and the Associate Dean. Once a student has presented himself or herself for an examination or test, he or she must submit all written work to the invigilator before leaving.

Students are reminded that cheating in an examination is considered a serious offence which could lead to expulsion from the University.

Class Tests

Members of the teaching staff may from time to time give interim class tests if they think them necessary.

Final Examinations

Formal final examinations are held during an examination period following the term in which the course is given. In some courses there is no final examination; standing in these courses is determined on the basis of term work and class tests.

Instructors are not permitted to grant any special treatment regarding examinations to any student. If a student believes there is some circumstance which might be legitmately taken into account in evaluating his or her performance, he or she should apply to the Associate Dean.

A student who is not present for an examination must clarify his or her status in the course at the Office of the Associate Dean and may be allowed to write a supplemental examination. If the absence is for an accepted reason such as illness, family affliction, etc., permission may be granted to write a deferred examination. If deferred status is not granted, he or she will receive a grade of "J" in the course which will count as a failure in the GPA and CGPA, but may be allowed to write a supplemental examination.

It is the responsibility of the student to confirm the date, time and place of the examination. No student will be allowed to enter an examination after the first half hour.

NOTE: Students enrolled in courses in Faculties other than Arts or Science must confirm examination dates with those Faculties.

Supplemental Examinations

There is a supplemental examination period during the month of August. A student may receive permission to write supplemental examinations, if available, in courses in which he or she obtained a D or an F. He or she should avail himself or herself of this privilege at the time of the next supplemental examination period. The supplemental result will not erase the D or F originally obtained which is used in calculating the GPA. Both the original mark and the supplemental result will be calculated in the CGPA (i.e. the taking of a supplemental examination has the same effect on a student's CGPA as does repeating the course).

Written application to write a supplemental examination must be received at Dawson Hall before July 1. Special permission is required if a student wishes to write supplementals totaling more than 7 credits. A fee of $10.00 for each supplemental paper is payable at the time of application.

It may be possible for a student to arrange to write a supplemental examination at certain specified locations other than McGill University; students should apply at the Office of the Associate Dean. There is an additional fee.

In certain cases, a student may be permitted to write one supplemental examination during the April-May examination period in a first term course in which he or she has obtained a D or an F, if the course is also given in the second term. No attempt is made to avoid conflict between this supplemental and the student's required final examinations, and in the case of such a timetable conflict the student will be required to write the final examination and postpone the supplemental to the August period.

Depending on the course, the supplemental result may or may not include the same proportion of class work as did the original grade. The instructor will announce the arrangements to be used for the course early in the term.

Deferred Examinations

A student who, for reasons such as illness or family affliction, verified and accepted by the Associate Dean's Office, has been unable to write one or more examinations, may receive permission to write deferred examinations in their stead which will normally be written in the next supplemental examination period. The Associate Dean's Office must be informed within one week of the examination of the reasons for absences. If the request is approved, an "L" will appear on the Report of Standing in place of a grade in such courses, followed by the grade obtained in the deferred examination after it has been written.

Reassessments and Rereads

Papers are marked and grades calculated and handled with considerable care. However, if a student wishes the calculation of his or her marks checked (reassessment) or a formal final examination paper re-read, he or she should apply in writing to the Office of the Associate Dean, Dawson Hall.

Reassessment is done free of charge. If there is no change in the grade as a result of a reassessment, and if there is a formal final examination in the course, the student may then apply for a re-read of the final examination paper, for which there is a $10 fee. The fee will be refunded if an error is found in the student's favour. If the result is a lower mark, the lower mark will stand and there will be no refund. Computer-marked exams can be reassessed but not re-read.

Application for reassessments must be made by March 30 for A courses, and by August 2 for B and D courses. Requests for reassessments or re-reads in more than one course will not be permitted.

Any request to have term work re-evaluated must be made directly to the professor concerned.

Credit by Examination

In certain exceptional cases a student may apply to write a final examination in order to obtain credit in a course for which he or she has not registered (this is possible only in those courses where there is no other assessment except the final examination).

Special Facilities

Students with visual or other disabilities should consult the Office of the Associate Dean about the possibility of special examination facilities.

INCOMPLETE COURSES

If, in the instructor's opinion, there is sufficient reason to permit a delay in the submission of required term work, an extension of deadline of up to four months after the end of the course may be granted the student. In this case, the instructor will submit a grade of "K" (incomplete). If a new grade is submitted within the deadline by the instructor, this will appear on the student's Faculty reports and verification forms following the K and will replace the K on the student's official transcript.

If the required work is not completed before the deadline the grade of KF will be recorded in the same way as the grade above. (KF denotes a failed course and has the same effect on the GPA as an F).

In exceptional circumstances, and with the approval of the Associate Dean, the four month deadline may be extended further, in which case the grade of "K*" will appear.

A student who has not, without accepted excuse, participated or written the final examination in a course for which he or she has registered may be given a grade of J (absent). In the calculation of the GPA, this is treated as an F.

PLAGIARISM

In submitting work in their courses students should remember that plagiarism is considered to be an extremely serious offence. If a student has any doubt as to what might be considered "plagiarism" in preparing an essay or term paper, he or she should consult the instructor of the course to obtain appropriate guidelines.

WITHDRAWAL FROM THE UNIVERSITY

The responsibility for initiating withdrawals rests solely with the student. Neither notification of the course instructors nor discontinuance of class attendance will suffice. A student who wishes to withdraw officially from the University during the academic year must secure permission from the Office of the Associate Dean. The appropriate form will be supplied. A student considering withdrawal is strongly urged to consult his or her Academic Adviser before making a final decision.

The date on which a student's withdrawal is approved by the Office of the Associate Dean is the official date of withdrawal, even if he or she stopped attending lecturers earlier. Fees are refundable under conditions outlined in the *General Accouncement*.

READMISSION

A student who has withdrawn from his or her Faculty or who has not re-registered for a term or more must make application in writing to the Associate Dean

(not to the Admissions Office) to be readmitted, stating the reasons for his or her absence from the University and giving a summary of his or her activities during that period.

Students who withdrew because of illness should provide some indication that they are ready to resume studies.

SUMMER SESSION

The Summer Session consists of two parts: Summer Session Part I held in May and June, and Summer Session Part II, in July and August. Each Session has in turn been divided into two "terms" in order to distinguish between full courses (6 credits) which will run the length of the six week session and half courses (3 credits) which will be held over a period of three weeks. Please consult the *Sumer Session Announcement* for term and examination dates.

Please note that courses taken during the Summer Session(s) by students registered in the degree program are considered in the same way as courses taken during the regular session, and that they enter into the calculations of the students GPA, CGPA, credit total and standing.

Full information concerning course offerings, applications, and requirements may be obtained from:

Summer Session Office,
McGill University,
F. Cyril James Building,
845 Sherbrooke St. West,
Montreal, P.Q. Canada,
H3A 2T5.
(514) 392-6740.

ENVIRONMENTAL STUDIES

Programs in Environmental Studies are in the process of being developed. Students who wish further information should consult the Student Affairs Office.

2 FACULTY OF ARTS

ADMINISTRATIVE OFFICERS

University

ROBERT E. BELL, C.C., B.A., M.A.(U.B.C.), Ph.D.(McG.), D.Sc. (U.N.B., Laval, Montr.) LL.D.(Tor.), D.C.L.(Bishop's), F.R.S., F.R.S.C.
Principal and Vice-Chancellor

EIGIL PEDERSEN, B.A.(Sir G. Wms.), M.A.(McG.), Ed.D.(Harv.) **Vice-Principal (Academic)**

LEO YAFFE, B.Sc., M.Sc.(Man.), Ph.D.(McG.), F.C.I.C., F.A.P.S., F.R.S.C.
Vice-Principal (Administration)

ALLAN McCOLL, D.F.C., B.Com.(McG.), C.A.
Vice-Principal (Finance)

E.J. STANSBURY, M.A., Ph.D.(Tor.)
Vice-Principal (Planning)

W.F. HITSCHFELD, B.A. Sc.(Tor.), Ph.D.(McG.) F.R.(Met S.) **Vice-Principal (Research)**

L.E. LLOYD, B.Sc., M.Sc., Ph.D.(McG.)
Vice-Principal (Macdonald College)

COLIN M. McDOUGALL, D.S.O., B.A.(McG.)
Secretary-General

JEAN-PAUL SCHULLER, B.A.(Ott.) **Registrar**

Faculty

ROBERT VOGEL, B.A. (Sir G. Wms.), M.A., Ph.D.(McG.) **Dean of the Faculty of Arts**

D.C. FRYE, B.A., M.A.(N.Y.U.), Ph.D.(Wis.)
Executive Assistant to the Dean of the Faculty of Arts

L.T. DUER, B.A.(Johns H.), M.A.(Conn.), Ph.D.(Dub.)
Associate Dean of the Faculty of Arts

ISOBEL OSWALD, B.A.(McG.)
Associate Secretary of the Faculty

KYRA EMO, B.Sc.(McG.)
Coordinator Academic Affairs

LOUISE W. SMITH, B.A. (Carleton, Minn.), M.A. (Harv.) **Recorder**

ANGELINE LUCAS **Senior Adviser**

LILA WILLIS **Senior Adviser**

PROGRAM INFORMATION

The Faculty of Arts offers the Bachelor of Arts (B.A.) and the Bachelor of Social Work (B.S.W.) degrees.

DEPARTMENTAL MAJORS

The following majors are described in detail in the departmental entries in the Announcement.

ANTHROPOLOGY
ART HISTORY
CLASSICS
ECONOMICS
ENGLISH
FRENCH
GEOGRAPHY
GERMAN
HISTORY
ITALIAN
JEWISH STUDIES
LINGUISTICS
MATHEMATICS
PHILOSOPHY
POLITICAL SCIENCE
PSYCHOLOGY
RELIGIOUS STUDIES
RUSSIAN
SOCIOLOGY
SPANISH (see HISPANIC STUDIES)

B.A. INTERDISCIPLINARY MAJORS

AFRICAN STUDIES
CANADIAN STUDIES
CENTRE D'ETUDES CANADIENNES FRANÇAISES
CENTRE FOR EAST ASIAN STUDIES
CLASSICS AND LINGUISTICS
HISTORY AND PHILOSOPHY OF SCIENCE
HUMANISTIC STUDIES
INDUSTRIAL RELATIONS
LATIN AMERICAN STUDIES
MIDDLE EAST STUDIES
MODERN LANGUAGES
MODERN LITERATURE
NORTH AMERICAN STUDIES

For further information on the above, consult the alphabetical listings in this Announcement.

B.A. HONOURS

The following Honours programs are described in detail in the departmental entries in this Announcement:

ANTHROPOLOGY
ART HISTORY
CLASSICS
EAST ASIAN STUDIES
ECONOMICS
ENGLISH
FRENCH
GEOGRAPHY
GERMAN
HISTORY
HISTORY AND PHILOSOPHY OF SCIENCE
ITALIAN
JEWISH STUDIES
LINGUISTICS
MATHEMATICS
MIDDLE EAST STUDIES

PHILOSOPHY
POLITICAL SCIENCE
PSYCHOLOGY
RELIGIOUS STUDIES
RUSSIAN
SOCIOLOGY
SPANISH (see HISPANIC STUDIES)

JOINT HONOURS

Joint Honours programs are available in many related disciplines. Please consult departmental listings.

B.A. FACULTY PROGRAMS

MATHEMATICS AND COMPUTER SCIENCE

Mathematics 189-222A,B, 223A or 245A,B, 315A,B, 317A, 318A,B, 323A,B, 324A,B, 327B, 328B; Computer Science 308-200A,B, 210A,B, 300A,B or 302A, 315A,B, plus 9 credits from Computer Science, plus 6 credits selected in consultation with the Adviser from any other computer science or mathematics course at the 300 level or above.

54 credits; consult the Mathematics Department for an Adviser.

MATHEMATICS AND PHILOSOPHY:

Mathematics 189-217A; 218B; 245A,B; 318A, 328B; 348A, 349B; One of Mathematics 189-222A,B, 314A,B, 323A,B, 324A,B; Three additional credits in Mathematics. One of Philosophy 107-354A and 355B, 107-356A and 357B, 107-360A and 361B, 107-366A and 367B, and two full courses in Philosophy approved by the Department. Nine additional credits in Philosophy.

54 credits. (This faculty program leads to a B.A. degree. Consult the Department of Philosophy for an Adviser.)

MATHEMATICS AND PSYCHOLOGY:

Mathematics 189-222A,B, 223A or 245A,B, 323A,B, 324A,B, 423A, 424B; Psychology 204-302A, 303B, 335A, 336B; 12 credits selected from: Mathematics 189-217A, 218B, 314A,B, 317A, 318A, 327B, 328B, 417A, 447B; 12 credits selected from Psychology courses other than 204-204A,B; 305A,B; 3 credits selected from: Computer Science 308-200A,B, 308-220A,B. (This faculty program leads to either a B.A. or a B.Sc. degree. Consult the Department of Mathematics or the Department of Psychology for an Adviser.)

PSYCHOLOGY GENERAL:

Any of the Major sequences in Psychology with the substitution of 6 credits from U2 courses in Psychology for 204-211D and Psychology 204-305A,B.

54 credits. (Consult the Department of Psychology for an Adviser.)

DEPARTMENTAL OFFERINGS AND PROGRAMS OF STUDY

For graduate courses in all Departments see the *Announcement of the Faculty of Graduate Studies and Research*.

An official lecture timetable is available before Registration.

The programs and courses described in the following pages have been approved for the 1977-78 session but Faculty reserves the right to introduce changes as may be deemed necessary or desirable.

AFRICAN STUDIES PROGRAM

Advisers – R.S. McCALL, *Chairman, African Studies Committee (Philosophy);* M. BISSON *(Anthropology);* M. DORSINVILLE *(English);* M.J. ECHENBERG *(History);* P.C.W. GUTKIND *(Anthropology);* F. KUNZ *(Political Science);* A. MAUGEY *(French);* J. SHINGLER *(Political Science).*

Leacock Building, Room 723A, Tel. 392-8049.

The "Interdisciplinary Area Major" in African Studies is designed for those students who wish to take advantage of the growing resources at McGill, and elsewhere in the Montreal area, for the pursuit of an interdisciplinary approach to the African continent.

Students wishing to major in African Studies should consult one of the advisers (see above) at the beginning of their first academic year. While pursuing their Major, they will be expected to concentrate as well in a regular discipline of the Faculty. Disciplinary specialization is not, however, restricted to those for which an Adviser is listed.

The Major consists of 54 credits (9 full courses or the equivalent), including African Studies 499D in the final year. All the courses listed below must be taken (45 credits), while 9 credits should be selected in consultation with Major Advisers. One or two relevant prerequisites may be included in the total, and the seven should include courses from at least three departments (for full descriptions and prerequisites of courses see listings under individual departments.)

Training in an African language is encouraged, and may form a part of the Major program. Formal training is available at McGill in Arabic. In addition, tapes for the study of Swahili and other languages are available through the Linguistics Department and the Language Laboratory in Peterson Hall.

Modifications in, or additions to, the program from relevant courses in Economics, Education, Geography, Lingusitics and other disciplines, may be made with the consent of the African Studies Committee.

The culmination of the Major is the Research Seminar, 111-499D.

Options

Anthropology 151-215B Peoples and Cultures of Africa. (3 credits).

Anthropology 151-216B Culture and Social Change in Modern Africa. (3 credits). *Not given in 1977-78.*

Anthropology 151-345B Prehistory of Africa. (3 credits).

Economics 154-314B African Economic Development. (3 credits). *Not given in 1977-78.*

English 110-320D Third World Literature. (6 credits).

English 110-421A Modern African Literature. (3 credits). *Not given in 1977-78.*

French 125-368B Littérature noire d'expression française. (3 credits).

History 101-200D A History of Africa. (6 credits).

History 101-430D France and the Africans. (6 credits). *Not given in 1977-78.*

History 101-480D Capitalism and Empire: The World in the Age of European Domination. (6 credits).

Political Science 160-324D Politics and Government in Africa. (6 credits).

Sociology 166-360A National Liberation Movements in Africa (3 credits). *Not given in 1977-78.*

Final Year Requirement

111-499D. Research Seminar in African Studies (6 credits; Prerequisite: Open to Area Majors in good standing, and to others by permission). An interdisciplinary research seminar on topics of common interest to staff and students of the African Studies Program. As part of their contribution, students will prepare a research paper under the supervision of one or more members of the staff.
Staff

ANTHROPOLOGY (151)

Professors – PETER C.W. GUTKIND; RICHARD F. SALISBURY; BRUCE G. TRIGGER

Associate Professors – DAN R. ARONSON *(on leave 1977-78)*; FUMIKO IKAWA-SMITH *(Chairman)*; JEROME ROUSSEAU; PHILIP C. SALZMAN

Assistant Professors – DONALD ATTWOOD; MICHAEL S. BISSON; CARMEN LAMBERT

Room 723, Stephen Leacock Building, 855 Sherbrooke St. West, Montreal, PQ, H3A 2T7. Telephone 392-5179.

The Honours and Major programs in Anthropology provide a liberal arts education which emphasizes the similarity and diversity of human behaviour, understanding of social and cultural systems, and the processes of socio-cultural changes from man's origins to the present day. Although neither the Honours nor the Major programs provide a professional training geared to specific jobs, they may serve as a useful background for those who are planning a career in law, foreign service, community organization, public administration, journalism, and teaching and research in social sciences and humanities. Needless to say, to be a qualified professional in

most of these fields requires further training at professional or graduate schools.

While the Major program allows a greater freedom to choose from courses offered by other departments to suit the student's needs and interest, the Honours program provides a greater concentration in anthropology with substantial breadth and depth. It should be noted that the completion of an Honours program is frequently required for admission into graduate or professional schools.

MAJOR PROGRAM

There is no prerequisite for admission into the Major program in Anthropology. The program requires that the student take 10 courses (30 credits) in Anthropology, of which three must be "advanced courses" (400 level) and eight courses (24 credits) in no more than three other departments which are relevant to the student's program of studies in Anthropology. Contact the Department Office for inquiry (392-5179).

HONOURS PROGRAM

In order to continue in the Honours program students must meet the academic standing requirements set forth by the Faculty, and in order to complete the Honours program in Anthropology in the final, graduating year, the grade-point average for the preceding year (usually the U2 year) must be 3.0 or higher for all courses as well as for anthropology courses.

An Honours degree in Anthropology will be granted to a student who has satisfied the requirements of the program and who has an average of 3.0 or better for all the anthropology courses credited towards the program and for all the courses taken during the last two years (usually U2 and U3 years). A First Class Honours degree in Anthropology will be given to a student with a CGPA and an average for all anthropology courses of 3.5 or better.

An Honours student in Anthropology is required to take 20 anthropology courses (60 credits) of which two can be anthropology courses taken in CEGEP. Up to three of the courses (9 credits) can be courses given by other departments, if they are directly related to the student's focus of study within anthropology and are approved by the student's adviser on the Undergraduate Committee of the Anthropology Department.

The 20 anthropology courses should include at least three of the seven "core courses" (151-353B, 354A, 355B, 357B, 358A, 359A and Linguistics 104-230A); and 151-462A, 463B and/or 464D (in which an honours project is prepared); and at least three other "advanced courses" (400 level courses).

Each student has the opportunity to construct within the Honours program a concentration focused on a particular field of interest, such as prehistory and evolution, cultural systems, social and political organization, or on a particular geographical area, such as Africa, North America, South America, Middle East or South Asia. Such concentration is made possible by the use of the "Special Topics" courses, in which a student works under the supervision of a staff member in an area not covered by courses currently given. Special Topics courses can be coupled, concurrently or sequentially, with regular courses, under the supervision of the instructors of the regular courses, in order to allow more intensive work in the area covered by regular courses. Papers or projects can be submitted to two or more courses, provided that prior written arrangements have been made with the approval of the student's adviser.

For more information on the Honours program, consult an appropriate adviser on the Undergraduate Committee of the Department, through the Department Office (392-5179)

JOINT HONOURS PROGRAMS

Joint Honours programs are established with Art History, Classics (Classical Archaeology), Economics, English, Geography, History, Linguistics, Middle East Studies, Philosophy, Political Science, and Sociology. The Anthropology part of the requirements for these programs is the completion of 11 courses (33 credits) in Anthropology, which must include three of the "core courses" (see above for the Honours program), two "advanced courses" and 151-462A, 463B, or 464D in which an Honours project with an interdisciplinary approach is prepared, under the supervision of two instructors (one each from the two Departments concerned). Joint Honours students must also satisfy the same averages in Anthropology courses as Honours students (3.0 for Joint Honours, 3.5 for First Class Joint Honours.) For more information on the Anthropology requirements of the joint Honours programs, contact the Department Office (392-5179) which will direct the student to an appropriate adviser on the Undergraduate Committee. For information on the requirements for the other discipline making up the Joint Honours program, consult the department concerned.

Course Descriptions

FIRST LEVEL COURSES

These courses are normally taken during the first year of study in Anthropology and are open to all University students. There are no prerequisites for this group of courses.

151-201A PREHISTORIC CULTURES. (3 credits). Examination of the origin of cultural behaviour and culture as an adaptive mechanism from the earliest times to the rise of the first civilizations in the Old and New Worlds. The implications of these data

concerning the nature of man and his future development will be considered.
Professor Trigger

151-202A COMPARATIVE CULTURES. (3 credits). The comparison of human societies at different levels of scale and complexity: hunting bands, horticultural and pastoral tribes, agrarian states, and industrial states. How differences in the scale and complexity of social organization and cultural systems relate to different modes of subsistence.
Professor Attwood

151-203B HUMAN EVOLUTION. (3 credits). An examination of man's biological origins and the significance of his physical diversity. The behaviour of non-human primates, primate evolution, the role of culture in human evolution, racial classifications, the dynamics and behavioural significance of racial variation. (Not open to students who have previously taken 151-303B).
Staff

151-204A SYMBOL SYSTEMS AND IDEOLOGIES. (3 credits). Consideration of symbol systems and their position among various systems of communication. Analysis of the meanings of symbols and the interaction between symbol systems and other aspects of social life (political, ecomomic, etc.). The analysis of ideologies as the images which people have of their own societies. The influence of class interests, ethnicity, etc., on such ideologies.
Staff

151-206D CULTURE AND ADAPTATION. (6 credits). An ecological approach to the study of human society and culture, focussing on anthropological studies and the development of anthropological ecology. Modular course.
Staff

151-209B ANTHROPOLOGY OF RELIGION. (3 credits). Nature and function of religion. Systems of belief; the interpretation of ritual. The relation of religion to social organization. Religious change.
Professor Rousseau

151-210B THE ANTHROPOLOGY OF THE ARTS. (3 credits). *Not given 1977-78.* The arts in cultural context, with special emphasis on non-Western aesthetic systems, the creative process, the purposes and "meanings" of artistic production, and the effects of foreign influences on indigenous art. Examples will be drawn primarily from the plastic and verbal arts of Africa.
Professor Aronson

151-212B ANTHROPOLOGY OF DEVELOPMENT. (3 credits). Processes of developmental change, as they affect small communities in the Third World and in unindustrialized parts of developed countries. Problems of technological change, political integration, population growth, industrialization, urban growth, social services, infrastructure and economic dependency.
Professor Salisbury

151-215B PEOPLES AND CULTURES OF AFRICA. (3 credits). An ethnographically-based survey of African cultures. Geographical and historical backgrounds; levels of techno-environmental complexity; patterns in African social organization, economy, politics, religion, and art. Problems of cultural autonomy and structural dependence of contemporary rural peoples. (Not open to students who have previously taken 151-215D).
Professor Bisson

151-216B CULTURE AND SOCIAL CHANGE IN MODERN AFRICA. (3 credits). *Not given 1977-78.* The impact of colonialism on African societies; changing families, religion, arts; political and economic transformation; migration, urbanization, new social categories; social stratification; the social setting of independence and neo-colonialism; continuity, stagnation, and progressive change. (Not open to students who have previously taken 151-215D).
Professor Gutkind

151-221A INTRODUCTION TO URBAN ANTHROPOLOGY. (3 credits). Introduction to the comparative analysis of urbanization in Africa, Asia and Latin America; rural-urban migrations; the demography and institutional structures or urban areas; tribalism in towns; status, class and elites in towns; family structure; urban network analysis; urban-based associations; the role of the city in national development. (Not open to students who have taken 151-321A).
Professor Gutkind

151-224B WOMEN IN CROSS CULTURAL PERSPECTIVE. (3 credits). Introduction to the comparative study of women in society. A wide range of anthropological studies are examined along with theoretical models regarding changes in women's position. Women in simple and complex societies; women and social change; problems of women in developing societies.
Staff

151-227A MEDICAL ANTHROPOLOGY. (3 credits). Cross-cultural comparison of Western and other medical practices, and of health, disease and medical practice. Topics include Ethnomedicine, Ethnopharmacology, Transcultural Psychiatry, Physiological Anthropology, and anthropological studies of Nutrition. Medical delivery systems and the roles of doctor and patient in different cultural contexts.
Staff

151-228A AN INTRODUCTION TO EDUCATIONAL ANTHROPOLOGY. (3 credits). Anthropological approaches to the study of education will be delineated using case studies from a wide range of cultural situations including the Canadian North and urban North America. A theoretical analysis of such areas as the transmission of values, the classroom as a unit of socio-cultural analysis, and the role and functions of formal education cross-culturally considered.
Staff

151-236B INDIGENOUS PEOPLES OF NORTH AMERICA. (3 credits; linked course with Geography 183-236A à both must be taken to earn credit for either). Analysis of the patterns and processes of culture change within selected groups of North American Native People. Emphasis upon conditions arising from contact and its impact on social, economic and political patterns of adaptation. (Not open to students who have taken 151-236D or 183-336D).
Professor Lambert

151-237B NATIVE PEOPLES OF MIDDLE AMERICA. (3 credits). A survey of the indigenous cultures of Mexico and Guatemala. The Mesoamerican sociocultural tradition is examined in terms of its historical context and its contemporary manifestations. Comparisons and contrast in cultural adaptations to conditions of colonialism, underdevelopment, and cultural dominance.
Professor Bossen

INTERMEDIATE COURSES

Prerequisite: One anthropology course which is, in some cases, specified.

151-302B THE HISTORY OF ANTHROPOLOGICAL THEORY. (3 credits). Explorations in the history of anthropological theory; schools, controversies, intellectual history, sociology of knowledge. (Not open to students who have previously taken 151-402B). *Not given 1977-78.*
Professor Salisbury

151-308A POLITICAL ANTHROPOLOGY. (3 credits). The study of political systems and political processes. Conflict and its resolution. The emphasis of the course will be on local-level politics and non-industrial societies.
Staff

151-313B SOCIAL INSTITUTIONS OF THE EARLY CIVILIZATIONS. (3 credits). A comparative study of the differing social, economic and political institutions of the early civilizations in Mesopotamia, Egypt, India, China and the New World; their historical interconnections and development from Neolithic times to the early historic period.
Professor Trigger

151-314A AN INTRODUCTION TO PSYCHOLOGICAL ANTHROPOLOGY. (3 credits). A survey of current theories and methods employed in psychological anthropology. Some areas considered are: cross-cultural studies of socialization and personality development; cultural factors in mental illness; individual adaptations to rapid socio-cultural change. *Not given 1977-78.*
Staff

151-316B ANTHROPOLOGY OF COMPLEX SOCIETIES. (3 credits). Selected topics in the study of complex societies; rural-urban continuum migration and adaptation to urban life, poverty culture, cultural scenes. Evaluation of anthropological approaches to the study of complex society.
Staff

151-317A THE PREHISTORY OF NORTH AMERICA. (3 credits; *Prerequisite:* 151-201A or 151-203B or equivalent). Peopling of the New World and the Old World; origins of the early Lithic cultures; cultural adaptations of grasslands, woodland, desert and maritime environments; consideration of factors that favoured the shifts from hunting-gathering to agriculture and the rise of civilizations in Mesoamerica.
Professor Ikawa-Smith

151-324B ECONOMIC ANTHROPOLOGY. (3 credits). *Not given in 1977-78.* Systems of production, distribution, and consumption in non-industrial societies. Social relationships and economic behaviour as viewed from the perspective of the individual, or small community, in peasant and industrial societies. (Not open to students who have taken 151-424B).
Professor Salisbury

151-326A NATIVE PEOPLES OF SOUTH AMERICA. (3 credits). Ethnographic survey of the native peoples of South America and discussion of some of the major themes in South American ethnology including the present political situation of the Indians.
Staff

151-327A PEOPLES OF SOUTH ASIA. (3 credits). A survey of the peoples and cultures of the Indian sub-continent. Detailed consideration will be given to agrarian social structure and stratification (in terms of caste, class and power), with emphasis on the changes caused by colonialism and modernization.
Professor Attwood

151-331B PREHISTORY OF EAST ASIA. (3 credits). Comparative study of prehistoric hunting and gathering cultures in China, Japan, Korea, Mongolia and Eastern Siberia; origins and dispersal of food production; cultural processes leading to the rise of literate civilizations in certain regions of East Asia.
Professor Ikawa-Smith

151-333B CLASS AND ETHNICITY: HISTORY, STRUCTURE, AND FUNCTION. (3 credits). *Not given 1977-78.* The genesis and development of ethnic groups and social classes; modes of production, social formations and the question of "consciousness." The functions of ethnicity and class in political conflict, with special reference to the Third World.
Professor Gutkind

151-340B MIDDLE EASTERN SOCIETY AND CULTURE. (3 credits). The ethnography and social anthropology of the Middle East with special attention to life at the community and regional levels and to community-society relations. Such questions as

"urban-peasant-tribe" relations, and land adaptation, the role of folk Islam, and the place of women. (Not open to students who have taken 151-301A).
Professor Salzman

151-345A PREHISTORY OF AFRICA. (3 credits). This course will investigate the archaeological evidence for the evolution of culture in Africa from the beginning of the Paleolithic through the Iron age. The emphasis will be upon changes in economic, social and political organization as reflected in selected archaeological sites.
Professor Bisson

151-347A PALEOLITHIC CULTURES OF EUROPE. (3 credits; Prerequisite: 151-201 or the consent of the instructor). Students must also have a reading knowledge of French. The Stone Age cultures of Europe from about 800,000 B.C. to the beginnings of agriculture at about 10,000 B.C. Archeological sequences of the major geographic subdivisions of Europe in the light of changing human adaptations. Laboratory sessions.
Professor Bisson

CORE COURSES

Restricted to Honours, Joint Honours and Major students in anthropology and those with the permission of the instructor.

151-353B CULTURE AND COERCION: SOCIAL CONTROL IN PREINDUSTRIAL SOCIETY. (3 credits). An inquiry into the factors that contribute to the maintenance of the social order. Socialization, reciprocity, conflict resolution, and coercion are among the elements examined.
Professor Salzman

151-354A SOCIAL ORGANIZATION. (3 credits). Comparative study of human group formation; ethnicity. The role of kinship and marriage in interpersonal relations. Social stratification.
Professor Rousseau

151-355B THE STRUCTURE OF CULTURE. (3 credits). The formal analysis of cultural systems, the patterning and integration of cultural, ethos and value systems.
Staff

151-357B ARCHAEOLOGICAL METHODS. (3 credits). The collection of materials in field investigations and their analysis to yield cultural information. The processes of inference and reconstruction in archaeological interpretation.
Professor Bisson

151-358A INTRODUCTION TO RESEARCH. (3 credits). The nature of anthropological research as evidenced in monographs and articles; processes of concept formation and interpretation of data; the problem of objectivity.
Staff

151-359A HISTORY OF ARCHAEOLOGICAL THEORY. (3 credits; *Prerequisite:* 151-201B, or 151-203A or permission of instructor). A systematic investigation of the theories that have guided the interpretation of prehistoric archaeological data since the time of Christian Thomsen; the relationship between these theories and the development of archaeological techniques; their relationship to theoretical developments in the other social sciences.
Professor Trigger

151-380A, 151-381B, 151-382A, 151-383B SPECIAL TOPICS. (3 credits each; *Prerequisite:* Permission of instructor). Supervised reading in special topics under the direction of a member of the staff.
Staff

ADVANCED COURSES

Prerequisite: at least one 300-level anthropology course, which, in some cases, is specified.

151-403B CURRENT PROBLEMS IN ARCHAEOLOGICAL THEORY. (3 credits; *Prerequisite:* 151-356A or 151-357B). A seminar dealing with current issues concerning reconstruction of socio-cultural systems from archaeological data. Topics include "economic vs. cultural models", the "systemic approach," ecosystem analysis, problems of taxonomy and classification, and quantitative methods.
Professor Trigger

151-404B TOPICS IN PSYCHOLOGICAL ANTHROPOLOGY. (3 credits; Prerequisite: 151-314A and consent of instructor). Each year one or two problems in psychological anthropology will be discussed and analyzed in depth, for example the development of adolescent identity in a series of cultures or the effects of different household residence patterns on children's development. *Not given in 1977-78.*
Staff

151-406A TOPICS IN CULTURAL ECOLOGY. (3 credits; Prerequisite: 151-206B or permission of the instructor). One aspect of society and culture – such as division of labour, cognition, population size and density, authority structures, religion, and socialization – will be examined from an ecological point of view. *Not given 1977-78.*

151-412A SEMINAR ON CONTEMPORARY THEORY. (3 credits). An exploration of major contemporary theoretical approaches in socio-cultural anthropology, such as symbolic analysis, transactionalism, cultural materialism and conflict theory. Important works by the professors of these various theoretical approaches will be closely examined.
Professor Salzman

151-413B DECIPHERMENT OF ANCIENT SCRIPTS. (3 credits; *Prerequisite:* At least two and preferably three lower level courses in anthropology including 151-313B; 356A; or 357B). *Not given in 1977-78.* This seminar will examine the problems involved in the decipherment and translation of the

scripts of "forgotten" languages associated with early civilizations. Considerable attention will be given to the nature of early writing systems. Practical work will be concentrated on Meroitic; the earliest known written language of sub-Saharan Africa.
Professor Trigger

151-415A PROBLEMS IN AFRICAN ANTHROPOLOGY.(3 credits; *Prerequisite:* 151-215A, 151-216B or consent of the instructor). *Not given in 1977-78.* A detailed examination of the peoples and cultures of a major region of Africa, with attention to problems in ethnology, social change and development.
Professor Aronson

151-420B THE USE OF MATHEMATICS IN ANTHROPOLOGY. (3 credits; *Prerequisite:* Introductory statistics or permission of instructor). This course will review past and present applications of mathematics to anthropology, particularly social and cultural anthropology, and secondarily archaeology. The following topics will be considered: statistical testing; problems of measurement; the application of systems theory and games theory; the use and misuse of mechanical methods for the analysis of data. *Not given in 1977-78.*
Professor Rousseau

151-421A TOPICS IN URBAN ANTHROPOLOGY. (3 credits; *Prerequisite:* 151-221B, 151-321B or consent of the instructor).
Staff

151-422A HISTORY, IDEOLOGY AND THEORY IN SOCIAL CHANGE AND MODERNIZATION OF NON-WESTERN SOCIETIES. (3 credits). Sociocultural perspectives on Colonialism and policies; their impact on preindustrial societies; the structure and dialectic of modernization processes and their impact, ideology and discontent.
Professor Gutkind

151-423A IDEOLOGY AND CONCEPTS IN SOCIAL ANTHROPOLOGY. (3 credits; *Prerequisite:* Honours or major status or permission of instructor). *Not given in 1977-78.* Ideology and Social Science Theory in relation to problem formation in Social Anthropology; the spill-over from romanticism, imperialism, colonialism, neo-colonialism and radicalism to the outlook and problems studied by social anthropologists, traditional limits and the "New Anthropology". Multi- and interdisciplinary studies.
Professor Gutkind

151-425A ADVANCED TOPICS IN ECONOMIC ANTHROPOLOGY. (3 credits). *Not given in 1977-78.* Discussion of selected topics in modern economic anthropology.
Professor Salisbury

151-426B SEMINAR ON SOUTH AMERICAN ETHNOLOGY. (3 credits; *Prerequisite:* 151-326A, or permission of instructor). Seminar centred on some of the main problems of modern research in the study of South American Indian societies and cultures. *Not given in 1977-78.*
Staff

151-427B SEMINAR ON SOCIAL CHANGE IN SOUTH ASIA. (3 credits; *Prerequisite:* a course with South Asian content, such as 151-327A; 151-308A; 160-322A; 154-301B; 260-451D; or permission of the instructor). Aspects of social change in modern India: caste and ethnic movements, religious movements, agrarian movements, social reformism; rural economic development; factions and parties, local elites. Colonialism, nationalism, and development. *Not given in 1977-78.*
Professor Attwood

151-428B SEMINAR ON EDUCATIONAL ANTHROPOLOGY. (3 credits; *Prerequisite:* 151-228A and consent of instructor). A seminar focused on methodological issues in educational anthropology. Ethnographic techniques applicable to the study of formal education, methodological problems in the analysis of teacher-pupil interaction, and way to ascertain the cultural continuities and discontinuities between the student's school and non-school experience will be discussed. *Not given 1977-78.*
Staff

151-429B ADVANCED TOPICS IN THE STUDY OF LATIN AMERICA. (3 credits; *Prerequisite:* 151-326A or consent of the instructor). *Not given in 1977-78.* A detailed examination of selected topics of Latin American society and culture.
Staff

151-436B SEMINAR ON NORTH AMERICAN NATIVE PEOPLE. (3 credits; *Prerequisite:* 151-236B and 183-236A). A detailed examination of selected contemporary problems.
Professor Lambert

151-437B ANTHROPOLOGICAL APPROACHES TO CULTURE CHANGE. (3 credits). Consideration of anthropological approaches to directed culture change through a survey and analysis of relevant case materials. History of directed culture change; introduction to theoretical, methodological and ethical issues involved in and deriving from studies of and participation in directed culture change. Role of anthropologists as initiators or paticipants in, and/or evaluators of directed culture change: past, present and future.
Professor Lambert

151-439A LOCAL POWER SYSTEMS, THE MARKET, AND THE STATE. (3 credits; open to non-Anthroopology students with permission of the instructor). During the age of European imperialism, many formerly autonomous regions were incorporated into expanding state administrations and a world market system. What were the consequences of incorporation or of resistance against dependency? How have local distribution systems and the roles of middlemen been influenced by tensions between dependency and autonomy? How has

industrialization in some regions affected agricultural change in others?
Professor Attwood

151-440A SEMINAR IN THE ANTHROPOLOGY OF COGNITION: I. (3 credits). Investigation into how people perceive and organize phenomena. Physiological, psychological, linguistic, social and ideological factors in cognition. Affect and percept; belief and knowledge. Philosophical, psychoanalytic, structuralist and marxist approaches to cognition. Cognitive structure and process.
Professor Rousseau

151-441B SEMINAR IN THE ANTHROPOLOGY OF COGNITION: II (3 credits). A detailed examination and discussion of selected topics in the Anthropology of Cognition.
Staff

151-447B EARLY PREHISTORY OF THE NEW WORLD. (3 credits; *Prerequisite:* Anthropology 151-317A). Detailed examination of selected aspects of the early prehistory of the New World. Specific geographical areas or topical issues may vary from year to year. In 1977-78, the focus will be on peopling of the New World.
Professor Ikawa-Smith

151-448A SETTLEMENT ARCHAEOLOGY. (3 credits *Prerequisites:* at least two, and preferably three lower level courses in anthropology, including 151-356A or 151-357B). *Not given 1977-78.* This course will examine theories that have been developed in recent years concerning human settlement and evaluate the utility of these theories for deriving a variety of cultural information from spatial distributions of archaeological data. Special attention will be given to factors affecting the evolution of settlement units, from which a more general theory of settlement may be derived.
Professor Trigger

151-450B THIRD WORLD PEASANTRIES: THE CHANGE FROM RURALITY TO URBAN PROLETARIANS. (3 credits; *Prerequisites:* 151-308B or 151-354A, plus one area course, or permission of the instructor). Review of recent anthropological literature, as well as the approaches of social history and political economy, focusing on external and internal forces instrumental in transforming peasantries into urban proletarians in "Third World" nations. Analysis of fission and fusion processes, stratification, class, rural and urban protest and mechanisms of incorporation of small units in larger political domains.
Professor Gutkind

151-451A ADVANCED TOPICS IN ARCHAEOLOGICAL RESEARCH. (3 credits). Examination and discussion of topics of current theoretical or methodological interest in archaeology. Topics to be announced at the beginning of term.
Staff

151-461B RESEARCH TECHNIQUES. (3 credits; *Prerequisite:* consent of the instructor). Field techniques, interviewing, participant observation, projective, and other testing techniques such as genealogies and life histories, problems of field work, rapport, contact, role definition, culture shock, etc.
Professor Lambert

151-462A, 151-463B, 151-464D. INDEPENDENT RESEARCH. (3,3, and 6 credits respectively; *Prerequisites:* U3 Honours status and permission of the instructor). Supervised reading and preparation of a research report under the direction of a member of staff.
Staff

151-480A, 481B, 482A, 483B, 484A, 485B SPECIAL TOPICS. (3 credits each. *Prerequisite:* Completion of all available courses relevant to the topic and consent of the instructor). Supervised reading in advanced special topics under direction of a member of staff.
Staff

ARABIC (397)

397-100D INTRODUCTION TO LITERARY ARABIC. (6 credits: 5 hours, 1 hour laboratory). The Arabic alphabet, pronunciation, principles of grammar, basic vocabulary, reading selections, simple composition and oral drills.

397-200D ELEMENTARY ARABIC. (6 credits; 4 hours). Further grammar and drills, reading in modern and classical Arabic, composition and oral drills.

397-300D INTERMEDIATE ARABIC. (6 credits).

397-400D ADVANCED ARABIC. (6 credits).

ART HISTORY (123)

Professors – WINTHROP JUDKINS *(Chairman)*; GEORGE GALAVARIS
Associate Professors – RIGAS BERTOS; ROSE-MARIE BERGMANN
Assistant Professors – THOMAS GLEN; NICHOLAS ADAMS
Lecturer – ROBERT LANGSTADT

W-225 (West Wing, top floor),
Arts Building,
853 Sherbroke St. West,
Montreal,Quebec, H3A 2T6.
Telephone: 392-4977.

The Department of Art History at McGill is concerned almost exclusively with the historical-critical study of architecture, sculpture and the two-dimensional arts from ancient times to the present. These arts are treated as an illumination of history – as a visual embodiment and expression of the philosophical, religious, intellectual and social trends of

the successive historical periods. The student is thus given an introduction to the richness, scope and significance of our historical and cultural heritage. At the same time the monuments are treated both as products of creative expression and as objects of aesthetic quality, providing the student with a basis for both receptivity to artistic communication and sound critical judgement.

A single, introductory, non-professional studio course is offered primarily as a supplement to the historical-critical study of the subject.

The Department offers major, honours, joint honours and graduate programs. The major program provides a broad basis in the history and criticism of art, but at the same time retains considerable flexibility enabling the student to participate in the many other disciplines in the humanities and social sciences with which art history is characteristically related. The honours program, while almost equally flexible, offers a deeper and more comprehensive penetration of the subject and provides the necessary foundation for those intending to continue into graduate studies in the discipline. But it is intended also for the undergraduate desiring a more cohesive and challenging intellectual experience and development.

MAJOR IN ART HISTORY

There are no pre-University requirements for this program.

The student majoring in Art History will take at least 30 and not more than 36 credits in Art History, of which not more than 12 may be elected in the First year. 24 additional credits will be chosen with the approval of the Faculty Adviser. (Note: courses in studio practice cannot be counted towards the Major requirements).

Adviser: Professor Glen, Arts W-265, Telephone: 392-4977.

HONOURS IN ART HISTORY

There are no pre-University requirements for this program.

To qualify for the Honours degree in Art History candidates must pass 36 credits, four Honours seminars (twelve credits), and the Honours comprehensive examinations.

In the first University year, the candidate will take at least 12, at most 18, Art History credits. In each of the second and third University years the student will normally take 12 Art History credits and two Honours seminars (3 credits each). At the end of the final University year, in addition to writing the final examinations in their Art History courses, Honours students, having prepared themselves in the areas not covered by their formal courses, must pass the Honours comprehensive written and oral examinations.

The passing mark for Honours standing in Art History is 70%. For promotion to the second university year, candidates must attain at least 70% in each of their first university year Art History courses and marks not below C in each of their other courses. Qualification for the Honours degree requires an average of 70% in all Art History courses and seminars taken, with not more than two of these in the C category and at least a C average in all non-Art History courses taken.

Honours students intending to proceed to graduate studies will be encouraged to begin the study of a third language recommended by the Department. (Note: courses in studio practice do not count towards the Honours degree.)

Adviser: Professor Judkins, Arts W-230, telephone: 392-4975.

JOINT HONOURS

There are no fixed pre-University requirements for these programs.

Proposals by qualified students for Joint Honours studies in Art History and certain appropriately related subjects may be submitted for consideration jointly by the Chairmen of the Departments concerned.

Adviser: Professor Judkins, Arts W-230, telephone: 392-4975.

Course Descriptions

123-200D FORM AND MEANING. (6 credits). Dealing broadly in terms of painting, sculpture and architecture, the aim of this course is to develop the student's perception and understanding of the work of art – both as a visual medium of expression and as a crystallization of its historical and cultural context.
Professors Judkins, Bergmann and Adams

123-026D FUNDAMENTALS IN DRAWING AND PAINTING. (6 credits; No previous training or experience is expected). The purpose of the course is to develop the creative sensibilities of students by introducing them, through studio work, to basic principles of drawing, painting and sculpture.
Mr. Langstadt

NOTE: Enrolment in this course is limited to fifty students (two sections of twenty-five students each). All registered students must come to the first scheduled meeting of the section of their choice. Only then (not before) will selection, by lot, from among those present, be made. Except by special consent of the instructor, supplemental assessments will not be given in this course.

123-210A INTRODUCTION TO THE ARTS OF EGYPT AND MESOPOTAMIA. (3 credits). *Not given in 1977-78.* A survey of the arts in these countries from their origins down to the Hellinization of Egypt. Emphasis is placed on the relation of the arts to monarchy, religion, physical conditions and spiritual life.
Professor Galavaris

123-211A EARLY AND CLASSICAL GREEK ART AND ARCHAEOLOGY. (3 credits). A selective survey of the slow emergence of the visual arts in the Hellenic world after the Mycenean Age and their transformation, to the end of the fourth century. Emphasis is placed upon the cultural significance of this phase of Greek civilization for modern man.
Professor Bertos

123-212B HELLENISTIC GREEK AND ROMAN ART AND ARCHAEOLOGY. (3 credits). *Not given in 1977-78.* The spirit of the forms in the visual arts discussed as manifestations of a new world-view that became predominant from the time of Alexander's conquests to the appearance of Christian Art. Emphasis is placed on Rome's contribution to the classical tradition.
Professor Galavaris

123-222D RENAISSANCE AND POS-RENAISSANCE SCULPTURE. (6 credits). *Not given in 1977-78.* European sculpture of the fifteenth through the nineteenth centuries with emphasis upon the works of the principal sculptors. Attention will be given to the special problems involved in the three-dimensional expression of styles in art.
Staff

123-223A EARLY RENAISSANCE ART IN ITALY. (3 credits). The emergence of a new concept of art in Italy during the 15th century expressed in the works of the most important artists of the period. Special consideration will be given to the relationship of the visual arts to the classical tradition and to contemporary literature, philosophy and social conditions.
Professor Bertos

123-224B HIGH RENAISSANCE ART IN ITALY. (3 credits). A systematic investigation of Italian art of the 16th century – one of the most important periods in art history. Attention will be given also to the relation of the visual arts to contemporary intellectual and social trends.
Professor Bertos

123-312D MEDIEVAL ART. (6 credits). *Not given in 1977-78.* Medieval man's world view as manifested in the Fine Arts and their relationship to other expressions of Medieval civilization such as religion and philosophy. The course begins with the art of the Early Church, continues with that of Byzantium, and concludes with the visual arts embodied in the "Medieval Cathedral". (Not open to students who have taken 123-312A or 123-313B).
Professor Galavaris

123-315D GOTHIC ARCHITECTURE. (6 credits). *Not given in 1977-78.* A study of Gothic architecture with special emphasis upon its contemporary literary documents and upon the analysis of the form and structure of the major monuments. This will be followed by a critical evaluation of modern interpretations of Gothic architecture.
Staff

123-316A THE ARCHITECTURE OF THE CITY AND CITY PLANNING. (3 credits). *Not given in 1977-78.* A survey of the development of the architecture of the city from the Greeks and Romans through the end of the eighteenth century. Special attention will be given to the study of the development of specific cities as well as to theoretical writings by architects on city planning.
Staff

123-332A RENAISSANCE ARCHITECTURE. (3 credits). An analysis of the influence of Renaissance culture and artistic theory upon European architecture in the 15th and 16th centuries. Particular emphasis will be given to the evolution of the style in Italy and to the changing interpretation of antique architecture.
Professor Adams

123-333D BAROQUE AND ROCOCO ARCHITECTURE. (6 credits). *Not given in 1977-78.* A Study of the evolution of the Baroque and Rococo styles and of the Classical reaction represented by Palladianism and the Neo-Classical Movement. Architectural design will be studied in the context of contemporary painting and sculpture, and theories of art. (Not open to students who have taken 123-333A).
Staff

123-334D EUROPEAN ART OF THE 17TH AND EARLY 18TH CENTURIES. (6 credits). The emergence of the Baroque in Italy, its development throughout Europe, and artistic tastes in the 18th century. Attention is given to the relationships between the visual arts and other aspects of the intellectual, religious and social life of these centuries.
Professor Glen

123-335A NEOCLASSICISM AND ROMANTICISM. (3 credits). A study of painting and sculpture from the mid-18th through the mid-19th centuries in the context of the intellectual, social and political climate of the age. Particular emphasis is placed on the work of such major figures as David, Ingres, Delacroix, Canova and Friedrich.
Professor Glen

123-336B REALISM, IMPRESSIONISM, NEO-IMPRESSIONISM AND POST-IMPRESSIONISM. (3 credits). An investigation of the principal artistic movements in Europe during the second half of the nineteenth century.
Professor Glen

123-337D MODERN PAINTING AND SCULPTURE. (6 credits). The modern movement in art; its late nineteenth century emergence, problems, character and place in the continuity of art history.
Professor Judkins

123-343D RENAISSANCE PAINTING OF NORTHERN EUROPE. (6 credits). The development from Late Gothic to Renaissance, principally through the emergence of the Flemish and German schools in the 15th and 16th centuries, respectively.

The monuments are examined within the changing religious and social climate of the times. (Not open to students who have taken 123-343A or 123-344B).
Professor Bergman

123-347A TRADITION AND INNOVATION IN 19TH CENTURY ARCHITECTURE. (3 credits). An historical review of European and North American architecture from 1750 to 1880, concentrating upon the major stylistic movements, Neo-Classicism and the Greek and Gothic Revivals, and the impact on design of social and technological change.
Professor Adams

123-348A 20TH CENTURY ARCHITECTURE: IDEALS AND ACHIEVEMENTS. (3 credits). An examination of the main themes of architectural theory and practice from 1880-1970. Emphasis will be placed upon important centres, such as Chicago, significant groups, notably the Bauhaus, and celebrated architects such as F.L. Wright, LeCorbusier and Mies van der Rohe.
Professor Adams

123-349B THE ART OF THE PRINT. (3 credits). *Not given in 1977-78.* The historical development of the graphic arts in the west from the 15th through the 20th centuries with emphasis on the relation between print medium and artistic expression in such major graphic artists as Dürer, Rembrandt, Goya and Blake.
Professor Bergmann

123-414D WESTERN MEDIEVAL PAINTING. (6 credits). *Not given in 1977-78).* (Also open to First-year graduate students). A systematic study of the important centres and media (book painting, fresco, stained glass, etc.) of Medieval "Painting" from Carolingian through High Gothic times. The works of art are studied in relation to the religious spirit and social climate in which they were created.
Professor Bergmann

123-430A EVOLVING CONCEPTS OF THE DISCIPLINE OF ART HISTORY. (3 credits). *Not given in 1977-78.* The historical development of approaches and methods employed by art historians since the Eighteenth century. The emergence of Art History as a systematic discipline in the Humanities – its contributions, responsibilities and present status.
Professor Bertos

123-440D THE VISUAL LANGUAGE OF ARTISTIC EXPRESSION. (6 credits). *Not given in 1977-78.* (Also open to First-year graduate students). A detailed analysis of the nature, technicalities and functions of the factors of Representation, Design and Medium, including their evolving historical development, in combination with a study of their interactive synthesis in the total work, including comparative examination of the principal extant interpretations of the synthesis factor.
Professor Judkins

HONOURS SEMINARS. (3 credits each). Honours candidates in their Second and Third University years will undertake special studies (the work consisting of recommended reading, written papers and discussions) in certain of the following areas as advised by the Department. (6 credits in each year). Seminar offerings for the current session are obtainable from the Department office.

123-362/462A STUDIES IN ANCIENT AND EARLY MEDIEVAL ART. (3 credits).
Professor Galavaris

123-363/463B STUDIES IN ANCIENT AND EARLY MEDIEVAL ART (3 credits).
Professor Galavaris

123-364/464A STUDIES IN LATER MEDIEVAL ART. (3 credits).
Professor Bergmann

123-365/465B STUDIES IN LATER MEDIEVAL ART. (3 credits).
Professor Bergmann

123-366/466A STUDIES IN ITALIAN RENAISSANCE ART. (3 credits).
Professor Bertos

123-367/467B STUDIES IN ITALIAN RENAISSANCE ART. (3 credits).
Professor Bertos

123-368/468A STUDIES IN NORTHERN RENAISSANCE ART. (3 credits).
Professor Bergmann

123-369/469B STUDIES IN NORTHERN RENAISSANCE ART. (3 credits).
Professor Bergmann

123-372/472A STUDIES IN 17TH AND EARLY 18TH CENTURY ART. (3 credits).
Professor Glen; Professor Adams

Room 220, Arts Building,
853 Sherbrooke St. West,
Montreal, P.Q. H3A 2T6.
Telephone: 392-5005.

The Canadian Studies Program attempts to provide students with a comprehensive, interdisciplinary view of the nature and growth of Canadian civilization.

Students registered in this program will take fifty-four credits from the list below, at least six of which shall be from History, at least six from Literature, and at least six from a Social Science.

Please consult Professor Lucas, English Department.

Courses

Prerequisites are required for most courses above the 200 level. Students lacking prerequisites or written permission from the course instructor may be required to drop courses.

ANTHROPOLOGY

151-236B INDIGENOUS PEOPLES OF NORTH AMERICA. (3 credits; *Prerequisite:* 183-236A; both courses required to obtain credits for either).

ARCHITECTURE

301-372B HISTORY OF ARCHITECTURE IN CANADA. (2 credits; Prerequisite: 301-102B).

BIOLOGY

177-358A CANADIAN FLORA. (3 credits; *Prerequisite:* 177-111A or equivalent).

ECONOMICS

154-200D ECONOMIC ANALYSIS AND APPLICATIONS. (6 credits). This course is prerequisite to all upper level courses in Economics except those for which other provision is made in the course description.

154-205D AN INTRODUCTION TO APPLIED POLITICAL ECONOMY. (6 credits. *Prerequisite:* 154-200D or consent of instructor).

154-211D INTRODUCTION TO CANADIAN ECONOMIC HISTORY. (6 credits; *Prerequisite:* 154-200D or consent of instructor).

154-302D MONEY AND BANKING. (6 credits).

154-304D CANADIAN ECONOMIC POLICY. (6 credits).

154-305D GOVERNMENT AND BUSINESS. (6 credits).

154-306D LABOUR ECONOMICS AND INSTITUTIONS. (6 credits).

154-312D POLITICAL ECONOMY OF DEPENDENCE IN THE WESTERN HEMISPHERE. (6 credits).

154-321D THE QUEBEC ECONOMY. (6 credits; Prerequisite: 154-200D or 154-205D or 154-211D).

154-404D TRANSPORTATION. (6 credits).

154-408D PUBLIC FINANCE. (6 credits).

154-431A CANADIAN ECONOMIC HISTORY. (3 credits; Prerequisites: 154-200D and 211D or consent of instructor).

154-434A CURRENT ECONOMIC PROBLEMS. (3 credits; Prerequisite: 154-200D).

154-468A URBAN AND REGIONAL ECONOMICS. (3 credits).

ENGLISH

110-228A CANADIAN LITERATURE I. (3 credits).

110-229B CANADIAN LITERATURE II. (3 credits).

110-327D THE DEVELOPMENT OF PROSE FICTION IN CANADIAN LITERATURE. (6 credits).

110-329D 20TH CENTURY CANADIAN LITERATURE. (6 credits).

110-528B CANADIAN LITERATURE. (3 credits).

FRENCH

125-204A CIVILISATION QUEBECOISE I. (3 crédits).

125-205B CIVILISATION QUEBECOISE II. (3 crédits).

125-208A LITTERATURE QUEBECOISE CONTEMPORAINE I. (3 crédits).

125-209B LITTERATURE QUEBECOISE CONTEMPORAIRE II. (3 crédits).

125-315A,B CINEMA QUEBECOIS (3 crédits).

125-328D HISTOIRE DE LA CIVILISATION QUEBECOISE (6 crédits).

125-370A LITTERATURE QUEBECOISE JUSQU'EN 1940. (3 crédits).

125-371B LITTERATURE QUEBECOISE DEPUIS 1940. (3 crédits).

125-372D ROMAN QUEBECOIS JUSQU'EN 1945. (6 crédits).

125-373B ROMAN QUEBECOIS (1945-60). (3 crédits).

125-375D THEATRE QUEBECOIS. (6 crédits).

125-377A LA CRITIQUE LITTERAIRE QUEBECOISE. (3 crédits).

125-378A LE CONTE QUEBECOIS. (3 crédits).

125-382D ROMAN QUEBECOIS DEPUIS 1960. (6 crédits).

125-470A POESIE QUEBECOISE DE CREMAZIE A SAINT-DENYS-GARNEAU. (3 crédits).

125-471B POESIE QUEBECOISE D'ALAIN GRANDBOIS A NOS JOURS (DEPUIS 1940). (3 crédits).

125-475A LITTERATURE FRANÇAISE ET QUEBECOISE. (3 crédits).

125-485A ESSAI QUEBECOIS AVANT 1960. (3 crédits).

125-486B ESSAI QUEBECOIS DEPUIS 1960. (3 crédits).

FRENCH CANADA STUDIES PROGRAM

(See Centre d'Etudes Canadiennes-Françaises).

GEOGRAPHY

183-236A INDIGENOUS PEOPLES OF NORTH AMERICA. (3 credits). Linked with 151-236B (both must be taken).

183-309A CANADA: ITS GEOGRAPHIC FOUNDATIONS. (3 credits).

183-311B GEOGRAPHIC ATTRIBUTES OF THE CANADIAN ECONOMY. (3 credits).

183-313A GEOGRAPHY OF RECREATION. (3 credits).

183-325A PHYSICAL GEOGRAPHY OF QUEBEC. (3 credits).

183-326B HUMAN GEOGRAPHY OF QUEBEC. (3 credits).

183-333A MONTREAL URBAN FIELD STUDIES. (3 credits).

183-345B GEOGRAPHICAL ROOTS OF IDENTITY. (3 credits).

183-401A GEOGRAPHY OF NORTHERN LANDS. (3 credits; Prerequisite: An Introductory course or 151-236B and 183-236A).

183-403B NORTHERN CULTURAL SYSTEMS. (3 credits; Prerequisites: 151-236B and 183-236A, or 183-401A, or permission of instructor).

HISTORY

101-202A CANADA TO 1867. (3 credits).

101-203B CANADA SINCE 1867. (3 credits).

101-303A QUEBEC SINCE 1840. (3 credits; Prerequisites: 101-202D (202A and 203B or consent of instructor).

101-309B CANADA AND THE BRITISH EMPIRE. (3 credits).

101-322B CANADA AND THE AMERICAN PRESENCE SINCE 1939. (3 credits).

101-332D CANADA AND THE BIRTH OF CONFEDERATION. (6 credits; *Prerequisite:* 101-202D or consent of instructor).

101-342A THE HISTORY OF CANADA'S EXTERNAL RELATIONS: 1867-1939. (3 credits).

101-352D EMERGENCE OF ENGLISH CANADA: 1791-1867. (6 credits; *Prerequisite:* 101-202D or consent of instructor).

101-363D CONTEMPORARY CANADA. 1890-1970. (6 credits, *Prerequisite:* 101-202D or equivalent, or consent of instructor. This course is not open to candidates who have previously taken 101-302A and 312B).

101-403D THE COMING OF THE QUIET REVOLUTION. (6 credits, *Prerequisites:* Any course in Canadian or Quebec history. A reading and speaking knowledge of French is essential).

101-443B COMMUNICATIONS, SOCIETY, AND PUBLIC POLICY IN CANADA. (3 credits).

101-472D ECONOMY AND SOCIETY IN BRITISH NORTH AMERICA. (6 credits).

101-483D THE HISTORY OF MONTREAL. (6 credits).

101-493D TOPICS IN CANADIAN SOCIAL HISTORY. (6 credits).

101-652D PROBLEMS IN CANADIAN HISTORY, 1867-1967. (6 credits).

MUSIC

214-391A CANADIAN MUSIC. (3 credits; *Prerequisite:* 214-184A and 214-185B or consent of instructor).

PHILOSOPHY

107-221B INTRODUCTION TO HISTORY AND PHILOSOPHY OF SCIENCE PART II. (3 credits).

POLITICAL SCIENCE

160-211D COMPARATIVE GOVERNMENT AND POLITICS. (6 credits).

160-221D GOVERNMENT OF CANADA. (6 credits).

160-320A CANADIAN POLITICAL PROCESS. (3 credits; *Prerequisite:* 160-211D).

160-337B CANADIAN PUBLIC ADMINISTRATION. (3 credits; *Prerequisite:* At least one other course in Canadian government or politics).

160-415B POLITICAL PARTIES. (3 credits; *Prerequisite:* One other course in Comparative Government).

160-426B POLITICAL ATTITUDES AND BEHAVIOUR IN QUEBEC. (3 credits).

RELIGIOUS STUDIES

260-420B CANADIAN CHURCH HISTORY. (3 credits).

SOCIAL WORK

407-352B THE SOCIAL SERVICES IN CANADA. (3 credits).

407-457B LEGAL PROBLEMS OF THE POOR. (3 credits).

SOCIOLOGY

166-210A INTRODUCTION TO SOCIOLOGY. (3 credits).

166-214B INTRODUCTION TO SOCIOLOGY: CANADIAN SOCIAL STRUCTURE. (3 credits).

166-222A URBAN SOCIOLOGY. (3 credits).

166-223B SOCIAL STRATIFICATION. (3 credits; *Prerequisite:* Introduction to Sociology).

166-225B MEDICINE AND HEALTH IN MODERN SOCIETY. (3 credits).

166-230B CLASS, ETHNICITY, AND POLITICS IN CANADA AND IN QUEBEC. (3 credits).

166-317B RESEARCH IN CANADIAN MASS COMMUNICATIONS. (3 credits).

166-435B SOCIOLOGY OF POPULAR CULTURE. (3 credits; Prerequisites: Sociology 217A or consent of instructor).

CENTRE FOR EAST ASIAN STUDIES (112)

Director – P.T.K. LIN
Associate Director – S.J. NOUMOFF

The Interdisciplinary Committee on East Asian Studies consists of faculty members in all relevant departments.

3434 McTavish Street,
Montreal, P.Q. H3A 1X9
Telephone: 392-4582

GENERAL INFORMATION

The Centre for East Asian Studies offers an interdisciplinary program focusing on China and Japan.

The courses included in the East Asian Studies program are given in the departments of Anthropology, East Asian Languages and Literatures, Economics, Geography, History, Music, Political Science, Religious Studies and Sociology. These courses are listed below.

The program has been structured to accommodate general students who wish to acquire a basic knowledge of East Asia as well as those students who desire to specialize in the field. Requirements for the Major Program and the Honours Program currently offered are as follows:

MAJOR IN EAST ASIAN STUDIES (In conjunction with the Department of History)

The requirements for a Major in East Asian Studies consist of the following: One compulsory course (History 208D) plus forty-eight credits (or the equivalent) drawn from the course listings in East Asian Studies and the Department of East Asian Languages and Literatures. These forty-eight credits must be spread among more than one department. Students are encouraged to enrol in the language sequence.

Enrolment in the East Asian Studies Major program will take place at the Centre for East Asian Studies just prior to university registration. The date for enrolment will be announced by September.

Inquiries regarding the Major in East Asian Studies should be addressed to Prof. S.J. Noumoff, Centre for East Asian Studies, 392-4582.

HONOURS IN EAST ASIAN STUDIES (In conjunction with the Department of History)

The Honours Program in East Asian Studies will consist of a total of 60 credits. Of these 60 credits, the following 36 credits are compulsory: History 101-208D, 6 credits; a minimum of three levels of Chinese or Japanese language study, 18 credits; History 101-417D, 6 credits, and East Asian Studies 112-493D Seminar, 6 credits. In addition to these required courses, students must complete 24 additional credits selected from the East Asian Studies course listing. Modifications may be considered by the Honours adviser.

Since this is a multidisciplinary program, students will be encouraged to elect courses in more than one discipline.

Enrolment in the East Asian Studies Honours Program will take place just prior to university registration. The date and place of this enrolment will be announced.

Inquiries regarding the Honours Program in East Asian Studies should be addressed to Professor S.J. Noumoff, Centre for East Asian Studies, 392-5238.

Course Descriptions

ANTHROPOLOGY

151-313B SOCIAL INSTITUTIONS OF THE EARLY CIVILIZATIONS. (3 credits. See entry under Anthropology Dept).
Professor Trigger

CENTRE D'ETUDES CANADIENNES – FRANCAISES (157)

Associate Professors – MAX DORSINVILLE *(Director) (on leave 1977-78)*; JEAN-LOUIS ROY *(Acting Director)*; DANIEL LATOUCHE *(on leave 1978)*

Lecturer – YVAN LAMONDE

Sessional Lecturers – GARY CALDWELL; EDOUARD CLOUTIER; PIERRE LAMONDE; LAURIER L. LaPIERRE; ALEXANDER MacLEOD; MARIE-FRANCE MOORE

Assistant to the Director – LAURE BELLEAU

Le *Centre d'Etudes canadiennes-françaises* est un lieu de recherche et d'enseignement interdisciplinaires dont le foyer d'analyse est la société québécoise. L'étude de la société québécoise, principalement du point de vue des sciences humaines, est la raison d'être du Centre. L'étendue des recherches portant sur l'histoire et la vie politique québécoises constitue l'un des aspects les plus féconds des travaux qui s'y poursuivent. Un éventail d'activités recoupant la recherche, l'enseignement et autres ressources pour l'avancement du savoir maintient le Centre dans un rôle constant de liaison entre l'Université et le milieu québécois. Etudiants et professeurs de la communauté universitaire bénéficient d'une bibliothèque de référence de plus de trois cents instruments de recherche sur le Québec. Le Centre se préoccupe de la diffusion des recherches les plus actuelles sur le Québec auprès de Centres d'études et d'Universités tant au Québec qu'en Amérique du Nord dont les intérêts rejoignent les siens.

Lieu d'enseignement, le Centre complète et approfondit les cours portant sur le Québec offerts dans les Départements de la Faculté des Arts. Avec l'appui des Départements, le Centre offre un programme d'études interdisciplinaires avec concentration Majeure en Etudes canadiennes-françaises. Ce programme interdisciplinaire est conçu dans le but de fournir un enseignement aussi complet que possible sur la société québécoise à l'intérieur d'un cadre canadien et international.

LE PROGRAMME MAJEUR EN ETUDES CANADIENNES-FRANCAISES

Le Programme Majeur comprend une suite agencée de cours portant sur la société québécoise dispensés au Centre et dans les Départements. L'étudiant(e) inscrit(e) dans le Programme Majeur doit compléter un minimum de 54 crédits répartis dans les disciplines académiques disponibles au Centre ou, le cas échéant, dans les Départements. Au moins 30 crédits devront être accumulés dans les disciplines suivantes: Histoire, Science politique, Littérature, Sociologie et Economique, soit un minimum de 6 crédits par discipline. De plus, l'étudiant(e) devra compléter son programme en s'inscrivant au cours de "tutorat" (157-472D) évalué à 6 crédits. Les 18 crédits restants peuvent être disposés au choix à l'intérieur des disciplines susmentionnées, avec l'approbation du Directeur ou de son remplaçant.

Il est recommandé que les étudiant(e)s qui souhaitent poursuivre des études au niveau gradué dans une des disciplines reconnues pour le Programme Majeur préparent une concentration dans la discipline de leur choix.

Pour tout renseignement supplémentaire, veuillez vous adresser au Directeur ou à son remplaçant, Centre d'Etudes canadiennes-françaises, 3475, rue Peel (392-5200).

The *Centre d'Etudes canadiennes-françaises* is an interdisciplinary teaching and research unit that includes Québec society as an area focus. The study of Québec society primarily from the perspective of the Social Sciences is the mainstay that has afforded the Centre a recognized standard of excellence in research in areas such as the history and the government of Québec. Through its varied activities involving research, teaching and other public forms facilitating the extension of knowledge, the Centre maintains a vital link between the University and the Québec community. A reference library containing extensive research material on Québec is at the disposal of students and professors. Ongoing contacts with universities in Québec and throughout North America enable the Centre to share in the dissemination of research with other Area Studies Centres with similar interests.

As a teaching unit, the Centre extends and complements the work of Departments with course offerings on Québec society. With the support of Departments, the Centre offers an interdisciplinary Major in French Canada Studies, designed for a comprehensive understanding of Québec society in a Canadian and in an international context.

MAJOR PROGRAM IN FRENCH CANADA STUDIES

The Major Program consists of a detailed sequence of courses related to Québec society offered at the Centre and in the relevant Departments. A student majoring in French Canada Studies is expected to complete a minimum of 54 credits in courses distributed in disciplines available at the Centre or in the appropriate Departments. At least 30 credits are to be taken in courses in History, Political Science, Literature, Sociology and Economics with a minimum of 6 credits in each discipline. In addition, the student in his/her final year is required to complete the research tutorial (157-472D) worth 6 credits. The remaining 18 credits can be freely distributed within the above sequence, with the approval of the Adviser. Students who intend to pursue graduate studies in any of the disciplines that are part of the interdisciplinary Major are encouraged to concentrate on an area in the discipline that meets with their interest.

To inquire about the program, students should contact the Director, or his delegate at the Centre d'Etudes canadiennes-françaises, 3475 Peel Street (392-5200).

Courses Offered by the Centre d'Etudes Canadiannes Francaises

157-200A INTRODUCTION TO QUEBEC SOCIETY. (3 credits). This special survey course will discuss the major historical developments in the economic, social, intellectual and political life of Québec society in the XXth century, with special attention to the post 1945 period. It is designed to familiarize students with some of the fundamental issues in contemporary Québec. Topics covered include English-French relations, the impact of industrialization, labour legislation, the role of Church and the State, the rise and content of the separatist ideology, the evolution of revolutionary ideas, violence, the role of the media and the study of mass culture. A reading knowledge of French is suggested. (Not open to students who have taken 157-210B).
Professor LaPierre

157-220B INTRODUCTION A L'HISTOIRE DE LA SOCIETE QUEBECOISE. (3 crédits). Les objectifs de ce cours d'introduction sont doubles: familiariser les étudiants avec les instruments de recherche et l'historiographie québécoise, évoquer les grandes étapes du développement économique, social et politique de la société québécoise depuis la Confédération jusqu'à la Révolution tranquille.
Professeur Roy

157-226A INTRODUCTION A LA VIE POLITIQUE QUEBECOISE. (3 crédits). Une introduction à la vie politique québécoise à travers l'étude des institutions, des idéologies et des comportements politiques. Une attention particulière sera accordée à la

structure et aux changements dans le système politique québécois.
Professor MacLeod

157-300A HISTOIRE CULTURELLE DU QUEBEC I. (3 crédits). Introduction générale. La culture pré-industrielle du Québec (1775-1840): civilisation traditionnelle (tradition orale, contes, culture matérielle. . .) et culture livresque (l'imprimé, la presse, la poste, les bibliothèques...) Culture et groupes sociaux: l'idéologie libérale et les Révolutions américaine, française et bas-canadienne (1837-1838). (Les étudiants qui ont déjà suivi 157-300D ne peuvent s'inscrire à ce cours.)
Professeur Yvan Lamonde

157-301A HISTOIRE DE L'EDUCATION AU QUEBEC. (3 crédits). Ce cours, donné en collaboration avec la Faculté des Sciences de l'Education, traite de l'histoire de l'éducation au Québec depuis la Confédération, y compris une brève étude de l'éducation à l'époque de la Nouvelle-France, et avant la Confédération. *Ce cours ne sera pas donné en 1977-78.*

157-303A HISTOIRE SOCIALE DU QUEBEC 1867-1921. (3 crédits). Un demi-siècle de changements sociaux et économiques transforme la société québécoise en une société industrielle et urbaine. Les groupes d'intérêts, syndicats, mouvements coopératifs, associations scientifiques, corporations professionnelles, etc. sont forcés de se définir. La contestation politique et sociale génère des conflits nombreux. Les pouvoirs, Eglise, Etat, milieux d'affaires ajustent et consolident leur emprise sur une société en profonde mutation. Quelles sont les causes externes et internes de ces changements et quels en furent les effets matériels et culturels?
Professeur Roy

157-304B CULTURE ECONOMIQUE ET CULTURE POLITIQUE AU QUEBEC ET AU CANADA. (3 crédits). Les canadiens-français ont-ils une attitude particulière face à l'activité économique? Comparaison avec les Etats-Unis et le Canada anglais, la notion de compétition, le paradigme de Pareto dans les comportements économiques et politiques au Canada français. L'importance du coopératisme. Relations entre les conceptions de l'activité politique et de l'activité économique chez les deux communautés canadiennes. Relations entre progrès technologique et développement économique. Impact des politiques fédérales et intervention du gouvernement québécois dans le developpement économique 1867-1975.
Professeur Pierre Lamonde

157-310B HISTOIRE CULTURELLE DU QUEBEC II. (3 crédits). Introduction générale. La culture industrielle du Québec (1840-1900): démographie, urbanisation, révolutions des transports, de la technologie et des communications (télégraphe, téléphone). La culture bourgeoise et les biens de consommation (marchés, importation, le catalogue.) La culture urbaine ouvrière (temps de travail, temps de loisir). L'apparition de la culture populaire de divertissement (cirque, théâtre, parc, exposition, sport, vaudeville). (Les étudiants qui ont déjà suivi 157-300D ne peuvent s'inscrire à ce cours).
Professeur Yvan Lamonde

157-313B HISTOIRE SOCIALE DU QUEBEC 1921-1960. (3 crédits). Urbaine et industrielle, la société québécoise fait face à d'innombrables problèmes économiques et sociaux aggravés par la crise économique et la guerre. Les élites cléricales et politiques refusent de consentir les transformations devenues indispensables. Les élites intellectuelles et nationalistes sont divisées quant à l'orientation à donner à la société québécoise. Lentement, dans les groupes sociaux et économiques, à l'Université, au sein de la fonction publique, dans les media, à l'intérieur de l'Eglise, des projets et des volontés de changement sont exprimés voire même expérimentés. Deux discours culturels s'affrontent, garder l'héritage/moderniser la société. Le demi-siècle étudié dans ce cours trouve son sens dans cet affrontement.
Professeur Roy

157-316A QUEBEC ET L'AMERIQUE DU NORD. (3 crédits). Ce cours tentera de répondre à la question suivante: dans quelle mesure et de quelle façon le Québec est-il, malgré sa spécificité culturelle, une communauté nord-americaine? Les principaux thèmes étudiés seront les suivants: les "freaks", la contestation, la violence, la drogue, la jeunesse. *Ce cours ne sera pas donné en 1977-78.*
Professeur Latouche

157-336B QUEBEC ET LE CANADA. (3 crédits). Comment les Canadiens anglais et les Québécois francophones se perçoivent-ils mutuellement? Existe-t-il des stéréotypes et des images communes? Quelles sont les principales différences culturelles entre les deux groupes? Comment la Révolution tranquille a-t-elle été perçue au Canada? Quelles sont les perspectives d'avenir envisagées par les deux groupes?
Professeur Cloutier

157-360A QUEBEC AND THE THIRD WORLD. (3 credits). A study of the intellectual and literary relations between Québec and the Third World during the period 1945-1975. The linkage provided by the relevant works of Fanon, Trudeau, Césaire, Vallières and others will be analyzed in its socio-historical context and as a "key" toward an understanding of some major works of fiction and poetry geared to social change published in the Sixties in Québec. (A reading knowledge of French is suggested). *Not offered in 1977-78.*
Professor Dorsinville

157-366A THE MINORITIES IN QUEBEC I. (3 credits). This course will focus on the history and the distribution of minority groups in Québec. Topics for

analysis include: historical background; ethnic distribution; socio-economic composition; political involvement; process of adaptation (assimilation, isolation or coexistence).
Professor Caldwell

157-367B THE MINORITIES IN QUEBEC II. (3 credits). After a brief historical survey, this course will focus on the general relationship between the various minority groups and the larger francophone community. Topics for analysis include language rights; schooling system; social conflict; analysis of bi-lateral perceptions.
Professor Caldwell

157-370A QUEBEC 1960-1970: LA REVOLUTION TRANQUILLE. (3 crédits). Y a-t-il eu une Révolution Tranquille au Québec? Ses origines, ses causes, ses instigateurs. Quelles en ont été les principales composantes politiques, économiques, sociales et culturelles? L'évolution des mentalités et des structures au Québec durant cette période. Peut-on mesurer ces changements? Les tendanccs, les acteurs de cette période? La "fin" de la Révolution Tranquille? Jugement sur la Révolution Tranquille: les choses ont-elles vraiment changé au Québec depuis cette date? (This course will be given mostly in French; essays can nevertheless be written in English although reading knowledge of French is required. Anglophone students are encouraged to register.)
Professeur Latouche

157-371D LIVRES ET SOCIETE QUEBECOISE. (6 crédits). Travaux pratiques: problèmes actuels de la société canadienne-française. Ce séminaire de recherche est consacré à l'analyse des divers phénomènes socio-culturels et idéologiques qui se rapportent à l'Histoire de l'édition, de l'importation et de la distribution du livre au Québec et au Canada entre 1820 et 1960. L'analyse sectorielle et quantitative sera privilégiée. Travaux pratiques orientés vers la constitution d'un dossier cumulatif. *Ce cours ne sera pas donné en 1977-78.* (Les étudiants qui ont déjà suivi 157-370D ne peuvent s'inscrire à ce cours.)

157-390B SOCIETE QUEBECOISE ET PRODUCTION CULTURELLE. (3 crédits). Evolution parallèle de la société et des formes culturelles. Conditions et thématique de la production québécoise dans la peinture, dans la photographie, dans la caricature et dans la bande dessinée (19e et 20e siècles). Enseignement par équipes avec le personnel de musées et d'archives. Projections et analyse de documents.
Professeur Y. Lamonde et M.B. Morel

157-406B CULTURE ET CONTRE-CULTURE POLITIQUE AU QUEBEC ET AU CANADA. (3 crédits). Les origines et l'évolution récente de la culture traditionelle au Québec. L'apparition de la contre-culture, ses protagonistes, son contenu. La contre-culture a-t-elle été récupérée par le système? La libération individuelle face à la libération collective.
Professeur Moore

157-407B LITTERATURE FRANCOPHONE COMPAREE: QUEBEC, ANTILLES, AFRIQUE. (3 crédits). Historique et analyse socio-culturelle des principaux mouvements littéraires; étude intensive d'oeuvres capitales dans les genres poétique, romanesque et théâtral; définition de l'unité de ces littératures dans une esthétique post-européenne. *Ce cours ne sera pas donné en 1977-78.*

157-411B QUEBEC ET CANADIENS - FRANÇAIS. Séminaire de recherche. (3 crédits; *Prérequis:* 101-202D, 302D, 313D ou 157-220B ou autorisation du professeur). Etude historique de l'évolution des communautés francophones au Canada, à l'extérieur du Québec et des relations entre ces communautés francophones et la société québécoise. *Ce cours ne sera pas donné en 1977-78.*

157-426A ATTITUDES POLITIQUES, PARTIS ET COMPORTEMENTS POLITIQUES DANS LE QUEBEC CONTEMPORAIN. (3 crédits). Ce cours cherchera à identifier les principaux courants politiques que l'on retrouve aujourd'hui au Québec: indépendantisme, féderalisme, socialisme. Le rôle politique des syndicats et des mouvements de contestation sera par ailleurs étudié de façon particulière.
Professeur Latouche

157-436A LES INTELLECTUELS ET LA SOCIETE QUEBECOISE. (3 crédits). Existe-t-il une classe intellectuelle au Québec? Son évolution historique, son rôle dans l'évolution politique du Québec. Ses liens avec les intellectuels canadiens, américains et européens; le rôle de la communauté scientifique au Québec. Le développement des institutions intellectuelles, de leurs moyens d'action et leur impact. Une attention particulière sera portée à (1) la période de l'après-guerre, surtout celle de la Révolution Tranquille (2) aux mouvements tels que Cité Libre, Parti Pris, Mouvement Laique (3) à l'action catholique de ces mouvements.
Professeur Cloutier

157-456B L'ANALYSE DES POLITIQUES PUBLIQUES AU QUEBEC. (3 crédits). Peut-on parlcr d'une politique sociale, d'une politique de l'éducation, d'une politique de la culture au Québec? Problèmes de planification à court et à long terme au Québec; quels sont les facteurs qui président à la définition des politiques publiques au Québec; comment évaluer ces politiques; accroissent-elles ou diminuent-elles le degré de liberté individuelle et collective des Québécois; les systèmes de valeurs et idéologies qui sous-tendent ces politiques.
Professeur Moore

157-470D CULTURE DE MASSE ET MEDIA DE COMMUNICATION AU QUEBEC. (6 crédits). La culture populaire rurale et urbaine (1900-1970) au

Québec. Production de masse, consommation de masse, culture de masse: l'automobile comme phénomène à explorer. La consommation de biens et de loisirs: les spectacles traditionnels (vaudeville, théâtre...), les media nouveaux (cinéma, radio-télévision), l'évolution du loisir (parcs, terrains de jeux, salles de billard...), les changements des formes culturelles et sociales. Interviews, exposés d'information, recherche.
Professeur Yvan Lamonde

157-472D TUTORIAL. (6 crédits). Sous la direction du Directeur du Centre d'Etudes canadiennes-françaises ou d'un professeur, chaque étudiant en concentration canadienne-française devra choisir un sujet auquel il travaillera pendant une année. Sa recherche terminée, l'étudiant rédigera un essai qu'il présentera à ses collègues et à un panel de spécialistes, qui en discuteront.
Le Directeur

Courses Relevant to the Major Offered by Other Departments

(N.B. The following list is not exclusive; it aims only at presenting a sample of courses relevant to the Major available in other Departments).

ECONOMICS

154-200D ECONOMIC ANALYSIS AND APPLICATIONS. (6 credits).

154-211D INTRODUCTION TO CANADIAN ECONOMIC HISTORY. (6 credits).

54-321D THE QUEBEC ECONOMY. (6 credits)

54-304D CANADIAN ECONOMIC POLICY. (6 credits).

154-431A SEMINAR IN CANADIAN ECONOMIC HISTORY. (3 credits).

FRENCH LANGUAGE AND LITERATURE

125-204A CIVILISATION QUEBECOISE. (3 crédits).

125-205B CIVILISATION QUEBECOISE. (3 crédits).

125-208A LITTERATURE QUEBECOISE CONTEMPORAINE I. (3 crédits).

125-372D LE ROMAN QUEBECOIS JUSQU'EN 1945. (6 crédits).

125-373B LE ROMAN QUEBECOIS (1945-1960). (3 crédits).

HISTORY

101-202A CANADA TO 1867. (3 credits).

101-203B CANADA SINCE 1867. (3 credits).

101-303A QUEBEC SINCE 1840. (3 credits).

101-403D THE COMING OF THE QUIET REVOLUTION. (6 credits).

101-413D NATIONAL CONSCIOUSNESS AND RELIGION IN FRENCH CANADIAN LIFE AND SOCIETY. (6 credits).

POLITICAL SCIENCE

160-221D GOVERNMENT OF CANADA. (6 credits).

160-320A THE CANADIAN POLITICAL PROCESS I. (3 credits).

160-321B THE CANADIAN POLITICAL PROCESS II. (3 credits).

160-418A ELITES AND POLITICS. (3 credits).

160-421B PROBLEMS IN CANADIAN POLITICS AND GOVERNMENT. (3 credits).

SOCIOLOGY

166-214B INTRODUCTION TO SOCIOLOGY: CANADIAN SOCIAL STRUCTURE. (3 credits).

166-230B CLASS, ETHNICITY AND POLITICS IN CANADA AND IN QUEBEC. (3 credits).

166-307A SOCIAL MOVEMENTS AND COLLECTIVE BEHAVIOUR. (3 credits).

166-317B RESEARCH IN CANADIAN MASS COMMUNICATIONS. (3 credits).

166-453B COMPARATIVE ETHNIC RELATIONS. (3 credits).

CLASSICS (114)

Professors – P.F. McCULLAGH *(Hiram Mills Professor of Classical Philology)*; A. SCHACHTER
Associate Professors – A. FARMAKIDES; J.M. FOSSEY; M.J. SILVERTHORNE; P. VALERI-TOMASZUK; P. VIVANTE; G.M. WOLOCH *(on leave)*
Assistant Professors: T.W. RICHARDSON; G.L. SNIDER *(Chairman)*

Room 517, Stephen Leacock Building, 855 Sherbrooke St. West, Montreal, P.Q., H3A 2T7. Telephone 392-5227

Classics for the Specialist

The Department's honours programs are designed to train students who wish to pursue careers in Classics, Ancient History and Archaeology. Major programs give rather less intensive training and provide a useful background for students interested in the liberal arts or the social sciences.

Classics for the Non-Classicst

The Department offers numerous courses – many of which do not require a knowledge of Ancient Greek or Latin – designed for students in other programs

such as Anthropology, Art History, English, Linguistics, Modern Languages, Philosophy, Political Science, Religious Studies.

Students of languages, literature and history may in addition be interested in the introductory language courses offered by this Department, which enjoys an international reputation as a pioneer in this field.

The very nature of the subject itself – covering as it does not only the language and literature, but also the history, archaeology, art, religion, philosophy, politics and economics of an entire civilization – can provide the student with a satisfying and relevant background to a wide range of studies.

MAJOR PROGRAMS

NOTE: The following outlines represent Departmental requirements only. The attention of students is directed to the regulations of *Faculty* concerning *Programs*. Each student's program must also satisfy the regulations imposed by the Faculty of Arts.

Major in Classics (Classical Culture and Society)

(See Professor G.M. Woloch, L527, 392-5220)

The student will select 27 credits from each of the two groups of courses listed below, choosing a maximum of 12 credits at the 200-level from each group. The course 114-484 is required for all students in this program, and may be taken as part of either the first or second group.

Group 1. "Ancient Culture": e.g. Classics 200A, 202B, 203A/B, 204B, 207A, 208B, 241B, 242A, 300B, 305D, 307A, 309A, 340B, 400B, 405A, 406B, 484B.

Group 2. "Ancient Society": e.g. Classics 201A, 205D, 301D, 302A, 303D, 304A, 306B, 308B, 401A, 407A or 409A, 470D, 475A, 476B, 484B.

NOTES:

1. Students who wish to substitute for Non-Language courses a continuation sequence of courses in the original ancient Greek or Latin may do so.
2. Students who intend to pursue graduate studies in Classics should include a language component in their program.
3. Students may on occasion substitute for a course offered in the Department of Classics a course offered by another Department, subject to the approval of the Department of Classics.

Major in Classics (Ancient Greek)

(See Professor M.J. Silverthorne, L 528, 392-5222)

24 Credits in Ancient Greek Literature, including Classics 321A and 6 credits in Homeric Greek.
30 Credits in related courses chosen with the approval of the Department of Classics.

TOTAL: 54 Credits

Major in Classics (Latin)

(See Professor P.V. Tomaszuk, L524, 393-5219)

24 Credits in Latin Literature, including Classics 311A and 313A.
30 Credits in related courses chosen with the approval of the Department of Classics.

TOTAL 54 Credits

Major in Classics (Ancient Greek and Latin)

(See the Chairman, L517,392-5227)

Minimum Course Requirements

12 Credits in Intermediate Ancient Greek Literature, including Classics 114-321A and 6 credits in Homeric Greek.
6 Credits in Senior Ancient Greek Literature.
12 Credits in Intermediate Latin Literature, including Classics 114-311A, and 313A.
6 Credits in Senior Latin Literature.
18 Credits in Non-Language Courses approved by the Department of Classics.

Major in Classics (Classical History and Archaeology)

(See Professor J.M. Fossey, L529, 392-5226)

Minimum Course Requirements

24 Credits in Archaeology Courses offered by the Department of Classics (i.e. Classics 114-205D and 305D and 470D, and 475A, and 476B.
18 Credits in Ancient History i.e. Classics 114-201A and 241B and 301D and 303D).
6 Credits in Classics in Translation courses given in the Department of Classics.
6 Credits in a course or courses chosen with the approval of the Department of Classics.

NOTE: *This program does NOT lead to postgraduate work in Classics,* although it could qualify a student for research in various aspects of Roman and European Archaeology.

Major in Classics (Classical and Hellenic Studies)

(See Professor A. Farmakides, L516, 392-5222)

24-30 Credits in Modern Greek Language and Literature.
30 Credits in related courses chosen with the approval of the Department of Classics. (Note: These latter may include up to 12 credits in a second language, ancient or modern.).

TOTAL: 54 Credits

Major in Classics (Ancient and Modern Greek)

(See Professor A. Farmakides, L516, 392-5222)

Minimum Course Requirements

Classics 220D or 221A.
Classics 235A, 236A, 335A (which must be taken unless the student can prove proficiency in Modern Greek).
12 Credits in Intermediate Ancient Greek Literature.
à6 Credits in Senior Ancient Greek Literature.
18 Credits in Modern Greek Literature.
18 Credits in Non-Language Courses approved by the Department of Classics.

Interdisciplinary Major Programs

The Department of Classics participates in the following Interdisciplinary Major Programs

CLASSICS AND LINGUISTICS

1. *Classics (27 credits)*
The students will select a continuation sequence in either Ancient Greek or Latin. Six credits must be taken in the language not selected.

2. *Linguistics (27 credits)*

104-200A,B/104-201A,B INTRODUCTION TO THE STUDY OF LANGUAGE.

104-400A THEORY AND METHODS OF HISTORICAL LINGUISTICS.

104-401B SEMINAR IN HISTORICAL LINGUISTICS.

PLUS 15 Credits in other Linguistic Courses selected with due regard to prerequisites.

HUMANISTIC STUDIES

The language component may include Latin, Ancient Greek, or Modern Greek.

MODERN LANGUAGES

One of the modern languages may be Modern Greek.

HONOURS PROGRAMS

Honours in Classics

(See the Chairman, L517, 392-5227)

Minimum Course Requirements

24 Credits in Ancient Greek Literature, including Classics 114-321A and 6 credits in Homeric Greek.
24 Credits in Latin Literature, including Classics 114-311A and 313A.
24 Credits in Ancient Greek and Latin Language Courses at the 200 level, plus Non-Language Courses.
COMPREHENSIVE Honours Tutorial.

NOTES:

1 The Non-Language Courses may be chosen from among courses given within the Department, or courses offered by other Departments, chosen with the permission of the Department of Classics.
2 **Comprehensive Honours Tutorial.** Every Honours student will be assigned to a Tutor upon entry into the Honours Program. The Tutor will meet with the student regularly during Term, and will assign essays or other work on subjects related to the course work on which the student is engaged. The Tutor may also, where practicable, assign summer reading. It will also be the Tutor's function to assist the student in selecting a suitable sequence of courses. Satisfactory completion of the work involved will be a requirement for the Honours degree, and successful candidates will be provided with a testimonial letter stating that they have fulfilled this requirement.

Honours in Classics (Classical History and Archaeology)

(See Professor J.M. Fossey, L529, 392-5226)

24 Credits in Ancient Greek or Latin
12 – 18 Credits in the language not chosen above.
36 – 42 Credits in Archaeology and Ancient History courses offered by the Department of Classics
6 – 18 Credits in other courses. Comprehensive Honours Tutorial

TOTAL: 90 Credits

NOTES:

1. For the Comprehensive Honours Tutorial, please see "Honours in Classics", Note 2.
2. Students proposing to obtain an M.A. in Classics at McGill are advised to gain 18 credits in the second Classical language, and to consult the Department for the precise requirements for the M.A. in Classics.
3. Classics 114-200A and 202B may NOT be included in the student's required courses for this program.

Honours in Classics (Classical and Hellenic Studies)

(See Professor A. Farmakides, L516, 392-5222)

Minimum Course Requirements

Classics 114-220D or 221A.
Classics 114-235A, 236A, 335A.
Classics 114-213A.
18 Credits in Ancient Greek Literature.

18 Credits in Modern Greek Literature.
18 Credits in Latin Literature.
18 Credits in Non-Language Courses.

NOTES:
1. Classics 235A, 236A, 335A must be taken unless the candidate has reached a standard sufficient to satisfy the Department that he/she is proficient in Modern Greek.
2. The Non-Language Courses may be chosen from among courses given within the Department, or courses offered by other Departments, chosen with the permission of the Department of Classics.

JOINT HONOURS PROGRAMS

All Joint Honours Programs must have the approval of both Departments concerned. For Classics, see Professor P. Valeri-Tomaszuk, L524, 392-5219.

Formal arrangements exist for the following programs:

Joint Honours in Classics and History

(See Professor G.M. Woloch, L527, 392-5220)

1. Students must complete 36 credits in each Department for a total of 72 credits. The remaining 18 credits of electives may be chosen from among the offerings of other Departments at McGill but these electives should be chosen in consultation with the Honours advisers in the Departments of History and Classics.
2. Students will have the option of 6 credits in history courses offered by the Classics Department as part of the History requirement.

Joint Honours in Anthropology and Classical Archaeology

(See Professor J.M. Fossey, L529, 392-5226)

The Departments of Anthropology and Classics offer the following program leading to a Joint Honours B.A. degree:

1. Students must complete 33 credits in Anthropology and 39 credits in Classics, for a total of 72 credits. The remaining 18 credits may be chosen from among offerings of other Departments at McGill, but these electives should be chosen after consultation with advisers in the Anthropology and Classics Departments.

This program does NOT lead to post-graduate work in pure Classics, but it may qualify the student for Post-graduate work in Archaeology and Prehistory.

2. *Anthropology Requirements:*

9 Credits consisting of 3 of the following five "core courses": Anthropology 151-354A, 355B, 356B, 357A, Linguistics 104-230A.
3 Credits Anthropology 151-358B.
6 Credits consisting of 2 advanced level courses (i.e. with a 400 listing).
12 Credits consisting of any other 4 Anthropology courses.
3 Credits consisting of an independent research course (462A or 463B) in the U3 year. The project will be based upon the student's inter-disciplinary training in Anthropology and Classical Archaeology. The project will last for the entire year, with registration for one half course in Anthropology and one half course in Classics.

TOTAL: 33 credits.

3. *Classics Requirements:*

18 – 24 Credits in Archaeology courses.
6 – 12 Credits in Ancient Greek OR Latin.
6 Credits in Ancient History
3 Credits Classics 114-482B (Independent Research).

TOTAL: 39 credits.

NOTE: Classics 114-200A and 202B may NOT be included in the student's required Classics courses for this program.

Course Descriptions

NON-LANGUAGE COURSES

114-200A GREEK CIVILIZATION (FROM ITS BEGINNINGS TO THE PERSIAN WARS). (3 credits). A survey of Greek civilization (through lectures and self-study modules) from its beginnings in the Bronze Age down through the Persian Wars, including art and architecture, literature (Homer and Hesiod), philosophy and religion, archaeology and history (Herodotus). Classics 114-200A and 114-202B, which completes the survey, are companion courses, but students may elect either course, or both. Original sources will be read in translation. (Not open to students who have taken 114-200D).
Professor Snider and Staff

114-201A ANCIENT GREEK HISTORY. (3 credits). A survey of Ancient Greek History from the origins to the Roman Conquest. The Roman continuation of this course is 114-241B. (Not open to students who have completed 114-201D in previous years).
Professor Richardson

114-202B GREEK CIVILIZATION (FIFTH CENTURY B.C. AND LATER). (3 credits). A survey of Greek civilization of the fifth century B.C., including art and architecture, drama, philosophy and religion, archaeology and history (Thucydides). The continuation of Greek civilization (Hellenistic and Byzantine) will be studied in modular form. Classics 114-200A and 114-202B, which completes the survey, are companion courses, but students may elect either one course, or both. Original sources will be

read in translation. (Not open to students who have taken 114-200D).
Professor Snider and Staff

114-203A/B INTRODUCTION TO GREEK MYTHOLOGY. (3 credits). A survey of the myths and legends of Ancient Greece.
Professor Snider

114-204B. INTRODUCTION TO ANCIENT GREEK RELIGION. (3 credits). A study of the religious practices of the Ancient Greeks.
Professor Schachter

114-205D INTRODUCTION TO CLASSICAL ARCHAEOLOGY: METHODS AND TECHNIQUES. (6 credits). Concerned essentially with the application of modern techniques to Classical Archaeology, and its connections with contemporary Europe.
Professor Fossey

114-207B CLASSICS IN TRANSLATION. (3 credits). Each student will select a single author or a field in which to specialize within the framework of a general discussion of Greek Literature from Homer to Aristotle.
Professor Vivante

114-208B ROMAN LITERATURE AND SOCIETY. (3 credits). Life and Society in the Roman Empire as reflected in contemporary authors of varying genres (epic, history, philosophy, satire and the novel).
Professor Richardson

114-241B ANCIENT HISTORY (ROMAN). (3 credits). A survey of Roman history. (Not open to students who have completed 114-201D).
Professor Richardson

114-302A WOMEN IN CLASSICAL DRAMA. (3 credits). A study of heroines of Greek tragedy and of female stereotypes in Greek and Roman comedy. Special emphasis will be placed on the permanence of certain literary themes (e.g., divine birth, the shrewish wife, the foreigner) and on the reemergence of others in modern drama (e.g. *Antigone, Electra).* An attempt will be made to relate the literary types to what is known about the actual status of women in classical antiquity.
Professor Valeri-Tomaszuk

114-305D GREEK AND ROMAN ARCHAEOLOGY. (3 credits). The archaeology of the Greek and Italian peninsulas and related areas from Neolithic times down to the Hellenistic-Roman period.
Professor Fossey

114-400A THE IDEA OF EPIC. (3 credits). This course will be a criticism of the idea of epic. It will, therefore, attempt to elucidate the relation between subject-matter and poetic form, over and above the theory of literary *genres.* Greek Literature will provide the main reference point, but the treatment will be conceptual rather than historical, dealing with the way in which the raw materials of myth or history are rendered into poetry.
Professor Vivante

LANGUAGE COURSES

114-211A LATIN LANGUAGE LEVEL ONE: INTRODUCTORY LATIN. (3 credits). A course for beginners. (The normal continuation of this course is 114-212B).
Professor McCullagh

114-212B LATIN LANGUAGE LEVEL TWO. (3 credits; *Prerequisite:*Latin Language Level One or its equivalent). Review and reading for students who have had some Latin but who have not recently completed a High School Latin program, or for those who have successfully completed Latin Language Level One (114-211A).
Professor McCullagh

NOTE: *Students entering 200 level Latin courses (except 114-211A) will be required to sit a placement test during the first week of term to allow staff to determine their degree of prior preparation.*

114-213A LATIN LANGUAGE LEVEL THREE. (3 credits; Prerequisite: Latin Language level two or its equivalent). Reading and Advanced Grammar.
Professor Richardson

114-220D INTRODUCTORY ANCIENT GREEK. (9 credits). For students who have not matriculated in Ancient Greek. NOTE: This class meets four times per week.
Professor Schachter

114-235A MODERN GREEK GRAMMAR 1: READING AND WRITING: ELEMENTARY TO INTERMEDIATE. (3 credits; *Co-requisite: 114-236A* or permission of the instructor). A course for all beginners in Modern Greek.
Professor Farmakides

114-236A MODERN GREEK SPOKEN I. UNDERSTANDING AND SPEAKING, ELEMENTARY. (3 credits; *Prerequisite:* A course for non-Greek beginners in 114-235A; *Co-requisite:* 114-235A or permission of the instructor).
Professor Farmakides

114-237B MODERN GREEK GRAMMAR 2. (3 credits; *Prerequisite:* 114-235A and 236A or permission of the instructor: *Co-requisite:* 114-238B or permission of the instructor). Intermediate grammar, etymology and translation. An introduction to the synchronic study of the language. (Not open to students who have taken 114-335D).
Professor Farmakides

114-238B MODERN GREEK SPOKEN 2. (3 credits; *Prerequisite:* 114-235A and 236A or permission of the instructor: *Co-requisite:* 114-237B or permission of the instructor). This course is designed, particularly, but not exclusively, for *non-Greek-speaking* students who have successfully completed 114-235A and 114-236A and/or

are concurrently attending 114-237B. It is intended to bring students to a level of competence in the use of the language, to enable them to proceed to the courses in literature.
Professor Farmakides

LITERATURE COURSES: LATIN

114-214B INTERMEDIATE LATIN LITERATURE. (3 credits: *Prerequisite:* 114-213A or its equivalent). Readings in Latin Prose and Poetry. Not open to those who have taken 114-214D (210D) in previous years.
Professor Richardson

114-310B INTERMEDIATE LATIN LITERATURE: MEDIEVAL LATIN II. (3 credits; *Prerequisite:* Classics 114-214B or permission of the Department). A rapid reading course.
Professor McCullagh

114-311A INTERMEDIATE LATIN: POETRY. (3 credits; *Prerequisite:* as for 114-310B). Readings in Vergil: *Aeneid.*
Professor Valeri-Tomaszuk

114-313A INTERMEDIATE LATIN: PROSE. (3 credits; *Prerequisite;* as for 114-310B). Cicero: selections.
Professor Silverthorne

114-317B INTERMEDIATE LATIN (PROSE). Sallust. (3 credits; *Prerequisite:* as for 114-310B).
Professor Valeri-Tomaszuk

114-410 to 114-419 SENIOR LATIN LITERATURE (POETRY). *(Prerequisite:* Intermediate Latin Literature or permission of the Department). A course totalling three credits will be given in this field. *Offered in 1977-78:* 114-415A (3 credits).
Professor Valeri-Tomaszuk

114-450 to 114-459 SENIOR LATIN LITERATURE (PROSE). *Prerequisite:* as for 114-410 to 114-419). A course totalling three credits will be given in this field. *Offered in 1977-78:* 114-457B (3 credits).
Professor McCullagh

LITERATURE COURSES: ANCIENT GREEK

114-321A INTERMEDIATE ANCIENT GREEK: PROSE. (3 credits; *Prerequisite:* Classics 114-220D of permission of the Department). Plato, *Apology;* Xenophon, *Apology;* composition based on Plato, *Crito;* grammatical review.
Professor Schachter

114-322B INTERMEDIATE ANCIENT GREEK: PROSE. (3 credits; *Prerequisite:* as for 114-321A). Readings in Greek authors.
Professor Silverthorne

114-323A INTERMEDIATE ANCIENT GREEK: HOMER. (3 credits; *Prerequisite:* as for 114-321A). Elements of Homeric grammar, prosody and metre; survey of the historical background; reading and translating of some relevant passages of the *Iliad* with pertinent commentary and discussion (Not open to students who have taken 114-323D).
Professor Vivante

114-324B INTERMEDIATE ANCIENT GREEK (POETRY). (3 credits; *Prerequisite:* as for 114-321A). Readings in Ancient Greek poets. For 1977-78. Homer, *The Odyssey.* (Not open to students who have taken 114-323D).
Professor Vivante

114-420 to 114-429 SENIOR ANCIENT GREEK LITERATURE (POETRY). A course totalling three credits will be given in this field. *(Prerequisite:* Intermediate Ancient Greek Literature or permission of the Department). *Offered in 1977-78:* 114-427B. (3 credits).
Professor Vivante

114-460 to 114-469 SENIOR ANCIENT GREEK LITERATURE (PROSE). A course totalling three credits will be given in this field. *(Prerequisite:* as for 114-420 to 114-429). *Offered in 1977-78:* 114-466A (3 credits).
Professor Silverthorne

LITERATURE COURSES: MODERN GREEK

114-335A MODERN GREEK LITERATURE I. INTERMEDIATE. (3 credits; *Prerequisite:* 114-237B or permission of the instructor). This course introduces undergraduate students to Modern Greek Literature and acquaints them with standards of language determined by some of the best modern Greek writers. (Not open to students who have taken 114-335D in previous years).
Professor Farmakides

114-430 to 114-439. SENIOR MODERN GREEK LITERATURE. One course totalling three credits will be given in this field. *(Prerequisite:* 114-337B or permission of the instructor). *Offered in 1977-78:* 114-435A, 19th CENTURY (PROSE). (3 credits).
Professor Farmakides

SENIOR CLASSICS SEMINARS

114-448A PAUSANIAS AT DELPHI. (3 credits). Reading of Pausanias' description of the sanctuary and other related documents, literary and epigraphical.
Professor Schachter

114-449B GREAT BATTLES IN GREEK HISTORY. (3 credits). Reading of documents relating to some of the major battles in antiquity (e.g. Marathon, Salamis, Plataia, Chaironeia).
Professor Schachter

114-475A ROMAN BRITAIN. (3 credits; *Prerequisite:* Classics 114-205D and 114-305D or permission of the Department). The Archaeology and History of Britain as a province of the Roman Empire, including the Iron Age Background and the decay of Roman culture in the island during

the fifth century A.D. Particular attention will be given to the evidence of inscriptions.
Professor Fossey

114-476B HOMERIC ARCHAEOLOGY. (3 credits). The relation of the Greek oral traditions to the results of archaeological investigation. This course is aimed both at classicists who want to see another dimension to Homer, and at archaeologists with an interest in societies having an oral tradition. Material will be so organized that the course can be taken with profit both by those who know Greek and by those who do not. (This course is not suitable for those taking Classics 114-305D).
Professor Fossey

COMPREHENSIVE COURSES

114-482B INDEPENDENT RESEARCH COURSE FOR STUDENTS IN JOINT HONOURS IN ANTHROPOLOGY AND CLASSICAL ARCHAEOLOGY. (3 credits).
Professor Fossey

UNDERGRADUATE CLASSICS COURSES WHICH WILL NOT BE OFFERED IN 1977-78.

NOTE: Many of these courses will be offered in 1978-79.

114-211A ANCIENT GREEK FOR SPEAKERS OF MODERN GREEK.

114-300B GREEK DRAMA AND THE THEATRE.

114-301D SEMINAR IN ANCIENT GREEK HISTORY.

114-303D SEMINAR IN ROMAN HISTORY.

114-304A GREEK POLITICAL IDEAS.

114-306B THE ROMAN CITY IN CIVILIZATION.

114-307A INTRODUCTION TO ROMAN COMEDY.

114-308B THE BARBARIAN KINGDOMS AND THE LATER ROMAN EMPIRE.

114-309A THE GREEK AND ROMAN NOVEL (IN TRANSLATION).

114-312B INTERMEDIATE LATIN: POETRY.

114-314B INTERMEDIATE LATIN LITERATURE. PROSE.

114-315A INTERMEDIATE LATIN LITERATURE: POETRY.

114-316B INTERMEDIATE LATIN LITERATURE: POETRY.

114-318B INTERMEDIATE LATIN LITERATURE: PROSE.

114-315A INTERMEDIATE LATIN LITERATURE: POETRY.

114-336B INTRODUCTION TO MODERN GREEK LITERATURE 2.

114-337B MODERN GREEK GRAMMAR 3.

114-338B MODERN GREEK LITERATURE OF THE 20TH CENTURY 1: POETRY.

114-340B PROBLEMS IN GREEK MYTHOLOGY.

114-401A HELLENISTIC HISTORY.

114-403A MODERN GREEK HISTORY: FROM 1204 to 1821.

114-404B MODERN GREEK HISTORY: FROM 1821 to 1945.

114-405A GREEK AND ROMAN LITERARY CRITICISM.

114-406B ROMAN COMEDY AND HUMOUR.

114-407A LATER GREEK PHILOSOPHY.

114-409A INTRODUCTION TO GREEK AND ROMAN NUMISMATICS.

114-442B STYLE AND COMPOSITION.

114-470D REGIONAL STUDIES IN CLASSICAL ARCHAEOLOGY.

114-471D ROMAN IMPERIAL HISTORY.

114-472D GREECE UNDER THE ROMAN EMPIRE.

114-473A GREEK AND ROMAN RELIGIOUS IDEAS.

114-474B GREEK RELIGIOUS PRACTICES.

EAST ASIAN LANGUAGES AND LITERATURES (117)

Associate Professor – P.T.K. LIN *(Chairman)*
Assistant Professor – W. GEDDES
Lecturers – J. CHANG, P. WANG

3434 McTavish Street,
Montreal, P.Q. H3A 1X9
Telephone: 392-4582

General Information

The Chinese language courses introduce both traditional characters as well as the simplified characters used in the People's Republic of China. Textbooks used are published in China, and supplemented by teaching materials prepared by the departmental staff.

During the academic year 1977-78, two levels of Japanese language will be offered. A Japanese literature course in translation will be offered for students who are interested in Japanese literature but unable to read Japanese.

It is hoped that students majoring in East Asian Studies will enrol in the language courses in addition to any other students interested in learning the language. Honours students must complete a three-year language sequence.

In order to accelerate language proficiency and to approximate a "total immersion" approach, cultural activities are organized by the department and the students, including luncheons where conversation is conducted in Chinese and Japanese.

Course Descriptions

117-201D INTRODUCTION TO CHINESE LITERATURE. (6 credits, *Prerequisite:* Chinese 117-210D or 211D or equivalent) *Not given 1977-78.* A survey of the historical background of Chinese literature and the evolution of literary forms and styles in Chinese from the Confucian period to modern times.
Professor

117-210D FIRST LEVEL CHINESE. (6 credits). Introduction to the use of modern Chinese language (Mandarin), including instruction in basic grammar and patterns, with emphasis on speaking and pronunciation. Direct methods, as well as filmstrips and tape recordings are used for audio-lingual achievements.
Mrs. Wang

117-211D INTRODUCTION TO CONVERSATIONAL CHINESE. (6 credits). This course is designed for students with some background in the Chinese written language, who wish to perfect their ability to speak Chinese.
Ms. Chang

117-220D SECOND LEVEL CHINESE. (6 credits; *Prerequisite:* Chinese 117-210 or the equivalent). A continuation of Chinese 117-210D with more advanced study of Chinese language in both aspects of reading and conversation; grammar, vocabulary building and writing practice. Basic literary structures will be introduced, permitting the students to become familiar with the literature.
Mrs. Wang

117-310D THIRD LEVEL CHINESE. (6 credits; *Prerequisite:* Chinese 117-220D or the equivalent). Based upon the literary level achieved in Chinese 220D, more advanced texts will be studied including original materials. Further examination of Chinese compounds and sentences with special emphasis on syntax explanation. (Not open to students who have taken 117-300D).
Ms. Chang

117-410D FOURTH LEVEL CHINESE. (6 credits; *Prerequisite:* Chinese 117-310D or the equivalent). Emphasis is on reading skills and writing ability in addition to free discussion. Materials studied include original texts from Chinese literature, drama, government documents and newspapers. (Not open to students who have taken 117-400D).
Ms. Chang

117-205D HISTORY OF JAPANESE LITERATURE (6 credits) *Offered in alternate years; not given in 1977-78.* A survey of the historical background of Japanese literature up to the contemporary period. Students are referred to translated texts, and knowledge of Japanese is not required.
Professor Geddes

117-215D FIRST LEVEL JAPANESE. (6 credits). Introduction to the basic grammar and sentence patterns of the Japanese language in both oral and written forms. In reading and writing skills students will be introduced to *katakana* and *hiragana*, and approximately 300 *kanji*.
Professor Geddes

117-216D SECOND LEVEL JAPANESE. (6 credits; *Prerequisite:* 117-215D or the equivalent). Continuation of the study of oral and written Japanese. More complex sentence structures, the use of *keigo*, and approximately 500 more *kanji* will be introduced.
Professor Geddes

117-315D THIRD LEVEL JAPANESE. (6 credits; *Prerequisite:* 117-216D or the equivalent). More advanced study of the Japanese language. Emphasis will be placed on practice in conversation and composition. On completion of the course, students will have learned all of the *toyo kanji*.
Professor Geddes

117-305D CONTEMPORARY JAPANESE LITERATURE. (6 credits) *Not given in 1977-78.* Discussion of creative writings by several representative authors, using both translations and original texts. Some knowledge of the Japanese language is desirable, but not required.
Professor Geddes

117-306D THE JAPANESE NOVEL IN ENGLISH TRANSLATION. (6 credits). *Offered in alternate years. Given in 1977-78.* A study of the development of Japanese fiction. Major prose works ranging from the earliest classics through contemporary writing will be read in English translation. The continuity of native Japanese forms and values despite the pressure of foreign cultural and literary influxes will be stressed. No knowledge of Japanese is required.
Professor Geddes

117-405D ADVANCED TOPICS IN JAPANESE LITERATURE. (6 credits; *Prerequisite:* 117-305D or the equivalent). *Not given in 1977-78.* Consideration of selected topics and aspects of Japanese literature. The content of the course may vary from year to year, ranging from contemporary, modern to pre-modern literature.
Professor Geddes

117-492D TUTORIAL. (6 credits). Advanced reading course in language or literature.

112-493D SEMINAR: COMPARATIVE STRATEGIES OF DEVELOPMENT IN EAST ASIA. (See entry under Centre for East Asian Studies).
Professor Lin

ECONOMICS (154)

Professors – A. ASIMAKOPULOS *(Chairman)*; E.F. BEACH; I. BRECHER; E. KIERANS; J.C. WELDON; H.R.C. WRIGHT

Associate Professors – A. DEUTSCH; A. FENICHEL; M. FRANKMAN; C. GREEN; J.A. GALBRAITH; J. HANDA; S.H. INGERMAN; J. ITON *(on leave 1977-78)* J. KURIEN; K. LEVITT; M.F. LOUTFI; J.C.R. ROWLEY; L. SODERSTROM *(on leave 1977-78)* T. VELK; A. VICAS

Assistant Professors – P. DAVENPORT; G. GRANTHAM *(on leave 1977-78)*; F. MARTIN; R.T. NAYLOR

Sessional Lecturer – C. BOMBARDIER; J. McPHERSON

Room 434, Stephen Leacock Building,
Montreal, P.Q. H3A 2T7.
Telephone 392-5239.

HONOURS PROGRAMS

All honours students must be registered by the Departmental Honours Adviser at the beginning of each year of their Honours program. An Honours student is not permitted to register for a general course where a parallel Honours course is offered. Honours students in economics are expected to take a minimum of 42 credits in approved economics courses over the three years of their program. These generally include 154-250D, 154-350D, 154-352D, 154-357D and 154-450D.

The Economics Honours program is offered to both B.A. and B.Com. students. The program allows for specialization in various fields in economics, such as labour, international trade, money and banking, development, economic history, etc.

HONOURS STANDING

Students who wish to enter Honours in their U2 year must show evidence of adequate preparation.

To remain in Honours, a student must obtain an A or B in 154-250D and a 3.0 average in the Honours subjects. An Honours student is expected to maintain a G.P.A. of 3.0 in all subjects.

A U1 student who narrowly missed the criteria to remain in Honours as stated in the preceding paragraph may apply for "redemptive" status for the U2 year. If granted, the student is not registered in Honours, but may take Honours courses. With acceptable progress the student may be readmitted to Honours in the U3 year.

The Honours standing awarded on graduation is determined by the results of the final year in conjunction with the student's entire record.

MATHEMATICS

Much of the modern literature in Economics makes use of mathematical techniques. To enable honours students to work effectively with this literature, we recommend that during their program students master as much as possible of the material taught in the folllowing courses (or their equivalents):

189-233A – Mathematics For Economists I
189-234B – Mathematics For Economists II

The student may alternatively take:

189-120A or B – Calculus I
189-121A or B – Calculus II
189-245A or B – Linear Algebra

U1 YEAR

Economics: 154-250D, 154-357D. (May be taken in U1 or U2). (Recommended optional course: Mathematics 189-120A, B and 189-121A,B).

U2 YEAR

Economics: 154-350D, 154-352D, 154-357D (May be taken in U1 or U2). (Recommended optional course: Mathematics 189-245A and 189-246B).

U3 YEAR

Economics: 154-450D.

Other Economics courses approved by the Honours Adviser.

JOINT HONOURS

Joint Honours programs between Economics and various other departments in the Faculty of Arts exist. As a general rule, a Joint Honours program involving Economics requires a minimum of thirty credits from approved courses in Economics. These include 154-250D, 154-350D, 154-352D, 154-357D and 154-450D.

THE MAJOR PROGRAM

The Major Program in Economics is a planned sequence of courses designed to permit the student a degree of concentration in economics. It consists of 54 credits in courses approved by the Majors Committee of the Economics Department.

A student choosing a Major in Economics must take at least 30 credits of economics in addition to Economics 200D or its equivalent, and must normally take them at McGill. The economics courses will be selected from the courses shown below:

A. Prerequisite

Economics 200D or its equivalent: Economic Analysis and Applications.

B. Required Courses (12 credits)

Economics 300A – Intermediate Microeconomics.
Economics 310B – Intermediate Macroeconomics.
Economics 317D – Economic Statistics for Arts students.

C. Economics Elective Courses: At least 18 credits from other 200, 300, and 400 level courses.

D. Other Approved Courses:

In addition to the minimum of 36 credits in Economics, the student will choose a total of 18 credits from *two* of the following fields:

Anthropology
Economics
French Canada Studies
Geography
History
Mathematics
Philosophy
Political Science
Psychology
Scoiology

All students who wish to begin (or continue) a Major *must* register with the Majors Committee in the Department of Economics prior to general registration in each of their university years. Further information may be obtained from Professor A. Fenichel, Leacock 533, telephone: 392-5886.

Course Descriptions

Supplementary Information: This announcement is prepared early in the year and so is likely to need modification by the time the academic year begins. A mimeographed supplement is available at the departmental office in September and should be consulted prior to registration with the Honours or Major advisers.

Economics 200D OR 250D is normally a **prerequisite** for all 300 and 400 level courses in Economics. Students whose previous training is deemed adequate for taking specific courses at the 300 or 400 level may be exempted by the instructor. A departmental representative will be available to advise students and program advisers in other departments on individual course prerequisites.

NOTE: ● Denotes a course not offered in 1977-78.

154-200D ECONOMIC ANALYSIS AND APPLICATIONS. (6 credits). A University level introduction to price theory, national income determination, money and banking, international trade theory and economic policy. The course will be given in several sections. Sections will be designed to accommodate students with varying backgrounds in economics.
Professors Beach, Deutsch, Fenichel, Green, Naylor, Velk and Weldon

154-201D INTRODUCTION TO EUROPEAN ECONOMIC HISTORY (6 credits). A survey course in western economic history from classical times to the twentieth century. The course will consider the evolution of economic institutions and the process of economic growth. Topics covered include demographic change, agrarian institutions, financial and industrial organization, technological change and the expansion of trade and markets.

154-202B ECONOMICS FOR ENGINEERS. (3 credits; Prerequisite: 189-263A or equivalent). An introduction to economics designed for engineering students. Economic theory will be developed using mathematical techniques where appropriate. Applications of economic theory to the analysis of economic problems, with particular reference to Canada, will be considered.
Professor Davenport

154-205D AN INTRODUCTION TO APPLIED POLITICAL ECONOMY. (6 credits). The concept of the corporation, the economics of crown corporations, the multi-national firm, resources policy and economic development of Québec.
Professor Kierans

154-211D INTRODUCTION TO CANADIAN ECONOMIC HISTORY. (6 credits). A survey of the economic basis of Canadian history from the French regime to the twentieth century, with a view to examining the historical roots of contemporary problems of the Canadian economy and society. The structure role and evolution of economic institutions are stressed.
Professor Naylor

154-241D THE INTERNATIONAL ECONOMY SINCE 1850. (6 credits). The effect of economic change in Britain, France, Germany, and the United States on their role in the world economy and on the economic relations between nations. (Not open to students who have taken 154-201D in 1973-74 or previously).
Professor Wright

154-250D INTRODUCTION TO ECONOMIC THEORY. (6 credits). The standard topics covered in an intermediate level microeconomic course – theory of exchange; theory of consumer behaviour; theory of production and cost curves, theory of the firm; theory of distribution; general equilibrium; welfare economics – will be dealt with in the course. The assumptions underlying the traditional neoclassical approach to economic theory will be carefully specified and alternative theoretical approaches will be considered.
Professor Asimakopulos

154-300A INTERMEDIATE ECONOMIC THEORY. (3 credits). Microeconomics: Analysis of price determination in a market economy, problems of economic efficiency and market structures.
Professor Vicas

154-301B THE MODERN ECONOMIC HISTORY OF SOUTH ASIA. (3 credits, *Prerequisite:* any Economics 154-200 level course).
Professor Wright

154-302D MONEY AND BANKING. (6 credits). Principles of money, banking, and central banking covering the nature of money, measurement of money supply, determination of the quantity of money; sources of bank funds, uses of bank funds,

nature of central banking, monetary policy and the international payments system.
Professor Galbraith

• **154-304D CANADIAN ECONOMIC POLICY.** (6 credits). The objective of this course is to teach and to practise the use of simple tools of economics for the analysis of real life problems in a Canadian setting.
Professor Deutsch

154-305D GOVERNMENT AND BUSINESS. (6 credits). A study of the structure and performance of industrial markets, with particular emphasis on the problems of maintaining effective competition. Experience in Canada and other countries will be examined. Readings will cover leading law cases, as well as relevant economic literature.
Professor Green

154-306D LABOUR ECONOMICS AND INSTITUTIONS. (6 credits). Part A: Quantitative and qualitative characteristics of the Canadian labour force; evolution of the industrial relations system; history and structure of the labour movement, theories of the labour movement, elements of labour law. Part B: Employment and unemployment; manpower policy; wage theory; collective bargaining and public policy; income distribution and problems of poverty; current policy issues. (This is a prerequisite course to 154-426D and 279-492D except in the case of Honours students).

154-310B INTERMEDIATE ECONOMIC THEORY. (3 credits). Macroeconomics: Analysis of economic stability; national income determination, economic fluctuations and growth, monetary and fiscal policy.
Professor Beach

154-311A UNITED STATES ECONOMIC DEVELOPMENT (6 credits; Prerequisite: any Economics 200 level course). A study of economic growth and institutional change in the United States to World War I. (Not open to students who have previously taken 154-311D).
Professor Fenichel

154-312D POLITICAL ECONOMY OF DEPENDENCE IN THE WESTERN HEMISPHERE. (6 credits). A comparative study of contemporary economic structures in the "peripheral" economies of Canada, the Caribbean and Latin America – with special emphasis on Canada and its constituent regions. The legacy of European colonization; trade and investment; operations of multinational corporations; preferences, common markets and foreign aid; the new economic nationalism of the western hemisphere.
Professor Levitt with Professors Fenichel and Noumoff

154-313D ECONOMIC DEVELOPMENT. (6 credits). The economics of structural change in developing countries. An examination of the applicability of economic theory in the context of development. Historical patterns of economic change in the developing world; economic planning; role of international trade and foreign aid in economic development; techniques of evaluating development projects; interdisciplinary problems of development.
Professors Kurien and Loutfi

• **154-314B AFRICAN ECONOMIC DEVELOPMENT.** (3 credits). An analysis of the processes of economic growth in tropical Africa. Special emphasis will be placed upon natural resources, population, infrastructure, agriculture, trade and aid, the role of government and the parastatal institutions. The course is especially recommeded to students enrolled in the African Studies Program, and for those wishing to continue in development economics.

154-315B ECONOMIC DEVELOPMENT OF CHINA. (3 credits). A consideration of economic change in China since 1949. Emphasis is on the approach China has taken to development, its success in solving problems in various sectors of the economy and a comparison with approaches to development used in other countries.
Professor Wright

154-317D ECONOMIC STATISTICS (6 credits). Distributions, averages, dispersions, sampling, testing, estimation, correlation, regression, index numbers, trends and seasonals.
Professor Beach

154-321D THE QUEBEC ECONOMY. (6 credits; Prerequisite: 154-200D or 154-205D or 154-211D). A study of the economic development of Québec and contemporary economic problems in the province. Topics include: agriculture and economic development (1780-1850); the industrial revolution in Québec (1850-1930); the Great Depression; the economics of the Quiet Revolution; unions and labour relations; poverty and welfare programs; health; unemployment and regional economic expansion; industrial structure and foreign ownership; the economics of Québec nationalism. (Not open to students who have previously taken 154-411A).
Professor Davenport

• **154-327A POPULATION ANALYSIS IN DEVELOPMENT ECONOMICS.** (3 credits; *Prerequisite:* any course in Development Economics). A review of theories of population growth, past trends and forecasts. Analysis of population change in developing countries, mortality, fertility, and migration. A study of interrelations between population growth and economic development in these less-developed economies.
Professor Iton

154-331A THE ECONOMIC DEVELOPMENT OF RUSSIA AND THE USSR. (3 credits; *Prerequisite:* any Economics 154-200 level course). An historical and analytical study of the special features of Russian economic development, mainly since 1890.
Professor Wright

154-341A THE ECONOMIC HISTORY OF CHINA AND JAPAN, MAINLY FROM 1840 TO 1949. (3 credits). A survey of the economic histories of China and Japan to the mid-20th century, emphasizing the factors underlying their contrasting economic patterns.
Professor Loutfi

154-350D HISTORY OF ECONOMIC THOUGHT. (6 credits). A critical study of the writings of the great economists, with particular reference to the period from Adam Smith to the present day.
Professors Brecher and Vicas

154-352D MACROECONOMICS. (6 credits). A rigorous treatment of basic macroeconomic theory, emphasizing the Classical and Keynesian ideas, for the short-run determination of output, employment, interest rates and prices in the economy. Elements of International Economics, Money and Banking and Growth Theory. The Structure of the Canadian Economy.
Professor Handa

154-357D ECONOMIC STATISTICS. (6 credits). Stochastic phenomena; probability and frequency distributions, introduction to probability theory. Statistical inferences about proportions, means and variances; analysis of variance; non-parametric statistics; index numbers and time series; economic forecasting; regression and correlation analysis; introduction to the general linear economic models, its uses and limitations; uses and misuses of statistics; Canadian economic statistics.
Professor Kurien

- **154-367D MATHEMATICAL ECONOMICS.** (6 credits). A mathematical treatment of basic economic theory.

- **154-400D THEORY OF THE FIRM.** (6 credits). The economic analysis of the firm: numerous case studies are used to supplement the survey of theory. Topics covered include pricing decisions by firms under different market conditions, the role of financial markets in affecting business behaviour, mergers, conglomerates and multinational corporations, crown corporations, the performance of firms in regulated industries.
Professor Vicas

154-402A ECONOMIC HISTORY OF LATIN AMERICA. (3 credits). The historical evolution of economic institutions in Latin America and the effect of that evolution on the economic development of that region from pre-colonial times through the end of World War II.
Professor Frankman

154-403B ECONOMIC DEVELOPMENT IN LATIN AMERICA. (3 credits). An analysis of the process of structural change and development of the Latin American economies since 1945.
Professor Frankman

154-404D TRANSPORTATION. (6 credits). History and development of the Canadian transportation system; economic characteristics of the various transportation media; comparative analysis of cost and rate structures; problems of regulation and control.
Professor McPherson

154-408D PUBLIC FINANCE. (6 credits). A survey of the economist's view of government activity. The theory of public spending and various modes of taxation is emphasized. Fiscal federalism and other Canadian institutions are reviewed in an analytical perspective.
Professor Deutsch

- **154-409D INVESTMENT ANALYSIS AND CORPORATION FINANCE.** (6 credits). Part 1 – investment; capital markets; investment funds; securities; concepts of income, risk, value and appreciation; analysis of financial statements; stock market; investment policy. Part II – Forms of business organization; growth of the corporation; the managerial revolution; sources of funds; management of fixed and working capital; ratio analysis; expansion, reorganization and valuation.

154-421D COMPARATIVE ECONOMIC SYSTEMS. (6 credits; *Prerequisite:* 154-200D or 154-250D or consent of instructor. It is desirable, but not required, that students should have taken 154-331A and 154-341A). A comparative study of the economic systems of contemporary states.
Professor Fenichel

- **154-423D INTERNATIONAL TRADE AND FINANCE.** (6 credits; for Major students). Theoretical and policy approaches to the study of international economic relations. Topics examined include: trade theory; tariff theory; trade and growth; balance of payments; adjustment; international monetary reform.
Professor Loutfi

154-425B ECONOMICS OF ECOLOGY. (3 credits). A study of the application of economic theory to the problems of ecology. Particular attention will be given to the measurement and regulation of pollution, congestion and waste and other environmental aspects of specific economies.
Professor Frankman

154-426D LABOUR ECONOMICS. (6 credits). This course will focus on inflation problems and incomes policy during the fall and on current unemployment problems during the spring. The discussion of unemployment will involve a review of traditional models of unemployment as well as recent work on the effects of the rapid growth of women and youths in the labor force, changes in unemployment insurance legislation and the search behaviour of employers and workers. The discussion of inflation and incomes policy will include a review of the literature on wage determination and the experiences

Canada and other countries have had with incomes policies.
Professor Ingerman

- **154-431A SEMINAR IN CANADIAN ECONOMIC HISTORY.** (3 credits; *Prerequisite:* 154-200D and either 154-211D or 154-321D). A discussion of selected topics in Canadian Economic History.
Professor Naylor

154-434B CURRENT ECONOMIC PROBLEMS. (3 credits). A discussion of contemporary problems of the Canadian economy. Topics will include the relations of big business and government, foreign investment and technological dependence, the distribution of income, the balance of payments, the economics of resource exploitation, and the "energy crisis". (Not open to students who have previously taken 154-454A).
Professor Naylor

154-440B HEALTH ECONOMICS. (3 credits; *Prerequisite:* 154-200D or consent of instructor). An examination of various problems in the provision of health services from an economist's perspective. Topics will include the determinants of health, the economic performance of physicians, hospitals and other providers of health services, and the determinants of demand for health services. Various proposed reforms of the health system will be reviewed. Readings will be drawn from the economics and health care literature.
Professor Bombardier

154-444A VALUES, INSTITUTIONS AND ENVIRONMENT IN ECONOMICS. (3 credits). A critical examination of the scope and method of economics, of the philosophical and value underpinnings of economic theory, and the influence of institutions and environment on 'economic' phenomena. Particular attention will be given to the works of writers who have dissented from the 'mainstream' of economics. (Not open to students who have previously taken 154-455B).
Professor Frankman

154-450D ADVANCED ECONOMIC THEORY. (6 credits). Selected topics in economic theory from recent periodical and monograph literature. Information on the topics to be covered can be obtained from the Department before registration.
Professors Asimakopulos and Weldon

- **154-451B SEMINAR IN ECONOMIC HISTORY.** (3 credits). In this course economic theory is explicity employed to elucidate issues in economic history. The topics will be announced at the beginning of the academic year. (Not open to students who have previously taken 154-401A).
Professor Grantham

154-453D INTERNATIONAL ECONOMICS. (6 credits, for Honours students). Analysis of the nature, effects and policy implications of international trade and finance. Topics receiving special emphasis will include: the pure theory of trade; the balance of payments and alternative exchange-rate systems; the terms of trade; the foreign-trade multiplier; regional integration; trade policy in developed and developing countries; problems of international liquidity and investment.
Professor Brecher

- **154-457A LINEAR PROGRAMMING AND INPUT –OUTPUT ANALYSIS.** (3 credits, *Prerequisite:* consent of the instructor). National Economic Accounting, including input-output, and flow of funds accounts. Analytical uses relating to the impact of public and other expenditures on incomes, imports, savings, employment, etc.

154-458D MONEY AND BANKING. (6 credits). An advanced undergraduate treatment of selected topics in money and banking, including the theory and practice of monetary policy.
Professor Velk

154-467D ECONOMETRICS (6 credits; *Prerequisite:* 154-357D or consent of instructor). Special emphasis on statistical tests of economic theories, the construction of econometric models, and problems in estimation methods.
Professor Rowley

154-468A URBAN AND REGIONAL ECONOMICS. (3 credits). This course is meant to be an introduction to location theory and to urban and regional economics. Its purpose is also to teach some elementary tools of analysis to people intending to do research, applied or pure, in this field.
Professor Martin

154-480A RESEARCH PROJECT. (3 credits; *Prerequisite:* open to U3 students). Students may undertake a research project under close supervision. They must also do such special reading and research as their advisers may direct.

154-481B RESEARCH PROJECT. (3 credits; *Prerequisite:* open to U3 students). Students may undertake a research project under close supervision. They must also do such special reading and research as their advisers may direct.

Where appropriate to a student's program, and with the permission of the program adviser, one or more of the following courses may be taken for credit by students enrolled in programs in Economics. 279-294A,B may be taken for credit by students in the Industrial Relations Major, but not as an elective for students taking a Major in Economics.

279-294A,B INTRODUCTION TO INDUSTRIAL RELATIONS. (6 credits). See Industrial Relations.

279-394B COLLECTIVE BARGAINING. (3 credits). See Industrial Relations.

279-491D INDUSTRIAL RELATIONS IN PRACTICE. (6 credits). See Industrial Relations.

279-492A PUBLIC POLICY IN INDUSTRIAL RELATIONS. (3 credits). See Industrial Relations.

EDUCATION (413)

See the separate *Announcement of the Faculty of Education* for complete information about courses leading to the Bachelor of Education degree.

A list of courses that might usefully serve as electives in an Arts and Science program for the purpose of providing interested students with a taste of what teacher education is all about can be found at the end of Section 5. Course Offerings in the Announcement of the Faculty of Education.

The course below is offered by members of the staff of the Faculty of Education as a subject for the B.A. or B.Sc. degree. This course does not lead to a teaching diploma.

413-406A INTRODUCTION TO COMPARATIVE EDUCATION. (3 credits; Open to students in U2 and U3). Study of the dynamics of education in various societies throughout the world. The ideas and approaches of several disciplines are utilized in order to gain an understanding of educational systems and problems in comparative perspective. (Not open to students who have taken 413-402D).
Professor Eisemon

Departmental Office: Room 155, Arts Building,
853 Sherbrooke Street West,
Montreal, P.Q. H3A 2T6.
Telephone 392-4987.

The Department of English divides its activities into three areas, which are regarded as linked and overlapping rather than segregated. These areas are literature, drama, and film and communications. All of the courses within the department are open to all McGill students in any department, with the exception of the Honours tutorials. Honours and Major students in English concentrate their work within one of the three areas, but are required also to do work in each of the two other areas.

MAJOR PROGRAMS IN ENGLISH

The Major program in English involves a balance between concentration and breadth of study. A student will normally concentrate his or her work within one of the three areas of the department's activities, and in each case will be required to take a 54 credit program,though the organization of work in each of these three options varies. *Students are advised to consult the Departmental Handbook for further details ofthe department's programs.*

Option I – Literature

The department offers a considerable diversity of courses in the various historical periods of English literature in American and Canadian literature, Caribbean and African literatures in English, the various literary genres, criticism, stylistic and linguistic approaches to literature, and in creative writing. While members of the department are engaged in study and research in all of these areas, the department has come to be regarded as having certain specific strengths, particularly in literary theory, comparative literature, and Renaissance studies. In conjunction with other Montreal universities, there is also considerable activity in the field of Medieval studies.

The Major program in Literature (Option I) requires the student to gain a wide acquaintance with thefield of literary study. Work is normally distributed among at least three of four categories of courses periods and national literatures; major authors; literary theory and criticism; and genre, theme and style. In addition to this required distribution, students may elect to pursue a concentration in one of those areas, and all students in Option I must take at least six credits in Option II (Drama) and six in Option III (Film and Communications). Six of the 54 credts may be taken, with permission, in a discipline other than English.

Option II – Drama and Theatre

The Drama program tries to place its subject in as broad a social and philosophical context as possible, and students are encouraged to include in their programs a substantial number of Humanities, Social Sciences, and Fine Arts courses.

The Drama and Theatre program is not designed to provde professional theatre training. The aim is rather to encourage students to explore the subject as a liberal arts discipline.

Students taking this option concentrate their studies in either Drama *or* Theatre. Those opting for the formerarea devote more attention to the literary and theoretical aspects of the subject, while those selecting the latter include more practical classes in their programs. All students must, to some extent, combine both practical and theoretical work.

In consultation with their faculty advisers, students select a minimum of 54 credits in English. Twelve of these must be chosen from the Literature and Communications options while the rest are

drawn from Drama and Theatre offerings in the following areas: Dramatic Literature, Theatre History, Theatre Aesthetics and Dramatic Criticism, Acting, Directing, and Theatre Practice. Classes are also given in special interest areas from year to year. At least two public productions are staged annually.

Option III – Film and Communications

The study of film and communications within the department is concentrated on the problems of human language and interaction and on the various media through which these may be disseminated and transformed. Such study recognizes the wide role that film and electronic media occupy in modern cultural life, and approaches them from a concern with symbolic form, linguistically based forms of analysis, and the various modes of criticism relevant to media which contain both verbal and nonverbal elements. It should be understood that the program does not stress the kinds of professional training more suitably carried out by institutes of technology; however, limited practical experience can be obtained.

The Major program in Communications, while located within the Department of English, intersects with many other academic diciplines, such as Sociology, Psychology, Linguistics, and Fine Arts. This wide scope of concern necessitates that each individual student's program be worked out in consultation with an adviser. Of the 54 credits required for a Major in Communications, 18 are covered by three core courses which introduce the student to the integration of diverse approaches to the problems of human expression and interaction. At least 18 credits must be drawn from the literature and/or drama courses in the Department of English, while the remaining 18 credits are chosen, in consultation with an adviser, from a list of courses which the department makes available.

HONOURS PROGRAM IN ENGLISH

The Honours Program is characterized by a sequence of tutorials and by the pursuit of a program exhibiting sufficient range and comprehensiveness in depth and breadth within one of the options of Literature, Drama, or Film and Communications, together with some familiarity with the work carried on in each of the other options.

The Honours Program, therefore, requires a minimum of 60 credits within the Department, carried on under the supervision of the Honours Program Committee, which the student must satisfy with respect to the rationale and comprehensiveness of his or her total program of courses within and outside the Department.

The Honours Committee will review the student's program each year, to determine that it shows sufficient range, depth, breadth and comprehensiveness.

Honours Tutorials

All Honours students, whatever option they are concentrating on, are required to pursue a sequence of Honours tutorials that deal with the various theories, concepts, and intellectual tools required in the consideration of written texts, and productions in the various media with which the department is concerned. The tutorials presently being offered will be found described under the following course numbers: 110-290D, 110-390D, and 110-490D.

Admissions

Any U-1 student may indicate an intention to pursue an Honours program but admission becomes final only in the U-2 Year. Admission to U-2 is based on having an *overall standing of 'B'* in the year's work and an average of 'B' in all English courses as well as a recommendation from individual instructors. Since the program may be limited to as few as 25-40 students (though its size will be determined by staff) not all students opting for entry into Honours may be able to do so.

Students electing Honours in the U-1 year must take the first of the sequence of tutorials described above. They must also register in sufficient English courses to provide for the development of an appropriate core program in Literature, Drama or Film and Communications.

JOINT HONOURS PROGRAMS

Joint Honours programs in English and various disciplines in the Faculty of Arts are available to qualified students. From the point of view of the Department of English, students in such programs are required to complete the tutorial sequence described above. The remainder of each student's program is arranged to suit the particular circumstances and interests involved in consultation with an adviser and the Honours Committee. Admission to this program is quite limited.

FURTHER INFORMATION RELATING TO DEPARTMENTAL PROGRAMS AND DETAILED DESCRIPTIONS OF COURSES MAY BE OBTAINED AT THE ENGLISH OFFICE, ROOM 155, ARTS BUILDING.

ENGLISH LITERATURE ASSOCIATION

The ELA is the representative body for the students of the English Department at McGill. Any student taking one or more courses in the department is automatically a member. For more information please read the description in the English Departmental Handbook.

TABLE OF ENGLISH DEPARTMENT COURSES

NOTE: Courses marked with a dot (•) will not be given in this academic year, though students are

again advised to consult the Departmental Handbook or the department's office staff for further information and possible changes.

Course Descriptions

100-LEVEL COURSES

110-100D ENGLISH LITERATURE AND COMPOSITION. (6 credits). The main purpose of this course is to develop or improve students' ability to write and to organize and express ideas. The course has a general reading list and a major writing component. Students entering English 100D are assumed to have fluency in English. The English Department should be consulted for further information.
Staff

200-LEVEL COURSES

110-200A SURVEY OF ENGLISH LITERATURE I. (3 credits). A general introduction to English Literature to the Restoration.
Professor Piehler

110-201B SURVEY OF ENGLISH LITERATURE II. (3 credits; *Prerequisite:* 110-200A or Permission of Instructor). A general introduction to English Literature from the Restoration to the present.
Professor Piehler

110-208A THE ENGLISH NOVEL OF THE 19TH CENTURY I. (3 credits). A study of representative novelists of the earlier 19th century.
Professor Malloch

110-209B THE ENGLISH NOVEL OF THE 19TH CENTURY. (3 credits, *Prerequisite:* 110-208A). A study of the representative novelists of the later 19th century.
Professor Malloch

110-210D. ENGLISH POETRY OF THE 19TH CENTURY. (6 credits). A survey course of 19th century English poetry.
Professor Simon

110-213A POETRY OF THE 20TH CENTURY I. (3 credits). A critical survey of major British and North American poetry, about 1900-1940.
Professor Heuser

110-214B POETRY OF THE 20TH CENTURY II. (3 credits). A critical survey of major British and North American Poetry, about 1930-1970.
Professor Heuser

110-215A,B INTRODUCTION TO SHAKESPEARE I. (3 credits).
Professors Duer and Heppner

110-216B INTRODUCTION TO SHAKESPEARE II. (3 credits; Prerequisite: 215A or 215B, or consent of the instructor). A continuation of 215A,B.
Professor Piehler

110-225A AMERICAN LITERATURE I. (3 credits). A study of the literary works of earlier American writers.
Professor Rubin

110-226B AMERICAN LITERATURE II. (3 credits). A study of the literary works of later American writers.
Professor Simon

110-228A CANADIAN LITERATURE I. (3 credits). Introduction to Canadian poetry in English.
Professor Lafon

110-229B CANADIAN LITERATURE II. (3 credits). Introduction to Canadian prose in English.
Professor Lafon

110-230D AN INTRODUCTION TO DRAMA. (6 credits). A survey of major types and authors of Western Drama.
Professor Anderson

- **110-235A TRAGEDY.** (3 credits). A study of tragedy as genre and mode in drama and fiction.
- **110-236A COMEDY I.** (3 credits). A study of comedy through the examination of representative texts.
- **110-237B COMEDY II.** (3 credits). A study of comedy through the examination of representative texts.

110-245D BACKGROUNDS TO ENGLISH LITERATURE. (6 credits). English Literature and the evolution of Western civilization.
Professor Robinson

110-246D ENGLISH LITERATURE AND FOLKLORE. (6 credits). A study of representative texts of English Literature in relation to their background in folk tradition.
Professor Puhvel

110-248D THE GREAT WRITINGS OF EUROPE, 1550-1850. (6 credits). An analysis of representative works of European Literature to 1850.
Professor Robinson

- **110-249A AN INTRODUCTION TO ORAL LITERATURE.** (3 credits). An introduction to the principles of verbal folklore and selected myths, legends, and tales.

110-251D ANGLO-SAXON LITERARY CULTURE. (6 credits). Old English literature in translation; its social and cultural milieu and language.
Professor Conway

110-252A,B THE STRUCTURE OF THE ENGLISH LANGUAGE. (3 credits). A linguistic study of the English language.
Professor Bellert

110-253A,B THE HISTORY OF THE ENGLISH LANGUAGE. (3 credits; *Prerequisite:* English 252A,B or Linguistics 200A,B). A linguistic study of the English language.
Professor Bellert

110-254A,B THE ENGLISH LANGUAGE AND THE STUDY OF LITERATURE. (3 credits; *Prerequisite:* English 252A,B or Linguistics 200A,B). A continued linguistic study of the English language and its application to literature.
Professor Bellert

- **110-260D APPROACHES TO LITERARY STUDY.** (6 credits). A study of critical methods and their validity in relation to specific literary texts.
- **110-265D THEATRE LABORATORY.** (6 credits). An exploration of a dramatic text through production. Corequisite courses are required. For details of texts and current co-requisites students should consult the instructor before registration.

110-266D MODERN THEATRE PRACTICE. (6 credits). Introduction to the technical and practical aspects of drama production.
Staff

110-267D VOICE AND SPEECH I. (6 credits). The voice in theory and practice; development of practical oral skills.
Professor Ripley ASSHOLE

- **110-268D HISTORY OF THE THEATRE I.** (6 credits). History of theatre in Asia and Europe from origins to Renaissance.

110-269D FUNDAMENTALS OF DRAMA AND THEATRE. (6 credits). A practical and theoretical study of the individual and collective creative process and the actor's approach to it.
Professor Ripley

- **110-275D COMMUNICATIONS AND LITERATURE.** (6 credits). An introduction to communication theory, through a study of its uses and implications in topics chosen from written literature, the theatre and film. (Not open to students who have taken 110-275A/ 110-276B).
Professor Lafon

110-278D MASS MEDIA CRITICISM. (6 credits). The nature of judgements that can be made about the products of the mass media.
Professor Crowley

110-279D INTRODUCTION TO THE FILM. (6 credits). An introductory study of the cinema as a medium.
Staff

110-290D HONOURS TUTORIAL I. (6 credits). A study of the techniques of research, emphasizing biography, bibliography, and textual study.
Professor Lindeman

- **110-294D HONOURS TUTORIAL I – ALTERNATE.** (6 credits). Emphasis on biography, bibliography and textual study.

110-295A SPECIAL TOPICS OF LITERARY STUDY. (3 credits). Specific subjects of literary study which vary from year to year. For 1977-78: Plato and poetry.
Professor Lindeman

- **110-297D SPECIAL TOPICS OF LITERARY STUDY.** (6 credits). Specific subjects of literary study which vary from year to year.

300-LEVEL COURSES

110-300D RENAISSANCE ENGLISH LITERATURE. (6 credits). A study of the major writers of the 16th and early 17th centuries.
Professor Lieblein

110-302A RESTORATION AND 18TH CENTURY ENGLISH LITERATURE I. (3 credits). A study of the major writers of the late 17th and earlier 18th centuries.
Professor Bruce

110-303B RESTORATION AND 18TH CENTURY ENGLISH LITERATURE II. (3 credits) A study of the major writers of the later 18th century.
Professor Bruce

110-304D THE ENGLISH NOVEL TO 1800. (6 credits). Special emphasis on the novel of the 18th century.
Staff

- **110-306A MEDIEVAL AND TUDOR DRAMA** (3 credits).

110-308A ELIZABETHAN DRAMA. (3 credits).
Professor Leiblein

110-309B JACOBEAN DRAMA. (3 credits).
Professor Duer

110-310A RESTORATION AND 18TH CENTURY DRAMA. (3 credits). Representative plays from Etherege to Sheridan.
Professor Cecil

110-312B DRAMA OF THE VICTORIAN AND EDWARDIAN AGES. (3 credits). Representative English plays from Byron to Galsworthy.
Professor Cecil

110-314A 20TH CENTURY DRAMA. (3 credits). A survey of representative works of 20th Century Drama.
Staff

- **110-315D SHAKESPEARE.** (6 credits); *Prerequisite:* 110-215A,B, or consent of the instructor). An advanced course in Shakespeare.
- **110-316B MILTON** (3 credits).

110-320D THIRD WORLD LITERATURE. (6 credits). A study of literary works from Africa, the Caribbean and South America.
Staff

110-321A CARIBBEAN LITERATURE. (3 credits). (Not open to students who have taken 110-322D).
Staff

- **110-323A 20TH CENTURY AMERICAN POETRY.** (3 credits).

- **110-324B 20TH CENTURY AMERICAN PROSE.** (3 credits).

110-325D MODERN NORTH AMERICAN FICTION. (6 credits). A study of representative American, French and English Canadian writers.
Professor McPherson

110-327D THE DEVELOPMENT OF PROSE FICTION IN CANADIAN LITERATURE. (6 credits). A survey of Canadian fiction writers from the early 19th century to the present.
Professor Lucas

- **110-329D 20TH CENTURY CANADIAN LITERATURE.** (6 credits).

110-330D THE MODERN DRAMA. (6 credits). A study of the major movements in modern drama.
Professor Suvin

110-333D ENGLISH PROSE FROM BACON TO THE PRESENT. (6 credits). The development of English prose traced through detailed study of authors representative of each period.
Professor MacLennan

110-335D THE MODERN NOVEL. (6 credits). A study of major novels written in English in the 20th century.
Professor MacLennan

110-336D THE DEVELOPMENT OF THE NOVEL. (6 credits). A survey of the evolution of the genre from its conception to the present.
Professor Weems

110-337D THE ART OF POETRY. (6 credits). Studies in the theory and practice of poetry from antiquity.
Professor Troide

110-338B THE SHORT STORY. (3 credits). A study of significant trends in short story writing.
Staff

110-340A INTRODUCTION TO CHILDREN'S LITERATURE I. (3 credits). A survey of the development of children's literature. (Not open to students who have taken 110-343B or 110-297L in the summer of 1975).
Professor Reichertz

110-341B INTRODUCTION TO CHILDREN'S LITERATURE II. (3 credits). *(Prerequisite:* English 110-340A). Aesthetic, sociological and psychological views of children's literature. (Not open to students who have taken 110-343B or 110-297L in the summer of 1975).
Professor Reichertz

110-342B SPECIAL TOPICS IN CHILDREN'S LITERATURE. (3 credits; *Prerequisite:* 110-341B or Permission of instructor).
Professor Reichertz

- **110-344D LITERATURE AND SCIENCE.** (6 credits). A study of the parallel structures of historical evolution in literature and science.

- **110-345D LITERATURE AND SOCIETY.** (6 credits).

- **110-346D ART AND LITERATURE.** (6 credits). A study of the relationship between literature and the visual arts.

- **110-348D THE GREAT WRITINGS OF EUROPE 1850-1950.** (6 credits). An analysis of representative works of modern European literature.

110-351D ENGLISH LANGUAGE AND PROSE LITERATURE BEFORE THE NORMAN CONQUEST. (6 credits). An introduction to Old English (Anglo-Saxon) prose language and literature.
Professor Conway

- **110-352A AN INTRODUCTION TO OLD ENGLISH LANGUAGE AND LITERATURE.** (3 credits). A study of the language and culture of the Anglo-Saxons through reading of primarily prose texts.

- **110-353B ANGLO-SAXON POETRY WITH EMPHASIS ON BEOWULF.** (3 credits).

- **110-356A MIDDLE ENGLISH.** (3 credits). English literature from 1200 to 1500 exclusive of Chaucer.

110-357A CHAUCER: CANTERBURY TALES. (3 credits).
Professor Williams

110-358B CHAUCER: TROILUS AND CRISEYDE. (3 credits).
Professor Williams

- **110-359B ENGLISH LITERATURE IN THE 14th AND 15TH CENTURIES, EXCLUSIVE OF CHAUCER.** (3 credits). Further study in Middle English language and literature.

110-360D LITERARY CRITICISM. (6 credits). An advanced study of critical methods.
Professor Bouchard

- **110-362A,B WRITING ABOUT LITERATURE.** (3 credtis).

110-364D CREATIVE WRITING – INTERMEDIATE. (6 credits). Students must have the consent of the instructor.
Professor Blaise

- **110-365D THEATRE LAB.** (6 credits). An exploration of a dramatic text through production. Co-requisite courses are required. For details of texts and current co-requisites students should consult the instructor before registration.

110-366D AESTHETIC THEORIES OF DRAMA AND DRAMATIC CRITICISM. (6 credits). A theoretical study of drama and theatre as forms of human presentation.
Professor Anderson

- **110-368D HISTORY OF THE THEATRE II.** (6 credits). History of the theatre from the Italian Renaissance to the use of realism.

• **110-369D PERIOD AND STYLE IN THE THEATRE.** (6 credits; *Prerequisite:* 110-260D or the consent of the instructor). A study, through practical participation, of works from major periods in Western theatre.

110-378D CRITICAL APPROACHES TO COMMUNICATIONS STUDY. (6 credits). The development of methods for critical research in the media.
Professor Theall

110-379D THE FILM. (6 credits). An advanced study of the avant-garde/experimental/underground film from the 1920's to the present.
Professor Wees

110-384A STUDIES IN COMMUNICATIONS. (3 credits). A study of special subjects in communications which vary from year to year.
Professor Languirand

• **110-385D LITERATURE AND FILM.** (6 credits). Form and image in Literature and Film.

110-390D HONOURS TUTORIAL II. (6 credits). Symbolic Analysis.
Professor Gopnik

• **110-394D HONOURS TUTORIAL II – ALTERNATE.** (6 credits).

110-395A INDIVIDUAL READING COURSE. (3 credits). By arrangement with individual instructor. Permission must be obtained from the department before registration.
Staff

110-396B INDIVIDUAL READING COURSE. (3 credits). By arrangement with individual instructor. Permission must be obtained from the department before registration.
Staff

110-398D DEPARTMENTAL SEMINAR. (6 credits). Subjects of major interest to the study of English, varying from year to year. In 1977/78, Keats and Shelley, Hopkins and Hardy: four poets and their poetics.
Professor Heuser

400-LEVEL COURSES

• **110-401D THE 17TH CENTURY.** (6 credits). Advanced study of the major literary traditions of the 17th century.

110-403D THE 18TH CENTURY. (6 credits). Advanced study of major 18th century poets, dramatists, and expository writers.
Professor Troide

• **110-405D THE 19TH CENTURY.** (6 credits).

110-407A THE 20TH CENTURY. (3 credits). In 1977-78, T.S. Eliot.
Mr. Booth

110-408B THE 20TH CENTURY. (3 credits). In 1977/78, the criticism of Northrop Frye.
Mr. Booth

110-417B A MAJOR ENGLISH POET. (3 credits). The poet studied varies from year to year. In 1977/78, Byron.
Professor Cecil

110-418D STUDIES IN 20TH CENTURY LITERATURE. (6 credits). Study of specific subject in 20th century literature, changing from year to year.
Professor Dudek

110-419A STUDIES IN 20TH CENTURY LITERATURE. (3 credits). Study of specific subject in 20th century literature, changing from year to year. In 1977/78, Thurber.
Professor Gopnik

110-420D STUDIES IN ANGLO-IRISH LITERATURE. (6 credits). Selections from the Irish authors, works and literary movements in the English language. In 1977/78, Yeats.
Professor Ronsley

• **110-421A AFRICAN LITERATURE.** (3 credits).

110-422A STUDIES IN 19TH CENTURY AMERICAN LITERATURE. (3 credits). Major figures and themes.
Professor Simon

• **110-423B STUDIES IN 19TH CENTURY AMERICAN LITERATURE.** (3 credits).

• **110-430B STUDIES IN DRAMA.** (3 credits). Specific subjects in drama, changing from year to year.

110-431D STUDIES IN DRAMA. (6 credits). Specific subjects in drama, changing from year to year. In 1977/78, Irish drama.
Professor Ronsley

• **110-432D STUDIES IN DRAMA.** (6 credits). Specific subjects in drama, changing from year to year.

• **110-433D STUDIES IN DRAMA.** (6 credits). Specific subjects in drama, changing from year to year.

110-435D SATIRE. (6 credits). Origins, techniques and purpose of satire.
Professor Klima

110-437B STUDIES IN A LITERARY FORM. (3 credits). Study of a specific literary form, changing from year to year. In 1977/78, women novelists.
Professor Bruce

110-438B STUDIES IN A LITERARY FORM. (3 credits). Study of a specific literary form, changing from year to year. For 1977/78, the novels of Faulkner.
Professor Rubin

• **110-439D STUDIES IN SCIENCE FICTION.** (6 credits). The study of science fiction as a literary form.

110-443D CONTEMPORARY WOMEN'S FICTION. (6 credits). The study of representative works of contemporary women's fiction as a specific genre. (Not open to students who have taken 110-295A in 1974-75).
Professor Blaise

- **110-447D CROSSCURRENTS BETWEEN ENGLISH LITERATURE AND EUROPEAN LITERATURE OF THE 18TH CENTURY.** (6 credits; *Prerequisite:* a reading knowledge of French).

- **110-456A MIDDLE ENGLISH.** (3 credits). Malory's *Morte D'Arthur;* a study of the work and its background.

110-464D CREATIVE WRITING – ADVANCED. (6 credits). Students must have the consent of the instructor.
Professor Reichertz

110-465D THEATRE LABORATORY. (6 credits). An exploration of a dramatic text through production. Co-requisite courses are required. For details and current co-requisites, students should consult the instructor before registration.
Staff

110-466D THEORY AND PRACTICE OF DRAMATIC PRODUCTION. (6 credits). Emphasis on directorial skills in the theatre.
Staff

110-469D DRAMA IN THE THEATRE. (6 credits). Conditions of performance in various modern modes, with exercises.
Staff

110-470D THEATRE FOR CHILDREN. (6 credits). A study of the historical development of children's theatre, as well as its theory and method.
Staff

110-478D DEPARTMENTAL SEMINAR IN COMMUNICATIONS. (6 credits). A required departmental seminar in varying themes in communications for students in their final year of the Communications stream.
Professor Ohlin

110-480A STUDIES IN THE HISTORY OF THE FILM I. (3 credits). Specific subject varies from year to year. For 1977/78, William Wyler.
Professor Cecil

110-481B STUDIES IN THE HISTORY OF THE FILM II. (3 credits). Specific subject varies from year to year. For 1977/78, Bergman.
Professor Ohlin

110-482B FILMMAKING. (3 credits). (Limited enrolment – permission of instructor required). Theory and practice in filmmaking.
Professor Wees

110-483A SEMINAR IN THE FILM. (3 credits). In-depth study of specific topics related to the film, which vary from year to year. For 1977/78, Eisenstein.
Professor Wees

- **110-484A SEMINAR IN THE FILM.** (3 credits). In-depth study of specific topics related to the film, which vary from year to year.

110-485D MODES OF COMMUNICATION. (6 credits). A study of literature and media.
Professor Languirand

110-486D STUDIES IN THE MASS MEDIA. (6 credits). Theory and practice of the fundamentals of television production.
Professor Karle

110-490D HONOURS TUTORIAL III. (6 credits). Literary history as a means of literary criticism.
Professor Bouchard

- **110-494D HONOURS TUTORIAL III – ALTERNATE.** (6 credits).

110-495A INDIVIDUAL READING COURSE. (3 credits). By arrangement with individual instructor. Permission must be obtained from the department before registration.
Staff

110-496B INDIVIDUAL READING COURSE. (3 credits). By arrangement with individual instructor. Permission must be obtained from the department before registration.
Staff

110-498D DEPARTMENTAL SEMINAR. (6 credits). For 1977/78, essay workshop, limited to U-3 B.A. students.
Professor Malloch

- **110-499A DEPARTMENTAL SEMINAR.** (3 credits).

500-LEVEL COURSES.

Advanced study in seminar format of special topics as indicated by course titles. Enrolment is limited to fifteen students. Admission by permission of the instructor.

100-500A MIDDLE ENGLISH. (3 credits).
Professor Puhvel

- **110-501B 16TH CENTURY.** (3 credits).

- **110-502A 17TH CENTURY.** (3 credits).

110-503A 18TH CENTURY. (3 credits). For 1977/78, William Blake.
Professor Heppner

110-504A 19TH CENTURY. (3 credits). For 1977/78, the Brontes.
Professor Bruce

- **110-505B 20TH CENTURY.** (3 credits).

110-516B SHAKESPEARE. (3 credits).
Professor Lieblein

110-525B AMERICAN LITERATURE. (3 credits). For 1977/78, Emily Dickinson.
Professor Rubin

110-527A CANADIAN LITERATURE. (3 credits). A detailed study of a particular author, genre, period, or special group of Canadian writers. For 1977-78: Margaret Laurence.
Professor Lafon

- **110-528B CANADIAN LITERATURE.** (3 credits). A detailed study of a particular author, genre, period, or special group of Canadian writers.

110-529D INTERDISCIPLINARY SEMINAR IN NORTH AMERICAN STUDIES. (3 credits).
Professor Velk

- **110-530A LITERARY FORMS.** (3 credits).

110-531A LITERARY FORMS. (3 credits). For 1977/78, Conrad.
Professor Weems

110-533B LITERARY MOVEMENTS. (3 credits). For 1977/78, the myth of passion in Western literature.
Professor Rubin

- **110-539D THE FOLK BALLAD TRADITION IN GREAT BRITAIN AND NORTH AMERICA.** (6 credits).

Professor McPherson

The following course(s) may be chosen by English Major and Honours students as part of their programs:

135-351B STUDIES IN MODERN JEWISH FICTION. (3 credits).
Professor Lindeman

- **135-363A THE SHTETL UPROOTED (1881-1924).** (3 credits).
- **135-364B THE SHTETL UPROOTED (1924-1939).** (3 credits).
- **157-360A QUEBEC AND THE THIRD WORLD.** (3 credits).

FRENCH LANGUAGE CENTRE (127)

Assistant Professor: B. SHEPPARD (DIRECTOR)
Lecturers J.Ph. AUBERT; C. FAY-BAULU; J. FLETCHER; M.N. LEGOUX; H. MIGNAULT; I. RIGAL; H. RIEL SALVATORE; G. SIX

3438 McTavish St.,
Montreal, P.Q., H3A 1X9.
Office: Room 202, Telephone: 392-5727.
Course 400D: 392-5716.
Course 401D: 392-4938.

The Centre offers French Language courses of a practical nature, for those who will be required to use the language in future, whether in Québec or elsewhere. Courses are open to students who do not yet feel at ease in the French-speaking community, cannot always follow conversation or lectures delivered in French at normal speed, without concession or simplification, and are unable to communicate their thoughts relatively easily and correctly in French. The Centre aims to bring students to the point where they can readily "function" in the French language. For more advanced courses, as well as courses in French linguistics, stylistics, literature, civilization, and in translation, see the Department of French Language and Literature.

Registration

Numbers are limited in all classes; in order to be sure of a place students from all Faculties must register with the Centre during the official registration period and obtain a section ticket. No auditors are permitted in any course. At registration students will be interviewed to determine their level in French. Further tests will be given at the beginning of term to ensure that students are enrolled in an appropriate course.

In a case where we have to refuse admission to a course, either because of over-enrolment or because the student's level in oral or written French is too low or too high, the student will be directed to another course in the Centre or advised to consult the Département de Littérature Française, or the Centre d'Etudes Canadiennes-Françaises.

Interviews

Students who wish to be interviewed for admission **before** registration, may come for interview at 3438 McTavish, at the following times: 10 a.m. to 12 noon and 1 p.m. to 4 p.m., on August 31, September 1, 6, 7.

Accelerated Sequence of Courses.

Students who have achieved very good results in 127-201D, 127-205D or 127-211D may be considered for admission directly to 400D or 401D.

Attendance and Grades

Students are expected to attend regularly in all courses. Grades are awarded on the basis of term work, regular tests and an oral examination.

Course Descriptions

127-201D INTENSIVE BEGINNERS' FRENCH. (6 credits; 6 hours including language laboratory). Open to students in any degree program having no previous knowledge of French. Text: Politzer, Hagiwara, Carduner L'Echelle (Xerox Co.) and laboratory workbook. (Not open to students who have taken or are taking 127-205D).
Professor Fletcher

127-205D ELEMENTARY FRENCH. (6 credits. 3 hours, plus language laboratory) Prerequisite: up to 1 semester of beginners' French. For students who, though they are not beginners, have not studied sufficient French to be admitted to the second level (211D). Rapid review of basic structures and vocabulary. Text: "L'Echelle". (Not open to students who are taking or have taken 127-201D).

127-211D ORAL AND WRITTEN FRENCH I. For students from outside Québec province. (6 credits; 3 hours, plus language laboratory). Open to students in any degree program having only an elementary knowledge of French. Grammar review, comprehension, vocabulary, conversation.
Professor Sheppard

127-321D ORAL AND WRITTEN FRENCH II. For students from outside the Province of Québec. (6 credits; 3 hours, plus language laboratory). For those having taken 127-211D or equivalent. Comprehension, discussion, reading, grammar review.
Professor Legoux

Classes in French conversation (400 and 401D)

Please note the following:

1) It is impossible in any language course, in only a few class meetings per week, to offer sufficient oral practice. Our aim is to provide students with the means and the confidence to practise their French outside class. Students are advised to take full advantage of all the opportunities offered by the Québec milieu (contacts with French-speaking persons, at work and in leisure, theatre, the written word, etc.) and are required to work on projects demonstrating their activities in this field.
2) Regular written work (brief résumés) is required, always with a view to reinforcing what has been learned orally. Frequent short tests will be given.
3) Any student who enrols must be prepared to take an active part in class meetings; this involves participation and leadership in discussions as well as organization of the program.
4) Students who have taken 400D may not enrol in 401D. Graduate Students will be admitted by special permission only and where numbers allow.
5) Attendance is compulsory.

127-400D FRANÇAIS FONCTIONNEL. Destiné en principe aux étudiants ayant fait leurs études secondaires au Québec et en priorité aux étudiants d'U2 et U3. (6 crédits, 3 heures par semaine). 16 étudiants par section. Utilisation du français oral par le biais de discussions, de films, de disques, etc..... Révision systématique de problèmes de grammaire non résolus et de structures de langue mal assimilées.(Not open to students who have taken 127-341D).
Professeur Rigal.

127-401D FRANÇAIS FONCTIONNEL INTENSIF. Destiné aux étudiants d'U2 et U3. (6 crédits, 5 heures par semaine). Cours intensif centré sur la langue parlée; groupes de 8 étudiants. Permet à ceux qui ont déjà les connaissances de base du français d'améliorer leur compréhension et leur expression par la pratique.
Professeur Mignault.

127-405A,B, FRANÇAIS FONCTIONNEL, OPTION ECRIT. (3 credits). For students whose oral French is of a good standard but whose written French is noticeably inferior. Written assignments designed to develop vocabulary and correct expression on a functional level. Use of dictionaries and reference materials. (This course aims to help students reach the standard required for "Composition I", 125-200D in the Department of French Language and Literature.).

GÉNÉRALITIÉS

Le département de français offre un programme de cours qui couvre l'ensemble des littératures française et québécoise. D'autres aspects des études françaises ne sont pas négligés: aussi trouvera-t-on des cours de cinéma, de civilisation, et surtout de langue (linguistique, stylistique, traduction).

Le français est la seule "langue de travail" à l'intérieur du département. Les francophones constituent une proportion importante de nos étudiants, ce qui représente un avantage appréciable pour les étudiants qui ne sont pas de langue française, leur permettant de faire leurs études dans un milieu essentiellement français.

Notre programme de cours a été remanié et un certain nombre de nouveaux cours introduits. On trouvera plus loin le détail de nos cours et les séquences conduisant à nos diplômes "Honneurs", "Honneurs-Conjoints", "Majeur". Ces cours ont été renumérotés d'une façon assez notable. L'ancien numéro figure entre parenthèses, toutes les fois qu'il y a lieu.

N.B. IL N'EST PAS PERMIS DE SUIVRE, SOUS SON NOUVEAU NUMERO, UN COURS DEJA SUIVI.

L'admission aux cours pratiques de langue (200D, 201D, 400A, B, 240D, 241D, 242D) dépend d'un *examen d'entrée obligatoire* dont les dates seront communiquées au moment des inscriptions. L'examen a pour but de déterminer le niveau de connaissance de l'étudiant et d'assurer qu'il soit affecté à une classe correspondant à ses besoins. Si la préparation de l'étudiant s'avère insuffisante un cours au *Centre de Langue Française (q.v.) lui sera conseillé.*

La plupart des cours peuvent être suivis par n'importe quel étudiant ayant les connaissances et les capacités voulues; le professeur chargé du cours jugera en dernier ressort. Certains cours toutefois sont réservés aux étudiants du département: ce sont ceux dont le deuxième chiffre – 9 – indique qu'ils sont des séminaires destinés à nos étudiants Honneurs. Les cours 500 peuvent être suivis par des étudiants de 1er ou de 2e cycle, avec assentiment du professeur.

LE PROGRAMME HONNEURS (60 CREDITS) ET HONNEURS-CONJOINTS (36 CREDITS)

Honneurs et Honneurs-Conjoints peuvent être faits en littérature française ou en littérature québécoise. Pour être admis, il faut, d'ordinaire, avoir fait la concentration "Français" au CEGEP et avoir obtenu des résultats bien supérieurs à la moyenne. Les étudiants anglophones, et les étudiants venus d'autres provinces ou d'autres pays, doivent faire preuve d'une préparation adéquate. Une note de 65% au moins est exigée dans chaque cours de français. Si un étudiant Honneurs obtient moins de 65% dans un cours, son cas sera étudié par le comité des affaires étudiantes.

Les Honneurs Conjoints sont autorisés avec les départements suivants: Allemand, Anglais, Espagnol, Italien, Langues Anciennes, Philosophie, Russe.

L'obtention d'un baccalauréat Honneurs ou Honneurs-Conjoints est obligatoire pour l'admission en Maîtrise.

LE PROGRAMME MAJEUR (54 CREDITS)

Le programme Majeur peut être suivi en littérature française, en littérature québécoise, ou en linguistique française.

Honneurs: Option Littérature française (60 crédits)

U1: 290D; 291D; 240D ou 241D ou 242D
U2: 390D
U3: 3 crédits choisis dans 490B, 491A, 492B, 595A plus 30 crédits en U2 et U3

Honneurs: Option Littérature québécoise (60 crédits)

U1: 290D, 291D, 240D ou 241D ou 242D
U2: 390D
U3: 3 crédits choisis dans 490B, 495A, 496B, 595A plus 30 crédits en U2 et U3.

Honneurs-Conjoints: Option littérature française ou littérature québécoise (au moins 36 crédits).

U1: 290D; 291D
U2: 240D ou 241D ou 242D plus 6 crédits
U3: 12 crédits dont au moins 3 de séminaire

Majeur: Option Littérature française ou littérature québécoise (54 crédits)

U1: 290D, 291D; 240D ou 241D ou 242D 36 crédits en U2 et U3.
328D recommandé en U1 ou U2 (Option littérature québécoise)

Majeur: Option linguistique française (54 crédits)

U1: Linguistics 200A (voir Dept. of Linguistics) 230B; 235D ou 6 crédits en français; 240D ou 241D ou 242D
U2: 330D; 332A; 333B; 345D ou 6 crédits en français
U3: 12 crédits choisis dans 434A, 435B; 445D; 510D, 520D plus 6 crédits en français

Les cours: Linguistics 321B, 350A, 351B sont autorisés.

N.B. 6 crédits en Majeur peuvent être choisis dans une discipline connexe.

REMARQUES DIVERSES

Un étudiant peut être dispensé du cours de composition (240D, 241D, 242D) selon le résultat de l'examen d'entrée.

Un examen de promotion est prévu dans les cours 290D et 390D, permettant éventuellement la dispense de l'un de ces cours.

Tout étudiant qui choisit l'option littérature française (Honneurs ou Majeur) doit suivre des cours dans différentes périodes et dans différents genres.

Le cours 249A,B est recommandé aux étudiants non francophones.

Le fait de choisir l'option littérature française n'empêche pas un étudiant de suivre un nombre raisonnable de cours en littérature québécoise, et vice versa.

Tout étudiant Honneurs doit suivre au moins 6 crédits par année hors du département.

NUMEROTATION DES COURS

Les anciennes séquences ce cours divisés en Honneurs et Majeur ne sont plus maintenues. Elles sont remplacées par un *tronc commun* en 1ère année pour tous les étudiants en littérature frainçcaise et québécoise, suivi d'une séquence de *séminaires* réservés dans le cas des étudiants Honneurs. Les élements de *linguistique française* seront inculqués à tous les étudiants, quelle que soit leur option.

Le deuxième chiffre indique la nature du cours, comme suit:

0	Cours destinés principalement ou exclusivement aux étudiants extérieurs au département.
1-2	Cours auxiliaires (1: cinéma 2: civilisation)
3-4	Cours de langue (3: cours théoriques; 4: cours pratiques)
5-6	Littérature française
7-8	Littérature québécoise
9	Cours réservés et Séminaires

Note: Les cours 200D à 209B sont fermés aux étudiants du département.

125-200D COMPOSITION I (126-220A,B). (6 crédits; *Prérequis:* examen d'entrée). Révision systématique de la grammaire française; acquisition de vocabulaire; compositions élémentaires.

125-201D COMPOSITION II (126-222D). (6 crédits; *Prérequis:* examen d'entrée). Cours analogue au cours précédent, pour étudiants plus avancés.

Note: Il n'est pas permis de suivre successivement les cours 200D et 201D. L'étudiant qui, ayant passé l'un ou l'autre cours, est désireux de suivre un cours de composition plus avancé, passera au cours 240D.

125-202D INTRODUCTION A LA LITTERATURE FRANÇAISE (126-215D). (6 crédits). Une initiation à la littérature française par une étude des principaux textes. Fermé aux étudiants qui suivent ou ont suivi le 207D.
Professeur Cartwright

125-203D THEATRE EN ACTION (126-219D). (6 crédits). Ce cours s'adresse plus particulièrement aux étudiants non francophones qui désirent perfectionner leur français parlé en montant et en interprétant une ou plusieurs pièces modernes. (En 1977-78, un groupe sera réservé aux étudiants francophones ou qui n'éprouvent pas de difficultés d'élocution.)

125-204A CIVILISATION QUEBECOISE I (126-210A). (3 crédits). Introduction à la civilisation québécoise (de 1800 à 1945). A l'aide d'oeuvres littéraires et artistiques, introduction aux différents aspects de la société québécoise.
Professeur Maugey

125-205B CIVILISATION QUEBECOISE II (126-211B). (3 crédits). Introduction à la civilisation québécoise (depuis 1945). Suite du cours précédent.
Professeur Maugey

125-207D LE FRANCAIS PAR LES TEXTES (6 crédits). Cours de langue et de littérature. Initiation à la littérature par la lecture de textes français et québécois. Exercices de langue (Composition; révision de grammaire). Fermé aux étudiants qui suivent ou ont suivi le 202D.

125-208A LITTERATURE QUEBECOISE CONTEMPORAINE I (1945-1960) (126-208A). (3 crédits). Introduction à la littérature québécoise d'après-guerre.

125-209B LITTERATURE QUEBECOISE CONTEMPORAINE II (1960 A NOS JOURS) (126-209B) (3 crédits). Suite du cours précédent.

125-220A LA FRANCE D'AUJOURD'HUI (DEPUIS 1945) 1. (126-441D). (3 credits. Divers aspects de la France contemporaine: son évolution sociale et politique, la France et le Marché Commun, le monde du travail, l'enseignement, l'information, la vie culturelle.
Professeur Maugey

125-221B LA FRANCE D'AUJOURD'HUI (DEPUIS 1945) II. (126-441D). (3 crédits; Prérequis: 125-220A ou permission du professeur. Suite du cours précédent.
Professeur

125-230B INTRODUCTION A LA LINGUISTIQUE FRANÇAISE. (3 crédits; *Prérequis:* Linguistics 104-200A. Prérequis aux cours 332A, 333B, 434A, 435B). Survol de la linguistique française de F. de Saussure à nos jours. Description linguistique du

français moderne (éléments de phonologie, de phonétique normative, de syntaxe et de morphologie).
Professeur Angenot

125-235D EVOLUTION ET STRUCTURES DE LA LANGUE FRANÇAISE. (126-342D). (6 crédits). Histoire de la langue française, du bas-latin à la langue moderne. Etude de l'évolution phonétique, syntaxique, sémantique. Etude de textes des différentes époques.
Professeur Rabotin

125-240D COMPOSITION III. (6 crédits; *Prérequis:* examen d'entrée). Enrichissement de la langue; délimitation des faits d'expression; étude systématique des ressources expressives de la langue. Rédactions.

125-241D COMPOSITION IV. (6 crédits; *Prérequis:* examen d'entrée). Cours analogue au cours précédent, pour étudiants plus avancés.

125-242D COMPOSITION V. (6 crédits; *Prérequis:* examen d'entrée). Cours analogue au cours précédent, pour étudiants plus avancés. Initiation à la stylistique du français: éléments intellectuels et affectifs, niveaux de langage. Rédactions.

Note: Il n'est pas permis de suivre successivement les cours 240D, 241D, 242D. Un seul de ces cours peut être compté.

125-249A,B PHONETIQUE CORRECTIVE. (3 crédits). Destiné aux non-francophones, ce cours a pour but d'améliorer leur prononciation. Etude systématique des phonèmes du français et de leur production. Rythme et intonation de la phrase. Recommandé aux étudiants non francophones inscrits au département de français. D'autres étudiants seront admis selon la disponibilité des places.
Professeur Lemyze

125-290D HISTOIRE DE LA LITTERATURE FRANÇAISE ET QUEBECOISE. (6 crédits). Séminaire obligatoire pour tous les étudiants en littérature française ou québécoise. Il a pour but d'assurer que nos étudiants, de provenance diverse, possèdent les connaissances de base essentielles pour poursuivre des études plus avancées.

125-291D TRAVAUX PRATIQUES. (6 crédits). A prendre conjointment avec le 125-290D. Etude détaillée des textes au programme. Initiation à la linguistique française.

125-310A HISTOIRE DU CINEMA FRANÇAIS I (126-235D). (3 crédits). Rétrospective du cinéma français depuis ses origines jusqu'à la deuxième Guerre Mondiale.
Professeur Maugey

125-311B HISTOIRE DU CINEMA FRANÇAIS II. (126-235D). (3 crédits; Prérequis: 125-310A ou permission du professeur). Suite du cours précédent: le cinéma français d'aprés-guerre.
Professeur Maugey

125-315A,B LE CINEMA QUEBECOIS. (126-334A,B) (3 crédits). Etude thématique du cinéma québécois à travers ses principaux films. Les approches seront: poétique, sociologique, psychologique et politique.
Professeur

125-320A CIVILISATION FRANÇAISE DU MOYEN AGE ET DE LA RENAISSANCE (126-241D). (3 crédits). Ce cours a pour but de faire connaître, au moyen de documents divers (livres, diapositives, etc.) le milieu humain dans lequel la littérature française s'est dévelopée entre 1100 et 1600.
Professeur Tichoux

125-321B CIVILISATION FRANÇAISE: L'ANCIEN REGIME. (126-241D). (3 crédits). Ce cours a pour but de faire connaître, au moyen de documents divers (livres, diapositives, etc.) le milieu humain dans lequel la littérature française s'est développée depuis Henri IV jusqu'à la Révolution.
Professeur Tichoux

125-328D HISTOIRE DE LA CIVILISATION QUEBECOISE. (126-264D). (6 crédits. Fermé aux étudiants inscrits en 204A, 205B). Etude des différents secteurs de la société québécoise (économique, politique, social, culturel). Analyse sociologique d'oeuvres littéraires et artistiques. Recommandé aux étudiants du département qui choissent l'option "littérature québécoise".
Professeur Boucher

125-330D INITIATION A L'ANALYSE LINGUISTIQUE DES TEXTES LITTERAIRES. (126-400D) (6 crédits). Méthodologie de l'analyse linguistique des textes littéraires. Théorie de figures et de tropes. Rhétorique. Prosodie. Introduction à la théorie des genres littéraires, à la sémiotique et à l'analyse du discours.
Professeur Angenot

125-332A SYNTAXE ET MORPHOLOGIE. (3 crédits; *Prérequis:* 125-230B). Problèmes particuliers de syntaxe et de morphologie, historique et descriptive, du français. Introduction à la grammaire transformationnelle et générative.
Professeur

125-333B SEMANTIQUE ET LEXICOLOGIE. (3 crédits; *Prérequis:* 125-230B). Théories contemporaines de sémantique et de lexicologie. Notions de lexicographie. Changements sémantiques. Idiotismes. Néologismes, etc.
Professeur Di Stefano

125-345D STYLISTIQUE COMPAREE DE L'ANGLAIS ET DU FRANÇAIS. TRADUCTION I. (126-245D; 126-247D) (6 crédits). Initiation aux principes de la traduction par une étude systématique des contrastes entre les structures linguistiques de l'anglais et du français. Une **bonne** connaissance des deux langues est supposée au départ.

Inscriptions limitées, suivant un examen d'entrée le premier jour du cours.
Professeur Tichoux

125-350A LITTERATURE FRANÇAISE DU XXe SIECLE I. (126-223A) (3 crédits). Introduction à la littérature française moderne par une étude de quelques oeuvres parmi les plus marquantes.
Professeur Collet

125-351B LITTERATURE FRANÇAISE DU XXe SIECLE II. (126-224B) (3 crédits, *Prérequis:* 125-350A ou permission du professeur). Suite du cours précédent.
Professeur Collet

125-355D LE ROMAN DE PROUST A CAMUS (126-312D. -357D) (6 crédits) (Ne sera pas donné en 1977-78). Le roman en France depuis le début du XXe siècle jusqu'à la deuxième Guerre Mondiale.

125-356A REALISME ET NATURALISME I. (126-330A, -363D) (3 crédits). De Stendhal à Flaubert: naissance de l'esthétique réaliste, thèmes et structures romanesques.
Professeur Duquette

125-357B REALISME ET NATURALISME II. (126-331B, -363D) (3 crédits *Prérequis:* 125-356A ou permission du professeur). De Fromentin à Maupassant: évolution de la vision réaliste; thèmes et structures romanesques.
Professeur Duquette

125-358D LE ROMAN DEPUIS SARTRE. (126-225D, -275D) (6 crédits). Le roman d'après-guerre; le "nouveau roman". Techniques de composition; relations entre l'univers imaginaire des romanciers et leur époque.
Professeur Smith

125-360D LE ROMANTISME (126-251A, -252B, 231D). (6 crédits). Différents visages du romantisme français: ses origines (influence des littératures étrangères), la "bataille romantique". Développement d'une sensibilité et d'une thématique nouvelles.
Professeur Pascal

125-361D LA LITTERATURE DE LA RENAISSANCE (126-356D). (6 crédits). Panorama de la littérature française de Marot à Montaigne.
Professeur Kushner

125-362A LA LITTERATURE DU XVIIe SIECLE I. (126-236A) (3 crédits). (Ne sera pas donné en 1977-78.) La littérature de l'âge baroque en France.
Professeur

125-363B LA LITTERATURE DU XVIIe SIECLE II (126-237B). (3 crédits; *Prérequis:* 125-362A ou permission du professeur). La littérature de l'époque classique.
Professeur

125-364A LA LITTERATURE DU XVIIIe SIECLE I (126-336A). (3 crédits). Introduction aux grands courants d'idées du siècle. Evolution de la sensibilité dans le roman et le théâtre; mouvement philosophique.
Professeur Furlan

125-365B LA LITTERATURE DU XVIIIe SIECLE II (126-337B). (3 crédits; *Prérequis:* 125-364A ou permission du professeur). Etude des courants d'idées et du développement de la sensibilité en France après 1750.
Professeur Cartwright

125-366A LITTERATURE ET SOCIETE. LE ROMAN AU XVIIIe SIECLE I (126-262D) (3 crédits). *Ne sera pas donné en 1977-78.* L'évolution du genre romanesque au dix-huitième siècle étudié dans ses rapports avec les moeurs et avec la société de l'époque.

125-367B LITTERATURE ET SOCIETE. LE ROMAN AU XVIIIe SIECLE II (126-262D) (3 crédits; Prérequis: 125-366A ou permission du professeur). *Ne sera pas donné en 1977-78.* Suite du cours précédent.

125-368B. LITTERATURE NOIRE D'EXPRESSION FRANCAISE (126-238D). (3 crédits). *Ne sera pas donné en 1977-78.* Origine particulière de la littérature antillaise en africaine. Ce cours portera sur le mouvement de la négritude et sur ses chantres.
Professeur Maugey

125-370A LA LITTERATURE QUEBECOISE JUSQU'EN 1940 (126-227A, -229D). (3 crédits). Ce cours proposera l'étude des oeuvres les plus significatives de la littérature québécoise afin d'en dégager les principales tendances depuis François-Xavier Garneau (1840) jusqu'à Saint-Denys Garneau (1940).
Professeur

125-371B LA LITTERATURE QUEBECOISE DEPUIS 1940 (126-228B, -229D). (3 crédits; Prérequis: 125-370A ou permission du professeur). Ce cours proposera l'étude des oeuvres les plus significatives de la littérature québécoise afin d'en dégager les principales tendances, depuis Alain Grandbois (1940) jusqu'à nos jours.
Professeur

125-372D ROMAN QUEBECOIS JUSQU'EN 1945 (126-361D). (6 crédits). Naissance du roman d'aventure et du récit fantastique; étude de moeurs et romans de la terre, évolution du roman paysan.
Professeur Duquette

125-373B ROMAN QUEBECOIS (1945-1960) (126-461D). (3 crédits). La Seconde Guerre Mondiale: éclatement des valeurs traditionnelles. Découverte de la modernité et recherche de nouvelles formes. L'étude portera sur quelques oeuvres majeures et cette période.
Professeur

125-375D THEATRE QUEBECOIS (126-333D) (6 (6 crédits.) Etudes de pièces représentatives du théatre québécois: litterature, langue, société.
Professeur Smith

125-377A LA CRITIQUE LITTERAIRE QUEBECOISE (3 crédits). *Ne sera pas donné en 1977-78.* Histoire des doctrines littéraires et de la pensée critique au Québec depuis 1860. Problèmes principaux: existence de la littérature québécoise, rapports avec l'étranger, etc. Tendances de la critique actuelle universitaire et journalistique. Etude de quelques textes majeurs.
Professeur Rivard

125-378A LE CONTE QUEBECOIS. (3 crédits). Ne sera pas donné en 1977-78. La tradition orale: contes et légendes traditionnels. Passage de l'oral à l'écrit. Développement du conte littéraire depuis la fin du 19e siècle jusqu'à nos jours. Etude des principaux thèmes, des principales formes, et de quelques oeuvres majeures.
Professeur

125-382D ROMAN QUEBECOIS DEPUIS 1960 (126-329D. -461D). (6 crédits). Evoiution de la technique romanesque au Québec depuis 1960. Analyse formelle de plusieurs romans contemporains choisis parmi les auteurs les plus connus (Godbout, Ferron, Aquin, Bessette...)
Professeur Boucher

125-390D HISTOIRE DES THEORIES LITTERAIRES DE LA RENAISSANCE A NOS JOURS (126-422D). (6 crédits). La réflexion littéraire (doctrine critique) depuis ses débuts au XVIe siècle jusqu'à l'époque contemporaine.
Professeur Terrasse

125-400A,B FRANÇAIS COMMERCIAL (126-205D). (3 crédits; *Prérequis:* examen d'entrée). Réservé aux étudiants inscrits en dernière année à la Faculté de Commerce, ce cours porte sur le français des affaires. Exercices oraux et écrits: acquisition de vocabulaire, terminologie commerciale, rédaction de lettres et de rapports, etc.

125-405A,B FRANÇAIS ECRIT. (3 crédits; *Prérequis:* examen d'entrée. Consulter la Faculté des Sciences de l'Education). Réservé aux professeurs de primaire ou de secondaire en recyclage, détachés selon les critères établis par le Ministère de l'Education et inscrits à la Faculté des Sciences de l'Education.
Professeur

125-410B LITTERATURE ET CINEMA: DU ROMAN A L'ECRAN (126-235D). (3 crédits). Transposition cinématographique de quelques oeuvres littéraires. Les étudiants prépareront à l'intérieur de groupes de travail un projet d'adaptation de roman ou de pièce de théâtre à l'écran.
Professeur

125-420A CIVILISATION FRANÇAISE: l'ERE DES REVOLUTIONS (1789-1870) (126-341D). (3 crédits). La civilisation française (vie politique, sociale, artistique) de 1789 à 1870.
Professeur Launay

125-421A CIVILISATION FRANCAISE: LA REPUBLIQUE DEMOCRATIQUE (1870-1940) (126-341D). (3 crédits). Ce cours se propose de faire la synthèse de l'histoire politique, économique, sociale et culturelle depuis la chute du Second Empire jusqu'à la deuxième Guerre Mondiale.
Professeur Launay

125-434A PROBLEMES DE SOCIOLINGUISTIQUE DE FRANÇAIS. (3 crédits; Prérequis: 125-230B). Eléments de sociolinguistique et leur application aux pays francophones. Rapports entre les aspects phonologiques, grammaticaux et lexicologiques du parler et le milieu social. Dialectologie et argots.
Professeur

125-435B PROBLEMES DE LINGUISTIQUE DU FRANÇAIS MODERNE. (3 crédits; Prérequis: 125-230B). Séminaire portant sur des problèmes généraux de la linguistique française. Le sujet précis varie d'année en année (psycholinguistique, lexicographie, linguistique normative, etc.)
Professeur

125-445D PROBLEMES DE TRADUCTION: TRADUCTION II. (126-445D). (6 crédits; *Prérequis:* 126-345D ou permission du professeur). Ce cours portera, avec un minimum d'appareil théorique, sur les problèmes que pose la traduction, particulièrement dans le domaine littéraire. Inscriptions limitées, suivant un examen d'entrée le premier jour du cours.
Professeur Cartwright

125-450D LA POESIE DE BAUDELAIRE A APOLLINAIRE (125-451B). (6 crédits). La poésie en France au lendemain du romantisme. Symbolisme et Parnasse. Débuts de la poésie contemporaine.
Professeur Morisot

125-452A LE SURREALISME (126-415B). (3 crédits). *Ne sera pas donné en 1977-78.* Les grands précurseurs du surréalisme seront rappelés: Sade, Lautréamont, Rimbaud, Jarry, le Dadaisme; naissance de l'anti-littérature et de l'anti-art. Formation de l'école surréaliste; importance accordée à l'art; rapports avec la psychanalyse; aspects mystique et politique du mouvement.
Professeur Jones

125-453A LA POESIE CONTEMPORAINE (126-317A). (3 crédits). *Ne sera pas donné en 1977-78.* Les principaux courants de la poésie en France depuis Apollinaire.
Professeur Jones

125-454A LE THEATRE AU XXe SIECLE (126-367D). (3 crédits). Etude de pièces contemporaines s'opposant à la tradition réaliste et présentant des

analogies avec les mouvements poétiques et artistiques de l'époque: expressionnisme, cubisme, surréalisme. Théâtre de l'absurde et théâtre de la cruauté.
Professeur Collet

125-455D INTRODUCTION A LA LANGUE ET A LA LITTERATURE MEDIEVALES, (126-455D). (6 crédits). Survol de la production littéraire médiévale et du système de l'ancienne langue. Les divers genres littéraires seront abordés (conte, roman, théâtre, poésie).
Professeur Di Stefano

125-458D LA LITTERATURE FANTASTIQUE (126-458D). (6 crédits). *Ne sera pas donné en 1977-78.* Thèmes, techniques de la littérature fantastique depuis le début du XIXe siècle. Les littératures étrangères ne seront pas négligées.
Professeur Starosta

125-460A LE THEATRE AUX XVIIe ET XVIIIe SIECLES I (126-324A). (3 crédits). Le théâtre de l'âge baroque; les origines du théâtre moderne; dramaturgie classique. (1977-78: La comédie classique).
Professeur van Delft

125-461B LE THEATRE AUX XVIIe ET XVIIIe SIECLES II. (126-325B). (3 crédits; Prérequis: 460A ou permission du professeur). Le théâtre classique. Le théâtre satirique du XVIIIe siècle. (1977-78: La tragédie classique).
Professeur van Delft

125-462D HISTOIRE DE LA PENSEE FRANÇAISE DEPUIS LA REVOLUTION. (6 crédits). *Ne sera pas donné en 1977-78.* Le mouvement des idées en France au 19e et au 20e siècles. Littérature, politique, idéologies.

101-415D CONTEMPORARY FRENCH INTELLECTUAL HISTORY. (6 crédits). Voir Dépt. d'Histoire.
Professeur Hellman

125-468A QUESTIONS DE LITTERATURE ET DE CULTURE I. (3 crédits). Cours à contenu variable. (En 1977: Les origines du romantisme français). (Fermé aux étudiants qui ont suivi le 468D).
Professeur Terrasse

125-469B QUESTIONS DE LITTERATURE ET DE CULTURE II. (3 crédits). (Ne sera pas donné en 1977-78.) Cours à contenu variable. (Fermé aux étudiants qui ont suivi le 468D).
Professeur Furlan

125-470A POESIE QUEBECOISE DE CREMAZIE A SAINT-DENYS-GARNEAU (1850-1940) (126-364D). (3 crédits). Naissance et développement de la poésie québécoise jusqu'à la Seconde Guerre Mondiale. Rapports entre poésie et société. Influences subies. La guerelle du régionalisme. Etude d'oeuvres marquantes.
Professeur Ethier-Blais

125-471B POESIE QUEBECOISE D'ALAIN GRANDBOIS A NOS JOURS (DEPUIS 1940) (126-432D). (3 crédits). *Prérequis:* 125-470A. De l'introspection au surréalisme et l'automatisme (Alain Grandbois, Paul-Marie Lapointe, Ronald Giguère, Gilles Hénault et Claude Gauvreau) en passant par les mouvements divers, tels que ceux de l'Hexagone, de Liberté, de Parti-pris (Paul Chamberland) et de La Barre du Jour. Différentes approches seront utilisées pour l'étude des oeuvres. Nous réserverons une place importante à *L'homme rapaillé.*
Professeur Ethier-Blais

125-475A LITTERATURE FRANCAISE ET QUEBECOISE. (3 crédits). *Ne sera pas donné en 1977-78.* Interpénétration des littératures de France et du Québec. Le sujet précis change d'année en année.

125-485A ESSAI QUEBECOIS AVANT 1960. (126-436D). (3 crédits). Littérature et idéologie au Québec depuis le 19e siècle. La question nationale. Principaux mouvements d'idées. Etude de l'oeuvre de quelques essayistes importants.
Professeur

125-486B ESSAI QUEBECOIS DEPUIS 1960. (126-462D). (3 crédits; *Prérequis:* 125-485A ou permission du professeur). Littérature et idéologie au Québec depuis les débuts de la "Révolution tranquille". Principaux mouvements d'idées. Etude de l'oeuvre de quelques essayistes importants.
Professeur

125-490B TENDANCE CONTEMPORAINE DE LA CRITIQUE LITTERAIRE (126-390D). (3 crédits). Ce cours vise à mettre en lumière les tendances principales de la critique depuis Bachelard: phénoménologie, existentialisme, psychocritique, thématique, sociologie, structuralisme. Le travail sera centré sur l'étude approfondie de quelques oeuvres critiques particulièrement significatives. **Professeur Angenot**

125-491A SEMINAIRE SPECIALISE DE LITTERATURE FRANÇAISE I (126-491B). (3 crédits). Etude approfondie d'un mouvement ou d'une période dans la littérature française (genre, thème, etc.)
Professeur van Delft

125-492B SEMINAIRE SPECIALISE DE LITTERATURE FRANÇAISE II (3 crédits). Etude approfondie d'un sujet précis et limité.
Professeur Collet

125-495A SEMINAIRE SPECIALISE DE LITTERATURE QUEBECOISE I (126-492A). (3 crédits). Etude approfondie d'un mouvement ou d'une période dans la littérature québécoise (Genre, thème, etc.)

125-496B SEMINAIRE SPECIALISE DE LITTERATURE QUEBECOISE II (3 crédits). Etude approfondie d'un sujet précis et limité.

125-511A TRADUCTION LITTERAIRE (126-610D). (3 crédits). Sans négliger les problèmes théoriques, ce cours se propose essentiellement l'étude des problèmes méthodologiques et pratiques que pose la transposition en français de qualité d'un texte originellement rédigé en anglais litteraire. Il exige une certaine maîtrise de la syntaxe de ces deux langues, mais non une connaissance approfondie de leur lexique. Des travaux pratiques hebdomadaires couvriront systématiquement le champ des difficultés courantes, calques, interférences; faux amis, etc. Textes à traduire et bibliographies seront remis au début du cours.
Professeur Launay

125-520D EVOLUTION DE LA LANGUE FRANÇAISE AU CANADA (126-442D). (6 crédits; Prérequis: 125-235D ou permission du professeur). Le franco-canadien (ou franco-québécois) à partir de 1760. Etude des rapports entre l'évolution de la société et l'évolution de la langue. Le cours est conçu pour donner aux étudiants l'occasion d'effectuer des recherches personnelles.
Professeur Rabotin

125-550A LECTURES GUIDEES I. (3 crédits). Lectures personnelles ayant pour but de permettre à l'étudiant de combler une lacune ou de satisfaire un intérêt personnel. Admission sur autorisation spéciale.

125-551B LECTURES GUIDEES II. (3 crédits). Lectures personnelles ayant pour but de permettre à l'étudiant de combler une lacune ou de satisfaire un intérêt personnel. Admission sur autorisation spéciale.

125-595A INITIATION A LA RECHERCHE ET AUX METHODES CRITIQUES (3 crédits.) Notion de "texte littéraire". Histoire des tentatives pour constituer une "science du texte". Problèmes généraux de l'interprétation des textes.
Professeur Morisot

GEOGRAPHY (183)

Burnside Hall,
805 Sherbrooke St. West,
Montreal, PQ, H3A 2K6.
Chairman: Room 510, Phone 392-5489
General Inquiries: Room 513, Phone 392-5700

The Geography Department offers degrees in both the Faculty of Arts and the Faculty of Science. For a full description of the courses and for an outline of the nature of Geography and the opportunities for study in this discipline, the student should consult the listings under Geography in the Faculty of Science section of the announcement (page 171).

B.A. students planning to take an Honours or a Major in Geography should arrange an interview with the departmental chairman or his representative at least one week before registration.

Prerequisites

There are no prerequisites in geography for entrance to the Major or Honours B.A. or B.Sc. in Geography. Arts students should include six credits of Mathematics in their CEGEP or pre-university programs. Students who have completed college or pre-university Geography courses fully equivalent to those of first year university may substitute other approved courses as part of the Major or Honours programs.

Introductory Courses

Students intending to continue in human geography may find Geography 110A and 112B useful in addition to those courses specified in the Honours and Major programs.

Students intending to continue in physical geography should enrol in Geography 183-203D. Those students who have not taken physical geography or earth sciences at the Collegial level, and those students who do not intend to continue further in physical geography are recommended to take Geography 183-113B (a treatment of physical geography at the global scale).

Students seeking an overview of world geographic problems, and not necessarily wishing to continue in geography, are recommended to take Geography 183-110A, 112B and/or 113B.

B.A. MAJOR IN GEOGRAPHY

Advising: for information on advising and further course details please contact Burnside Hall, Room 513, Telephone 392-5700.

42 approved credits in Geography, 12 approved credits in related subjects from the Social Sciences. The Geography courses must include: Geography 183-201B, 202B, 214A, 216A, 203D and 6 credits of regional courses.

B.A. MAJOR IN GEOGRAPHY (SPECIAL PROGRAMS)

NOTE: It is recommended that courses which are **in bold print** be taken in U1.

Cultural Ecology

Geography **183-214A, 215A,** 300B, 403B, 414B
Anthropology 151-206D plus 36 approved credits in Geography, Anthropology and Biology

57 credits

Geography of Economic Activity

B.A. HONOURS IN GEOGRAPHY

Advising: for information on advising and further course details please contact Burnside Hall, Room 513, Telephone 392-5700.

The Geography Department offers three programs in the B.A. Honours sequence. The General Program permits the student to pursue a broad program including courses in physical geography and environmental studies, whereas the Economic/Urban and Cultural Programs provide for more specialized instruction in areas of human geography. The programs are very similar in the first year and a student may defer the choice of program until the beginning of the second year.

All three B.A. Honours programs involve completion of at least 54 credits in approved geography courses (including a 6-credit research course) and at least 9 credits in approved social science courses outside geography. The balance (of up to 27 credits) comprises electives. The following lists specify those courses which are compulsory in these programs. **A detailed description of each program with all approved courses is available from the departmental office, Room 513, Burnside Hall,** telephone 392-5700.

CORE COURSES (all programs):

Geography 201B, 202A, 203D, 351A, 482D.

URBAN/ECONOMIC PROGRAM:

Geography 214A, 216A, 217B

CULTURAL PROGRAM:

Geography 214A, 216A, 300B, 309A (or 311B), 331A (or 333A).

GENERAL PROGRAM:

Geography 302D, 306A (or 308B), 325A, 326A (or 236 or 311)

For detailed description of Geography courses see under Faculty of Science, page 172.

GERMAN (129)

Professor – A. ARNOLD *(on leave)*
Associate Professors – M. BIRCHER; V. BLOCK; E. GALLATI; T. GOLDSMITH-REBER *(on leave)*; A. HSIA; H.J. MAITRE; H. RICHTER; J. SCHMIDT; I. SCHUSTER
Sessional Assistant Professor – D. SAKAYAN
Visiting Assistant Professor – G. STEINLE

Samuel Bronfman Building,
1001 Sherbrooke St. West,
Departmental Office, Room 613,
Montreal, PQ, H3A 1G5
Telephone: 392-5091.

NOTE Students may begin at the Intermediate or Advanced level in their first year if they have taken German courses in High school or in CEGEP or in a McGill Summer Session. During the Summer Session the courses 129-202L and 252L are offered every year.

HONOURS IN GERMAN

Advisers: Professor Gallati and Professor Hsia

Samuel Bronfman Bldg., 392-5094/392-5096

The Department offers an Honours Program in German and Joint Honours with nine Departments. In Honours, a student normally takes German 200D-251D or 201D plus one of German 210A, 211B, 212A, 213B, 260D, 261A, 262B in his first year. In his second year he takes 18, in his third year 24 approved credits in German.

A student may register for Honours or Joint Honours in his/her second year if he/she has assembled the necessary credits in German. Some courses can be taken during the Summer Session.

JOINT HONOURS PROGRAM

Advisers: Professor Gallati and Professor Hsia, Samuel Bronfman Bldg., 392-5094/392-5096.

Joint Honours are possible with the following Departments: Classics, English, French, History, Italian, Linguistics, Philosophy, Russian, Spanish. Students enrolled in Joint Honours are requested to take 12 credits in German each year in consultation with the Department.

MAJOR IN GERMAN

Advisers: Professor Gallati and Professor Hsia, Samuel Bronfman Bldg., 392-5094/392-5096.

42 credits in German and 12 credits in a related field (another language, History, Linguistics, Philosophy, etc.). The courses are to be selected in consultation with the Department.

Junior Year Abroad

Adviser: Professor H. Richter, Room 617, Samuel Bronfman Bldg., 392-5094.

Second Year Honours students are eligible. They will study at a German-speaking European University and receive full credit for the year. Detailed information can be obtained from the Department

NOTE: For updated information on courses, text lists, teaching-staff etc. contact the departmental office.

Beginners' Level

A. EMPHASIS ON LANGUAGE

129-200D GERMAN LANGUAGE INTENSIVE BEGINNERS' COURSE. (12 credits). Intensive language course, covering the first two levels in one year rather than the usual two.
Professor Sakayan

129-201D GERMAN LANGUAGE, ACCELERATED BEGINNERS' COURSE. (6 credits; 5 plus 1 hours; *Prerequisite:* none). *Texts:* H. Kessler, *Deutsch für Ausländer* (Parts 1, 1a); Schulz-Griesbach, *Deutsche Sprache für Ausländer.* An audiovisual course. The stress is on oral comprehension and expression.
Professor Hsia

129-202D GERMAN LANGUAGE, BEGINNERS' COURSE. (6 credits: 3 plus 1 hours; *Prerequisite:* none). *Text:* Wängler-Kyes-Scherer: *Contemporary German* (McGraw-Hill). A solid, traditional method. The stress is on oral and written comprehension and expression.
Professor Arnold

129-203D GERMAN LANGUAGE, BEGINNERS' COURSE. (6 credits: 3 hours), *Text:* Jannach: *German for Reading Knowledge.* The stress is on written comprehension. Recommended for B.Sc. students, or engineers.
Professor Schmidt

B. EMPHASIS ON LITERATURE AND CIVILIZATION

129-210A GERMAN LITERATURE IN TRANSLATION. (3 credits; 3 hours; in English). Recommended for students taking a Beginners' Language Course concurrently. Works by major authors of the 19th century (Goethe-Nietzsche) will be discussed.
Professor Schmidt

129-211B GERMAN LITERATURE IN TRANSLATION. (3 credits; 3 hours; in English). Recommended for students taking a Beginners' Language Course concurrently. Works by major authors of the

20th century (Mann, Kafka, Brecht etc.) will be discussed.
Professor Schmidt

129-212A GERMAN LIFE AND INSTITUTIONS I. (3 credits; 3 hours; in English). Recommended for students taking a Beginners' Language Course concurrently.
Staff

129-213B GERMAN LIFE AND INSTITUTIONS II. (3 credits; 3 hours; in English). Recommended for students taking a Beginners' Language Course concurrently.
Staff

Intermediate Level

A. EMPHASIS ON LANGUAGE

129-251D GERMAN LANGUAGE, ACCELERATED INTERMEDIATE COURSE. (6 credits; 5 hours plus 1 hour laboratory; *Prerequisite:* German 201 or equivalent). Texts: Schulz-Sundermeyer: *Deutsche Sprachlehre für Ausländer;* several shorter literary works. Students completing this course will be admitted to any senior course in the Department.
Professor Maitre

129-252D GERMAN LANGUAGE. INTERMEDIATE COURSE. (6 credits; 3 hours plus 1 hour laboratory; *Prerequisite:* 202D or equivalent). Texts: Sparks-Vail: *German in Review;* Richmond-Kirby: *Auslese.* The stress is on oral and written comprehension and expression.
Professor Gallati

129-253D GERMAN LANGUAGE INTERMEDIATE COURSE. (6 credits; 3 hours; *Prerequisite:* German 203D or equivalent). *Texts:* Bergethon: *Grammar for Reading German;* Jannach: *Humanitites and Social Sciences.* The stress is on comprehension of academic texts.
Staff

129-254D GERMAN LANGUAGE. ADVANCED INTERMEDIATE COURSE (6 credits; 3 hours plus 1 hour laboratory; *Prerequisite:* high marks in 202D or two years of German at the high school or CEGEP level or equivalent). *Texts:* Lehmann, Rehder, Shaw and Werbow: *Review and Progress;* short novels and stories.
Staff

B. EMPHASIS ON LITERATURE AND LINGUISTICS

Text lists for and details on all of the following courses are available from the German Department Office.

One or two of the following courses are usually taken by students who are concurrently registered in 251D.

129-260D INTRODUCTION TO GERMAN LITERATURE. (6 credits; 3 hours; *Prerequisite:* 201D or equivalent or permission of the Department). *Texts: Kompass 3;* Several literary works.
Professor Block

129-261A DESCRIPTIVE GERMAN GRAMMAR. (3 credits; 3 hours; *Prerequisite:* An intermediate language course or permission of the Department).
Staff

129-262B DESCRIPTIVE GERMAN LINGUISTICS. (3 credits; 3 hours; *Prerequisites:* 261A or an intermediate language course or permission of the Department).
Staff

Advanced Level

A. EMPHASIS ON LANGUAGE

129-301A, 129-302B FUNCTIONAL GERMAN I. (3 credits each; 5 hours; *Prerequisite:* 251D or 250-300 hours of German or equivalent or permission of the Department). Discussion of newspaper articles *(Die Zeit, Der Spiegel),* literary texts (selected by each group), and general topics. The stress is on vocabulary building and on fluency of speech.
Professor Schuster

129-303A, 129-304B FUNCTIONAL GERMAN II. (3 credits each; 5 hours; *Prerequisite:* 252D or 254D or 200 hours of German or equivalent). Aim of the course; same as in 301. *(Not* open to Honours and Major candidates).
Professor Schuster

129-305D GERMAN LANGUAGE (SPECIAL COURSE). (6 credits; 3 hours). This course is intended for students who have a conversational knowledge of German, but little formal training in *writing* the language. The stress is on grammar and stylistics.
Professor Schmidt

B. EMPHASIS ON LITERATURE

129-310D GERMAN LITERATURE FROM LESSING TO BRECHT. (6 credits; 3 hours plus 1 hour *tutorial; Prerequisite:* 251D or 252D or 200 hours of German or equivalent). Texts: Several plays. "Novellen" and anthologies.
Professor Goldsmith-Reber

Senior Courses

(Literature, Linguistics, Philology, Stylistics)

NOTE: Text lists for and details about all of the following courses are available from the Departmental office. Not all courses are offered every year.

Prerequisites for all senior courses are German 200D or 251D or any course at the advanced level or permission of the Department.

A. LITERATURE

129-340A or B SCANDINAVIAN LITERATURE (in English). (3 credits). *Not given in 1977-78.*
Staff

129-350D GERMAN LITERATURE IN THE NINETEENTH CENTURY (1830-1880). (6 credits).
Professor Gallati

129-360A GERMAN LITERATURE IN THE TWENTIETH CENTURY I, From Naturalism to Expressionism. (3 credits).
Professor Goldsmith-Reber

129-361B GERMAN LITERATURE IN THE TWENTIETH CENTURY II. (3 credits).
Staff

129-362A GERMAN LITERATURE IN THE TWENTIETH CENTURY III. (3 credits).
Staff

129-363B GERMAN LITERATURE IN THE TWENTIETH CENTURY IV' THE Post-War Period. (3 credits).
Professor Goldsmith Reber

129-365A or B MEDIA STUDIES IN GERMAN (3 credits).
Professor Maitre

129-380A GERMAN LITERATURE OF THE ENLIGHTENMENT. (3 credits).
Professor Hsia

129-381B GERMAN LITERATURE OF THE "STURM AND DRANG" PERIOD. (3 credits).
Professor Hsia

129-390D HONOURS TUTORIAL I. (6 credits).
Professor Maitre

129-450A THE CLASSICAL PERIOD IN GERMAN LITERATURE. (3 credits).
Staff

129-451B GERMAN ROMANTICISM. (3 credits).
Professor Schuster

129-460A GERMAN LITERATURE IN THE AGE OF REFORMATION. (3 credits).
Staff

129-461B GERMAN LITERATURE OF THE BAROQUE PERIOD. (3 credits).
Professor Richter

129-490D HONOURS TUTORIAL II. (6 credits).
Professor Maitre

B. PHILOLOGY AND LINGUISTICS

129-370A GERMANIC PHILOLOGY. (3 credits). A survey of the history of the Germanic languages from their Indo-European origin until the end of the Germanic migrations. The main topics of study will be the Germanic sound shift. West Germanic phonological developments and the emergence of the West Germanic dialects.
Professor Richter

129-371B HISTORY OF THE GERMAN LANGUAGE. (3 credits). An outline of the history of the language from Charlemagne to the present. The main developments in phonology, syntax and lexicon will be covered together with the essentials of the cultural background.
Professor Richter

129-500A or B READINGS IN A GERMANIC LANGUAGE (Gothic, or Old Icelandic, or Old Saxon). (3 credits).
Staff

129-501A or B INTRODUCTION TO OLD HIGH GERMAN. (3 credits).
Professor Richter

129-510A MIDDLE HIGH GERMAN LANGUAGE. (3 credits).

129-511B MIDDLE HIGH GERMAN LITERATURE. (3 credits).
Professor Richter

C. STYLISTICS, TRANSLATION, PHONETICS, RHETORIC

129-320A TRANSLATION AND COMPOSITION I. (3 credits).
Professor Arnold

129-321B TRANSLATION AND COMPOSITION II. (3 credits).
Professor Goldsmith-Reber

129-401A, 129-402B FUNCTIONAL GERMAN (ADVANCED) I. (3 credits each; 5 hours; *Prerequisite:* 129-301A and 129-302B or permission).
Professor Schmidt

129-403A, 129-404B FUNCTIONAL GERMAN (ADVANCED) II. (3 credits each, *Prerequisite:* 129-303A and 129-304B or permission).
Note: **not** open to Honours and Major candidates.
Staff

129-520A ADVANCED COMPOSITION AND TRANSLATION. (3 credits).
Staff

129-521B GERMAN STYLISTICS. (3 credits).
Staff

129-530A or B THEORETICAL AND PRACTICAL GERMAN PHONETICS (CONTRASTIVE). (3 credits). *Not given in 1977-78.*
Professor Goldsmith-Reber

HISPANIC STUDIES (144)

Professor – SOLOMON LIPP *(Chairman)*
Associate Professors – MARCELINO AMASUNO; MONICA HARVEY; ZULMA NELLY MARTINEZ;

ANDRE MICHALSKI; VICTOR OUIMETTE; VICTORIANO UGALDE CUESTA
Assistant Professor – KAY M. SIBBALD
Visiting Assistant Professor – GILLIAN GAYTON
Faculty Lecturer – JEAN-MARC VARY
Lecturer – DIANE WILLIAMSON

Room 680, Samuel Bronfman Building,
1001 Sherbrooke St. West,
Montreal, P.Q. H3A 1G5
Telephone: 392-4600

The Hispanic Studies Department offers courses in language as well as literature and civilization of Spain and Latin America. The basic philosophy of the Department is dominated by a desire to expand the students' liberal arts background by acquainting them with the culture of other national groups. An enrichment in this area, it is felt, reduces provincialism and broadens one's intellectual horizon. This humanistic approach is indispensable, regardless of professional interests or fields of specialization, such as high school or college teaching, or work in Latin American studies. One is a more competent professional if one has been exposed to this perspective.

MAJOR PROGRAM

42 credits at the second year level or above plus 12 credits in related subjects, approved by the Department. Students may wish to concentrate either in Peninsular Spanish literature or Spanish American literature. At least twelve credits should be taken in Spanish American literature if the Major is in Spanish literature, and vice versa.

Required Courses

6 credits in civilization
6 credits in survey of literature

Highly Recommended Courses

Spanish 144-355A (Methods of Literary Analysis)
Spanish 144-451D (Cervantes)
Adviser to Major Program: Professor Sibbald, 392-4618.

HONOURS PROGRAM

With the permission of the Department, a more advanced Spanish course may be taken if the student has studied Spanish previously and has acquired proficiency in oral work.

The Honours program in Spanish has been designed to enable the student to pursue studies in one of two directions:

1) Emphasis on Spanish Literature
2) Emphasis on Spanish American Literature

Honours students are expected to achieve a high 'B' in all Spanish courses, as well as satisfactory standing in all other courses.

In order to be graduated with Honours in Spanish, a student will be required to write a research paper on a theme of his or her choice, under the guidance of a member of the Department.

The Department reserves the right to determine whether a student will be advanced or withdrawn from the Honours program.

Prerequisite: A first year Spanish course with a final grade of 75.%

Requirements: A minimum of 60 credits including 214D or 217A,B.

NOTE: Courses numbered in the 50s (e.g., 351, 453, etc.) are designed primarily for Honours students. However, others may enrol with the permission of the instructor.

Obligatory Courses (to be taken during the U-2 or U-3 years):

Spanish 144-355A (Methods of Literary Analysis)
Spanish 144-451D (Cervantes)
Spanish 144-456A (History of the Language)

Students concentrating in Spanish Peninsular Literature must take Spanish 144-457B (Medieval Literature) which is offered in alternate years.

Honours students are expected to take either Spanish Civilization and Survey of Spanish American Literature or Spanish American Civilization and Survey of Spanish Literature as basic courses.

Honours adviser: Professor Harvey, 392-4618.

JOINT HONOURS

Students may combine Honours in Spanish with Honours in any one of the following subjects: Classics, English, French, German, Italian, Linguistics, Philosophy, Russian. Students enrolled in Joint Honours are required to take 12 credits in Spanish each year. The following courses must be included in the program: Spanish 144-355A (Methods of Literary Analysis), Spanish 144-451D (Cervantes), 144-456A (History of the Spanish Language) and 144-457B (Medieval Literature). As in the case of single Honours, a research paper will be required.

Students may begin Single or Joint Honours in Spanish in their second year if, in the opinion of the Department, they are qualified to do so.

Adviser: Professor Lipp, 392-4601.

Course Descriptions

All Spanish courses, including 144-210D after the first weeks, are given in Spanish.

144-202D PORTUGUESE LANGUAGE. (6 credits). A comprehensive first year course in speaking, reading and writing. Selected readings in Portuguese and Brazilian literature. Four hours weekly, including laboratory.
Professor Harvey

Note: There is no intermediate course at present.

144-210D SPANISH LANGUAGE. (6 credits). A comprehensive first year course in speaking, reading and writing. An introduction to Spanish and Spanish American civilization. Four hours weekly, including laboratory.
Professor Michalski

144-214D ADVANCED ORAL AND WRITTEN EXPRESSION. (6 credits). Second year course. Review of grammar. Practice in speaking and writing. Completion of this course admits students to senior courses. Prerequisite: 210D or equivalent. Three hours weekly. (Not open to students who have taken 144-215A,B,216A,B or 217A,B).
Professor Martínez

144-217A,B ADVANCED ORAL AND WRITTEN EXPRESSION. (3 credits; Prerequisite: two years Spanish at the CEGEP level or equivalent). Review of grammar. Practice in speaking and writing. Three hours weekly. (Not open to students who have taken 144-216A,B or 144-214D).
Professor Sibbald

144-221A SPANISH CIVILIZATION. (3 credits). Survey of the culture and history of the Spanish people from the origins to the rise of the Spanish empire.
Professor Ugalde

144-222B SPANISH CIVILIZATION. (3 credits). Survey of the culture and history of the Spanish people from the Golden Age (including The Conquest of the New World) to the present era.
Professor Ugalde

144-231A SPANISH AMERICAN CIVILIZATION. (3 credits). From the indigenous period (Aztec, Maya and Inca civilizations) to Independence from Spain.
Professor Michalski

144-232B SPANISH AMERICAN CIVILIZATION (3 credits). From Independence to the present era.
Professor Lipp

144-241A SURVEY OF SPANISH LITERATURE. (3 credits). From the origins to the Golden Age, through a study of representative works.
Professor Ouimette

144-242B SURVEY OF SPANISH LITERATURE. (3 credits). From the Golden Age to the modern period through a study of representative works.
Professor Ouimette

144-243A SURVEY OF SPANISH AMERICAN LITERATURE. (3 credits). From the Colonial period to Modernism through a study of representative works.
Professor Lipp

144-244B SURVEY OF SPANISH AMERICAN LITERATURE. (3 credits). From Modernism to the present through a study of representative works.
Professor Martínez

144-315A,B FUNCTIONAL SPANISH. (3 credits). A Third Year level course: problems of advanced grammar and syntax. Written exercises, oral reports and summaries of reading selections will provide the basis for discussion. For Spanish majors. (Not open to students who have taken or are taking 144-316A B).
Professor Ugalde

144-316A,B FUNCTIONAL SPANISH. (3 credits) A Third Year level course for students who are not Major or Honours in the Department of Hispanic Studies. (Not open to students who have taken or are taking 144-315A,B).
Mr. Vary

144-321A SPANISH LITERATURE OF THE 18th CENTURY. (3 credits). *Not given in 1977-78.* A critical study of neo-classical drama and poetry; satirical prose; Jovellanos, Iriarte, Moratín and others.
Professor Sibbald

144-324B 20TH CENTURY DRAMA. (3 credits). Not given in 1977-78. Satirical drama and theatre of social protest. *Literatura comprometida.* García Lorca and Casona; Buero Vallejo, Sastre, Olmo, Muñiz, Arrabal and others.
Professor Sibbald

144-325D THE SPANISH NOVEL OF THE 19TH CENTURY. (6 credits) Not given in 1977-78. The Romantic, Realist and Naturalist novel in Spain, with special emphasis on the works of Pérez Galdós and the development of the Spanish novel in relation to contemporary trends in other European countries.
Professor Ouimette

144-326B SPANISH ROMANTICISM. (3 credits). The aesthetic and historical development of Romanticism, with special emphasis on lyric poetry and drama. (Not open to students who have taken 144-322B or 144-323A).
Professor Ouimette

144-327A LITERATURE OF IDEAS: SPAIN. (3 credits). *Not given in 1977-78.* Critical reading and discussion of works of outstanding thinkers as a key to understanding the development of social forces and institutions.
Professor Lipp

144-328B LITERATURE OF IDEAS: SPANISH AMERICA. (3 credits). Critical reading and discussion of works of outstanding thinkers as a key to understanding the cultural development of a continent.
Professor Lipp

144-332A SPANISH AMERICAN LITERATURE OF THE 19TH CENTURY. (3 credits). An intensive study of representative authors from the period of Independence to the advent of Modernism.
Professor Martínez

144-333A SPANISH AMERICAN THEATRE. (3 credits). *Not given in 1977-78.* A study of the outstanding works of the theatre from the colonial

period to the present, including pre-Columbian works.
Professor Harvey

144-350D THE GENERATION OF 1898. (6 credits). Spiritual and intellectual renewal in Spain from the war of 1898 to the Civil War, as seen principally in the works of Unamuno, Antonio Machado, Baroja and Valle Inclán. Politics and aesthetics.
Professor Ouimette

144-351D SPANISH AMERICAN NOVEL OF THE 20TH CENTURY. (6 credits). *Not given in 1977-78.* Representative authors of the 20th Century. The novel of the land: The Indianist Novel, The Mexican Revolution.

144-355A METHODS OF LITERARY ANALYSIS. (3 credits). Discussion of literary style and techniques; recent trends in criticism. Critical study of various authors for purposes of illustration.
Professor Martínez

144-356B SPANISH AMERICAN SHORT STORY. (3 credits). Study of style, tendencies and types as reflected in the evolution of this genre, and seen against the background of a developing continent.
Professor Michalski

144-421A GOLDEN AGE PROSE. (3 credits). *Not given in 1977-78.* The Picaresque and Pastoral Novels. Satirical prose.
Professor Ugalde

144-422B GOLDEN AGE PROSE. (3 credits). *Not given in 1977-78.* Didactic Prose. Ascetism and Mysticism.
Professor Ugalde

144-423B MODERN LYRIC POETRY. (3 credits). Poets in exile and counter movements in 20th Century Spain: García Lorca, Alberti, Salinas, Aleixandre, Cernuda and Hernández.
Professor Sibbald

144-424B SPANISH NOVEL SINCE THE CIVIL WAR. (3 credits). *Not given in 1977-78.* Cela and Tremendismo. Women novelists. Writers in exile: Goytisolo and others.
Professor Amasuno

144-432A SPANISH AMERICAN COLONIAL LITERATURE. (3 credits). *Not given in 1977-78.* A study of the outstanding works from the period of conquest and colonization to the wars of Independence.

144-440A THEMES IN HISPANIC LITERATURE. (3 credits). Reserved for Honours students who are writing their honours thesis during their final year of study.
Staff

144-442B MODERNIST POETRY. (3 credits). *Not given in 1977-78.* A study of the Modernist School of Spanish American Poetry, beginning with Rubén Darío.

144- 451D CERVANTES. (6 credits). A study of the complete *Don Quijote*, the *Novelas ejemplares*, the *Entremeses* and other theatrical works. Some account of outstandig critical works on Cervantes. (Not open to students who have taken 144-451B or 144-452A).
Professor Ugalde

144-453B SPANISH AMERICAN POETRY SINCE MODERNISMO. (3 credits). *Not given in 1977-78.* Study of major poets illustrating representative trends (Huidobro, Mistral, Vallejo, Neruda, Cardenal).

144-454A THE "NEW" SPANISH AMERICAN NOVEL. (3 credits). *Not given in 1977-78.* Study of key works representing Spanish American Realism and its ties with social realism (Carpentier, García Marquez, Asturias, Aguilera Malta) (Not open to students who have taken 144-454D).
Professor Martínez

144-455B THE "NEW" SPANISH AMERICAN NOVEL. (3 credits). Study of major works illustrating prevailing ideologies as they emerge from a particular, aesthetic use of language (Fuentes, Donoso, Vargas Llosa, L.R. Sánchez) (Not open to students who have taken 144-454D).
Professor Martínez

144-456A HISTORY OF THE LANGUAGE. (3 credits; Prerequisite for 144-457B). *Not given in 1977-78.* The development of Spanish from its beginnings to the Modern Period, including usage in Spanish America and Judeo-Spanish.
Professor Harvey

144-457A MEDIEVAL LITERATURE. (3 credits; Prerequisite: 144-456A). A study of important works of the period: *Poema de Mio Cid to La Celestina.*
Professor Harvey

144-458D GOLDEN AGE DRAMA. (6 credits). *Not given in 1977-78.* Study of representative works by Lope de Vega, Tirso de Molina, Caldéron de la Barca and others. (Not open to students who have taken 144-458A or 144-459B).
Professor Ugalde

144-460A GOLDEN AGE POETRY. (3 credits). Study of representative poets of the Renaissance and Baroque periods from Garcilaso and Italian influences to Góngora and Quevedo.
Professor Sibbald

144-470A TUTORIAL. (3 credits)

144-471B TUTORIAL. (3 credits)

144-472D TUTORIAL. (6 credits).

HISTORY (101)

Professors – C.C. BAYLEY, V. BOSS; P.C. HOFFMANN; H. SENIOR; R. VOGEL
Associate Professors – P.H. BOULLE; L. DECHÊNE; M.J. ECHENBERG; J.W. HELLMAN; E. LAFFEY;

L.L. LaPIERRE; P.T.K. LIN *(on leave 1977-78)* ; M.P. MAXWELL; C.I. MILLER; A.R. RIGGS; J.H. THOMPSON *(on leave 1977-78)*; B.J. YOUNG
Assistant Professors – Y. OTA; M. PETTER; S.J. RANDALL *(Chairman)*
Lecturers – G.D. HUNDERT; R. RICE;
Visiting Staff – NORMAN DAVIES; R.D. FRANCIS

General Office and Information: Room 625, Sixth Floor, Stephen Leacock Building, 855 Sherbrooke St. West, Montreal, P.Q. H3A 2T7.
Telephone: 392-5192.

Academic Advisers:
P.H. Boulle, G.D.Hundert, MP. Maxwell, R. Rice, A.R.Riggs.

The Department of History offers a wide range of courses in the history of such areas as Africa; Britain; Canada, with considerable emphasis being placed on French Canada and Québec; East Asia; Eastern Europe; France, Germany, Latin America, Russia and the United States. In addition, courses are offered on such topics as International Relations, the History of Medicine, Jewish History and War and Society. Greek, Roman, and Islamic history are taught in other departments with which the Department of History is closely associated.

The Department offers two kinds of programs – Honours and the Major. The Honours program offers a high degree of specialization in history with much individual instruction to qualified students. The Major provides for a measure of concentration in history in conjunction with an opportunity to take courses in other disciplines. Candidates who wish to study history as an Honours or Joint Honours subject, or who wish to major in History, must consult the Department as to their program. The general description of the Honours and Major programs will be found below.

Candidates entering University as U1 students may take all courses at the 200 level and courses at the 300 level for which they have the prerequisites.

MAJOR IN HISTORY

Director: Professor G.D. Hundert
Office: Room 637, Stephen Leacock Building
Telephone Number 392-4304

Requirements:

Students who choose a Major in History should consult an adviser in the Department **before** the day of their formal registration at the University.

The following types of Major programs are available within the Department of History.

1. AREA MAJOR

This is the most usual type of History major, in which a student concentrates in the history of a geographic area. The Department offers the following areas:

Canada, United States, General Europe, Eastern Europe, Western Europe, Great Britain and Asia.

The area major consists of a total of **54 credits** divided as follows:

a) 24 credits in History **within** the area of specialization
b) 18 credits in History **unrelated** to the area of specialization
c) 12 credits **outside** History related in theme to the area of specialization. Introductory courses in some cases **do not** meet this requirement.

Please note that 24 of the 42 credits in History must be at the 300 level or above.

2. THEMATIC MAJOR

This type of program can be arranged for students who do not wish to be bound to a particular area. Some examples of themes which have been used are Colonial Development, Imperialism, the Jews, and War and Society. In recent years the thematic major has been used to deal with students who wish to study North America, non-Western Societies or The "Third World"

The thematic major consists of **54 credits** divided as follows:

a) 30 credits (not 24 as in # 1) in History **within** the theme of specialization
b) 12 credits in History **outside** this theme
c) 12 credits **outside** History related to the theme

Please note that 24 of the 42 credits in History must be at the 300 level or above.

3. MAJOR WITH A DOUBLE CONCENTRATION

These programs, administered solely by the Department of History, allow a student to concentrate in the study of History and another subject. The program contains **60 credits,** distributed as follows:

a) 30 credits in History, 18 of which must be at the 300 level or above
b) 30 credits in another subject, 18 of which must be at the 300 level or above

Please note that students in this program are **History majors.** This designation and **only** this designation appears on their transcripts.

4. MAJOR IN HISTORY AND POLITICAL SCIENCE

This is the department's only cooperative major program, and students selecting this program must consult an adviser in **both** the Department of History and the Department of Political Science. This program contains **60 credits** distributed as follows:

a) 30 credits in History, 18 of which must concentrate on a **theme**
b) 30 credits in Political Science, 18 of which must concentrate on a **theme.**

Students who register in any of the above program should also be aware that:

1. Many related non-History courses have prerequisites, as for example those in Political Science, Economics and Sociology. Students must make certain that they take these prerequisite courses in the U1 or U2 year.
2. Introductory courses are in some cases not suitable as related non-History courses, since they provide only a basic introduction to a discipline. The best example of such a course is 154-200D, Introduction to Economics.
3. The total number of credits allotted to History courses is a **minimum.** Student may take other History courses as **electives.**

Under normal circumstances candidates who have completed the major program in History will not be eligible to enter the graduate program of the History Deparment unless they are prepared to do qualifying work.

HONOURS IN HISTORY

Director: Professor A.R. Riggs
Office: Room 611; Stephen Leacock Building
Telephone Number: 392-5187

Requirements:

The purpose of the honours program is to give students an opportunity to study an area or theme of history in some depth under the close direction of a member of staff. Each honours student's program is worked out to suit his or her specific needs within the general framework of the program. The rules of the program are designed to lead the student from introductory courses to more advanced courses while, at the same time, enabling the student to acquire ancillary skills, such as language, which are necessary for historical research in particular areas.

Candidates are required to arrange their individual programs in consultation with the Department at the beginning of each academic year and to maintain a high CGPA (B minimum in all history courses, and B minimum overall average).

The honours program in the History Department is divided into four major areas of concentration: The history of North America, the history of Great Britain, European history and East Asian history. Honours students are required to have a reading knowledge of such foreign language or languages as may be appropriate to their proposed course of study.

The full honours history student normally takes eleven courses (sixty-six credits) in history over a three-year period (see note at the end of this statement). If a student must acquire a language or other ancillary skill, or if there is a strong case for taking a historically oriented course in another discipline, the history requirement can be diminished.

The **first year** of the program is primarily devoted to taking introductory history courses (usually 3) so that a general perspective on the past is obtained. Introductory coursess should not be taken in the second and third years.

In the **second year** the student begins to specialize in one of two ways. In addition to advanced courses that lead on from the work done in the previous year, the student may either take two seminars, normally one in the second and one in the third year of study, or he or she may opt for the tutorial system.

The seminar option enables students to do research and participate in discussion in at least two areas which can be as far apart as "France during the Ancien Regime" and "Africa and the two World Wars". The student thereby acquires knowledge beyond that provided in an advanced course in at least two areas of specialization.

The tutorial route is designed for those students who wish to concentrate on one period of history. Students taking tutorials instead of the seminars work with one member of staff over a period of two years. As in other courses, evaluation and marks during each of the two years are based on the student's written and oral work. At the end of the second tutorial year, a **paper** is presented which is usually a substantial piece of work based on primary sources. Often a tutorial student will concentrate during U2 on the secondary works written about a particular period and in U3 work on primary material. The tutorial method provides sutdents with a high degree of personal supervision.

Candidates for the honours degree may offer History 490D/491D – the two-year tutorial program – chosen from one of the following areas:

a) – England in the Age of Wycliff,
– England from the Restoration to the accession of George IV,
– selected topics in Canadian history,
– a topic in German history after 1800,
– the Russian Revolutions of 1917,
– topics in Jewish history,
– West African history,
– selected topics in United States history,

OR

b) they may choose to take one undergraduate seminar per year.

An **oral examination** at the end of U3 is given by a panel usually consisting of professors whose courses the candidate has taken. The oral examination enables the Department to arrive at an overall assessment of the candidate's success in his or her undergraduate studies. The results of oral examinations will not appear on official transcripts, but they are among the criteria in deciding on applications for admission to graduate study, and in recommending candidates to other departments, faculties, and graduate schools.

JOINT HONOURS:

Those students who find the full honours program too specialized may enroll in the joint honours

program. This permits the division of the honours course requirements between history and another subject – anthropology, classics, economics, English, geography, German, Jewish Studies, philosophy, political science, and others; programs are worked out jointly by the history department and the other department concerned. Joint honours students take one history seminar within their six-course program in history. In a few cases joint honours students enter one of the two-year tutorials. Students should consult both departments with regard to programs and registration in joint honours courses. Programs will be designed to fit the individual interests of candidates but normally require an equal number of upper year courses in both disciplines.

NOTE: Not as an encouragement for deviation from the program outlined above, but in recognition of compelling circumstances and academically legitimate wishes on the part of students, the possibilities for deviation from the usual 11-course requirement are defined as follows. No more than three full-year historically oriented courses may be taken, in exceptional cases, outside the Department of History, or outside the University. A maximum of one such course or history course, taken as a summer course may be accepted within the limits of the three courses outside the Department if strong academic reasons favour such a decision. History courses taken at CEGEP's cannot be part of the 11-course requirement. In joint honours programs, no more than one history or historically oriented course may be taken outside the Department. Students may take one advanced language course each in their U2 and U3 years and have them counted in their 11-course requirements, if these language courses are necessary and relevant to their program. Introductory language courses cannot be accepted as part of the honours program requirements. Bilingual students will not be permitted to take language courses in one of their two languages as part of their honours program requirements.

Course Descriptions

101-200D A HISTORY OF AFRICA. (6 credits). A study of African cultures from the beginning of the Iron Age to the contemporary emergence of African States, with emphasis on the period since 1780. Stress is placed on the political and cultural relations of African societies with each other, with Europe and with Islamic civilization.
Professor Echenberg

101-202A CANADA TO 1867. (3 credits). A survey of the development of Canada, from the pre-Columbian explorations until the Confederation period. Social, economic and political history will be examined in a general way. (Not open to students who have previously taken History 101-202D).
Professors Francis and Young

101-203B CANADA SINCE 1867. (3 credits). A survey of the development of Canada from Confederation to the present day. Social, economic and political history will be examined in a general way. (Not open to students who have previously taken History 101-202D).
Professors Francis, Miller, and Rice

101-204D HISTORY OF GREAT BRITAIN. (6 credits). Survey of the development of Britain from the Middle Ages. Emphasis will be placed on political changes, seen in relation to the economic, social and intellectual background.
Professors Maxwell and Petter

101-206D HISTORY OF EASTERN EUROPE (FROM 4th CENTURY). (6 credits). The emergence of the first states, Christianization, and the Byzantine heritage; the medieval kingdoms of Poland, Bohemia and Hungary; the Ottoman conquests; Renaissance, Reformation and Enlightenment in Eastern Europe; the Hapsburg Monarchy; the Balkans, and the rise of nationalism in the nineteenth centruy.
Professor Davies

101-207D A HISTORY OF THE JEWS FROM LATE CLASSICAL TIMES TO THE PRESENT. (6 credits; Prerequisite: History 215D, possibly concurrently, is recommended). A general introductory survey of the history of the Jewish people from late classical times to the present in the context of general world history. Emphasis will be placed on general trends and developments, and special attention will be paid to areas of major Jewish settlement. The first term will deal with the period up to 1492, while the second term will cover the period from 1492 to the present.
Professor Hundert

101-208D THE DEVELOPMENT OF EAST ASIAN CIVILIZATION. (6 credits). History and salient features (social, political, economic, and intellectual) of the traditional civilization of China and Japan, from earliest times to the mid-19th century.
Professor Ota

101-209D THE MIDDLE EAST FROM THE RISE OF ISLAM TO 1797. (6 credits). The origins of the Early Islamic state in Arabia and the Umawi Caliphate. The growth of an Islamic civilization and the 'Abbasi Empire until the Selijuk period. The rise of the Fatimids. The Selijuks and the medieval synthesis. The Crusades. The Mongols and the destruction of the Baghdad Caliphate. The Mamluk, Persian,

and Turkish Empires until 1797. *This course will be given in alternate years. Not given in 1978-79.*
Professor Verdery (of the Institute of Islamic Studies).

101-211A THE UNITED STATES TO 1865. (3 credits). English colonization of North America, development of representative government, colonial wars and revolution, the Constitution, society and politics of the nineteenth Century, and the Civil War. Emphasis is placed on Puritanism, the American Revolution, and the men who fashioned and guided the new republic.
Professor Riggs

101-214D HISTORY OF IRELAND. (6 credits). A survey of the history of Ireland from the pre-Norman period to the present day. The emphasis will be placed on political developments, but these will be considered in the light of their social, economic and intellectual background. The first term will cover the period up to 1688.
Professors Maxwell and Senior

101-215D EUROPEAN CIVILIZATION IN THE MEDIEVAL AND MODERN PERIODS. (6 credits). The medieval period is studied in terms of its typical institutions; the Empire, the Papacy, feudalism, the guild, the dynastic state, etc. In the modern period, main emphasis is laid on the emergence of the Great Powers, and the long-term problems, at home and abroad, which conditioned their policies. This course provides a preparation for the study of European history.
Professor Vogel

101-221B THE UNITED STATES SINCE 1865. (3 credits. Prerequisite: History 211A or consent of instructor). The growth of industry, reconstruction, populism and progressivism, World War I, the New Deal, and World War II. Stress is placed on the political and social consequences of industrialization and urbanization.
Professor Randall

101-225D A HISTORY OF FRANCE. (6 credits) *Not given in 1977-78.* A survey of French society since the fall of the Roman Empire, with particular emphasis on the post-medieval period and economic, social and political developments.
Professor Boulle

101-226B EASTERN EUROPE IN THE TWENTIETH CENTURY. (3 credits). A survey of the significant developments in Central and Eastern Europe, from the outbreak of the First World War and the collapse of the Habsburg Empire to the present: the rise of nationalism and the emergence of new nation states, the fatal consequences of Versailles, the coming of the Second World War, and the occupation of Eastern Europe and the Balkans.
Professor Davies

101-235D A SURVEY OF GERMAN HISTORY. (6 credits). This course will give an overview of German history from its beginnings to the present. Selected aspects will be dealt with in depth; the foundations of the medieval Empire; the Reformation; the era of the World Wars. The course is an introduction to the entire field and will include some discussion of historiography.
Professor Hoffmann

101-236D HISTORY OF RUSSIA TO THE EARLY 20th CENTURY. (6 credits). *Not given in 1977-78.* The formation of the Kievan state, the Mongol occupation, the emergence and integration of the Muscovite state, the Petrine reforms, the "modernization" of Russia, the evolution of imperial Russian society. Emphasis is placed on the diverse interpretations of social, political, and intellectual themes in Russian history. (Not open to students who have previously taken 306A or 306D).
Professor Boss

101-239A HISTORY OF SCIENCE – FROM BACON TO NEWTON AND LEIBNIZ. (3 credits). *Not given in 1977-78.* The development of scientific ideas from Francis Bacon and his contemporaries on the Continent to the foundation of the Royal Society and the Newtonian synthesis. The main emphasis will be on Newton and the activities of his disciples and opponents, including Leibniz, Boscovich, Lomonosov, and the early popularizers of Newtonianism in France, Italy, and Germany. (Not open to students who have previously taken 439A).
Professor Boss

101-246B RESISTANCE TO SOVIETIZATION IN EASTERN EUROPE. (3 credits). *Not given in 1977-78.* The development of Communist movements in Eastern Europe between the two World Wars and the Communist take-over after World War II. Emphasis will be placed on the imposition of the Soviet model, dissent following Stalin's death, rebellions (Poland, Hungary) and attempts at socialist alternatives (Yugoslavia, Romania and Czechoslovakia).

101-249B HISTORY OF SCIENCE: FROM NEWTON TO THE END OF THE 18th CENTURY. (3 credits). This course will deal with the consequences of the Scientific Revolution, with particular emphasis on Newton and his successors (Voltaire, Algarotti, d'Alembert, Leibniz, Christian Wolff, Lomonosov), as well as on the role of scientific societies during the Enlightenment.
Professor Boss

101-280D MEDIEVAL LIFE AND INSTITUTIONS. (6 credits). The history of the Middle Ages is approached in terms of its typical institutions – the Church, the Holy Roman Empire, feudalism, the towns, the guilds, the representative system – with an analysis of the social groups attached to each. The crises which modified these institutions in the late Middle Ages are analysed as phases of the transition to the modern period of European history.
Professor Bayley

101-303A QUEBEC SINCE 1840. (3 credits; Prerequisite: History 202D or consent of instructor). Designed for the student with a general interest in French Canada, this one-term course will concentrate on Québec's major economic, social and political issues. Special attention will also be given to the English-speaking community. (Not open to students who have previously taken 313D).
Professor Young

101-304D BRITISH IMPERIAL POLICY FROM 1783. (6 credits; Prerequisite: Any course in British or Colonial history or consent of the instructor). The composition and development of British policy, stressing the interplay between domestic attitudes and imperial needs and opportunities as demonstrated in humanitarian, missionary, intellectual, economic and strategic interests.
Professor Senior

101-305D WAR AND SOCIETY IN MEDIEVAL AND MODERN EUROPE. (6 credits. Prerequisite: one general course in European history is desirable). *Not given in 1977-78.* War in Roman, Carolingian, and feudal society; rise of permanent armies and navies; military institutions of eastern Europe; warfare from Wallenstein to Napoleon; emergence of the national army in Russia; the Western military tradition after Clausewitz; the Communist doctrine of war.
Professors Bayley and Vogel

101-307D THE HISTORY OF THE JEWS IN POLAND, c. 1100-1945. (6 credits; Prerequisite: History 207D or permission of instructor). *Not given in 1977-78.* The course will include analyses of primary sources (in translation) related especially to the social, economic and institutional history of the Jews in Poland and their place in the East European Jewish community. Topics to be discussed: the Jews during "The Flood" (1648-1667), the communal crisis of the late 17th century, the Frankist movement, and Hasidism.
Professor Hundert

101-308D HISTORY OF CHINA. (6 credits). A survey course in the history of China from earliest times to 1911 with particular attention to social, intellectual and institutional change.
Professor Laffey

101-309B CANADA AND THE BRITISH EMPIRE. (3 credits; Prerequisite: History 202D or consent of instructor). This course will attempt to place the political, economic and cultural history of Canada within the broader perspective of the British empire, beginning with the cession of Acadia to England in 1713 and ending in the era of the First World War.
Professor Rice

101-310D TOPICS IN LATIN AMERICAN HISTORY. (6 credits). This is a survey course in its chronological scope, but it will concentrate on the social, cultural, and economic aspects of Latin American civilization from the pre-industrial through the modern period. The topical rather than purely chronological approach is intended to provide latitude for both the general student and the more specialized.
Professors Echenberg and Randall

101-314D TUDOR AND STUART ENGLAND. (6 credits; Prerequisite: History 204D or consent of the instructor). *Not given in 1977-78.* A study of English society, politics, and thought from the end of the Middle Ages to the eighteenth century. Among the topics discussed are the developments of the English state: economic expansion; the religious revolution; the civil war and its consequences; the intellectual and social changes.
Professor Maxwell

101-315D CONTEMPORARY EUROPEAN HISTORY. (6 credits; Prerequisite: any course in European history, e.g., 204D, 206D, 215D, 225D, 235D, or equivalent). *Not given in 1977-78.* This course will be devoted to a study of major developments in the 19th and early 20th centuries. Special emphasis will be given to the French Revolution, the rise of the working classes, liberalism, nationalism, imperialism and the European balance of power.
Professor Petter

101-318D A HISTORY OF JAPAN: (6 credits). A survey course in the history of Japan from the transmission of Buddhism (552 A.D.) to the 20th century, with particular attention to Modern Japan.
Professor Ota

101-319D THE MIDDLE EAST FROM 1798 TO 1949. (6 credits; Prerequisite: History 209D or consent of instructor). *Not given in 1977-78.* Turkey, the eastern Arab lands, and Persia at the start of European encroachment; the 19th century beginnings of modernization. The rise of Arab, Persian, and Turkish nationalism as a reaction to European imperialism. World War I and its Middle Eastern legacy. Interwar political developments. World War II and after, to the establishment of the State of Israel.
Professor Verdery (of the Institute of Islamic Studies).

101-322B CANADA AND THE AMERICAN PRESENCE SINCE 1939. (3 credits; Prerequisite: History 202D or consent of instructor). An examination of Canada's relationship with the United States in the modern era. Emphasis will be placed upon diplomatic, military, cultural, and economic facets of this relationship.
Professor Francis

101-325D WESTERN EUROPE FROM THE RENAISSANCE TO THE 18th CENTURY. (6 credits). A study of the development of political and social institutions, religion and culture, e.g. the Italian communes and principalities; humanism; the Reformation; the scientific revolution of the 18th century; the changing character of social classes, the development of absolutism; the critical thought of the 18th century.
Professor Maxwell

101-326D RUSSIA IN THE TWENTIETH CENTYRY. (6 credits). A survey of Russian and Soviet history from the reign of Nicholas II to the present, with particular emphasis on the development of the revolutionary movement prior to 1905, the First World War, the fall of the tsarist regime, the revolutions of 1917, Lenin and the Comintern, Trotsky and the rise of Stalin, collectivization and the purges, Nazi-Soviet relations and the Second World War, and the changes in Soviet society after Stalin. (Not open to students who have previously taken 216A or 406D).
Professor Boss

101-331D EMERGING MODERN AMERICA, 1877-1945. (6 credits; Prerequisite: History 211A and 221B or consent of the instructor. This course is not open to candidates who have previously taken History 311A and/or History 321B). The development of society in the United States from the end of Reconstruction until the death of Franklin D. Roosevelt. Emphasis is placed on the impact of industrialization and urbanization, the growth to world power, and the various movements of reform, including Populism, Progressivism, and the New Deal.
Professor Riggs

101-332D CANADA AND THE BIRTH OF CONFEDERATION. (6 credits; Prerequisite: History 202D or equivalent or consent of the instructor). This course will examine the social, cultural, political and constitutional development of Canada from 1840 to 1896. Particular attention will be given to the effect of federal policy on regional development, the interaction of the various sections of Canada, and on church and state relations.
Professor LaPierre

101-334D THE COMING OF THE FIRST WORLD WAR. (6 credits; Prerequisite: Any course in modern European History). *Not given in 1977-78.* While this course will deal principally with the diplomatic relations between the major European Powers and the various crises which disturbed European peace, it will also attempt to examine the political and social structure of the Great Powers and the bearing this had upon the course of international diplomacy.
Professor Petter

101-336D A HISTORY OF FRANCE SINCE 1789. (6 credits). A study of the major social, political, and cultural changes which France has undergone since the Revolution. Special emphasis will be placed on the struggle between religious and anti-clerical (or anti-religious) forces in the nineteenth century, on the history of revolutionary movements of the Left and of the Right, and on the transformations of these phenomena in the contemporary period.
Professor Hellman

101-341D THEMES IN THE SOCIAL AND ECONOMIC HISTORY OF THE UNITED STATES, 1830-1940. (6 credits; Prerequisite: History 211A and 221B or consent of instructor). *Not given in 1977-78.* The course is designed to examine a number of closely related themes in the socio-economic history of the United States in the 19th and 20th centuries. The emphasis in the course will be on the processes of industrialization and urbanization and their impact on American life and institutions, including the Church, the family, education, labour organizations and the working classes, the professions, and literature.
Professor Randall

101-342A THE HISTORY OF CANADA's EXTERNAL RELATIONS: 1867-1939. (3 credits; Prerequisite: History 202D). This course will examine the historical development of Canadian external relations before World War II. Particular emphasis will be placed on Canadian-American relations, Canadian-Imperial relations, the growth of Canadian diplomatic autonomy and participation in the League of Nations.
Professor Miller

101-345D FRANCE IN THE 17th AND 18th CENTURIES. (6 credits) Selected topics in French internal history from the end of the Wars of Religion to the outbreak of the French Revolution. Topics to be selected after discussion with the class; emphasis to be placed on class participation, class presentations and class discussion. (A reading knowledge of French is essential).
Professor Boulle

101-347D THE JEWS IN MODERN TIMES. (6 credits; Prerequisite: History 207D). A study of the various institutional, social and political responses of the Jews from 1492 to the present. Among the topics discussed are the marrano experience, enlightenment and reform movements, emancipation, and demographic changes.
Professor Hundert

101-349A HEALTH AND THE HEALER IN WESTERN HISTORY. (3 credits; this course is not open to candidates who have previously taken History 429D or 409A). *Not given in 1977-78.* This course traces the natural history of health and disease and the development of the healing arts, from antiquity to the beginning of modern times, focussing on that group of cultures which gave rise to "western" medicine. Use of a sociological and anthropological perspective invites students to see health and healing as gradually evolving aspects of society and culture.
Professor Bates (of the Department of the History of Medicine)

101-352D EMERGENCE OF ENGLISH CANADA, 1791-1867. (6 credits; Prerequisite: History 202D or consent of instructor). This course will be primarily concerned with the history of Upper Canada from its pioneer origins until Confederation. Special consideration will be given to immigration, urbanization and to relations with French Canada after the Union of 1841.
Professor Senior

101-353D WAR AND SOCIETY IN CANADIAN HISTORY. (6 credits; Prerequisite: History 202D). *Not given in 1977-78.* The first half of this course will consist of lectures by members of the staff on various social problems which have arisen in the pursuit of war, the fighting of rebellions, the development of armed forces, and the attempts to cope with civil disobedience and terror. The second half of the course will be devoted to individual study through supervised and guided reading and research.
Staff

101-355D GERMANY IN THE 19th CENTURY. (6 credits; Prerequisite: History 235D or consent of the instructor). *Not given in 1977-78.* German political, constitutional and social history, 1740-1914. Emphasis: the struggle of the two German Great Powers for control of Germany; Reform Era and Industrialization; the evolution of Prussian hegemony: diplomatic and social development leading to 1914.
Professor Hoffmann

101-356B THE HABSBURGS IN EASTERN EUROPE 1526-1918. (3 credits; Prerequisite: a course in European, Russian or Ottoman history or by permission of the instructor). *Not given in 1977-78.* The expansion of the Habsburgs into Eastern Europe through the acquisition of Bohemia and Hungary; the Ottoman onslaught and the ensuing internal rebellions; the Counter-reformation and the Polish partition; nationality problems in the multinational state; attempts to satisfy national aspirations within a federal context; the collapse of the Austro-Hungarian Empire at the end of the First World War.

101-359A HEALTH AND THE HEALER IN MODERN SOCIETY. (3 credits; Prerequisite: Consent of instructor). A study and analysis of health and the healing professions in the 19th and 20th centuries, this course is designed to explore the rise of personal, acute, medical treatment as the dominant form of health care in the 20th century. The historical development of hospitals, medical education, various healing professions, and public health is compared in Great Britain, the United States and Canada.
Professor Bates (of the Department of the History of Medicine)

101-362D THE WEST AND THE NORTH IN CANADIAN HISTORY. (6 credits; Prerequisite: History 202D). *Not given in 1977-78.* An examination of British Columbia, the Prairie Provinces and the North from the period of exploration and settlement until the present day. Emphasis will be placed on social and economic development and on the relationship of these regions to Central Canada.
Professor Thompson

101-363D CONTEMPORARY CANADA, 1890-1970. (6 credits; Prerequisite: History 202D or equivalent, or consent of instructor). This course will study Canadian social and political development since 1890. It will give particular attention to reform movements, third party protest, urbanization, regionalism, war, foreign policy (notably Canadian-American relations) and the Quiet Revolution.
Professor Miller

101-368D TRANSFORMATION AND DEVELOPMENT IN THE PEOPLE'S REPUBLIC OF CHINA. (6 credits; Prerequisites: History 208D or consent of instructor). *Not given in 1977-78.* The transformation of China's society and economy and of Chinese institutions and ideas since 1949, with special reference to the dynamics of phased transition, both in conceptual approach and in actual practice. (Not open to students who have taken 101-468D).
Professor Lin

101-403D THE COMING OF THE QUIET REVOLUTION. (6 credits; Prerequisite: Any course in Canadian or Québec history). *Not given in 1977-78.* Although this course will deal principally with the formation and development of social and economic groups in Québec since the twenties, it will also attempt to study the political development in Québec, its relation with the Canadian Federation and the impact it had upon the modern modernization of Québec Society in the last fifteen years. (A knowledge of French is required).
Professor Roy
(of the French Canada Studies Centre)

101-405D THE HISTORY OF EUROPEAN THOUGHT SINCE THE RENAISSANCE. (6 credits). *Not given in 1977-78.* This course begins with the Renaissance and studies various trends in European thought down to the present time. It is conducted primarily by means of discussions based on extensive reading in the sources – Erasmus, Luther, Descartes, Voltaire, Goethe, Comte, Marx, Nietzsche, Ellul, Beckett, etc. – and seeks an empathic understanding of each thinker as well as a grasp of the historical context, and influence, of his thought.
Professor Hellman

101-407D TECHNOLOGY AND SOCIETY IN MEDIEVAL AND MODERN EUROPE: A HISTORICAL SURVEY. (6 credits). The technological leadership of the East; the period of borrowing and advance in Europe, 12th-16th centuries; the expansion of Europe and its repercussion; technology as an instrument of power and welfare in 19th century Europe; the effects of the diffusion and adoption of European technology in the non-European world.
Professor Bayley

101-413D NATIONAL CONSCIOUSNESS AND RELIGION IN FRENCH CANADIAN LIFE AND SOCIETY. (6 credits; Prerequisite: History 202D or consent of instructor). *Not given in 1977-78.* An historical examination of the role and impact of "La race, la langue et la foi" in French Canadian history particularly in the 19th and 20th centuries. Special emphasis will be given to the study of the development of a national consciousness and of the living of

it as seen through the political, social, economic and cultural evolution.
Professor LaPierre

101-414D GREAT BRITAIN FROM THE LATE VICTORIAN PERIOD. (6 credits; Prerequisite: History 204D or consent of the instructor). This course examines the period after 1867, with particular emphasis on the changing character of party politics, social and economic development, the growth of the welfare state, and the impact of imperialism and war.
Professor Petter

101-415D CONTEMPORARY FRENCH INTELLECTUAL HISTORY. (6 credits). This study will survey selected twentieth century developments: Durkheim and the Positivist tradition, the socialisms of Jaurès and Péguy, the *Action Française*, Bergson and the Catholic revival, the evolution of French Marxism, Mounier and the Personalists, the National Revolution of Vichy, Gaullism and Malraux, Existentialism, Christian-Marxism, the Structuralists.
Professor Hellman

101-418D PROBLEMS IN MODERNIZATION OF JAPAN. (6 credits; Prerequisite: History 208D or 318D, or consent of instructor). *Not given in 1977-78.* Political, social, ideological change, and war and diplomacy from the Imperial Restoration to the present.
Professor Ota

101-420D FORMS OF PROTEST IN TRADITIONAL CHINA. (6 credits; Prerequisite: One prior course in Chinese history). An examination of the ideological and social roots and the forms of expression of protest in traditional China, at both the elite and popular levels. *This course will be given in alternate years.*
Professor Laffey

101-428D CONTINUITY AND CHANGE IN TWENTIETH CENTURY CHINA. (6 credits; Prerequisite: History 308D or consent of instructor). *Not given in 1977-78.* Problems in the radical political and social transformation of China, as confronted and dealt with by twentieth-century revolutionary movements; particularly in the period from the May Fourth Movement to the present.
Professor Lin

101-430D FRANCE AND THE AFRICANS: A HISTORY OF THEIR RELATIONS FROM 1700 TO THE PRESENT. (6 credits; Prerequisite: An introductory course in either African or French history, and a reading knowledge of French). *Not given in 1977-78.* An advanced study of the reciprocal nature of contacts between France and Africa south of the Sahara, the course will stress such topics as the slave trade, African resistance to French conquest, colonial rule and its legacy.
Professor Echenberg

101-435D GERMANY IN THE 20th CENTURY. (6 credits; Prerequisite: History 235D or consent of instructor). First World War: national and international aspects; another revolution arrested; unsolved problems; Weimar: economic crisis, frustrated energies, and nationalism; rise of Hitler; structure of the National Socialist state; blue-print for World Power; Second World War; attempts to overthrow Hitler; the revolt of conscience; defeat and division; the Cold War and the question of German unity; the two German states in the post-War era.
Professor Hoffmann

101-442D THE BEGINNINGS OF INDUSTRIAL SOCIETY IN CANADA. (6 credits; Prerequisite: History 202D or consent of instructor). *Not given in 1977-78.* Though focussed on Canada in the 19th century, this course will be a comparative one. It will examine Canadian society in reference to the British and American historical experience under certain themes such as population, economic growth, social structure, standard of living, technological and organizational diffusion, trade patterns and working class history.
Professor Rice

101-443B COMMUNICATIONS, SOCIETY, AND PUBLIC POLICY IN CANADA. (3 credits; Prerequisite: History 202D or consent of instructor). This course will be a study of the development of Canada's communication systems and its repercussions on the politicial, social and cultural life of Canadians.
Professor LaPierre

101-446B SOCIAL AND ECONOMIC HISTORY OF RUSSIA IN THE AGE OF SERFDOM. (3 credits; Prerequisite: a course in Russian, East European or economic history or permission of the instructor). Not given in 1977-78. The agrarian problem in Russia under the ancien régime from the mid-seventeenth century to the end of the nineteenth century; the socio-economic consequences of dominance by the gentry; the slow pace of urbanization and the emergence of the intelligentsia; the emancipation of the serfs and the other reforms of the 1860s; the consequences of the reforms and the problems these left unsolved.

101-452D SOURCES OF CONFLICT IN CANADIAN HISTORY. (6 credits; Prerequisite: History 202D). *Not given in 1977-78.* A study of the effect of sectionalism, regionalism, separatism and ethnic problems upon Canadian development since 1867. Themes will include Maritimes' dissatisfaction, Western integration, the role and scope of "ethnic groups", religious divisions, the French Canadian presence, regional economic disparities and the impact of native peoples.
Professor LaPierre

101-458D PROBLEMS IN TRADITIONAL CHINESE HISTORY. (6 credits; Prerequisite: History 308D or the equivalent, or consent of the instructor). *Not given in 1977-78.*
Professor Laffey

101-466B POLAND, CZECHOSLOVAKIA, AND THE USSR. (3 credits). Selected topics in Polish, Czech, and Soviet history. *Not given in 1977-78.*

101-484D THE COMING OF THE FIRST WORLD WAR. (Honours section of History 334D). (6 credits; Prerequisite: Any course in Modern European History). *Not given in 1977-78.*
Professor Petter

101-485D CONTEMPORARY EUROPEAN HISTORY. (Honours section of History 315D). (6 credits; Prerequisite: Any course in European History). *Not given in 1977-78.*
Professor Petter

HISTORY 101-417D 471D, 474D, 476D, 478D, 480D, 481D, 483D, 486D, 488D, 489D, 490D, 491D, 493D, 497D. Honours Subjects and Seminars.

101-001 HISTORY AND HISTORICAL STUDIES. (Non-credit optional series of lectures). A series of lectures by the members of the Department devoted to the place of history in the social sciences, the methodology of historical studies and the relation of history to the humanities and to the sciences. Lectures will be primarily designed for Upper year Honours students in History – but lectures will be open to interested students.
Members of the Department

Honours Seminars

101-417D SEMINAR: TRADITION AND CHANGE IN CHINA. (6 credits; Prerequisite: History 208D or 308D. Open only to East Asian Studies Honours students. History Honours students register under the course number 101-497D).
Professor Laffey

101-471D SEMINAR: THE UNITED STATES IN AN AGE OF INDUSTRY, 1865-1910. (6 credits).
Professor Randall

101-472D SEMINAR: ECONOMY AND SOCIETY IN BRITISH NORTH AMERICA 1760-1867. (6 credits).
Professor Rice

101-473D SEMINAR: CANADIAN HISTORY: ITS METHODOLOGY AND HISTORIOGRAPHY. (6 credits). *Not given in 1977-78.* A reading knowledge of French is essential.
Staff

101-474D SEMINAR: ENGLISH HISTORY, 1688 to 1870. (6 credits).
Professor Senior

101-476D SEMINAR: THE RUSSIAN REVOLUTION IN COMPARATIVE PERSPECTIVE. (6 credits).
Professor Boss

101-477D SEMINAR IN JEWISH HISTORY. (6 credits).
Professor Hundert

101-478D SEMINAR: POLITICS AND SOCIETY IN 20th CENTURY BRITAIN. (6 credits).
Professor Petter

101-480D SEMINAR: CAPITALISM AND EMPIRE: THE WORLD IN THE AGE OF EUROPEAN DOMINATION. (6 credits).
Professors Boulle and Echenberg

101-481D SEMINAR: UNITED STATES IN THE COLONIAL ERA. (6 credits).
Professor Riggs

101-483D SEMINAR: THE HISTORY OF MONTREAL. (6 credits; Prerequisites: History 202D and other courses on French Canada or consent of instructor).
Professor Young

101-486D SEMINAR: AFRICA AND THE TWO WORLD WARS. (6 credits). *Not given in 1977-78.*
Professor Echenberg

101-488D SEMINAR: MODERN FRENCH INTELLECTUAL HISTORY. (6 credits).
Professor Hellman

101-489D SEMINAR: PROBLEMS IN GERMAN HISTORY IN THE 20th CENTURY. (6 credits). *Not given in 1977-78.*
Professor Hoffmann

101-490D HONOURS TUTORIAL. (6 credits).

101-491D HONOURS TUTORIAL. (6 credits).

101-493D SEMINAR: TOPICS IN CANADIAN SOCIAL HISTORY. (6 credits).
Professor LaPierre

101-494D SEMINAR: POLITICAL AND SOCIAL IDEAS IN TUDOR AND STUART BRITAIN. (6 credits). *Not given in 1977-78.*
Professor Maxwell

101-495D SEMINAR: FRANCE DURING THE ANCIEN REGIME. (6 credits). *Not given in 1977-78.*
Professor Boulle

101-496D SEMINAR: REVOLUTIONARY MOVEMENT IN RUSSIA IN THE NINETEENTH CENTURY. (6 credits). *Not given in 1977-78.*

101-497D SEMINAR: TRADITION AND CHANGE IN CHINA. (6 credits; Prerequisite: History 208D and 308D or consent of the instructor.
Professor Laffey

The following course(s) may be chosen by History Major and Honours students as part of their programs:

135-356D JEWISH LABOUR MOVEMENT. (6 credits).
Professor Orenstein

157-200A INTRODUCTION TO QUEBEC SOCIETY. (3 credits).
Professor LaPierre

157-220B INTRODUCTION TO QUEBEC HISTORY. (3 credits).
Professor Roy

157-300A CULTURAL HISTORY OF QUEBEC I. (3 credits).
Professor Lamonde

157-303A SOCIAL HISTORY OF QUEBEC 1867-1921. (3 credits).
Professor Roy

157-310B CULTURAL HISTORY OF QUEBEC II. (3 credits).
Professor Lamonde

157-313B SOCIAL HISTORY OF QUEBEC 1921-1960. (3 credits).
Professor Roy

157-470D MASS CULTURE AND MASS MEDIA IN QUEBEC. (6 credits).
Professor Lamonde

HISTORY AND PHILOSOPHY OF SCIENCE PROGRAM

Co-ordinator: W.R. SHEA *(Philosophy)*
Co-ordinating Committee: DONALD G. BATES *(Medicine)*; VALENTIN BOSS *(History)*; MARIO BUNGE *(Philosophy)*; MAXWELL J. DUNBAR *(Marine Science)*; RAYMOND KLIBANSKY *(Philosophy)*; ROLF SATTLER *(Biology)*; PHILIP TEIGEN *(Osler Library)*.

Room 559, Bronfman Building
1001 Sherbrooke St. W.,
Montreal, P.Q., H3A 1G5
Tel.: 392-4517, 392-5149

History and Philosophy of Science at McGill is an interdisciplinary B.A. program that aims at providing students from the Faculties of Arts and Science with the opportunity of studying the development of science and discussing the nature of the scientific method and the impact of science and technology on society.

MAJOR PROGRAM

There is no prerequisite for admission into the Major program in History and Philosophy of Science. The program requires that the student take 30 credits in History and Philosophy of Science of which 3 must be "advanced courses" (400 level), and 24 credits in no more than three fields usually in the physical, biological, or social sciences to be determined with the program adviser.

All students who wish to Major in the History and Philosophy of Science must register with the Major's Advisers. Further information may be obtained from Prof. Valentin Boss (History), 392-5184 and Prof. William R. Shea (Philosophy), 392-4517.

HONOURS PROGRAM

Honours students are expected to take a minimum of 42 credits in History and Philosophy of Science. These must include 5 of the following courses: 107-220A, 107-221B, 107-324A, 107-325B, 107-504A, 107-505B, 107-590A, 107-591B, 101-239A, plus 2 tutorial seminars. Each student has the opportunity to construct within the Honours program a concentration focussed on a particular field of interest, such as The Scientific Revolution in the 17th Century. The Rise of the Mechanical Philosophy, Newtonian Science, Scientific Institutions in the 17th and 18th Centuries.

Students who wish to register in the Honours program should consult with Professor William R. Shea, (Philosophy) 392-4517, or Professor Valentin Boss (History) 392-5184.

Course Descriptions

ANTHROPOLOGY

151-358A INTRODUCTION TO RESEARCH

151-359B HISTORY OF ARCHEOLOGICAL THEORY

BIOLOGY

177-346A PHILOSOPHY OF BIOLOGY

177-347B HISTORY OF BIOLOGY

177-246A MODERN BIOLOGY AND THE PREDICAMENT OF MAN

HISTORY

101-239A HISTORY OF SCIENCE FROM BACON TO NEWTON AND LEIBNIZ *(Not given in 1977-78).*

101-239B HISTORY OF SCIENCE FROM NEWTON TO THE END OF THE 18TH CENTURY

101-349A HEALTH AND THE HEALER IN THE HISTORY OF THE WEST *(Not given in 1977-78)*

101-359A HEALTH AND THE HEALER IN MODERN SOCIETY

101-407D TECHNOLOGY AND SOCIETY IN MEDIAEVAL AND MODERN EUROPE: A HISTORICAL SURVEY

MATHEMATICS

189-338B TOPICS IN THE HISTORY AND PHILOSOPHY OF MATHEMATICS

PHILOSOPHY

107-220A INTRODUCTION TO HISTORY AND PHILOSOPHY OF SCIENCE, Part I

107-221B INTRODUCTION TO HISTORY AND PHILOSOPHY OF SCIENCE, Part II

107-321D PHILOSOPHY OF SCIENCE

107-322D METHOD AND METAPHYSICS IN THE SCIENTIFIC REVOLUTION *(Not given in 1977-78)*

107-324A PHILOSOPHY OF SOCIAL SCIENCE I *(Not given in 1977-78)*

107-325B PHILOSOPHY OF SOCIAL SCIENCE II *(Not given in 1977-78)*

107-332A PHILOSOPHY OF RELIGION

107-502A METAPHYSICS I

107-503B METAPHYSICS II

107-526A SCIENCE AND PHILOSOPHY IN THE 17TH CENTURY I

107-527B SCIENCE AND PHILOSOPHY IN THE 17TH CENTURY II

107-498A,B TUTORIALS

107-499D TUTORIALS

PHYSICS

198-200D IDEAS AND CONCEPTS OF MODERN PHYSICS

198-224B PHYSICS OF MUSIC

PSYCHOLOGY

204-403A MODERN PSYCHOLOGY IN HISTORICAL PERSPECTIVE

RELIGION

206-340B RELIGION AND THE SCIENCES

SOCIOLOGY

166-219B SOCIOLOGY OF INNOVATION AND CULTURAL CHANGE

166-225B MEDICINE AND HEALTH IN MODERN SOCIETY

166-235A TECHNOLOGY AND SOCIETY

166-325B SOCIOLOGY OF SCIENCE

HUMANISTIC STUDIES

Adviser: Professor Szanto,
Department of Comparative Literature
3495 Peel St.,
Montreal, PQ, H3A 1W7
Telephone 392-5452

18 credits in one language (Latin, Greek, German, Italian, Russian, Spanish); 6 credits in Social Science; 30 credits in no more than three humanities departments (languages other than one already chosen, Philosophy, English, French, History, Jewish Studies, Music, and Religion).

INDUSTRIAL RELATIONS STUDIES PROGRAM

The Industrial Relations Major is designed for the undergraduate student who wishes to earn a B.A. degree with a concentration of courses chosen from various disciplines that are related to Industrial Relations. The main economic and social forces which affect the employer-employee relationship are examined in a theoretical and practical setting. The student can choose from a wide range of courses in deciding how he or she will constitute the program, being able to concentrate to an extent in the area of industrial relations which interests him or her. The Faculty of Management offers a similar Major, leading to the B. Com. degree.

Note: Changes are currently being made in this program. See an Adviser for a complete Program Description.

Advisers: Sociology Option – Professor Michael Smith, Room 735, Leacock Building, 392-5180; *Economics Option* – Professor S. Ingerman, 419 Leacock Bldg., 392-5238 – Professor L. Soderstrom, 427 Leacock Bldg., 392-5234.

General Office, Room 514, Samuel Bronfman Building, 1001 Sherbrooke St. West, Montreal, P.Q. H3A 1G5. Telephone: 392-3077.

Industrial Relations majors must choose either the Economics or the Sociology option.

SOCIOLOGY OPTION

Economics: 154-200D
Management: 279-294A or B, 279-491D, 279-492A, 279-494B
**Sociology:* 166-235A, 166-312B, 166-223B, 350A, 417B, 420D, 463B

ECONOMICS OPTION

Economics: 154-200D, 154-306D, 154-317D, 154-426D
Management: 279-294A or B, 279-491D, 279-492A, 279-494B
**Sociology:* 166-312B, 166-235B

In addition to the required courses listed above nine (9) credits must be selected by students in both streams from the options listed below:
History: 101-202A, 203B, 221B or 331D, 363D, 403D
Political Science: 160-320A, 321B, 325D, 327A, 337B
Economics: 154-321D, 426D, 306D
**Sociology:* 166-217A, 222A, 223B, 235A, 312B, 337B, 350A, 353A, 410B, 417B, 420D, 463A,B
Management: 279-393A, 394B, 493B, 501B, 278-688B
Labour Law: 279-494B

*Sociology: 166-210A, 212A or 214B are prerequisites to all Sociology courses. If a student has not

taken it, it can be taken as an Arts option towards the B.A. but not as part of the Major Requirements.

NOTE: Please check departmental entries to determine whether or not a course will be offered.

Course Descriptions

(MANAGEMENT)

NOTE: 1) Arts and Science Students: Management courses listed in this Announcement count as elective courses from another faculty (maximum of 18 credits allowed unless a student has special permission from the Associate Dean).

2) Industrial Relations Majors: Students enrolled in the Industrial Relations Major may exceed the maximum of 18 outside credits (see (1) above) If they are taking Management courses approved by their Adviser as forming part of the Major program. Such students may not select any other courses that are outside the Faculties of Arts and of Science.

279-294A,B INTRODUCTION TO INDUSTRIAL RELATIONS. (3 credits). An introduction to the problems of labour-management relations, the structure, function and government of labour unions, labour legislation, the collective bargaining process, and the public interest in industrial relations.
Professor Bairstow

279-394B COLLECTIVE BARGAINING. (3 credits). (279-294A is a prerequisite, students who have not taken Introduction to Industrial Relations will not be admitted.) This course is designed for those students who wish to study the principles of collective bargaining in Canada and abroad. It deals with the structure of the bargaining parties and the structure of bargaining itself. It is problem oriented and relies heavily on empirical data and case problems.
Professor Bairstow

279-491D INDUSTRIAL RELATIONS IN PRACTICE. (6 credits). The object of this course is to give the students an opportunity to apply the knowledge that they have gained in their Industrial Relations Program. Students in this course will be encouraged to come to grips with a wide range of problems in industrial relations theory, policy and practice. This is achieved by means of guided reading and small discussion groups, mock collective bargaining sessions, contact with practioners in the field and problem-oriented research assignments. (Compulsory for Final Year Industrial Relations Majors. Others by permission of the instructor).
Professor Goldenberg

279-492A PUBLIC POLICY IN INDUSTRIAL RELATIONS. (3 credits). Collective bargaining and public policy towards Industrial Relations. Emphasis is placed on recent public investigations into labour relations in the federal and provincial jurisdictions. International comparisons are included.
Professor Woods

279-494B LABOUR LAW. (3 credits). A general introduction to the basic concepts of labour law which are relevant to the practice of Industrial Relations. The Course will review the historical development of labour law in certain social and legal systems and examine more fully the combination of this development in the legislative enactment and jurisprudence of the Canadian jurisdictions and certain comparative foreign models. (Course open to Industrial Relations students only).
Professor Keenan

278-688B LABOUR RELATIONS IN THE PUBLIC SECTOR. (3 credits). This course covers labour relations in a broad area of public services, federal, provincial, and municipal, as well as in the so-called quasi-public services such as hospitals, schools and government agencies and boards. Students will be encouraged to come to grips with some of the more contentious current issues in public service labour relations and compare and analyse the alternative methods that have so far been evolved to deal with them. This course is open to MBA II students who have completed 272-627A (Collective Bargaining) and to final year undergraduate students majoring in Industrial Relations. Others by permission of the instructor.
Professor Goldenberg

ITALIAN (132)

Professor – ANTONIO D'ANDREA
Associate Professors – MICHELANGELO PICONE, PAMELA D. STEWART *(Acting Chairman)*
Assistant Professors – SERGIO M. GILARDINO, ENRICA ROSSETTI
Lecturer – ANGELA SACCONAGHI
Sessional Lecturer – CARMELA MINDEL

Room 637, Samuel Bronfman Building, 1001 Sherbrooke St. West, Montreal, P.Q. H3A 1G5. General Telephone Number: 392-4567.

MAJOR IN ITALIAN

30 credits to be chosen from the following: Italian 230D, 240D, 251A, 252B, 301A, 302B, 341A, 342B, 351A, 352B, 401A, 402B, 451A, 452B, 461A, 462B, 464B;

12 credits: 2 compulsory courses, Italian 360D and 470D;

12 other credits in Arts or Social Sciences subjects chosen in consultation with the Department.

Prerequisites: see under individual courses.

Adviser: Professor P.D. Stewart, Samuel Bronfman Building, Room 637-A, 392-4567.

HONOURS IN ITALIAN

Admission to the Honours program in Italian requires departmental approval. Students wishing to register in the program should consult with the Department as early as possible.

Students may begin Honours in Italian in the Second year, instead of the First year, if in the opinion of the Department they are found qualified to do so.

Courses required: 36 credits to be chosen from the following: Italian 230D, 240D, 251A, 252B, 301A, 302B, 341A, 342B, 351A, 352B, 401A, 402B, 451A, 452B, 461A, 462B, 464B;

12 credits: 2 compulsory courses, Italian 360D and 470D;

6 credits: 1 compulsory tutorial, Italian 490D.

A minimum mark of 65% is required in each of the above listed courses.

Prerequisites: see under individual courses.

Adviser: Professor P.D. Stewart, Samuel Bronfman Building, Room 637-A, 392-4567.

JOINT HONOURS

Students may combine Honours in Italian with Honours in any one of the following subjects: English, French, German, Latin, Linguistics, Philosophy, Russian, Spanish. Admission to Joint Honours requires departmental approval. Students wishing to register in the program should consult with the Department as early as possible.

Students may register for Joint Honours in the Second year, instead of the First year, if in the opinion of the Departments they are found qualified to do so.

Italian courses required: 36 credits to be chosen from the following: 230D, 240D, 251A, 252B, 301A, 302B, 341A, 342B, 351A, 352B, 360D, 401A, 402B, 451A, 452B, 461A, 462B, 464B, 470D.

A minimum mark of 65% is required in each of the above listed courses.

Prerequisites: see under individual courses.

Adviser: Professor P.D. Stewart, Samuel Bronfman Building, Room 637-A, 392-4567.

Course Descriptions

Two sets of courses are offered by the Department:

a) Italian 132-200D, 205D, 210D, 215D, 230D, 240D, 251A, 252B, 301A, 302B, 341A, 342B, 351A, 352B, 360D, 401A, 402B, 451A, 452B, 461A, 462B, 464B, 470D, 490D: courses intended for students wishing to learn, or improve their knowledge of the language, and to study Italian literature in the original;

b) Italian 132-225D, 325A and 326B: courses on Italian literature given in English; Italian authors will be read in the original or in translation as preferred by students; knowledge of the Italian language is not required.

132-200D ITALIAN LANGUAGE INTENSIVE. (12 credits; *Texts:* D'Andrea & Stewart, *Il manuale italiano; Mondadori's Pocket Dictionary;* Pratolini, *Il quartiere:* Mondadori; Soldati, *Il vero Silvestri:* Oscar Mondadori; Ginzburg, *Valentino:* Einaudi; D'Andrea & Stewart, *Antologia italiana).* For students who have had no opportunity to acquire any knowledge of Italian. Intensive language course, covering the first two levels in one year rather than the usual two.
Miss Sacconaghi

132-205D ITALIAN LANGUAGE FOR BEGINNERS. (6 credits; 3 hours and laboratory; *Texts:* D'Andrea & Stewart, *Il manuale italiano; Mondadori's Pocket Dictionary;* Ginzburg, *Valentino:* Einaudi). Grammar, reading, dictation. Intensive practice in speech patterns and written structures. Conversation and composition. Visual material and selected readings will be used in describing the making of contemporary Italy. Opportunity for extra practice in Italian conversation is provided by the Department.
Staff

132-210D ITALIAN LANGUAGE AND CIVILIZATION. (9 credits; 5 hours; Prerequisites: Permission of the Department; Texts: D'Andrea & Stewart, *Il manuale italiano;* D'Andrea & Stewart, *Antologia italiana;* Pacifici, *Italia: vita e cultura:* Random House; Soldati, *Il vero Silvestri:* Oscar Mondadori; Pratolini, *Il quartiere:* Mondadori). Grammar, reading, conversation and composition. An outline of italian civilization. This course is intended to enable students who have no formal grounding in the Italian language, to obtain in one year the same level of competence as students who have taken CEGEP Intermediate Italian.
Miss Sacconaghi

132-215D INTRODUCTION TO ITALIAN LITERATURE. GRAMMAR. CONVERSATION, AND FREE COMPOSITION. (6 credits; Prerequisite: Italian 205D or the equivalent; *Texts:* D'Andrea & Stewart, *Il manuale italiano;* D'Andrea & Stewart, *Antologia italiana; Dizionario Garzanti della lingua italinana;* Sansone, *Storia della letteratura italiana:* Principato; Moravia, *Gli indifferenti:* Bompiani; Pratolini, *Il quartiere:* Mondadori; Soldati, *Il vero Silvestri:* Oscar Mondadori). A survey of Italian literature with special emphasis on some aspects of the Italian Novel. Reading of selected works and group discussion.
Staff

132-225D MAIN TRENDS AND MAJOR WRITTERS OF ITALIAN LITERATURE. (6 credits; 1 lecture hour and 2 conference hours). *Not given in 1977-78.* Lectures are given in English. Readings in Italian or in translation, as preferred by students. This course is intended to give students, whether they know Italian or not, an insight into the main problems of the Italian literary tradition.
Professor D'Andrea and Staff

132-230D SURVEY OF ITALIAN LITERATURE. (6 credits; Prerequisite: CEGEP Intermediate Italian, or permission of the Department; *Texts:*

D'Andrea & Stewart, *Il manuale italiano,* D'Andrea & Stewart, *Antologia italiana; Dizionario Garzanti della lingua italiana;* Calvino, *Il barone rampante:* Einaudi; Jovine, *Signora Ava:* Einaudi; Marchese, *Panorama:* La Nuova Italia; Sansone, *Storia della letteratura italiana:* Principato). Readings from representative works of Italian literature; special emphasis on the nineteenth and twentieth centuries.
Professor Rossetti

132-240D MANZONI AND THE ITALIAN LITERATURE OF THE "RISORGIMENTO". (6 credits; Prerequisite: CEGEP Intermediate Italian, or permission of the Department; *Texts: Dizionario Garzanti della lingua italiana;* Manzoni, *I Promessi Sposi:* Laterza; Nievo, *Le confessioni di un Italiano:* Petrini; Sansone, *Storia della letterature italiana:* Principato). The Italian Romantic movement and its social and political background. The intellectual life of Alessandro Manzoni as reflected in his novel, *I Promessi Sposi.*
Professors Gilardino and Rossetti

132-251A THE COMMEDIA DELL'ARTE". (3 credits; Prerequisite: CEGEP Intermediate Italian, or permission of the Department; *Texts: Dizionario Garzanti della lingua italiana;* D'Amico, *Storia del teatro drammatico:* Garzanti; D'Andrea & Stewart, *Antologia italiana).* Playhouses, actors, stage techniques, masks and scenarios of the "Commedia dell'arte."
Professor Stewart

132-252B ITALIAN DRAMA FROM GOLDONI TO PIRANDELLO. (3 credits; Prerequisite: Italian 251A, or permission of the Department, *Texts: Dizionario Garzanti della lingua italiana;* D'Amico, *Storia del teatro drammatico: Garzanti;* Goldoni, *Il Teatro Comico, La Bottega del Caffè, Il Bugiardo, La Locandiera, I Rusteghi, Il Ventaglio:* Signorelli; Pirandello, *Sei Personaggi in cerca d'autore, Enrico IV:* Mondadori). A study of drama in Italy from the eighteenth to the twentieth century, with emphasis on Goldoni and Pirandello.
Professor Stewart

132-301A LEOPARDI AND THE ITALIAN POETRY OF THE 19th CENTURY. (3 credits; Prerequisite: Italian 230D, 240D, 251A or 252B, or permission of the Department). Readings from Leopardi's *Canti* and from representative works of other nineteenth-century poets.
Professor Picone

132-302B CONTEMPORARY ITALIAN PROSE. (3 credits; Prerequisite: Italian 230D, 240D, 251A, or 252B, or permission of the Department). Italian novelists, playwrights, diarists, and essayists from 1945 to the present in the context of the Italian post-war society.
Professor Gilardino

132-325A DANTE AND THE MIDDLE AGES. (3 credits; Prerequisite: Italian 225D, or permission of the Department). *Not given in 1977-78.* Lectures are given in English. Readings in Italian or in translation, as preferred by students. Students are not required to take language courses as prerequisites. Special emphasis will be placed on the history of ideas and on the cultural contacts of Italy with England and France during the Middle Ages.
Professor D'Andrea and Staff

132-326B THE RENAISSANCE: PETRARCH, BOCCACCIO, AND MACHIAVELLI. (3 credits; Prerequisite: Italian 225D, or permission of the Department). *Not given in 1977-78.* Lectures are given in English. Readings in Italian or in translation, as preferred by students. Students are not required to take language courses as prerequisites. Special emphasis will be placed on the history of ideas and on the cultural contacts of Italy with England and France during the Renaissance.
Professor D'Andrea and Staff

132-341A STRUCTURE OF THE ITALIAN LANGUAGE. (3 credits; Prerequisite: Italian 230D, 240D, 251A or 252B, or permission of the Department). A description of the main phonological, morphological and syntactic aspects of the Italian language.
Professor Picone

132-342B HISTORY OF THE ITALIAN LANGUAGE. (3 credits; Prerequisite: Italian 341A, or permission of the Department). An outline of the history of language from its origins to modern times, with special emphasis on prose.
Professor Picone

132-351A ARIOSTO'S ORLANDO FURIOSO. (3 credits; Prerequisite: Italian 230D, 240D, 251A or 252B, or permission of the Department). The chivalresque genre and the courtly life of the Renaissance. Readings from Pulci's *Morgante,* Boiardo's *Orlando innamorato,* Castiglione's *Cortegiano,* and from the *Orlando Furioso.*
Professor Gilardino

132-352B FROM THE RENAISSANCE TO THE BAROQUE AGE: TASSO: THE ITALIAN PROSE FROM THE LATE 16th TO THE EARLY 18th CENTURY. (3 credits; Prerequisite: Italian 351A, or permission of the Department). The crisis of the Italian Renaissance and Tasso's *Gerusalemme Liberata.* Literary criticism; erudition; scientific and philosophical prose from Galileo to Vico.
Professor Gilardino

132-360D SEMINAR ON ITALIAN STYLISTICS AND COMPOSITION. (6 credits; 2 lecture hours per week and report on special assignment; Prerequisite: Permission of the Department). Intensive practice in stylistics and composition, with special emphasis on literary style. Seminar discussions on exercises and papers submitted by the students. Oral dissertations on various subjects, mainly of a literary character, prepared and delivered by students.
Miss Sacconaghi

132-401A VERGA AND THE "VERISMO". (3 credits; Prerequisites: Italian 230D, 240D, 251A or 252B, or permission of the Department). The realistic movement in Italian narrative prose (end of the 19th and beginning of the 20th century), with special emphasis on the novels and short stories of its main representative, Giovanni Verga.
Professor Rossetti

132-402B MODERN ITALIAN LITERATURE. (3 credits; Prerequisite: Italian 401A, or permission of the Department). *Not given in 1977-78.* A study of representative works of major Italian twentieth-century authors.
Professor Gilardino

132-451A BOCCACCIO AND THE ITALIAN NOVELLA. (3 credits, Prerequisite: Italian 230D, 240D, 251A or 252B, or permission of the Department). A study of Boccaccio's *Decameron* and of the Italian narrative prose up to the sixteenth century.
Professor Stewart

132-452B THE ITALIAN DRAMA OF THE RENAISSANCE. (3 credits; Prerequisite: Italian 451A, or permission of the Department). The role of Humanism in the revival of Drama. Secular and religious festivals. The audience and the stage. Representative works of the major playwrights.
Professor Stewart

132-461A DANTE: THE DIVINE COMEDY. (3 credits; Prerequisites: Italian 230D, 240D, 251A or 252B, or the equivalent, and permission of the Department). The structure and intellectual background of the *Divine Comedy:* a reading and interpretation of the poem; a discussion of the main trends in contemporary Dante scholarship.
Professor Picone

132-462B PETRARCH AND PETRARCHISM. (3 credits; Prerequisites: Italian 230D, 240D, 251A or 252B, or the equivalent, and permission of the Department.) *Not given in 1977-78.* Petrarch's life, his temperament, his works; a reading and interpretation of his lyrical poetry; an account of his influence as a lyric poet in Italy and abroad.
Professor D'Andrea

132-464B MACHIAVELLI: THE PRINCE. (3 credits; Prerequisites: Italian 230D, 240D, 251A or 252B, or the equivalent, and permission of the Department). An analysis of the text of *The Prince.* Selected readings from Machiavelli's other works.
Professor D'Andrea

132-470D SEMINAR ON ITALIAN LITERATURE. (6 credits; 2 lecture hours per week and report on special assignment; Prerequisite: permission of the Department). Students will be assigned a reading program designed to integrate their knowledge of Italian literature, and will be required to take part in weekly seminar discussions with Staff members.
Professor D'Andrea and Staff

132-490D TUTORIAL. (6 credits; Prerequisite: For U3 Honours students only). Every student will be entrusted to a Tutor. The Tutor will meet the student regularly during the term to discuss special assignments (readings, essays, etc.).
Professor Gilardino

JEWISH STUDIES PROGRAM (135)

Professor – HARRY M. BRACKEN
Associate Professor – RUTH WISSE *(Chairman)*
Assistant Professors – SEYMOUR EPSTEIN; LAWRENCE KAPLAN; BARRY LEVY; YEHUDI LINDEMAN; EUGENE ORENSTEIN
Lecturers – GERSHON HUNDERT; SHIMON LEVY
Sessional Lecturer – L. TENCER

Room 103, 3511 Peel Street,
Montreal, PQ, H3A 1W7,
Telephone 392-5969.

The Jewish Studies Program, established in 1968, offers an interdisciplinary approach to Jewish learning. It includes:

- a selection of courses which will enable the student not majoring in Jewish Studies to broaden his or her knowledge of Jewish history and culture;
- elementary, intermediate and advanced courses in Jewish languages – Hebrew, Yiddish, and Aramaic. In the case of the first two, this includes attention to both spoken idiom and written texts.
- specialized courses in the various disciplines that comprise Jewish Studies for the student who has specific academic interests;
- comprehensive undergraduate majors and honours programs, culminating in advanced seminars and tutorials for students contemplating careers in the various and ramified fields of Judaica. The Honours program in Jewish Studies will give the student the necessary linguistic, textual and bibliographical knowledge to enable him or her to pursue graduate work in Jewish Studies.
- courses interpreting Hebrew and Yiddish literature and culture for those with no linguistic preparation.

MAJOR IN JEWISH STUDIES

A major consists of 54 approved credits distributed as follows:

1) Completion of third year level of instruction in a Jewish language. (When a student is able to demonstrate competence in a Jewish language that student may be permitted to substitute other courses for all or part of the language requirement.)

2) Nine credits from one of the following options:
Option A: History 101-207D plus Jewish Studies 135-211A.
Option B: Any three of the following: Jewish Studies 135-211A, 135-212B, 135-213A or 135-214B.

3) The remaining 27 credits will be planned in consultation with the adviser.

HONOURS IN JEWISH STUDIES

An honours consists of 66 approved credits distributed as follows:

1) Each honours student will complete at least one Jewish language at the third year level of instruction. (When a student is able to demonstrate competence in a Jewish language that student may be permitted to substitute other courses for all or part of the language requirement.)

2) Nine credits from one of the following options:
Option A: History 101-207D plus Jewish Studies 135-211A.
Option B: Any three of the following: Jewish Studies 135-211A, 135-212B, 135-213A or 135-214B.

3) The remaining 39 credits will be planned in consultation with the adviser.

4) Each Honours student will prepare a senior thesis under the direction of a staff member usually in conjunction with a seminar or tutorial.

5) Honours students are expected to achieve a grade of "B" or higher in every Jewish Studies course.

Major/Honours Adviser:
Professor Lawrence Kaplan 392-5969.

INTERDEPARTMENTAL PROGRAMMING

1) Many of the courses in Jewish Studies are related to other departments – e.g. History, Religion, Comparative Literature. There are also related courses in other departments which students specializing in certain areas of Jewish Studies might be encouraged to include in their programs, e.g. Classical Greek, Arabic, Theories of Literature, etc.

2) Students wishing to arrange joint honours programs may normally do so in consultation with the appropriate departments.

Jewish Teacher Training Program

This program was established in 1973 in the Faculty of Education in conjunction with the Jewish Studies Program. The goal is to train teachers of Jewish Studies for the elementary and secondary school levels through exposure to educational theory and methodology and courses in Jewish Studies. A B.Ed. with Jewish Studies as a specialization is available. In addition, a B.A. (Jewish Studies major) may be pursued under the guidance of the Jewish Teacher Training Program with a view to completion of a Jewish Studies diploma program in the Faculty of Education.

Further information may be obtained by contacting the Director, Professor Seymour Epstein at 392-8257.

Course Descriptions

NOTE: • denotes a course NOT being offered in 1977-78.

I. JEWISH LANGUAGES (Advanced level courses and literature courses are listed in the appropriate areas).

135-220D INTRODUCTORY HEBREW. (6 credits).
Staff

135-280D INTRODUCTORY YIDDISH. (6 credits). Concentrated introduction to spoken and written Yiddish. Selected readings in Yiddish literature.
Mr. Tencer

135-320D INTERMEDIATE HEBREW (6 credits)
Staff

135-380D INTERMEDIATE YIDDISH. (6 credits; Prerequisite: 135-280D or permission of instructor). This course is designed to develop the student's language skills upon completion of the text *College Yiddish* (Vol. 1). Selected texts reflecting the development of American Yiddish literature will be studied.
Professors Orenstein and Wisse

135-506A ARAMAIC LANGUAGE. (3 credits; Prerequisite: Fluency in Hebrew). Introduction to classical Aramaic, primarily the dialects used by Jews: Biblical Aramaic, Qumran Aramaic, Samaritan, Palestinian and Babylonian Talmudic. The approach will be comparative enabling the acquisition of reading skills in these dialects. Texts will be selected from Aramaic Bible translations and interpretations.
Professor B. Levy

II. CIVILIZATION COURSES
(Introductory courses with no language or Judaica prerequisite).

• **135-211A JEWISH STUDIES I: THE BIBLICAL PERIOD.** (3 credits). The history, literature and beliefs of Judaism's formative period. Both Biblical and non-Biblical materials will be studied. The Bible will be approached in the context of cognate literatures of the Ancient Near East; non-Biblical documents will be analysed for their bearing on the Jewish tradition. All texts will be read in English.
Professor B. Levy

• **135-212B JEWISH STUDIES II: THE TALMUDIC PERIOD.** (3 credits). The history, literature and intellectual developments in Judaism during late antiquity. Special emphasis will be placed on rabbinic literature e.g. Babylonian Talmud, Palestinian Talmud, the midrashim both as literary

works and for the light they shed on the events and ideologies of the period. All texts and discussions will be in English.
Professor Kaplan

135-213A JEWISH STUDIES III: THE MEDIEVAL PERIOD. (3 credits). The history, literature and intellectual developments in Judaism during the medieval period. Special emphasis will be placed upon the interaction between religious ideologies and historical events as illustrated for example by (a) the Karaite-Rabbanite conflict at the beginning of the medieval era; (b) the controversies surrounding the writings of Maimonides at the height of the medieval era; (c) the Sabbatian debacle at the close of the medieval era. All texts will be read in English.
Professor Kaplan

135-214B JEWISH STUDIES IV: THE MODERN PERIOD. (3 credits). The intellectual and social developments resulting from Jewry's confrontation with modernity. Special emphasis will be placed on Hasidism, Haskalah and on the national and social movements sparked by the Enlightenment's failure to answer the Jewish question. All texts will be read in English.
Professor Orenstein

101-207D A HISTORY OF THE JEWS FROM LATE CLASSICAL TIMES TO THE PRESENT. (6 credits; Prerequisite: History 105D possibly concurrently is recommended). A general introductory level survey of the history of the Jewish people from late classical times to the present in the context of general world history. Emphasis will be placed on general trends and developments and special attention will be paid to areas of major Jewish settlements. The first term will deal with the period up to 1492, while the second term will cover the period from 1492 to the present.
Professor Hundert

III. BIBLICAL STUDIES (including Bible text; Bible, the Ancient Near East; and Jewish Interpretation).

- **135-211A JEWISH STUDIES I: THE BIBLICAL PERIOD.** (3 credits). For course description see Section II, Civilization Courses.
Professor B. Levy

135-310A BELIEVERS, HERETICS AND CRITICS. (3 credits). Issues in the development of Biblical interpretation based on classical Jewish thought, heretical Jewish doctrines and contemporary Biblical criticism.
Professor B. Levy

- **135-324B GENESIS AND ITS INTERPRETATION.** (3 credits; Prerequisite: A reading knowledge of Biblical Hebrew). The Book of Genesis and its interpretation in late Antiquity. Readings will be taken from the Bible and Jubilees, Josephus, Philo, Pseudo-Philo, Dead Sea Scrolls, the Talmud, ancient translations, midrashim, etc. Hebrew texts will be read in Hebrew, others in translation.
Professor B. Levy

135-325/326/327/328/329/330 A BOOK OF THE BIBLE. (3 credits each; Prerequisite: A reading knowledge of Hebrew). One book of the Bible will be studied in its entirety in Hebrew. The major emphasis will be on the contributions of Ancient Near Eastern Studies (archaeology, comparative literature and Semitic linguistics) to understanding the text. Given in 1977-78: 135-325B. Topic for 1977-78: *NUMBERS*
Professor B. Levy

135-438A TUTORIAL IN HEBREW LITERATURE. (3 credits; Prerequisite: Third year Hebrew or permission of instructor). Topic for Fall 1977: *The Bible as Literature*
Professor S. Levy

135-456A/457B/458A/459B STUDIES IN THE HEBREW BIBLE. (3 credits each; Prerequisite: Permission of instructor). Supervised independent research in Hebrew scripture and its interpretation.
Professor B. Levy

135-504A BIBLICAL INTERPRETATION IN THE WRITINGS OF MAIMONIDES. (3 credits; Prerequisite: A reading knowledge of Hebrew and an introductory course in either Bible, Rabbinic Judaism, or Jewish philosophy). Selected texts from Maimonides' *Guide of the Perplexed* will be studied supplemented by readings from his other works. Emphasis will be placed upon the dialectical relationship between religious philosphy and Biblical interpretation.
Professor L. Kaplan

135-505B MYSTICAL BIBLICAL EXEGESIS. (3 credits; Prerequisite: A reading knowledge of Hebrew and permission of instructor). The status and nature of the Torah in Jewish mysticism. Mystical modes and techniques of Bible interpretation. Selected texts in Biblical interpretation drawn from a variety of mystical works will be studied.
Professor Kaplan

135-507B THE HISTORY OF THE TEXT OF THE HEBREW BIBLE. (3 credits). The text of the Hebrew Bible as it evolved between antiquity and the most recent printed edition. Attention will be given to 1) the accurate reconstruction of the Bible from primary and secondary witnesses: Greek and Aramaic translations, Dead Sea Scrolls, ancient quotations, etc. 2) the Massoretic notes and lists which have been appended: vocalization and accentuation systems, *Qeri* and *Kethib*, "emendations of the scribes", etc. Ancient Hebrew inscriptions and Bible manuscripts will provide the bulk of the texts studied.
Professor B. Levy

135-512A THE HISTORY OF JEWISH INTERPRETATION OF THE BIBLE. (3 credits). The literature and hermeneutics of Jewish Biblical interpretation historically considered: Hellenistic literature; Dead Sea Scrolls; Midrashim,

Targumim, Talmudim; Medieval Commentators, Linguists and Philosophers; the Haskalah, etc.
Professor B. Levy

135-542A/543B/544A/545B/546A/547B/548A/549B SELECTED TOPICS IN BIBLICAL INTERPRETATION. (3 credits each).

IV RABBINIC STUDIES (Including Talmudic, Halachic and Philosophical Materials).

- **135-212B JEWISH STUDIES II: THE TALMUDIC PERIOD.** (3 credits). For course description see Section II, Civilization Courses
Professor Kaplan

135-213A JEWISH STUDIES III: THE MEDIEVAL PERIOD. (3 credits). For course description, see Section II Civilization Courses
Professor Kaplan

135-308B TOPICS IN RABBINIC JUDAISM. (3 credits; Prerequisite: An introductory course in Rabbinic Judaism or permission of instructor. A reading knowledge of Hebrew is desirable but not required). A theme, motif, issue or problem in Rabbinic Judaism will be studied in depth. Lectures and readings in English. Topic for Winter 1978: *The Image of the Sage in Rabbinic Judaism.*
Professor Kaplan

- **135-311A HISTORY OF JEWISH MESSIANISM.** (3 credits). The course will cover Messianic thought from the Rabbinic period until Sabbetai Zevi, dealing with messianic speculation in rabbinic literature, medieval biblical exegesis, Jewish philosophy and mysticism, messianic movements in rabbinic times to the Middle Ages. Readings and discussions in English.
Professor Kaplan

- **135-316A SOCIAL AND ETHICAL ISSUES IN JEWISH LAW.** (3 credits). This term will deal with the introduction, nature and history of Jewish law. Specific issues are law and morality, abortion, self-incrimination and ecology. In English.
Professor Kaplan.

135-317B SOCIAL AND ETHICAL ISSUES IN JEWISH LAW. (3 credits). This term will deal with political issues: war and peace, collaboration with tyranny, civil disobedience; and individual vs. community. In English.
Professor L. Kaplan

- **135-319B JUDAISM AND THE OCCULT.** (3 credits). Popular and deviant elements which have at various times been integrated into Judaism will be studied. The interaction of magic and religion will be analysed through the study of Jewish texts from both the authoritative religious literature as well as from sources on the periphery of classical Judaism. Readings and discussions in English.
Professor B. Levy

135-333B THE HEBREW LITURGY. (3 credits; Prerequisite: Reading knowledge of Hebrew). The structure, contents, foci and ideological assumptions of Jewish prayer. Texts studied will reflect the different approaches to prayer in Biblical, rabbinic, medieval and modern periods, but the major area of concern will be the evolution of the classical Hebrew prayer book (Siddur) and the Passover Haggadah.
Professor B. Levy

135-336A READINGS IN THE TALMUD. (3 credits; Prerequisite: A reading knowledge of Hebrew and an introductory course in Rabbinic Judaism or permission of instructor). A close study of selected Talmudic texts. Different types of texts will be chosen for analysis: Legal, narrative, biographical, historical, philosophical, etc. Stress will be placed upon the development of linguistic and interpretive skills.
Professor Kaplan

- **135-345D INTRODUCTION TO RABBINIC LITERATURE.** (6 credits). An introduction to the study of rabbinic texts (Tannaitic and Amoraic) in the original. Both conceptual analysis and critical methods will be stressed. The course is given in Hebrew and may be taken as an alternative to Hebrew 340D. To be offered in 1978-79.
Professor Kaplan

135-358A (107-345D) TOPICS IN JEWISH PHILOSOPHY. (3 credits). The Maimonidean Revolution and its enemies.

V. MODERN LITERATURE (Including Modern Hebrew and Yiddish literature).

i) Hebrew:

- **135-312A INTRODUCTION TO HEBREW LITERATURE PRE-1948.** (In translation). (3 credits). Survey of Hebrew literature in translation – drama, poetry, and prose (short story and novels) reflecting the political, cultural and social problems of Hebrew letters. This term will cover the Biblical period to the establishment of the State of Israel.
Professor S. Levy

- **135-313B INTRODUCTION TO HEBREW LITERATURE POST-1948.** (In translation). (3 credits; Prerequisite: 135-312A or permission of instructor). A continuation of 135-312A, this term will cover the period from 1948-1975.
Professor S. Levy

135-340D ADVANCED HEBREW. (6 credits; Prerequisite: Hebrew 320D or its equivalent).
Professor S. Levy

135-411D MODERN HEBREW DRAMA. (In translation). (6 credits). Theatre, a relatively recent phenomenon in Jewish culture, bears the tension engendered by the quest for an authentic national

idiom and the desire to integrate with contemporary developments in Western theatre and culture.
Professor S. Levy

135-439B TUTORIAL IN HEBREW LITERATURE. (3 credits; Prerequisite: Third year Hebrew or permission of instructor). Topic for Winter 1978: *Modern Hebrew Poetry.*
Professor S. Levy

ii) Yiddish:

135-360A/361B MODERN YIDDISH LITERATURE. (3 credits). Treats the development of Yiddish prose and poetry from 1864 to the present. Topics will change each term. Lectures and readings in English. Note: Only 135-360A will be offered in 1977-78.
Professor Wisse

- **135-381D YIDDISH LITERATURE.** (6 credits; Prerequisite: Reading knowledge of Yiddish). The course will treat the development of the Yiddish short story in the 19th and 20th centuries.
Professor Wisse

- **135-382D YIDDISH POETRY.** (6 credits; Prerequisite: Reading knowledge of Yiddish). A survey of Yiddish poetry in the 19th and 20th centuries: Poland, Russia, Galicia, America and Israel.
Professor Wisse

135-498D STUDIES IN YIDDISH LITERATURE. (6 credits; Prerequisite: Third year Yiddish or permission of instructor). Topic for 1977-78: *The Classical Masters.*
Professor Wisse.

135-587A SEMINAR IN YIDDISH LITERATURE. (3 credits; Prerequisite: Permission of instructor). Topic for Fall 1977: *Yiddish Prose in Inter-Bellum Poland*
Professor Orenstein

135-588B SEMINAR IN YIDDISH LITERATURE. (3 credits; Prerequisite: Permission of instructor). Topic for Winter 1978: *"Yung Vilne"*
Professor Orenstein

135-351B STUDIES IN MODERN JEWISH FICTION. (3 credits). Emphasis on North American authors but some others will be included. Attention will be given to historical background with part of the emphasis on the social and political position of the Jews since the early 19th century. Authors to be included: A.M. Klein, I.B. Singer and Elie Wiesel among others.
Professor Lindeman

VI MODERN JEWISH STUDIES

135-214B JEWISH STUDIES IV: THE MODERN PERIOD. (3 credits). For course description, see Section II, Civilization Courses.
Professor Orenstein

- **101-307D THE HISTORY OF THE JEWS IN POLAND c. 1110-1945.** (6 credits; Prerequisite: History 207D or permission of instructor). The course will include analysis of primary sources (in translation) related especially to the social, economic and institutional history of the Jews in Poland and their place in the East European Jewish community. Topics to be discussed: the Jews during "The Flood" (1648-1667), the communal crisis of the late 17th century, the Frankist movement, and Hasidism.
Professor Hundert

101-347D THE JEWS IN MODERN TIMES. (6 credits; Prerequisite: History 207D). A study of the various institutional, social and political responses of the Jews from 1492 to the modern period. Among the topics discussed are the marrano experience, enlightenment and reform movements, emancipation and demographic changes.
Professor Hundert

101-477D SEMINAR: JEWISH HISTORY. (6 credits). Topic for 1977-78: *The Jewish Community*
Professor Hundert

135-356D JEWISH LABOUR MOVEMENT. (6 credits). This course treats the development of the Jewish Labour Movement both in Eastern Europe and North America from the last quarter of the 19th century to the Bolshevik Revolution. Special emphasis is given to the problem of nationalism and cosmopolitanism within the Jewish Labour Movement and to the movement's influence on secular Jewish culture.
Professor Orenstein

135-352A INTERDISCIPLINARY LECTURES IN JEWISH STUDIES. (3 credits). Topic for Fall 1977: *The Holocaust, the destruction of European Jewry.* Lectures will be given by members of the Jewish Studies Program in their several disciplines. Questions will be raised concerning the historical and ideological nature of intolerance, racism, genocide and nationalistic and theological anti-semitism. Poems and novels concerning the Holocaust will be discussed. Students are free to concentrate in the areas of their choice. In English.
Co-ordinator: Professor Epstein

135-353B INTERDISCIPLINARY LECTURES IN JEWISH STUDIES. (3 credits). Topic for Winter 1978: *Zionism.* Lectures will be given by members of the Jewish Studies Program in their several disciplines. The Zionist idea will be analysed in its historical, political, literary, religious, mystical and philosophical aspects. Students are free to concentrate in the area of their choice. In English.
Co-ordinator: Prof. Epstein

107-359B (107-345D) TOPICS IN JEWISH PHILOSOPHY II. (3 credits).

107-548A/549B LEGAL AND MORAL PHILOSOPHY OF THE JEWISH TRADITION. (3 credits; Prerequisite: Consent of instructor). Readings in

Hebrew philosophical texts chosen in conjunction with the interest of students. 107-549B is a continuation of 107-548A.

107-552D THEMES IN THE HISTORY OF JEWISH PHILOSOPHY. (6 credits).

- **135-362D THE SHTETL.** (6 credits). Using the historical, sociological, literary and cultural sources, this course will examine various aspects of communal and individual life in the *shtetl*, the Jewish – or largely Jewish – town in Eastern Europe. Readings and discussion in English.
  Professor Wisse

- **135-363A THE SHTETL UPROOTED: 1881-1924.** The Cultural and Social Adaptation of East European Jews in America. (3 credits). This course will focus on the tensions of Jewish settlement that found expression in dynamic social movements and in vital literary and cultural experimentation. Readings and discussion in English.
  Professors Wisse and Orenstein

- **135-364B THE SHTETL UPROOTED: 1924-1939.** The Cultural and Social Adaptation of East European Jews in America. (3 credits; Prerequisite: 135-363A or permission of instructor) This term will cover the period of communal consolidation and the decisive impact of integration on American-Jewish culture and American society. Readings and discussions in English.
  Professors Wisse and Orenstein

RELATED COURSES IN OTHER DEPARTMENTS

260-201A RELIGIOUS TRADITIONS OF THE ANCIENT NEAR EAST I. (3 credits). The religions of Ancient Egypt, Mesopotamia and Canaan; a brief consideration of geographical, historical and cultural conditions which influenced religious expression; myth and ritual.
Professor Runnalls

260-202B RELIGIOUS TRADITIONS OF THE ANCIENT NEAR EAST II. (3 credits; Prerequisite: 260-201A or its equivalent). The religion of Ancient Near East; from Abraham to Ezra, continuity and discontinuity with Egypt, Mesopotamia and Canaan.
Professor Runnalls

260-300A THE POST-BIBLICAL JEWISH TRADITION. (3 credits). Topic for Fall 1977: *The Origins of Rabbinic Judaism.* A survey of Jewish history and thought from Ezra to the Tannaim; oral tradition; Torah interpretation in the Mishnah and Midrashim.
Professor Runnalls

260-301B THE POST-BIBLICAL JEWISH TRADITION. (3 credits; Prerequisite: 260-300A or permission of instructor). Topic for Winter 1978: *The Religion and Literature of Sectarian groups.* Apocalyptic thought, Wisdom; Dead Sea Scrolls; Josephus.
Professor Runnalls

260-390D HEBREW LANGUAGE. (6 credits).
Professor Runnalls

260-490D ADVANCED BIBLICAL HEBREW. (6 credits).
Staff

NOTE: The two above courses are designed to provide a reading knowledge of Biblical Hebrew. They may be taken only with the instructor's permission.

160-347A THE POLITICS AND FOREIGN POLICY OF ISRAEL. (3 credits). This course will focus on the political system of Israel and her foreign policy since 1948. It will explore her political culture, parties, the electoral system and election results, political leadership, the constitutional problem, etc. The second half of the course will analyse the setting for policy choices; party programs and interest group pressures; decision-makers and their images; and the process of formulating and implementing decisions. Several important foreign policy issues will be examined to illuminate the structure and process of Israel's behaviour.
Professor M. Brecher

LATIN AMERICAN STUDIES

Adviser: Professor Lipp,
Department of Hispanic Studies, Bronfman Building,
Telephone: 392-4601

Minimum of 12 credits in Spanish; 42 credits from the Departments of Anthropology, Economics, Geography, Hispanic Studies, History, Political Science and Sociology.

LAW (490)

The Faculty of Law offers a limited number of courses for Arts students. Each course is intended for a specific group of Arts students and the Faculty of Law reserves the right to control the enrolment; i.e. permission of the Faculty of Law is necessary (see the Student Affairs Office of the Faculty of Law).

490-001B FOREIGN POLICY AND THE INTERNATIONAL LEGAL PROCESS: THE MIDDLE EAST AS A CASE STUDY. (3 credits). (Not open to students who have taken or are taking 491-408B.)

490-002A CRIMINAL LAW AND SOCIETY. (3 credits). For students in behavioural sciences and Political Science. (Not open to students who have taken or are taking 491-421A.)

490-003A THE PROCESSING OF THE OFFENDER: LEGAL PSYCHIATRIC AND SOCIAL WORK PERSPECTIVES. (3 credits). For Social Work Students; enrolment is limited to senior students. (Not open to students who have taken or are taking 491-419B.)

490-004A LAND USE PLANNING. (3 credits). Enrolment is limited to senior students enrolled in the Urban Systems Option of the Geography Major Program. (Not open to students who have taken or are taking 483-145A.)

490-006B LAW RELATING TO CHILDREN. (3 credits). Enrolment is limited to Social Work Students. (Not open to students who have taken or are taking 486-456B).

LINGUISTICS (104)

Professors: C.D. ELLIS *(Chairman);* A. RIGAULT
Associate Professors – M. GOPNIK; D.W. LIGHTFOOT; M. PARADIS

Assistant Professors – I. BELLERT; N. DOMINGUE; G.L. PIGGOTT
Sessional Lecturers – A. FORD; P. LIGHTBOWN

Room 584, Samuel Bronfman Building, 1001 Sherbrooke St. West, Montreal, PQ, H3A 1G5. Telephone: 392-4433.

GENERAL INFORMATION

The field of Linguistics deals with the study of language as a phenomenon of human behaviour and the following course list indicates the several areas covered. The Department of Linguistics does not normally undertake the teaching of any specific language, especially where provision for such instruction is made elsewhere in the University. Many linguistics courses, however, serve as a useful basis for or adjunct to language learning as well as to other fields of study.

In its undergraduate section the Department of Linguistics offers a Major, Honours and Joint Honours program to students wishing various degrees of concentration in Linguistics.

MAJOR PROGRAM

The Major program in Lingusitics includes:

1) 36 credits in Linguistics. The following courses are required: 104-210A and 211B, or 210B and 211A, 305A, 351B, 355B, 360A plus at least three 400-level courses to be selected in consultation with the Department and three other linguistics courses approved by the Department.

2) 18 credits taken in one or two of the following disciplines: Anthropology, Language (classical or modern), Philosophy, Psychology, Mathematics, Sociology. Six of the eighteen credits may be taken in Lingusitics.

Inquiries may be addressed to the departmental office or the advisers for undergraduate studies.

HONOURS PROGRAM

The Honours program in Linguistics comprises:

1) 42 credits in Linguistics, to include 104-210A and 211B, or 210B and 211A followed by 350A, 351B, 355B, 360A, 482D, four other 400-level courses to be selected in consultation with the Department and two further linguistics courses approved by the Department.
2) Four full language courses in two languages: a major language (18 credits) and a minor language (6 credits). Students may choose either a classical language and a modern language, or two modern languages one of which must be French, German or Russian;
3) 24 credits in two subjects other than language and linguistics. Anthropology, English, Mathematics, Philosophy, Psychology, and Sociology are recommended, but other subjects may also be included with the permission of the Department.

An average B grade (minimum 65% – G.P.A. of 2.8) is required to maintain Honours standing in Linquistics and a minimum mark of 65% is normally required in each of the obligatory Linguistics courses. The normal requirement for First Class Honours is a G.P.A. of 3.6 and a high level of achievement in the research thesis (482). Inquiries may be addressed to the departmental office or to the advisers for undergraduate studies.

JOINT HONOURS PROGRAMS

Joint Honours programs, combining Linguistics with any one of the following subjects, are available: Anthropology, Classics, English, French, German, Ancient Greek, Italian, Latin, Philosophy, Psychology, Russian, and Spanish. The Linguistics part of the requirement for these programs is the completion of 36 credits in Linguistics, which must include 210A and 211B, or 210B and 211A, 350A, 351B, 355B, 360A plus at least three 400-level courses to be selected in consultation with the Department and three other Linguistics courses approved by the Department.

For further information on the Linguistics requirements of specific Joint Honours programs, consult the departmental office. For information on the requirements of the other discipline making up the program, consult the department concerned.

Course Descriptions

INTRODUCTORY LINGUISTICS

NOTE: One year of Introductory Linguistics (i.e., a 200-level course) will be the normal prerequisite to all higher numbered Linguistics courses except 350A. Only one of the two sequences, 200/201 or 210/211, may be taken for credit.

104-200A,B INTRODUCTION TO THE STUDY OF LANGUAGE I. (3 credits). This is the first part of a sequence of courses designed as an

introduction to the study of language for students who do not intend to specialize in linguistics. This sequence of courses provides only a brief introduction to the techniques of linguistic analysis and will not place great emphasis on the formal properties of language. This introductory sequence is so structured as to allow students to explore various aspects of language as a human communication system, surveying such areas as bilingualism, language acquisition and many others. An introduction to each area is presented in a handbook which is part of an instructional unit called a module. In this part of the introductory sequence, students must complete four modules, including Sound I and Syntax I.

104-201A,B INTRODUCTION TO THE STUDY OF LANGUAGE II. (3 credits). A continuation of 104-200A,B. Students must complete four additional modules, selection to be made in accordance with individual needs and interests.

104-205D INTENSIVE INUKTITUT (ESKIMO) FOR BEGINNERS. (6 credits). An introduction to the basic structures of Inuktitut, with intensive drill and classroom practice in the use of the language. (Given only by special arrangement. Consult Department.)

104-210A,B INTRODUCTION TO LINGUISTICS I. (3 credits). This course is designed to provide a general introduction to linguistic methodology and a broad overview of the formal properties of the structure of language. It places emphasis on analytical techniques in linguistics and concentrates on the major sub-areas of the discipline – phonetics, phonology, morphology, syntax, semantics and historical. An introduction to each sub-area is presented in a handbook which is part of an instructional unit called a module. Students must complete four modules including Sound I, Syntax I and Descriptions of English I.

104-211A,B INTRODUCTION TO LINGUISTICS II. (3 credits). A continuation of 104-210A,B. Students must complete four additional modules including the following: Sound II, Syntax II, Theory of Language History.

104-230A ANTHROPOLOGICAL LINGUISTICS.

(3 credits). This course will introduce students to language and its place in culture. Major topics will include the following: human language as a unique system, the development of language in mankind and individuals, similarity and diversity among languages, the interdependence between language and culture, the ethnography of speaking, linguistic change.
Professor Dominque

104-241B SOCIOLINGUISTICS. (3 credits; Prerequisite: Linguistics 200A, 210A or 230A). This course will focus on linguistic correlates, determinants, and consequences of social behaviour. Major topics will include linguistic variation, the description of speech events, the determinants of stylistic and linguistic choice, types of multilingual communities and language planning.
Professor Dominque

UPPER LEVEL LINGUISTICS COURSES

104-305D SELF-INSTRUCTIONAL LANGUAGE MODULE. (6 credits). A self-instructional course in the active control of a language required by the student and not offered by any department within the university. The course will be under the supervision of a staff-member, with guided practice with a native speaker. *(Given only by special arrangement with the Department to meet the needs of specific Honours programs.)*

104-321B LINGUISTICS APPLIED TO LANGUAGE LEARNING. (3 credits; Prerequisite: one year of Introductory Linguistics). A critical study of the application of linguistic theory and description to first and second language learning. The relationship between spoken and written language; a look at neurolinguistic theories of language acquisition.
Professor Paradis

104-330A INDIAN LANGUAGES OF NORTH AMERICA. (3 credits; Prerequisite: Lingusitics 200A or B, 210A or B, 230A or permission of instructor). An introduction to Indian languages of North America: a study of their distribution and classification with special attention to selected structural types; a consideration of certain socio-linguistic problems. Not given in 1977-78.
Professor Ellis

104-350A GENERAL PHONETICS. (3 credits; Prerequisite: one year of Introductory Linguistics). Intensive training in the identification and production of speech sounds, followed by an acoustical analysis of speech and study of the process of auditory perception. Demonstration sessions in the Phonetics Research Laboratory form part of the course.
Professor Rigault

104-351B PHONOLOGY I. (3 credits; Prerequisite: 350A including one year of Introductory Linguistics). Survey of the development of phonology: the concept of the phoneme, structural phonology, generative phonology. Introduction to the various techniques of phonological analysis. Discussion of current issues in phonological theory.
Professor Rigault

104-355B MORPHOLOGY: THEORY AND ANALYSIS OF WORD-STRUCTURE. (3 credits; Prerequisite: one year of Introductory Linguistics or permission of instructor). An introduction to the study of the internal structure of words, to the analytical techniques of various schools and to recent attempts to formulate a theory of word-structure. Topics include the characterization of morpheme types, derivational and inflectional phenomena, morphological processes, semantic considerations, morphophonemic alternations,

actual and possible words in a language, the notion of productivity.
Professor Piggott

104-360A SYNTAX I. (3 credits; Prerequisite: one year of Introductory Linguistics). Proficiency in the techniques of generative grammatical research developed through application of theory to problems of limited scope.
Professor Lightfoot

104-361B SYNTAX II. (3 credits; Prerequisite: one year of Introductory Linguistics and 360A). Detailed research into some linguistic problem with regard to either language-particular or universal significance , or both.
Professor Lightfoot

104-400A THEORY AND METHODS OF HISTORICAL LINGUISTICS. (3 credits; Prerequisite: one year of Introductory Linguistics, Linguistics 351B and 360A, or permission of instructor). Theory of linguistic change; philological techniques (contrasted with field methods); exemplification from familiar languages.
Professor Piggott

104-401B SEMINAR IN HISTORICAL LINGUISTICS. (3 credits; Prerequisite: Linguistics 400A). Problems in the history of selected languages studied for their importance both to particular and to universal grammer.
Professor Piggott

104-410A STRUCTURE OF A SPECIFIC LANGUAGE. (3 credits; *Prerequisite;* One year of introductory Linguistics or permission of instructor). *Not given in 1977-78*
Professor Dominque

104-420A THEORY OF SECOND LANGUAGE LEARNING. (3 credits; Prerequisite: one year of Introductory Linguistics, Linguistics 321B.) A study of research on second language learning by children and adults. Topics include developmental sequences in language learning, similarities and differences in first and second language development, and a comparison of learning in "natural" *vs.* "instructional" settings.
Dr. Lightbown

104-450A PHONOLOGY II. (3 credits; Prerequisite: 351B). The principles and methods of modern generative phonology. Attention will be given to the sound structure of natural languages and the insights which the theory of generative phonology brings to bear on the nature of phonological systems in general. Basic differences between this theory and other theories of sound structure will be examined. A number of illustrative problems will be drawn from a wide range of languages.
Professor Piggott

104-460A,B PROSEMINAR I IN A SELECTED FIELD. (3 credits). Intensive study of a selected field or topic chosen to balance the requirements of the Honours program or provide for coverage of developing of less familiar areas of linguistic inquiry. *Not given in 1977-78.*
Professor Bellert

104-462B PROSEMINAR II IN A SELECTED FIELD. (3 credits). Topic 1977-78: Formal grammars of natural languages.

104-470A,B INTRODUCTION TO NEUROLINGUISTICS. (3 credits; Prerequisite: 12 credits in Linguistics). A study of neurolinguistic theories of competence and performance: language storage, speech production and comprehension. A linguistic analysis of aphasic syndromes. An investigation of the species-specificity of language: chimp and child. Modalities of language acquisition and language use, and their pathological dissolution. (No anatomy or physiology beyond High School biology is required).

104-471B FIELD METHODS OF LINGUISTICS. (3 credits). Elicitation, recording and analysis of linguistic data under simulated field conditions; consideration of typical problems confronting the field analyst. (Not open to students who have taken 104-481B).
Professor Ellis

104-482D FIELD OR RESEARCH PROJECT. (6 credits).

104-490A SEMINAR IN LINGUISTIC THEORY. (3 credits; Prerequisites: 351B and 361B or permission of instructor). Consideration of linguistic theories from the standpoint of the philosophy of science; inquiry into the nature, construction and verification of linguistic theory and how it changes; analysis of specific theories of Linguistics in terms of the concepts which have been developed. (Not open to students who have taken 104-480A).
Professor Gopnik

104-491B ADVANCED SEMINAR IN LINGUISTIC THEORY. (3 credits; Prerequisite: Linguistics 490A). Intensive investigation of various crucial problems in different theories of language.
Professor Gopnik

Attention is drawn to the following courses which may be of interest as electives to students in Linguistics:

Courses in the linguistic study of specific languages (See under the various language departments.)

Mathematics	189-328B
Philosophy	107-300A
	107-304A
Psychology	204-214D
	204-340A
	204-341B
	204-425A
	204-428B
	204-455D

MATHEMATICS (189)

Burnside Hall, Room 1005, Telephone: 392-5369

General information, courses and course descriptions appear on page 183. The following programs of study are designed to provide students with every opportunity to enter a wide variety of fields.

MAJOR IN MATHEMATICS

Programs of study for students entering U1 in 1977-78.

The compulsory courses are 189-120A,B, 189-121A,B, 189-221A,B, 189-222A,B, 189-245A,B.

Advisers will approve a program of 54 credits including 48 credits in Mathematics (excluding 120A,B, 121A,B, 221A,B) of which at least 36 credits will be selected from the following: 189-217A, 189-218B, 189-242A, 189-243B, 189-246A,B, 189-314A,B, 189-315A,B, 189-316B, 189-317A, 189-318A, 189-319B, 189-323A,B, 189-324A,B, 189-327B, 189-328B, 189-333A, 189-346B, 189-348A, 189-349B, 189-360B, 189-369D, 189-407B, 189-414B, 189-415A, 189-416A, 189-417A, 189-419B, 189-423A, 189-424B, 189-425A, 189-427B, 189-447B. The remaining 6 credits to be selected from Mathematics or a related discipline in consultation with the Adviser.

Guidelines for Selection of Courses in the Major Program

a) Students are advised to include the following courses in their program: 189-246A,B, 189-314A,B, 189-315A,B, 189-317A, 189-323A,B, 189-324A,B, 308-200A,B.

b) Students planning to pursue graduate studies are advised to include 189-242A, 189-243B and 189-333A in their program, and to consider substituting one or more honours courses for the corresponding courses in the Major program.

c) Students considering a career in teaching are advised to include in their program the following courses: 189-217A, 189-218B, 189-242A, 189-318A, 189-328B, 189-338B, 189-346B, 189-349B.

d) Students interested in probability and statistics are advised to also include in their program the following courses: 189-242A, 189-407B, 189-414B, 189-423A, 189-424B, 189-425A, 189-447B, as well as a course in Fortran such as 308-200A,B. With the instructor's permission the graduate courses 189-682A, 308-690A, 308-691B might also be included.

e) Students interested in applied mathematics are advised to include in their program some or all of the following courses: 189-218B, 189-242A, 189-316B, 189-319B, 189-323A,B, 189-324A,B, 189-327B, 189-407B, 189-414B, 189-415A, 189-416A, 189-417A, 189-419B, 189-427B, 308-200A,B.

f) Students interested in computer science are advised to register in the following courses: 189-318A, 189-327B, 189-328B, 189-417A, 189-427B, 308-200A,B, 308-300A,B; they should choose additional courses from 189-319B, 189-415A, 189-416A, 189-419B, 189-423A, 189-424B, 189-425A, 189-447B, 308-610A*, 308-640D*, 308-690A*, 308-691B* or 308-698A*, and 308-699*.

g) Students interested in careers in actuarial work, in industry or government are advised to select courses from the following list: 189-319B, 189-327B, 189-328B, 189-329D, 189-369D, 189-415A, 189-416A, 189-417A, 189-419B, 189-423A, 189-424B, 189-425A, 189-447B, 308-200A,B.

The student's attention is called to the fact that a B.Com. degree with a Major in Mathematics is available from the Faculty of Management. In addition the Faculty of Music offers the degree of B.Mus. (Honours in Theory with Mathematics Option.)

**These courses require special permission from the instructors.*

HONOURS PROGRAM

The minimum requirement for entry into the Honours Program is that the student has completed with high standing the following courses: 189-120A,B, 189-121A,B, 189-221A,B.

Requirements for Honours in Mathematics

For an Honours Degree in Mathematics the student must obtain 90 course credits; at least 60 of these should correspond to Honours Courses, or their equivalent, not less than 45 to Honours courses in Mathematics. In addition to the latter, the student may count towards his 60 credit Honours requirement:

i) half of the courses taken from the Major Program in Mathematics (including Computer Science courses) for which no equivalent Honours course exists;

ii) (with the approval of the Department of Mathematics) certain courses in other departments which are at an Honours level, and are closely linked to Mathematics;

iii) (with the approval of the Department of Mathematics) half the courses taken in other departments, which while not necessarily explicitly mathematical in nature, are at an Honours level and broaden the student's scientific training. Students who transfer to Honours in Mathematics from other programs will have credits for previous courses assigned, as appropriate, by the Department.

The following courses are compulsory: 189-250A,B, -251A,B, -254A,B, -255A,B, -371D, -372D.

To remain in the Honours Program, and to be awarded the Honours Degree, the student must maintain a 2.8 Grade Point Average in the approved Mathematics courses of the Honours program.

Guidelines for Selection of Courses in the Honours Program

a) The compulsory courses may be spread over the three years study.
b) Students taking 189-250A,B, -251A,B, and 189-254A,B, -255A,B, simultaneously are advised to register also for 189-258A, 259B.
c) Students are advised to include in their program the following courses: 189-356A, 357B, 374D, -380D.
d) Students interested in Statistics should register for 189-556D and 189-587D in addition to 189-356A and 189-357B.
e) Students in Applied Mathematics should register for some or all of the courses 189-574A, -575B, -578A, -579B, -585A, and 586B in addition to 189-374D. They are also advised to select courses in areas to which they can apply their mathematics.

MIDDLE EAST STUDIES PROGRAM

Advisers – P. NOBLE *(Political Science);* MIDDLE EAST STUDIES COMMITTEE *(Co-Chairman);* P.C. SALZMAN *(Anthropology);* MIDDLE EAST STUDIES COMMITTEE *(Co-Chairman);* C.J. ADAMS *(Islamic Institute, Religious Studies);* S. LEVY *(Jewish Studies);* B. TRIGGER *(Anthropology).*

The Middle East Studies Program (under the administration of the Department of Anthropology) consists of a coordinated, interdisciplinary set of courses, including language, literature, history, religion, political science, anthropology and sociology, focusing upon the Middle East since the rise of Islam. From this set of courses are drawn various combinations which make up an Honours Program in Middle East Studies, a Major Program in Middle East Studies and Joint Honours Programs in Middle East Studies and Anthropology, Jewish Studies, Political Science, Religious Studies, or Sociology.

HONOURS PROGRAM

The full honours program in Middle East Studies consists of 10 full courses (60 credits). Half of this program (30 credits) is in the language area, where a student must complete three years of one Middle Eastern language and two years of another (Arabic, Hebrew, Persian, Turkish, Urdu). The other half of the program is in the area of history, religion and the social sciences.

JOINT HONOURS PROGRAMS

The joint honours programs involve 6 full courses (36 credits) in Middle East Studies and an equivalent number of courses in the companion discipline. The basic requirements on the Middle East Studies side are 3 full courses (18 credits) in one Middle Eastern language and 3 full courses (18 credits) to be selected from the offerings in history, religion and the social sciences.

MAJOR PROGRAM

The major in Middle East Studies consists of a program of 9 full courses (54 credits). This includes 3 full courses (18 credits) in one Middle Eastern language, 5 full courses (30 credits) to be selected from the offerings in history, religion and the social sciences and 1 full course (6 credits) to be chosen from related courses dealing with the Third World.

ADVISERS

Students interested in following one of the above programs should consult one of the co-chairmen of the Middle East Studies Committee – Professor Salzman (Anthropology) or Professor Noble (Political Science).

MODERN LANGUAGES

Adviser Professor Rossetti, Department of Italian, Bronfman Building; Telephone 392-4590

A. The Modern Languages Program is an interdisciplinary Major Program leading to a B.A. It is primarily a cultural one designed to broaden the student's general background in two foreign languages and associated areas in addition to providing a solid base in each one of the two languages the student wishes to pursue. To enter Graduate Studies or to pursue a career in translation or interpretation, further preparation is required.
B. The overall program is administered by a Chief Adviser who is assisted by representatives of the main Departments involved with the program. The Chief Adviser is: Prof. E. Rossetti, Department of Italian.
C. To earn a B.A. with a Major in Modern Languages, students are required to take a minimum of 54 academic credits within the Program distributed as follows:
   18 credits in a Modern Foreign Language (except French and English)
   18 credits in a second Modern Foreign Language (except French and English)
   12 credits in Linguistics
   6 credits in the Social Sciences

MODERN LITERATURE

Adviser Professor Szanto, Comparative Literature Department, 3495 Peel St., Telephone: 392-5452.

6 credits in English, 3 credits in French; 12 credits in English or French Literature; 18 credits in each of two modern foreign literatures.

MUSIC (210, 211, 214, 243)

Department of Theory – D.B. Minorgan *(Chairman)*
Department of Performance – R. Lawton *(Chairman)*

The following courses are offered by the Faculty of Music as electives for students in the Faculties of Arts, Science, and Education. They are also open to students from other faculties. For a complete listing of the offerings of the Faculty of Music, please consult the *Faculty of Music Announcement.*

List 1

The courses in this list are available to any students in the Faculties of Arts, Science and Education. No music prerequisites, other than those listed under a specific course, are required.

210-201A/B BASIC MATERIALS OF WESTERN MUSIC. (3 credits; 3 hours). This course is designed to develop the skills of working with the foundational elements (i.e. with certain aspects of pitch and duration) and transformations of Western tonal music. The ability to write, to sing and to play musical passages will demonstrate the skills of basic musicianship.

210-210A INTRODUCTION TO EARLY MUSIC (MEDIAEVAL, RENAISSANCE AND BAROQUE). (3 credits; 4 hours). A course designed to provide the general student with an understanding of historical styles, materials, idioms and forms of Western art music from the beginnings of Catholic Liturgical music (Gregorian Chant) to the death of Bach (1750). The historical survey will be combined with a grounding in elementary theory (notation, texture, instruments, meter and rhythm, melody, harmony and form) so as to provide a basis for analysis of the stylistic characteristics of the historical periods concerned. Emphasis will be placed on the music of those composers in each historical period which best illustrates the relevant musical elements. (Not open to students who have taken 214-215D).

210-211B INTRODUCTION TO MUSIC AFTER 1750 (CLASSICAL, ROMANTIC AND 20th CENTURY). (3 credits; 4 hours). A course designed to provide the general student with an understanding of historical styles, materials, idioms and forms of Western art music, along with references to traits common to the music of other cultures and the process of acculturation, from approximately the death of Bach (1750) to the present. The historical survey will be combined with a grounding in elementary theory (notation, texture, instruments, meter and rhythm, melody, harmony and form) so as to provide a basis for analysis of the stylistic characteristics of the historical periods concerned. Emphasis will be placed on the music of those composers in each historical period which best illustrates the relevant musical elements. (Not open to students who have taken 214-215D).

210-310A MUSIC OF THE MIDDLE AGES AND THE RENAISSANCE. (3 credits; 3 hours; prerequisite: 210-210A or by permission of the instructor). A study of the main developments in sacred and secular music in Western Europe from the early Christian era to the end of the sixteenth century. Subjects such as notation, instruments, performance practice, the relation of music to parallel developments in other arts, music and poetry, music and musicians within their social milieu, and music in its ecclesiastical and humanistic framework will be discussed. (Not open to students who have taken 214-316A or 317B).

210-311B MUSIC OF THE BAROQUE. (3 credits; 3 hours; prerequisite: 210-210A or by permission of the instructor). The historical and sociological development of music from 1600 to 1750. Vocal and instrumental music, both sacred and secular. New forms (opera, cantata, oratorio, sonata, concerto grosso, etc.). Musical instruments. Works of composers from G. Gabrieli and Monteverdi to Handel and Bach. (Not open to students who have taken 214-318A).

210-312A MUSIC OF THE CLASSICAL PERIOD. (3 credits; 3 hours; prerequisite: 210-211B or by permission of the instructor). The course will survey the music written in the period encompassed by the Pre-Classic foundations of the music of Haydn, Mozart and Beethoven, beginning about 1750 and proceeding up to the death of Franz Schubert in 1828. (Not open to students who have taken 214-319B).

210-313A MUSIC OF THE ROMANTIC PERIOD. (3 credits; 3 hours; prerequisite: 210-211B or by permission of the instructor). *Not given 1977-78.* The development of music during the 19th Century: instrumental, vocal and dramatic music. The Romantic style. The growth of musical historicism. Major trends in the solo, chamber music, and symphonic repertoires. Opera in Italy, France and Germany. (Not open to students who have taken 214-326A).

210-314B MUSIC OF THE 20th CENTURY. (3 credits; 3 hours; prerequisite: 210-211B or by permission of the instructor). *Not given 1977-78.* A survey of "serious" music of Europe and North America from the late 19th Century to the present day. Discussion and lectures will include sociological and artistic background of various composers or "schools" of composers, compositional techniques and new notation, performance

practice, as well as stylistic analysis of selected works. (Not open to students who have taken 214-327B).

213-241A ELECTRONIC MUSIC. (3 credits; enrolment limited to 12; 3 hours lecture plus 3 hours group studio time. Students who wish to enrol for this course must have the permission of the instructor). The course will be centred around the production of music by the students using tape recorders and small synthesizers. The theoretical part of the course will consist of studies in musical form and structure in the dimensions of sound frequency, intensity, timbre and time, including discussion of relevant concepts in acoustics, psychoacoustics and electronics.

213-242B ELECTRONIC MUSIC. (3 credits; prerequisite; 213-241A; enrolment limited to 12; 3 hours lecture plus 6 hours group studio time. Students who wish to enrol for this course must have the permission of the instructor). A continuation of 213-241A.

214-327A MUSIC CULTURES OF ASIA. (3 credits; 3 hours; prerequisite: 214-184A and 214-185B or 210-210A or 210-211B or by permission of the instructor). *Not given 1977-78.* A survey of the principal music cultures of South and East Asia and the Near East (Chinese, Japanese, Indian and Islamic). The music history, theory and instruments, etc. of each culture will be discussed, along with social implications, of music, aesthetic and cosmological associations of music and the function of folk music in Asian society. There will be considerable emphasis on aural analysis of recorded examples. (Not open to students who have taken 214-328D).

214-328B MUSIC CULTURES OF THE AMERICAS, AFRICA, EUROPE AND THE PACIFIC ISLANDS. (3 credits; 3 hours; prerequisite: 214-184A and 214-185B *or* 210-210A *or* 210-211B *or* by permission of the instructor). *Not given 1977-78.* A survey of folk and traditional music of the Western continents and Pacific Islands. Among topics for discussion are folk musical instruments and their tradition, various tonal systems of folk song, its melodic and rhythmic practices and structural concepts. Consideration will be given to North American aboriginal music (Indian and Eskimo) and the musics of other primitive peoples of the Pacific Islands. There will be considerable emphasis on aural analysis of recorded examples. (Not open to students who have taken 214-328D).

214-329D MUSIC CULTURES OF EAST ASIA. (6 credits; 3 hours; prerequisite: 101-208D The Development of East Asian Civilization or Music 214-327A or by permission of the instructor). *Not given 1977-78.* Three main music cultures (China, Japan and Korea) will be covered. Emphasis will be on the social functions of music in its cultural context, philosophical relationships between music and government, aesthetic and cosmological associations of music, and the influence of Chinese music on the musical traditions of Korea and Japan. Among the musical topics for discussion will be musical instruments, tonal systems and notation.

List II

The courses in this list are intended for students who have at least high school Matriculation Music or the equivalent. Students who do not have the formal music prerequisites require the permission of the Chairman of the Department of Theory to register for any of these courses. For description of these courses, see the Department of Music Theory *Handbook*.

211-110A,B MELODY AND COUNTERPOINT. (3 credits; prerequisite: Matriculation Music or McGill Preparatory Theory Secondary V or equivalent; 4 hours). (Not open to students who have taken 211-223D).

211-111A,B ELEMENTARY HARMONY. (3 credits; prerequisite: 211-110A or B; 4 hours).

211-210A,B TONAL THEORY AND ANALYSIS I. (3 credits; prerequisites: 211-110A or B and 211-111A or B AND Ear Training (Fixed Doh) 212-129A or B and 212-131A or B, or Ear Training (Movable Doh) 212-128A and 212-130B; 3 hours).

211-211A,B TONAL THEORY AND ANALYSIS II. (3 credits; prerequisites: 211-210A or B AND Ear Training (Fixed Doh) 212-129A or B and 212-131A or B, or Ear Training (Movable Doh) 212-128A and 212-130B; 3 hours).

211-310A,B MIDDLE AND LATE 19th CENTURY THEORY AND ANALYSIS. (3 credits; prerequisites: 211-211A or B AND Ear Training (Fixed Doh) 212-129A or B and 212-131A or B, or Ear Training (Movable Doh) 212-128A and 212-130B; 3 hours).

211-311A,B 20th CENTURY THEORY AND ANALYSIS. (3 credits; prerequisites: 211-310A or B AND Ear Training (Fixed Doh) 212-129A or B and 212-131A or B, or Ear Training (Movable Doh) 212-128A and 212-130B; 3 hours).

214-184A HISTORY SURVEY. (MEDIAEVAL, RENASISSANCE AND BAROQUE). (3 credits; prerequisites or co-requisites: 211-110A or B and 211-111A or B or permission of the instructor; 3 hours).

214-185B HISTORY SURVEY. (CLASSICAL, ROMANTIC AND 20th CENTURY). (3 credits; prerequisite: 214-184A or permission of the instructor; 3 hours).

214-386B CHAMBER MUSIC LITERATURE. (3 credits; prerequisite: 214-184A and 214-185B; 3 hours). *Not given 1977-78.*

214-387A OPERA LITERATURE. (3 credits; prerequisite: 214-184A and 214-185B; 3 hours).

214-389B ORCHESTRAL LITERATURE. (3 credits; prerequisite: 214-184A and 214-185B; 3 hours). *Not given in 1977-78.*

214-390B VOCAL LITERATURE. (3 credits; prerequisite: 214-184A and 214-185B; 3 hours). Not given 1977-78.

214-391A CANADIAN MUSIC. (3 credits; prerequisite: 214-184A and 214-185B; 3 hours).

214-392A BRASS LITERATURE. (3 credits; prerequisite: 214-184A and 214-185B; 3 hours).

214-395A KEYBOARD LITERATURE BEFORE 1750. (3 credits; prerequisite: 214-184A and 214-185B; 3 hours). (Not open to students who have taken 214-388B).

214-396B KEYBOARD LITERATURE AFTER 1750. (3 credits; prerequisite: 214-184A and 214-185B; 3 hours). Not given 1977-78. (Not open to students who have taken 214-388B).

215-382B PERFORMANCE PRACTICE OF BAROQUE MUSIC. (3 credits; prerequisite: 214-184A and 214-185B; 3 hours).

215-383B PERFORMANCE PRACTICE OF CLASSICAL MUSIC. (3 credits; prerequisite: 214-184A and 214-185B; 3 hours). *Not given 1977-78.*

Music Ensembles

Arts and Science students may, with the permission of the instructor and the Associate Dean, participate in one of the following ensembles in a given year. Students should arrange through the Faculty of Music office (392-4501) for the necessary audition. Normally both the A and B sections of an ensemble are taken in the same academic year.

243-278A, 378B SENIOR WIND ENSEMBLE. (3 plus 3 credits; prerequisite: audition; 6 hours).

243-287A, 387B CONTEMPORARY CHAMBER MUSIC CHOIR. (2 plus 2 credits; prerequisite: audition; 2-3 hours). *Not given 1977-78.*

243-289A, 389B WOODWIND ENSEMBLES. (2 plus 2 credits; prerequisite: audition; 2-3 hours).

243-290A, 390B CONCERT BAND. (3 plus 3 credits; prerequisite: audition; 6 hours).

243-291A, 391B BRASS ENSEMBLES. (2 plus 2 credits; prerequisite: audition; 2-3 hours).

243-292A, 392B CONCERT CHOIR. (2 plus 2 credits; prerequisite: audition; 2-4 hours).

243-294A, 394B CONTEMPORARY MUSIC ENSEMBLE. (2 plus 2 credits; prerequisite: audition; 2-4 hours).

243-295A, 395B JAZZ ENSEMBLE. (2 plus 2 credits; prerequisite: audition; 3 hours).

243-296A, 396B OPERA STUDIO. (3 plus 3 credits credits; prerequisite: audition; 3-6 hours).

243-297A, 397B ORCHESTRA. (3 plus 3 credits; prerequisite: audition; 6 hours).

243-299A, 399B STRING ENSEMBLES. (2 plus 2 credits; prerequisite: audition).

NORTH AMERICAN STUDIES PROGRAM

Committee of Advisers – JEAN-PIERRE DUQUETTE *(French)*; LORRIS ELLIOTT *(English)*; D. VON ESCHEN *(Sociology)*; HUGO McPHERSON *(English)*; A. RIGGS *(History)*; MICHAEL STEIN *(Political Science)*; THOMAS VELK *(Economics)*

This interdisciplinary program is being offered to give undergraduates an opportunity to gain a fairly comprehensive view of the growth and achievement of Canadian or United States civilizations, or a combination of both. For a fuller description of Canadian Studies, see page 31.

The other choices are: 1) an option in U.S. Studies, concentrating on courses in the American field, or 2) an option in North American Studies in which courses from both areas are elected, or 3) an option which includes an Internship Semester, spent in part with an international or governmental agency, and in part at American University in Washington, D.C. or in London, England.

In taking the U.S. Studies Option the student will select a minimum of 54 credits dealing with the United States. These will be drawn from the Departmental offerings listed below.

In taking the North American Studies Option the student will select a minimum of 54 credits among those listed below.

In taking an internship, the student will earn 16 credits and spend one semester away from McGill, under the auspices of American University, in Washington D.C. Ad Hoc internships may also be available with the Canadian Government.

Please consult Professor Velk, Department of Economics.

For more information concerning courses, please turn to listings under departmental headings.

North American Studies

110-529D THE LITERATURE OF REFORM. (3 credits). Is American devotion to the enlargement of the scope of liberty less popular and universal than her dedication to universal acquisition of equality? To examine that question, we hypothesize two separate streams to exist in late 19th century American Reform literature, one pragmatic, individualistic and Jeffersonian; the other radical, statist and Hamiltonian. That literature is, in part, a reaction to America's sudden post civil war change from a simple rural society of independent farmers to a complex urban interdependent web of economic men. We test this hypothesis by a reading of Samuel Clemens, Edward Bellamy, Walt Whitman, the Adams Brothers, Ambrose Bierce, Hamlin Garland, Bret

Hart and others. The course will be introduced by readings from De Tocqueville, Hamilton and Jefferson. The social, political and economic background for the literature of reform will be found in readings from Henry George, John Bates Clark, Jacob Riis and Francis Parkman.
Professors Velk (Economics) and Riggs (History)

ANTHROPOLOGY

151-224B WOMEN IN CROSS-CULTURAL PERSPECTIVE. (3 credits).

151-236B INDIGENOUS PEOPLES OF NORTH AMERICA: A GEOGRAPHICAL AND CULTURAL APPROACH. (3 credits).

151-317B PREHISTORY OF NORTH AMERICA. (3 credits; Prerequisite: 151-201B or 203A).

151-436A SEMINAR IN NORTH AMERICAN NATIVE PEOPLES. (3 credits; Prerequisite: 151-236D).

ARCHITECTURE

301-372B HISTORY OF ARCHITECTURE IN CANADA. (Prerequisite: 301-233B).

ECONOMICS

154-200D or 154-250D is prerequisite to all upper level courses in Economics except those for which other provision is made in the course description.

154-205D AN INTRODUCTION TO APPLIED POLITICAL ECONOMY (6 credits).

154-211D INTRODUCTION TO CANADIAN ECONOMIC HISTORY. (6 credits).

154-302D MONEY AND BANKING. (6 credits).

154-304D CANADIAN ECONOMIC POLICY. (6 credits).

154-305D GOVERNMENT AND BUSINESS. (6 credits).

154-306D LABOUR ECONOMICS AND INSTITUTIONS. (6 credits).

154-311A UNITED STATES ECONOMIC DEVELOPMENT. (3 credits).

154-312D POLITICAL ECONOMY OF DEPENDENCE IN THE WESTERN HEMISPHERE. (6 credits).

154-321D THE QUEBEC ECONOMY. (6 credits).

154-352D MACROECONOMICS. (6 credits).

154-404D TRANSPORTATION. (6 credits).

154-408D PUBLIC FINANCE. (6 credits).

154-431A SEMINAR IN CANADIAN ECONOMIC HISTORY. (3 credits).

154-468A URBAN AND REGIONAL ECONOMICS. (3 credits).

ENGLISH

110-225A AMERICAN LITERATURE I. (3 credits).

110-226B AMERICAN LITERATURE II. (3 credits).

110-228A CANADIAN LITERATURE I. (3 credits).

110-229B CANADIAN LITERATURE II. (3 credits).

110-275D COMMUNICATIONS AND LITERATURE. (6 credits).

110-323A 20th CENTURY AMERICAN POETRY (3 credits).

110-324B 20th CENTURY AMERICAN PROSE. (3 credits).

110-325D MODERN NORTH AMERICAN FICTION. (6 credits).

110-327D THE DEVELOPMENT OF PROSE FICTION IN CANADIAN LITERATURE. (6 credits).

110-329D 20th CENTURY CANADIAN LITERATURE. (6 credits).

110-525B AMERICAN LITERATURE. (3 credits).

110-527A CANADIAN LITERATURE. (3 credits).

110-528B CANADIAN LITERATURE. (3 credits).

FRENCH

125-204A CIVILISATION QUEBECOISE. (3 crédits).

125-205B CIVILISATION QUEBECOISE. (3 crédits).

125-207D LE FRANCAIS PAR LES TEXTES. (6 crédits).

125-328D HISTOIRE DE LA CIVILISATION QUEBECOISE. (6 crédits).

125-315A,B LE CINEMA QUEBECOIS. (3 crédits).

125-370A LA LITTERATURE QUEBECOISE JUSQU'EN 1940. (3 crédits).

125-371B LA LITTERATURE QUEBECOISE DEPUIS 1940. (3 crédits).

125-372D ROMAN QUEBECOIS JUSQU'EN 1945. (3 crédits).

125-373B ROMAN QUEBECOIS (1945-1960). (3 crédits).

125-377A LA CRITIQUE LITTERAIRE QUEBECOISE. (3 crédits). (Ne sera pas donné en 1977-78).

125-378B LE CONTE QUEBECOIS. (3 crédits).

125-382D ROMAN QUEBECOIS DEPUIS 1960. (6 crédits).

125-470A POESIE QUEBECOISE DE CREMAZIE A SAINT-DENYS-GARNEAU (1850-1940). (3 crédits).

125-471B POESIE QUEBECOISE D'ALAIN GRANDBOIS A NOS JOURS (DEPUIS 1940). (3 crédits).

125-475A LITTERATURE FRANCAISE ET QUEBECOISE. (6 credits). *Ne sera pas donné en 1977-78.*

125-485A ESSAI QUEBECOIS AVANT 1960. (3 crédits).

125-486B ESSAI QUEBECOIS DEPUIS 1960. (3 crédits).

FRENCH CANADA STUDIES PROGRAM

Consult page 35 of this Announcement.

GEOGRAPHY

183-236A INDIGENOUS PEOPLES OF NORTH AMERICA. (3 credits).

183-309A CANADA: GEOGRAPHIC FOUNDATIONS. (3 credits).

183-311B GEOGRAPHICAL ATTRIBUTES TO THE CANADIAN ECONOMY. (3 credits).

183-325A PHYSICAL GEOGRAPHY OF QUEBEC. (3 credits).

183-326B HUMAN GEOGRAPHY OF QUEBEC. (3 credits).

183-333A MONTREAL URBAN FIELD STUDIES. (3 credits).

183-345B THE GEOGRAPHICAL ROOTS OF IDENTITY. (3 credits; Prerequisite: a 200 level course in human geography).

HISTORY

101-202A CANADA TO 1867. (3 credits).

101-203B CANADA SINCE 1867. (3 credits).

101-211A THE U.S. TO 1865. (3 credits).

101-221B THE U.S. SINCE 1865. (3 credits).

101-303A QUEBEC SINCE 1840. (3 credits).

101-322B CANADA AND THE AMERICAN PRESENCE SINCE 1939. (3 credits; Prerequisite: History 202D or consent of instructor).

101-331D EMERGING MODERN AMERICA, 1877-1945. (6 credits; Prerequisite: History 211A and 221B or consent of the instructor).

101-332D CANADA AND THE BIRTH OF CONFEDERATION. (6 credits; Prerequisite: History 202D or equivalent or consent of instructor). *Not given in 1976-77.*

101-341D THEMES IN THE SOCIAL AND ECONOMIC HISTORY OF THE UNITED STATES, 1830-1940. (6 credits; Prerequisite; History 211A or 221B).

101-342A THE HISTORY OF CANADA'S EXTERNAL RELATIONS 1867-1939. (3 credits; Prerequisite: History 202D).

101-352D EMERGENCE OF ENGLISH CANADA: 1791-1867. (6 credits; Prerequisite: 202D or consent of instructor).

101-353D WAR AND SOCIETY IN CANADIAN HISTORY. (6 credits; Prerequisite; History 202D; This course is not open to candidates who have previously taken History 372D). *Not given in 1977-78.*

101-362D THE WEST AND THE NORTH IN CANADIAN HISTORY. (6 credits; Prerequisite; 202D). *Not given in 1977-78.*

101-363D CONTEMPORARY CANADA; 1890-1970. (6 credits; Prerequisite: History 202D or equivalent, or consent of instructor). This course is not open to candidates who have previously taken History 302A and 312B.

101-403D THE COMING OF THE QUIET REVOLUTION. (6 credits; Prerequisite: Any course in Canadian or Québec history). A reading and speaking knowledge of French is essential. *Not given in 1977-78.*

101-413D RACE AND RELIGION IN FRENCH-CANADIAN LIFE AND SOCIETY. (6 credits; Prerequisite: History 202D). *Not given in 1977-78.*

101-452D SOURCES OF CONFLICT IN CANADIAN HISTORY. (6 credits; Prerequisite: 202D). *Not given in 1977-78.*

101-443B COMMUNICATIONS, SOCIETY AND PUBLIC POLICY IN CANADA. (3 credits; Prerequisite History 202D).

POLITICAL SCIENCE

160-211D INTRODUCTION TO COMPARATIVE GOVERNMENT. (6 credits).

160-221D GOVERNMENT OF CANADA. (6 credits).

160-318A LOCAL GOVERNMENT IN COMPARATIVE PERSPECTIVE. (3 credits).

160-320A CANADIAN POLITICAL PROCESS I. (3 credits: Prerequisite: 160-211D).

160-321B CANADIAN POLITICAL PROCESS II. (3 credits; Prerequisite: 160-211D).

160-325D GOVERNMENT AND POLITICS OF THE UNITED STATES. (6 credits).

157-336B QUEBEC AND CANADA. (3 credits).

160-337B CANADIAN PUBLIC ADMINISTRATION. (3 credits; Prerequisite: 160-321D or consent of instructor).

160-415B POLITICAL PARTIES. (3 credits; Prerequisites: 160-211D and one other course in Comparative Government).

160-421B HONOURS SEMINAR: PROBLEMS IN CANADIAN POLITICS AND GOVERNMENT. (3 credits; Prerequisites: 160-221D and either 160-320A or 160-321B).

SOCIOLOGY

166-210A INTRODUCTION TO SOCIOLOGY. (3 credits).

166-214B INTRODUCTION TO SOCIOLOGY: (3 credits).

166-217A CANADIAN MASS COMMUNICATIONS. (3 credits).

166-221B CLASS AND POLITICS IN THE UNITED STATES. (3 credits).

166-223B SOCIAL STRATIFICATION. (3 credits).

166-230B CLASS, ETHNICITY AND POLITICS IN CANADA AND IN QUEBEC. (3 credits).

166-317B RESEARCH IN CANADIAN MASS COMMUNICATIONS. (3 credits).

166-321A WOMEN AND WORK. (3 credits).

166-326B POLITICAL SOCIOLOGY. (3 credits).

166-411A STATE AND ECONOMY IN INDUSTRIAL SOCIETIES. (3 credits).

PHILOSOPHY (107)

Professors – HARRY M. BRACKEN; MARIO BUNGE; ALASTAIR McKINNON *(Chairman)*; J.A. TRENTMAN

Associate Professors – R. STORRS McCALL; DAVID FATE NORTON; JONATHAN ROBINSON; WILLIAM SHEA; JEREMY WALKER

Assistant Professors – GEORGE DIGIOVANNI *(on leave)*; ANIL K. GUPTA; WARREN HARVEY; J. McGILVRAY

Samuel Bronfman Building, 1001 Sherbrooke St. West, Montreal, PQ, H3A 1G5. Telephone: 392-5170.

The Department of Philosophy has renumbered many of its courses according to the following principles. (To avoid confusion at registration old numbers are shown in brackets. **Note:** Students who took courses under their old numbers may not retake them under their new numbers).

First digit

2xx All Introductory Level Courses
3xx All Intermediate Level Courses
5xx All Upper Level Courses (open to graduates)
6xx All Graduate Courses

Second digit

x0x Philosophy of Language, Metaphysics, Epistemology.
x1x Logic, Philosophy of Logic
x2x Philosophy of Science, Philosophy of Social Science
x3x Ethics, Philosophy of Religion, Aesthetics, etc.
x4x Philosophy of History, Philosophy of Politics, Philosophy of Law
x5x History (Greek and Medieval)
x6x History (17th, 18th and 19th centuries)
x7x Contemporary Philosophy
x8x Seminars (Logic, Metaphysics, etc. Philosophy of Science)
x9x Seminars (Value theory, History, Tutorials)

MAJOR IN PHILOSOPHY

54 credits in Philosophy, including:
6 credits at introductory Level (2xx)
3 credits in Logic (x1x)
6 credits in Greek or Modern philosophy (as below)
27 credits in other philosophy courses
12 optional credits

Majors Adviser: Professor Warren Harvey – tel. 392-4517.

HONOURS IN PHILOSOPHY

60 credits in Philosophy, including:
6 credits at Introductory Level (2xx)
6 credits in Logic (x1x)
6 credits in Greek or Modern philosophy (354A, 355B, 360A, 361B)
6 further credits in history survey courses (35x, 36x)
6 credits in value theory (x3x, x4x)
6 credits in Tutorial (final year) (498A,B 499D)
6 further credits at Upper Level (5xx)
18 credits in optional courses

Up to 12 of the 'optional' credits may, with the Department's approval, be taken in another department.

In the final year Tutorial, students will prepare for a 3-hour examination, to be written at the end of the year. Graduating students may also take another tutorial and write a short Honours thesis.

JOINT HONOURS IN PHILOSOPHY

36 credits in Philosophy, including:

6 credits at Introductory Level (2xx)
3 credits in Logic (x1x)

6 credits in Greek or Modern philosophy (as above)
21 credits in optional courses

Students must consult the Department for specific arrangements.

Admission Requirements: 3.0 CGPA. Students must maintain a 3.0 GPA overall and a 3.0 GPA average in Philosophy.

Honours Adviser: Professor Jeremy Walker – tel. 392-5169.

Course Descriptions

107-200A INTRODUCTION TO PHILOSOPHY I. (3 credits). The course will deal with some of the central problems of philosophy: the mind-body problem, freedom, scepticism and certainty, fate, time and the existence of God.
Professor McCall

107-201B INTRODUCTION TO PHILOSOPHY II. (3 credits). Major philosophical problems such as the nature and sources of knowledge, freewill and determinism, God, punishment, the nature of mathematics, etc. (This course is a continuation of Philosophy 200A but can be taken separately).
Professor Gupta

107-210A,B INTRODUCTION TO LOGIC. (3 credits). Propositional and predicate logic: formalization of arguments, truth tables, natural deduction and related topics.
Professors Gupta and McCall

107-211B PHILOSOPHY OF LOGIC. (3 credits). *Not given in 1977-78.*

107-220A INTRODUCTION TO HISTORY AND PHILOSOPHY OF SCIENCE, Part I. (3 credits). A survey of the major scientific revolutions from Antiquity to the Twentieth Century.
Professor Shea

107-221B INTRODUCTION TO HISTORY AND PHILOSOPHY OF SCIENCE, Part II. (3 credits). Canadian Men and Women of Science. Science and society in Canada from the Sixteenth Century to the present with special reference to the contribution of scientists at McGill.
Professor Shea

107-230B (230D, 205D) INTRODUCTION TO MORAL PHILOSOPHY. (3 credits). Some of the main issues of moral philosophy as discussed in Plato, Kant, and Kierkegaard.
Professor McKinnon

107-240A SOCIAL AND POLITICAL PHILOSOPHY. (3 credits). Traditions of philosophical inquiry about the principles of social and political practice.
Professor Walker

107-241B SOCIAL AND POLITICAL PHILOSOPHY. (3 credits). Philosophical analysis of some features of 20th century politics.
Professor Walker

107-270B (212B) INTRODUCTION TO ANALYTIC PHILOSOPHY. (3 credits). *Not given in 1977-78.*

107-300A (107-313D) PHILOSOPHY OF LANGUAGE. (3 credits; prerequisite: one course in philosophy). A discussion of several philosophical problems connected with language: meaning, translation, truth, and related topics. *Not given in 1977-78.*
Professor McGilvray

107-303B PHILOSOPHY OF MIND. (3 credits). Minds and Machines: a discussion of "mechanical" modelling of human behaviour (particularly speech) and the identity crisis.
Professor McGilvray

107-304B CHOMSKY. (3 credits; one course in philosophy). Philosophical aspects of Chomsky's contributions to psychology, linguistic theory, theories of human nature, and to politics.
Professor Bracken

107-321D PHILOSOPHY OF SCIENCE. (6 credits; prerequisite: two science courses). An analysis of the concepts of scientific problem, hypothesis, law, theory, explanation, prediction, observation, measurement, experiment, and inference. Also, selected topics in the Philosophy of Science and Technology.
Professor Bunge

107-322D METHOD AND METAPHYSICS IN THE SCIENTIFIC REVOLUTION. *Not given in 1977-78.*

107-324A PHILOSOPHY OF SOCIAL SCIENCE I. (3 credits; prerequisite: one course in philosophy). *Not given in 1977-78.*
Professor Bunge

107-325B PHILOSOPHY OF SOCIAL SCIENCE II. (3 credits; prerequisite: one course in philosophy). *Not given in 1977-78.*
Professor Bunge

107-330B (107-407B) PHILOSOPHY AND LITERATURE. (3 credits; prerequisite: one course in philosophy). *Not given in 1977-78.*
Professor Walker

107-332A PHILOSOPHY OF RELIGION I (107-332D). (3 credits; prerequisite: one course in philosophy or consent of the instructor). Topic for 1977-78: Religion and Science. A discussion of the relation of the religious and scientific world views with special reference to such concepts as explanation, miracle, the supernatural and design or purpose in nature. (Note that 160-340B Religion and the Sciences is available as a complementary course in the 2nd term).
Professor McKinnon

107-333B PHILOSOPHY OF RELIGION II. (3 credits; prerequisite: one full course in philosophy or consent of the instructor). A discussion of the main problems of the philosophy of religion as considered in the works of various philosophers. *Not given in 1977-78.*
Professor McKinnon

107-334A ETHICS I (3 credits; prerequisite: one full course in philosophy). Recent analytical theories. A study of 20th century ethics, including Intuitionist, Emotivist, Prescriptivist, and Naturalist theories.
Professor Walker

107-336A (107-305A) AESTHETICS I. (3 credits). *Not given in 1977-78.*

107-337B (107-306B) AESTHETICS II. (3 credits; prerequisite: one course in philosophy). Topic for 1977-78: Aesthetic judgements.
Professor Walker

107-344B (107-572D) PHILOSOPHY OF POLITICS. (3 credits; prerequisite: one course in philosophy). *Not given in 1977-78.*

107-346A (107-335D, 346D) PHILOSOPHY OF HISTORY I. (3 credits; prerequisite: one course in philosophy). This course deals with some of the most influential theories in the philosophy of history including those of Vico, Hegel, Marx and Comte.
Professor Robinson

107-347B PHILOSOPHY OF HISTORY II. (3 credits; prerequisite: one course in philosophy). This course is concerned with modern attempts to analyse the nature of historical thinking including those of Hempel, Gallie, Dray and Butterfield.
Professor Robinson

107-348A PHILOSOPHY OF LAW. (3 credits). A discussion of the nature of justice and law, and of the relationship between them. (This course is intended for students with a non-professional interest in law, as well as for those considering law as a profession).
Professor McCall

107-354A (107-339A) PRESOCRATICS AND PLATO. (3 credits). A survey course concentrating on selected texts.
Professor Trentman

107-355B (107-340B) ARISTOTLE AND LATER GREEK PHILOSOPHY. (3 credits). A survey course concentrating on selected texts.
Professor Trentman

107-356A (107-341A) AUGUSTINE TO AQUINAS. (3 credits). Examination of selected works of the great Christian, Moslem and Jewish thinkers.
Professor Bracken

107-357B (107-342B) POST-AQUINAS TO RENAISSANCE. (3 credits). A survey of philosophy from approximately 1300 to 1630. The topics discussed will include nominalism, humanism, new attitudes towards Plato and Aristotle, the influence of the revival of sceptism and of the Reformation, and the legal and political philosophy of the period. The course will also consider whether there was a Renaissance and, if there was, what it might have been.
Professor Trentman

107-358A (107-345D) TOPICS IN JEWISH PHILOSOPHY I. (3 credits). The Maimonidean revolution and its enemies.
Professor Harvey

107-359B (107-345D) TOPICS IN JEWISH PHILOSOPHY II. (3 credits). Rationalism (focus on Moses Mendelssohn and Hermann Cohen) vs. Existentialism (focus on Martin Buber and Franz Rosenzweig).
Professor Harvey

107-360A (107-349A) SEVENTEENTH CENTURY PHILOSOPHY. (3 credits). A survey course concentrating on selected texts from Montaigne, Descartes, Malebranche, Leibniz, Spinoza, Locke, Bayle, and Berkeley.
Professor Bracken

107-361B (107-350B) EIGHTEENTH CENTURY PHILOSOPHY. (3 credits). A survey course concentrating on selected texts from Hume, Reid, Hutcheson, and the Scottish Enlightenment.
Professor Norton

107-366A (107-351A) KANT TO HEGEL. (3 credits). The course will alternate between a study of themes characteristic of German Idealism, and a detailed analysis of texts from Kant, Fichte, Schelling and Hegel. German Idealism will be interpreted as an intricate effort at making reason "historical". *Not given in 1977-78.*

107-367B (107-352B) POST-HEGELIAN PHILOSOPHY. (3 credits). A study of philosophers selected from such traditions as the Kantian, Hegelian, Marxist, Existentialist, Utilitarian, and the forebearers of Phenomenology. *Not given in 1977-78.*
Professor DiGiovanni

107-370A (317A) PROBLEMS IN ANALYTIC PHILOSOPHY I. (3 credits). Topic for 1977-78: Idealism versus Empiricism; the theory of mind and the "Linguistic turn".
Professor McGilvray

107-371B (318B) PROBLEMS IN ANALYTIC PHILOSOPHY II. (3 credits). Topic for 1977-78: A discussion of Wittgenstein's *Philosophical Investigations.*
Professor McGilvray

107-374A PHENOMENOLOGY. (3 credits; prerequisite: one previous course in philosophy). The course will explore the "Phenomenological Movement" both historically and critically. An attempt will be made to identify the nature of Phenomenology, and to contrast it with other forms of Philosophy. The class will also consider the question of how Pheno-

menology became at some point "existential". *Not given in 1977-78.*

107-375B EXISTENTIALISM. (3 credits; prerequisite: one course in philosophy). Special attention will be given to contemporary proponents of Existentialism, and also to the question of how contemporary Existentialism is related to Phenomenology. However, an effort will also be made to recognize a tradition of "existential thought" running through the history of Western Philosophy. *Not given in 1977-78.*

107-382A (107-381D) PROBLEMS IN PHILOSOPHY I. (3 credits). *Not given in 1977-78.*

107-383B (107-381D) PROBLEMS IN PHILOSOPHY II. (3 credits). *Not given in 1977-78.*

107-398A,B (107-398A/399B) TUTORIALS. (3 credits). Open to second year Full Honours students in Philosophy, and to other students, with consent of the Department.
Staff

107-399D (107-399B) TUTORIALS. (6 credits). Open to second year Full Honours students in Philosophy, and to other students, with consent of the Department.
Staff

107-498A, B (107-598A/599B) TUTORIALS. (3 credits). Open to Third Year Full Honours students in philosophy, and to other students with consent of the Department.
Staff

107-499D (107-599B) TUTORIALS. (6 credits). Open to Third Year Full Honours students in Philosophy, and to other students with consent of the Department.
Staff

107-500A (107-581A) METAPHYSICS, DIALECTICS, LOGIC AND EPISTEMOLOGY. (3 credits). *Not given in 1977-78.*

107-501B (107-582B) METAPHYSICS, DIALECTICS, LOGIC AND EPISTEMOLOGY. (3 credits; prerequisite: Philosophy 210A or equivalent). *Not given in 1977-78.*

107-502A (107-585A) METAPHYSICS I. (3 credits; Prerequisite: Philosophy 210 or a course in abstract algebra.) A systematic analysis of the concepts of substance, form, thing, possibility, change, space, and time. Relations with both metaphysical tradition, contemporary science, and general system theories.
Professor Bunge

107-503B (107-586B) METAPHYSICS II. (3 credits; Prerequisite: Philosophy 210 or a course in abstract algebra.) A systematic analysis of the concepts of system, novelty, biosystem, mind, and social system. Relations with the metaphysical tradition, contemporary science, and general system theories.
Professor Bunge

107-504A (107-517D) PROBLEMS IN SEMANTICS I. (3 credits); prerequisite: consent of the instructor). Topics will change from year to year. *Not given in 1977-78.*
Professor Bunge

107-505B (107-517D) PROBLEMS IN SEMANTICS II. (3 credits; continuation of Philosophy 504A). Topics will change from year to year. *Not given in 1977-78.*
Professor Bunge

107-510B INTERMEDIATE LOGIC. (3 credits; prerequisite: Logic 210 or equivalent). Metatheory of propositional and predicate logic; deduction theorem, completeness theorem, etc... Elementary number theory; Gödel's incompleteness theorem (if time permits).
Professor Gupta

107-511D MEDIEVAL LOGIC AND GRAMMAR. (6 credits). *Not given in 1977-78.*

107-520D METHODOLOGY AND PHILOSOPHY OF SCIENCE. (6 credits). *Not given in 1977-78.*

107-522A, 107-523B (107-523A & 524B) FORMAL METHODS IN PHILOSOPHY AND SOCIAL SCIENCE I & II. (3 credits each). *Not given in 1977-78.*

107-526A SCIENCE AND PHILOSOPHY IN THE 17TH CENTURY I. (3 credits). Topic for 1977-78: Descartes' Philosophy of Nature. A study of Parts 2, 3 and 4 of *the Principles of Philosophy.*
Professor Shea

107-527B SCIENCE AND PHILOSOPHY IN THE 17TH CENTURY II. (3 credits). Topic for 1977-78: The early systems of natural philosophy in Schelling and Hegel.
Professor Shea

107-528A, 107-529B (107-527A & 528B) PHILOSOPHY OF PHYSICS I & II. (3 credits each). *Not given in 1977-78.*

107-530A (107-404D) MORAL PHILOSOPHY. (3 credits; prerequisite: one course in philosophy). *Not given in 1977-78.*

107-532A, 107-533B (107-531A & 532B) SEMINAR IN PHILOSOPHY OF RELIGION I & II. (3 credits each). *Not given in 1977-78.*

107-538A (107-401D) SEMINAR IN THE HISTORY OF ETHICS I. (3 credits). Topic for 1977-78: Morality and alienation in Hegel's earlier work.
Professor Robinson

107-539B (107-401D) SEMINAR IN THE HISTORY OF ETHICS II. (3 credits). Topic for 1977-78: Liberation and Redemption in Hegel, Marx and Aquinas.
Professor Robinson

107-548A LEGAL AND MORAL PHILOSOPHY OF THE JEWISH TRADITION I. (3 credits). Readings in Hebrew of philosophic texts chosen in accordance with interests of students. *Not given in 1977-78.*

107-549B LEGAL AND MORAL PHILOSOPHY OF THE JEWISH TRADITION II. (3 credits). Readings in Hebrew of philosophic texts chosen in accordance with interests of students. *Not given in 1977-78.*

107-550A (107-541A) SEMINAR IN ANCIENT PHILOSOPHY. (3 credits). *Not given in 1977-78.*

107-551A (107-542B) SEMINAR IN ANCIENT PHILOSOPHY. (3 credits). Topic for 1977-78: Aristotle: *De Anima.*
Professor Trentman

107-552D THEMES IN THE HISTORY OF JEWISH PHILOSOPHY. (3 credits). *Not given in 1977-78.*

107-560B (107-555A) SEMINAR IN 17TH AND 18TH CENTURY PHILOSOPHY. (3 credits). Topic for 1977-78: Descartes and the Cartesians.
Professor Bracken

107-561B (107-556B) SEMINAR IN 17TH AND 18TH CENTURY PHILOSOPHY. (3 credits; prerequisite: one course in philosophy). *Not given in 1977-78.*

107-562D (107-544D) SEMINAR IN THE HISTORY OF PHILOSOPHY. Topic for 1977-78: David Hume and the Scottish Philosophers.
Professor Norton

107-564A (107-565D) SEMINAR IN KANT I. (3 credits; prerequisite: one course in philosophy). *Not given in 1977-78.*

107-565B (107-565D) SEMINAR IN KANT II. (3 credits). *Not given in 1977-78.*

107-566D (107-558D) SEMINAR IN HEGEL. (6 credits; prerequisite: one course in philosophy). *Not given in 1977-78.*

107-568D (107-563D) SEMINAR IN KIERKEGAARD. (6 credits). *Not given in 1977-78.*

107-570A, 107-571B (107-513A & 514B) RECENT AND CONTEMPORARY PHILOSOPHY. *Not given in 1977-78.*

107-580A SEMINAR IN PROBLEMS OF PHILOSOPHY. (3 credits; prerequisite: Philosophy 210A or equivalent). Topic for 1977-78: Truth and Paradox.
Professor Gupta

107-581B SEMINAR IN PROBLEMS OF PHILOSOPHY. (3 credits; prerequisite: Philosophy 210A or equivalent). Topic for 1977-78: Modal semantics: semantics for modal logic, deontic logic, (the logic of obligation and permission) tension logic, and the logic of events.
Professor McCall

107-588A (107-583A) SEMINAR IN SYSTEMATIC PHILOSOPHY. (3 credits; prerequisite: Philosophy 210A or equivalent). *Not given in 1977-78.*

107-589B (107-584B) SEMINAR IN SYSTEMATIC PHILOSOPHY. (3 credits). Topic for 1977-78: Language and Metaphysics: Mind-brain identity thesis. To be discussed: materialism, eliminative materialism, neutral monism; reduction, compatibilism, dualism, thing-identity and event-identity, sensations, perception and thought.
Professor McGilvray

107-590A (593A) SEMINAR IN PHILOSOPHY. (3 credits). *Not given in 1977-78.*

107-591B (594B) SEMINAR IN PHILOSOPHY. (3 credits). *Not given in 1977-78.*

POLITICAL SCIENCE (160)

Professors – MICHAEL BRECHER *(on leave second term 1977-78);* J.R. MALLORY *(on leave 1977-78);* BALDEV RAJ NAYAR; CHARLES TAYLOR *(on leave 1977-78);* DALE THOMSON;
Associate Professors – THOMAS BRUNEAU *(on leave 1977-78);* PETER GOUREVITCH; FRANK A. KUNZ *(Chairman);* PAUL C. NOBLE; JANICE STEIN; BLEMA S. STEINBERG; HAROLD M. WALLER
Assistant Professors – JEROME BLACK; BARBARA HASKEL; DANIEL LATOUCHE; SAMUEL J. NOUMOFF; PHILIP SABETTI; JOHN SHINGLER; JAMES TULLY;
Visiting Professors – ALEXANDER MACLEOD; EDOUARD CLOUTIER; MARIE-FRANCE MOORE

Room 434, Stephen Leacock Building, 855 Sherbrooke St. West, Montreal, P.Q., H3A 2T7, Telephone: 392-5239.

Students wishing to Honour or Major in Political Science MUST consult with a Departmental Adviser prior to registration EACH year in order to devise a suitable program. Students who are registering with the Department for the first time must bring transcripts of their previous CEGEP or university level work.

MAJOR PROGRAM

The Major program in Political Science consists of 9 full courses (54 credits) of which at least 7 full courses (42 credits) must be in Political Science. A student is encouraged to take up to 2 (12 credits) of these 9 courses outside the Department provided they are closely related to his or her Political Science program.

In the U1 year, a major student must take a total of twelve credits in Political Science, covering at least two of the four main fields of concentration offered by the Department (Comparative Government and Politics, Canadian and Quebec Government and Politics, International Politics, and Political Theory). The course requirements in the various fields are outlined below.

Overall, while some concentration in one area of the discipline is considered beneficial, excessive specialization is discouraged. Students are therefore required to take at least one third of their Political Science program (i.e. at least five half courses) outside their area of concentration.

OTHER MAJOR PROGRAMS

A *major* program is available with the Departments of *Economics and History*. The requirement for this degree is 5 full courses in Political Science and 5 full courses in the other Departments. The same principles concerning the distribution of courses that were outlined above for the single major apply here too, both at the U-1 level and overall.

In addition, students can follow double majors programs involving Political Science and some other related discipline. These differ from the major with Economics or History in that they require the student to complete all the requirements for the single major in both Departments (i.e. at least 6 or 7 courses on each side.)

Further information may be obtained from the Major Adviser, 392-5239.

HONOURS PROGRAM

The Honours program in Political Science consists of 60 credits of which at least 48 credits must be in Political Science. Students are encouraged to take 12 of these 60 credits in a related social science discipline.

In the U1 year, a student must take a total of 15 credits in Political Science, covering at least three of the four main fields offered by the Department (Comparative Government and Politics, Canadian and Quebec Government and Politics, International Politics, Political Theory). The course requirements in the various fields are outlined below.

Overall, while some concentration in one area of the discipline is considered beneficial, excessive specialization is discouraged. In the U-3 year all Honours students are required to take one 600 level course or 400 level honours seminar as part of their program. (For the list of these 600 level courses, please consult the departmental course description booklet which is available in the Department office).

JOINT HONOURS

Joint Honours programs are currently available in the following areas:

Political Science and Economics
History
Philosophy
Sociology
Anthropology
Middle East Studies

Students who are interested in pursuing a joint honours program in some other area (e.g. Political Science and one of the modern languages or Political Science and Geography) should get in touch with the Honours Adviser to see if a suitable program can be devised. Such programs will then be submitted for approval to the Faculty of Arts.

The requirements for joint honours degrees are 36 credits in Political Science and 36 credits in the other honours subject. In the U-1 year students must take 12 credits in Political Science covering at least two of the four main fields offered by the Department. Joint honours students, like single honours students, are also required to take one 600 level course or 400 level honours seminar in their U-3 year.

Standards

To be eligible for entry into an honours program a student should have placed in the top third of his/her previous CEGEP, university or grade XIII classes. To remain in honours, a student must maintain a cumulative average in the upper half of the B category (i.e. 72% plus) in his/her Political Science courses and an overall GPA of at least 2.8. In addition, honours students must also maintain a satisfactory pattern of performance in their Political Science courses. Specifically, to remain in Honours, a student should not receive grades below 70% in more than one-quarter of his/her Political Science courses. Thus, in full honours, a student should not obtain less than 70% in more than 4 half-courses: in joint honours he/she should not obtain less than 70% in more than 3 half-courses.

Students awarded honours standing in U-1 may lose it at the end of the year or in subsequent years if their performance is not up to these standards.

Conversely, students who were not awarded honours standing in U-1 may attain it subsequently if their performance merits it. To be awarded honours at graduation, however, a student must be registered as an honours student at the beginning of his U-3 year. At graduation a student's honours standing will be determined by his overall record in the honours program.

Further information may be obtained from the Honours Adviser, Professor Paul Noble, 392-5237.

BASIC POLITICAL SCIENCE FIELDS

Students entering an honours or majors program may wish to concentrate to some extent in one or more areas of Political Science. If so, they should take note of the basic course requirements in these fields.

1) COMPARATIVE GOVERNMENT AND POLITICS

Students wishing to concentrate in this field are normally required to take 160-211D (Comparative Government and Politics) and are strongly urged to take 160-227B (Political Change in the Third World).

2) CANADIAN AND QUEBEC GOVERNMENT AND POLITICS

Students wishing to concentrate in this field are required to take 160-221D (Government of Canada) and are strongly urged to take 160-226A (La Vie Politique Québécoise).

3) INTERNATIONAL POLITICS

Students wishing to concentrate in this field are required to take 160-244A (International Politics) or 160-245B (The International System). While only required to take one of these courses, students should note that it would be helpful if they took both, since they concentrate on different problem areas in the study of international politics.

4) POLITICAL THEORY

Students wishing to concentrate in this field are normally required to take 160-231D (Political Theory).

Course Descriptions

This announcement is prepared early in the year and so is likely to need modification by the time the academic year begins. A mimeographed supplement is available in the department office and should be consulted.

Specific course prerequisites may be waived by instructors in individual cases.

• *Denotes not offered 1977-78.*

160-211D COMPARATIVE GOVERNMENT AND POLITICS. (6 credits). This course will first examine in detail the major features and processes of the political systems of Britain, France and Germany. The course will then move to focus cross-nationally on the themes of conflict and consensus in these polities. Reference will also be made to Belgium, Canada and the U.S.A.
Professor Black

160-212A TECHNIQUES OF EMPIRICAL RESEARCH. (3 credits). An introduction to empirical political research. Among the topics considered are the formulation of research problems, the selection of samples, interviewing, and questionnaire construction, and the analysis and interpretation of data.
Professor Waller

160-221D GOVERNMENT OF CANADA. (6 credits). An examination of the operation of parliamentary institutions in a federal state, and of the operation of federalism in Canada.
Professor Thomson

157-226A LA VIE POLITIQUE QUEBECOISE. (3 crédits). Une introduction à la vie politique québécoise à travers l'étude des institutions, des idéologies et des comportements politiques. Une attention particulière sera accordée aux changements survenus dans le système politique québécois. Bilingue.
Professeur MacLeod

160-227B POLITICAL CHANGE IN THE THIRD WORLD: INDEPENDENCE AND NATION BUILDING. (3 credits). An introductory course on the politics of the Third World, dealing primarily with the role of forces in the achievement of independence and the building of nations. Several theories on independence movements and revolutions will be discussed and then related to experiences in Asia, Africa and Latin America.

160-231D POLITICAL THEORY. (6 credits. This course is normally a prerequisite for all upper level courses in political philosophy). The first half will be taken up with a discussion of contemporary political issues: e.g. the understanding of politics, the politics of violence, community and authority. The second term will be devoted to the study of certain works of philosophy and literature which reflect political reality.
Professors Noumoff, Shingler and Tully

160-244A INTERNATIONAL POLITICS. (3 credits). An analysis of the factors determining foreign policy behaviour, both domestic and international, and an examination of several foreign policy decisions and international crises. The process of foreign policy implementation will also be studied. Students will be encouraged to do experimental projects in the field.
Professor J. Stein

160-245B THE INTERNATIONAL SYSTEM. (3 credits). This course will be divided into two parts. The first part will examine the evolution of the modern international system concentrating on a comparison of the traditional European system, the post World War II global system and the emerging global system of the 1970's. The second part will explore the problems of certain basic types of international systems (e.g. multipolar vs. bipolar systems, moderate vs. revolutionary systems) as well as selected theories concerning stratification, conflict and war in the international system.
Professor Noble

160-247B FOREIGN POLICY IN THE THIRD WORLD. (3 credits). This course will examine domestic and external sources of conflict within the Third World. It is experimental in form: students will work at their own pace through the use of individually designed modules. Stucents are requested to consult the special course description which is available in Leacock 434.
Professor J. Stein

160-300D COMPARATIVE REVOLUTION. (6 credits; Prerequisite: 227B or permission of the

instructor; not open to students who have taken Political Science 160-300L). A course dealing with the post World War II revolutionary process in the third world. Special attention will be devoted to the nature of the revolutionary process in the struggle for national liberation - examining cases where this approach both succeeded and failed. Examples will be drawn in depth from Asia, Africa and Latin America. Students will be required to do a thorough case study.
Professor Noumoff

160-312B PUBLIC OPINION AND VOTING BEHAVIOUR. (3 credits). A detailed consideration of various models of voting behaviour and public opinion with a heavy emphasis on explanations of why citizens vote (turnout) and why they vote the way they do (direction). The models are critically examined from a logical and empirical standpoint in the context of survey data drawn from the American, British and Canadian cases. To aid in the reading and understanding of th empirically oriented material, the first series of lectures will briefly cover in an informal way the topics of survey research, sampling and elementary data analysis. No empirical or quantitative skills are assumed.
Professor Black

- **157-316A QUEBEC AND NORTH AMERICA.** (3 credits). In what ways and to what extent can Québec be considered a North American society; the role of messianism and utopism; major manifestations of the distinctiveness of Québec in North America: politics, cultural development, economic tradition; Québec-U.S.A. relations; the problem of economic domination. (A reading knowledge and a minimal ability to understand spoken French are required; writing and speaking ability are not required).
Professor Latouche

160-318A LOCAL GOVERNMENT IN COMPARATIVE PERSPECTIVE. (3 credits). An examination of the organization and conduct of local government in Canada, the United States and selected West European countries. Special attention will be paid to the theories of local government, the criteria for comparative analysis, the provision of public goods and bads, urban political patterns and the constitution of new institutional arrangements to deal with "the urban crisis"
Professor Sabetti

160-319D POLITICS OF LATIN AMERICA. (6 credits: prerequisite: 160-227B or consent of instructor). This course will deal with the dynamics of political change in Latin America today.

160-320A THE CANADIAN POLITICAL PROCESS (I). (3 credits; Prerequisite: At least one other course in Canadian or Comparative Government and Politics). A critical analysis of different aspects of the Canadian Political Process. The first semester will be devoted to the socioeconomic and political environment, political ideology and political culture, the electoral system, the party system, the ideology, structure and behaviour of parties and pressure groups and elites.

160-321B THE CANADIAN POLITICAL PROCESS (II). (3 credits; Prerequisite: at least one other course in Canadian Politics). A critical analysis of the Canadian Political Process through an examination of federal-provincial relations, regional development, environmental policies and Canadian-American problems. Consideration will be given to different diagnostic and prescriptive interpretations.
Professor Sabetti

160-322A MODERNIZATION AND POLITICS IN SOUTH ASIA. (3 credits). Modernization tasks, traditional and colonial legacy, social and political framework, reform strategies and system performance, competing elites and ideologies, revolutionary movements and their prospects.
Professor Nayar

160-323B POLITICS AND GOVERNMENT IN EAST ASIA (CHINA AND JAPAN.) (3 credits). A survey of traditional and modern political society in China and Japan. Special emphasis is placed on governmental policy and institutions in relation to ideology in the Peoples' Republic of China and post-1945 Japan.
Professor Noumoff

- **160-324D POLITICS AND GOVERNMENT IN AFRICA.** (6 credits). The government and politics of African states south of the Sahara with reference to traditional political systems, colonial policies, nationalism, and the problem of nation building.
Professor Kunz

160-325D GOVERNMENT AND POLITICS OF THE UNITED STATES. (6 credits). A survey of the American political system, with emphasis on the constitutional and philosophical setting, the institutions and their interactions, the political process, public policy issues, and political change.
Professor Waller

- **160-327A THE PRINCIPLES OF PUBLIC ADMINISTRATION.** (3 credits). An outline of the basic concepts employed in public administration will include organizational structure and behaviour, the concept of management and personnel development, the decision-making processes and the problems of change and innovation. The subject matter will be general although references will be made to Canadian examples.

160-320D EUROPEAN GOVERNMENT AND POLITICS. (6 credits). Europe as a case of political development. Analysis of the impact of four problems – the commercialization of agriculture and the international division of labour; the status of the Church in society; construction of the nation state; and the political conflicts surrounding industrialization – on the formation of divergent political systems

in the 20th Century (fascism, communism and western democracy). Consideration of alternative explanations of political phenomena. Readings include social theory.
Professor Gourevitch

160-329A POLITICS AND GOVERNMENT OF THE SOVIET UNION. (3 credits). Origins, crucial experiences, and guiding ideas in the development of the Soviet polity. Problems of contemporary policy: how does the Communist Party interact with the State bureaucracy? What role do regional actors play, and who are they? What role does ideology play? What are the respective roles of coercion and incentives in different policy areas? Soviet policies for the economy (industry, agriculture, labor relations, economic planning), for social life (education, the family, social control, the role of women), and culture. The role of welfare policies in the Soviet system. The challange of national self consciousness for a multi-ethnic Communist state. The challenge of scientific-technological revolution for the relations between expert and politician and for goal-oriented planning. The challenge of dissent for a "classless" society.
Professor Haskel

- **160-332D NON-WESTERN POLITICAL PHILOSOPHY.** (6 credits; Prerequisite: 160-231D or consent of instructor). This course will concentrate on the major political-philosophical traditions of China, India, Islam and Africa. Students are required to have a background in political philosophy of one of the regions under consideration. Particular emphasis will be placed on the relationship between the underlying political/philosophic culture and its impact upon contemporary political forms.
Professor Noumoff

160-333A HISTORY OF POLITICAL AND SOCIAL THEORY (I). (3 credits; Recommended: 160-231D). This course will explore the major themes and writers in Political Theory from the dawn of Greek political consciousness through the writings of St. Augustine. The political ideas of Hesiod, Thucydides, Plato, Aristotle, the Hellenistic philosophers, Hebrew political thought and prophecy, the Christian revolt against Classicism and the early church fathers will be explored through the significant texts of this period.

160-334B HISTORY OF POLITICAL AND SOCIAL THEORY (II). (3 credits. Prerequisite: 160-231D). Political theory of the Middle Ages and the early modern period until the Enlightenment. This course will deal with the Medieval writers and those of the early modern period up to and including the Enlightenment: e.g. Aquinas, Marsilio, Machiavelli, the Reformers, Hobbes, Locke, Montesquieu, Voltaire, d'Holbach, Bentham.
Professor Tully

157-336B QUEBEC AND CANADA. (3 credits). How do French and English-speaking Canadians perceive one another; mutual stereotypes; common images; cultural differences between the two groups; English-Canadian interpretations of the Quiet Revolution; political aspects of linguistic conflicts. (A reading knowledge and a minimal ability to understand spoken French are required; writing and speaking ability are not required).
Professor Cloutier

160-337A CANADIAN PUBLIC ADMINISTRATION. (3 credits; Prerequisite: at least one other course in Canadian government or politics). An analysis of the organization and practice of Canadian Public Administration at the federal and provincial level. Special attention will be given to techniques and processes of administration, governments as employers, the policy role of task forces and ministries of state, the delivery of public services in a bilingual Dominion, representative bureaucracy and Dominion-Provincial administrative relations.
Professor Sabetti

160-340D POLITICS AND FOREIGN POLICY IN THE ARAB WORLD. (6 credits; a previous course on the politics of developing countries and/or on the analysis of foreign policy or international systems would be helpful but not required). The first part of this course will examine the societies, regimes and major political forces in the eastern Arab world (Egypt, Fertile Crescent area, Arabian Peninsula). The second part will examine the foreign policies and behaviour of the Arab states in three areas: Inter-Arab relations, Arab-Israsli relations, Arab-Great Powers relations. The course will also include a simulation dealing with current foreign policy problems in the Middle East. (Not open to students who have taken Political Science 160-348A).
Professor Noble

160-343B CONTEMPORARY INTERNATIONAL SYSTEMS: LATIN AMERICA. (3 credits; Prerequisite 160-319D or consent of instructor). An examination of the evolution of the inter-American system since the turn of the century. Particular attention will be given to the role of the United States in the dynamics of the system as illustrated by case studies including Cuba in 1959 and Santo Domingo in 1965. The role of Canada in the system will be studied with regard to the OAS and regional economic relations.

- **160-344A CONTEMPORARY INTERNATIONAL SYSTEMS: EUROPE.** (3 credits; Prerequisite: 160-244A or 160-245B or consent of instructor. 160-346A would be a helpful preparation for this course). An examination of the evolution of the European system since 1945 focusing on three problem areas – East-West relations, the Atlantic Alliance and West European integration. Special attention will be paid to the policies of the U.S., Britian, France and West Germany. Part of the course will consist of a simulation dealing with current foreign policy problems in Europe.
Professor Noble

160-345A INTERNATIONAL ORGANIZATION. (3 credits). This course will focus on the United Nations – its performance and problems. Special emphasis will be placed on two of its roles: as an agent for conflict management and as a source of pressure to redistribute values, wealth and skills.
Professor Steinberg

- **160-346A THE FOREIGN POLICIES OF THE SUPER POWERS.** (3 credits; Prerequisite: 160-244A). An analysis of American and Soviet foreign policies within the context of the major conceptual approaches to foreign policy behaviour. Special emphasis will be placed on the examination of similar patterns of behaviour, i.e. cold war politics, the arms race, hegemonial behaviour, etc., with a view to uncovering the major explanatory variables and comparing them.
Professor Steinberg

160-347A THE POLITICS AND FOREIGN POLICY OF ISREAL. (3 credits). This course will focus on the political system of Israel and her foreign policy since 1948. It will explore her political culture, parties, the electoral system and election results, political leadership, the constitutional problem, etc. The second half of the course will analyse the setting for policy choices; party programs and interest group pressures; decision-makers and their images; and the process of formulating and implementing decisions. Several important foreign policy issues will be examined to illuminate the structure and process of Israel's behaviour.
Professor Brecher

- **160-348A CONTEMPORARY INTERNATIONAL SYSTEMS: THE MIDDLE EAST.** (3 credits; Prerequisite: 160-244A or 160-245B or consent of instructor. 160-247B would be a helpful preparation for this course). An examination of the evolution of the Middle Eastern system since 1945 focusing on three problem areas: Inter-Arab relations, Arab-Israeli relations, Arab-Great Power relations. Part of the course will consist of a simulation dealing with current foreign policy problems in the Middle East.
Professor Noble

160-349B CONTEMPORARY INTERNATIONAL SYSTEMS AND FOREIGN POLICY: ASIA. (3 credits). A study of the foreign policies of the major Asian powers – China, Japan, India and Pakistan. Emphasis is on student research in the context of a common framework for the study of foreign policy. Focus is on foreign policy goals and behaviour and their relationship to economic and military capabilities, societal characteristics and governmental features.
Professor Nayar

160-363A RADICAL POLITICAL THOUGHT (I). (3 credits). This course will focus on the origins and meaning of radicalism in the 19th century and trace its evolution in this period. A study of the impact of the French Revolution and the dislocations wrought by industrialization will provide background for a close examination of Marx and his Hegelian roots. A close look at anarchist theories and critiques will close the term's work.

160-364B RADICAL POLITICAL THOUGHT (II). (3 credits). The transformation of Marxist and anarchist theory in response to new theoretical and practical problems in the 20th century is the major focus. Such thinkers as Lukacs, Gramsci, Marcuse and Habermas will be studies in depth. The rise of "new left" radicalism and its significance in the era of technology will be probed.

160-367A ISSUES IN CONTEMPORARY PUBLIC POLICY. (3 credits; Prerequisite: At least one course in the politics or history of an industrialized country or consent of the instructor). Why does a country have effective policy in one area and deficient policy in another? How do political leaders in different countries reconcile political viability with technical effectiveness in making policy? What are the domestic requirements for foreign policies which permit and encourage international agreement on current world problems? Through a comparison of policies and policy making in industrialized countries in Europe and North America these questions will be examined. Policies will be chosen from among areas such as: Energy policy, welfare policy, industrial policy, policy toward the aged, regional policy, foreign economic policy, economic planning for productivity and distribution.
Professor Haskel

157-370A QUEBEC 1960-1970: THE QUIET REVOLUTION. (3 credits). The origins of the Quiet Revolution; the major actors; its political, economic, social and cultural components; structural changes during the 1960-66 period; the question of violence and terrorism; the end of the Quiet Revolution; the reaction of English-Canada; the impact of this period of rapid change. (A reading knowledge and a minimal ability to understand spoken French are required; writing and speaking ability are not required).
Professor Latouche

157-406B CULTURE, COUNTER-CULTURE AND POST-INDUSTRIALISM IN QUEBEC. (3 credits). The nature and origins of the post-industrial society; its applicability to Québec and Canada; the role of culture in the hegemonic struggle; counter-culture as reaction; traditional vs. industrial and post-industrial culture in Québec; radical and liberal interpretations of the youth and ecological movements. (A reading knowledge and a minimal ability to understand spoken French are required; writing and speaking ability are not required).
Professor Moore

160-415B POLITICAL PARTIES. (3 credits; Prerequisite: One other course in Comparative Government). The course will explore various approaches to and models of political parties and party systems,

and apply them to party systems in different societies. Among the models to be considered are those of Maurice Duverger, R. Michels, Samuel Eldersveld, Anthony Downs, W.H. Riker, Seymour Lipset and Stein Rokkan.

- **160-416B POLITICAL SOCIALIZATION.** (3 credits). The following topics will be considered: 1) Theoretical approaches and conceptual frameworks; 2) the content and timing of political socialization; 3) agents and mechanisms of socialization; 4) role of early learning on later life behaviour; 5) approaches to the study of political leadership and elite socialization; 6) system level implications of political socialization; 7) problems and issues in the study of political socialization.

- **160-417B THE MILITARY AND POLITICS.** (3 credits; Prerequisite: 160-211D or consent of the instructor). Identification and comparison of the political and socio-economic roles played by professional military establishments in both the relatively modernized and the relatively non-modernized societies. The course will focus on the dynamics and impact of the military-industrial complex in the United States and Canada and on the significance of military coups and the performance of military regimes for the process of political modernization. The contributions of Janowitz, Huntington, Pye, Johnson, Lee, Bienen and Hurewitz will be considered.
Professor Latouche

- **160-418A ELITES AND POLITICS.** (3 credits; Prerequisite: At least one course in Canadian or Comparative Government and Politics). A critical examination of the major theoretical approaches to the study of elites (political, economic, intellectual, media, bureaucratic) and politics, and an evaluation of elite studies of Québec, Canada, the United States, Britain, France, and other societies. Research into problems of elites in different societies will also be conducted.

160-421B HONOURS SEMINAR: PROBLEMS IN CANADIAN POLITICS AND GOVERNMENT. (3 credits; Prerequisites: 160-221D and either 160-320A or 160-321B, or permission of the instructor). This seminar will enable advanced students to deal with selected problems of Canadian socio-economic and political structures; political culture; constitutional development, and governmental structure. In 1977-78 the course will treat constitutional, political, economic, cultural, social and public policy aspects of Canadian federalism since Confederation. Emphasis will be placed on public policy and political economy approaches.

160-422A HONOURS SEMINAR: THE POLITICS OF DEVELOPING AREAS. (3 credits; Open to honours students and to other advanced undergraduates with good records with the permission of the instructor; Prerequisite: At least one course in the politics of developing areas). This seminar will deal with selected topics in the fields of political development and the politics of developing areas. Students will be expected to undertake a research project.
Professor Kunz

- **160-423B POLITICS IN ITALY.** (3 credits). A critical examination of Italian political life and problems through political science and imaginative literature. Special emphasis on the nature and consequences of uneven political and economic development, the place and strategies of Fascist and Marxist parties, the relationship between church and state, the politics of stable instability and the Europeanization of Italian political problems.
Professor Sabetti

- **160-424A HONOURS SEMINAR: THE POLITICS OF DEVELOPED AREAS.** (3 credits; Open to honours students and to other advanced undergraduates with good records with the permission of the instructor; Prerequisite: At least one course in the politics of developed countries). This seminar will deal with selected topics in the politics of developed countries.

- **160-425B SELECTED TOPICS IN AMERICAN POLITICS.** (3 credits; Prerequisite: 160-325D). This course will involve a detailed analysis of a limited area of American politics and government. The topic for 1976-77 was investigation of the effects of mass inputs on public policy formation. The extent to which popular demands constrain policy makers in areas such as economic policy, social policy and energy policy will be explored. Conflicting models of policy influence will be evaluated. *This course is offered in alternate years.*
Professor Waller

160-426A POLITICAL ATTITUDES AND BEHAVIOUR IN QUEBEC. (3 credits). The major ideological currents in contemporary Québec politics: socialism, federalism independentism; political role of the trade union; the rise of popular groups; special attention will be given to the emergence of the independentist movement, its program, the socio-economic basis of its electoral support. (A reading knowledge and a minimal ability to understand spoken French are required; writing and speaking ability are not required.
Professor Latouche

160-428B POLITICS IN FRANCE. (3 credits; Prerequisite: Permission of instructor and some prior related course required, i.e. European History, Political Theory, and/or Comparative Politics). The distinctive characteristics of French politics in the comparative perspective of Western Europe and North America. Special emphasis on the politics of the welfare state in advanced capitalist societies; alternative explanations of public policy; liberal, pluralist and Marxist models; planning, nationalization, workers' self-management and other techniques for democratic control of the economy.
Professor Gourevitch

• **160-429B THE POLITICS OF SOUTH AFRICA.** (3 credits). This course will discuss the historical background, component cultures, social structure, social change, conflict, and political institutions and practices of South Africa.
Professor Shingler

160-431B POLITICS IN GERMANY: EAST AND WEST. (3 credits). A comparative study of the two German political systems, including their origins, governmental and power structures, public policies, and foreign relations.

160-433A HISTORY OF POLITICAL AND SOCIAL THEORY (III). (3 credits; Prerequisite: 160-231D). This course will deal with the political theories which underlay the French revolution, and with those to which it gave rise. It will begin with a discussion of the theory of Enlightenment and with a closer study of Rousseau. It will then continue with an examination of different reactions to the Revolution: those of Burke, de Maistre, and later that of de Tocqueville. It will also examine the development of themes launched by Rousseau and the French Revolution by the German Idealists, Kant, Fichte, Hegel. Finally it will examine the revolutionary streams which rise in the period: Marx and Marxism, and anarchist thought.
Professor Tully

160-434B HISTORY OF POLITICAL AND SOCIAL THEORY (IV). (3 credits. Recommended: 160-231D). A consideration of selected writers and themes of late 19th and 20th century political theory. Such topics will include the theoretical foundations of scientism and technology, the existentialist revolt, the political ideas of Freud and other depth psychologists, the theoretical foundations of modern social science, elite theory and implications for democracy, and other themes in political and social theory.

157-436A QUEBEC SOCIETY AND ITS INTELLECTUALS. (3 credits). What is the composition of the intellectual class of Quebec? Its historical evolution, its role in the political evolution of Quebec. The links between this class and its Canadian, American and European counterparts; the role of the Quebec scientific community. The development of intellectual institutions. Their modes of operation and their impact. Special consideration given to: (1) the postwar period, particularly the years of the "Quiet Revolution"; (2) movements such as *Cite Libre, Parti Pris,* the Secular Movement; (3) the catholic action of these movements. (A reading knowledge and a minimal ability to understand spoken French are required; writing and speaking ability are not required).
Professor Cloutier

160-441B INTERNATIONAL POLITICS AMONG ADVANCED INDUSTRIAL STATES. (3 credits). Changes in postwar international setting – the formation and politics of the European Economic Community, the rise of Germany and Japan, detente politics – have politicized economic issues. Increasing interdependence among advanced industrial states has affected domestic and foreign policy-making. What domestic requirements are there now for interstate agreements? The case of Canadian-American relations will be examined from the alternative perspectives of "realism" and "complex interdependence".
Professor Haskel

160-453A THE HISTORY OF BRITISH CONSTITUTIONAL THOUGHT. (3 credits; Prerequisite: 160-231D). A survey of the historical development of the British Constitution and the interpretation attendant upon its growth. Documents and writing to be studied include the Magna Carta, the Petition of Right, and the Bill of Rights, and the commentaries of Fortescue, Bracton, Coke, Selden, Blackstone, Burke, Bagehot and Dicey.
Professor Shingler

160-454B THE HISTORY OF BRITISH POLITICAL THOUGHT. (3 credits). An historical and textual examination of selected writers and themes in British social and political thought drawn from: Shaftesbury, Bolingbroke, Swift, Pope, Edmund Burke, Wordsworth and Coleridge.
Professor Shingler

157-456B L'ANALYSE DES POLITIQUES PUBLIQUES AU QUEBEC. (3 crédits). Peut-on parler d'une politique sociale, d'une politique de l'éducation, d'une politique de la culture au Québec?: problèmes de planification à court et à long terme au Québec; quels sont les facteurs qui président à la définition des politiques publiques au Québec; comment évaluer ces politiques; accroissent-elles ou diminuent-elles le degré de liberté individuelle et collective des Québécois; les systèmes de valeurs et idéologies qui sous-tendent ces politiques.
Professor Moore

160-460B POLITICAL IDEOLOGIES. (3 credits). A study of the origins, content and functions of ideologies, and their relationship to political action and institutions, through a comparative survey of some of the major political ideologies in the modern world.
Professor Kunz

160-461A HONOURS SEMINAR: POLITICAL THEORY. (3 credits; Open to honours students and to other advanced undergraduates with good records with the permission of the instructor). An in-depth examination of selected topics in political philosophy.
Professor Tully

160-465B THE POLITICS OF PLANNING AND POLICY MAKING. (3 credits). This course will take up: (1) cultural, ideological, political and organizational influences on policy-making; (2) problems in the logic of policy-making. Students will focus on a problem in policy-making in such areas as science, regional development, language, economics, management, etc.
Professor Haskel

160-466B PUBLIC POLICY ANALYSIS. (3 credits). This course will attempt to indicate some of the considerations particularly relevant to public policy anlaysis and how pbulic policy analysis can be applied to a study of contemporary problems. It will first present the principal traditions in political science concerned with the study of public policy and the theoretical developments in sociology of knowledge, cybernetics, law, public finance, Canadian political economy and educational psychology which have special significance for the study of public policy. The approaches that are developed will then be applied to analyse political problems in North American and Western European Societies and to conceptualize alternative solutions to these political problems. The topics for analysis will include consumers in the modern regulatory state, local-provincial-national relations in policy implementation, natural resources and political development as well as political corruption.
Professor Sabetti

160-467B SCIENCE, TECHNOLOGY AND POLITICS. (3 credits; Recommended: 160-465A and/or 160-466A). In this course the relationship between science and technology on the one hand and government and politics on the other will be examined. Some of the topics include science as a political phenomenon, science and public policy, scientists as political actors and technology and political thought. *Offered in alternate years.*
Professor Waller

- **160-471A THE ANALYSIS OF RAPID SOCIAL CHANGE.** (3 credits; Prerequisite: For majors and honours students only, or consent of instructor). This is a seminar in which various theories of revolution will be analysed with reference to the empirical reality of revolutionary phenomenon. The course will follow a comparative perspective with the goal being evaluation of revolutionary explanation and an attempt to formulate alternative theories.

- **160-475B HONOURS SEMINAR: INTERNATIONAL POLITICS.** (3 credits; Open to honours students and to other advanced undergradutates with good records with the permission of the instructor; Prerequisite: At least one course in International Politics beyond the 200 level). A research oriented seminar dealing with selected topics in the field of International Politics and Foreign Policy.

160-490A/160-491B INDEPENDENT READING AND RESEARCH. (3 credits each). Final year honours students wishing to pursue a specialized interest will be allowed to undertake a program of independent reading and/or research in that area under the supervision of a member of staff. Such programs may be undertaken by students either individually or in small groups. It is the responsibility of the student(s) to obtain the instructor's consent prior to registration.

160-494A HONOURS SEMINAR: INTERNATIONAL: POLITICS. (3 credits; Open to honours students and to other advanced undergraduates with good records with the permission of the instructor). A seminar for advanced undergraduates in international relations in basic principles of research design. Students will be introduced to the concepts of research design and research methods. They will prepare a research report, using primary materials, on a problem in international relations. Students will also assist in the teaching of the introductory course, so that they will both teach and do research in international relations.
Professor J. Stein

PSYCHOLOGY (204)

Room W8/1, Stewart Biological Building, 1205 McGregor Ave., Montreal, P.Q., H3A 1B1. Telephone: 392-4708.

Psychology is the scientific study of man's mind and behaviour. It is both a social and a biological science. As a social science, psychology studies man in his interactions with other members of his own species. As a biological science, it regards man as the product of evolution and so studies him in biological perspective, comparing and contrasting his behaviour with that of other species.

The data of psychology are collected within the psychological laboratory by the use of experimental methods in the study of behaviour, and outside the laboratory by systematic observation of the behaviour of man and lower animals. The combination of experimentation and observation results in a knowledge of man's behaviour as he perceives his world, learns, directs his behaviour towards certain goals, and reacts to stress, frustration, and other men. Experimentation, laboratory techniques, observational procedures, measurement and statistical methods are important tools of the psychologist in the study of behaviour.

Psychology has many interdisciplinary aspects. The study of many psychological problems involves knowledge drawn from other disciplines such as biology, physiology, linguistics, sociology, philosophy, and mathematics. For this reason a student with varied interests can frequently find a place for these interests in psychology.

Psychology is a young science so that explanations of the processes underlying observed phenomena are often theoretical and speculative. The major objectives of psychological study are to reduce the discrepancy between theory and fact and to provide better answers about why man thinks and behaves as he does.

Although a number of undergraduate courses in psychology have applied implications, applied training is in no way the purpose of the undergraduate curriculum. The purpose of that curriculum is to introduce the student to an understanding of the basic core of psychological knowledge, theory, and method, regardless of questions of practical application.

The B.A. or B.Sc. with a Major or Honours degree in psychology is not a professional qualification. It does not qualify the individual to carry on professional work in psychology. In the Province of Québec the minimum requirement for membership in the Corporation of Psychologists of the Province of Québec, the professional association governing the work of psychologists in the Province, is an M.A. or M.Sc. degree, or other equivalent degree.

All students planning to practice in the Province of Québec will be examined on their proficiency in French before being admitted to the professional association.

Although requirements for admission to graduate studies in psychology vary from one university to another, both the Honours and Major degrees in psychology may qualify the student for admission to many graduate schools, provided of course that sufficiently high marks are obtained.

The essential difference between the Honours and the Major program is that higher standards are required of Honours students. Honours students also have an opportunity to work in small groups closely with staff members.

PSYCHOLOGY INFORMATION MEETINGS

All students entering Psychology undergraduate programs are required to attend an information meeting that will be held at 10:00 am on Wednesday, August 31 in Room S1/4 of the Stewart Biology Building for Arts students, and at 10:00 a.m. on Thursday, September 1 in Room S1/4 of the Stewart Biology Building for Science students. Before attending the meeting, students must read the Announcement of the Faculties of Arts and Science and the 1977-78 edition of the Psychology Department Handbook. The latter will be available in the Departmental Advising Office from about the beginning of July. Out-of-town residents can have a copy of the Handbook mailed to them upon written request to the Psychology Department.

The main purpose of the information meeting is to instruct students about filling in the Study Plan Forms and to provide further information about Psychology programs. After the meeting, students can meet individually with advisers in order to have their Study Plan Forms approved for registration. In exceptional cases, students who are unable to attend the information meeting may consult an adviser earlier. Call the Departmental Advising Office at 392-4694 for further information. Students **must** read the Announcement and the Handbook before seeing an adviser.

PROGRAM INFORMATION

The Psychology Department offers 13 different options in its 54 credit programs. Except where otherwise stated, each of these programs may be taken as Major, Honours or Faculty programs. The differences between these three categories of programs are outlined below. The descriptions of the 11 options available in the B.A. program follow. See page 204 for descriptions of the options available only in the B.Sc. program.

Prerequisites. It is expected that most students who major in psychology will have taken introductory psychology and statistics at the collegial level. In the First year all Major students must take Psychological Statistics (204-305A or B). Those students who have not taken a college level statistics course must also take Psychology 204-204A or B in addition to the other courses in their program.

Psychology 204-201D, or its equivalent, is normally a prerequisite for all 300, 400 and 500 level courses in psychology.

MAJOR PROGRAM

The following options are available in the Major program in Psychology:

1. General Psychology
2. Experimental Psychology
3. Child Psychology
4. Personality and Abnormal Psychology
5. Social Psychology
6. The Psychology of Language
7. Psychology in Relation to Problems in Education
8. Major in Psychology and Philosophy
9. Quantitative Psychology
10. Organizational Psychology
11. Psychobiology

Call the Chief Adviser, Mr. Arnold Rosner (392-4694) for an adviser. In the first year of any of the above programs all Major students take Psychology 204-305A,B. Detailed descriptions of the programs will be found on page 204. Students majoring in Psychology must obtain a minimum grade of C in all 54 credits required by their program. A grade lower than C may be made up by taking another equivalent course (if there is one), by successfully repeating the course, or by successfully writing a supplemental examination (if there is one).

HONOURS PROGRAM

Honours in Psychology prepares students for graduate study, and so emphasizes practice in the research techniques which are used in graduate school and professionally later on. Honours students take Psychology 204-380D in the first year (normally U2) of their program, and they take Psychology 204-480D and 204-481D in the second year (normally U3). These courses have limited enrolment, and admission to Honours is selective. There is normally room for 30-35 new Honours students each year. Students with a cumulative grade point average of 2.8, or better, are eligible to apply. However, during the past several years it has been

possible to accept very few students with averages below 3.5.

Students are accepted into Honours at the beginning of U2, and the two-year sequence of Honours courses continues through U3.

Application forms can be obtained from the general office of the Department of Psychology, Room W8/1, Stewart Building. They must be completed and returned to the general office by 1 September of the year for which admission to Honours is sought. Candidates will be advised of the department's decision by letter shortly after September 1.

JOINT HONOURS IN PSYCHOLOGY AND LINGUISTICS

Required Courses:

Psychology 204-305A,B, 340A, 341B, 380D, 425A, 480D, 481D. Linguistics 104-200A,B, 201A,B, 241B, 350A, 351B, 360A, 361B, 425A, 490A. Note: Students are required to take Psychology 204-425A *or* Linguistics 104-425A, but *not* both.

FACULTY PROGRAMS

A Faculty Program in Psychology is a sequence of courses which represents a lesser degree of specialization than a Major or an Honours program. A Faculty Program may be made up of any of the Major programs with the substitution of 6 credits from U2 Psychology courses for Psychology 204-211D and 204-305A or B. The Joint Program in Psychology and Mathematics is also a faculty program. For further details see program information at the beginning of the Arts section.

PROGRAM DESCRIPTIONS

The courses in the programs are ordered sequentially so that it will normally take three years to complete a program. The Major and Faculty Programs all include 18 credits in each of U1, U2, and U3. Students may, with the consent of their Faculty Adviser, substitute up to 6 credits in a program. Any further changes must be approved by the Associate Dean of the Faculty.

When selecting optional program courses from other departments, it is the student's responsibility to see that he or she has taken the appropriate prerequisites and/or obtained permission of the department where necessary.

None of the B.A. or B.Sc. programs provides professional training. They are all intended to give the student a general academic background in the interest area indicated by their titles. Those who are interested in practising psychology professionally must obtain graduate degrees at least at the Master's level, and should preferably continue on to the Ph.D. The Honours programs are most specifically designed to train students who intend to go to graduate school. However, it is important to remember that admission to graduate studies is highly competitive, and that no degree guarantees entry to advanced study. Students with a Major in Psychology may also, if they have chosen their courses appropriately and obtained high enough standing, be admitted to graduate studies, although they may sometimes be required to complete a qualifying year. Students in Faculty programs who decide to go into graduate study in psychology will most probably have to complete a qualifying year first. Further information about advanced study in Psychology may be obtained from the American Psychological Association's Handbook on the topic. It is usually on sale in the University Bookstore.

COURSES IN THE FACULTY OF MANAGEMENT

The Faculty of Management offers the following courses in the Behavioural Sciences: 280-221A, Behavioural Science I (3 credits); 280-222B, Behavioural Science II (3 credits); 272-420A, Group Dynamics and Interpersonal Relations (3 credits); 272-421B, Strategies of Management and Organization Development (3 credits); 275-458A, Consumer Behaviour (3 credits); 275-495A, Marketing Research (3 credits). Students must pick up section slips for Management courses from the Management Office, Room 453, Samuel Bronfman Building.

Where appropriate to a student's program, and with the permission of the program adviser, one or more of these courses may be taken for credit by students enrolled in programs in psychology. Programs in such fields as personnel management, administrative behaviour, and consumer behaviour are also available to students through a cooperative arrangement between the Faculty of Management and the Department of Psychology.

GRADUATE STUDY

The adviser to Major students will, whenever possible, assist students in planning their courses to coincide with their professional aims. Most graduate schools require not only a record of high achievement, but also adequate performance on some entrance examinations such as the Graduate Record Examination and the Miller Analogies Test, as well as letters of recommendation.

MAJOR PROGRAM

B.Sc. students must select at least 54 credits in Science courses among the 90 credits required for the B.Sc. degree.

General Psychology Option

This program is intended to give maximum flexibility to students in choosing their own courses. In this 54 credit program at least 36 and as many as 54 credits must be in psychology courses. The program must include Psychology 204-305A,B and 9 credits

in 400 level psychology courses. If fewer than 54 credits in psychology are taken, then the difference between that number and 54 must be made up by selecting courses in other departments from the following list (since the list may not be up to date in September, the relevant department should be consulted before choosing).

Anatomy 504-321A; Anthropology 151-202B, 203A, 206A, 228A, 303B, 305B, 312A, 316A, 321B, 428B, 437B, 440A; Biochemistry 507-455B; Biology 177-111A, 112B, 201D, 205D, 274A,B, 303A, 305A, 325A, 326B, 351B, 352A, 370B, 372B, 385B, 386A, 391A, 392B, 394B, 476B, 493B, 588A; Computer Science 308-220A,B; Geography 183-214A, 215B, 217B, 300B; Linguistics 104-200A,B, 104-201A,B, 230A, 241B, 321B; Mathematics 189-120A,B, 121A,B, 217A, 218B, 223A, 224A, 224B, 314A,B, 317A, 318A, 323A,B, 324A,B, 327B, 328B, 417A, 423A, 424B, 447B; Philosophy 107-210A,B, 211B, 313D, 321D, 322D; Physiology 552-201A,B, 202B, 211D; Sociology 166-210A or 212A, 223B, 225B, 227A, 247B, 303A, 309A, 417B.

Experimental Psychology Option

U1 Courses: Psychology 204-211D, 305A-B; plus 12 credits selected from 200 and 300 level courses for which you have the prerequisites.

U2 Courses: At least 9 credits from: Psychology 204-300A, 301B, 302A, 303B, 308D plus enough credits from the following list to make up 18: Psychology 204-311A, 309B, 335A, 336B, 340A, 341B, 342A.

U3 Courses: Psychology 204-400B, 403A plus 12 credits selected from: Psychology 204-401D, 416A, 417B, 403B, 404B, 406B, 407A, 423A, 424B, 425A, 430B, 450D.

Note: The former cognition and thinking option has been subsumed under the Experimental Psychology Option. Students particularly interested in the broad area of cognitive psychology (human problem solving, intelligent action, language, thinking, etc.) as a background for education, assessment of intelligence, mental retardation, and so on, are encouraged to take the following courses:

Psychology 204-302A, 303B, 311A, 340A, 341B, 401D, 404B, 407A, and 425A. They are also strongly encouraged to take courses in linguistics, philosophy (especially logic), and mathematics (eg: calculus, algebra, mathematical logic, computability and mathematical linguistics.)

Child Psychology Option

Students are encouraged to choose their electives from outside the Psychology Department.

U1 Courses: Psychology 204-211D, 305A,B, 304D; plus 3 credits selected from: Psychology 204-300A, 301B, 302A, 303B; plus 3 credits, selected from Sociology, Anthropology, Linguistics, and Biology.

U2 Courses: Psychology 204-413D, or 414D; plus 6 credits selected from Psychology 204-300A, 301B, 302A, 303B, 306A, plus 3 credits selected, from psychology courses; plus 3 credits, selected from Sociology, Anthropology, Linguistics, and Biology.

U3 Courses: Psychology 204-413D, or 414D; plus 6 credits, selected from any 400 level courses in psychology; plus 6 credits, selected from Sociology, Anthropology, and Biology.

Personality and Abnormal Psychology Option

Students are encouraged to choose their electives from outside the Psychology Department.

U1 Courses: Psychology 204-305A,B; plus 9 credits to be selected from: Psychology 204-211D, 300A, 301B, 302A, 303B, 308D; plus 6 credits to be selected from departments other than psychology, in consultation with adviser.

U2 Courses: Psychology 204-332A, 337A, 338B; plus 3 credits to be selected from: Psychology 204-211D, 300A, 301B, 302A, 303B, 308D (which have not already been taken); plus 6 credits to be selected from departments other than psychology, in consultation with advisor.

U3 Courses: 6 credits to be selected from: Psychology 204-408A, 412A, 434B, 451D, 458B, 491D; plus 12 credits from 400 level psychology courses. Students are advised *not* to take both 451D and 491D.

Social Psychology Option

U1 Courses: Psychology 204-305A,B plus 6 credits selected from: Psychology 204-201D, 300A, 301B, 302A, 303B; plus 9 credits selected, in consultation with adviser, from such departments as Anthropology, Sociology, Economics, Political Science, Philosophy and Linguistics.

U2 Courses: Psychology 204-330A, 331B plus 12 credits selected in consultation with adviser from Psychology 300 level courses.

U3 Courses: Psychology 204-411D; plus 6 credits selected in consultation with adviser from Psychology 400 level courses; plus 6 credits selected in consultation with adviser from such departments as Anthropology, Sociology, Economics, Political Science, Philosophy and Linguistics.

NOTE: The total number of psychology credits required for this program is 39 out of 90. The professors in charge of the program feel that this proportion provides a sound coverage of the field and that the student would be wise to choose his or her alternatives from a wide variety of disciplines in the University.

Psychology of Language Option

NOTE: Honours students will have a timetable conflict between Linguistics 360A, 361B, and Psychology 480D if all are taken in the U3 year and it is suggested that the Linguistics courses be taken in the U2 year.

U1 Courses: Psychology 204-305A,B; Linguistics 104-200A,B, 201A,B, plus 3 credits to be selected from the following optional courses: Linguistics 104-230A, 241B; Philosophy 107-210A, 211B.

U2 Courses: Psychology 204-340A, 341B; Linguistics 104-350 plus 9 credits to be selected from the list of optional courses under U1 or from the following list: Psychology 204-301B, 302A, 303B, 304D, 310A; Linguistics 104-321B, 351B; Philosophy 107-370A, 371B.

U3 Courses: Psychology 204-425A, 455D; Linguistics 104-360A, 361B; plus 3 credits to be selected from optional courses listed under U1 and U2 or: Psychology 204-401D, 404B, 406B, 400B, 403A, 413D; Linguistics 104-430A or 431B, 461B, 490A; Philosophy 107-588A, 589B; Mathematics 189-328B; Anthropology 151-440A; Sociology 166-217A.

Psychology in Relation to Problems in Education

U1 Courses: Psychology 204-305A,B; plus 2 credits selected from Anthropology 151-228A; Educational Psychology 414-205A,B, 414-208A,B, 294B; plus 12 credits from U2 psychology courses (this may include Psychology 204-211D.

U2 Courses: Psychology 204-301B, 304D plus 9 credits from 302A, 303B, 330A, 204-310A, 313A, 332A, 337A, 341B; Anthropology 151-428B; Educational Psychology 414-305B, 340A,B, 377A,B, 394A.

U3 Courses: Psychology 204-406B, Educational Psychology 414-402D plus 9 credits from Psychology 204-451D, Educational Psychology 446X,Y, 456A, 492X, 495B, or any U2 level course in list.

Major in Philosophy and Psychology

U1 Courses: Psychology 204-305A,B; Philosophy 107-200A, 201B, plus 9 credits to be selected from: Philosophy 107-210A, 107-354A, 355B, 356A, 357B; Psychology 204-201D, 211D.

U2 Courses: Philosophy 107-230A, 302B; Psychology 204-302A, 303B; plus 3 credits to be selected from: Philosophy 107-300A, 360A, 361B, 366A, 367B; Psychology 204-340D, 301B, 337A, 330A, 332A

U3 Courses: Philosophy 107-321D, 494B; Psychology 204-400B, 403A; plus 6 credits in either Psychology or Philosophy selected in consultation with adviser.

Quantitative Psychology Option

U1 Courses: Mathematics 189-222A,B, 245A,B; Computing Science 308-200A,B, or 220A,B; plus 6 credits to be selected from Psychology 204-201D, 302A, 303B.

U2 Courses: Mathematics 189-323A,B, 324A,B; plus 3 credits selected from Mathematics 189-314A,B, 317A, 318A, 327B, 328B; plus 9 credits selected from Psychology courses (other than 204-204A,B; 305A,B), which must include Psychology 204-302A, 303B if not taken in U1.

U3 Courses: Psychology 204-335A, 336B; Mathematics 189-423A, 424B, 417A, 447B; plus 6 credits selected from psychology courses other than Psychology 204-204A,B; 305A,B.

Organizational Psychology Option

U1 Courses: Psychology 204-301B, 300A, 305A,B; Sociology 166-217A; Management 280-221A,B or Psychology 204-330A. (For Organizational Psychology majors, this course is a prerequisite to all other Management courses. Hence, this must be taken in U1 year, winter term.)

U2 Courses: Psychology 204-331B; Plus 6 credits to be selected from: Psychology 204-302A, 303B, 406B, 309B, 403A, 433B, 332A; Plus 9 credits from the following courses: Management 280-222B*; Management 272-420A*; Management 280-323A,B, 280-352A,B

*Both 280-222B and 272-420A are Psychology courses offered to Management students.

U3 Courses: Psychology 204-411D; Plus 6 credits selected from: Psychology 204-400B, 403A, 450D, 401D; plus 9 credits selected from: Management 272-423A, 425A, 421B, 422A; Management 275-451A,B, 452A; Management 276-465A.

Note: Students taking Management courses must pick up section slips from the Management office, Room 453, Samuel Bronfman Building.

Psychobiology Option

U1 Courses: Psychology 204-305A,B plus 15 credits selected from: Psychology 204-201D*, 211D, 300A, 301B; Biology 177-205D, Physiology 552-211D or 201A, 202B.

*Must be taken by students who have not taken two terms of introductory psychology at the CEGEP level or its equivalent. May not be taken by students who have met this requirement.

U2 Courses: Psychology 204-308D plus at least 9 credits selected from: (6 psychology credits from U1 list may be substituted) Psychology 204-302A, 303B, 306A, 311A, 321A, 337A, 342B; plus at least 6 credits selected from: Biology 177-201D, 305A, 318B, 386A, 389B, 391A, 392B; Anatomy 504-421A; Computer Science 308-220A,B.

U3 Courses: At least 6 credits selected from: Psychology 204-422A, 423A, 424B; plus 12 credits selected from: (6 credits from the U2 list may be substituted) Psychology 204-404B, 407A, 430B; Biology 177-588A, 493B; Pharmacology 549-461D.

Course Descriptions

See Psychology in Science section of Announcement.

RELIGIOUS STUDIES (260)

Professors – C.J. ADAMS; S.B. FROST; G. JOHNSTON; J.C. KIRBY; J.C. McLELLAND
Associate Professors – J.A. BOORMAN; R.C. CULLEY; D.J. HALL; H.K. MARKELL; M. PEASTON; D.R. RUNNALLS; R.W. STEVENSON
Assistant Professors – K.K. YOUNG
Visiting Professor – G. BAUM

William and Henry Birks Building, 3520 University Street, Montreal, PQ, H3A 2A7, Telephone: 392-4822.

Courses are offered to students in other Faculties and Schools in the University through the Faculty of Religious Studies. They may be taken as individual electives, or through the Major and Honours programs in Religious Studies which can lead to teaching, social work, professional religious service, and graduate study in religion or theology. Religious Studies courses may be usefully combined with other concentrations, e.g. Art History, Classics, Jewish Studies, History, Philosophy

For general information on courses and Major and Honours programs, consult the Adviser, Professor Stevenson, Room 108, 392-4822. For specific course information consult the instructor.

Majors and Honours students must consult the Adviser prior to registration each year.

MAJOR IN RELIGIOUS STUDIES

A Major in Religious Studies consists of 54 credits as follows:

1) At least 36 credits are to be chosen from the Religious Studies courses described below. (Major Students may choose their courses from the list below; but also from the B.Th. program in the Faculty of Religious Studies and certain courses in the Jewish Studies Program, after consultation with the Adviser.) Students must choose at least one full course (6 credits) in a tradition other than their own.
2) Up to 18 credits to be chosen from approved Related Courses (see below).

INTERDISCIPLINARY MAJOR

The Interdisciplinary Major programs may be arranged in consultation with the Adviser. Joint programs are in operation between Religious Studies and Classics, Philosophy and Art History.

HONOURS IN RELIGIOUS STUDIES

The Honours program in Religious Studies offers a degree of analysis and concentration beyond that of the Major program through course work, intensive research and discussion with peer groups.

There are no prerequisites for entry to the program which will normally be at the beginning of the first year. Students must maintain a GPA of 2.8; or 3.5 for First Class Honours.

The program consists of a minimum of 66 credits chosen as follows:
1) At least 48 credits from the Religious Studies courses described below. (Honours students may also choose from the B.Th. program in the Faculty of Religious Studies Announcement, and certain courses in the Jewish Studies Program, after consultation with the Adviser. In special cases, permission may be given for admittance to graduate seminars in the Faculty of Religious Studies.) Among these the following are required: 201-202B and 252-253B in U1; the Methodology Colloquium (6 credits) in U3; one course (6 credits) in a religious tradition other than the student's own in U2 or U3.
2) Up to 18 credits from approved Related Courses (see below).

JOINT HONOURS PROGRAMS

Programs may be arranged in consultation with the Adviser.

Course Descriptions

260-201A RELIGIOUS TRADITIONS OF THE ANCIENT NEAR EAST I. (3 credits). The religions of ancient Egypt, Mesopotamia and Canaan; a brief consideration of religion in general, its origin, nature and study; a consideration of the geographical, historical and cultural conditions which influenced religious expression; myth and ritual. (Not open to students who have taken 260-200D).
Professor Runnalls

260-202B RELIGIOUS TRADITIONS OF THE ANCIENT NEAR EAST II. (3 credits; Prerequisite: 260-201A or its equivalent). The religion of ancient Israel in the setting of the Ancient Near East; from Abraham to Ezra; continuity and discontinuity with Egypt, Mesopotamia, and Canaan.
Professor Runnalls

260-252A HISTORY OF RELIGION I. (3 credits). An introduction to the subject; a survey of the main elements of Islam and the Hindu tradition.
Professor Young

260-253B HISTORY OF RELIGION II. (3 credits). An introduction to the Buddhist, Confucian, Taoist and Shinto traditions of Asia.
Professor Young

260-257D INTRODUCTORY SANSKRIT. (6 credits). To develop basic language and reading skills.
Professor Hejib

260-258D INTRODUCTORY PALI. (6 credits). To develop basic language and reading skills.
Professor Hejib

260-280D NEW TESTAMENT GREEK. (6 credits). An introduction to the language.
Professor Kirby and Staff

260-300A POST-BIBLICAL JEWISH TRADITION. (3 credits). The origins of Rabbinic Judaism: a survey of Jewish history and thought from Ezra to the Tannaim; oral tradition; Torah interpretation in the Mishnah and Midrashim.
Professor Runnalls

260-301B POST-BIBLICAL JEWISH TRADITION. (3 credits; Prerequisite: Religion 300A or the consent of the instructor). The religion and literature of sectarian groupings: Apocalyptic thought; Wisdom; Dead Sea Scrolls; Josephus.
Professor Runnalls

260-310D THE NEW TESTAMENT – ITS MAKING AND MEANING. (6 credits). The beginnings of the Christian Movement; the mission and achievement of Jesus. Early Christian Missions and the growth of institutions. Religion 260-201A and 260-202B are desirable but not mandatory previous courses. Critical approaches studied through modules (about one quarter of the course work).
Professor Kirby

260-320D A HISTORY OF CHRISTIAN THOUGHT. (6 credits). A survey of the development of Christian thought from the post-apostolic period to the present day, in relation to the concurrent cultural and philosophical movements. The work of prominent Christian thinkers, ancient, medieval and modern, will receive special attention.
Professor Hall

260-322A THE ANCIENT CATHOLIC CHURCH (TO A.D. 325). (3 credits). This course covers the growth of the Christian tradition in the period from the reign of Nero to the Council of Nicaea A.D. 325. Special attention is paid to the setting within Roman Imperial History. Lectures are given on the outstanding teachers of the faith.
Professor Johnston

260-323B THE ANCIENT CATHOLIC CHURCH (A.D. 325-604). (3 credits). This course is a continuation of 322A and covers the period from A.D. 325 to 604. Special attention is paid to the development of Christian theology, the Eastern Byzantine Church and the significance of the Papacy.
Professor Johnston

260-335A THEOLOGICAL ANTHROPOLOGY. (3 credits). Is the process of becoming a religious person within the Christian tradition part of the same process as becoming more fully human? Three world-views operative in contemporary North America will be studied along with their theological implications. *Not offered 1977-78.*
Professor

260-336B CONTEMPORARY THEOLOGICAL ISSUES. (3 credits). Theological method – scriptural, doctrinal, correlation – is utilized to reflect on such problems as liberation and development (problems studied may differ from year to year). This study emphasizes how theological perspectives differ from and complement positions assumed by other disciplines. *Not offered 1977-78.*
Professor

260-338A PERSPECTIVES ON WOMAN IN THE CHRISTIAN TRADITION. (3 credits). *Not given in 1977-78.* Perspectives on woman operative today within the Christian tradition have their roots in the early, medieval and contemporary periods of Western thought. A theological critique of these perspectives will be done within the context of human liberation. *Not offered 1977-78.*
Professor

260-339B HINDU AND BUDDHIST IMAGES OF THE FEMININE. (3 credits). *Not given in 1977-78.* An analysis of the richness (and ambivalence) of feminine imagery from three perspectives: *mythic* (goddesses, epic figures); *philosophic* (material nature, the power to create, wisdom, compassion); *human* (mothers, wives, daughters, temptresses, nuns).
Professor Young

260-340B RELIGION AND THE SCIENCES. (3 credits). Philosophies of science and of religion have created a more positive dialoque on questions of method, symbolism and rationality. We examine key issues (e.g. creation and evolution; objectivity and involvement; determinism and freedom) raised by natural and social sciences, and various possible solutions.
Professor McLelland

260-345A RELIGION AND THE ARTS. (3 credits). *Not given in 1977-78.* Myths and symbols approached through literary criticism to examine art forms as self-images, social critique and forms of ultimate concern: concentration on Western culture.
Professor McLelland

260-346B MYTH AND SYMBOL IN HINDU AND BUDDHIST ART. (3 credits). *Not given in 1977-78.* Explores Hindu concepts of deity and the cosmos through slides of Vishnu, Shiva, the Goddess, and temple architecture. Analyses the Buddha's life, samsara as man's predicament and nirvana as man's goal through Asian art.
Professor Young

260-351A PHENOMENOLOGY OF RELIGION. (3 credits). A cross cultural comparison of a religious theme (to vary each year).
Professor Young

260-357D INTERMEDIATE SANSKRIT. (6 credits; Prerequisite: 260-257D or permission of instructor). Advancement of grammar and vocabulary with readings in epic and similar texts.
Professor Hejib

260-358D INTERMEDIATE PALI. (6 credits; Prerequisite: 260-258D or permission of the instructor). Advancement of grammar and vocabulary with readings in selected texts.
Professor Hejib

260-361A RELIGIOUS BEHAVIOUR. (3 credits). *Not given in 1977-78.* A study of some significant aspects of religious life (e.g. meditation, mysticism, symbolism) and of some contemporary religious phenomena (e.g. the charismatic movement, glossolalia). A glance at Augustine's *Confessions*, at the Freudian and Jungian approach, and a note on religious growth prepare the way for an interpretation of the meaning of mature faith.
Professor Peaston

260-370B THE HUMAN CONDITION. (3 credits). An examination of representative theories about man, his situation and his values in the light of traditional interpretations of Christian anthropology and ethics, and some contemporary clues in response to man's search for meaning.
Professor Boorman

260-380D ADVANCED NEW TESTAMENT GREEK. (6 credits). Advanced course in the language with reading of selected biblical texts.
Professor Kirby

260-390D HEBREW LANGUAGE. (6 credits). Introduction to the language.
Professor Runnalls

260-450D THE ISLAMIC TRADITION. (6 credits). The Islamic Community and the elements of its tradition – scripture, prophet, doctrine, practices, institutions – considered historically and in terms of religious meaning.
Professor Adams

260-451D THE HINDU TRADITION. (6 credits). An introduction to the Hindu religious tradition, its history, faith and practice.
Professor Stevenson

260-454B MODERN HINDU THOUGHT. (3 credits; Prerequisite 260-451D or permission). A study of the developments in religious thought with special reference to Ram Mohan Roy, Dayananda Saraswati, Ramakrishna, Vivekananda, Gandhi, Tilak, Aurobindo, and Radhakrishnan.
Professor Stevenson

260-455D BUDDHISM. (6 credits). Life and teachings of the Buddha, the development of Indian Buddhism with special reference to the Theravada and Mahayana traditions, the expansion of Buddhism outside India.
Professor Young

260-456A BUDDHISM. Independent Research and Tutorial. (3 credits). *Not given in 1977-78.* Permission for the course to be granted by the instructor.
Professor Young

260-457D ADVANCED SANSKRIT. (6 credits; Prerequisite: 260-357D or permission of instructor). Critical reading of selected Sanskrit texts.
Professor Hejib

260-490D ADVANCED BIBLICAL HEBREW. (6 credits).
Staff

260-496A,B SPECIAL STUDIES. (3 credits). Topics to be arranged.
Staff

260-497A,B RESEARCH SEMINAR. (3 credits).
Staff

260-498A,B SPECIAL STUDIES. (3 credits). Topics to be arranged
Staff

260-499A,B RESEARCH SEMINAR (3 credits).
Staff

260-500D METHODOLOGY COLLOQUIM. (6 credits). An introduction to the history of the study of religion, an examination of methodologies, and the practical application of these methods on a cross-cultural theme.
Staff

Languages

Arabic is taught by the staff of the Institute of Islamic Studies and students taking it must fulfil the requirements of the Institute.

Students taking other introductory language courses in Religious Studies programs are strongly advised to take the advanced course also.

Instruction in the languages of some other religious traditions (such as Ancient Egyptian) may be available in any given year. Ask the Adviser for further information.

397-110D ELEMENTARY ARABIC. (6 credits).
Staff

397-220D INTERMEDIATE ARABIC. (6 credits).
Staff

397-300D ADVANCED ARABIC. (6 credits).
Staff

RUSSIAN AND SLAVIC STUDIES (141)

PROFESSOR – J.G. NICHOLSON *(On leave 1977-78)*
Visiting Professor – R.V. PLETNEV
Associate Professors – P.M. AUSTIN; A. FODOR
Assistant Professors – LUDMILA BAUER; IRENE PAVILANIS

Room 660, Samuel Bronfman Building, 1001 Sherbrooke St. West, Montreal, PQ, H3A 1G5, Telephone: 392-4616.

Many opportunities are open to students with qualifications in Russian and other Slavic studies. Students may be interested in the organization of human society, comparative literature, linguistics. Russian studies are highly relevant to all of these. In addition, because of similar problems in geography,

climate, industrial and economic growth Russian studies may have a particular fascination for the Canadian student.

MAJOR PROGRAM

The Major program consists of at least 54 credits (of which at least 42 must be in Russian, preferably twelve credits in U-1, twelve in U-2 and 18 credits in U-3). Various sequences of courses are possible but close consultation with the Department and approval of proposed sequences is essential. Please consult the office at 392-4610 or 392-4616. Admission is based on personal interviews to establish how much Russian has been taken previously, if any, and to work out a reasonable sequence for the individual.

HONOURS PROGRAM

The Department offers a full Honours program in Russian. Single Honours in Russian require at least 10 courses (60 credits) in Russian to be taken during the three university years out of a total of 15 required courses (90 credits). In addition, at least a second class average (B) must be obtained. All Honours programs require consideration and approval by the Department. Normally 200 level courses are taken in U-1, 300 level ones in U-2 and 400 level courses in U-3. However, many exceptions may occur depending on students' abilities. Telephone 392-4610 or 392-4616 for information.

JOINT HONOURS PROGRAMS

The Department also offers Joint Honours programs in cooperation with the Departments of Classics, French, Geography, German, Hispanic Studies, History, Italian, Linguistics, Political Science. These programs also require an overall total of 90 credits with a B average over the three university years. Two courses (12 credits) in Russian and two (12 credits) in the cooperating Department are normally taken each year. As in Single Honours and Majors all programs require consideration and approval by the Departments involved. For information telephone 392-4610 or 392-4616.

Course Descriptions

141-210D RUSSIAN LANGUAGE. (6 credits; Text: to be announced). Reading, grammar, translation, oral practice.
Staff

141-212D RUSSIAN READING COURSE. (6 credits). Method and practice of translation. The first half of the course will be devoted to an introduction to Russian, the second half to actual translation of texts from various fields of interest. This course is intended for students wishing to learn to read Russian easily.
Staff

141-215D RUSSIAN LANGUAGE INTENSIVE. (12 credits). Intensive language course, covering the first two levels in one year rather than the usual two. Students may, at the discretion of the Department, revert to Russian 210D after four weeks at the latest. Note that such a transfer has credit implications.
Professor Bauer and Staff

141-217B ACCELERATED INTRODUCTION TO RUSSIAN STUDIES. (3 credits; Prerequisite: Evidence of ability in modern or classical languages and Departmental permission). This course is intended for the student who has already shown ability in modern or classical languages, and who wants to obtain a good knowledge of Russian language, literature and civilization in a short time. Successful completion of this course will normally permit students to take the higher level courses in Russian.
Professor Nicholson and Staff

141-218A SOVIET LITERATURE (UP TO WORLD WAR II). (3 credits; Prerequisite: None). The social conditions leading to the creation of post-revolutionary literature. What does the West understand by "socialist realism" and what does this term mean in Russia? The period of different literary schools in Soviet literature and the organization of the Writers' Union. Specific features of the literature of the thirties. This course will be conducted in English.
Professor Fodor

141-219B SOVIET LITERATURE (AFTER WORLD WAR II). (3 credits; Prerequisite: None). The impact of World War II on Soviet literature. Postwar changes in official literary policy; "Zhdanovism." The period of "thaw," and debates on the principles of creative freedom. The three Nobel prize winners. The emergence of young writers with new voices. This course will be conducted in English.
Professor Fodor

141-220D RUSSIAN LANGUAGE. (6 credits; Prerequisite: Russian 210D or equivalent; Text: Stilman and Harkins, *Introductory Russian Grammar)* Reading, translation, conversation.
Staff

141-222D RUSSIAN CIVILIZATION IN THE TWENTIETH CENTURY. (6 credits; Prerequisites: Russian 210D or equivalent and permission of the Department). This is an introduction to the changing relationships between Russian language, literature, thought and culture in the twentieth century. It will be conducted to some extent in Russian.
Staff

141-223A RUSSIAN WRITERS OF THE 19th CENTURY. (3 credits; Prerequisite: None). The course, to be given in English, is designed for students interested in Russian literature and its authors. The course will offer students a broad overview acquainting them with the main Russian literary cur-

rents of the 19th century and with the lives and destinies of its writers.
Professor Pavilanis

141-224B THE RUSSIAN WRITER OF THE TWENTIETH CENTURY. (3 credits; Prerequisite: None). This course, given in English, examines the role of the creative writer in the conditions of Russian society of the twentieth century. Special emphasis is laid on factors affecting the writer's art as well on the writer's own reflections upon his craft.
Staff

141-225D RUSSIAN LANGUAGE. (Continuation of Russian 215D). (6 credits; Prerequisite: Russian 215D or equivalent. Registration limited). Students taking it will acquire a good working knowledge and appreciation of the language and will be able to go directly into advanced courses in Russian language and literature. Students may, at the discretion of the Department, revert to Russian 220D after four weeks at the latest.
Professor Bauer and Staff

141-226D OUTLINES OF 19th CENTURY RUSSIAN LITERATURE. (6 credits; Prerequisites: Russian 215D or equivalent, and the permission of the Department; *Texts:* Mirsky, *History of Russian Literature:* Knopf; Slonim, *Outlines of Russian Literature:* Oxford; Other prescribed texts to be selected). A general introduction to Russian prose, poetry and drama in the 19th Century. Selected texts will be read in the original and discussed. The course will be conducted to some extent in Russian.
Professor Nicholson and Staff

141-227D INTRODUCTION TO SOVIET RUSSIAN LITERATURE. (6 credits; Prerequisites: Russian 215D or equivalent, and the permission of the Department; *Texts:* Reddaway (ed.) Soviet Short Stories, Vol. 2, Harper et al., editors, *New Voices;* Other prescribed texts to be selected). Selected texts will be read in the original and discussed. The course will be conducted mainly in Russian.
Staff

141-235D INTRODUCTION TO RUSSIAN STUDIES. (6 credits; Prerequisite: Permission of the Department). An introduction to the study of Russian civilization with emphasis on the Russian language as a vehicle of culture, on the literature of the 19th century, on Soviet literature, on the role of the author in Russian society, on literary censorship in the 19th and 20th centuries.
Professor Nicholson and Staff

141-240D INTRODUCTION TO UKRAINIAN STUDIES. (6 credits; Prerequisite: Permission of the Department). An introduction to the study of Ukrainian civilization with emphasis on the position of Ukrainian as an Eastern Slavic language with an ancient culture, on the literature of the 19th and 20th centuries, and on the role of the Ukrainian writer in his society.
Staff

141-245D INTRODUCTION TO BULGARIAN STUDIES. (6 credits; Prerequisite: Permission of the Department). An introduction to the study of Bulgarian civilization. Emphasis will be laid on Bulgarian as a development of the Slavs' first literary language, on Bulgarian literature from the earliest times and on the role of the Bulgarian writer in his society.
Staff

141-255D INTRODUCTION TO POLISH STUDIES. (6 credits; Prerequisite: Permission of the Department). An introduction to the study of Polish civilization, with emphasis on Polish as a Western Slavic language, on Polish literature of the 19th and 20th centuries particularly, and on the role of the Polish writer in his society.
Staff

141-300D RUSSIAN LANGUAGE AND LITERATURE IN THE 19th CENTURY. (6 credits; Prerequisites: Russian 220D or equivalent and permission of the Department). Grammar. Readings from selected authors, conversation and composition. The course will be conducted in Russian.
Staff

141-320D RUSSIAN CIVILIZATION IN THE NINETEENTH CENTURY. (6 credits; Prerequisites: Russian 220D, 222D or equivalent and permission of the Department). This course, given in Russian, discusses the relationship between Russian language, literature, thought and culture from Karamzin to Chekhov.
Professor Pavilanis

141-340D INTERMEDIATE UKRAINIAN STUDIES. (6 credits; Prerequisite: 240D or permission of the Department). Second level Ukrainian studies.
Staff

141-342B INTRODUCTION TO HUNGARIAN STUDIES. (3 credits; Prerequisite: Permission of the Department). An introduction to the study of Hungarian civilization with emphasis on Hungary's written language and its development since the 11th century. The Turkish impact; the influence of Germanic and Slavic cultures. Petöfi and the 19th century writers. Russian classics in Hungary. Modern literature. The course will be conducted in English.
Professor Fodor

141-345D INTERMEDIATE POLISH STUDIES. (6 credits; Prerequisite: 255D or permission of the Department). Second level Polish studies.
Staff

141-350D ADVANCED RUSSIAN LANGUAGE AND SYNTAX. (6 credits; Prerequisites: Russian 225D or equivalent, and permission of the Department). Prose composition, translation, essay writing. An introduction to Russian stylistics.
Professor Austin

141-355D RUSSIAN COMPARATIVE GRAMMAR. (6 credits; Prerequisites: Russian 225D or equivalent and permission of the Department). This course, given principally in Russian, will discuss Russian structurally from the viewpoint of the non-Russian student. East student will prepare at least one original paper to be discussed in class. *Not offered in 1977-78.*
Professor Nicholson

141-360D THE RUSSIAN NOVEL FROM 1820 to 1860. (6 credits; Prerequisites: Russian 225D or equivalent, and permission of the Department). The development of the Russian novel before Tolstoy and Dostoevsky. Reading texts will be chosen from the prose works of Pushkin, Lermontov, Gogol', Turgenev and Goncharov. This course will be conducted in Russian.
Professor Austin

141-370D PUSHKIN AND HIS CONTEMPORARIES. (6 credits; Prerequisites: Russian 225D or equivalent and permission of the Department). The Golden Age of Russian poetry. The course will be conducted in Russian.
Staff

141-400D RUSSIAN LANGUAGE AND LITERATURE AFTER 1917. (6 credits; Prerequisite: Russian 300D or permission of the Department). The development of the Russian novel and language after the October Revolution. The course will be conducted in Russian.
Staff

141-410D DRAMA IN RUSSIAN LITERATURE. (6 credits; Prerequisite: Permission of the Department). Representative works of the 19th and 20th centuries are studied and discussed. Reading texts will be chosen from the plays of Fonvizin, Griboedov, Pushkin, Gogol', A. Ostrovsky, Turgenev, Chekhov, Gor'ky and Kataev. The course will be conducted in Russian. *Not offered in 1977-78.*
Staff

141-420D RUSSIAN CIVILIZATION OF THE EARLIER PERIOD. (6 credits; Prerequisite: Permission of the Department). This course, given in Russian, discusses the development of Russian culture from the earliest times to the death of Catherine the Great.
Staff

141-450D TWENTIETH CENTURY RUSSIAN LANGUAGE AND LITERATURE. (6 credits; Prerequisites: Russian 350D or equivalent and permission of the Department). Specific features of the style of modern literary Russian will be analysed and compared with the language of the 19th century. The origins and development of Soviet Russian literature will be studied in detail. The course is primarily intended for Honours students. It will be conducted in Russian.
Professor Fodor and Staff

141-460D THE RUSSIAN NOVEL FROM 1860 TO 1900. (6 credits; Prerequisites: Russian 350D or equivalent and permission of the Department). The Golden Age of the novel in Russian literature. The major works of Turgenev, Dostoevsky and Tolstoy will be read in the original and discussed in Russian.
Professor Pavilanis

141-505A LEO TOLSTOY AND HIS TIME (1847 TO 1870). (3 credits; Prerequisite: Russian 300D, 360D or permission of the Department). The major works of Russia's most important writer up to and including *War and Peace* will be studied. Emphasis will be placed on Tolstoy's impact on the literary and cultural life of his society. The course will be conducted mainly in Russian. It differs from 460D in its exclusive emphasis on Tolstoy.
Professor Fodor

141-506B LEO TOLSTOY AND HIS TIME (1870 TO 1910). (3 credits; Prerequisite: Russian 300D, 360D, 505A or permission of the Department). Tolstoy's novels *Anna Karenina, Resurrection* and other works will be studied. Emphasis will be placed on the author's impact on the literary and spiritual life of his society. The course will be conducted mainly in Russian. It differs from the second part of 460D in its exclusive emphasis on Tolstoy.
Professor Fodor

141 GRADUATE COURSES. Certain graduate courses are open to U-2 and U-3 students. Consult the Graduate announcement and the Department.

SCHOOL OF SOCIAL WORK (407)

Professors – MYER KATZ *(Director)*; EDWARD V. SHINER; DAVID E. WOODSWORTH
Associate Professors – PATRICK DEEHY; GLENN DROVER; DOROTHY R. FREEMAN; LOTTE MARCUS; FRANK J. McGILLY; DIANE REICHERTZ
Assistant Professors – BEN ZION DALFEN; SYDNEY DUDER; SHEILA GOLDBLOOM; ESTELLE HOPMEYER; JUDITH MAGILL; SHEILA NEYSMITH; DOROTHY SIROTA; SHIRLEY STEELE; JAMES TORCZYNER; ELIZABETH URTNOWSKI
Lecturers – JANE ARONSON; MARIE BRISEBOIS; CAROLE CHRISTENSEN; INGRID COOPER; MARION GARMAISE; ZELDA HARRIS; FRANCOISE LECLAIRE; JACOB RABY; TRYNA ROTHOLZ, ERIC SHRAGGE; AMY SHULMAN; CAROL SPEIRS; ANNETTE WERK

BACHELOR OF SOCIAL WORK DEGREE (B.S.W.)

Educational Objectives

The Faculty of Arts, through the McGill University School of Social Work, offers an undergraduate program of professional studies in Social Work,

leading to the Degree of Bachelor of Social Work (B.S.W.). The B.S.W. degree course has the following principal educational objectives:

1) To prepare students for professional practice in any one of a range of social service positions. (The B.S.W. degree represents the point of admission into the Corporation of Professional Social Workers of the Province of Québec and the Canadian Association of Social Workers.)

2) To prepare selected students for entry into more specialized professional studies at the graduate level.

Admission

1. Three-Year Undergraduate B.S.W.

Applicants to this program must have completed two years of collegiate or equivalent studies, including introductory courses in sociology, psychology, statistics and French, as recognized by the University Admissions Office. Normally a candidate will not be considered for the program unless his/her GPA is 3.0 or better. Within the group of applicants who meet this requirement, preference will be given to those who have had social work related experience, paid or volunteer, and also to those who demonstrate personal suitability for the profession of social work as determined by the personal statement and the group interview. Students applying at the end of the first year of University should count on at least 2 1/2 years of study to complete the requirements for the B.S.W. degree. At the moment no provision exists for graduates of a 3-year collegial program to obtain the degree with less than 90 credits.

Application for admission should be made to the University Admissions Office.

2. Mature Student Program.

Certain mature students may be admitted into the Faculty of Arts to a program of study leading to a B.S.W. degree. Mature students are defined as persons 23 years of age and over who lack the academic requirements for University entrance.

In order to be considered for the B.S.W. program a mature applicant must:

(a) Have had substantial work experience in social work or closely related fields;

(b) Be able to produce a satisfactory recommendation from community social agencies with which he/she has been affiliated.

Candidates for this program should apply to the Director of the University Admissions Office.

3. Special B.S.W.

A limited number of students with Bachelor's degrees are admitted into a Special B.S.W. program in which advanced standing is given for the social science content of the Bachelor's degree.

The minimum requirements for admission to the Special B.S.W. are as follows:

1. Bachelor's degree with a high standing in the final year; or, if graduating in the current year, in the last complete year.
2. Completion of at least 5 full courses in the social and psychological sciences (economics, political science, psychology, sociology or anthropology).
3. A course in statistics is a prerequisite for admission. If a research course has not been taken before admission, the student must take Social Work 407-270 as part of the B.S.W. program.

Normally a candidate will not be considered for the program unless his/her GPA is 3.0 or better. Within the group of applicants who meet this requirement, preference will be given to those who have had social work related experience, paid or volunteer, and also to those who demonstrate personal suitability for the profession of social work as determined by the personal statement and the group interview.

The Special B.S.W. is a full-time program of study and is not open to students on a part-time basis. Those wishing to pursue this program must follow the prescribed pattern of study starting with the initial summer session in May (6 weeks), the academic session (Sept. – April), and the second summer session (April – July of the following year). Students who have satisfactorily completed the Special B.S.W. program are not guaranteed admission to the Master's program.

Application for admission should be made at the School of Social Work.

Plan of Study

Regular B.S.W.

a) The normal B.S.W. comprises a combination, over the three years, of professional courses, supervised field practice and practice-related courses drawn principally from the social and psychological sciences.

b) The program is organized so that the proportion of professional content to social and psychological science content increases from year I to year III.

c) The B.S.W. degree will be awarded upon successful completion of 90 credits of study of which at least 78 must be related to the students' professional development. Of these 78 credits, 48 – 60 must be social work courses. Not less than 18 credits must be chosen from the social or psychological sciences. The remaining credits may be taken according to the student's own individual interests. If credits in French language are required, they will be taken from among the credits available after satisfaction of the requirements of social work and social science credits.

d) The distribution of the 48-60 credits of social work content over the three years will be approximately as follows:
Year I – 12 – 15 credits
Year II – 18 – 21 credits
Year III – 18 – 24 credits

e) Students entering their University I year will take Social Work 254D and 255D, plus one or two other 3 credit social work courses. Students who have already taken a statistics course will normally take Social Work 270 during this year. The remaining 15 – 18 credits will be taken elsewhere in the University.

f) Students entering B.S.W. II will take Social Work 352A, 455D and 456D, plus one or two other 3 credit social work courses. The remaining 9 – 12 credits will be taken elsewhere in the University.

g) Students entering B.S.W. III will take Social Work 458A and 480D, plus 3 – 6 other social work courses, including at least two of the following: 472A, 473A, 474A, 475B, 476A,B, 477B, 484B, 485A,B,L, 487B, 488B, 497A, 498B, 528A. The remaining 6 – 12 credits will be taken elsewhere in the University.

h) Before graduating with the B.S.W. degree each student is required to satisfactorily complete one half course in introductory statistics and one half course in social science research methods.

Special B.S.W.

The Special B.S.W., for those holding an undergraduate degree, will be offered in three time blocks: a summer session of 6 weeks, May – June, one regular academic year, and a summer session of 12 weeks, April-May-June. Students in this program will take at least 48 credits, including courses in social work practice, field practice, and policy. Required courses are Social Work 352L, 353L, 481A, 482L, 456D, 458B, 480D and at least two of the following courses: 472A, 473A, 474A, 475B, 476A,B, 477B, 484B, 485A,B,L, 487B, 488B, 497A, 498B, 528A,B. The remaining 12 credits will be selected from other courses offered at the B.S.W. level. Regulation (h) under Regular B.S.W. also applies to students in the Special B.S.W. program. Specific information and application material may be received directly from the School of Social Work in December for 1978-79 admissions.

Course Descriptions

B.S.W. courses, with the exception of 254, 255, 353,455,456, 472, 473, 480, 481, 482, 485, 487, 489, 497 and 498, are open to non-social work students. Permission of the instructor, however, must be obtained prior to registration.

407-254D INTRODUCTION TO SOCIAL WORK. (6 credits). An examination of major social problems associated with life in large urban areas and the social services, public and private which have been established to deal with such problems. Social work practice theory including models and theories of helping and change techniques. (Not open to students who have taken 407-250A or 251B).
Professors Deehy, Reichertz

407-255D SOCIAL WORK PRACTICUM. (3 credits; Corequisite; 407-254D). An introductory field experience to provide U1 students with the opportunity to observe social work practice, to participate in the work of a social organization, to assume responsibility for a limited practice assignment, and to conduct critical analyses of their field experiences through conference discussions and individual tutorials.
Field Instruction Staff

407-270A,B,L INTRODUCTION TO SOCIAL WORK RESEARCH. (3 credits). This course is intended to help students make effective use of published research reports and agency statistics, and to show them how to conduct simple research projects. It covers problem formulation, research design, data collection, analysis and interpretation, use of the computer terminal, and report writing. Modular format. (Not open to students who have taken 407-470A).
Professor Neysmith

407-352A,L THE PUBLIC SOCIAL SERVICES IN CANADA. (3 credits). An introduction to the programs of public social services in effect in Canada in the fields of income, housing and health. The course seeks to acquaint students with the characteristics of these programs, and with the policy issues which surround them and to enhance the students' ability to evaluate the functioning of the programs. This is a modular course. Students submit one written assignment in each of the three fields.
Professor McGilly

407-353L INTRODUCTION TO PRACTICE. (6 credits). Introduction to the principles and practice of social work. Approaches to social problem identification and analysis. The role of the social worker as an agent of change or of social control. Elements of working with individual groups and communities. Laboratory periods will permit the application of course content to practice.
Professors Dalfen, Katz and Reichertz

407-451B CHILDREN'S NEEDS AND SOCIAL SERVICES. (3 credits). The identification and analysis of the needs of children and their families. Consideration of the processes of selected social services, e.g. day care, visiting homemakers, foster family and institutional care, adoption, etc., designed to support, supplement and substitute for the family. Special emphasis will be placed on social legislation related to neglected, abused and dependent children.
Professor Reichertz and Margaret Anne Smith

407-452A,L SOCIAL WELFARE ORGANIZATIONS AND DISADVANTAGED CLIENTELE. (3 credits). An examination of the structure of organizations serving the needs of socially disadvantaged persons or groups, and the processes through which such services are provided. Particular attention will be paid to the definition, screening and serving of disadantaged clients as compared to those drawn from more "privileged" groups in society. Strategies for changing such organizations will be explored.
Professor Deehy

407-453B,L YOUTH AND YOUNG ADULTS: SOCIAL NEEDS AND SERVICES. (3 credits). The physical, psychological and social development of youth and young adults and the relationship of such development to demands of the social environment. Emphasis is on the effects of societal change on family roles, interpersonal relationships, educational and work achievement, youths' community role, social services for youth and young adults.
Professor Dalfen

407-454A SOCIAL SERVICES IN THE HEALTH FIELD. (3 credits). An examination of the relationship between illness and social conditions. Social planning, practice and research aspects of health care and the delivery of health services. An evaluation of current and developing professional roles of social workers in health teams, with particular emphasis on social rehabilitation of the physically and mentally ill.
Professor Marcus

407-455D* SEMINAR ON SOCIAL WORK PRACTICE. (6 credits). This course will focus on principles of social work practice and on developing skill in working with individuals, families, small groups and communities. Attention will be given to the applicability of selected social and psychological science concepts in constructing models of social work intervention. Methods of practice will be analysed from a range of settings, drawing upon student field experiences.
**For special B.S.W. students, the content of this course will be presented in two courses (one in the fall and one in the summer session) under two course numbers – 407-481A (3 credits) and 407-482L (3 credits).*
Staff

407-456D FIELD PRACTICE. (6 credits). Supervised educational experiences in social work practice designed to integrate practice with theoretical knowledge. Through field placements in university affiliated teaching centres, students will work with individuals, families, groups and communities, receiving both individual and group instruction. Two days per week, September to mid April.

407-457B LEGAL PROBLEMS OF THE POOR. (3 credits). A lecture-and-seminar course on law and social welfare, with the emphasis largely on the social-legal protection and redress available to them. Aspects of Canadian civil law and criminal law will be reviewed. Emphasis will be placed on the Québec scene, with landlord-tenant, contract and debtor, matrimonial regimes, parental responsibility and social insurance. The total Canadian perspective will be considered in areas of divorce, unemployment insurance, arrest, and bail.
Robert M. Cooper

407-458A,B SOCIAL POLICY AND ADMINISTRATION. (3 credits). An analysis of policy issues which underlie selected social service programs; the administrative structure of such programs, their legislative base, their effectiveness and the role of professionals in the service delivery. Examples will be drawn from the current field experiences of students in the course.
Professors Woodsworth and Drover

407-461B SEMINAR IN CORRECTIONS. (3 credits). An examination of criminal behaviour in Canada and the U.S., and the correctional system designed to deal with such behaviour. The parts played by the Police, Judiciary, Penal System and the Probation and Parole Services will be discussed, together with the role of Social Work in the correctional process.
Professor Hanna

407-462A POVERTY, INEQUALITY AND CAPITALISM. (3 credits). An examination of the notion of social welfare from the perspective of poverty and inequality. Attention is given to socio-economic dynamics of inequality in a capitalist state rather than programs designed to combat poverty. Specific topics include inequality in relation to income distribution and redistribution, wealth, incentives, economic growth, inflation, consumption, rich and poor nations. (Not open to students who have taken 407-460A)
Professor Drover

407-463A SOCIAL WORK PRACTICE WITH THE AGED. (3 credits). A seminar dealing with social services for the aged. Topics will include: dilemmas of retirement, institutionalizing of the elderly, community care, separation and loss, role of the social worker with the elderly and their families.
Professor Sirota

407-464A INDUSTRIAL SOCIAL WORK. (3 credits). A seminar on social work practice in industrial settings. Analysis of conceptions of work; work-related, personal and family problems, relationships between social agencies and the world of work, social service programs offered under industrial and trade union auspices.

407-465A SEMINAR IN SCHOOL SOCIAL SERVICES. (3 credits). The seminar will examine the interrelationships of the pupil's social environment in the culture of the school, the problems of teachers and principal and their resultant impact on the pupil's academic achievement. Existing models of social work intervention in schools will be discussed

with special emphasis given to "Interprofessional Collaboration".
Professor Dalfen

407-467B SOCIAL WORK AND PUBLIC ISSUES. (3 credits). An examination of the process by which social problems are translated into public issues, the factors influencing various interest groups in taking positions on such issues and the reasons why some succeed more than others. Particular attention will be paid to issues raised at the municipal and provincial level which have relevance for social work.
Professor Deehy

407-471B INDIVIDUAL SOCIAL WORK RESEARCH PROJECTS. (3 credits). This course will provide an opportunity for interested students to conduct small-scale practical research projects, either individually or in small groups, with tutorial assistance from staff members and without the formal reporting requirements of the M.S.W. research project.
Professors Neysmith and Shiner

407-472A SEMINAR ON FAMILY ASSESSMENT. (3 credits). An advanced seminar designed to integrate knowledge of human personality in social process. Emphasis will be upon the appraisal and assessment of patterns of reciprocity among members of disturbed and disorganized families. Preference will be given to students who have some contact with families.
Shirley Braverman

407-473A CASEWORK WITH INDIVIDUALS AND FAMILIES. (3 credits). Theory and practice of work with individuals and families under stress. Topics will include: categories of hazardous events; affective, behavioural and role disorganization; phases in the crisis cycle; techniques of crisis intervention and abatement.
Professor Katz

407-474A METHODS OF COMMUNITY DEVELOPMENT, SOCIAL ACTION. (3 credits). The aim of this course is to develop an understanding of the organizing process and to enrich the student's repertoire of direct organizing skills. Emphasis is on organizational entities, community power and conflict, organizing strategies and their application, in the context of current issues in urban community development.
Professor Torczyner

407-475B COMMUNITY ORGANIZATION. (3 credits). A continuation of Methods of Community Development, Social Action, with emphasis on the integration of community organization theory and practice. An examination of problems encountered in practice, current issues and trends in the conceptualization of community organization.
Professor Torczyner

407-476A,B SOCIAL WORK PRACTICE WITH GROUPS I. (3 credits). Theory and practice of work with groups. Focus will be on group development theory and the skills of the worker as he strengthens group potential for mutual aid. Children and adult groups in a range of settings will be examined.
Professor Magill

407-477B SOCIAL WORK PRACTICE WITH GROUPS II. (3 credits). An advanced course in practice, with emphasis on comparative theories of groups.

407-480L,D FIELD INSTRUCTION. (6 credits). Supervised educational experience in social work practice, integrating practice with theoretical knowledge characteristic of the selected field. Individual and group instruction.
Field Instructional Staff

407-481A SEMINAR ON SOCIAL WORK PRACTICE I. (3 credits). Principles of Social Work Practice in working with individuals, families, small groups and communities. Methods of practice will be analysed from a range of settings, drawing upon student field experience.
Professor Hopmeyer

407-482L SEMINAR ON SOCIAL WORK PRACTICE II. (3 credits). A continuation of 481A.
Staff

407-483B SEMINAR ON MINORITY GROUPS AND SOCIAL WELFARE. (3 credits). This seminar is designed to prepare students for working effectively with selected minority clienteles. Content will include: the impact of formal and informal social policies and institutions on the welfare of minorities, and the relationship between cultural patterns of clients and social work practice.
Carole Christensen

407-484B SEMINAR IN COMMUNITY ORGANIZATION. (3 credits). This seminar examines issues and dilemmas which students encounter in community organization practice. The workshops provide a forum to analyse neighbourhood structures, organizations and systems which affect community lives. Particular attention will be directed toward the development of citizens' groups and coalitions, the analysis of power structures and planning with community associations for change.
Professor Torczyner

407-485A,B,L TUTORIAL IN SOCIAL WORK PRACTICE. (3 credits). An individual or small group tutorial in which students will work independently in conjunction with the instructor. The student will undertake a major project related to the area of specialization. To be taken only with the consent of the Director.

407-486A,B,L TUTORIAL IN SOCIAL WORK POLICY (3 credits). An individual or small group tutorial in which students will work independently in conjunction with the instructor. The student will

undertake a major project related to the area of specialization. To be taken only with the consent of the Director.

407-487B FAMILY THERAPY SEMINAR. (3 credits). As a follow-up to the Family Assessment Seminar, this course will focus mainly on treatment, that is, interventive techniques. Approaches to families with special problems such as one-parent families, immigrant families, multiproblem families and families with a psychosomatically ill member will be discussed with a clinical focus. The aim is (1) for students to gain an understanding of how family members are shaped by, and help shape their environment and (2) to improve students' treatment skills in dealing with a wide spectrum of families. Prerequisite 472A.
Shirley Braverman

407-488B SOCIAL WORK PRACTICE WITH CHILDREN. (3 credits). In many areas of social work practice, students must have a knowledge and understanding of children and the beginning skills to work with them. This course will provide the practice theory and the specialized skills required, and help the student integrate theory and practice. Some of the problem areas to be considered are child abuse, truancy, school phobia, aggression, withdrawal, stealing, bed-wetting and learning problems.
Professor Charles Pascal

407-489A HUMAN SEXUALITY IN SOCIAL WORK PRACTICE. (3 credits). A seminar designed to provide students with an opportunity to develop beginning practice competence in dealing with problems related to human sexuality (abortion, family planning, homosexuality, etc.) Emphasis will be placed on helping students to incorporate a range of professional interventions and skills by use of case material, taped sessions and role-play. Students will be expected to share practice experiences. Open to U3 and Special B.S.W. students.
Carole Christensen

407-497A SEMINAR IN INTEGRATION OF PRACTICE METHODS. (3 credits). Discussion seminar in which attention will be given to a range of beginning theoretical attempts to define an integrated method. Emphasis will be placed on the examination of existing practice models; the problems entailed in creating a common model which allows for a differential application, and a study of the central requirements for functional statement of practice.
Staff

407-498B SEMINAR IN INTEGRATION OF PRACTICE METHODS. (3 credits). A continuation of 497A.
Staff

COURSES OPEN TO UNDERGRADUATE AND GRADUATE STUDENTS

407-528A,B ACTIVITY GROUP METHODS. (3 credits). In this class, play and socializing activities are studied: (a) for their value as enjoyable and strength-building experiences; (b) dynamically as they apply theoretically and practically to work with various types, sizes and styles of client groups; (c) as a means of developing professional skills relevant to facilitating personal and interpersonal growth in working with groups; (d) as a means of helping the student develop an awareness of his/her own effectiveness as a participating group member or leader. (Not open to students who have taken 407-478 or 628).
Lanie Melamed

407-529B PSYCHODRAMA. (3 credits). Study of the rationale and techniques of psychodrama application in role playing situations for individuals and groups; increase in sensitivity to clients. Didactic lectures with application in simulated situations. (Not open to students who have taken 407-629B).

407-530A SEMINAR ON SOCIAL PERSPECTIVES ON AGING I. (3 credits). Instructors and students from different disciplines (sociology, political science, economics, management, social work and others) will discuss issues of demography, age status and roles, attitudes, family and intergenerational relations, retirement, leisure, etc. Policies, provisions and services to seniors will be explored and evaluated. Selected senior citizens will participate in this Seminar.
Professors Marcus and McGilly

407-531B SEMINAR ON SOCIAL PERSPECTIVES ON AGING II. (3 credits). Instructors and students from disciplines such as biology, psychology, geriatrics, education, religious studies, social work and others will focus on certain aspects of aging, i.e. physiological, psychological, cultural, health and disease in old age, death and dying, etc. The provision of services and their impact on the recipients will be evaluated. Senior citizens will participate in the Seminar.
Professors Marcus and McGilly

LAW COURSES OPEN TO SOCIAL WORK STUDENTS

The Faculty of Law offers a limited number of courses for Social Work students. Each course is intended for a specific group of Social Work students and the Faculty of Law reserves the right to control the enrolment; i.e. permission to take these courses must be obtained from the Faculty of Law Admissions Officer.

490-003A THE PROCESSING OF THE OFFENDER: LEGAL PSYCHIATRIC AND SOCIAL WORK PERSPECTIVES. (3 credits). An examination of the role of the lawyer, psychiatrist and social worker in the processing and treatment

of offenders. Problems characteristic of practice in each of these professions will be studied as they interact in the criminal process. The seminar will be conducted jointly by faculty members drawn from Law, Psychiatry and Social Work. It will be open to a limited number of students in Law, Medicine and Social Work who have a particular interest in the field of criminology. A previous course in criminal law, criminology or corrections or the approval of the instructors is required. (Not open to students who have taken or are taking 491-491B).
Professor Sklar with Dr. C. Angliker of the Forensic Psychiatry Clinic, and Dr. P. Deehy of the School of Social Work

490-006B LAW RELATING TO CHILDREN. (3 credits). This course will require active student participation and should be suitable for both Law and Social Work students. It will concern itself with the legal and social problems of legitimacy, illegitimacy, and legitimation, custody and access disputes, kidnapping cases, the role and responsibility of step and foster parents, parental rights and the adoption process. The course will be taught on a seminar basis and assessment may be on the basis of term papers and class participation. (Not open to students who have taken or are taking 486-456B).
Professor Bissett-Johnson

SCIENCE FOR ARTS STUDENTS

Course descriptions appear in the appropriate departmental listing in the Faculty of Science section of this Announcement.

BIOLOGY 177-111A PRINCIPLES OF ORGANISMAL BIOLOGY. (3 credits).

BIOLOGY 177-112B INTRODUCTION TO CELL AND MOLECULAR BIOLOGY. (3 credits).

BIOLOGY 177-246A MODERN BIOLOGY AND THE PREDICAMENT OF MAN. (3 credits).

BIOLOGY 177-274A PRINCIPLES OF GENETICS. (3 credits).

BIOLOGY 177-346A PHILOSOPHY OF BIOLOGY. (3 credits).

BIOLOGY 177-358A CANADIAN FLORA. (3 credits).

BIOLOGY 177-364B ORIGIN AND USE OF CULTIVATED PLANTS. (3 credits).

PHYSICS 198-200D IDEAS AND CONCEPTS OF MODERN PHYSICS. (6 credits).

PHYSICS 198-224B PHYSICS OF MUSIC. (3 credits).

SOCIOLOGY (166)

Professors – DAVID N. SOLOMON (Chairman); WILLIAM A. WESTLEY (on leave 1977-78); RICHARD F. HAMILTON; MAURICE PINARD

Associate Professors – MICHAEL P. CARROLL; ROGER G. KROHN; GERTRUDE J. ROBINSON; MALCOLM SPECTOR; DONALD VON ESCHEN
Assistant Professors – WILLIAM EATON; JOSEPH LELLA; ULI LOCHER; FRANCOIS NIELSEN; PRUDENCE RAINS; RACHEL ROSENFELD; MICHAEL SMITH; MORTON WEINFELD.

Stephen Leacock Building,
855 Sherbrooke St. West, Montreal, PQ, H3A 2T7.
General Information: Room 709, Telephone: 392-5178.

MAJOR PROGRAM IN SOCIOLOGY

The Major program in Sociology is intended for students who do not wish to confine their studies to the sequence of courses required of Honours students. Admission to the Major program will normally take place after a student has completed an introductory course in Sociology. A minimum grade of 65% in Introductory Sociology is required for acceptance into the Major program.

Required course work is as follows:

Introduction to Sociology
33 additional credits in Sociology
24 credits chosen from one or two of:

Anthropology
Economics
Geography
History
Political Science
Psychology

Students wishing to be admitted to the Program should consult with the Chairman of the Undergraduate Committee.

THE HONOURS PROGRAM

The Honours program is designed for students who are interested in pursuing graduate study in Sociology.

Admission

Entrance into the Honours program will take place at the beginning of the U2 year. Normally, only students with a CGPA of 3.0 or better during their U1 year will be admitted into the program. Students should make their application for admission sometime during the Summer preceding their second year.

Requirements

In addition to Introductory Sociology, Honours students are expected to take at least 60 credits in Sociology. With the approval of the Honours Adviser, up to 15 of these 60 credits may be taken in fields related to Sociology (provided that the courses taken in these fields are numbered 300 or

above). Honours students must take Sociology 350 (Statistics), Sociology 361 (Introduction to Quantitative Analysis) and Sociology 451 (History of Sociological Theory), as well as two graduate seminars.

In order to be allowed to remain in the program and to receive the Honours degree students must maintain a CGPA of 3.0, as well as a GPA of 3.0 in Sociology courses. In addition, no course with a grade below C will be credited towards the 60 credit required for the Honours degree. In the case of courses specified by the program (Statistics, Methods, History of Theory, etc.) a student receiving a grade below C may, with the permission of the Department, take a supplemental examination or repeat the course. In the case of a course being counted as one of the credits required by the program a student receiving a grade below C has the additional option of substituting a new course in Sociology providing that his or her total grade point average in Sociology remains above 3.0.

First Class Honours in Sociology will be granted based on CGPA of 3.5 or above as well as GPA of 3.5 or above in Sociology courses.

JOINT HONOURS PROGRAMS

Joint Honours Programs exist with Anthropology, Economics and Political Science. A student taking such Joint Honours Programs must take at least 30 credits in Sociology in addition to "Introductory Sociology". These courses must include the 3 required honours courses plus two graduate seminars.

Students wishing to be admitted to the Honours Program should consult with the Chairman of the Undergraduate Committee.

Course Descriptions

A course in introductory Sociology is a prerequisite for all other courses in Sociology. Students who have had a course in introductory Sociology in CEGEP need not take one of the introductory Sociology courses offered in the department.

• *Denotes not given in 1977-78.*

INTRODUCTORY COURSES

INTRODUCTION TO SOCIOLOGY. The three introductory courses, 210A, 212A, and 214B are somewhat different in their emphases (see the descriptions below) but completion of any of these courses will enable the student to take advanced courses in the Department.

166-210A INTRODUCTION TO SOCIOLOGY. (3 credits). A general introduction to sociological theory and the analysis of groups in modern society. The course covers comparative cultures, the social development of the individual, ethnic and class groupings, characteristics of urban life, social change, and institutional structures.
Professor Hamilton

166-212A INTRODUCTION TO SOCIOLOGY. (3 credits). The course offers a general survey of several selected traditions within sociology. Specifically, we shall focus on person-centred traditions (e.g. those centering on Weber and Durkeim), conceptual (e.g. structural-functionalism, exchange, balance) and subject-centred traditions (e.g. family, stratification, etc.)
Professor Carroll

166-214B INTRODUCTION TO SOCIOLOGY. (3 credits). Introduction to the basic concepts and methods used in sociology, the logic of social analysis and a selection of prominent social theories. The course will place special emphasis on comparative analysis and empirical techniques which make comparative analysis possible. Students are encouraged to develop quantitative skills and engage in individual research projects following models discussed in class.
Professor Locher

OTHER COURSES

166-217A CANADIAN MASS COMMUNICATIONS. (3 credits). An introductory course dealing with the history, structure and functions of the mass media in Canada and the way in which ownership patterns affect message content. The focus is comparative, stressing differences between the U.S. and Canada and policy interrelationships resulting from overflow programming. Enriched with modules.
Professor Robinson

166-219B SOCIOLOGY OF INNOVATION AND CULTURAL CHANGE. (3 credits). A comparative study of change in specialized types of culture approached through: strategic entry points, such as the biographies of innovators (Luther, Marx, Freud) or the histories of innovations (Oxygen, DNA); the relations between theoretical models, specialist roles and communities, and their social contexts; selected comparisons between "high culture" – science, religion, social thought – and less conceptually elaborate practices – e.g., hunting, investigative journalism and crime detection.
Professor Krohn

• **166-220B COMPARATIVE SOCIOLOGY.** (3 credits). Comparison of the interrelations of political, economic and cultural institutions in 8 national societies, as they have changed during the 20th century: the United Kingdom, the USSR, China, Brazil, India, Nigeria, the USA, and Canada. Changing relationship of each national society to world-system. Modular course. Offered in alternate years only.
Professor

166-221B CLASS AND POLITICS IN THE UNITED STATES. (3 credits). Analysis of the class structure of the contemporary United States. Political attitudes and behaviour of elites, upper and lower middle classes, and the working class will be

explored. The sources of stability and change will also be considered.
Professor Hamilton

- **166-222A URBAN SOCIOLOGY.** (3 credits). Analysis of the "urban problem", of the major theoretical viewpoints (or the lack thereof) and their political-ideological origins. Specific studies of urban neighbourhoods, the social economy of housing, and urban political structures, will be related to the "problems". Major programs, public housing, urban renewal, and community action will be evaluated.
Professor Krohn

166-223B SOCIAL STRATIFICATION. (3 credits). Topics will include: conceptions of inequality and class; the structure of class groups in the United States and Canada; the relationship between occupation, education, and class position; problems of upward and downward mobility; poverty.
Professor Rosenfeld

166-225B MEDICINE AND HEALTH IN MODERN SOCIETY. (3 credits). Introduction to a series of socio-medical problems and ways in which sociologically oriented analysis and research are being used to understand and deal with them. Emphasizing Canada and Québec, problems such as the following will be included: Poverty and Health; Mental Illness; Aging; Death and Dying; Professionalism; Health Service Organization.
Professor Lella

- **166-226B ECOLOGY AND SOCIETY.** (3 credits). The social origins of the ecological crisis in industrial societies. Comparison of attempts to protect and regulate the environment in industrialized nations. Sociological basis of ecology-oriented social movements and pressure groups. Intensive studies of selected industries and their effects upon the environment.
Professor

166-227A DEVIANCE AND SOCIAL CONTROL. (3 credits). An exploration of sociological approaches to the study of deviance and social control with an emphasis on the interaction between deviance and social control. Topics to be considered include: agencies of social control, the production of official statistics, the processing of deviants, and the consolidation of deviant identities.
Professor Rains

- **166-230B CLASS, ETHNICITY, AND POLITICS IN CANADA AND IN QUEBEC.** (3 credits). Class and Ethnicity in Québec and Canada. The segmented nature of the social structure. Types of party systems. Class and ethnic factors in federal politics. Various manifestations of class and ethnic politics in Québec since the thirties: Elite versus mass behaviour. The Quiet Revolution, Separatism and Québec politics since the sixties.
Professor Pinard

166-231A HUMAN ECOLOGY. (3 credits). An analysis of the relationship between organizational features of human populations (stratification systems, residence patterns, political and economic organizations, etc.), their techonology (in a general sense) and the environment (both physical and social). A review of the theoretical developments of human ecology in relation to other major paradigms in sociology, including the contribution of modern (general) ecological theory, together with a detailed analysis of examples from anthropology, the sociology of organizations, political and urban sociology.
Professor Nielsen

166-232B ECOLOGY OF ETHNIC BOUNDARIES. (3 credits). An analysis of the dynamics of ethnic boundaries both in primitive societies and developed poly-ethnic nations. Emphasis is placed on the general mechanisms underlying the relationships between the structure of group relations (symbiosis, coexistence, conflict) and major environmental (political, technological, geographical) factors. Examples among developed nations include South Africa, Brazil, Belgium, Mexico, Norway, and Great Britain.
Professor Nielsen

166-235A TECHNOLOGY AND SOCIETY. (3 credits). An examination of the extent to which technological developments impose constraints on ways of arranging social relationships in bureaucratic organizations and in the wider society: the compatibility of current social structures with the effective utilization of technology.
Professor Smith

166-247B FAMILY AND KINSHIP. (3 credits). The course will first consider those family-related institutions which have been proposed as cultural universals. This will lead to a discussion of the nuclear family and some proposed alternatives, the incest taboo, the division of labor by sex and patriarchy. We will then consider selected familial processes, including here interpersonal relations between family members, mate selection, romantic love and the regulation of sexuality.
Professor Carroll

166-250B SOCIAL PROBLEMS. (3 credits). This course will investigate how social problems are defined and how they are controlled. Emphasis will be given to contrasting images of social problems in sociology (from absolutist to relativistic definitions) as well as how problems have been approached by sociologists (including social pathologists, "Chicago school", functionalism, conflict theory, and more recently labelling and critical theory).
Professor Spector

166-254D SOCIAL CHANGE. (6 credits). Sources of social change, from ancient to modern times. The course asks why different societies evolve different state structures, forms of economic organization, and systems of class, ethnic, and racial stratification. The causes are sought in geographical factors,

technological developments, diffusion, the internal dynamics of different modes of production, imperialism, war, and the social movements to which these factors give rise. Both past changes and probable future ones will be covered. (Not open to students who have taken 166-354D).
Professor Von Eschen

166-303B CONTEMPORARY SOCIAL PSYCHOLOGY. (3 credits). This course will discuss recent developments in social psychology. Selected topics will include the social psychology of religion, socialization, cognitive consistency, small groups and the sociological research process itself. The nature of the prevailing conceptual frameworks in social psychology will also be reviewed.
Professor Carroll

- **166-305B SOCIALIZATION.** (3 credits). The course will concern itself with the effects of early childhood experiences upon adult personality, as well as the more general processes whereby social roles and values are transmitted to the new members of a society. Specific topics will include social reinforcement theories, modeling theories, maternal deprivation, culture and personality studies, cognitive development and infantile sexuality. Special attention will be devoted to the processes of sex role socialization.
Professor Carroll

- **166-307A SOCIAL MOVEMENTS AND COLLECTIVE BEHAVIOUR.** (3 credits). General theoretical perspectives on collective behaviour. Theories of social movements and revolutions. Examination of a theory of communal (ethnic, religious, etc.) conflict and accommodation and its relevance for the analysis of Québec's separatist movement. Analysis of other social movements and of elementary forms of collective behaviour (panics, crazes, hostile outbursts.) (Not open to students who have taken 166-407A).
Professor Pinard

166-309A SOCIOLOGY OF HEALTH AND ILLNESS. (3 credits). A survey of sociological studies of persons who are ill, the occupations providing medical care, and the social organization of medical services. Each student carries out and writes a report on a modest field research project, based on interviewing, participant observation, or some other direct contact with people in medical settings.
Professor Solomon

166-310A SOCIOLOGY OF MENTAL DISORDER. (3 credits). This course will integrate data and theories on mental disorders into a sociological framework. Studies from the areas of transcultural psychiatry, psychiatric epidemiology, stress, labelling, mental health care delivery, the family, positive mental health and the "sick" society will be reviewed and analysed in the framework of sociological theories of stratification, organization and social psychology.
Professor Eaton

166-312B INDUSTRIAL SOCIOLOGY. (3 credits). This course will focus on the responses of both workers and managers to changes in the organization and character of industrial work, taking into account the larger social and economic contexts within which those responses take place.
Professor Smith

- **166-315D SOCIOLOGY OF RELIGION.** (6 credits). The social determinants and consequences of religious beliefs and practices. Phenomenology of religion: prophets, priests and magicians. Folk religion and major world religions. Classical theories of the societal functions of religion including those of Marx, Weber and Durkheim. Religion in modern societies: secularization; religion and social class; functional alternatives to religion. (Not open to students who have taken 166-315A).
Professsor Locher

166-316B THE PROFESSIONS. (3 credits). The course presents a framework for the analysis of the position of professions in industrialized societies. Topics included are: the distinctive characteristics of professions compared with other occupations; interactions with clients (consumers), professional associations, the state and other employers; problems of control of professional behaviour and quality of work; the professions and power. (Not open to students who have taken 166-417B).
Professor Solomon.

166-317B RESEARCH IN CANADIAN MASS COMMUNICATIONS. (3 credits). An advanced course in mass communications which gives students an opportunity to generate and participate in group research projects analysing the organization, functioning and content of Canadian media. Differences in French-English perspectives, the role of journalists, the portrayal of women in the media are possible research topics.
Professor Robinson

166-321A WOMEN AND WORK. (3 credits). This course will focus on women's roles as workers within and outside the home. The socialization and preparation of women for adult work roles, their work as housewives, their labor force participation patterns, the rewards they receive within the labor force (e.g. income, status, job satisfaction), and forces which affect and change women's work role will be examined.
Professor Rosenfeld

- **166-324B URBAN SOCIAL ECONOMY.** (3 credits). Develops a cross-cultural framework for the study of the urban social economy based on the literature of economic anthropology. This framework will be used for the analysis of social and economic processes in contemporary urban contexts. Students will conduct a small empirical study, in Montreal or elsewhere to test this model.
Professor Krohn

166-325B SOCIOLOGY OF SCIENCE. (3 credits). Comparative studies of sociology and history of the natural and social sciences. A survey of new literature on the internal patterns of scientific (formal and informal) communication and professional organization, and of the scientific and political responses to the newly (since World War II) central place of science in national societies, including the current status of science policy issues in Canada, the U.S., and Britain.
Professor Krohn

166-326B POLITICAL SOCIOLOGY. (3 credits).

An examination of the social changes that underly the emergence of modern politics. An outline and empirical critique of the principal alternative models of political functioning in industrial societies.
Professor Smith

- **166-332D SOCIAL ASPECTS OF DEVELOPMENT IN THE THIRD WORLD.** (6 credits). Demographic, cultural, psychological, and structural obstacles to economic growth. Strategies of development, from community organization to revolution, and a comparison of their effectiveness. The transformation of social structure under the impact of industrialization, urbanization and "Westernization".
Professor Von Eschen

- **166-337B APPLIED SOCIOLOGY.** (3 credits). Studies of planned social change in factories, schools, hospitals and communities. The use of sociological research techniques and theory in the evaluation of social innovations. Changes in organizations, government and private social interventions.
Professor Westley

166-340A, 166-341B CURRENT PROBLEMS IN SOCIOLOGY. (3 credits each; Prerequisite: Introduction to Sociology and permission of instructor). This course is intended for students who are adequately prepared to undertake advanced work and have an explicit proposal to submit. A student taking majors may take no more than 6 credits throughout the three year program from the following: 166-340A/341B, 166-342A/343B, 166-440A/166-441B, 166-442A/166-443B. Open to U2 and U3 students only. An honours student may take 12 credits but not more than three credits per term during the last two years. A student wishing to take a greater number than those specified above must petition the Undergraduate Committee for permission. It is the student's responsibility to obtain the instructor's written consent and to inform the Department prior to registration, Room 710.
Staff

166-342A, 166-343B INDEPENDENT READING AND RESEARCH. (3 credits each). See description above for 166-340A, 166-341B.
Staff

166-345B TOPICS IN SOCIOLOGY (3 credits; Prerequisite: Introduction to Sociology). Topics to vary from year to year.
Professor

166-350A ELEMENTARY STATISTICS IN SOCIOLOGY AND ANTHROPOLOGY. (3 credits; Open to students who have not taken Psychology 204-A,B, 205B, 206B or Economics 317D). The basic concepts and techniques of statistical analysis applied in sociological and anthropological research problems. Topics include: frequency distributions, measures of central tendency and variation, simple correlation methods, sampling, tests of significance and non-parametric statistics.
Professor Spector

166-353A SOCIAL CONFLICT. (3 credits). The dynamics of conflict in society. Processes in the initiation and development of conflicts. Types of conflicts. In-group conflicts and conflicts with outgroups. The impact on existing structures. Limiting factors in conflict situations. The role of the agencies of social control.
Professor Von Eschen

- **166-360A NATIONAL LIBERATION MOVEMENTS IN AFRICA.** (3 credits). Historical background to national liberation struggles in southern Africa. Social roots and political strategies of African movements and white settler governments. Southern Africa's role in world-system. Links of liberation movements to world struggle.
Professor

166-361A INTRODUCTION TO QUANTITATIVE ANALYSIS. (3 credits; Prerequisite: 350A Elementary Statistics in Sociology and Anthropology). This course introduces the student to a variety of quantitative data gathering and analyzing methods. Topics include: experimental and quasi-experimental design, principles of measurement (reliability, validity, and replication), stages of conducting a survey (sampling, interviewing, preparing data for analysis), alternative data sources, data analysis and interpretation. Students will be expected to participate in and report on a research project.
Professor Nielsen

166-404A SOCIAL INTERACTION. (3 credits). The study of social interaction in everyday life from the point of view of symbolic interaction. The course will examine the nature of interaction, the building of identities and careers, the growth of sub-cultures, the nature of co-operative activity, embarrassment, face work, informal social control, and public life.
Professor Spector

166-405A SOCIAL CHANGE IN THE CARIBBEAN. (3 credits). Similarities and differences in the development of Caribbean societies. The heritage of plantation economies. The social and economic implications of contrasting political systems. Religion and folklore in modernizing societies. Students

are expected to write research papers on selected aspects of Caribbean development.
Professor Locher

166-410B PERSONAL SERVICE ORGANIZATIONS. (3 credits). This course examines organizations to which people come or are sent with problems they are unwilling or unable to solve for themselves. The central concern is with the inherent characteristics and dilemmas of these organizations in comparison with those which process inanimate rather than human material. Organizations providing health services receive most attention, but educational, welfare, and correctional, organizations are included.
Professor Solomon

- **166-411A STATE AND ECONOMY IN INDUSTRIAL SOCIETIES.** (3 credits). Relations between corporations and the national state in North America, Western Europe, and Japan. Industrialization and the Soviet State. Comparative military organization in major industrial societies. Emergence of multinational corporations and transnational organizations such as the International Monetary Fund and the Organization of Petroleum Exporting countries.
Professor

166-415B SOCIETY AND POLITICS OF GERMANY. (3 credits). Analysis of three regimes in Germany: the Weimar republic, the Hitler dictatorship, and the Bonn Republic. Topics to be considered include stratification, political parties, educational and religious institutions as well as social movements and institutional change.
Professor Hamilton

- **166-420D THE STUDY OF ORGANIZATIONS.** (6 credits). An introduction to the major theories, studies, research methods, and change techniques in the sociology of complex organizations. Its aim is to provide the student with a broad knowledge of the literature, an understanding of the major theories and techniques of research, and also to provide training in the techniques of planned organizational change.
Professor Westley

166-440A, 166-441B CURRENT PROBLEMS IN SOCIOLOGY. (3 credits each). See description for 166-340A, 166-341B.
Staff

166-442A, 166-443B INDEPENDENT READING AND RESEARCH. (3 credits each). See description for 166-340A, 166-341B.
Staff

166-448B ETHNOMETHODOLOGY. (3 credits). The course will be directed to understanding and coming to terms with this new theoretical development in sociology which considers the methods and practices used by persons to interpret, construct and make sense of their world – to generate social reality.
Professor Rains

166-451A THE HISTORY OF SOCIOLOGICAL THEORY. (3 credits). Social and political debates of the 19th and 20th Centuries seen in their social contexts as the background of current theoretic concerns and developments. Emphasis falls on Smith, St. Simon, Marx, Durkheim, Weber, American functionalists, and the "Chicago School", and the social and theoretic traditions they originated and represent.
Professor Krohn

- **166-453B COMPARATIVE ETHNIC RELATIONS.** (3 credits). A theoretical examination of ethnic and, more generally, communal relations in multicultural societies. Review of the components of such societies (i.e. segmented structure, communal inequalities, dual loyalties.) Their impact and that of social change on communal conflict. Conflict regulation. Countries to be considered include Canada, Belguim, the Netherlands, Switzerland, Austria, and Northern Ireland.
Professor Pinard

166-463B FIELD METHODS IN SOCIOLOGY. (3 credits.) Participant observation; interviewing and the nature of questions and questioning; the relative advantages and disadvantages of these as methods of generating data and theory; ethical questions.
Professor Rains

- **166-465B SURVEY ANALYSIS.** (3 credits; Prerequisite: 166-361 Introduction to Quantitative Analysis.) The course involves the analysis of completed surveys. Students will be expected to write an original research paper based on survey materials.
Professor

- **166-502B EVIDENCE AND INFERENCE IN SOCIO-HISTORICAL COMPARISONS.** (3 credits). Creation, manipulation, and interpretation of quantitative data about large-scale systems analysed over historical time. Use of primary and secondary sources of aggregate national and international statistics. Use of data archives. Systematization of use of narrative sources.
Professor

166-503A THEORETICAL PARADIGMS IN SOCIOLOGY. (3 credits; Permission of instructor required). The course will deal with some of the major paradigms used in sociology, including the evolutionary perspectives of the last century (Spencer, Morgan, Engels) and its modern variants, functionalism (both the Durkheim – Kingsley – Davis – Merton and the Durkheim – Mauss – Levi-Strauss traditions) and Freudianism, and then upon more limited paradigm traditions, including Durkheim on suicide and on religion, and Weber on bureaucracy and the rise of capitalism.
Professor Carroll

166-504B QUANTITATIVE METHODS OF SOCIAL RESEARCH. (3 credits; Prerequisite: 350A Elementary Statistics in Sociology and Anthropology and 361A Introduction to Quantitative Analysis). This course will cover a number of ways of analyzing quantitative data (especially data in large data sets): multiple regression, analysis of variance, analysis of covariance; path modelling; factor analysis; log-linear modelling; demographic techniques. Students will be expected to do a paper which involves quantitative analysis, preferably from research they have in progress.
Professor Rosenfeld

166-510A SEMINAR IN SOCIAL STRATIFICATION. (3 credits; Prerequisite: 166-223B Social Stratification or equivalent). This seminar will cover some of the basic theories of social stratification, that is, theories of structured inequality in society (e.g. along the dimensions of wealth, income, education, occupation, class) in more depth than in 166-223B. There will be core readings which all students in the course will be required to discuss each week. An analytical paper or research project will be required.
Professor Rosenfeld

- **166-515B THE SOCIOLOGY OF MEDICINE.** (3 credits; Prerequisite: Introduction to Sociology, Sociology 166-309A or equivalent). A study of the broad scope of the field of the sociology of medicine and the more specific sub-fields of interest, such as: the sociology of illness, the occupations involved in the provision of health services, the organizational settings of health care, or the politics of change in national or community health care systems. (Not open to students who have taken 166-615B).
Professor Solomon

166-520A MIGRATION AND IMMIGRANT GROUPS. (3 credits; Prerequisite: 15 credits in the Social Sciences). This course will review the major demographic, economic and sociological theories of internal and international migration. The main emphasis will be on the empirical aspects of research on migration and immigrant groups. Students will be expected to participate in research projects on immigrant groups in the city of Montreal. Since 166-520A and 166-630B are co-ordinated in terms of design, bibliography and content, students in 166-520A will be encouraged, though not required, to enroll in 166-630B the following term.
Professor Locher

166-535B SOCIOLOGY OF POPULAR CULTURE. (3 credits; Prerequisite: 166-217A Mass Communication and permission of instructor). A seminar exploring the nature of popular culture, tracing historical beginnings and contemporary changes in film, TV, comics, magazines, and rock music content. Primary emphasis is placed on developing theoretical perspectives and methodologies for analysing genres and themes, and for making distinctions between so-called folk and popular art. (Not open to students who have taken 166-435B).
Professor Robinson

- **166-552B CURRENT SOCIOLOGICAL THEORY.** (3 credits; Prerequisite: 166-451A). Examination of some major areas of current sociological work within a sociology of knowledge and science framework, focusing on apparent "growth edges" in the discipline; and an attempt to relate this current work to its background theoretic traditions, to illustrate it by present work in this Department; and to relate it to the students' own work.
Professor Krohn

Graduate Seminars

NOTE: The following graduate seminars are open to final year Honours students with adequate preparation.

- **166-618A SEMINAR: THE SOCIOLOGY OF WORK.**
Professor Westley
- **166-620A SEMINAR: SOCIAL MOVEMENTS.**
Professor Von Eschen
- **166-622A SEMINAR: PROBLEMS IN MASS COMMUNICATIONS.**
Professor Robinson

166-623A SEMINAR: CANADIAN CULTURAL AND COMMUNICATIONS POLICY.
Professor Robinson

- **166-625B SEMINAR: INDUSTRIAL SOCIOLOGY: THE ORGANIZATION OF PRODUCTION**
Professor Smith

166-626A SEMINAR: INDUSTRIAL SOCIOLOGY: UNIONIZATION AND STRIKES.
Professor Smith

166-627A SEMINAR: POLITICAL SOCIOLOGY.
Professor Hamilton

166-630B SEMINAR: MIGRATION AND MULTICULTURALISM IN QUEBEC AND CANADA.
Professor Eaton

166-635B SEMINAR: MULTI-LEVEL ANALYSIS.
Professor Nielsen

166-640A SEMINAR: QUALITATIVE METHODS OF SOCIAL RESEARCH.
Professor Solomon

166-661A SEMINAR: SOCIOLOGY OF KNOWLEDGE.
Professor Krohn

166-670B SEMINAR: COMPARATIVE URBANIZATION IN THE THIRD WORLD
Professor Locher

166-671A SEMINAR: DEVIANCE AND SOCIAL CONTROL.
Professor Rains

166-672B SEMINAR: SOCIAL CHANGE.
Professor Von Eschen

- **166-680D SEMINAR: APPLIED SOCIOLOGY & ALTERNATIVE ORGANIZATIONS.**
  Professors Smith & Westley
- **166-681B SEMINAR: SOCIAL MOVEMENTS**
  Professor Pinard
- **166-682B SEMINAR: ECONOMIC SOCIOLOGY**
  Professor Krohn
- **166-683D SEMINAR: WORLD SYSTEM.**
  Professor
- **166-684B SEMINAR: DEVIANCE AND THE LABELING PERSPECTIVE.**
  Professor Spector

166-685B SEMINAR: SOCIAL PROBLEMS.
Professor Spector

166-720A,B READING IN SOCIAL THEORY.
Staff

166-730A,B READING AND RESEARCH.
Staff

109-671A SEMINAR: DESIGNING EFFECTIVE COMMUNICATION. (See English Department for description.)
Professor Hillgartner

- *Not given in 1977-78*

URDU-HINDI (397)

397-110D INTRODUCTION TO URDU-HINDI. (6 credits; 5 hours, 1 lab.) Pronunciation, basic grammar and vocabulary, oral drills, both the Urdu (Arabic-Persian) and the Hindi (Deva-Nagari) alphabets, simple readings. This course is designed to allow the student to continue on to Elementary Urdu or to Elementary Hindi.

397-210D ELEMENTARY URDU. (6 credits; 4 hours, 1 lab.) Further grammar and drills, prose, and poetry readings, composition, taxonomy, mechanisms of pathogenicity, modes of transmission and control.

PROGRAM INFORMATION

The Faculty of Science offers the Bachelor of Science degree (B.Sc.).

The Faculty of Science and the Faculty of Arts offer similar patterns of study towards their degrees. A student may choose among the Faculty programs, Major programs or Honours programs as described in the introductory section of this Announcement common to both Faculties. (See page10).

FACULTY PROGRAMS

NOTE: A description of the Biological Sciences Core Curriculum may be found on page 151.

ANATOMICAL SCIENCES

The courses of the Biological Sciences Core Curriculum as listed in the Department of Anatomy page 147. (27 Credits); Chemistry 180-212A, B; 180-222A,B; Anatomy 504-26lA (Histology); 504-311A (Musculo-Skeletal); 504-312B (Visceral); 504-321A (Neuroanatomy); (21 credits); plus 12 credits from upper year Biology, Biochemistry, Physiology, and Microbiology and Immunology courses.

60 credits: consult the Department of Anatomy for an Adviser.

BIOCHEMISTRY

U1: (30-31 credits) Biology 117-201D; Chemistry 180-222A,B, 180-204A or 180-213A, 180-214B or 180-223B; one of the following: Physiology 552-211D, Biology 177-205D, Chemistry 180-281A,B and 180-253B; Mathematics 189-231A,B, and 6 additional credits of electives chosen in consultation with the Adviser.

NOTE: Students in the Faculty program who wish to keep the option of a transfer to Biology open should take Biology 177-205D and 206D in U1.

U2: (30 credits) Biology 177-301A, 177-302B; Biochemistry 507-311A, 507-312B, one of the following: Biology 177-373A, Mathematics 189-232A,B, Psychology 204-204A,B; Biology 177-303A or Chemistry 180-302A,B, and 12 additional credits of electives chosen in consultation with the Adviser.

U3: (30 credits) 12 credits are required from the following lists of courses; 3 of these credits must be taken from List A.

List A. Biochemistry 507-404B, 507-450A, 507-454A, 507-455B.

List B: Anatomy 504-26lA; Biology 177-205D, 177-303A, 177-310B, 177-311B, 177-314A; Chemistry 180-207A, 180-217A,B, 180-253B, 180-273A, 180-302A,B, 180-313A, 180-352B, 180-362A,B, 180-372B, 180-411A, Microbiology 528-311A, Physiology 552-211D.

An additional 18 credits from elective courses must be chosen in consultation with the Adviser.

54-55 credits: consult the Department of Biochemistry for an Adviser.

BIOGEOGRAPHY

Biology 177-205D*, 177-305A, 177-328B, 177-427A, 177-429B; Geography 183-214A or 183-300B, 183-201B*, 183-271A*, 183-272B*, 183-203D, 183-302D, 183-305A, 183-324B, 183-351B, 183-451D.

*Courses that should be taken in U1.

57 credits: consult the Department of Geography for an Adviser.

BIOLOGY

Biology 177-201D, 177-205D, 177-202B (or -274A), 177-206D; Chemistry 180-212A,B; (24 credits Biology courses; 12 credits science courses.

57 or 58 credits: consult the Department of Biology for an Adviser.

CHEMISTRY

Chemistry 180-212A,B*, 222A,B* or equivalent, 180-204A, 214B, 201A, 257D or equivalent, 301B, 313A, 387D, 302A,B; Mathematics 189-222A,B, 223A; Physics 198-232A,B; Computer Science 308-200A,B; nine additional credits from any of the following: Chemistry 331A, 352B, 356A, 363A,B, 372B, 373B, 383B, 392A,B,D, 393A,B and any 400 level courses in chemistry for which the prerequisites are satisfied; Mathematics 189-315A,B; Physics 198-339B.

The program consists of 47 prescribed credits to which an additional 9 credits are added through the optional courses (56 total credits).

***NOTE:** If the CEGEP equivalent of any of these courses has already been successfully completed, a more advanced course in the same discipline must be added to the program.

CHEMISTRY, BIOANALYTICAL OR GEOANALYTICAL

Common Chemistry Courses: Chemistry 180-207A, 213A, B†, 217A,B, 222A,B, 223A,B†, 227B, 237B, 313A or 323B, 363A,B, 393A,B or 247A or 267B, 387D, 457B. Chemistry 180-212A,B, must be added if this course has not been taken previously.

To complete Bioanalytical Chemistry; The Core Curriculum in Biological Sciences, page 151.

To complete Geoanalytical Chemistry: Mathematics 189-245A,B, 323A,B, 324A,B; Physics 198-232A,B, 339B; Computer Science 308-200A,B; Geology 186-210B, 211A, 501B. One additional Geology Course.

†Chemistry 180-204A, 214B may be taken by Biology students in lieu of Chemistry 180-213A,B, 223A,B.

55 – 58 credits: consult the Department of Chemistry for an Adviser.

CHEMISTRY AND BIOLOGICAL SCIENCES

Chemistry 180-222A, B, 204A†, 214B†, 207A, or 227B, 247A or 267B, 302A,B, 352B, 362A,B; Biology 177-201D, 205D, 301A,B; Mathematics 189-231D; Physics 198-232A,B, 339B; Physiology 552-211D; Computer Science 308-200A,B. Students lacking Chemistry 180-212A,B may take this program if they include this course in addition to those listed.

†Chemistry 180-213A,B and 233A may be substituted for 180-204A and 214B.

52-56 credits: consult the Department of Chemistry for an Adviser.

CHEMISTRY, INORGANIC/ANALYTICAL

Chemistry 180-212A,B, 222A,B, 213A,B, 223A,B, 201A, 227B, 247A, 267B, 301B, 307B, 313A, or 323B, 411A; Geology 186-210A, 211A, 213B; Mathematics 189-222A,B, 315A,B; Physics 198-232B; plus 6 approved credits.

59 credits: consult the Department of Chemistry for an Adviser.

CHEMISTRY RADIOANALYTICAL

Chemistry 180-201A, 207A, 212A,B, 213A,B, 222A,B, 223A,B, 227B, 301B, 313A, or 323B, 217A,B, 247B, 363A,B, 393A,B, or 247A or 267B, 387D, 411A, 457B; Mathematics 189-245A,B, 323A,B, 324A,B,; Physics 198-232A,B, 337B, 339B; Computer Science 308-200A,B.

62 credits: consult the Department of Chemistry for an Adviser.

CLIMATOLOGY

Computer Science 308-200A,B; Geography 183-203D*, -321B, -324A, -322A, -327B, -422B, -423A; Mathematics 189-222A,B*, -323A,B, -324A,B; Meteorology 195-210D*, -320A, -321B; Physics 198-233A; plus 3 approved credits.

*Courses that should be taken in U1.

55 credits: consult the Department of Geography for an Adviser.

DYNAMICS OF THE OCEANS AND ATMOSPHERE

Mathematics 189-222A,B, 189-223A, 189-314A,B, 189-315A,B, 189-319B, 189-316B, 189-317A,B,

189-555A; Meteorology 195-210D, 195-410A, 195-411B, 195-652D; Physics 198-23IA, 198-233A, 198-309A, 198-319B.

55 credits: consult the Department of Meteorology for an Adviser.

EARTH PHYSICS – A

Computer Science 308-200A,B; Geology 186-203B, 186-303A, 186-220A, Mining and Applied Geophysics 308-230B, six further credits in approved course in Geology; Mathematics 189-222A,B, 189-233A, 189-314A,B, 189-315A,B, 189-319B; Physics I98-231A,B, 198-232A,B, 198-233A, 198-339B, 198-432A, 198-434B.

58 credits: consult the Department of Physics for an Adviser.

EARTH PHYSICS – B

Computer Science 308-200A,B; Geography 183-271A, 183-272B; Geology 186-220A; Mathematics 189-222A,B, 189-314A,B, 189-323A,B; Meteorology 195-210D, 195-320A, 195-321B, 195-420D, 195-653D; Physics 198-232B, 198-233A, 198-309A, 198-334B.

56 credits: consult the Department of Meteorology for an Adviser.

GEOMORPHOLOGY

Geography 183-271A*, -272B*, or Geology 186-242A, -431B; Geography 183-321A or Geology 186-233B; Geography 183-325A, -453B; Geography 183-308B or Geology 186-535D; Geography 183-201B, 202A, 305A, 322A, 327B, 423B, 321A; Geology 186-210B*, -243B, -310D, -446A, -449B.

*Courses that should be taken in U1.

57 credits: consult the Department of Geography or the Department of Geological Sciences for an Adviser.

HYDROLOGY

Computer Science 308-200A,B; Engineering 303-107A,B; Geography 183-271A, -272B, -305A, -201A,B or -308A, -321A, -322A, -327B, -423B; Geology 186-243B, -449B; Mathematics 189-222A,B*; -314A,B*, -315A,B*, -323A,B, -324A,B; Physics 198-231A,B, or -233A.

*Courses that should be taken in U1.

55 credits: consult the Department of Geography for an Adviser.

MARINE GEOLOGY

Chemistry 180-201A, 180-301B, 180-213A,B; Geology 186-210B, 186-211A, 186-203B, 186-303A, 186-233B, 186-312B, 186-220A, 186-310D, 186-343D, 186-347B; Marine Sciences 395-697B; Mathematics 189-222A,B; Physics 198-233A, 198-309A.

58 credits: consult the Department of Geological Sciences for an Adviser.

MATHEMATICS AND BIOLOGY

Mathematics 189-221A,B, 222A,B, 223A, 315A,B, 317A,B, 319B, 323A,B, 324A,B, 327B; Computer Science 308-200A,B; Biology 177-201D, 205D, 206D, 301A,B, 303A, 305A, 309A.

60 credits; consult the Department of Mathematics for an Adviser.

MATHEMATICS AND CHEMISTRY

Chemistry 180-212A,B, 213A,B, 223A,B, 313A, 323B, nine additional credits in Chemistry; three or six credits in electronics; Computer Science 308-200A,B; Mathematics 189-222A,B, 223A, 314A,B, 315A,B, 317A,B, 319B, 323A,B, 324A,B.

55-58 credits: consult the Department of Chemistry for an Adviser.

MATHEMATICS AND COMPUTER SCIENCE

Mathematics 189-222A,B, 223A or 245A,B, 315A,B, 317A, 318A,B, 323A,B, 324A,B, 327B, 328B; Computer Science 308-200A,B, 210A,B, 300A,B or 302A, 315A,B, plus 9 credits from Computer Science, plus 6 credits from Mathematics or Computer Science at the 300 level or above, with the consent of the Adviser.

54 credits: consult the Mathematics Department for an Adviser.

MATHEMATICS, CHEMISTRY AND PHYSICS

Chemistry 180-213A,B, 223A,B, 212A,B, 313A, 323B, three additional credits in Chemistry; Computer Science 308-200A,B; Mathematics 189-222A,B, 223A, 314A,B, 315A,B, 319B; Physics 198-231A, 232B, 339B, six additional credits in Physics.

54 credits: consult the Department of Mathematics for an Adviser.

MATHEMATICS AND PHYSICS

Computer Science 308-200A,B; Mathematics 189-222A,B, -223A, -314A,B, -315A,B, -317A,B, -319B, -323A,B, -324A,B; Physics 198-231A,B, -232A,B, -233A, -341B, -346D, -431A, -432A or 434B, -437B or -438B plus 3 or 6 credits chosen from 198-339B, 308-210A,B, 189-415A, 189-419B, 189-555D.

58 credits: consult the Department of Physics for an Adviser.

MATHEMATICS AND PSYCHOLOGY:

Mathematics 189-222A,B, 223A or 245A,B, 323A,B, 324A,B, 423A, 424B; Psychology 204-302A, 303B, 335A, 336B. Twelve credits selected from Mathematics 189-217A, 218B, 314A,B, 317A,B, 318A, 327B, 328B, 417A, 447B. Twelve credits selected from Psychology non-statistics courses; and three credits selected from Computer Science 308-200A,B, or 220A,B.

57 credits.(This faculty program leads to either a B.A. or a B.Sc. degree). Consult the Department of Mathematics or the Department of Psychology for an Adviser.

MICROBIOLOGY AND IMMUNOLOGY

U1: Biological Sciences Core Curriculum plus Chemistry 180-212A,B and 180-222A,B.

U2: Microbiology 528-311A, 528-314B; Biology 177-301A,B, 302A,B, 314A.

U2 and U3: Nine additional credits selected from courses offered by the Department.

53 credits: consult the Department of Microbiology and Immunology for an Adviser.

PALEOBIOLOGY

Biology 177-205D, 177-206D, 177-305A; Geology 186-234B, six credits chosen from 177-325A, 177-326B, 177-442D, 177-348D; Chemistry 180-213A,B; Geology 186-210B, 186-211A, 186-233B, 186-310D, 186-312B, 186-343D, 186-534D, and 3 approved credits.

57 credits: consult the Department of Geological Sciences for an Adviser.

PHYSICS

Mathematics 189-222A,B, 189-223A, 189-315A,B; Physics 198-231A,B, 198-232A,B, 198-233A, 198-235B, 198-328A, 198-329A,B, 198-346D; twenty-one credits chosen from: Geology 186-504B; Computer Science 308-200A,B; Mathematics 189-314A,B, 189-316B, 189-317A,B, 189-319A,B; Physics 198-331A, 198-334A, 198-341B, 198-431A, 198-432A, 198-434B, 198-437B, 198-438B, 198-439A,B, of which at least three credits must be chosen from the -400 series physics courses.

55 credits; consult the Department of Physics for an Adviser.

PHYSIOLOGY

U1: Biology 177-201D, Chemistry 180-204A,B, 180-212A,B, 180-214B, 180-222A,B; Mathematics 189-231A,B and Physiology 552-211D.

U2 and U3: Biology 177-301A,B, one of Biology 177-309A, 177-373A, or Mathematics 189-232A,B; Physiology 552-311D and three credits in upper level Physiology Courses; and 14 credits in upper level (300,400,500) courses in Anatomical Sciences, Biology, Biochemistry, Experimental Medicine, Microbiology and Immunology, and Pharmacology, and selected courses in other departments.

58 credits: consult the Department of Physiology for an Adviser.

PSYCHOLOGY

Any of the Major sequences in Psychology with the substitution of six credits from U2 courses in Psychology for Psychology 204-211D; 305A,B.

54 credits: consult the Department of Psychology, 392-4708, or Mr. Arnold Rosner, 392-4694 for an Adviser.

QUATERNARY STUDIES

Anthropology 151-357A, Biology 177-205D*, 177-305A, 177-352A, 177-353B, 177-427A and either 177-432A or 177-325A; Geography 183-271A*, 183-272B*, 183-321A, 183-324B, 183-305A, 183-451D and either 183-306A or 183-308B; Geology 186-431B; plus 3 approved credits.

*Courses that should be taken in U1.

54 credits: consult the Department of Geography for an Adviser.

MAJOR PROGRAMS

Major programs are available in the following disciplines; details are listed with the departmental entries in this Announcement.

Anatomical Sicences
Biochemistry
Biology
Chemistry
Crystallography
Geography
Geological Sciences
Mathematics
Meteorology
Microbiology and Immunology
Physics
Physiology and Physics
Psychology
Solid Earth Geophysics

HONOURS PROGRAMS

Honours programs are available in the following disciplines; details are listed with the departmental entries.

Anatomical Sciences
Biochemistry
Biology
Chemistry
Crystallography
Geography
Geological Sciences
Mathematics
Meteorology
Microbiology and Immunology
Physics
Physiology
Psychology
Solid Earth Geophysics

INTERDEPARTMENTAL HONOURS PROGRAM IN IMMUNOLOGY

(see page 182.

MINOR PROGRAMS

A Minor program in Computer Science is available to students in the Faculty of Science. For details see page 143. A Minor program in Electrical Engineer-

ing for Physics Major students has recently been approved; for details consult the Physics Department.

ANATOMY (504)

Professors Y. CLERMONT *(Chairman)*, C.P. LEBLOND; D.G. OSMOND
Associate Professors – B. KOPRIWA; P.K. LALA; D. LAWRENCE; N.J. NADLER; H. WARSHAWSKY
Assistant Professors – G.C. BENNETT; J.J.M. BERGERON; E. DANIELS; M.F. LALLI; H.J. MONIE; C.E. SMITH; M. WEINSTOCK; W.E. WILSON
Lecturers – W.C. LIM; S. SAUNDERS

Strathcona Anatomy and Dentistry Building.
Room 1/48, 3640 University Street,
Montreal, P.Q. H3A 2B2,
Telephone: 392-4881.

The Department of Anatomy is deeply concerned with basic research and teaching in Human Anatomy at the undergraduate, graduate and Medical and Dental School levels. The Department houses several units doing basic research into the structure and function of cells, tissues and organs and is well equipped to pursue subjects in cell biology using modern techniques of radioautography and electron microscopy. To carry out research the Department contains numerous large laboratories, a complete radioautography unit and a large electron microscopy unit with five electron microscopes. The teaching program benefits from the use of an advanced T.V. system. Thus, students contemplating an academic career in the Anatomical Sciences have a unique opportunity to work with people actively engaged in advanced research and to observe the influence of their work on the teaching of Anatomy and Histology.

PROGRAMS IN THE ANATOMICAL SCIENCES

The following courses of the Biological Sciences core curriculum are required for all programs in Anatomical Sciences: Biology 177-201D; 177-205D; 177-206D; Mathematics: 189-231A,B; Biology 177-301 A,B; 177-303A; one of the following; Biology 177-309B; 177-373A; Mathematics 189-232A,B; Psychology 204-204A,B. (Total of 27 credits).

FACULTY PROGRAM

(Total of 60 required credits). For details see Faculty Programs, page 143.

MAJOR PROGRAM

(Total of 58 required credits).

The courses of the Biological Sciences core curriculum as listed above (27 credits); plus, Chemistry 180-212A,B; 180-222A,B; Anatomy 504-261A (Histology); 504-311A (Musculo-skeletal); 504-312B (Visceral); 504-321A (Neuroanatomy); 504-462D (Dynamic Histology); and 504-431D (Seminars). Students are also advised to take Physiology 552-211D as an elective.

HONOURS PROGRAM

(Total of 82 required credits).

The Department offers an Honours Program for those students interested in a career in Anatomy. This program is the usual path for entry into Graduate studies in Anatomy. For the Honours program, students must have no failures in the CEGEP program and will register at the major level in U1. Entrance to the Honours Program is at the beginning of U2. The student must obtain a G.P.A. of at least 3.0 at the end of U1 with no subject below a "C" grade. It is expected that at the beginning of the third year, the students who wish to continue in the Honours Program will be those who feel that they have already committed themselves to a career in Anatomy. It will, therefore, be necessary to apply to the Departmental Chairman for maintenance of the Honours Program status at the beginning of U3. The Honours Degree will be recommended after successful completion of the Program with a C.G.P.A. of 3.0 with no course below a "C" grade at the end of U3.

The following courses constitute the Honours Program:

The courses of the Biological Sciences Core Curriculum as listed above (27 credits); plus, Chemistry 180-212A,B; 180-222A,B; 180-204A; Biology 177-302A,B; Anatomy 504-26lA (Histology); 504-311A (Musculoskeletal); 504-312B (Visceral); 504-321A (Neuronanatomy); 504-462D (Dynamic Histology); 504-431D (Seminars); 504-533D (Experimental Morphology); 504-433D (Research), making a total of 82 credits.

Course Descriptions

Registration in all Anatomy courses is restricted due to limited laboratory space. Therefore, *all students* must obtain Departmental permission to register in *any* course; students in the Anatomical Sciences Programs must have a signed Study Plan Form from a Departmental Adviser; students in programs which specifically require Anatomy courses must obtain signed permission from the Department at the time of registration; students who select courses in Anatomy as electives must obtain a signed Conditional Permission form from the instructor in that course and will be informed during the first lecture as to whether they can remain in the course.

504-261A INTRODUCTORY HISTOLOGY. (4 credits; 3 hours lectures, 2 hours laboratory). A light and electron microscope study of the principal mammalian tissues and organs with emphasis on human histology. Open to U1 students who are taking the Biological Sciences core curriculum courses concurrently, or to U2 students. See registration restrictions above.

504-213A ANATOMY OF THE LIMBS AND BACK. (4 credits; 1 hour lecture, 6 hours laboratory dissection per week). A specialized course in the anatomy of the limbs and axial system designed for Physiotherapists. This course is open by permission only to other specially qualified individuals.

504-311A HUMAN MUSCULO-SKELETAL ANATOMY. (3 credits; 2 hours lectures, 2 hours laboratory; Prerequisites: Completion of the U1 Biological Sciences core curriculum courses). Introduction to regional human anatomy devoted to a study of the skeleton and muscular system of the limbs and back, and the neuro-vascular structures in these regions.

504-312B HUMAN VISCERAL ANATOMY. (3 credits; 2 hours lectures, 2 hours laboratory; Prerequisites: First year Biological Sciences core curriculum courses and 504-311A). An introductory course in regional human anatomy of the head, neck and trunk, including the visceral systems (circulatory, respiratory, digestive and reproductive systems). This course, together with 504-311A constitutes a complete course in human anatomy at the introductory level.

504-321A GENERAL HUMAN NEUROANATOMY. (3 credits; 2 hours lectures, 2 hours laboratory; Prerequisites: Biological Sciences core curriculum courses for U1, and at least one other Anatomy course which may be taken concurrently; or, in special cases, by permission of the Department). Introductory course in neuroanatomy emphasizing the structure and function of the brain, spinal cord and peripheral nerves. (Not open to students who have taken 504-421A).

504-462D DYNAMIC HISTOLOGY. (6 credits; 2 hours lectures supplemented by occasional laboratory and seminars at suitable intervals; Prerequisites: 504-261A and the Biological Sciences core curriculum courses for U1 and U2). An advanced course to cover topics such as cell cycle, cell population kinetics and turnover of cell components.

504-481B HUMAN EMBRYOLOGY AND DEVELOPMENT. (3 credits; 2 hours lectures, 2 hours laboratory; Prerequisites: Biological Sciences core curriculum courses for U1 and U2; 504-261A 504-311A and 504-312B). A comprehensive study of human developmental anatomy. *Not given in 1977-78.*

504-431D SEMINARS IN MORPHOLOGICAL SCIENCES. (4 credits). One advanced research seminar per week over the entire year given by invited local or out-of-town speakers on their own current research activities. All biological science students are invited to attend, but only Anatomical Sciences Major and Honours students can take this course for credit.

504-433D RESEARCH PROJECTS IN ANATOMICAL SCIENCES. (12 credits; 2 full days, supplemented by additional time, when available). Prerequisites: Honours in Anatomical Sciences in the U2 year; Corequisites: Honours Program in U3. A full year's exposure to individually supervised, original research in anatomical sciences. The concentration will be on the application of morphological methods such as electron microscopy and radioautography to the solution of basic problems in cell biology. A research report, plus an oral examination by a Departmental Committee will evaluate the candidate's performance. (Not open to students who have taken 504-432D).

504-533D EXPERIMENTAL MORPHOLOGY. (6 credits; 3 hours per week, plus additional sessions). Prerequisites: Honours Program in Anatomical Sciences in U2; Corequisites: Honours Program in U3. A lecture and practical course on the use of experimental techniques applicable to morphological research. This course is designed for Honours and graduate students only and stresses methods currently used in the Department, such as radioisotopic tracers, radioautography, light and electron microscopy. For Honours students, this course is a desirable laboratory supplement to Dynamic Histology (504-462D).

BIOCHEMISTRY (507)

Professors – A.F. GRAHAM *(Chairman) (on leave);* M.J.FRASER; E.A. HOSEIN; D. RUBINSTEIN; S. SOLOMON; T.L. SOURKES, J.H. SPENCER; L.S. WOLFE

Associate Professors – R. BLOSTEIN; P.E. BRAUN; D.T. DENHARDT; R.M. JOHNSTONE; R.E.MACKENZIE; E.A. MEIGHEN; S. MILLWARD; A.R. WASSERMAN

Assistant Professors – P.J. DOLPHIN; E.M. HARPUR; W. MUSHYNSKI

Emeritus Professor – K.A.C. ELLIOTT

Lecturer – E. VADAS

Research Associate – K. HARBERS

Associate Members – M.K. BIRMINGHAM *(Psychiatry);* L.F. CONGOTE *(Exp. Medicine)* ; J. DUPRE *(Exp. Medicine)*; D. EDWARD *(Exp. Surgery)*; W.C. GALLEY *(Chemistry)*; L. GOODFRIEND *(Exp. Medicine)*; H. PAPPIUS *(Exp. Neurochemistry)* ; J.F. PERDUE *(Lady Davis Institute)*; C. SCRIVER *(Paediatrics)*; J. SHUSTER *(Exp. Medicine)*

Room 802, McIntyre Medical Sciences Building
3655 Drummond Street, Montreal,
P.Q., H3G 1Y6,
Telephone 392-4243.

Living organisms – animals, plants, and microorganisms – derive nutrients from their environment and metabolize these various compounds by a series of converging pathways. A relatively small number of metabolites is thus obtained, and can be used to produce energy and as starting material for synthesis of cellular components. The energy produced is used to convert the compounds via a

series of diverging metabolic pathways into important building blocks for the synthesis of macromolecules; e.g. nucleotides for DNA synthesis, amino acids for protein synthesis.

The biochemist is interested in the coordination and regulation of the many processes involved in this general scheme. The study of each of these processes in detail results in areas of specialization. For example, biochemists are interested in the mechanisms of nervous activity, muscle contraction, growth and aging, inheritance and evolution. They are finding out how light is used in the production of organic matter by green plants and how some creatures produce light. The knowledge and methods developed by biochemists are applied in all fields of medicine, in agriculture, and in many industries. Biochemistry is a science which is contributing to far-reaching changes in the life of mankind.

The Department of Biochemistry is located in the McIntyre Medical Sciences Building. The teaching and research laboratories are well equipped for modern biochemical research. All members of staff of the Department carry out research projects in collaboration with their students and postdoctoral fellows.

Honours, Major and Faculty programs are offered by this Department. The Honours program prepares students for postgraduate study in Biochemistry or a research carreer in hospital, university or industrial laboratories. The Major program is somewhat less specialised than the Honours program but provides a sound background for students who wish to have a professional career in Biochemistry and can also lead to postgraduate studies in the field. The faculty program is a more general program, offering students more opportunity to select courses in related fields of interest.

Inquiries about programs or courses should be directed to the Administrative Assistant, Department of Biochemistry, Room 802 McIntyre Medical Sciences Building, telephone:392-502l.

FACULTY PROGRAM

For details see Faculty Programs, page 143.

Entrance requirements for the Faculty program are: 6 credits elementary Biology, 6 credits general Chemistry, 3 credits organic Chemistry, 6 credits Calculus, 8-9 credits Physics.

MAJOR PROGRAM

Entrance requirements for the Major program are: 6 credits elementary Biology, 6 credits general Chemistry, 3 credits organic Chemistry, 6 credits Calculus, 3 credits Analytical Geometry and Vectors, 8-9 credits Physics.

Students may transfer into the Major program at any time provided they have met all course requirements.

NOTE: Students who wish to qualify for admission to *L'Ordre des Chimistes:* must complete 6 additional credits in physical chemistry and 4 additional credits in laboratory work as options or electives in their course program.

The following courses are required to complete the Major program in Biochemistry:

(Total of 66-67 required credits.)

U1: (31-32 credits) Biology 177-201D; Chemistry 180-222A,B, 180-204A or 180-213A, 180-214B or 180-223B; one of the following: Physiology 552-211D or Biology 177-205D or Chemistry 180-281A and 180-253B; Mathematics 189-222A,B; Chemistry 180-257D, and an additional 3 credit elective chosen in consultation with the adviser.

NOTE: If Chemistry 180-253B is taken as U1 option, then Chemistry 180-273A should be taken in U2.

U2: (29-32 credits) Biochemistry 507-311A, 312B; Biology 177-301A, 177-302B; one of the following: Biology 177-309A, 177-373A, or Mathematics 189-315A,B; Chemistry 180-302A,B; 180-352B or 180-372B, plus Chemistry 180-362B and 6-9 credits of electives chosen in consultation with the adviser.

U3: (27-30 credits) Biochemistry 507-450A, 507-454A, plus 9 credits from the following: Biochemistry 507-404B, 507-455B; Biology 177-303A, 177-310B, 177-314A; Chemistry 180-253B, 180-273A, 180-313A, 180-352B, 180-372B, 180-387D, 180-402B and an additional 12-15 credits of elective courses chosen in consultation with the adviser.

HONOURS PROGRAM

Admission to the Honours program will not be granted until U2. Students who wish to enter the Honours program in U2 should follow the U1 Major program. Those who satisfactorily complete the U1 Major program with at least a GPA of 3.1 and B in every required course are eligible for admission to the Honours program.

There is no admission to the Honours program in U3.

Promotion to U3 year is based on satisfactory completion of U2 courses with a GPA of at least 3.2 and a B in every required course. In borderline cases, the mark received in Biochemistry 507-311A/312B will be of particular importance for promotion to U3.

For graduation in the Honours program, the student must complete a minimum of 90 credits, pass all required courses with a grade of no less than B, and achieve a CGPA of at least 3.2.

Courses in the Chemistry Honours program may be substituted for comparable courses in the Biochemistry department with the permission of the Chemistry instructor. All other substitutions for required courses must have Biochemistry Departmental approval.

The following courses are required to complete the Honours program in Biochemistry.

(Total of 85 required credits)

U1: Students must complete the *U1 Major program* as prerequisite for admission to the Honours program at the U2 level. See Honours program description for further details.

U2: (29-33 credits) Biology 177-301A, 177-302B; Biochemistry 507-311A, 312B; Mathematics 189-315A,B; Chemistry 180-302A,B, 180-352B or 180-372B; plus Chemistry 180-362B; Chemistry 180-313A, plus a 3 credit science option.

NOTES: If Chemistry 180-253B is taken in first year then Chemistry 180-273A and 3 credits from: Physiology, Biology 177-205D or Biology 177-303A must be taken instead of Chemistry 180-313A; if one of these is a 6 credit course, 3 credits will satisfy the U2 science option requirement.

U3: (27-30 credits) Biochemistry 507-404B, 507-450A, 507-454A, 507-460A,B, plus 12 credits from the following lists of courses, 6 of which must be taken from List A.

List A: Biology 177-310B, 177-314A; Biochemistry 507-455B, 507-503A; Chemistry 180-402B, 180-475A.

List B: Biochemistry 507-49IB; Biology 177-303A, 177-311B; Chemistry 180-352B, 180-372B, 180-381A, 180-387D, 180-452A; Microbiology 528-311A, 528-314B; Pharmacology 549-461D; Physiology 552-311D.

Consult the Department of Biochemistry for an Adviser.

INTERDEPARTMENTAL HONOURS PROGRAM IN IMMUNOLOGY

The Departments of Biochemistry, Microbiology and Immunology and Physiology offer an interdepartmental Honours program in Immunology. Details of this program maybe found on page 182 of the Announcement.

Course Descriptions

177-301A,/302B. LABORATORY IN CELL AND MOLECULAR BIOLOGY. PARTS I AND II. (See Biological Sciences Core Curriculum listings).

507-311A CARBOHYDRATE AND LIPID METABOLISM. (3 credits; Prerequisites: Biology 177-201D; Co-requisites: Biology 177-301A, 177-302B). A general course in carbohydrate and lipid metabolism in mammalian systems, emphasizing the regulatory aspects at the molecular, cellular, and organ levels and their integration.
Professor Rubinstein

507-312B REGULATION OF NITROGEN METABOLISM. (3 credits; Prerequisites: Biology 177-201D, Biochemistry 507-311A). Regulation of degradative and biosynthetic pathways of amino acids (and protein synthesis), nucleotides in mammalian and unicellular systems. Emphasis is placed on regulation at the molecular level including the role of allosteric enzymes.
Professor Johnstone

507-404B BIOPHYSICAL CHEMISTRY. (3 credits; Prerequisites: Chemistry 180-204A, 180-214B or 180-213A, 180-223B; Chemistry 180-313A recommended. This course is also listed as Chemistry 180-404B). Molecular weight determination and hydrodynamic parameters, optical properties and structure analysis of biopolymers and application to biological systems. (Not open to students who have taken or are taking Chemistry 180-404B, or have taken 507-451B).
Professors Meighen and Galley (Chemistry)

507-450A PROTEIN STRUCTURE AND FUNCTION. (3 credits; Prerequisites: Biochemistry 507-311A, 312B and/or sufficient organic chemistry. Intended primarily for Biochemistry and Chemistry students at the U3 level). Primary structures of proteins and their evolution. Secondary, tertiary and quaternary structure of enzymes. Enzyme kinetics and mechanisms of catalysis. Multienzyne complexes. Allosteric enzymes.
Professors Fraser and Meighen

507-454A NUCLEIC ACIDS. (3 credits; Prerequisite: Biochemistry 507-311A, 312B or permission of instructor). Chemistry of mammalian, bacterial and viral nucleic acids; synthesis of polynucleotides; replication, transcription, translation and the control thereof.
Professors Denhardt and Spencer

507-455B NEUROCHEMISTRY. (3 credits, Prerequisite: Biochemistry 507-311A, 312B). Structure and composition of nervous tissue in relation to its functions. Special aspects of metabolism of nerve and brain including energy metabolism. Water and electrolyte balance. Exchanges between blood and brain, and between brain and cerebrospinal fluid. Neurotransmitters and modulators. Nutrition and development of the nervous system. Neuroendocrinology. Biochemistry of nervous and mental diseases.
Professors Sourkes, Wolfe and Staff

507-456B BIOCHEMISTRY OF MEMBRANES (3 credits; Prerequisites: Biochemistry 507-311A, 312B, Chemistry 180-214B or equivalent, or by consent of the instructors). *Not offered in 1977-78.* Intended for U3 level students. Biochemical and physiochemical approaches to membrane structure. Membrane biogenesis. Transport mechanisms and energy transduction in membrane systems. Immunochemical approaches to the cell surface. Receptor-effector interactions in membranes.
Professors Braun and Blostein

507-460A,B ADVANCED LABORATORY IN BIOCHEMISTRY. (6 credits; limited enrolment). The advanced biochemistry laboratory will consist of a set of experiments intended to illustrate various biochemical techniques.
Professors Denhardt, Millward and Staff

507-491B RESEARCH PROJECTS IN BIOCHEMISTRY. (6 credits; registration by departmental permission only; Prerequisite: Biochemistry 507-460A). Individual work on a project to be performed in a research laboratory.
Professor Braun and Staff

507-503A IMMUNOCHEMISTRY. (3 credits.) This course deals with the structure, genetics and function of immunoglobulins. Examples of immunochemical systems will be given.
Professor Shuster

BIOLOGICAL SCIENCES – CORE CURRICULUM

The Core Curriculum in Biological Sciences is a group of courses designed to form a basis for university level programs in the Biological Sciences. Thus, the Core courses do not form a separate program, but are used by the sponsoring departments as part of their various departmental programs. The Core Curriculum is sponsored jointly by the Departments of Anatomy, Biochemistry, Biology, Microbiology and Immunology, and Physiology.

Students in programs related to other Departments may take individual courses from the Core Curriculum. It should be noted that most upper year courses in the Biological Departments will have some Core courses as prerequisites, so sequential planning of courses needs to be done carefully.

Inquiries concerning the Biological Sciences Core Curriculum should be directed to the office of the Core Curriculum Director, Dr. Joan Marsden, Stewart Biological Sciences Building.

THE COURSES OF THE CORE CURRICULUM IN BIOLOGICAL SCIENCES

Course Descriptions

177-201D CELL AND MOLECULAR BIOLOGY. (6 credits; 2 or 3 lectures per week, 1 hour conference every alternate week; Prerequisite: CEGEP Biology). This course is designed to give the student a comprehensive account of the cell in terms of its chemical and physical properties and includes discussions of cell ultrastructure; bioenergetics and biosynthetic pathways; selected biophysical processes; gene expression and regulation mechanisms operative in the control of metabolism. It will be assumed that students have already taken a minimum of 3 credits in organic chemistry (180-212A or equivalent.) Further credits in organic and physical chemistry are desirable.
Professor Bussey and Staff

177-202B BASIC GENETICS. (2 credits; 2 hours lectures, 1 hour conference; Prerequisites: 177-111A and -112B, or equivalent; Co-requisite: 177-201D). The principles of heredity in theory and practice illustrated mainly by examples from man. Not open to students who have taken or are taking 177-274A,B
Professors Trasler and Boothroyd

177-205D BIOLOGY OF ORGANISMS. (6 credits; 3 hours lectures; Prerequisite: 177-111A or equivalent). A study of organisms from the standpoint of structural and physiological adaptation to the environment. Development of the basic levels of organization. Mechanisms of evolution. Adaptations necessary for major evolutionary advances. Life in aquatic, terrestrial and aerial environments.
Professor Manley and Staff

177-206D LABORATORY COURSE IN BIOLOGY OF ORGANISMS. (3 credits; 1 laboratory per week or its equivalent throughout the year; Co-requisite: 177-205D). A companion course to the lecture series in Biology of Organisms. Examination of the functional morphology of micro-organisms, plants and animals, both living and fossil. Experimental studies on the physiological adaptations of organisms to their environment.
Professor Pasztor and Staff

189-231A,B MATHEMATICS FOR BIOLOGISTS. (3 credits; 3 hours lectures; Prerequisite: 189-121A,B or equivalent). Introductory probability theory, vectors and matrices, differential and difference equations with applications to the biological sciences.
Professor Turner (Mathematics Dept.)

177-301A,B LABORATORY IN CELL AND MOLECULAR BIOLOGY (PART 1). (3 credits; 1 lecture and one 6-hour laboratory per week; Prerequisite: 177-201D). A half course in laboratory techniques. Together with 177-302A,B, this laboratory course is divided into three 8-week sections which are organized independently in three separate locations. Each section is divided into parts (a) and (b). The topics covered in each are listed under Biology 302A,B. Students taking Biology 301A may choose parts (a) and (b) of any one section, plus (a) of another section. Students taking Biology 301B start with part (b) of any one section, followed by parts (a) and (b) of any other section.
Professor Poole and Staff

177-302A,B LABORATORY IN CELL AND MOLECULAR BIOLOGY (PART 2). (3 credits; 1 lecture and one 6-hour laboratory per week; Prerequisite: 177-301A,B; this course is restricted to those students whose programs require it).

Together with Biology 301A,B this laboratory course is divided into three sections. Each section is divided into parts (a) and (b) listed below. Students required to take a full year of laboratory work, as recommended for certain programs, may do so by registering for 301A followed by 302B, or 301B followed by 302A. It is not possible to take 301A and 302A or 301B and 302B. These students will complete all experiments listed below (though not necessarily in sequence).

Section 1

a) Isolation of DNA, hydrolysis and paper and thin layer chromatography of bases. Metabolism of C^{14} by rat adipose tissue; chemical separation of metabolic products and radioactive counting.

b) Exercise on radioactivity and planchet counting. Subcellular fractionation of tissue; enzymic and chemical markers of organelles: brief enzymology.

Section 2

a) Ionization, pH and electrophoresis. Photosynthesis in green algae and in isolated chloroplasts. Isolation of mitochondria and study of electron transfer using oxygen electrodes. Spectrophotometry. Membrane potentials and ions.

b) Enzyme purification and assay. Protein measurement. Enzyme kinetics. Separation of proteins and estimation of molecular weight by gel filtration.

Section 3

a) Microbial metabolism: control mechanisms and inhibition of macromolecular syntheses.

b) Microbial genetics: conditional mutants of DNA synthesis and repair of DNA; bacteriophage growth; genetic fine structure analysis; chromosome mapping in bacteria.

Professor Poole and Staff

177-303A DEVELOPMENTAL BIOLOGY. (3 credits; 2 lectures and 2 hours discussion per week and 3-4 3-hour laboratories; Prerequisite: 177-201D). A course designed to acquaint the student with the fundamental processes and principles operating during embryogenesis of both plants and animals. The developmental process will be considered at the molecular, cellular and organismal levels to give a total appreciation of developmental phenomena.
Professors Fromson and Brandhorst

177-305A ENVIRONMENTAL BIOLOGY. (3 credits; 3 hours lectures; Prerequisite or Corequisite: 177-205D). An introduction to the principles of ecology, dealing with individuals, populations and communities of plants and animals, and concluding with a consideration of Man's relationship with the environment.
Professor Peters and Staff

177-309A MATHEMATICAL MODELS IN BIOLOGY. (3 credits; 2-1½ hours lectures per week; Prerequisites: 189-231A,B, and elementary calculus or permission of instructor). Application of finite difference and differential equations to problems in cell and developmental biology, ecology, and physiology. Qualitative, quantitative and graphical techniques are used to analyze mathematical models and to compare theoretical predictions with experimental data.
Professor Glass (Physiology Department)

BIOLOGY (177)

Professors – W.G. BOLL; E.R. BOOTHROYD; P.S. DIGBY; F.C. FRASER; S.P. GIBBS; P.R. GRANT; E. KÄFER-BOOTHROYD; J. KALFF; G.A. MACLACHLAN; J. R. MARSDEN; J.D. METRAKOS *(on leave)*; B.B. MUKHERJEE; F. RIGLER *(Chairman)*; C.M. WILSON

Associate Professors – A.N. AUCLAIR; A.H. BUSSEY; R. CHASE *(on leave)*; D. FROMSON; M.E. GOLDSTEIN; W. LEGGETT; R.E. LEMON; G. MANLEY; W.C. OECHEL *(on leave)* V.M. PASZTOR; R.J. POOLE; R.O. SATTLER; R. SINCLAIR *(on leave)*; K. SITTMANN; J.L. SOUTHIN; D. TRASLER; H. TYSON *(on leave)*

Assistant Professors – B.P. BRANDHORST; D.L. KRAMER; M. LECHOWICZ; R.L. LEVINE; R. PETERS; D.P.S. VERMA

Senior and Head Demonstrators – S. CAHN; C. McFARLANE; E. SHAPIRO; J. VLACHAPOULOU

Affiliated Staff – R.L. CARROLL *(Redpath Museum)*; N. CROLL *(Parasitology Inst.)*; M.J. DUNBAR *(on leave) (Marine Science)*; F. GLORIEUS *(Shriners Hospital)*; W.F. GRANT *(Agriculture, Macdonald College)*; P. HECHTMAN *(Paediatrics)*; J. LEWIS *(Redpath Museum)*; R. MACLEOD *(Microbiology Macdonald College)*; J. McFARLANE *(Entomology)*; L. PINSKY *(Paediatrics)*; H. REISWIG *(Redpath Museum)*; C.R. SCRIVER *(Paediatrics)*

Most staff and laboratories of the McGill Department of Biology are located in the Stewart Biological Sciences Building, 1205 McGregor Street (between Peel and Drummond.) The first six floors of the west wing (W2 to W7) and four floors of the north wing (N3 to N6) contain teaching and research laboratories, staff offices, services and administrative centres. The main office is in W4/room 5 (phone 392-4643). The Senior Program Adviser, Mrs. S. Cahn, is in room W4/8a (phone 392-5828), the Biology Student Union is in W2/4 (phone 392-5765). The south wing contains the greenhouses, Botany and Genetics Library (S3/1) and lecture theatres.

Some full-time and affiliated members of the Department have offices and laboratories elsewhere, e.g., at the Redpath Museum, Marine Sciences Centre, Macdonald College, Montreal Children's and Jewish General Hospitals, and some courses are conducted partly in these locations. Course field work is carried out in

facilities at Mt. St. Hilaire, the Morgan Arboretum, Huntsman Marine Laboratories (New Brunswick), the Bellairs Research Institute (Barbados). Libraries at McGill which are used by biology students include the Redpath Undergraduate Library, the Blacker-Wood Library of Zoology, the Botany-Genetics Library and the McIntyre Medical Library.

The Department of Biology was created in June, 1970, by fusion of 3 former Departments (Botany, Genetics and Zoology). Currently it has approximately 50 teaching staff, 50 non-academic supporting staff (secretaries and technicians), 100 graduate students and/or postdoctoral fellows and 7000 undergraduate course registrations.

This Department does not attempt to offer courses or programs in all branches of Biology. At the graduate level, its resources are focused on development of four main areas of study: Cell Molecular and Developmental Biology, Ecology, Human Genetics, Neurobiology and Behaviour. Major and Honours degrees are offered in these fields and also in Marine Biology and Plant Sciences. In order to ensure that its graduates have had a suitably broad general background in modern biology, whatever their branch of specialization, this department co-operates with four departments in the Faculty of Medicine to give a Core Curriculum of basic courses in the biological sciences. Much of the core is required for the various B.Sc. degree programs offered in these departments and most courses in U2 and U3 are given at a level which assumes one or another of the core courses as prerequisite.

Three types of programs lead to the B.Sc. degree in Biology (Faculty Program, Major and Honours). The Faculty and Major Programs can be used as prerequisites for entry here or elsewhere to various graduate programs in the biological and bio-medical sciences, or to professional schools (medicine, agriculture, nursing, library science, education, etc.). They also fulfill direct requirements for many jobs, e.g. technical posts in industry and government laboratories, hospitals and research institutes. The Honours program is designed specifically for students intending to proceed to graduate school and to a research career, and is not recommended for students who do not have these interests or career objectives.

Entrance requirements to B.Sc. Programs are established by the Faculty of Science and, for the year 1977-78, include introductory courses in Mathematics, Physics, Chemistry and Biology. The *minimum* prerequisite in Biology is one course (currently Biology 301 at CEGEP or 177-111A, which deals mainly with Organismal Biology). Students intending to register in any B.Sc. or M.D. Program sponsored by the Biology or Medical Departments would be well advised to take in advance the companion Biology course (Biology 401 at CEGEP or 177-112B which deals mainly with Cell and Molecular Biology). Our registration advisers generally expect entering students who have not taken this course before to take the McGill equivalent before proceeding to the core course which builds on it (177-201D). The latter is also given on the assumption that students enter with a background in organic chemistry (e.g. Chemistry 202-202 at CEGEP or are taking the McGill equivalent (180-212A,B) concurrently.

UNDERGRADUATE PROGRAMS

The courses listed below are not described in any great detail. For those who want more information, the department has prepared a "Blue Book" (sold at the McGill Bookstore), entitled DEPARTMENT OF BIOLOGY UNDERGRADUATE PROGRAMS 1977-78, which describes in detail the content of each course and the level at which it is given, the aims and methods used, lecturers, references, grading procedures, etc. The book also contains more information on registration, counselling, committee structure and the research interests and facilities which are represented in the department.

FACULTY PROGRAM

The Faculty Program in Biology has been designed with a minimum of specified required courses in order to accommodate those students who are either undecided about the area in which they wish to specialize or interested in combining biology with some other field not emphasized in this Department. Students registered in the Faculty Program may (with approval of a staff adviser) design their own programs around specific interests or to develop programs with a broader base by incorporating courses from other disciplines. Requirements of the Faculty Program in Biology are listed on page 143 together with other Science Faculty Programs; some of these include a sequence of courses in Biology.

MAJOR IN BIOLOGY

There are seven options in the Biology Major Program. These have been designed to offer specialized training in those areas of biology in which the Department has physical resources and the expertise to offer a variety of courses. They are recommended to students who have a clear interest in one of these subject areas, and who wish to obtain an intensive training in it. The requirements of the various options are listed below. Courses are listed in the recommended sequences taking prerequisites and time table into account.

NOTE: 301A,B. Because of space limitations, students in Animal Behaviour, Human Genetics and Marine Biology Option are requested to postpone 177-301A,B, until their final year. Students who need 177-301A,B, this year must obtain permission of the instructor.

ANIMAL BEHAVIOUR OPTION. (60 credits):

U1: Bology 177-201D, -202B (or 274A), -205D, -206D.

U1 or U2: Chemistry 180-212A,B;
Mathematics 189-231A,B;
Psychology 204-201D.

U2: Bology 177-391A, -392B.

U2 or U3: Biology 177-301A,B, -305A plus one of the following courses:
Bology 177-309A, -373A;
Mathematics 189-232A,B;
Psychology 204-204A,B.

Plus 15 credits in U2 or U3 from the following:
Biology 177-303A, -325A, -326B, -340A, -348D, -349B, -351B, -354B, -385B, -386A, -389B, -394B, -427A, 477A,B (or 478A,B) -493B;
Psychology 204-300A, -308D, 340A, -404B, -423A, -424B.

CELL, MOLECULAR AND DEVELOPMENT OPTION. (61 or 62 credits):

U1: Biology 177-201D, -202B (or -274A), -205D, -206D;
Chemistry 180-212A,B, -222A,B.

U1 or U2: Chemistry 180-204A or 213A,B;
Mathematics 189-231A,B.

U2: Biology 177-301A,B, -302A,B, -303A.

Plus one of the following courses:
Biology 177-309A, -373A;
Mathematics 189-232A,B.

Plus 12 credits in U2 from the following:
Biology 177-310B or-422A and -522B; -313B or -321A (and -323B optional); -320B or -417A; -312A or 314A; -311B or -465B or -315B;

Up to 6 credits from:
Biochemistry 507-311A, -312B or
Chemistry 180-302A,B or -214B or -223A,B.

Plus 6 credits in U2 or U3 from any courses of the above list or the following:
Biology 177-305A (or other whole organism course – see Blue Book for list), -316B, -350A, -357A, -476B, -477A,B, (or -478A,B), -524B;
Anatomy 504-261A;
Biochemistry 507 -404B, -450A, -454A;
Microbiology and Immunology 528-314B, -423A, -424A;
Physiology 552-411A;
Physics 198-217B.

ECOLOGY OPTION. (60 credits):

U1: Biology 177-201D, -202B (or -274A), -205D, -206D, -305A, -306A (optional);
Chemistry 180-212A,B;
Mathematics 189-231A,B.

U2 or U3: Biology 177-301A,B, -303A and one of the following courses:
Biology 177-373A (recommended) or one of Biology 177-309A, Mathematics 189-232A,B.

Plus 12 credits in U2 or U3 from the following:
Biology 177-325A, -326B, -328B, -331G, -385B, -427A, -429A, -575A.

Plus 11 or 12 credits, in U2 or U3, from the above or the following:
Biology 177-334B, -345A, -348D, -349D, -350A, -351B, -354B, 355A, -357A, -358A, -391A, -392B, 432A, 442D, -477A,B (or -478A,B), -587B
Geography 183-321A, -423B, -451D;
Computer Science 308-220A,B.

HUMAN GENETICS OPTION. (58 or 59 credits):

U1: Biology 177-201D, -202B, or 274A, -205D, -206D;
Chemistry 180-212A,B;
Mathematics 189-231A,B.

U1 or U2: Chemistry 180-222A,B, -204A or 213A,B.

U2: Biology 177-370B

U2 or U3: Biology 177-301A,B, -303A, -372B and one of the following courses:
Biology 177-373A (recommended) or one of Biology 177-309A,
Mathematics 189-232A,B,
Psychology 204-204A,B.

Plus 12 credits, in U2 or U3 from the following:
Biology 177-305A, -310B, -313B or -321A, -314A, -320B, -323B, -417A, -476B -422A, 477A,B (or -478A,B) -522B, -524B, -575A;
Anatomy 504-261A;
Biochemistry 507-311A, -312B or
Chemistry 180-302A,B;
Microbiology and Immunology 528-314B;
Pathology 546-300A;
Psychology 204-430B.

MARINE BIOLOGY OPTION. (61 or 62 credits):

U1: Biology 177-201D, -202B or -274A, -205D, -206D;
Chemistry 180-212A,B, -222A,B;
Mathematics 189-231A,B.

U2 or U3: Biology 177-301A,B, -305A, -348D, -442D.

Plus 9 credits in U2 or U3 from the following:
Biology 177-306A, -325A, -326B, -328B, -331G, -340A, -349B, -351B, -359B, -373A*, -384A, -432A, 390B

Plus 6 credits from the following:
Computer Science 308-220A,B;
Geography 183-110A, -112B or -203D;
Geology 186-201A, -233B, -234A;
Meteorology 195-210D;
Physics 198-309A.

* 177-373A is recommended, but may be replaced by Mathematics 189-232A,B, or Psychology 204-204A,B.

NEUROBIOLOGY AND COMPARATIVE PHYSIOLOGY. (60-61 credits):

U1: Biology 177-201D, -202B or -274A, -205D, -206D;
Mathematics 189-231A,B;
Chemistry 180-212A,B.

U2 or U3: Biology 177-301A,B, -305A, -386A, -389B
and one of the following courses:
Biology 177-309A, -373A;
Mathematics 189-232A,B;
Psychology 204-204A,B;

U3: Biology 177-587B or 588A

Plus 18 credits in U2 or U3 from the following:
Biology 177-303A, -306A, -311B or 390B, -345A, -350A, -391A, -392B, -394B, -477A,B (or -478A,B), -587B or -588A;
Psychology 204-308D*, -342B*, -422B*, -423A*, -424*;
Biochemistry 507-302D*, -455B*;
Anatomy 504-321A;
Physiology 552-211D, -312D*, -455D*;
Experimental Medicine 516-502D.

* For courses in Departments other than Biology, prerequisites will have to be taken as electives

PLANT SCIENCE OPTION (60 credits)

U1: Biology 177-201D, -202B or -274A, -205D, -206D;
Chemistry 180-212A,B;
Mathematics 189-231A,B.

U1, U2 or U3: Biology 177-301A,B, -305A, -355A -357A, -358A, -429A.

Plus 18 credits from the following:

U1-U3: Biology 177-303A, -306A, -316B, -356B, -359B, -361A, -362A, -363B, -364B;
Chemistry 180-222A,B.

U3: Biology 177-315B or -465B, -477A,B, (or 478A,B);
Geography 183-451D.

HONOURS IN BIOLOGY

The Honours program in Biology is designed expressly as a preparation for graduate studies and research, and provides students with a broad training in Biology and some research experience in a chosen area. A student may apply to enter the Honours program from any of the Biology Major Options at the end of the first term of the U2 year. Students who may be considering Honours should consult their advisers early in U2 to make sure they are taking the appropriate program. Requirements for Honours are: 1) a cumulative GPA of 3.5 or better at the end of U2; 2) acceptance of a 9-credit Independent Studies proposal (see listing of 177-479D for details); 3) attainment of a minimum GPA of 3.2 in the U3 year; 4) adherence to the following program:

U1: (24 or 25 credits): Biology 177-201D, -202B or -274A, -205D, -206D; Chemistry 180-212A,B; Mathematics 189-231A,B.

U1-U3: (42 credits): Biology 177-301A,B, -303A, -305A, -373A; plus 24 credits biology and science courses to fulfil one Major option; plus 6 credits post-core biology courses not listed in above Major Program.

U3: (13 credits): Biology 177-479D, -499D.

Course Descriptions

PRE-CORE COURSES

177-111A PRINCIPLES OF ORGANISMAL BIOLOGY. (3 credits; 2 lectures and one 3-hour laboratory per week; Prerequisite: none.) This course is an introduction to the structure, function and adaptation of plants and animals in the biosphere. Open to all students (B.Sc., B.A., B.Ed., B.Eng., etc.) wishing introductory biology. This course serves both as a prerequisite for Biology 177-205D and 177-206D, and as an alternative to CEGEP Organismal Bology. **Professors Levine and Goldstein**

177-112B INTRODUCTION TO CELL AND MOLECULAR BIOLOGY. (3 credits; 2 lectures and a 3-hour laboratory or seminar period per week; Prerequisite: none). The cell: ultrastructure, division, chemical constituents and reactions. Bioenergetics: photosynthesis and respiration. Principles of genetics and the molecular basis of inheritance. This course serves as a prerequisite for Biology 177-201D and as an alternative to CEGEP Cell Biology. **Professor Southin**

*THE COURSES OF THE CORE CURRICULUM IN BIOLOGICAL SCIENCES**

177-201D CELL AND MOLECULAR BIOLOGY. (6 credits)

177-202B BASIC GENETICS. (2 credits)

177-205D BIOLOGY OF ORGANISMS. (6 credits)

177-206D LABORATORY COURSE IN BIOLOGY OF ORGANISMS. (3 credits)

189-231A,B MATHEMATICS FOR BIOLOGISTS. (3 credits)

177-301A,B LABORATORY IN CELL AND MOLECULAR BIOLOGY (PART 1). (3 credits)

177-302A,B LABORATORY IN CELL AND MOLECULAR BIOLOGY (PART 2). (3 credits)

177-303A DEVELOPMENTAL BIOLOGY. (3 credits)

177-305A ENVIRONMENTAL BIOLOGY. (3 credits)

177-309A MATHEMATICAL MODELS IN BIOLOGY. (3 credits)

* *Complete descriptions of these courses may be found on page 151.*

POST-CORE COURSES

177-246A MODERN BIOLOGY AND THE PREDICAMENT OF MAN. (3 credits; 3 lectures per week; Prerequisite: introductory biology course or permission of instructor). A critical discussion of fundamental concepts and theories of modern biology with emphasis on those aspects that are relevant to the human situation in our present society. Examples from molecular and organismal biology, sociobiology, ecology, and evolutionary biology. NOTE: This course has no prerequisites; it is designed for students in areas other than biology. Students in biology Honours and Major programs and in the Faculty program may take this course as an elective but may not use credit in this course towards meeting requirements of prescribed programs.
Professor Sattler

177-274A PRINCIPLES OF GENETICS. (3 credits; 3 hours lectures, 1 hour conference, optional; Prerequisites: 177-111A and -112B or equivalent). A survey of the gene as the fundamental unit of heredity, with a special emphasis on human genetics. Not open to students who have taken or are taking 177-202B.
Professor Boothroyd and Staff

177-306A STUDIES IN ENVIRONMENTAL BIOLOGY. (1 credit; 3 research hours per week in the student's home or 1 seminar per week; Corequisite: 177-305A). A companion course to the lecture series in Environmental Biology. The research project stresses the testing of one ecological hypothesis through experimentation. The examination of 10 papers in the seminar will introduce some of the best ecological works and strengthen the student's capacity to read scientific papers critically and thoroughly.
Professor Peters

177-310B GENERAL MOLECULAR GENETICS. (3 credits; 3 hours lectures, one period every other week used for conferences; Prerequisite: 177-201D). A survey of current topics in molecular genetics, including the replication, transcription and translation of nucleic acids and the regulation of these processes.
Professor Bussey

177-311B BIOPHYSICAL APPROACH TO CELL FUNCTION. (3 credits; 2 hours lectures, 1 hour seminar; Prerequisites: 177-201D, 180-214B). *Not given in 1977-78.* Structure and function of membranes: state of membrane lipids, transport mechanisms, electrical potentials, electron transfer, phosphorylation and energetics of photosynthesis and respiration.
Professor Poole

177-312A CELL GROWTH. (3 credits; 2 hours lectures, 1 hour conference; Prerequisite: 177-201D). *Not given in 1977-78; given in 1978-79.* Molecular events, metabolism and control mechanisms in the growth and death of cell populations *in vivo* and *in vitro*. Molecular and organelle progression through the cell cycle. Models of cell growth.
Professor Sinclair

177-313B THE ULTRASTRUCTURAL BASIS OF CELL FUNCTION. (3 credits; 2 hours lectures, 2 hours seminar; Prerequisite: 177-201D). *Not given in 1977-78.* A detailed discussion of the functional organization of cells.
Professor Gibbs

177-314A MOLECULAR BIOLOGY OF SOMATIC CELLS. (3 credits; 3 hours lectures; Prerequisite: 177-201D). Molecular biology and genetics of somatic cells will be discussed with emphasis on recent studies on the mechanism of cell transformation by oncogenic RNA and DNA viruses, and on the origin of the genes for neoplosia.
Professors Mukherjee and Pinsky

177-315B TOPICS IN PLANT CELL BIOPHYSICS AND BIOCHEMISTRY. (3 credits; 3 hours lectures; Prerequisite: 177-201D). The course will deal with areas of current research interests, including: photosynthetic and other light-evoked processes; electron, proton and ion transfer through membranes; hormone action; N_2-fixation; regulation of cell-surface glycoprotein and polysaccharide assembly, etc. (Not open to students who have taken 177-311B or 465B).
Professors Maclachlan and Poole

177-316B PLANT GROWTH AND MORPHOGENESIS. (3 credits; 2 hours lectures and seminar; Prerequisite: 177-357A or permission of instructor). *Given in 1977-78; not given in 1978-79.* Physiological, biochemical and physiological-genetic approaches to the study of growth, differentiation and morphogenesis. Hormones and growth regulators, environmental control, physiology of reproduction, and other topics are discussed at a more advanced level than in 357A.
Professor Boll

177-318B DEVELOPMENTAL BIOLOGY, EXPERIMENTAL. (3 credits; 1 hour lecture, 1 hour discussion, 3 hours laboratory; Prerequisite: 177-303A and/or permission of instructor). *Not given in 1977-78.* Developmental parallels between unicellular and multicellular organisms in the areas of environmental inductions, immuno -differentiation, growth,

morphogenesis and differentiation. Laboratory projects concern external influences on development, using protozoa as experimental organisms.
Staff

177-319C DEVELOPMENTAL BIOLOGY, MARINE. (Field course; 3 credits; 3 weeks fulltime, lectures and laboratory; Prerequisite: 177-303A or equivalent, permission of instructor). *Not given in 1977-78.* The course includes both comparative and experimental studies on embryos of marine organisms available at the Huntsman Marine Laboratory, St. Andrews, in the spring.
Staff

177-320B GENE ACTIVITY IN DEVELOPMENT. (3 credits; 2 hours lectures, 1 hour discussion; Prerequisites: 177-303A; 177-310B recommended, or permission of instructor). An assessment of the experimental work dealing with gene activity and its regulation during embryological development. Topics: gene amplification; DNA, RNA, and protein synthesis during embryogenesis; nucleocytoplasmic interactions; hormones as regulators of gene activity and models of differentiation.
Professors Fromson and Brandhorst

177-321A CYTOLOGY AND CYTOGENETICS. (3 credits; 2 hours lectures, 3 hours laboratory; Prerequisites: 177-201D; 177-202B or -274A). *Given in 1977-78; not given in 1978-79.* The genetic apparatus, from molecules to chromosomes, is studied with respect to structure, behaviour and function. The main stress is on chromosomes of higher organisms, somatic and meiotic.
Professor Boothroyd

177-323B TOPICS IN CYTOLOGY AND CYTOGENETICS. (1 credit; 1-2 hours seminar and discussion: Prerequisite: 177-321A). *Given in 1977-78; not given in 1978-79.* Selected topics in cytology and cytogenetics will be considered in depth through student seminars and discussions, and occasional lectures.
Professor Boothroyd

177-325A PROCESSES IN EVOLUTIONARY ECOLOGY. (3 credits; 2-1/2 hours lectures and 1/2 hour conference; Prerequisite: 177-305A, 202B or -274A; only one, either 177-325A or -372B can be taken for credit). Genetic properties and dynamics of natural populations with emphasis on qualitative traits. Models of population growth, mating systems, genetic variance, and types of natural selection.
Professor Sittmann

177-326B PATTERNS IN EVOLUTIONARY ECOLOGY. (3 credits; 2 hours lectures, 1 hour conference; Prerequisite: 177-325A). The evolution of ecological characteristics, chiefly at the population level. The influence of natural selection upon birth rates, brood size, parental care, age at first breeding, longevity, maximum population size, feeding strategies, competitive relations, polymorphism, mimicry, dispersal, habitat selection, etc.
Professor P.R. Grant

177-328B RESOURCE BIOLOGY. (3 credits; 2 hours lectures, 2 hours conference; Prerequisite: 177-305A or permission of instructor). A study of the nature of renewable resources, theoretical and applied aspects of management and exploitation, and methods of obtaining data required in decision making. Emphasis on animal populations.
Professor Leggett

177-331G ECOLOGY FIELD COURSE. 12 day Field Course in early September, with a comprehensive report to be prepared during 'A' term. (3 credits; 1 Prerequisites: 177-205D, 305A and permission of instructor). Methods of sampling natural populations of animal and plant species in fresh water and terrestrial habitats. Estimating population size from samples. Energy flow determinations. Construction of a simple model of an ecosystem, using field estimates for each compartment.
Professor P.R. Grant and Staff

177-334B ARTIC ECOSYSTEMS. (3 credits; 2 x 1½ hour lectures, Prerequisite: 177-305A or permission of instructor). *Not given in 1977-78; given in 1978-79.* This course investigates the biotic and abiotic environment of arctic ecosystems. The patterns of production, energy flow, nutrient cycling and adaptations to the arctic are covered. Unique aspects of the arctic are emphasized, and the environmental impact of northern development is considered.
Professor Oechel and Staff

177-340A VERTEBRATE FUNCTIONAL MORPHOLOGY. (3 credits; 2 hours lectures and 3 hours laboratory; Prerequisite: 177-205D, -206D). Study of the anatomy of the major groups of vertebrates: jawless, cartilaginous and bony fish, amphibians, reptiles, birds and mammals. Consideration of the basic pattern of tissues, organs and organ systems, and their modification in response to adaptation toward various ways of life. Emphasis will be placed on the function and interrelationship of the nervous, skeletal, muscular, urogenital, circulatory and endocrine systems.
Professor Carroll

177-345A BIOLOGY OF SYMBIOSIS. (2 credits; 2 hours lectures; Prerequisite: Permission of instructor required). Amongst the interspecific associations between organisms there is a wide spectrum from relatively casual relationships to the obligatory forms of mutualism and parasitism that is symbiosis. A perspective will be presented of these associations and the best understood will be considered in depth.
Professor Croll and Colleagues (Parasitology Institute)

177-346A PHILOSOPHY OF BIOLOGY. (3 credits; 3 hours lectures or conferences; Prerequisite: Any

introductory biology course; *Not given in 1977-78; given in 1978-79.* An introduction to the philosophical foundations of biology and their relevance to research and theories in various biological disciplines.
Professor Sattler

177-347B HISTORY OF BIOLOGY. (3 credits; 3 hours lectures; Prerequisite: Any introductory biology course). *Given in 1977-78; not given in 1978-79.* The development of scientific observation and measurement in plant and animal anatomy, comparative morphology, ecology, embryology, physiology and palaeontology. Theories of the relationships of living organisms, their parts and their evolution. Biological expeditions, societies and journals.
Professor Rigler

177-348D THE BIOLOGY OF INVERTEBRATES. (6 credits; 2 hours lectures and 3 hours laboratory; Prerequisites: 177-205D, -206D). A survey course of the invertebrate groups (with the exception of terrestrial arthropods) stressing comparative morphology, functional anatomy and relationships between major taxa.
Professor Reiswig

177-349B BIOLOGY OF FISHES. (3 credits; 2 lectures and 3 hours laboratory per week; Prerequisites: 177-205D, -206D or permission of instructor). An advanced course in the biology of fishes with emphasis on their ecology, behavior, and adaptation to specific environmental conditions.
Professor Leggett

177-350A INSECT DEVELOPMENT AND PHYSIOLOGY. (3 credits; 2 lectures and one 3-hour laboratory; Prerequisites: 177-201D, -205D and -206D, or permission of instructor). An organismal approach to the insects, emphasizing the physiology of growth and development, and the physiological relations of insects to their environment.
Professor McFarlane (Entomology Department)

177-351B BIOLOGY OF MAMMALS. (3 credits; 2 lectures and 1 laboratory per week; Prerequisites: 177-205D, -206D or permission of instructor). The biology of mammals including their ecology, behavior and adaption to specific ways of life.
Staff

177-352A VERTEBRATE EVOLUTION. (3 credits; 3 hours lectures; Prerequisites: 177-205D, -206D or equivalent). *Not given in 1977-78.* Development of modern evolutionary theory, particularly as it applies to vertebrates. The origin and evolution of the major groups of vertebrates, their anatomy, phylogeny and zoogeography.
Professor Carroll

177-353B PROBLEMS IN VERTEBRATE EVOLUTION. (3 credits; 1 hour lecture, 6 hours laboratory; Prerequisite: 177-352A). *Not given in 1977-78.* Investigation of current problems in the phylogeny and anatomy of vertebrates; laboratory work with fossil vertebrates and extensive use of literature. A series of problems will be investigated involving each of the major vertebrate groups.
Professor Carroll

177-354B BIOLOGY OF BIRDS. (3 credits; 2 hours lectures and 3 hours laboratory; Prerequisites: 177-205D, -206D; -340A recommended). A course emphasizing the adaptations of birds to their peculiar mode of life, including aspects of anatomy, physiology, behaviour (migration, flight, displays, vocalizations), avifaunas and evolution. Laboratory exercises and spring field trips. Introduction to local and world avifaunas.
Professor Lemon and Staff

177-355A PLANT ANATOMY. (3 credits; 2 hours lectures. 3 hours laboratory; Prerequisite: 177-201D, -205D, -206D or permission of instructor). *Given in 1977-78; not given in 1978-79.* An introduction to the general organization and development of cells, tissues and organs, the relation of anatomy to other biological disciplines and everyday life. The laboratory includes sectioning, fixing, staining, photography, etc.
Professor Sattler

177-356B THE FLOWER. (3 credits; 2 hours lectures, 3 hours laboratory; Prerequisites: 177-201D, -205D, -206D, -355A). *Given in 1977-78; not given in 1978-79.* The morphology, anatomy, development, adaption and evolution of the flower. Brief consideration also will be given to the importance of the flower in history, art and literature. The practical work will include a project, which will be carried out during the laboratory periods.
Professor Sattler

177-357A PLANT PHYSIOLOGY. (3 credits; 2 hours lectures, 3 hours laboratory. Prerequisites: 177-201D, -205D). Topics include water relations, nutrition, some physiological aspects of respiration and photosynthesis, translocation of solutes, elementary growth and development, response to environmental factors and adaption.
Professor Boll

177-358A CANADIAN FLORA. (3 credits; 2 hours lectures, 3 hours laboratory. Prerequisite: introductory biology course, or permission of instructor). Discussion of the origins and distributional patterns of the Canadian flora with practical training in collection and identification of lichens, bryophytes, pteridophytes, and higher vascular plants.
Professor Lechowicz

177-359B THE ALGAE. (3 credits; 2 hours lectures, 3 hours laboratory; Prerequisite: 177-205D or permission of instructor). The study of the morphology, cytology (including ultrastructure), aspects of physiology, aquaculture, and the ecology of the major groups of the algae.
Professor Goldstein

177-361A BRYOPHYTA AND PTERIDOPHYTA. (3 credits; 2 hours lectures, 3 hours laboratory; Prerequisites: 177-205D, -206D). *Not given in 1977-78.*

Discussion of the organization and evolution of bryophytes and pteridophytes.
Staff

177-362A MYCOLOGY I. (3 credits; 2 hours lectures, 3 hours laboratory; Prerequisite: Introductory course in Biology). General characteristics of the slime molds, Phycomycetes and Ascomycetes (Lower Fungi). Emphasis is placed upon the role of these fungi among living things, including their means of reproduction and utilization of complex organic matter.
Professor Wilson

177-363B MYCOLOGY II. (3 credits; 2 hours lectures, 3 hours laboratory; Prerequisite: Introductory course in Biology). General characteristics of Basidiomycetes and Fungi Imperfecti. Role of the higher fungi among living things including reproduction, utilization of complex organic matter, geographical distribution, mycorrhizal associations and economic factors. Isolation and culture techniques of fungi in general.
Professor Wilson

177-364B ORIGIN AND USE OF CULTIVATED PLANTS. (3 credits; 2 hours lectures; 3 hours laboratory; Prerequisite: Introductory course in Biology). This course will deal with the rise of early civilizations which first cultivated plants, and the importance of cultivated plants in the advance of man from a primitive to a civilized state, ending with the present world food crisis.
Professor Wilson

177-370B GENETICS OF MAN. (3 credits; 3 hours lectures; Prerequisites: 177-201D, -202B or -274A, or permission). A contemporary view of the genetic factors determining human characteristics, normal and abnormal.
Professor Fraser and Staff

177-372B POPULATION GENETICS. (3 credits; 2-1½ hours lectures and ½ hour conference; Prerequisite: 177-202B or -274A, -205D; -373A recommended, or permission of instructor). Topics include Hardy-Weinberg equilibrium in random mating populations, inbreeding coefficient and rate of gene loss, separation of phenotypic variation into genetic and environmental components, correlated characters, genotype and environment interaction.
Professors Sittmann and Tyson

177-373A BIOMETRY. (3 credits; 2 hours lectures, 2 hours laboratory, Prerequisite: 189-112A,B or the equivalent). Elementary statistical methods for testing hypotheses and designing experiments in biology. Least squares procedures for fitting models in regression and analysis of variance. Students who have, or are taking, certain equivalent statistical courses elsewhere in the University, for example, 204-204A,B, may not take this course. A list of these equivalent courses is available in the Biology Department:s Handbook.
Professor Tyson and Dr. Fieldes

177-384A PHYSIOLOGY OF MARINE ORGANISMS. (3 credits; 2 lectures and 1 laboratory per week; Prerequisites: 177-205D, -206D, or permission of instructor). General physiology, mainly of marine organisms, with special reference to the physiological background of life in the sea, and to the consequences of a marine history on the physiology of animal life. This course is complementary to 177-390B.
Professor Digby

177-385B ENVIRONMENTAL PHYSIOLOGY OF ANIMALS. (3 credits; 2 hours lecture and 3 hours laboratory; Prerequisites: 177-205D, -206D, -305A or permission of instructor). The identification and construction of physiological relations, primarily based on body size and temperature, which permit ecological predictions.
Professor Peters

177-386A NEUROBIOLOGY. (3 credits; 3 hours lectures; Prerequisite: 177-205D). A comparative study of information processing in sensory systems of animals, the integrative networks within the nervous system, and the co-ordination of the various muscle systems.
Professor Pasztor and Staff

177-389B LABORATORY IN NEUROBIOLOGY. (3 credits; 1 hour lecture; 5 hours laboratory; Prerequisites: 177-386A; and, if other than Neurobiology Major, permission of instructor). Provides experience in the methods of neurobiological research; experiments include extracellular and intracellular recording from nerve cells, electrical stimulation, and the study of neuro-behavioural problems.
Staff

177-390B FUNDAMENTALS OF PHYSIOLOGICAL ACTION. (3 credits; 2 hours lectures, 3 hours laboratory; Prerequisites: 177-205D, -206D, or permission of instructor). Fundamental basis of physiological mechanisms mainly as applied to zoological material. Surface phenomena and gas layers; ionic phenomena; electrokinetic effects in biological material; organic semiconductors; pressure sensitivity; photosensitization, calcification in shell, bone and teeth, and properties of artificial membranes. Designed for students of comparative physiology and marine biology. This course is complementary to 177-384A.
Professor Digby

177-391A. ANIMAL BEHAVIOUR I: PHYSIOLOGY AND MOTIVATION OF BEHAVIOUR. (3 credits; 2 hours lectures plus tutorial; Prerequisites: 177-205D, 206D). The study of motivational, sensory, motor developmental and genetic aspects of behaviour as interpreted by ethologists.
Professors Lemon and Kramer

177-392B ANIMAL BEHAVIOUR II: SOCIOBIOLOGY. (3 credits; 2 hours lectures, 1 hour tutorial; Prerequisites: 177-205D; -305A and -39IA strongly recommended). An introductory but comprehensive study of the social behaviour, social organization,

and communication systems of animals from a zoological perspective. Emphasis is on natural behaviour patterns and their adaptive significance.
Staff

177-394B LABORATORY IN ETHOLOGY. (3 credits; Prerequisites: 177-391A or -392B and permission of instructor). A series of projects both in the laboratory and on weekend field trips during which students observe the behaviour of animals (primarily vertebrates) and subsequently prepare scientific reports of their findings. Primarily for senior students enrolled in the Animal Behaviour Major Program, intending to pursue postgraduate studies.
Staff

177-417A DEVELOPMENTAL MAMMALIAN GENETICS. (3 credits; lectures and seminars; Prerequisites: 180-204A or -213A,B; -222A,B; 177-202B or -274A, -303A, -310B; -372B recommended; permission of instructor required). An advanced course for final year students where the main emphasis will be on experiments where gene differences altering development or environmentally-induced differences in embryonic development throw light on the processes of normal mammalian development.
Professor Trasler

177-422A GENETIC REGULATION AND RECOMBINATION IN HIGHER ORGANISMS. (2 credits; 2 lectures per week, occasional seminars during 8 weeks; Prerequisites: 177-202B or -274A, and -301A,B). An advanced course on regulation of gene replication, function and recombination in higher organisms. (Not open to students who have taken 177-422D).
Professor Käfer Boothroyd

177-427A ECOSYSTEMS. (3 credits; 2 hours lectures, 3 hours laboratory; Prerequisites: 177-305A). A comparative study of North American ecosystems including arctic tundra, grassland, and coniferous, deciduous, and tropical rain forests. Emphasis is given to functional attributes such as energy and nutrient flux, system regulation, productivity, and efficiency. Systems analysis and the relevance of these properties to management of individual ecosystems will be discussed.
Professor Auclair

177-429B PHYSIOLOGICAL PLANT ECOLOGY. (3 credits; 2 hours lectures, 3 hours laboratory, field trips; Prerequisite: 177-305A). *Not given in 1977-78.* A consideration of physiological responses and adaptations of plants to their environment. Contemporary approaches to the measurement and study of relevant physiological and micro-environmental parameters in diverse habitats will be presented.
Professor Oechel

177-432A LIMNOLOGY. (3 credits; 2 hours lectures; 3 hours laboratory; Prerequisite: 177-305A). A study of the physical, chemical and biological characteristics of fresh-water, with emphasis on the role of the plankton in the economy of lakes.
Professor Kalff

177-442D BIOLOGICAL OCEANOGRAPHY. (6 credits; 3 hours lectures, several 3 hour laboratory periods; Pre- or Corequisites: 177-305A, -348D). An introduction to the physical and chemical factors of the marine environment, the ecological divisions of the ocean, history and methods of marine research. An ecological account of marine populations in relation to their physical and chemical environment; marine plankton and production processes, marine pollution. (Not open to students who have taken 177-440A or 177-441B).
Professors Lewis, Lalli, Dunbar (Marine Sciences)

177-465B TOPICS IN PLANT BIOCHEMISTRY. (3 credits; Lectures and discussion; Prerequisites: 177-201D; -303A, 507-302D recommended). *Not given in 1977-78.* A review by lectures, seminars and discussion of important advances in recent years, e.g. molecular structures of macromolecules, biosynthetic processes, mechanisms of hormone action, metabolic regulation.
Professor Maclachlan

177-476B HUMAN BIOCHEMICAL GENETICS. (4 credits; 3 hours lectures with some student participation; Prerequisites: 177-201D, -202B or -274A, 180-302A,B, 189-231A,B). An up-to-date and comprehensive account of the biochemical aspects of human genetics, and relationship of this knowledge to broader questions including evolution, eugenics and treatment of genetic disease.
Staff

177-477A,B/478A,B INDEPENDENT STUDIES IN BIOLOGY. (3 credits each; open to U2 and U3 students only; Prerequisite: Projects have to be arranged individually with instructors). Research or reading projects, permitting independent study under the guidance of a staff member in the Biology Department specializing in the field of interest.
Staff

177-479D INDEPENDENT STUDIES IN BIOLOGY. (9 credits; 8-12 hours per week research project and related seminars; Prerequisites: restricted to U3 students in Biology Honours Program. Projects must be arranged individually with and accepted by instructors. A written proposal outlining the studies to be undertaken must be submitted to the Biology Curriculum Committee by early summer after the U2 year. The proposal will be reviewed by a committee composed of two instructors in the student's field of study plus one from the Curriculum Committee. Notice of the Committee's decision will be forwarded by mail during the summer). A program of study designed to provide an introduction to the design, execution and reporting of research. The number of projects that can be handled is limited and their quality will be examined carefully.

Proposals should therefore be considered as competitive.
Staff

177-480D INDEPENDENT STUDIES IN BIOLOGY. (12 credits; 10-15 hours per week research project and related seminars; Prerequisites and course description: As for 177-479D above).
Staff

177-493B UNDERGRADUATE SEMINAR IN ANIMAL BEHAVIOUR. (3 credits; 2 hours seminar; Prerequisite: Permission of instructor). A senior course considering in depth topics of current interest, which may range from physiological to ecological aspects of behaviour according to the interest of the class.
Professor Kramer and Staff

177-499D HONOURS SEMINAR IN BIOLOGY. (4 credits; weekly seminars). Honours students in Biology will attend a selected series of guest speaker seminars of general interest, and participate in discussions led by the speaker or a staff member specializing in the field. In addition, groups of students will participate in a chosen series of specialized seminars and present approximately 2 seminars.
Professor Käfer-Boothroyd and Staff

177-500C ADVANCED TECHNIQUES IN CELL AND MOLECULAR BIOLOGY. (4 credits; 1 lecture and 6-8 hours laboratory per day during a 3-4 week summer session; Prerequisites: 177-301A,B, -302A,B and permission of the instructor). This course is intended for selected cell and molecular biology honours and graduate students. Techniques used are those involved in molecular studies of transcriptional and translational regulation in eucaryotic cells, e.g., nucleic acid and protein synthesis *in vitro, de novo* synthesis of enzymes, nucleic acid hybridization, cell fractionation and analytical methods, etc.
Professor Verma

177-522B TOPICS IN GENETIC REGULATION AND RECOMBINATION. (2 credits; irregular schedule of seminars and conferences; Prerequisite: 177-422A). Investigation and discussion of recent advances in molecular genetics including genetic regulation of protein synthesis, DNA-repair, recombination, etc., and their relevance to studies in higher organisms, including man. (Not open to students who have taken 177-422D).
Professor Käfer-Boothroyd

177-524B MOLECULAR BIOLOGY OF DEVELOPMENT. (2 credits; Prerequisites: 177-201D, -303A, -320B; or permission of the instructors) *Not given in 1977-78; given in 1978-79.* An advanced seminar course covering the most recent research in molecular biology of development. Examples from both plant and animal systems will be examined. Students will prepare and present seminars covering topics related to the regulation of gene expression in developing eucaryotic organisms.
Professors Brandhorst, Fromson, and Verma

177-575A ADVANCES IN POPULATION GENETICS. (3 credits; 2 lecture hours, 1 conference; Prerequisites: 177-373A, -325A or -372B). *Given in 1977-78; not given in 1978-79.* Discussion of recent advances in genetics relevant to population biologists in ecology and human genetics.
Professors Sittmann and Tyson

177-587B DEVELOPMENTAL NEUROBIOLOGY. (3 credits; 2 seminar hours or 2 lecture hours; Prerequisites: 177-303A, -386A or 204-308D). Discussion of and lectures on current research in the field. Topics encompass all aspects of development from neuroembryology to neural regeneration in adult animals. Critical analysis of presented material is encouraged. (Not open to students who have taken 177-487B).
Professors Levine and Marsden

177-588A ADVANCED NEUROBIOLOGY. (3 credits; 2 hours seminar; Prerequisite: 177-386A or permission of instructor). Discussion primarily of important current research. Topics emphasize cellular neurophysiology and the functional organization of nervous systems. Includes both vertebrate and invertebrate material. (Not open to students who have taken 177-488B).
Staff

177-595A ADVANCED SEMINAR IN BEHAVIOUR. (3 credits; 2 hour seminars; Prerequisites: 177-391A or -392B or equivalent and permission of instructor). *Not given in 1977-78; given in 1978-79.* A graduate level seminar concerned with mechanisms in animal behaviour. Selected topics include sensory mechanisms of communication, social behaviour and organization, animal orientation, physiological correlates of behaviour, and the sequential and temporal organization of behaviour. The emphasis will be on studies having a zoological perspective.
Professor Lemon

177-596A SEMINAR IN BEHAVIOURAL ECOLOGY. (3 credits; Prerequisite: permission of instructor). *Given in 1977-78; not given in 1978-79.* A graduate level seminar course concerned with ecological and evolutionary perspectives on behaviour. Potential topics include aspects of altruism, grouping, mating systems, feeding strategies, antipredator behaviour, habitat selection and the inheritance of behaviour.
Professors Kramer and P. Grant

BIOMEDICAL ENGINEERING (399)

399-551B FLUID MECHANICAL ASPECTS OF RESPIRATORY PHYSIOLOGY. (3 credits; Prerequisite: one course in fluid mechanics or permission of the instructor). Review of basic concepts in respiratory physiology; air flow patterns and particle deposition in the tracheobronchial tree; airway dynamics and flow limitation; convective and diffusive mixing in the lung; mathematical modeling of

pulmonary gas exchange; pulmonary microcirculation and pulmonary edema; pulmonary vascular mechanics.

Professor Hsin-kang Chan

CHEMISTRY (180)

Professors – J.F. HARROD *(Chairman)*; B. BELLEAU; I.S. BUTLER; G.C.B. CAVE; J.T. EDWARD; A. EISENBERG; B.C. EU; D.F.R. GILSON; D.N. HARPP; G. JUST; S.G. MASON; M. ONYSZCHUK; D. PATTERSON; A.S. PERLIN; W.C. PURDY; R.F. ROBERTSON; L.E. ST.PIERRE; M.A. WHITEHEAD; C.A. WINKLER; L. YAFFE

Associate Professors – T.H. CHAN; P.G. FARRELL; J.M. FRESCO; W.C. GALLEY; A.E. GROSSER; J.J. HOGAN; K.K. OGILVIE; D.J. SIMKIN;

Assistant Professors – B.C. SANCTUARY; A.G. SHAVER

Associate Members – G. DONNAY *(Crystal Chemistry)*, H. GOLDSMITH *(Medicine)*, O.A. MAMER *(University Clinic)*

Senior Research Associate – D.A.I. GORING

Research Associates – H. BOLKER; D.G. GRAY; R. ST.JOHN MANLEY; A.A. ROBERTSON

Senior Instructors – J. BIRNIE; R. BROWN; J. FINKENBINE; E. HEYGE; D. JEFFRIES

Otto Maass Chemistry Building, 801 Sherbrooke St. West, Montreal, P.Q., H3A 2K6; Departmental Office, Room 322, Telephone: 392-4469; Student Advisory Office, Room 125A, Telephone: 392-8086.

Chemistry is both a pure science, offering its students a challenging intellectual pursuit and, simultaneously, an applied science whose technology is of fundamental importance to our economy and society. The modern chemist seeks an understanding of the structure and properties of atoms and molecules. He uses this knowledge to predict and interpret the properties and transformations of matter and the energy changes that accompany those transformations. Many of the concepts of Physics and the methods of Mathematics are basic to Chemistry, while Chemistry is in turn of fundamental importance to many other disciplines such as: the Biological and Medical Sciences, Geology, Metallurgy, etc.

A degree in Chemistry can lead to a wide variety of professional vocations. The large science-based industries (petroleum refining, plastics, pharmaceuticals, etc.) all employ chemists in research and development and in quality control. Many federal and provincial departments and agencies employ chemists in research and testing laboratories. Such positions are expected to increase with the currently growing concern for the environment and for consumer protection. A background in chemistry is also useful as a basis for advanced study in other related fields, such as medicine and the biological sciences. For a business career, a B.Sc. in Chemistry can profitably be combined with a master's degree in Business Administration.

Chemistry courses at the university level are traditionally divided into four areas of specialization: 1) organic chemistry, dealing with the compounds of carbon; 2) inorganic chemistry, concerned with the chemistry and compounds of elements other than carbon; 3) analytical chemistry, which deals with the identification of substances and the quantitative measurement of their compositions; and 4) physical chemistry, which treats the physical laws and energetics governing chemical reactions. Naturally there is a great deal of overlap between these different areas, and the boundaries are becoming increasingly blurred. After a general course at the collegial level, courses in organic, inorganic, analytical and physical chemistry are offered through the university years. Since chemistry is an experimental science, laboratory classes accompany most undergraduate courses. In addition, courses are offered in poymer, nuclear, radio and biological chemistry to upper year undergraduates.

There are two main programs in Chemistry, Honours and Major. The Honours program is intended primarily for students wishing to pursue graduate studies in Chemistry. While the Major program is somewhat less specialized, it is still recognized as sufficient training for a profession in Chemistry. It can also lead to graduate studies although an additional qualifying year may be necessary. There are also a number of Faculty programs available (see page 143). Interested students may inquire about these at the Student Advisory Office.

CORE CURRICULUM IN CHEMISTRY

The Core Curriculum in Chemistry consists of 36 specified credits in Chemistry to which must be added a minimum of 17 credits in Mathematics and Physics. The courses at present in the Core Curriculum are listed below.

Chemistry U1: 180-257D, (4 credits); 180-253B, (2 credits); 180-273A, (1 credit); 180-281A,B, (3 credits).

Chemistry U2: 180-302A,B, (3 credits); 180-352B, (3 credits); 180-392A,B, (3 credits); 180-381A, (3 credits); 180-387D, (4 credits); 180-356A, (2 credits); 180-353A, (1 credit); 180-363A, B, (2 credits); 180-373B, (2 credits); 180-383B, (1 credit); 180-393A,B, (2 credits);

Physics U1: 198-232A,B, (4 credits).

Physics U2: 198-339B, (4 credits) or Computer Science 308-200A,B, (3 credits);

Mathematics U1: 189-222A,B, (3 credits); 189-223A, (3 credits);

Mathematics U2: 189-315A,B, (3 credits).

A further 14 required credits in Chemistry are optional courses at the CEGEP level and it is hoped that the majority of Honours and Major candidates will have taken at least 6 of these credits at the CEGEP level. The McGill numbers corresponding to these 14 credits are listed below. Students who

have not taken these courses or their equivalents at the CEGEP level must do so to be eligible candidates for Honours or Major degrees in Chemistry.

Chemistry: 180-212A,B, (4 credits); 180-213A, B, (3 credits); 180-222A,B, (4 credits); 180-223A,B, (3 credits).

The Core Curriculum is common to both the Major and the Honours program. Because students may have had individual variations in their CEGEP programs, the particular core courses taken in U1 and U2 will vary.

HONOURS IN CHEMISTRY

The Honours program in Chemistry is the Core Curriculum normally taken in U1 and U2 and an additional 18 credits in Chemistry elected from the U3 honours courses. Of the 18 credits 198-465D, MATHEMATICAL PHYSICS FOR CHEMISTS, will be acceptable for four credits. Admission to the Honours program is by application to the Chemistry Department.

Research project courses 180-480A,B (3 credits) and 180-490A,B (6 credits) are available as options to U3 honours Chemistry students. These courses must be taken as a 9 credit package.

MAJOR IN CHEMISTRY

The Major in Chemistry is the Core Curriculum taken over the three university years. All courses chosen outside the Core Curriculum will be free electives. Students intending to major in Chemistry may, on application to the Department, be granted permission to take U3 Honours courses in Chemistry as part of their electives. Admission to the Major program is by application to the Chemistry Department.

FACULTY PROGRAMS IN CHEMISTRY

Faculty programs in Chemistry are constructed from the U1 courses and the general courses of U2 and U3 intended for these students. (See page 143).

Six courses in general analytical chemistry, 180-207A, -217A, -227B, -237B, -247A, and -267B, are listed to permit the synthesis of an individualized program in chemical analysis.

Course Descriptions

180-110A GENERAL CHEMISTRY I. (3 credits: 3 lectures, 1 tutorial, Prerequisites/Corequisites: College level mathematics and physics). A study of the fundamental principles of atomic structure; valence theory: periodic table; gaseous, liquid and solid states; solutions of non-electrolytes.
Staff

Laboratory: (2 hours). Illustrative experiments.
Mrs. Birnie

180-120B GENERAL CHEMISTRY II. (3 credits; 3 lectures, 1 tutorial; Prerequisite: 180-110A). A continuation of 180-110A. A study of the fundamental principles of physical chemistry including thermodynamics, chemical equilibria, acids and bases, ionic equilibria, electrochemistry, redox reactions, chemical kinetics, and the structures and reactions of the simpler aliphatic and aromatic organic compounds.
Staff

Laboratory: (2 hours). Illustrative experiments.
Mrs. Birnie

180-201A MODERN INORGANIC CHEMISTRY I. (3 credits; 2 lectures, 1 tutorial; Prerequisites 180-110A and 120B or equivalent; Not open to Honours or Majors in Chemistry). The course deals with the chemistry of selected main group elements and their role in our everyday lives. The course is based on a series of self-study modules. The lectures and tutorials are designed to pace the student through the study of the modules.
Professor Shaver

180-204A INTRODUCTORY PHYSICAL CHEMISTRY FOR BIOLOGICAL SCIENCE STUDENTS I. (3 credits; 3 lectures; Prerequisites: 180-120B or equivalent and one full course in calculus). Similar to 180-213A,B. An emphasis is placed on the use of biological examples to illustrate the principles of Physical Chemistry. The relevance of physical chemistry to biology is stressed.
Professors Galley and Robertson

180-207A GENERAL ANALYTICAL CHEMISTRY I. (1 credit; 1 lecture; Prerequisites: 180-110A and 120B or equivalent courses). *Not offered in 1977-78.* Lecture portion of an individualized program in analytical chemistry. Lecture sequences and laboratories (if any) to be selected by the student and adviser.
Professor Fresco

180-212A,B INTRODUCTORY ORGANIC CHEMISTRY I. (4 credits; 3 lectures; Prerequisites: 180-110A and 120B or equivalent courses). A survey of reactions of aliphatic and aromatic compounds including modern concepts of bonding, mechanisms, conformational analysis, stereochemistry and spectra.
Professors Farrell and Ogilvie

Laboratory: (3 hours). Illustrative experiments.
Professors Farrell and Ogilvie and Mrs. Heyge

180-213A,B INTRODUCTORY PHYSICAL CHEMISTRY I. (3 credits; 3 lectures; Prerequisites: 180-120B or equivalent; Mathematics 189-120 and 121 or equivalent) Gas laws, kinetic theory. First law of thermodynamics, enthalpy, thermochemistry, bond energies. Second law of thermodynamics; the entropy and the free energy functions. Chemical and thermodynamic equilibrium states. Phase rule. Colligative properties of ideal solutions. Selected

special topics which may include chemical kinetics, electrochemistry and others.
Professors Eisenberg and Patterson

180-214B INTRODUCTORY PHYSICAL CHEMISTRY FOR BIOLOGICAL SCIENCE STUDENTS II. (3 credits; 3 lectures; Prerequisites: 180-213A,B or 180-204A or equivalent). Similar to 180-223A,B. An emphasis is placed on the use of biological examples to illustrate the principles of physical chemistry. The relevance of physical chemistry to biology is stressed.
Professors Galley and Eisenberg

180-217A,B GENERAL ANALYTICAL CHEMISTRY LABORATORY I. (1 credit; 3 hours; Prerequisites: 180-110A and 120B or equivalents). Laboratory portion of an individualized program in analytical chemistry. Laboratory experiments to be selected by the student and adviser.
Professor Fresco

180-222A,B. INTRODUCTORY ORGANIC CHEMISTRY II. (4 credits; 3 lectures; Prerequisite: 180-212A). Modern spectroscopic techniques for structure determination. The chemistry of alkyl halides, alcohols, ethers, carbonyl compounds and amines with special attention to mechanistic aspects. Special topics.
Professors Ogilvie and Farrell

Laboratory: (3 hours). Illustrative experiments.
Professors Ogilvie and Farrell and Mrs. Heyge

180-223A,B INTRODUCTORY PHYSICAL CHEMISTRY II. (3 credits; 3 lectures; Prerequisite: 180-213A,B or equivalent). Schroedinger Wave Equation; Engergy states of atoms; Theory of chemical bonding; Atomic and Molecular structure; Spectroscopy; Electrical and magnetic properties of molecules; Statistical thermodynamics. (Not open to students who have taken 180-214B).
Professor Simkin

180-227B GENERAL ANALYTICAL CHEMISTRY II. (1 credit; 1 lecture; Prerequisite: 180-207A). *Not offered in 1977-78.* Lecture portion of an individualized program in analytical chemistry. Lecture sequences and laboratories (if any) to be selected by the student and adviser.
Professor Fresco

180-237B GENERAL ANALYTICAL CHEMISTRY LABORATORY II. (1 credit; 3 hours; Prerequisites: 180-217A,B). Laboratory portion of an individualized program in analytical chemistry. Laboratory experiments to be selected by the student and advisor.
Professor Fresco

180-247A GENERAL ANALYTICAL CHEMISTRY LABORATORY III. (2 credits; 6 hours; Prerequisites: 180-110A and 120B or equivalents). Laboratory portion of an individualized program in analytical chemistry. Laboratory experiments to be selected by the student and advisor.
Professor Fresco

180-253B CHEMICAL THERMODYNAMICS. (2 credits; 2 hours; Prerequisite: 180-213A,B or equivalent). For Honours and Major Chemistry students. The first, second and third laws of thermodynamics; free energies and Maxwell relations; heterogeneous systems, partial molal properties, thermodynamics of solutions and mixtures; non-ideal systems, fugacity and activity; solutions of electrolytes; thermodynamics of systems in electric and magnetic fields.
Professor Eu

180-257D INTRODUCTORY ANALYTICAL CHEMISTRY. (4 credits; 1 lecture, 4 hours laboratory and 1 homework tutorial; Prerequisites: 180-110A and 120B or equivalents). For Honours and Major Chemistry students. A rigorous survey of analytical chemistry including theory and practice of representative gravimetric, volumetric and instrumental methods.
Professor Fresco

180-267B GENERAL ANALYTICAL CHEMISTRY LABORATORY IV. (2 credits; 6 hours; Prerequisites: 180-110A and 120B or equivalents). *Not offered in 1977-78.* Laboratory portion of an individualized program in analytical chemistry. Laboratory experiments to be selected by the student and advisor.
Professor Fresco

180-273A CHEMICAL KINETICS. (1 credit; 1 lecture; prerequisite: 180-110A and 120B, or equivalent). For Honours and Major Chemistry students. Other students with permission of the lecturer. Order, molecularity, reaction mechanisms, first, second and third order rate constants. Determination of order, effect of temperature on rate, activated state theory. Collision theory. Reactions in solution, homogeneous catalysis.
Professor Grosser

180-281A,B CHEMISTRY OF THE MAIN GROUP ELEMENTS. (3 credits; 3 lectures; Prerequisites: 180-110A and 120B or equivalents). For Honours and Major Chemistry students. Current theories of atomic structure, chemical bonding and stereochemistry are reviewed and then applied in a systematic survey of the main group elements and their compounds, with emphasis on trends in physical and chemical properties, molecular and ionic geometries, and mechanisms of reactions.
Professor Hogan

180-301B MODERN INORGANIC CHEMISTRY II. (3 credits; 3 1ectures; Prerequisites: 180-110A and 120B or equivalent courses). The chemistry of the transition metals. Modern concepts of metallic bonding will be reviewed. Crystal field theory and molecular orbital theory of coordination compounds will be described. The chemistry of transition metal coordination compounds will be treated in some detail from the viewpoint of structural, chemical,

mechanistic and spectroscopic behaviour. Biochemical and pollution aspects of transition metal chemistry will be discussed.
Professor Butler

180-302A,B INTRODUCTORY ORGANIC CHEMISTRY III, POLYFUNCTIONAL AND BIOMOLECULES. (3 credits; 3 lectures; Prerequisites: 180-212A and 222A,B). Application of the concepts of organic chemistry to selected systems, including aromatics and heterocyclics, carbon-carbon condensations, rearrangements, molecular orbital considerations, polymers and biomolecules.
Professor Harpp

180-307B THE ANALYTICAL CHEMISTRY OF POLLUTANTS. (2 credits; 2 lectures; Prerequisites: One course in analytical chemistry and one in physical chemistry). *Not offered in 1977-78.* Description of current analytical practices in air and water pollution; critical evaluation of the reliability of the methods, with particular emphasis on interfering substances; rudiments of automated instrumentation; toxicological analysis as it relates to pollution.
Professors Cave and Fresco

180-313A INTERMEDIATE PHYSICAL CHEMISTRY I. (3 credits; 3 lectures; Prerequisite: 180-223A,B or Chem. 214B). A survey course in physical chemistry beyond the introductory level.
Professor Robertson

180-323B INTERMEDIATE PHYSICAL CHEMISTRY II. (3 credits; 3 lectures; Prerequisite: 180-223A,B or Chem. 214A). A survey course in physical chemistry with a special emphasis on spectroscopy.
Professor Simkin

180-331A INORGANIC CHEMISTRY OF THE SOLID STATE. (3 credits; 3 lectures; Prerequisites: 180-110A and 120B or equivalents). Primarily, but not exclusively, for students in the Faculty of Engineering. Electronic structure and properties of the elements in relation to the Periodic Table. The Solid state: structure, bonding, magnetic properties of metals and alloys. Descriptive chemistry of the metals.
Professor Harrod

180-352B STRUCTURAL ORGANIC CHEMISTRY. (3 credits; 3 lectures; Prerequisite: 180-302A,B). For Honours and Major Chemistry students. Modern methods of structure determination, chemical and spectroscopic techniques; stereochemistry.
Professor Perlin

180-353A SURFACE CHEMISTRY. (1 credit; 1 lecture; Prerequisites: 180-253B and 273A). For Honours and Major Chemistry students. The nature of surfaces. The thermodynamics of surfaces. The effect of temperature and pressure on surface energies. The wetting of solids. Binary liquid systems and the surface excess. Physi- and chemisorption of vapours on solids.
Professor Robertson

180-356A INTRODUCTORY QUANTUM CHEMISTRY. (2 credits; 2 lectures; Prerequisites: 180-253B, 180-273A, 189-223; Corequisite: 189-315). For Honours and Major Chemistry students. A rigorous mathematical development of quantum mechanics up to and including the hydrogen molecular ion.
Professor Whitehead

180-362A,B ADVANCED ORGANIC LABORATORY. (2 credits; 4 hours; Prerequisite or corequisite: 180-302A,B). An advanced laboratory of experiments related to the theoretical principles and synthetic methods of modern organic chemistry.
Professor Farrell and Dr. Finkenbine

180-363A,B PHYSICAL CHEMISTRY LABORATORY. (2 credits; 3 hours; Prerequisites: 180-253B and 273A). For Honours and Major Chemistry students. Selected experiments to illustrate physicochemical principles.
Professor Winkler and Dr. Brown

180-372B SYNTHETIC ORGANIC CHEMISTRY. (3 credits; 3 lectures; Prerequisites: 180-302A,B). Synthetic methods in organic chemistry.
Professor Harpp

180-373B MOLECULAR SPECTROSCOPY. (2 credits; 2 lectures; Prerequisite: 180-356A). For Honours and Major Chemistry students. A general survey of the principles of molecular spectroscopy, including electronic, vibrational, and rotational spectroscopy, nuclear and electron spin resonance and Mossbauer effect.
Professor Gilson

180-381A CHEMISTRY OF THE TRANSITION ELEMENTS. (3 credits; 3 lectures; Prerequisite: 180-281A,B). For Honours and Major Chemistry students. The history of transition chemistry, coordination numbers and geometry, nomenclature and symmetry. Crystal field theory will be described and applied to problems in spectroscopy, magnetochemistry, thermodynamics and kinetics. Molecular orbital theory is applied to carbonyl and organometallic compounds.
Professor Butler

180-383B INTRODUCTORY STATISTICAL MECHANICS. (1 credit; 1 lecture; Prerequisite: 180-356A Corequisite: 180-373B). For Honours and Major Chemistry students. Fundamental assumptions of the statistical method, Maxwell-Boltzmann distribution law. Ideal monatomic, diatomic and polyatomic gases.
Professor Eu

180-387D ANALYTICAL CHEMISTRY. (4 credits; 1 lecture; 3 hours laboratory and 1 hour tutorial; Prerequisites: 180-257D and 253B). For Honours

and Major Chemistry students. A rigorous treatment of the theory underlying analytical processes; practice in selected laboratory techniques, followed by an original project.
Professor Cave

180-392A,B or D INTEGRATED INORGANIC/ ORGANIC LABORATORY. (3 credits; 4 hours; Corequisites: 180-381A and 352B). An advanced laboratory for Honours and Major Chemistry students. The laboratory uses a modular format of self-paced and self-guided instruction. A program of modules is selected in consultation with the laboratory staff. The experimental modules consist of projects related to the theoretical principles, synthetic techniques and instrumental methods used in modern organic, inorganic and organometallic chemistry.
Dr. Finkenbine and Staff

180-393A,B PHYSICAL CHEMISTRY LABORATORY. (2 credits; 3 hours; Prerequisites: 180-363A,B). For Honours and Major Chemistry students. Selected experiments to illustrate physico-chemical principles more advanced than those of 180-363.
Professor Winkler and Dr. Brown

180-402B ADVANCED BIO-ORGANIC CHEMISTRY. (3 credits; 2 hours lecture, 1 hour seminar per week; Prerequisite: 180-302A,B). The application of advanced concepts of organic and physical chemistry to biological systems. The properties of amino acids, peptides, proteins, enzymes, nucleosides, etc., will be discussed and their relationship to biochemical reactions, the origins of life, coenzymes, template syntheses, neurochemistry, etc.
Professor Belleau

180-404B BIOPHYSICAL CHEMISTRY. (3 credits; 3 lectures; Prerequisites: 180-204A and 214B or 213A,B and 223A,B). Molecular weight determination, hydrodynamic and spectroscopic properties of biopolymers. The structure and dynamics of biopolymers and biolgical systems.
Professors Galley and Meighen (Biochemistry)

180-411A AN INTRODUCTION TO RADIOCHEMISTRY. (3 credits; 3 lectures; Prerequisites: 180-204A and 214B or equivalents). The basic concepts of nuclear chemistry will be described mainly in a qualitative way. Such topics as forces within nuclei, theories of nuclear structure, radioactive decay, nuclear reactions and fission, particle accelerators and reactors, radiocarbon dating, and tracer technique will be treated. (Not open to students who have taken 180-311A).
Professor Yaffe

180-452A PHYSICAL ORGANIC CHEMISTRY. (3 credits; Prerequisite: 180-352B). Intended primarily for Honours Chemistry students. The correlation of theory with physical measurements on organic systems; an introduction to photochemistry; solvent and substituent effects on organic reaction rates, etc.; reaction mechanisms.
Professor Edward

180-455A INTRODUCTORY POLYMER CHEMISTRY. (3 credits; Prerequisites: 180-213A,B, 223A,B, 273A). For Honours and Major students. A survey course on the structure of polymers, kinetics and mechanisms of polymer synthesis; molecular weight distributions; polymer configurations and the thermodynamics of polymer solutions; rubber, elasticity, osmometry and viscosity.
Professor St.Pierre

180-457A INSTRUMENTAL METHODS OF ANALYSIS. (3 credits; 2 lectures and 3 hours laboratory). For Honours students. Other students with permission of the lecturer. Mass spectrometry; gas chromatography; infrared spectroscopy; X-ray diffraction and fluorescence spectrometry; Raman spectroscopy; thermal analysis; flame photometry; atomic adsorption; activation analysis, polarography.
Professors Cave, Fresco and Purdy

180-475A CHEMICAL KINETICS. (3 credits; 3 lectures; Prerequisite: Chemistry core). Kinetic laws, measurement of reaction rates, transition state and collision theory, elementary gas phase reactions. Elementary reactions in solution, reaction mechanisms in solution, reactions on surfaces and in solid state. Complex reactions, homogeneous reactions, enzyme kinetics, radiodating.
Professor Grosser

180-476B QUANTUM CHEMISTRY. (3 credits; 3 lectures; Prerequisite: Chemistry core). A rigorous mathematical survey of various theories of molecular structure.
Professor Whitehead

180-480A,B FINAL YEAR RESEARCH PROJECT. (3 credits; Prerequisite or Corequisite: 180-490A,B,D; registration by departmental permission only). A course designed to give Honours students an optional foretaste of research experience. The student will be assigned a project supervisor and a research project at the beginning of the session. The project will consist of a literature survey, experimental work, a written research report and an oral examination.
Staff

180-481B MODERN TOPICS IN INORGANIC CHEMISTRY. (3 credits; Prerequisites: 180-281A,B and 381A). Chemistry Honours students only. An introduction to areas of current interest in inorganic chemistry.
Staff

180-482B ADVANCED ORGANIC CHEMISTRY. (3 credits; Prerequisite: 180-352B). Intended primarily for Honours Chemistry students. Organic chemistry of natural products – structure, synthesis, stereochemistry and biosynthesis.
Professor Chan

180-485B SURFACE AND COLLOID CHEMISTRY. (3 credits; Prerequisite: Chemistry core). A topical course on the physical chemistry of phase boundaries. Topics covered vary from year to year and generally include: properties of surfaces; monolayers; colloidal dispersions; spreading and wetting phenomena; absorption; translational and rotary Brownian motion.
Professor Mason

180-487A SELECTED TOPICS IN MODERN ANALYTICAL CHEMISTRY. (3 credits; Prerequisite: 180-387D). Honours Chemistry students. Other students with permission of the lecturer. Current theories of aqueous and nonaqueous solutions, with application to analytical chemistry; recent advances in analytical techniques (topics covered vary from year to year and may include chromatography; applications of kinetics, solvent extraction and thermal analysis) with emphasis on their theoretical basis.
Professors Fresco and Cave

180-490A,B,D FINAL YEAR RESEARCH PROJECT. (6 credits; 16 hours laboratory; Prerequisite or Corequisite: 180-480A,B; Registration by departmental permission only). For description, see 180-480A,B.
Staff

180-493A INTRODUCTION TO STATISTICAL THERMODYNAMICS. (2 credits; 2 lectures; Prerequisite: Chemistry core). Fundamental principles of statistical mechanics; microcanonical and canonical ensembles; thermodynamic functions of ideal gases; theories of solids, chemical equilibria; absolute reaction rate theory; Van der Waals gases; real gases; lattice statistics.
Professor Eu

180-497B ANALYTICAL SPECTROSCOPY. (3 credits; 2 lectures and 3 hours laboratory; Prerequisite: 180-387D). *Not offered in 1977-78.* For Honours Chemistry students. Other students with permission of the lecturer. Spectrophotometric measurements and sources of error. Flame photometry, including emission and atomic absorption spectral determination of the composition and stabilities of organic species in aqueous and nonaqueous solvents; Tanabe-Sugano diagrams.
Professors Fresco and Cave

180-577B ELECTROANALYTICAL CHEMISTRY. (3 credits; 2 lectures and 4 hour laboratory. Registration by departmental permission only). The application of electroanalytical techniques including polarography, coulometry and chronopotentiometry, to inorganic, organic and biochemical analysis. (Not open to students who have taken 180-477A).
Professor Purdy

COMPUTER SCIENCE (308)

Professors – G. MARSAGLIA' *(Director, School of Computer Science); (on leave));* W.D. THORPE
Associate Professors – T.H. MERRETT; M.M. NEWBORN (Acting Director); C.C. PAIGE; G.F.G. RATZER
Assistant Professors – K. ANANTHA; D.J. BURRAGE; N. FRIEDMAN; N. HORSPOOL; S. LAM; N. MAROVAC; G.T. TOUSSAINT
Lecturers – Q. BUI-DUY; M. COHEN; A. GREENBERG; G. KLINESEK

Burnside Hall: 805 Sherbrooke St. West,
Montreal, P.Q., H3A 2K6.
Second floor.
Departmental Office. (undergraduate activities).
Room 229 Telephone: 392-8275.

Computer science is less than 30 years old, and in this short time has become a field of broad practical and theoretical importance. The creators of electronic calculating machines during the last world war solved many scientific computational problems, and rapid growth of computational numerical analysis followed. Mathematical techniques found applications beyond scientific and engineering problems, creating the new field of operations research. Computers began to be put to uses of such complexity that describing the problems became more difficult than the computations themselves. Instructing the computer became the specialized discipline of programming. Programmers needed languages to communicate with the machine and operating systems to control it, and the field of software was born. The discovery of non-numerical uses of computers led to fields as diverse as large scale data processing, information retrieval and artificial intelligence. On the theoretical side, the problems and applications of computers have created areas of study in the theory of formal languages, the theory of automata and the theory of computation.

Undergraduate courses in the School of Computer Science provide the fundamentals necessary for careers in is field. Students with undergraduate training in Computer Science have available a wide range of job opportunities. They are needed, for example, to help automate libraries, the postal system, traffic flow, assembly line processes and medical record keeping. Training, aimed at preparing students for such diverse careers, is provided at McGill on the two IBM 370/158 computers and on the smaller PDP 11/45 and PDP 11/20 belonging to the School of Computer Science.

Some graduate courses in Computer Science are available to suitably qualified senior undergraduates. For further information, see the Faculty of Graduate Studies and Research announcement.

The School of Computer Science offers undergraduate programs in the Faculty of Science: a Faculty Program in Mathematics and Computer Science and a Minor Program in Computer Science.

Special programs involving Computer Science are also available in the Faculties of Management and Engineering. For further details, the Announcements of these Faculties should be consulted.

FACULTY PROGRAM

For details concerning the Faculty Program in Mathematics and Computer Science, see page 143.

MINOR IN COMPUTER SCIENCE

The Computer Science Minor may be taken in conjunction with any program in the Faculty of Science (with the exception of the Faculty Program in Mathematics and Computer Science) with the approval of the Adviser of the main program and the School of Computer Science. At the time of registration in his/her final year, a student must declare his/her intent to receive a Computer Science Minor and approval must be given to the particular sequence of courses the student wishes to call his/her Computer Science Minor.

Requirements: (24 credits)

Computer Science 308-200 or 220, 210, 300 or 302, 315. Plus 12 credits chosen from any other Computer Science course numbered 230 or higher.

All courses must be passed with a grade of C or better.

Students may receive credit towards their Computer Science Minor by taking certain approved courses outside the School of Computer Science. These courses must have a high Computer Science content. A student will not be permitted to receive more than six credits from such courses. The School of Computer Science will establish a list of approved courses. A student may be allowed to substitute up to six credits in other disciplines if he/she has already satisfactorily completed elsewhere courses equivalent to the required Computer Science courses. Courses for which substitutions may be allowed are Computer Science 308-200 or 220, 308-210, and 308-230. If a student's Major program requires Computer Science courses, up to six credits of Computer Science courses may be used in fulfilment of both Major and Minor requirements. A student must, however, take a minimum of 18 credits of approved Computer Science courses at McGill specifically towards fulfilment of the requirements for the Minor.

Course Descriptions

The following courses are introductory and not more than one of them may be taken for credit:

308-100 Primarily for Arts students
308-200 Primarily for students of Mathematics, Physics and Chemistry
308-220 Primarily for students of Biology, Psychology and Social Sciences.

Continuation to other computer science courses is possible only from 308-200 or 308-220.

308-100A,B INTRODUCTION TO COMPUTING. (3 credits; No scheduled lectures; No prerequisites). An introduction to applications and general concepts of computing; introduction to programming using a selection of features of the programming language FORTRAN. The course consists of modules, containing video tape lectures, module booklets, interactive terminal sessions and assignments to be run on the computer. The student learns at his/her own pace. The only formal lecture is held in the first week of a new semester. This course is primarily for Arts students.
Staff

308-200A,B INTRODUCTION TO COMPUTER SCIENCE. (3 credits; 2 hours; Prerequisite: 189-121A,B or equivalent). Number systems; data representation; algorithm design; FORTRAN; computer methods including searching, sorting, solution of equations, numerical integration and matrix manipulation. This course is designed for students in mathematics and the physical sciences.
Professor Anantha and Staff

308-210A,B COMPUTER STRUCTURE AND ASSEMBLY LANGUAGE PROGRAMMING. (3 credits; 2 hours; Prerequisite: 308-200A,B or equivalent). Computer structure, machine instruction execution, addressing techniques, and digital representation of data. Symbolic coding and assembly systems, macro definition, program segmentation and linkage.
Professors Ratzer and Lam

308-220A,B DIGITAL COMPUTING FOR STATISTICAL ANALYSIS. (3 credits; 3 hours; Prerequisite: 166-350A, 189-231A, 204-204A or equivalent). The course introduces the student to computers and to their uses in the solution of statistical problems. Numbers systems, data representation, characteristics of a high-level programming language (FORTRAN), methods of computer solution of statistical problems, random numbers, games of chance, simulation.
Mr. Cohen

308-230A,B COMPUTERS IN DATA PROCESSING. (3 credits; 2 hours, Prerequisite: 308-200A,B or equivalent). Uses of computers for data processing; COBOL; job control language; system utility programs; file processing; comparison of languages in business-oriented applications.
Professors Burrage and Lam

308-300A,B PROGRAMMING LANGUAGES. (3 credits; 2 hours; Prerequisite: 308-210A,B). A study of programming languages including PL/1 and two from APL, LISP or SNOBOL. Computer solution of non-numerical problems.
Professor Thorpe

308-302A A COMPARATIVE STUDY OF PROGRAMMING LANGUAGES. (3 credits; 3 hours; Prerequisites: 308-200A,B and 308-210A,B). A study of high-level programming language features and concepts including: scope and life-time rules,

type checking, parameter passing, recursive procedures, records, modules, structured programming and program reliability. The student will be required to run programs in at least three of the languages covered. These languages will include FORTRAN, PL/I, ALGOL, PASCAL, SIMULA 67, SNOBOL, LISP and APL.
Professor Horspool

308-305A COMPUTER SYSTEM ARCHITECTURE. (3 credits; 3 hours; Prerequisite: 308-210A,B). A functional description of computer hardware. Hardware concepts and current technology. Memories, buffers, memory hierarchies and dynamic address translation. CPU characteristics, performance factors, overlap, parallel and pipeline systems. Microprogramming. Interrupt mechanism and clocks. Channels, control units, input devices including telecommunication equipment.
Mr. Greenberg

308-310B. COMPUTER SYSTEMS AND ORGANIZATION. (3 credits; 2 hours; Prerequisite: 308-305A). Control and scheduling of large information processing systems. Operating system software – resource allocation, dispatching, processors, access methods, job control languages, main storage management. Batch processing, multiprogramming, multiprocessing, time sharing.
Professor Horspool

308-315A,B INFORMATION STRUCTURES. (3 credits; 2 hours; Prerequisite: 308-210 A,B; *Students with a high grade in 308-200 may be permitted to register).* This course introduces the concepts of data storage and develops competence in data manipulation. The student is expected to write and run his own programs. The course discusses the basic types of data structures, their theoretical properties and some of their applications. Contents: storage of arrays, applications to special matrices and scientific computation; queues and stacks, applications to compiler writing; sorting and searching; introduction to list processing and symbolic manipulation.
Professor Anantha

308-320B FILES AND DATA BASES. (3 credits; 2 hours; Prerequisites: 308-230A,B and 308-315A,B). PL/1 language essentials; data sets, files and job control language; sequential files; printing, sorting, updating, indexed sequential files; direct files; files of structured data; data bases.
Professor Burrage

308-405B ANALYSIS OF ALGORITHMS. (3 credits; 3 hours; Prerequisites: 189-218B and 189-245A,B, or 189-250A, or equivalent; 308-315 A,B). An introduction to techniques for the analysis of algorithms and basic methods of improving their efficiency. Various problems from engineering applications and computer science will be selected and efficient algorithms developed for their solution. Topics will be selected from: review of data structures, analysis techniques, design techniques; the Fast Fourier Transform, exact and polynomial arithmetic; matrix multiplication, inversion and decomposition; selected algorithms on graphs.
Professor Friedman

308-415B PROGRAMMING LANGUAGE STRUCTURE AND COMPILERS. (3 credits; 3 hours; Prerequisites: 308-210A,B, 308-315A,B; and 308-302A). An introduction to the structure of programming languages and techniques of compilation. A study of various programming languages and their structures from the point of view of implementation. An introduction to compilers and compiler writing. The student is expected to acquaint himself with the languages discussed and with compilation techniques by writing and running programs and compiler segments.
Professor Friedman

308-425B HEURISTIC PROGRAMMING. (3 credits; 3 hours; Prerequisite: 308-315A,B). This course introduces heuristic as opposed to algorithmic concepts in problem solving, pattern recognition, learning and adaptation. The student is expected to write and run programs in the above areas.

Contents: Game trees; programs that play games; heuristic search procedures; programs that solve problems; learning programs; adaptive programs; question answering programs; pattern recognizing programs.
Professor Toussaint

308-520A DATABASE SYSTEMS. (3 credits; 3 hours; Prerequisite: permission of instructor. recommended: 189-318, 308-320). An introduction to abstract data structure and to techniques of database implementation. Topics: review of sentential and predicate logic, relational view of data, relational calculus, relational algebra, normalization; hierarchical and network views of data, implementation techniques, existing database systems (chosen from: ADABAS, DBTG, IMS, S2000, TOTAL); data security and integrity.
Professor Merrett

308-573A,B MINI-COMPUTERS. (3 credits; 3 hours; Prerequisites: 308-2l0 A,B and permission of instructor). Characteristics and internal structure of micro and mini-computers. Theoretical concepts and properties of assemblers, loaders and simulators. Assembler and machine languages for small computers. System software. Applications for small computers. Students will be assigned "hands-on" projects.
Professors Ratzer and Marovac

*CRYSTALLOGRAPHY (186)**

Room 337, Frank Dawson Adams Building, 3450 University Street, Montreal, P.Q., H3A 2A7, Telephone: 392-5840.

Most solids, from the minerals of the earth and the moon to the proteins and other macromolecular biological materials, have a structure that is characterized by a regular triperiodic arrangement of atoms and molecules; they are crystalline. Crystallography concerns itself with the determination of these interatomic arrangements and their imperfections as well as with the study of the resulting chemical and physical properties of crystalline matter.

Crystallographers find their problems in fields as diverse as mineralogy, crystal physics, molecular biology, solid state chemistry, materials science, group theory, etc. The student's preparation should therefore be as sound and broad as possible in the fundamentals of science. In the Honours and Major programs, which are administered by the Department of Geological Sciences, a student takes more chemistry than the physics student, and more physics and mathematics than the chemistry student. In addition, the student at the undergraduate level will be taught morphological and structural crystallography, symmetry, crystal chemistry, the techniques of X-ray diffraction, and optical crystallography.

Students successfully completing the crystallography program may proceed to graduate studies in crystallography, where they may specialize in the physical, the chemical, or the biological aspects of the subject. This training will prepare crystallographers for careers in basic research and teaching or in industry.

**Crystallography is a part of the Department of Geological Sciences.*

MAJOR IN CRYSTALLOGRAPHY

First year: Geology 186-210B and 211A; Chemistry 180-213A,B or -212A,B; Mathematics 189-222A,B, -223A; Physics 198-219A and -251A or -231A,B. (9 additional credits).

Second year: Geology 186-501B and 312B; Mathematics 189-314A,B; Chemistry 180-281A,B; Physics 198-346D ; Computer Science 308-200A. (9 additional credits).

Third year: Geology 186-503D, 504B; Mathematics 189-315A,B; Physics 198-434B, -438B; Chemistry 180-381A. (10 additional credits).

HONOURS IN CRYSTALLOGRAPHY

Honours students will take the same courses required for Major students and will be given 18 credits of additional course requirements, in closely related disciplines, after consultation with their adviser. One additional requirement will be the writing of a report on a research project carried out in 186-503D. They must maintain a 2.8 minimum GPA.

Course Descriptions

186-211A CRYSTALLOGRAPHY. (3 credits; 2 hours lectures, 3 hours laboratory). Lattices, crystal systems, point groups, space groups, crystal morphology (stereographic projection, Wulff net), twinning, X-ray diffraction applied to powders and single crystals (rotation, Weissenberg, precession). Fourier summations (electron density and Patterson), approaches to crystal structure determination.
Professor Donnay

186-501B CRYSTAL CHEMISTRY. (3 credits; 2 hours lectures, 1 hour seminar; Prerequisite: Geology 186-211A, 180-213A,B). Discussion of crystal structures of important mineral groups, especially oxides, sulphides and silicates. Solid solution. Relation of structure to morphology and to chemical and physical properties of crystalline matter. (Not open to students who have taken 186-213A or 186-313A).
Professor Donnay

186-502B CRYSTAL-STRUCTURE ANALYSIS. (2 credits; 2 lectures). Elements of crystallography and diffraction physics basic to structure determination. Choice of crystal; principles underlying photographic and counter methods of collecting intensity-data. Data reduction. F^2 synthesis. The phase problem. Trial and error methods, heavy-atom techniques, direct methods. Electron density calculation. Refinement of structure.
Professor Donnay

186-503D CRYSTAL-STRUCTURE DETERMINATION. (6 credits; 6 hours laboratory; Prerequisite: 186-211A, or 502B). Techniques of structure determination applied to a research problem. (Not open to students who have taken 186-493D).
Professor Donnay

186-504B CRYSTAL SYMMETRY. (2 credits; 2 lectures). Derivation of the 32 crystallographic point groups (the geometric crystal classes), 14 translation groups (the Bravais lattices), 73 arithmetic crystal classes (isomorphic with symmorphic space groups) and 230 space groups. Atomic site symmetry vs. crystal-structure symmetry. Effect of solid solutions on crystal symmetry. Symmetry information to be gained from X-ray diffraction: powder diagrams vs. single-crystal patterns. Generalized symmetry applied to twinning and magnetic structures.
Professor Donnay

*EXPERIMENTAL MEDICINE (516)**

516-502A ADVANCED ENDOCRINOLOGY. (3 credits). This course is designed for U-3 students who are in a major or honours program in biology, physiology or biochemistry, and for graduate students. The material covers neuroendocrinology, the pituitary hormones, the adrenal, testicular and ovarian hormones and control of intermediary metabo-

lism (insulin and growth hormones). (Not open to students who have taken 516-502D).
Professor Mulay and Staff

516-503B ADVANCED ENDOCRINOLOGY. (3 credits). This course is designed for U-3 students who are in a major or honours program in biology, physiology or biochemistry, and for graduate students. The subjects covered are the thyroid, catecholamines, calcium metabolism, prostaglandins and the role of hormones in growth and development as well as in cancer. The emphasis is on physiology, biochemistry and regulatory mechanisms. (Not open to students who have taken 516-502D).
Professor Mulay and Staff

516-507D ADVANCED APPLIED RESPIRATORY PHYSIOLOGY. (6 credits; Prerequisite: 552-311D). Comprehensive coverage of respiratory physiology starting with fundamental principles and proceeding to latest developments in the field. Clinical application of physiological processes and their impairment in disease states are briefly referred to. Some background knowledge of respiratory physiology is advisable. (Not open to students who have taken 552-507D).
Professor Engel

516-512A PHYSICAL METHODS IN BIOLOGICAL RESEARCH. (3 credits; Prerequisites: first year calculus and physics, Physiology 311D and/or permission of the instructor). Theoretical and practical treatment of biomedical instrumentation in research (user oriented). Electrical theory, transducers, frequency response, amplifiers, stability and noise, integrators and differentiators, computerized data acquisition.
Professor Murphy and Staff

*Experimental Medicine is a division of the Department of Medicine

GEOGRAPHY (183)

Professors: – J. BRIAN BIRD; B.J. GARNIER *(Chairman);* T.L.HILLS; J.T. PARRY.
Associate Professors: – W. ARMSTRONG; M.A. CARSON; R.N. DRUMMOND *(on leave 1st term 1977/78);* P.G. HOLLAND; J.O. LUNDGREN; B.H. MASSAM; T.R.MOORE; S.H. OLSON; E. WADDELL; R.C. ZIMMERMANN
Assistant Professors; – J. BRADBURY; J.J. DRAKE; G.O. EWING; W.B. KEMP; J.E. LEWIS; L. MULLER-WILLE
Honorary Professor – F.B. MULLER

Burnside Hall
805 Sherbrooke St. West,
Montreal, P.Q. H3A 2K6.
Department Chairman,
Room 510, Telephone: 392-5700.

General inquiries at Departmental Office,
Room 513, Telephone: 392-5700.

Geography is a discipline which bridges the gap between Science and Arts subjects. Its central theme is the study of man and the processes which affect him in his physical and social environments. Both a specialist and an interdisciplinary approach are open to students, who, while taking several courses in common, may proceed towards either the B.Sc. or B.A. degrees.

The challenges facing students in geography and the areas for investigation are wide ranging. Current projects involving undergraduate students include:

A mathematical analysis of air travel in Canada.
Land use, soils and water quality in Quebec.
Weather and human comfort in Montreal.
Social and economic utilization of Arctic resources.
Location of health and welfare facilities for urban planning.
Tourism and recreational land use in developed and developing countries.

Graduates have found career opportunities in accordance with their level of specialization and interests. Many segments of industry, and all levels of education and government employ students trained in geography. The Federal Departments of Environment, Energy, Mines and Resources, Urban Affairs, External Affairs, Regional Economic Expansion, and those dealing with Parks, Native Peoples and Land Use have areas where geographers may find applications for their skills. Some jobs are in the remote or wilderness areas of various countries, but others are in the offices and laboratories of large urban centres. Within these careers, specialization may be very diverse, and include climatology, regional and city planning, industrial location, air photo interpretation or map analysis, and cultural and biological problems in regional development.

The interaction of man with various aspects of his environment is seen in the emphasis given to the interaction throughout many of the courses and programs offered in the department. Some courses, however, focus on a range of local, regional and world problems, such as air and water quality, or food/population and economic development relationships. In others the emphasis is on the study of physical, economic and cultural processes in a geographical framework. Other courses centre upon methods of geographical analysis.

Courses in the Geography Department are informally organized into sequences such as the following:

World Problems: 183-110A, -112B, -346B
Urban: 183-216A, -217B, -314A, -316A, -331A, -412B
Economic: 183-311B, -313A, -315B, -319A, -410D, -411A, -415B
Cultural-Ecological: 183-214A, -215B, -300B, -317A, -345B, -403B, -414A.
Physical Geography: 183-113B, -203D, -325A, -499F
Geomorphology: 183-271A, -272B, -453B
Hydrology: 183-322A, -327B
Climatology: 183-321B, -324A, -422B, -423A

Biogeography and Soils: 183-302D, -305A, -307B, -451D A,

Regional: 183-309A, -310A, -326B, -401A

Technical: 183-201B, -202A, -306B, -308A, -333A, -351B, -482D, -484D

(Cartography, Air Photo, Statistical Analysis, Research Methods).

Combinations of these sequences may be followed leading to either B.A. Honours and Major in Geography (see Arts section) or B.Sc. Faculty Programs, Honours and Major in Geography as described below.

FACULTY PROGRAMS

For details see Faculty Programs, page 143.

There are no specific prerequisites to these faculty programs; courses that should be taken in U1 are marked with an asterisk. Any deficiencies in background should be taken concurrently as one of the optional selections.

Advising: For information on advising and further course details please contact Burnside Hall, Room 513, Telephone 392-5700.

MAJOR IN GEOGRAPHY

Students are required to take a minimum of 42 credits in Geography and 12 credits drawn from approved courses in the departments of Biology, Geology, Meteorology, Physics and from the Faculty of Engineering.

Advising: For information on advising and further course details please contact Burnside Hall, Room 513, Telephone 392-5700.

First year: Geography 183-201B, -202A, -203D, and 6 credits in Arts Geography.

Second year: Geography 183-271A and -272B, -351A.

Third year: Geography 183-321B or -324A or -422B, -451D and -306B or -308A.

HONOURS IN GEOGRAPHY

Advising: For information on advising and further course details please contact Burnside Hall, Room 513, Telephone 392-5700.

All Honours students take a basic group of courses in Geography. In addition they may take a comprehensive program in Physical Geography, or choose an area of specialization. At present, specialized options are offered in Biogeography, Climatology and Geomorphology.

All four B.Sc. Honours programs involve completion of 60 credits of approved geography courses (including a 6-credit research course), 9 optional non-geography credits from a list of approved courses in ancillary fields, and a balance (of 21 credits) of electives. The following lists specify those courses which are compulsory in these programs. *A detailed description of each program, with all approved courses, is available from the departmental office, Room 513, Burnside Hall.*

Core Courses

(a) PHYSICAL GEOGRAPHY

Geography 201B, 202A, 203D, 271A (or 272B), 302D, 305A, 306B, (or 308A), 321B or -324A or -422B, 322A, 325A, 351B, 484D

(b) SPECIALIZED OPTIONS IN BIOGEOGRAPHY, CLIMATOLOGY AND GEOMORPHOLOGY

Geography 201B, 202A, 203D, 271A (or 272B), 306B (or 308A), 321B, 351B, 451D, 484D

PREREQUISITES

There are no prerequisites in geography for entrance to the Major or Honours B.A. or B.Sc. in Geography. Arts students should include six credits of mathematics in their CEGEP or pre-university programs. Students who have completed college or pre-university geography courses fully equivalent to those at first year university may substitute other approved courses as part of their Major or Honours programs.

INTRODUCTORY COURSES

Students intending to continue in physical geography should enrol in Geography 183-203D. Those students who have not taken physical geography or earth sciences at the College level, and those students who do not intend to continue further in physical geography are recommended to take Geography 183-113B (a treatment of physical geography at the global scale).

Students seeking an overview of world geographic problems, and not necessarily wishing to continue in geography, are recommended to take Geography 183-110A, 112B and/or 113B.

Course Descriptions

183-110A GEOGRAPHICAL PERSPECTIVES ON WORLD ENVIRONMENTAL PROBLEMS. (3 credits; 2 hours and conference). Introduction to geography as nature and man in a spatial context. An integrated approach to environmental systems and the human organization of them from the viewpoint of spatial relationships and processes. Special attention to major world problems, for example: the expanding Sahara, the disappearance of tropical forests, food shortages, North American water shortages, demands on energy resources, and the development of Arctic resources. (Not open to students who have taken 183-111D).

Professors Bird and Hills

183-112B GEOGRAPHY OF CONTEMPORARY WORLD PROBLEMS. (3 credits; 2 hours and conference). Geographic perspectives on major contemporary world problems with an emphasis upon cultural-political background. A consideration of the world's increasingly adverse population-resource ratio, environmental deterioration, problems of

energy supply, uncontrolled urbanization and the increasing disparity between the developed and the developing realms. (Not open to students who have taken 183-111D).
Professors Hills and Armstrong

183-113B AN INTRODUCTION TO PHYSICAL GEOGRAPHY. (3 credits; 2 hours and laboratory). An introductory description and explanation of the physical processes and properties of the earth's atmospheric systems and the continents of the earth. Energy at work in the atmosphere and oceans and at the surface, and the resulting world pattern of physical environments; the interrelationships of natural phenomena within these environments. (Not open to students who have taken 183-111D).
Professor Bird

183-201B INTRODUCTION TO CARTOGRAPHY AND AIR-PHOTO INTERPRETATION. (3 credits; 1 hour plus laboratory periods). The basic principles and technical skills used in cartography and the interpretation of air photos for the presentation and analysis of spatially distributed data. Thematic maps and the communication of ideas in map form.
Professor Drummond

183-202A INTRODUCTION TO GEOGRAPHICAL ANALYSIS. (3 credits; 2 hours and conference). An introduction to the application of statistical techniques to the description, analysis and presentation of spatially distributed data.
Professor Massam

183-203D AN INTRODUCTION TO ENVIRONMENTAL STUDIES. (6 credits; 2 hours and conference). Geographical problems and themes in environmental studies. The major environmental processes and the interaction between the components (the atmosphere, lithosphere and biosphere). Examination of Man's impact on the environment, and its consequences.
Professors Drake, Holland and Staff

183-214A CULTURAL GEOGRAPHY. (3 credits; 2 hours and conference; Prerequisite: A first year course in Geography or Earth Science or -203D). Relationships between environment, technology and society: the concept of a man-environment (or ecological) system. Identification of the principal stages and processes of cultural evolution.
Professor Hills

183-215A THIRD WORLD URBAN CULTURAL GEOGRAPHY. (3 credits). Urban cultural phenomena in the "Third World". Topics for 1977/78:.urban demography of developing countries, migration, polyethnic cities, their geopolitics and communications systems.
Professors Olson and Thornton

183-216A GEOGRAPHY OF LOCATION. (3 credits; 2 hours and conference). Introduction to the geographic organization of economies. Examination of the basic theoretical principles that explain the spatial organization of agriculture, industry and cities.
Professors Ewing and Bradbury

183-217B INTRODUCTION TO URBAN GEOGRAPHY. (3 credits; 3 hours; Prerequisite: An introductory geography course at the college level or equivalent). The internal spatial structure of the city and related processes are analysed in terms of land uses, population density, social and economic characteristics of the population, travel patterns and household migration. Trends in urbanization and urban growth in Québec and Ontario are examined.
Professors Olson and Ewing

183-236A INDIGENOUS PEOPLE OF NORTH AMERICA. (3 credits; this is a linked course with Anthropology 151-236B). A survey of North American Indians and Inuit cultures from an ecological and ethnographic perspective. Discussion of adaptations to the North American environment from earliest origins and an analysis of the traditional patterns of life and of the process of cultural change occurring within selected environmental zones. (Not open to students who have taken 151-236D or 183-336D).

183-271A TERRAIN ANALYSIS I. (3 credits; 2 hours and conference/laboratory; Prerequisite: A course in physical geography or equivalent). A systematic treatment of the geomorphology of areas of folding, faulting, intrusion and vulcanism and their response to weathering and erosion.
Professors Bird and Parry

183-272B TERRAIN ANALYSIS II. (3 credits; 2 hours and conference/laboratory; Prerequisite: A course in physical geography or equivalent). A systematic treatment of the geomorphology of areas dominated by gradational processes: glacial and periglacial, fluvial and mass-wasting, coastal and marine, aeolian and arid.
Professor Parry

183-300B GEOGRAPHICAL ASPECTS OF CULTURAL ADAPTATION. (3 credits; 2 hours and conference; Prerequisite: 183-214A or permission of the instructor). Study of the dynamic processes that structure the relationship between man, culture and environment. The role of energy and information for adaptive processes will be analysed within the context of urban and non-urban societies. Specific attention will focus on the ecological aspects of human nutrition and environmental health.
Professor Thornton

183-302D ENVIRONMENT: ECOSYSTEMS AND MAN. (6 credits; 3 hours; Prerequisite: 183-203D or 177-111A or permission of instructor. Field work is emphasized). An ecological analysis of the physical and biotic components of the environment, with emphasis on the scientific, technological, institutional and other aspects of

environmental degradation and restoration. Practical resource management in collaboration with local government and industry.
Professor Zimmermann

183-305A THE GEOGRAPHY OF SOILS. (3 credits; 2 hours and laboratory; Prerequisite: An introductory course in physical geography or geology or biology). Discussion of main properties of soils; principles of soil formation and classification; major soil types of the world; soil survey techniques.
Professor

183-306B ADVANCED CARTOGRAPHY. (3 credits; 1 hour and laboratory periods; Prerequisite: 183-201B or permission of instructor). Analysis and interpretation of thematic and topographic maps. Their application to selected problems in physical and cultural geography, design and compilation of maps for geographic communication, map reproduction and computer mapping.
Professor Drummond

183-307B SOILS AND LAND UTILIZATION. (3 credits; 2 hours and conference/laboratory; Prerequisite: 183-305A or permission of instructor). Principles of land utilization and crop growth; case studies of the influence of soils on land use in selected environments. *(Not given in 1977-78).*
Professor Moore

183-308A AIR PHOTO INTERPRETATION AND REMOTE SENSING. (3 credits; 1 hour and laboratory periods; Prerequisite: 183-201A, or permission of instructor). The principles of air photo interpretation and remote sensing of the environment, applications to urban problems, geomorphology, land use and inventory of natural resources. Elementary photogrammetry and field work.
Professor Parry

183-309A. CANADA: ITS GEOGRAPHIC FOUNDATIONS. (3 credits; 2 hours and conference). An introduction to the geography of Canada. A comprehensive geographical interpretation of Canada's salient physical and human characteristics, including landscapes and their evolution, climate, vegetation, man/land relationships and socio-economic attributes of the population. (Not open to students who have taken 183-301D).
Professors Bird and Thornton

183-310B GEOGRAPHY OF THE CARIBBEAN. (3 credits; 2 hours and conference). The nature, perception and management of Caribbean resources will be described and analysed from the point of view of historical factors, cultural diversity, and political organization. Models of economic development and attempts at regional organization will be considered.
Professor Hills

183-311B GEOGRAPHIC ATTRIBUTES OF THE CANADIAN ECONOMY. (3 credits; 2 hours and conference). Prerequisite: 183-309A, or an introductory geography course, or permission of instructor). A geographic interpretation of the Canadian growth experience. The evolution of Canadian economic regionalism considered in relation to natural resources, agriculture, urbanism and industrialization. Some effects of the American participation in the Canadian economy. Regional disparities and contemporary urban problems. (Not open to students who have taken 183-301D).
Professor Bradbury

183-312A THE GEOGRAPHY OF CHINA. (3 credits; 2 hours and conference). A general overview of the Chinese landscape. Special topics will focus on the distribution and growth of population, the remodelling of agricultural organization since 1949, changes in the industrial sector and spatial pattern of industry, and transportation networks. *(Not given in 1977/78).*
Professor

183-313A GEOGRAPHY OF RECREATION. (3 credits; Prerequisite: Introductory course in either human or physical geography or permission of instructor). The development of the phenomenon of modern recreation and its geographic characteristics. Outdoor recreation in different forms, with special attention to changing land requirements, both on urban and regional scale levels, including the development of park systems; structure and distribution of the recreation service industry and selected institutional recreational systems. Emphasis will be given to the greater Montreal region through field work-oriented term assignments.
Professor Lundgren

183-314A INTERMEDIATE URBAN GEOGRAPHY. (3 credits; Prerequisite: 183-216A or 217B or permission of instructor). A review of selected topics relating to urban policy making, social justice; provision of public goods; public finance; infrastructure planning and impact studies. An examination of spatial interaction analysis, including gravity and space preference models of passenger and commodity flows, shopping trips and migration flows; planning applications. An introduction to urban environmental perception.
Professor Ewing

183-315B GEOGRAPHY OF TOURISM. (3 credits; Prerequisite: Introductory course in either human or physical geography or permission of instructor). Geographic characteristics of tourist travelling, including changing tourist attractions, touristic mobility, tourist travel components and, the modern integrated tourist travel system; tourism and regional economic development, especially in Third World economics.
Professor Lundgren

183-316B CONTEMPORARY POLITICAL GEOGRAPHY. (3 credits; 2 hours and conference; Prerequisite: 183-202B or permission of instructor). The study of the spatial dimensions of political activities

at the local and national levels: the principles of urban government reforms.
Professor Massam

183-317A THEMES IN TROPICAL REGIONAL GEOGRAPHY. (3 credits; Prerequisite: 183-214A). Several geographic themes are considered in the context of a selected region: nature of responses to population pressure on resources, regional trading (ancient and modern), cultural constraints in the modernization of the traditional economies, rural-urban migration and urbanization.
Professor Armstrong

183-318B SPATIAL ANALYSIS OF MANUFACTURING. (3 credits; 2 hours and conference; Prerequisites: 183-216A; or by permission of instructor). Geographic analysis of manufacturing industry with emphasis on spatial concentration in manufacturing and the problem of generating industrial growth in disadvantaged areas. *(Not given 1977-78).*
Professor

183-319A GEOGRAPHY OF ECONOMIC DEVELOPMENT. (3 credits; Prerequisite: 183-214A, 216A or 217B or by permission of instructor). Analysis of the role of geography in the field of economic development; growth and development theories on different geographic scale levels; behaviour of selected economic activities in change process; regional economic development in relation to changing resource utilization; development planning.
Professors Lundgren and Bradbury

183-321B CLIMATIC ENVIRONMENTS. (3 credits; Prerequisite: 183-203D or Meteorology 210D or instructor's permission). Scope of climatology, physical, dynamic and applied. The earth/atmosphere system, radiation and energy balances, governing meteorological processes. Movement and circulation of the atmosphere on a local and global scale. Resulting weather systems.
Professors Garnier and Lewis

183-322A HYDROLOGY (3 credits; 2 hours and laboratory/conference; Prerequisites: 183-203D or equivalent). Quantitative, experimental study of the principles governing the movement of water at or near the earth's surface.
Professor Drake

183-324A BIOCLIMATOLOGY. 3 credits; Prerequisite: 183-203D or Meteorology 210D or permission of instructor). Climatic classification and weather systems. Influence of climate on plants, animals, and man. Water balance and its application in agriculture and water resource analysis. Principles of physiological climatology; calculation of wind chill, effective temperature, and comfort indices. Application of physiological climatology to human affairs, e.g. health, urban planning, and house design.
Professor Lewis

183-325A PHYSICAL GEOGRAPHY OF QUEBEC. (3 credits). An account of the development of the present natural environment of Québec with particular attention to changes following the retreat of the Laurentide Ice Sheet. Discussion of contemporary processes, resources and problems will provide a background for 183-326B. Field work.
Professor Carson

183-326B HUMAN GEOGRAPHY OF QUEBEC. (3 credits; 2 hours and conference). A geographical interpretation of selected social, economic and political problems of contemporary Québec; ethnicity, demography, urbanization, regional disparities, economic marginality, with the purpose of segregating elements unique to Québec from the more universal aspects that pervade them.
Professor Waddell

183-327B WATER RESOURCES AND LAND USE. (3 credits; 2 hours and laboratory; Prerequisite: 183-203D or 322A or permission of instructor). An introduction to the applications of the principles of hydrology to the development and management of water resources; the constraints imposed by natural systems on man's activities in rural and urban environments and the economic costs and benefits of modifying these constraints.
Professor Drake

183-331B URBAN SOCIAL GEOGRAPHY. (3 credits; Prerequisite: 183-214A or 216A or permission of instructor). Social space and social time. The reflection of social structure in the spatial organization of the city. Historical perspective on changing personal mobility, life cycle, family structure and work organization. The appropriation and alienation of urban spaces.
Professors Olson and Thornton

183-333A MONTREAL URBAN FIELD STUDIES. (3 credits; Prerequisite: An introductory geography course or permission of instructor). Encounters with social and physical environments of Montreal. A phenomenology of the city. This course has a modular organization with weekly individual field exploration by class members.
Professor Olson

183-345B THE GEOGRAPHICAL ROOTS OF IDENTITY. (3 credits; Prerequisite: a 200-level course in human geography or permission of instructor). Introduction to ethnicity, minority groups, minority space and plural societies, focusing on contemporary resurgence of ethnic identity at various levels – the city, regional and national movements. Geographical focus on urban America, Francophone America (Québec, Acadie, Louisiana) and Western Europe.
Professors Waddell and Olson

183-346A GEOGRAPHICAL BACKGROUND OF INTERNATIONAL RELATIONS. (3 credits; 2 hours plus conference; Prerequisite: A university level geography course and permission of the instructor). The principles and practice of political

geography at the world and international level. Geographical factors and relationships influencing political events and decision making.
Professor Müller-Wille

183-351B GEOGRAPHICAL ANALYSIS AND QUANTITATIVE METHODS. (3 credits; 3 hours; Prerequisite: 183-202A or permission of instructor). Basic conditional probability theory, urn schemes, occupancy problems, theoretical probability distributions, sampling theory and univariate statistical inference, multiple regression and one-and two-way analysis of variance.
Professors Holland and Ewing

183-401A GEOGRAPHY OF NORTHERN LANDS. (3 credits; Prerequisite: An introductory geography course or 151-236B and 183-236A or permission of instructor). An introduction to the far northern lands and seas, their resources, peoples, economies and future development. Commencing with the history of Arctic exploration and study of northern ecology, the course concludes with discussion of contemporary activities in northern Canada, Greenland, Scandinavia, the U.S.S.R. and Alaska. (Not open to students who have taken 183-402D).
Professors Bird and Müller-Wille

183-403B NORTHERN CULTURAL SYSTEMS. (3 credits; Prerequisite 183-236A and 151-236B or 401A or permission of instructor). An analysis of the evolution and present pattern of Inuit adaptation. Problems of northern development and cultural change are viewed from an ecological and cross-cultural perspective. Man environment relationships will be modelled and the processes associated with maintaining and changing these relationships will be analyzed. (Not open to students who have taken 183-402D).
Professor Müller-Wille

183-410D THE GEOGRAPHY OF UNDERDEVELOPMENT. (6 credits, Prerequisite: 183-214A; Corequisites: 183-310A and/or -312A and/or -318B). An examination of the concept of underdevelopment from the viewpoint of geography. In this, the cultural, political and economic mechanisms and manifestations of underdevelopment and the responses to it, will be considered in different areas of the world. The two major sections of the course will centre on: A) A study of the rise of industrial capitalism, its historical evolution and spread geographical in the past two centuries with special reference to the past thirty years. This will serve as an introduction to: B) A consideration of underdevelopment, its position within the dominant world economic system, and an analysis of its functioning in socio-cultural and geopolitical terms.
Professor Armstrong

183-411B GEOGRAPHY OF INTERNATIONAL TRADE. (3 credits; Prerequisite: 183-216A or permission of instructor). Geographic patterns of international trade, regional resource base and trade generation. Trade systems. The foreland-hinterland concept, commodity innovation, geographic diffusion and range. *This course is given in alternate years: not given in 1977/78.*
Professor Lundgren

183-412B ADVANCED URBAN GEOGRAPHY. (3 credits; 2 hours and conference; Prerequisites: 183-216A and 351A or permission of instructor). Strategies for solving location-allocation problems; on planes and networks; static and dynamic models; applications to selected urban problems. The application of computerized algorithms in solving these problems is stressed.
Professor Massam

183-414B TROPICAL ENVIRONMENTS AND ADAPTATIONS. (3 credits; Prerequisite: 183-203D and 214A or permission of instructor). A consideration of the geographically significant cultural, physical and biological characteristics of tropical ecosystems – rain forest, savanna, arid and highland. An analysis of the principal adaptive systems, of the natural hazards to which such systems are subject, and of the local and external responses to the hazards. (Not open to students who have taken 183-304B).
Professors Hills and Waddell

183-415B TOURISM RESOURCES: A GEOGRAPHIC ANALYSIS. (3 credits; Prerequisite: 183-313A or -315B). The regional tourism resource in a changing society; resource composition, utilization and management of the tourist region; special emphasis on geographic components of development strategies for typical resort areas/tourist regions within the context of international and inter-regional tourist travel systems.
Professor Lundgren and Staff

183-422B THE URBAN CLIMATIC ENVIRONMENT. (3 credits; Prerequisite: 183-203D or permission of instructor). Examination of components of the urban radiation-energy budget and its direct corollaries – the urban temperature and wind fields. Air pollution is considered as a man-made perturbation affecting the natural conditions of the atmosphere. Methods of energy balance and air pollution diffusion modelling. Land-use planning in association with climatic and pollution effects. Implications of building climatology.
Professor Lewis

183-423A MICROCLIMATOLOGY. (3 credits; Prerequisite: Intended for U3 students with a good science background and at least one course in climatology or meteorology; permission of the instructor is required). A detailed examination of energy and mass exchange at/or near the earth's surface, emphasizing radiative, heat, moisture and momentum transfers. Methods of measurement based on energy balance, water balance, and turbulent transport theory. Models of potential and actual evaporation and their use in predicting soil

moisture and plant productivity. Examples drawn from natural, agricultural, and urban environments.
Professors Lewis and Garnier

183-451D BIOGEOGRAPHY. (6 credits; Prerequisite: 183-203D or 302D or permission of instructor, for students in continuation or honours biological science). Study of life according to its environmental and spatial relationships with emphasis on plants. The interaction, geographical distribution, domestication and economic utility of biota in the regional setting.
Professor Holland

183-453B APPLIED GEOMORPHOLOGY. (3 credits; 2 hours lecture and laboratory, Prerequisite: a previous course in geomorphology or permission of instructor). An examination of the role of the geomorphologist in the solution of environmental problems, the planning of environmental changes, and the detection and utilization of environmental resources.
Professor Carson

183-481B EVOLUTION OF MODERN GEOGRAPHY. (3 credits; for Honours and Joint Honours and Major students in Geography only). A review of the historical development of geography as a separate discipline and a systematic analysis of the main branches of modern geography with emphasis on the theoretical and methodological developments during the last fifty years.
Professors Thornton and Bradbury

183-482D RESEARCH AND READING COURSE IN GEOGRAPHY. (6 credits; for final year B.A. Honours or Joint Honours in Geography only). An advanced course designed to familiarize the student with contemporary research and writing in the various aspects of geography. An essay or undergraduate thesis will be required to complete the requirements of this course.
Staff

183-484D RESEARCH AND READING COURSE IN PHYSICAL GEOGRAPHY. (6 credits; for final year B.Sc. Honours or Joint Honours in Geography only). An advanced course designed to familiarize the student with contemporary research and writing in the various aspects of physical geography. An essay or undergraduate thesis will be required to complete the requirements of the course.
Staff

183-490D INDEPENDENT STUDIES IN GEOGRAPHY. (3 credits; open to U3 Geography Major students only; Prerequisite: projects must be arranged individually with instructors before registration). Research or reading projects permitting independent study under the guidance of a staff member specializing in the field of interest.
Staff

183-499G THE PHYSICAL GEOGRAPHY OF THE SUBARCTIC: SCHEFFERVILLE FIELD CAMP. (3 credits; Prerequisite: 183-203D or 325A). An introduction to the physical geography of the Sub-Arctic with emphasis on the applications of field methods to the description and measurement of phenomena and processes. Students will undertake projects concerned with topics such as permafrost and frozen ground phenomena. Based at the McGill Sub-Arctic Research Laboratory, Schefferville. Preregistration required in April of U2 year for September of U3 year; contact Prof. J.J. Drake.
Staff

Summer Session

The following courses will be given during the 1977 Summer Session. Other courses will be offered in summer of 1978.

Geography 183-311L, Geographic Attributes of the Canadian Economy; 315L, Geography of Tourism; 314C, Intermediate Urban Geography; 360C, Comparative Urban Geography; 183-404C, Contemporary Geography.

GEOLOGICAL SCIENCES (186)

Professors – G. DONNAY; J.A. ELSON; E.W. MOUNTJOY; V.A. SAULL; C.W. STEARN; J.S. STEVENSON
Associate Professors – R. DOIG *(Chairman)*; P.R. EAKINS; R.H. GRICE; R. HESSE; W.H. MacLEAN; R.F. MARTIN; G.R. WEBBER
Assistant Professors – D. FRANCIS; A.J. HYNES
Research Associates – A. BECKER; J.D.H. DONNAY

Frank Dawson Adams Building,
3450 University Street
Montreal, PQ, H3A 2A7.
Departmental Office Room 238,
Telephone: 392-5730

Geology is a study of the planet Earth – its composition, structure, behaviour, and history.

Although geologists must have a basic training in mathematics, physics, and chemistry, geology is a science in itself dealing with events which took place millions of years ago and involved masses of continental dimensions. Most geologists start their research in the field, collecting samples, measuring rock structures, and determining their properties with portable instruments. In the laboratory they analyse these specimens and interpret their measurements, using the sophisticated tools of modern science. The forces that molded a mountain chain, built a volcano, or drifted the continents apart cannot be duplicated by man, but the geologist can understand these events by analogy with experimental models and laboratory investigations of the compositions and strengths of the rocks of the crust of the earth. Like most sciences geology has its theoretical and practical aspects; geologists are concerned with

the origin of our planet and solar system, the evolution of its surface, the nature of its interior, and the atomic structure of its minerals, as well as with the discovery of mineral deposits, the location of dam sites, and the prediction of earthquakes.

Some geoscientists specialize in the application of physics to understanding the earth's interior (geophysicists), some in investigating the composition of the earth (geochemists), still others in finding metals, oil and coal (economic geologists). Some study the rocks under the sea (marine geologists), some the history of the earth as revealed in its sedimentary rocks and fossils (stratigraphers and paleontologists), and still others study its landforms and surface materials (geomorphologists).

Entrance to the Major and Honours programs is through the Science Profile 1 of the Québec Collegial curriculum or its equivalent. Although students intending to enter these programs are urged to take geology courses available in their academic preparation for coming to McGill, such courses are not essential to entrance to a Geology program. Students at McGill may study geology as part of a Faculty program, in the Major program, or in the Honours program. The Honours program in Geological Sciences is designed to prepare the student for graduate work and for a career as a professional geologist. All programs include electives so that students can emphasize an interest in one branch of the science. Students interested in geophysics should enrol in the Honours or Major program in Solid Earth Geophysics. A program in Crystallography is also administered through the Department of Geological Sciences. Both these programs are described under their own sections in this announcement.

Geologists are employed by companies exploring for minerals and fuels, by government agencies such as the Ministère des Richesses Naturelles and the Geological Survey of Canada, in research laboratories and in universities. They work in cities and in Arctic wastelands, in the laboratory and in the office, in the deserts and in the jungles of developing countries. Canada, a country dependent on vast natural resources, requires the geologist's skills for the development of the economy. A world facing crises in the supply of energy-giving fuels and metals will depend increasingly on the geologist for guidance in finding new supplies. Mankind faces progressive deterioration of his environment by its own wastes and requires the knowledge of the earth scientist to maintain the quality of life. The environmental earth scientist should be a fully qualified specialist in a fundemental science, who is knowledgeable about the implications for society of environmental factors usually dealt with in other disciplines. As the frontiers of settlement advance into polar and desert regions, man must be able to predict the effects of his actions on natural processes.

The Honours and Major programs in Geology include the same "core" courses. Honours students must maintain a cumulative grade point average of 3.0, a cumulative percentage average of 72%, and are subject to certain restrictions in their choice of electives as outlined below.

FACULTY PROGRAMS

Faculty programs administered in this department include Geomorphology, Marine Geology, and Palaeobiology. Students interested in these interdisciplinary fields should consult the departmental office to obtain an adviser.

MAJOR IN GEOLOGICAL SCIENCES

Students must inquire at Room 238, Frank Dawson Adams Building, telephone 392-5730 to be assigned an adviser.

U1: Geology 186-210B, -211A, -233B, 234A, -242A, -203B, Chemistry 180-213B. Electives to make 30 credits. Students who have taken no general course in geology must take Geology 186-201A. Geology 186-231J (Field School I) at the close of the session.

U2. Geology 186-220A, -303A, -310D, -312B, 332A, -347B; Electives to make 30 credits. Geology 186-331J (Field School II) at the close of the session.

U3: Geology 186-423A, -444D, -445B, -441D; Electives to make 30 credits.

HONOURS IN GEOLOGICAL SCIENCES

The core courses are the same as those specified for the major program but honours students must maintain a cumulative grade point average of at least 3.0, a cumulative percentage average of at least 72%, and in addition choose between the two following alternatives: take 186-540A, Geology of North America (3 credits) plus another approved 400 or 500 level course (3 credits) OR write an undergraduate thesis (480D, 6 credits). In addition, 6 of their elective credits must be approved by departmental advisers.

Special arrangements may be made so that students in the Honours program with interests in Geochemistry, Geophysics, or other interdisciplinary areas, may substitute other science courses in this program.

Course Descriptions

The following courses are without prerequisite and could be taken by students in the Faculty of Arts: 186-201A, -233B, -234A, -242A, and -243B. Other courses assume as a prerequisite completion of the courses required in the Sciences option of the CEGEP curriculum.

NOTE:

**Complete descriptions of Courses 186-211A, -501B, -502B, -503D, -504B may be found in the section on Crystallography.*

†Complete descriptions of courses 186-220A, -443D, -481D, may be found in the section on Solid Earth Geophysics.

186-201A INTRODUCTION TO GEOLOGY. (3 credits; 3 lectures; 1 laboratory). Earth's place in the universe, moon and planets, minerals and rocks, internal structure of the earth, volcanism and earthquakes, evolution of landscapes, mountains and continental drift.
Professor Stearn

186-203B STRUCTURAL GEOLOGY I. (3 credits; 2 hours lectures, 3 hours laboratory; Prerequisite: 186-201A). Primary igneous and sedimentary structures, attitudes of planes and lines, stress and strain, fracturing of rocks, faulting, homogeneous strain, description and classification of folds, foliation and lineation, orthographic and stereographic projections. (Not open to students who have taken 186-303D).

186-210B INTRODUCTION TO MINERALOGY. (3 credits; 2 hours lecture, 3 hours laboratory; full day field trip). Mineralogy of the principal ore and rock-forming minerals.
Professor Francis

* **186-211A CRYSTALLOGRAPHY.** (3 credits).
Professor Donnay

† **186-220A ELEMENTARY EARTH PHYSICS.** (3 credits).

186-231E FIELD SCHOOL I. (3 credits; two-week field school in May). Geological mapping of selected areas, preparation of maps, reports from field notes, aerial photographs, etc.
Professor Hynes

186-233B. HISTORICAL GEOLOGY. (3 credits; 3 lectures or conference). Relative and absolute time scales; biostratigraphy, paleontological correlation; periods of earth history; evolution of oceans and continents through time; sea-floor spreading and plate tectonics; paleogeography, paleoclimates; major steps in the evolution of life.
Professor Hesse

186-234A. INTRODUCTORY PALEONTOLOGY. (3 credits; 2 lectures and 1 laboratory period). A survey of the fossil record. Uses of fossils in dating and correlating sedimentary rocks, determining ancient environments and in the study of evolution.
Professor Stearn

186-242A GEOMORPHOLOGY. (3 credits; 2 lectures and 1 laboratory period; one day field work in October). Weathering, mass wasting, erosional and depositional landforms produced by surface processes except glaciation (see GEOLOGY 431B); relationship of topography to lithology and structure.
Professor Elson

186-243B ENVIRONMENTAL GEOLOGY. (3 credits; 2 hours lectures, 1 conference). *Not available for credit for Major or Honours geology students.* Introduction to the relationship of geological factors to the human environment; optimum land and mineral use, natural hazards, ground water, engineering and urban geology.
Professors Eakins and Grice

186-303A STRUCTURAL GEOLOGY II. (3 credits; 2 hours lectures, 3 hours laboratory; Prerequisite: 186-203B, -231E). Folding mechanisms, polyphase deformation, regional structural analysis, rheology, structure of the lithosphere, tectonic features of the crust, orogenesis, theories of orogenesis. (Not open to students who have taken 186-303D).
Professor Hynes

186-310D INTRODUCTORY PETROLOGY. (6 credits; 2 lectures and 3 hours laboratory; Prerequisite: 186-210B). Integrated survey of igneous, sedimentary, and metamorphic rocks and processes leading to their formation. Emphasis in the laboratory on hand specimen description and classification, supplemented by thin sections.
Professors Hesse, Martin and Mountjoy

186-312B OPTICAL MINERALOGY. (3 credits; 6 hours laboratory and relevant in-lab. lectures; Prerequisite: 186-210B). Optical properties of nonopaque minerals. Minerals in oil immersion mounts and in this section are studied in the laboratory.
Professor Francis

186-331J FIELD SCHOOL II. (3 credits; two-week field school in May; 1 lecture per week in 2nd term). Geological mapping of selected areas, including preparation of maps, sections, and reports from field notes, aerial photographs and other data.
Professor Hesse and Staff

186-332A. ANALYSIS OF GEOLOGICAL DATA I. (3 credits; 3 lectures, computer laboratory and problems). Statistical analysis and computing methods applied to geological problems.
Professor Doig

186-344A ORE MINERALS. (3 credits; 2 lectures, 3 hours laboratory; Prerequisite: 186-210B). Microscopy of ore minerals, including identification, interpretation of textures, paragenesis and classification.
Professor Stevenson

186-347B GEOCHEMISTRY OF HIGH TEMPERATURE PROCESSES. (3 credits; 3 hours lectures; Prerequisites: 186-210B, 211A, 310D, Chemistry 213A or B). Fundamentals of phase equilibria, chemographic methods in petrology, open and closed natural systems, partition of elements among mineral phases, distribution patterns of specific elements as related to principles of crystal chemistry.
Professor Martin

186-423A IGNEOUS PETROLOGY. (3 credits; 2 hours lectures, 3 hours laboratory; Prerequisites: 186-347B, 312B). Physical properties, nucleation, crystallization, differentiation and emplacement of magmas. Integrated studies on various rock suites. (Not open to students who have taken 186-323A).
Professor Martin

186-430A GEOLOGY OF ENERGY SOURCES. (3 credits; 2 lectures and 2 hours laboratory or seminar; Corequisite: 186-444D). Properties, origin, migration and occurrence of petroleum and natural gas. Canadian oil fields. Structural and stratigraphic reservoirs and their characteristics. Oil shales, coal, peat, radioactive minerals and solar energy sources.
Professor Mountjoy

186-431B GLACIAL AND PLEISTOCENE GEOLOGY. (3 credits; 2 hours lectures and 1 laboratory or lecture period; Prerequisite: 186-242A or permission of the instructor). Introductory glaciology and glacial geology. The geological record of the Quaternary Era.
Professor Elson

186-433B ANALYSIS OF GEOLOGICAL DATA II. (3 credits; 3 hours lectures). Advanced methods of statistical analysis applied to geological problems.
Professor Doig

186-441D MINERAL DEPOSITS. (6 credits; 2 lectures and 1 laboratory period; Prerequisite: 186-347B). Nature, origin and mode of occurrence of deposits of metallic and of important non-metallic minerals; typical occurrences; geographical distribution.
Professor Maclean

† **186-443D SOLID EARTH GEOPHYSICS.** (6 credits).
Professors Saull, Telford, Doig, and Jensen

186-444D SEDIMENTARY ROCKS AND STRATIGRAPHY. (6 credits; 2 lectures and 1 laboratory period; 2 full days of field work during October; Prerequisites: 186-310D, 312B). Physical processes of sedimentation. Sedimentary structures. Modern and ancient sedimentary environments. Diagenesis and geochemistry. Sedimentary mineral deposits. Facies associations. Basin analysis. Stratigraphic correlation. (Not open to students who have taken 186-343D).
Professors Hesse and Mountjoy

186-445B METAMORPHIC PETROLOGY. (3 credits; Prerequisites: 186-303A, 347B). The origin, classification and petrological significance of metamorphic rocks, from the point of view of theory, experiment and field observations. (Not open to students who have taken 186-345B).
Professor Hynes

186-446A ENGINEERING GEOLOGY. (3 credits; 2 lectures and 2 hours laboratory or lecture period; Prerequisite: Permission of instructor). Significance of geologic factors in foundation engineering and effects of man's activities in the geologic environment. Strength of materials. Construction materials, geological problems connected with foundations, tunnels, dams, etc.
Professor Grice

186-448A APPLIED GEOCHEMISTRY. (3 credits; 2 lectures and 1 laboratory period; Prerequisite: 186-347B or permission of instructor). Principles of geochemical prospecting and pertinent aspects of the geochemical behaviour of elements are studied. A field trip and laboratory work provide practical experience.
Professor Webber

186-449B GROUNDWATER GEOLOGY. (3 credits; 2 lectures and 2 hours laboratory or lecture period; Prerequisite: Permission of instructor). Introduction to the hydrological properties of geological formations, groundwater movement, and groundwater chemistry as applied to water supply, waste disposal, and other problems.
Professor Grice

186-480D GEOLOGICAL RESEARCH PROJECT. (6 credits; Prerequisite: for Honours students in 3rd year). A written proposal outlining the studies to be undertaken must be submitted to the undergraduate Student Adviser by May 1st of the U-2 year. The proposal will be reviewed by a committee and a decision forwarded by mail. If approved the investigation will be supervised by a staff member, and the results must be presented in the form of an undergraduate thesis.
Staff

† **186-481D GEOPHYSICAL RESEARCH PROJECT.** (6 credits).
Staff

* **186-501B CRYSTAL CHEMISTRY.** (3 credits).
Professor Donnay

* **186-502B CRYSTAL-STRUCTURE ANALYSIS.** (2 credits).
Professor Donnay

* **186-503D CRYSTAL-STRUCTURE DETERMINATION.** (6 credits).
Professor Donnay

* **186-504B CRYSTAL SYMMETRY.** (2 credits).
Professor Donnay

186-534D ADVANCED INVERTEBRATE PALEONTOLOGY. (6 credits; 2 lectures and 1 seminar per week). The bias of the fossil record. Relationships of the phyla. Taxonomy, classification, paleoecology, functional morphology, and evolution of fossil invertebrates.
Professor Stearn

186-535D PHOTOGEOLOGY. (5 credits; 2 lectures; 2 hours laboratory and tutorial; Prerequisites: 186-242A, 186-303A, or permission of the instructor). Interpretation of surface deposits and bedrock

lithology and structure from vertical air photographs; elementary photogrammetry. (Not open to students who have taken 186-492D).
Professor Elson

186-540A PHANEROZOIC GEOLOGY OF NORTH AMERICA. (3 credits; 2 hours lectures, 3 hours laboratory; Prerequisite: U2 Major sequence; Corequisite: U3 Major sequence). Systematic consideration of the geology of the Cordilleran, Appalachian, and Arctic provinces of North America with emphasis on structure, stratigraphy, crustal evolution and resources.
Professor Mountjoy

186-541B PRECAMBRIAN GEOLOGY. (3 credits; 3 hours lectures; Prerequisite: U2 Major sequence; Corequisite: U3 Major sequence). A systematic outline of the geology of the Canadian Shield, with additional emphasis on its tectonic evolution and distribution of ore deposits.
Professors Doig, Hynes, MacLean, and Mountjoy

186-605D MINERAL EXPLORATION AND MINING GEOLOGY. (6 credits; 2 lectures and 2 hours laboratory; Prerequisite: Permission of instructor). Methods of searching for mineral deposits; modern exploration programs; development of mineral deposits; evaluation of mineral deposits.
Professor Eakins

395-697B MARINE GEOLOGY AND GEOCHEMISTRY. (3 credits; 3 lectures; Pre- or Corequisites: Geology 444D, 347B, 348A, or by permission). An introduction with emphasis on deep sea studies. Geophysical nature and morphology of the ocean basins. Geochemistry of pelagic deposits in relation to sea water composition. Deep sea stratigraphy and methods of correlation; the sedimentary record.
Professor d'Anglejan

The following courses are described in the *Announcement of the Faculty of Engineering;* Geological Sciences 186-221A, -232A, -440B.

GEOPHYSICS – SOLID EARTH (186)*

Solid Earth Geophysics is concerned with the gathering of quantitative information on the physical properties and processes of the solid earth, and the mathematical analysis of these data to learn the earth's state and behaviour (theoretical geophysics) or the location and nature of economically important mineral formations (applied geophysics).

Solid Earth Geophysics has connections with many disciplines, but principally with mathematics, physics, and geology, and prospective students should have aptitudes for these subjects. Some important divisions of Solid Earth Geophysics are: seismology and seismic exploration, earth tides, terrestrial heat flow, age of the earth, terrestrial magnetism and electricity, earth rotational dynamics, tectonophysics, and figure of the earth and gravity.

In recent years achievements in Solid Earth Geophysics have enormously influenced both fundamental geological concepts and mineral exploration techniques, and rapid development continues.

Both Honours and Major programs provide sound introductions to the subject at their respective levels, and allow some additional specialization through electives. These programs are the particular concern of the Solid Earth Geophysics Group, comprising geophysicists of the Departments of Geological Sciences and Mining Engineering. Inquiries should be addressed to the Department of Geological Sciences.

*The Solid Earth Geophysics programs in the Faculty of Science are administered by the Department of Geological Sciences.

MAJOR IN SOLID EARTH GEOPHYSICS

U1: Physics 198-231A,B, -232A,B, -235B; Mathematics 189-222A,B, -223A (or -245A,B), -315A,B; Geology 186-210B, -203B, -231J (Field school, at close of session); 6 credits elective.

U2: Physics 198-328A,B; Mathematics 189-319A,B; Geology 186-220A, -310D, 332A (or Computer Science 308-200A,B); Mining 306-332A, -431A, -433B; 3 credits elective.

U3: Geology 186-303A, -443D, -433B; Mining 306-334B, -435B; 9 credits elective.

HONOURS IN SOLID EARTH GEOPHYSICS

U1: Physics 198-251A, -261B, -252A, -262B, -233A (or Chemistry 180-213A,B); Mathematics 189-247A, -248A, -249B, -325B; Geology 186-210B.

U2: Physics 198-355A, -328A,B; Geology 186-310D, -220A, -203B, -231J (Field school); Mining 306-332A, -431A, -433B; 3 credits elective.

U3: Geology 186-303A, -332A (or Computer Science 308-200A,B), -433D, -481D; Mining 306-334B, -435B; 6 credits elective.

Course Descriptions

186-220A ELEMENTARY EARTH PHYSICS. (3 credits; 3 hours lectures, one of which may be replaced by a conference). Physical properties of the earth and the processes associated with its existence as inferred from astronomy, geodesy, seismology, geology, terrestrial magnetic and thermal effects, geochemistry, etc. Critical evaluation of hypotheses explaining the above.
Professor Saull

186-443D SOLID EARTH GEOPHYSICS. (6 credits; 3 hours lectures; Prerequisite: 186-220A). A general practical coverage of solid earth geophysics including gravity, seismology, heat flow, and magnetism.
Professors Saull, Doig, Telford and Jensen

186-481D GEOPHYSICAL RESEARCH PROJECT. (6 credits; for Honours Solid Earth Geophysics students in 3rd year). Under the supervision of one of the members of the Solid Earth Geophysics Group, the student will undertake an approved investigation and prepare the results in the form of a research paper.
Staff

Department of Mining and Metallurgy (Faculty of Engineering)

306-230B GEOPHYSICAL EXPLORATION 3(2-2-5). (Co-requisites: 189-261A,B, 189-263A,B or equivalents). Applications of seismic, gravity, magnetic, electrical and radioactive methods in petroleum and mineral exploration.
Professor Jensen

306-332A MATHEMATICAL APPLICATIONS IN GEOPHYSICS 3(2-3-4). (Prerequisites: 306-230B, 189-262A,B, 189-264A,B or equivalents). Applications of mathematical methods in geo-physics. Vector calculus, elementary tensors, Fourier analysis, differential equations of geo-physics, numerical methods.
Professor Crossley

306-334B POTENTIAL THEORY IN GEOPHYSICS 2(2-0-4). (Prerequisite: 306-332A and/or consultation with instructor). Applications of potential theory in gravity, magnetostatics, electrostatics, solution of Laplace's and Poisson's equations, the earth's gravity and magnetic fields. (Not open to students who have taken 306-434B).
Professor Crossley

306-431A ADVANCED EXPLORATION GEOPHYSICS I. (3 credits; 2 lectures and 3 hours laboratory; Prerequisite: Permission of the instructor). Applications of gravity and magnetic methods in petroleum and mineral exploration with particular emphasis on instruments, field methods, and interpretation of results. (Not open to students who have taken 306-331A).
Professor Telford

306-433B ADVANCED EXPLORATION GEOPHYSICS II. (3 credits; 2 lectures and 3 hours laboratory; Prerequisite: 306-331A and consultation with instructor). Applications of electrical methods in petroleum and mineral exploration with particular emphasis on instruments, field operations and interpretation of results.
Professor Telford

306-435B ADVANCED EXPLORATION GEOPHYSICS III. (3 credits; 2 lectures and 3 hours laboratory; Prerequisites: 306-331A, -433B and consultation with instructor). Seismic methods in petroleum exploration, instrumentation, field operations, processing of data and interpretation of results.
Professor Jensen

306-436B ADVANCED EXPLORATION GEOPHYSICS IV. (3 credits; 2 lectures and 3 hours laboratory; Prerequisite: 306-331A, -433B and consultation with instructor). Seismic methods in mineral exploration and engineering geophysics. Radioactivity method, instrumentation and interpretation of results. Well logging techniques with particular emphasis on instrumentation; interpretation of petroleum well logs; applications in mineral exploration areas.
Professor Telford

IMMUNOLOGY INTERDEPARTMENTAL HONOURS PROGRAM

The Honours program in Immunology is offered by the three Departments: Biochemistry, Microbiology and Immunology and Physiology. The program will be administered by the Department of Microbiology and Immunology and coordinated by Dr. Julius Gordon. Students interested in the program should contact Dr. Gordon at the Department of Experimental Surgery, Donner Building, Telephone 392-4859.

The program is a rigid one which will prepare the student for graduate work in immunology in any of the three participating departments. Admission requirements are: U-1, GPA 3.00 or equivalent; U-2, 3.10 and U-3, 3.20.

For graduation in the honours program, the student must complete a minimum of 90 credits, and achieve a CGPA of not less than 3.2. In addition, the five immunology courses (528-314B, 507-503A, 528-527B, 552-518D, 552-513B) must be passed with a grade not less than B.

The course requirements are as follows:

U1: Biology 177-201D; Chemistry 180-213A, 180-223B; Mathematics 189-222A,B; Physiology 552-211D; Anatomy 504-261A.

NOTE: Students who have not taken Chemistry 180-212A,B, 180-222A,B and Mathematics 189-221A,B or equivalent in CEGEP should complete these courses. Others may take Chemistry 180-257D, or elective courses to complete 30 credits.

U2: Biology 177-301A, 177-302B, 177-310B; Biochemistry 507-311A, 507-312B; Chemistry 180-313A; Microbiology 528-311A, 528-314B; and 6 credits from the following: Biochemistry 507-404B; Chemistry 180-302A; Mathematics 189-315A,B; Physiology 552-312D or 552-311D.

U3: Biochemistry 507-450A, 507-454A, 507-503A; Microbiology 528-527B; Physiology 552-518D, 552-513B; and 6 credits from the

following: Biochemistry 507-456B or Physiology 552-411A; Biochemistry 507-404B; Physiology 552-312D, 552-313D; Chemistry 180-302A; Mathematics 189-315A; Microbiology 528-424A, 528-501D; and 3 credits of elective courses.

MARINE SCIENCES (395)

395-537B ADVANCED INVERTEBRATE ZOOLOGY. (3 credits; Prerequisite: 177-348D). Descriptions of selected marine invertebrate taxa. Functional morphology, ecology and evolution. Feeding mechanisms; reproduction patterns; interactions with other marine organisms; laboratory techniques.

395-545A WATER POLLUTION: BIOLOGICAL ASPECTS. (3 credits). Aspects of freshwater and saltwater uses, with emphasis on marine environments, critical definitions of water quality, means of assessing water quality, the role and importance of biological responses in the identification and evaluation of water treatment techniques, the biological impact of pollution on coastal areas, estuaries, rivers and lakes. Marine pollution is also discussed from the global point of view as a worldwide phenomenon.

Other courses given by staff members of the Marine Sciences Centre are listed in this Announcement as follows: Biology 177-442D; Physics 198-309A, 198-319B.

MATHEMATICS (189)

Professors – E. ROSENTHALL *(Chairman)*; M. BARR; W. BROWN; J. CHOKSI; I. CONNELL; K. GOWRISANKARAN; C. HERZ; H. KAUFMAN; J. LAMBEK; W. MOSER; H. RUBEN; V. SESHADRI; C. SOLIN; J. TAYLOR.

Professors (Visiting 1976-77) – T. CACOULLOS.

Associate Professors – S. MELAMED *(Assistant Chairman)*; M BUNGE; C. COSTLEY; S. DRURY; A. EVANS; D. GILDENHUYS; M. HERSCHORN; W. JONSSON; E. KOUNIAS; J. LABUTE; B. LAWRUK; M. MAKKAI; S. MASLOWE; A. MATHAI; T. OKUBO; B. RATTRAY; R. RIGELHOF; C. ROTH; K. RUSSELL; N. SANCHO; G. SCHMIDT; G. STYAN; D. SUSSMAN; K. TAM; J. TURNER; R. VERMES; S. ZLOBEC.

Associate Professors (Visiting 1976-77) – F. ECKSTEIN; E. HADDON; V. HARNIK; J. SHUSTER;

Assistant Professors – W. ANDERSON; W. LANGFORD; T. PAPAIOANNOU; E. ROWLINSON; S. SHNIDER; D. WOLFSON.

Faculty Lecturer – D. KINGSBURY

Assistant Professors (Visiting 1976-77) – A. STANIFORTH.

Research Visitors 1976-77 – H. HUNG; G. KELLY; G. KLINCSEK; P. KOOSIS; P. SCOTT; H. SWIATAK; A. de la TORRE; R. WOOD.

Special Lecturers – T. BELL.

Lecturers – A. BURNS; W. BUTLER; G. FLEISCHER; R. GANONG; C. KAN; P. KOOSIS; K. MacKENZIE; C. POON; S. PUNHANI; H. SCHWERDTFEGER; P. SCOTT; A. de la TORRE; M. UPHAM; R. WOOD.

Burnside Hall, Room 1005,
805 Sherbrooke St. West,
Montreal, PQ, H3A 2K6
Telephone: 392-5369.

Early mathematics consisted for the most part of empirical rules for performing operations on concrete objects by means of numerical processes. From this, mathematics has evolved to a discipline which is mainly characterized by its method of proof, its concern for a progressive broadening of its concepts, and by the search for mathematical entities and operations that represent aspects of reality. It is a subject which is pursued by many for its own sake, and regarded as part of the mainstream of human culture. Mathematics pervades modern society with an impact which, already immense, is rapidly growing.

The two principal divisions of mathematics are pure mathematics and applied mathematics. The pure mathematician is interested in abstract mathematical structures and in mathematics as an intellectual enterprise. He may even view his subject as an art. He is not primarily concerned with its utilitarian aspects or with the current needs of science and technology, although many problems in pure mathematics have developed from the sciences.

The applied mathematician is more interested in how he can use his mathematics to study some aspects of the world around him. He is engaged in the creation, study and application of advanced mathematical methods relevant to scientific problems. Statistical science and methodology today is concerned with phenomena in which there is a background of uncertainty arising from inherent variability, and the investigator is obliged to arrive at decisions from limited contingent data generated by such phenomena. A key tool in statistics is the calculus of probability.

Some of the fields in which pure mathematicians work are algebra analysis, geometry, topology, number theory and foundations. Applied Mathematics which once referred to the application of mathematics to such disciplines as mechanics and fluid dynamics, has currently assumed a much broader meaning and embraces such diverse fields as communication theory, theory of optimization, theory of games and numerical analysis.

Mathematics offers many vocational possibilities. Such fields as teaching, computing, applied statistics and actuarial science offer opportunities for B.Sc. graduates. Opportunities to do original research in pure and applied mathematics are available in universities and similar institutions. Employment is to be found in financially or technologically oriented business firms.

The Department of Mathematics through its various programs attempts to provide courses to suit

the diverse interests and attitudes within mathematics.

The Honours Program in Mathematics demands of the student a certain talent for abstraction in addition to a high level of competence in the use of mathematical tools. This program is intended for students who plan to work in an area where mathematical innovations may be needed. It is almost essential for students contemplating a career in mathematical research.

The Major Program involves the same subjects as the Honours Program but is less demanding in terms of abstraction. It is designed primarily for students who will need mathematical tools in their work but whose creative activity will involve applications of mathematics to other areas, but not to mathematics itself. Within the framework of the mathematics major, various combinations of courses are suggested to meet the needs of different students. These include course suggestions for secondary school teachers, careers in management, and for careers in industry, government or actuarial sciences.

It is possible for a Major student to include a number of Honours courses in his/her program. This will be an advantage for those students who plan to use their mathematics in graduate studies.

Students interested in a less intensive mathematics program linked to other disciplines are advised to consider the available Faculty Programs.

In planning their programs students are advised to seriously consider developing some depth in another discipline – preferably one for which mathematics has some relevance and use. Mathematics has always been closely linked to areas such as physics and engineering but has recently come to play an increasingly important role in fields such as biology, linguistics, management and psychology.

FACULTY PROGRAMS

Programs linking mathematics and other disciplines are available. With careful selection of courses in U1, it is possible to transfer to a Major program in Mathematics in U2. Except where otherwise noted these faculty programs lead to a B.Sc. degree. See details on page 143.

MAJOR PROGRAM

Programs of study for students entering U1 in 1977-78.

The compulsory courses are 189-120A,B, -121A,B, -221A,B, -222A,B, -245A,B.

Advisers will approve a program of 54 credits including 48 credits in Mathematics (excluding 120A,B, 121A,B, 221A,B) of which at least 36 credits will be selected from the following: 189-217A, -218B, -242A, -243B, -246A,B, -314A,B, -315A,B, -316B, -317A,B, -318A, -319B, -323A,B, -324A,B, -327B, -328B, -333A, -346B, -348A, -349B, -360A, -396D, -407B, -414A,B, -415A, -416A, -417A, -419B, -423A, -424B, -425A, -427B, -447B. The remaining 6 credits to be selected from Mathematics or a related discipline in consultation with the Adviser.

Guidelines for Selection of Courses in the Major Program

a) Students are advised to include the following courses in their program: 189-246A,B, -314A,B, -315A,B, -317A,B, -323A,B, -324A,B, 308-200A,B.

b) Students planning to pursue graduate studies are advised to include 189-242A, -243B and -333A in their program, and to consider substituting one or more Honours courses for the corresponding courses in the Major program.

c) Students considering a career in teaching are advised to include in their program the following courses: 189-217A, -218B, -242A, -318A, -328B, 338B, 348B, -349B.

d) Students interested in probability and statistics are advised to also include in their program the following courses: 189-242A, -407B, -414B, -424B, -425A, -447B, as well as a course in Fortran such as 308-200A,B. With the instructor's permission the graduate courses 189-682A, 308-690A, -691B might also be included.

e) Students interested in applied mathematics are advised to include in their program some or all of the following courses: 189-218B, -242A, -316B, -319B, -323A,B, -324A,B, -327B, -407B, -418B, -415A, -416A, -417A, -419B, -427B, 308-200A,B.

f) Students interested in computer science are advised to register in the following courses: 189-318A, -327B, 328B, -417A, -427B, 308-200A,B, 300A,B; they should choose additional courses from 189-319B, -415A, -416A, -419B, -423A, -424B, -425A, -447B, 308-640D*, -610A*, -690A*, -691B* or -698A* and -699B*

g) Students interested in careers in actuarial work in industry or government are advised to select courses from the following list: 189-319B, -327B, -328B, -329D, -369D, -415A, -416A, -417A, -419B, -423A, -424B, -425A, -447B, 308-200A,B.

The student's attention is called to the fact that a B.Com. degree with a Major in Mathematics is available from the Faculty of Management. In addition the Faculty of Music offers the B.Mus. degree with Honours in Theory with Mathematics Option.

*These courses require special permission from the instructors.

HONOURS PROGRAM

The minimum requirement for entry into the Honours Program is that the student has completed with high standing the following courses (or their equivalents); 189-120A,B, -121A,B, -221A,B.

Requirements for Honours in Mathematics

For an Honours Degree in Mathematics the student must obtain 90 course credits; at least 60 of these should correspond to Honours courses (or their equivalent), not less than 45 to Honours courses in Mathematics. In addition to the latter, the student may count towards the 60 credit Honours requirement:

i) half of the courses taken from the Major Program in Mathematics (including Computer Science courses) for which no equivalent Honours course exists;

ii) (with the approval of the Department of Mathematics) certain courses in other departments which are at an Honours level, and are closely linked to Mathematics,

iii (with the approval of the Department of Mathematics) half the courses taken in other departments, which while not necessarily explicitly mathematical in nature, are at an Honours level and broaden the student's scientific training. Students who transfer to Honours in Mathematics from other programs will have credits for previous courses assigned, as appropriate, by the Department.

The following courses are compulsory: 189-250A,B, -251A,B, -254A,B, -255A,B, -371D, -372D.

To remain in the Honours Program, and to be awarded the Honours Degree, the student must maintain a 2.8 Grade Point Average in the approved Mathematics courses of the Honours program.

Guidelines for Selection of Courses in the Honours Program

a) The compulsory courses may be spread over the three years of study.

b) Students taking 189-250A,B, -251A,B and 189-254A,B, -255A,B simultaneously are advised to register also for 189-258A, -259B.

c) Students are advised to include in their program the following courses: 289-356A, -357B, -374D, -380D.

d) Students interested in Statistics should register for 189-556D and -587D in addition to -356A and -357B.

e) Students in Applied Mathematics should register for some or all of the courses 189-574A, -575B, -578A and -579B, -585A, -586B in addition to -374D. They are also advised to select courses in areas to which they can apply their mathematics.

Course Descriptions

189-112A,B FUNDAMENTALS OF MATHEMATICS. (3 credits). Sets, the real number system, inequalities, graphs, relations and functions, exponential and logarithmic functions, trigonometric functions and their use, mathematica induction, permutations and combinations, binomial theorem.
Professor Rowlinson

189-120A,B CALCULUS I. (3 credits). Analytic geometry of straight line and circle. Limits, continuity, derivative. Differentiation of elementary functiors. Applications. (Not open to students who have taken 189-E14, -E16, -201).
Staff

189-121A,B CALCULUS II. (3 credits; Prerequisite: 189-120A,B). The definite integral. Techniques of antidifferentiation. Applications. (Not open to studerts who have taken 189-E15, -E17, -202).
Staff

189-203A BASIC PRINCIPLES AND METHODOLOGY OF STATISTICS I. (3 credits). Typical examples of statistical data and the use of graphical means to summarize the data. Some basic distributions arising in the natural and behavioural sciences. The logical meaning of a test of significance with applications to single observations, sums, differences, and means. The analysis of categorical and frequency data. The interrelation of two variables. The use of correlation coefficients as exploratory tools. (This course is intended for students in all disciplines and is not open to students in Major Mathematics. Not open to students who have taken or are taking 189-324. No calculus prerequisites.)

Note: Students who successfully complete this course need not take for credit certain other introductory statistics courses offered elsewhere in the university. A list of these courses is available in the Mathematics Department.
Professor Wolfson

189-204B BASIC PRINCIPLES AND METHODOLOGY OF STATISTICS II. (3 credits; Prerequisite: 189-203A or equivalent). The concept of degrees of freedom and the analysis of variability. Planning of experiments. Some useful experimental designs. Polynomial and multiple regressions. Further use of correlation coefficients as exploratory tools. Basic principles of estimation. General statistical procedures requiring few assumptions about the probability model. (This course is intended for students in all disciplines and is not open to students in Major Mathematics. Not open to students who have taken or are taking 189-324. No calculus prerequisites.)

Note: Students who successfully complete this course need not take for credit certain other introductory statistics courses offered elsewhere in the university. A list of these courses is available in the Mathematics Department.
Professor Wolfson

189-205A FINITE MATHEMATICS I. (3 credits). *Not given in 1977-78.* An introduction to probability, vectors and matrices with applications to the social sciences. (Not open to students who have taken or are taking 189-231, -323).

189-206B FINITE MATHEMATICS II. (3 credits; Prerequisite: 189-205A). *Not given in 1977-78.* Topics in probability and statistics, linear programming and the theory of games. (Not open to students who have taken or are taking 189-232, -323.)

189-217A ABSTRACT ALGEBRA I. (3 credits). Sets, mappings, relations and operations, rings and their properties, integral domains, properties of the integers, fields, rational and real numbers, complex numbers.
Professor Rowlinson

189-218B ABSTRACT ALGEBRA II. (3 credits; Prerequisite: 189-217A or equivalent). Groups and their elementary properties, permutation groups, cyclic groups, normal subgroups, cosets and quotient groups. Properties of polynomials, facturization, roots.
Professor Rowlinson

189-221A,B ANALYTICAL GEOMETRY AND VECTORS. (3 credits; Prerequisite: 189-121A,B). Vectors, lines and planes, coordinate systems in three dimensions, inner products, quadric surfaces, vector-valued functions. Applications. (Not open to students who have taken 189-E21).
Professor Solin and Staff

189-222A,B CALCULUS III. (3 credits; Prerequisite: 189-221A,B). Infinite series. Length, curvature; partial differentiation, multiple integration and applications. (Not open to students who have taken 189-E22).
Professor Solin and Staff

189-223A LINEAR ALGEBRA. (3 credits). Algebra of matrices and determinants, systems of linear equations. Vector spaces, linear operators and their matrix representations, unitary vector spaces, othogonality. Eigenvalues and eigenvectors, diagonalization of Hermitian matrices. Applications (This course covers most of the topics in 189-245, -245. It is not open to students in Major Mathematics nor to students who have taken or are taking 189-224, -245, -247).
Professor Seshadri

189-224A,B APPLIED MATRIX ALGEBRA. (3 credits). Matrix addition and multiplication. Partitioning into blocks. Trace and determinant. Simultaneous linear equations. Rank and inverse. Positive definite and semi-definite matrices; quadratic forms. Characteristic roots and vectors of symmetric matrices, and reduction to diagonal form. Emphasis towards applications in business and management. (Intended for students interested in applications of matrix algebra to Management, Social Sciences, and similar fields of endeavour. This course is not open to students in Major Mathematics nor to students who have taken or are taking 189-223, -245, -247).
Professor Styan and Staff

189-231A,B MATHEMATICS FOR BIOLOGISTS. (3 credits; Prerequisite: 189-121A,B). Introductory probability theory, vectors and matrices, differential and difference equations with applications to the biological sciences. (This course is not open to students in Major Mathematics nor to students who have taken or are taking 189-205, -323).
Professor Turner and Staff

189-232A,B MATHEMATICAL METHODS IN BIOLOGY AND THE BEHAVIOURAL SCIENCES. (3 credits; Prerequisite: 189-231A,B or equivalent). Topics in probability and statistics, linear programming, and game theory with applications to the behavioural and biological sciences. (This course is not open to students in Major Mathematics nor to students who have taken or are taking 189-206, -323).
Professor Turner

189-233A MATHEMATICS FOR ECONOMISTS I. (3 credits). Elements of Elementary Calculus. Functions of several variables. Partial Derivatives. Jacobians. Maxima and Minima. Lagrange Multipliers. Hessians. Infinite Series. Economic Applications. (This course is intended for students in Economics; others may be permitted to enrol with special permission; not open to students in programs in Mathematics; not available for credit to students in the Faculty of Science).

189-234B MATHEMATICS FOR ECONOMISTS II. (3 credits). Matrices. Transpose. Trace of a matrix. Inverse. Determinants. Orthogonal matrices. Indempotency. Non-negative matrices. Inequalities. Linear dependence and independence. Rank. Linear transformations. Characteristic roots and vectors. Quadratic forms. Generalized inverses. Systems of linear equations. Economic applications. (This course is intended for students in Economics; others may be permitted to enrol with special permission; not open to students in programs in Mathematics; not available for credit to students in the Faculty of Science).

189-242A REAL ANALYSIS I. (3 credits). Real numbers. Limits and continuity, sequences. Properties of continuous functions. Introduction to metric spaces. (Not open to students who have taken 189-252).
Professor Herschorn

189-243B REAL ANALYSIS II. (3 credits; Prerequisite: 189-242A). Continuity, uniform continuity and differentiability on the real line; fundamental theorems. Taylor's theorem and applications. Infinite series.
Professor Herschorn

189-245A,B LINEAR ALGEBRA I. (3 credits). Simultaneous linear equations and inequalities. Matrices. Linear dependence, rank and inverse. Trace and determinant. Partitioning into blocks.

Quadratic forms, positive definite and semidefinite matrices. Othogonal matrices. Characteristic roots and vectors, similarity of matrices. (Not open to students who have taken or are taking 189-223, -224, -247).
Professor Rattray and Staff

189-246A,B LINEAR ALGEBRA II. (3 credits; Prerequisite: 189-245A,B). Abstract vector spaces over the real and complex numbers. Linear operations, matrix representations. Vector and operator norms. Eigenvectors and eigenvalues. Linear, quadratic and Hermitian forms. Inner product spaces, unitary and orthoganal transformations, the adjoint of an operator, self-adjoint and normal operators. Applications. (Not open to students who have taken or are taking 189-247).
Professor Rattray and Staff

189-247A LINEAR ALGEBRA. (3 credits). Matrix algebra; elementary operations; rank and inverses; determinants and square matrices; numerical solutions of simultaneous linear equations; eigenvalues and eigenvectors; unitary transformations; similarity transformations; reduction to diagonal form, defective matrices; quadratic forms and the variational principle; norms and error estimates; abstract vector spaces and linear equations; isomorphisms; coordinates, change of basis and linear transformations. Inner product spaces, orthogonality. (This course is intended for Honours Physics students and others suitably qualified. Not open to students who have taken or are taking 189-246).
Professor Costley

189-248A ADVANCED CALCULUS I. (3 credits; Prerequisite: 189-221A,B). Partial derivatives; implicit functions; Jacobians; maxima and minima; Lagrange multipliers. Scalar and vector fields; orthogonal curvilinear coordinates. Improper integrals; multiple integrals; arc length, volume and surface area. Line integrals; Green's theorem; the divergence theorem. Stokes' theorem; irrotational and solenoidal fields; applications. (This course is intended for Honours Physics students and others suitably qualified. Not open to students who have taken or are taking 189-314).
Professor Tam

189-249B ADVANCED CALCULUS II. (3 credits; Prerequisite: 189-248A). Functions of a complex variable; Cauchy-Riemann equations; Cauchy's theorem and consequences. Taylor and Laurent expansions. Residue calculus; evaluation of real integrals; integral representation of special functions; the complex inversion integral. Conformal mapping; Schwarz-Christoffel transformation; Poisson's integral formulas; applications (This course is intended for Honours Physics students and others suitable qualified. Not open to students who have taken or are taking 189-316).
Professor Tam

189-250A,B ALGEBRA I (Part I). (4 credits). Basic linear algebra; fundamental concepts of algebra; the rational, real and complex fields. (Not open to students who have taken 189-271D).
Professor Jonsson

189-251A,B ALGEBRA I (Part II). (4 credits; Prerequisite: 189-250A,B). Further linear algebra with applications to geometry; further general algebra. (Not open to students who have taken 189-271D).
Professor Jonsson

189-254A,B ANALYSIS I (Part I). (4 credits). The real number system, metric properties on R^n, convergence. (Not open to students who have taken 189-272D).
Professor Drury

189-255A,B ANALYSIS I (Part II). (4 credits; Prerequisite: 189-254A,B). Continuity, series, Riemann integration, multivariable differential calculus. (Not open to students who have taken 189-272D).
Professor Drury

189-258A PROBLEM SEMINAR (Part I). (2 credits; 2 hours conference). The course complements Algebra I and Analysis I. Emphasis is on solving Calculus and related problems. Some problems using Linear Algebra may also be considered. (Not open to students who have taken 189-273D).
Professor Tam

189-259B PROBLEM SEMINAR (Part II). (2 credits; 2 hours conference). Course description as for 189-258A. (Not open to students who have taken 189-273D).
Professor Tam

189-314A,B ADVANCED CALCULUS. (3 credits; Prerequisite: 189-222A,B). Constrained maxima and minima. Jacobians. Multiple integration. Line and surface integrals. Theorems of Green, Stokes and Gauss. Introduction to elliptic integrals. (Not open to students who have taken or are taking 189-248).

189-315A,B ORDINARY DIFFERENTIAL EQUATIONS I. (3 credits; Prerequisite: 189-222A,B). First order ordinary differential equations. Linear equations with constant coefficients, Laplace transform. Series solutions. (Not open to students who have taken or are taking 189-325).
Professor Lawruk

189-316B FUNCTIONS OF A COMPLEX VARIABLE. (3 credits; Prerequisite: 189-314A,B). Algebra of complex numbers. Cauchy-Riemann equations. Complex integral. Cauchy's theorem. Taylor and Laurent series. Residue theory and applications. (Not open to students who have taken or are taking 189-249).
Professor Rigelhof

189-317A,B INTRODUCTION TO NUMERICAL ANALYSIS. (3 credits; Prerequisites: 189-222A,B, 308-200A,B or equivalent). Error analysis. Numerical solutions of equations by iteration. Interpolation. Numerical integration. Introduction to numerical

solutions of differential equations. Programming assumed. Some lab work neoessary.
Professor Evans

189-318A MATHEMATICAL LOGIC. (3 credits). Propositional calculus, truth-tables, switching circuits, natural deduction, first order predicate calculus, axiomatic theories, set theory.
Professors Lambek and Rattray

189-319B DIFFERENTIAL EQUATIONS. (3 credits; Corequisite 1976-77 189-314A,B; Prerequisites: 189-245A,B, -314A,B, -315A,B). Partial differential equations of mathematical physics. Boundary value problems, classification of partial differential equations, method of characteristics. Fourier expansions. Introduction to Sturm-Liouville theory.

189-323A,B INTRODUCTION TO PROBABILITY THEORY AND RANDOM VARIABLES. (3 credits; Prerequisites: 189-121A,B, or equivalent). Sample space of an experiment, events. Conditional probability. Statistical independence. Bayes' theorem, with applications. Random variables, univariate distribution functions. The binominal, Poisson, hypergeometric, uniform, exponential and normal distributions. Mathematical expectation. The weak law of large numbers. The Poisson process, with applications. The central limit theorem. (This course is intended for students in science, engineering and related disciplines, who have had one year of calculus. Not open to students who have taken or are taking 189-204, -232, -356).

189-324A,B INTRODUCTION TO STATISTICS. (3 credits; Prerequisite: 189-323A,B or equivalent). The notion of a random sample. Sampling distributions, with particular reference to those related to the normal: Chi-square, F and t. Point estimation. Hypothesis testing, the notion of power function. Likelihood-ratio tests. Contingency tables, goodness-of-fit and homogeneity tests. Regression and the method of least squares, analysis of variance, with applications. Some nonparametric procedures. (Not open to students who have taken or are taking 189-357).

189-325B ORDINARY DIFFERENTIAL EQUATIONS. (3 credits; Prerequisite: 189-222A,B). First order differential equations; second order linear equations; series solution of second order equations; Fourier series; self-adjoint boundary value problems; Legendre polynominals and Bessel functions. (This course is intended for Honours Physics students and others suitably qualified. Not open to students who have taken or are taking 189-315).
Professor Maslowe

189-327B MATRIX NUMERICAL ANALYSIS. (3 credits; Prerequisites: 189-246A,B. Corequisite 317B). Numerical methods for solving systems of linear algebraic equations, matrix inversion and eigenvalue problems. Introduction to differential boundary value problems.
Professor Zlobec

189-328B COMPUTABILITY AND MATHEMATICAL LINGUISTICS. (3 credits). Calculability on an infinite abacus is compared with recursive functions and Turing machines. Categorial, context-free, generative and transformational grammars are studied for formal and natural languages, with some emphasis on English and French morphology. Machines for generating and recognizing sentences are discussed.
Professor Lambek

189-329D THEORY OF INTEREST AND LIFE INSURANCE. (6 credits; Prerequisite: 189-121A,B). Simple and compound interest, discount, annuities certain, sinking funds, bonds, mortgage amoritization, depreciation, calculation of life annuities, premiums and reserves on life insurance policies.
Professors Solin and Brown

189-333A ANALYSIS. (3 credits; Prerequisite: 189-243B). *Not given in 1977-78.* Riemann-Stielties integral; sequences and series of functions; metric spaces; connectedness; completeness and compactness; Weierstrass approximation theorem; Fourier series.

189-338B TOPICS IN HISTORY AND PHILOSOPHY OF MATHEMATICS. (3 credits). Egyptian, Babylonian, Greek, Indian and Arab contributions to mathematics are studied together with some modern developments they give rise to, for example, the problem of trisecting the angle. European mathematics from the Renaissance to the 18th century is discussed in some detail. From 19th and 20th century mathematics only certain topics are selected, with emphasis on the development of fundamental concepts and the discussion of problems which can be carried out at an elementary level.
Professor Lambek

189-346B NUMBER THEORY. (3 credits). Divisibility. Congruences. Quadratic reciprocity. Diophantine equations. Arithmetical functions.
Professor Rosenthall

189-348A TOPICS IN GEOMETRY I. (3 credits; Prerequisite: Previous course in Mathematics). Selected topics – the particular selection may vary from year to year. (In 1976 the topics studied included isometries and similarities in two and three-dimensional Euclidean space, symmetry groups of lattices and Escher patterns and non-Euclidean geometry.)
Professors Brown and Moser

189-349B TOPICS IN GEOMETRY II. (3 credits; Prerequisite: Previous course in Mathematics). Convexity: isoperimetric and combinatorial-geometric problems. Rubber-sheet geometry: classification of surfaces, path problems, map-colour problems.
Professors Brown and Moser

189-356A INTRODUCTION TO PROBABILITY. (3 credits). General foundations and applications. Combinatorial probability. The binomial, Poisson,

hypergeometric distributions. Simple random walks. Continuous distribution functions. Sampling distribution, order statistics, laws of large numbers. The uniform, exponential, normal distributions. Introduction to Markov processes.

189-357B INTRODUCTION TO STATISTICS. (3 credits; Prerequisite: 189-356A or equivalent). Data analysis. Estimation and hypothesis testing. Introduction to Bayesian and decision theory methods. Power of tests. Likelihood ratio criterion. The chi-square goodness of fit test. Non-parametric tests. Introduction to regression analysis, and analysis of variance.

189-360A GROUPS AND THEIR REPRESENTATIONS. (3 credits). *This course is given in alternate years. Given in 1977-78; not given in 1978-79.* Elements of group theory. Symmetry groups. Unitary vector spaces, linear operators and their matrix representations, invariance of functions and operators, classification of eigenfunctions. Reducibility, Schur's lemmas, general orthogonality relations, character tables. Kronecker product and adjoint representations, Hermitian invariants, Clebsch-Gordon series. Characters of the symmetric group.
Professor Roth

189-369D THEORY OF INTEREST AND LIFE CONTINGENCIES. (6 credits; Prerequisite: 189-222A,B). Theory of interest and of single and multiple life functions.
Mr. Bell

189-371D ALGEBRA II. (6 credits; Prerequisite: 189-250A,B, -251A,B). Commutative algebra (modules over a principal ideal domain, extensions of the rationals, unique factorization domains); field theory to include the fundamental theorem of Galois theory; group theory continued up to the Sylow theorems; the Jordan-Hoelder theorem.
Professor Bunge

189-372D ANALYSIS II. (8 credits; Prerequisite: 189-254A,B, -255A,B). Metric spaces; Lebesgue-Stieltjes integration; series expansions of functions (including 1_2 theory); power series; analytic functions; contour integration; Cauchy's theorem and a wide variety of consequences, normal families.
Professor Herz

189-373D PROBLEM SEMINAR. (4 credits; 2 hours conference). Course intended to develop problem solving ability.

189-374D ORDINARY AND PARTIAL DIFFERENTIAL EQUATIONS. (6 credits; Prerequisites: 189-245A,B, -254A,B, -255A,B; Corequisite: 189-372D). Existence and uniqueness theorems, systems of equations; Sturm-Liouville equations, power series solutions and special functions; homogeneous equations, phase space. First and second order partial differential equations, the Laplace wave and heat equation; Fourier transforms, distributions, Hilbert space methods.
Professor Langford

189-377B NUMBER THEORY. (3 credits; Prerequisites or Corequisites: 189-254A,B, -255A,B). *This course is given in alternate years. Not given in 1977-78.* (Students not enrolled in the Mathematics Honours Programme must obtain permission of the instructor or an Honours Adviser). An elementary course in number theory directed to honours students in mathematics. The particular emphasis may vary from year to year. In 1976-77 the emphasis was on an introduction to analytic number theory.

189-380D GEOMETRY AND TOPOLOGY. (6 credits; Prerequisites: 189-250A,B, -251A,B, -254A,B, -255A,B). *Not given in 1977-78.* A study of curves and surfaces with a view to motivating basic notions of differential geometry, algebraic topology and differential topology.

189-407B DYNAMIC PROGRAMMING. (3 credits; Prerequisites: 189-245A,B, -314A,B). Optimum allocation of resources. Dynamic programming versus direct enumeration. Optimum equipment replacement models. Investment analysis, selling and purchasing. Optimum Markovian decision processes. The Travelling Salesman problem.
Professor Sancho

189-414B MATHEMATICAL MODELS IN APPLICATIONS. (3 credits; Prerequisites: 189-245A,B, -323A,B, (or -231A,B, -232A,B), -315A,B). Models and theories from Physics, economics, biology and medicine. Derivation of equations of mathematical physics, input-output models in economics, competition models in economics and ecology, epidemic models, provision of health care models.
Professor Turner

189-415A ORDINARY DIFFERENTIAL EQUATIONS II. (3 credits; Prerequisites: 189-246A,B, -315A,B, 189-242A or -314A,B.) Systems of linear ordinary differential equations, stability of linear systems, stability of periodic solutions, limit cycles, autonomous systems, applications.
Professor Tam

189-416A COMBINATORICS. (3 credits; Prerequisites: i) 189-222A,B, ii) one of 189-217A, -218B, -223A, -231A,B, -245A,B or equivalents). An introductory half-course in combinatorics intended for Mathematics Major students and others who lack the time or the prerequisites to enrol in 189-461D (Combinatorial Mathematics). The lectures of the two courses may coincide (for the First term); however, students of 189-416A will be examined at the end of the First term, while students in 189-461D will continue on in the Second term and be exposed to current research papers. (Honours credit is available only through registration in 189-461D.)
Professor Moser

189-417A MATHEMATICAL PROGRAMMING. (3 credits; Prerequisites: 189-246A,B, -314A,B or equivalent). Linear programming; simplex method; duality theory. Nonlinear programming; Lagrange-Kuhn-Tucker optimality conditions. Numerical

methods for solving unconstrained and constrained maximization problems. Applications to realistic problems. Computer programming knowledge is assumed.
Professor Zlobec

189-419B VARIATIONAL METHODS OF APPLIED MATHEMATICS. (3 credits; Prerequisites: 189-245A,B, -314A,B, -319B). *This course is given in alternate years. Given in 1977-78; not given in 1978-79.* Functionals, Euler-Lagrange necessary condition for an extremum, extrema with constraints, minimum characterization of the eigenvalue-eigenfunction problem, applications selected from optimization, control theory and natural philosophy.
Professor Langford

189-423A INTRODUCTION TO REGRESSION AND ANALYSIS OF VARIANCE. (3 credits; Prerequisites: 189-324A,B and -245A,B or equivalent). Simple and multiple linear regression. Least squares estimators and their properties. Tests of hypotheses; the F-test. One- and two-way analysis of variance. The general linear model. Prediction and confidence intervals. Orthogonal and nonorthogonal designs. Weighted least squares.
Professor Anderson

189-424B INTRODUCTION TO NONPARAMETRIC STATISTICS. (3 credits; Prerequisite: 189-324A,B). Tests of goodness of fit: Pearson's chi-square test for multinomial populations. Contingency tables. Sample distribution function. Nonparametric procedures including the Cramer-von Mises and Kolmogorov-Smirnow tests. Order statistics. Tests for normality.
Professor Seshadri

189-425A SAMPLING SURVEY THEORY AND APPLICATIONS. (3 credits; Prerequisites: 189-323A,B, -324A,B or equivalent). Main types of sampling and their properties: simple random, stratified, systematic, cluster and multistage sampling; balanced and quota sampling; sampling with unequal probabilities; ratio and regression techniques. Non sampling errors. Use of adjustments based on supplementary information.
Professor Wolfson

189-427B NUMERICAL SOLUTIONS OF DIFFERENTIAL EQUATIONS. (3 credits; Prerequisites: 189-315A,B - 317A or equivalent). Runge-Kutta and predictor-corrector methods applied to first and higher order systems. Error analysis, step size and stability. Some boundary value problems. Introduction to partial differential equations.
Professor Evans

189-447B ELEMENTARY STOCHASTIC PROCESSES. (3 credits; Prerequisites: 189-245A,B, -323A,B). Random walk on the integers and gambler's ruin problem; the Galton-Watson branching process; Markov chains and their applications in the physical and social sciences; birth and death processes and their applications to biological growth problems.

189-461D COMBINATORIAL MATHEMATICS. (6 credits; Prerequisites: 189-242A or equivalent and -246A,B or equivalent). *This course is given in alternate years. Given in 1977-78; not given in 1978-79.* After a study of fundamentals (Partitions and compositions, principle of inclusion and exclusion, etc.) students will be introduced to combinatorial aspects of several fields (graph theory, designs, set theory, group theory, geometry, number theory, etc.) from classical up to and including current research.

189-489A MATHEMATICAL LOGIC. (3 credits). Propositional calculus and first order predicate calculus; completeness, compactness, and normal form theorems; theorems of Herband, Craig, Beth, and Gentzen.
Professor Makkai

189-490B MATHEMATICAL LOGIC. (3 credits). Alternately either (1) an introduction to recursion theory, undecidability theorems of Godel and Church, recursively enumerable sets, degrees; or (2) an introduction to model theory, ultraproducts, saturated models, elimination of quantifiers, decidability.
Professor Makkai

189-551A COMPLEX ANALYSIS I. (3 credits). *Not given in 1977-78.* Maximum modulus theorem, Rouche's theorem, Weierstrass and Vitali's theorem on convergence of holomorphic functions, normal families. Conformal mapping, harmonic functions, entire and meromorphic functions.

189-552B COMPLEX ANALYSIS II. (3 credits). *Not given in 1977-78.* Selected topics from the Theory of a Complex Variable.

189-555A FLUID DYNAMICS. (3 credits). Kinematics. Dynamics of general fluids. Inviscid fluids, Navier-Stokes equations. Exact solutions of Navier-Stokes equations.

189-556D MATHEMATICAL STATISTICS. (6 credits; Prerequisite: 189-357B or equivalent). Probability and distribution theory including discussion of some basic distributions in space. Regression and correlation theory. Laws of large numbers and central limit theorem. Sampling theory (including large-sample theory). Likelihood functions and information matrices. Hypothesis testing, estimation theory and decision theory. Distribution-free procedures.
Professor Ruben

189-571D HIGHER ALGEBRA. (6 credits; Prerequisite: 189-371D or equivalent). The rudiments of category theory, including adjoint functors; noetherian, artinian and semi-simple rings; representations of finite groups; a continuation of commutative algebra, prime ideals, localisation and completion; some algebraic number theory and a deeper study of field extensions.
Professor Sussman

189-572D REAL AND COMPLEX ANALYSIS. (8 credits; Prerequisites: 189-250A,B, -251A,B, -372D). The theory of measure and integration, basic Hilbert and Banach space theory, complex analysis from a modern viewpoint.
Professor Drury

189-574A ORDINARY DIFFERENTIAL EQUATIONS. (3 credits; Prerequisite: 189-374D). *Not given 1977-78.* Review of existence and uniqueness theorems, linear systems, phase space and phase flows, stability theory. Additional topics selected from: periodic systems, Floquet theory, Poincare-Bendixon theorem, perturbation methods, bifurcation theory, strange attractors, boundary-value systems, applications.
Professor Langford

189-575B PARTIAL DIFFERENTIAL EQUATIONS (3 credits; Prerequisite: 289-374D). *Not given 1977-78.* A continuation of topics introduced in 189-374D.

189-578A NUMERICAL ANALYSIS. (3 credits; Prerequisite: 189-372D). *This course is given in alternate years. Not given in 1977-78.* Basic error analysis: numerical solutions of nonlinear equations; interpolation; numerical integration and numerical solutions of ordinary differential equations.
Professor Evans

189-579B NUMERICAL ANALYSIS. (3 credits; Prerequisites: 189-250A,B, -251A,B). *This course is given in alternate years. Given in 1977-78; not given 1978-79.* Basic linear algebra, spectral radius, vector and matrix norms. Numerical linear algebra, solution of linear systems by direct and iterative methods, least squares solutions, computation of eigenvalues and eigenvectors, ill-conditioned systems. Solution of nonlinear systems of equations, Banach's fixed point theorem. Polynomial approximation, least-squares and uniform approximation. Boundary-value problems for different equations.

189-581D DIFFERENTIAL GEOMETRY. (6 credits; Prerequisite: 189-380D). *Not given in 1977-78.* The geometry of differentiable manifolds.

189-583A TOPOLOGICAL SPACES. (3 credits). Bases, connectedness, convergence, product and quotient spaces, metrization, compactness, function spaces.
Professor Rattray

189-585A INTEGRAL EQUATIONS AND TRANSFORMS. (3 credits). *Not given 1977-78.* Introduction to the theory of Hilbert spaces. Fredholm and Volterra integral equations; exact and approximate solutions. Equations with Hermitian kernels. Hilbert Schmidt theorem and consequences. Representation formulas for the solutions of initial and boundary value problems. Green's functions. Integral Transforms. Applications.
Professor Roth

189-586B ADVANCED BOUNDARY AND INITIAL VALUE PROBLEMS. (3 credits; Prerequisites: 189-316B, -374D, or equivalent). Partial differential equations of applied mathematics. Dirichlet and Neumann problems: complex variable methods. Homogeneous and non-homogeneous problems: Green's functions, integral transform methods, variational techniques. Perturbation theory. Application.

189-587D ADVANCED PROBABILITY THEORY. (6 credits; Prerequisite: 189-356A or equivalent). Distribution functions on R^1. Basic measure and integration theory, with special reference to probability measures on (R^1, B^1) and their correspondence with distribution functions. Random variables. Expectation, including basic inequalities. Independence. Conditional probability. Convergence concepts, laws of large numbers. Characteristic functions. Central limit theorem and its ramifications. Random walks.
Professor Taylor

189-588D ALGEBRAIC TOPOLOGY. (6 credits). Introduction to homology and homotopy theory.

METEOROLOGY (195)

Professors – W.F. HITSCHFELD; J.S. MARSHALL; SVENN ORVIG; R.R. ROGERS
Associate Professors – J.F. DEROME; P.E. MERILEES *(Chairman)*; E. VOWINCKEL
Assistant Professor – H.G. LEIGHTON
Special Lecturer–H. WARN

Room 722, Burnside Hall,
805 Sherbrooke St. West,
Montreal, P.Q. Canada
H3A 2K6
Telephone, 392-4461.

Meteorology is the study of the earth's atmosphere from the ground up to the heights where it fades into interplanetary space. Most of this atmosphere (80 per cent by mass) is within about 40,000 feet of the surface, and it is here that much of the familiar "weather" occurs; above this height lies the stratosphere, where there still are winds and pressure-patterns, but clouds and up-and-down currents of air are scarce. The atmosphere can be studied as a large ocean of gas by the methods of fluid dynamics; winds, temperature fronts, and planetary waves are the ideas involved in such a program. Or it can be studied from the point of view of its detailed physics: how could droplets make rain, or how sunlight warms the ground, and the ground warms the air above it by radiation and convection.

Meteorology is not weather-forecasting, though forecasting is one of the objectives of meteorology. The point of view is always quantitative; meteorology is physics, and like other parts of physics it attempts to devise theoretical models of its complex subject, of the motion and composition of the air, and of its interaction with radiation and the solid or liquid surface.

Meteorology is a good subject when coupled with an approved sequence in mathematics and physics. The program may lead to a B.Sc. with a Major in Meteorology.

In the Honours program in Meteorology there are various options, depending on the student's particular interests. It is, in all cases, a rigorous and specialized study of the theory and practice of meteorology.

Graduates in Honours Meteorology and in Honours Physics, Mathematics, or equivalent courses, can become professional meteorologists through the training offered in the M.Sc. program in Meteorology. Good facilities exist for Ph.D. studies in several areas of current meteorological research.

Graduates who have a Major in Meteorology often find employment in applied work.

FACULTY PROGRAMS

For details see Faculty Programs, page 143.

MAJOR IN METEOROLOGY

Consult Professor Rogers, Burnside Hall, Room 817.

In view of the fact that meteorology is the physics and mathematics of the atmosphere, the Department will recognize a course of study as a "Major Program in Meteorology" if, in addition to the full sequence of general meteorology courses (195-210D, -320A, -321B, -410A, -411B and -420D), it contains the equivalent of the following program in Physics and Mathematics:

Mathematics 189-223A, -222A,B -314A,B, -315A,B; Physics 198-231A,B, -232A,B. -233A; Computer Science 308-200B, plus additional approved courses in Mathematics and Physics. In total, 57 credits are specified, of which 51 are compulsory. The details of the program are available in the Department.

HONOURS IN METEOROLOGY

Consult Professor Derome, Burnside Hall, Room 711.

Prerequisite: High standing in Mathematics and Physics. An advanced program in Physics and Mathematics, with Meteorology courses from those listed below under "Course descriptions". There are three options: Dynamic, Physical and Climatology. All of these require the same program in the U1 year (30 credits of which 28 are compulsory and 2 are elective). The U2 and U3 years are different in the three options. In all options the U3 year will concentrate on the 600-level courses given in the Meteorology Department.

U1: Mathematics 189-247A, -248A, -249B, -325B; Physics 198-251A, 253A, -261B, -262B; 3 approved credits; 5 credits are elective.

PHYSICAL METEOROLOGY OPTION

U2: Mathematics 189-356A; Physics 198-355A; Computer Science 308-200A,B; Meteorology 195-410A, -411B, -420D; plus 3 approved credits; 6 credits are elective.

U3: Physics 198-328A, -329A; Meteorology 195-651D, -653D, -655D, -656D; Plus 3 approved credits; 9 credits are elective:

DYNAMIC METEOROLOGY OPTION

U2: Mathematics 189-356A, -357A, -357B; Physics 198-355A; Computer Science 303-200A,B; Meteorology 195-320A, -321B; Plus 6 approved credits; 6 credits are elective.

U3: Mathematics 189-317A; Meteorology 195-652D, -653D, -654D, -655D, -656D; 7 credits are elective.

CLIMATOLOGY OPTION

U2: Mathematics 189-356A, -357B; Computer Science 308-200A,B; Geography 183-324B; Meteorology 195-320A, -321B; Plus 6 approved credits; 6 credits are elective.

U3: Mathematics 189-317A; Meteorology 195-652D, -653D, -654D, -655D, -656D; 7 credits are elective.

Course Descriptions

195-210D GENERAL METEOROLOGY. (6 credits; 1 lecture and tutorials). History, instruments and data. Simple and complex climatic elements; world, regional and local climates. Physical properties of the atmosphere; thermodynamics; humidity, clouds and precipitation. Local and major wind systems. Fronts and air masses. Synoptic analysis and principles of weather forecasting.
Professors Orvig and Leighton

195-320A INTRODUCTORY ATMOSPHERIC PHYSICS. (3 credits; 3 hours lectures; Prerequisite: Permission of instructor). Classical thermodynamics applied to atmospheric air. Water vapor and its thermodynamic effects. Solar and terrestrial radiation. Heat budget of earth and atmosphere. Diffusion and turbulent transfer of heat and matter in the atmosphere.
Professors Rogers and Leighton

195-321B CLOUD PHYSICS. (3 credits; 3 hours lectures; Prerequisite: Meteorology 195-320A). Atmospheric stability and convection. Nucleation of water and ice. Growth of cloud droplets and the development of precipitation. Structure of clouds and rain, methods of observation.
Professors Leighton and Rogers

195-410A DYNAMIC METEOROLOGY I. (3 credits; 3 hours lectures; Prerequisites: Mathematics 314A and 315B; Meteorology 320A, 321B or permission of instructor). Momentum equations in rotating coordinates, geostrophic flow, steady curved

flow. The vertical structure of wind and pressure systems. The circulation theorem and vorticity equation. Pressure as the vertical coordinate. Analysis of synoptic scale motions in middle latitudes.
Professor Merilees

195-411B DYNAMIC METEOROLOGY II. (3 credits; 3 hours lectures; Prerequisite: Meteorology 410A). Atmospheric oscillations: sound waves, gravity-inertia waves and Rossby waves. Origin of middle-latitude waves: barotropic and baroclinic instability mechanisms. Energy transformations in the atmosphere. Finite difference methods applied to the solution of nonlinear atmospheric models.
Professor Merilees

195-420D INTRODUCTORY SYNOPTIC METEOROLOGY. (6 credits; 1 hour lecture; 2 hours laboratory; Prerequisite: Meteorology 320A, 321B; Corequisite: Meteorology 410A and 411B or permission of instructor). An introduction to meteorological analysis. Effects of boundary layer processes on large-scale energetics of the atmosphere. Diagnostic studies of the development of weather systems. The general circulation. Practical analysis of weather charts. Graphical and computer methods.
Professor Derome

195-651D* PHYSICAL METEOROLOGY. (6 credits; 2 hours). Thermodynamics of the atmosphere. Instability and convection. Cloud physics and storm structure. Radar applications. Solar and terrestrial radiation. Radiation calculations and diagrams. Energy budget of the atmosphere.
Professors Rogers and Leighton

195-652D* DYNAMIC AND NUMERICAL METEOROLOGY. (6 credits; 2 hours). The equations of motion. Circulation and vorticity, development theorems. Linear perturbations, instability. Mathematical models of the atmosphere; application of difference equations and their numerical solution.
Professors Derome, Merilees and Dr. Warn

195-653* CLIMATOLOGY. (3 credits; 1 hour). The general circulation of the atomosphere and the ocean. Climatic classification. The heat and water balance, climatic change.
Professor Orvig

195-654D* SYNOPTIC METEOROLOGY. (6 credits; 4 hours). A laboratory course to complement Meteorology 651 to 653. Analysis of weather charts and diagrams, forecast techniques, diagnostic treatments of atmospheric dynamics and weather processes. Modern statistical and computer methods are used wherever suitable.
Professor Vowinckel and Staff

195-655D* SEMINARS "TOPICS IN METEOROLOGY". (3 credits; 1 hour). One-hour discussions on special topics in meteorology, e.g. lightning studies, meteorology and microwave communication, remote sensing, limits of predictability.
Staff

195-656D* DAILY WEATHER DISCUSSION. (2 credits; 2-1/2 hours). One-half hour briefing on the current weather situation.
Professor Vowinckel

*Restricted to Graduate students and final-year Honours Meteorology students. Others by special permission.

MICROBIOLOGY AND IMMUNOLOGY (528)

Professors – B.H. MATHESON; S.I. VAS *(Chairman)*; W.YAPHE
Associate Professors – Z. ALI-KHAN; C.A. BUTAS; E.C.S. CHAN; J. DE VRIES; P. GILL; R. HAND; L. KAPICA; *C.H. PAI; *G.K. RICHARDS; H.G. ROBSON; R.SIBOO
Assistant Professors – A.F. DOSS; I.B. FABRIKANT; J.E. FEIN; *J. GORDON; *E. MANKIEWICZ; *M. MARKS; L. MARTINEZ *J.L. MEAKINS; *J. MENDELSON
Lecturers – *M. BLANC; *S. NOMMIK
Demonstrator – C. SHAW
Teaching Assistants – D. CRISTEANU; L. THERRIEN
Associate Members – *R.D. GUTTMANN; *C.K. OSTERLAND
**Part-time*

Room 515, Pathology Building
3775 University Street,
Montreal, P.Q. Canada
H3A 2B4
Telephone: 842-1251, ext.1771.

Microbiology is the study of minute forms of life, which are best examined using a light or electron microscope. It is one of the youngest sciences, despite the fact that the simplest microscope was invented over three hundred years ago, and the existence of microbes was suspected long before that. In its relatively short history, however, microbiology has had tremendous impact in such varied fields as medicine, agriculture, genetics, forestry and industry.

The main groups of microorganisms are the bacteria, protozoa, fungi and viruses, which are now included under the broad term "microbiology." These organisms, although so small as to be measured in thousandths of a millimeter have characteristic structures and life habits. Many of their complex chemical, physical and genetic properties are shared with man and other higher organisms. Because of their rapid growth rate, they are widely used as "experimental animals" in studying cell processes. Microorganisms of all kinds are widespread in man's environment and are important in his everyday life in many ways. Some cause diseases of plants, animals or man; others are useful in breadmaking,

brewing, ripening of cheese, winemaking, manufacture of vaccines, antibiotics, and pure chemicals; some are the cause of food spoilage; and still others are of vital importance in maintaining soil fertility or in the control of forest insect pests.

Opportunities for careers in pure or applied microbiology are many and varied. For interested students, the following introductory reading is suggested:

Postgate, *Microbes and Man* (Penguin, 1969)
Camus, *The Plague* (Penguin)
Sistrom, *Microbial Life* (Holt Rinehart & Winston Inc, 1969)

FACULTY PROGRAM

For details, See Faculty Programs, page 143.

MAJOR PROGRAM

The following courses are required to complete a Major program in Microbiology and Immunology.

U1: 31 credits: Biology 177-201D, -205D, -206D; Mathematics 189-231A,B; Chemistry 180-204A, -222A,B; Physiology 552-211D.

U2: 22 credits: Biology 177-301A,B, -302A,B, -314A; Microbiology 528-311A, -314B, -313B or 315B; one of the following: Biology 177-309A, -373A; Mathematics 189-232A,B; Psychology 204-204A,B.

U3: 13 credits: Microbiology 528-313B or 315B, -422A, -423A, -424A.

HONOURS PROGRAM

The Honours program is a rigid one and intended for those students planning to enter graduate study after completion of the B.Sc. No student will be admitted to the Honours program until U-2. Students hoping to be admitted to Honours in U-2 should follow the U-1 Major program and must obtain a GPA of 3.00 for admission. For continuing in Honours a GPA of 3.10 must be obtained in U-2. For graduation in the Honours program the student must pass all required courses at C level or better and achieve a sessional GPA of at least 3.1 in the U3 year.

The following courses are required in U-2 and U-3 to complete the Honours program:

U2: Biology 177-301A,B, -302A,B, -314A, -310B; Microbiology 528-311A, -314B, 313B or 315B; Anatomy 504-261A; one of: Biology 177-309A, -373A; Mathematics 189-232A,B; Psychology 204-204A,B.

U3: Microbiology 528-313B or 315B -422A, -423A, -424A, -471A, -472B, -501D, -525B, -527B.

Total credits over 3 years: 92

ADVISERS

Students entering U1: consult Dr. E.C.S. Chan, Room 403, students entering U2 & U3: consult Dr. P. Gill, Room 406, Pathology Building, 3775 University Street. Telephone 842-1231, ext. 1771.

INTERDEPARTMENTAL HONOURS IN IMMUNOLOGY

The Departments of Biochemistry, Microbiology and Immunology and Physiology offer an interdepartmental Honours program in Immunology.

Details of this program may be found on page 182 of the Announcement.

Course Descriptions

528-311A BIOLOGY OF MICROORGANISMS. (4 credits; Prerequisites: Biology 177-201D, 205D, 206D or by permission of the Department; 3 hours lectures, 3 hours laboratory). A general treatment of introductory microbiology bearing specifically on the biological properties of microorganisms. The laboratory sessions introduce general techniques peculiar to the handling of microorganisms.

528-313B PARASITOLOGY. (3 credits; Prerequisite: Microbiology 528-311A. Open to Microbiology students or by permission of the Department; 2 hours lecture, 3 hours laboratory every other week). *Alternate years. Not offered in 1978-79.* A study of the biology, bionomics, epidemiology, pathogenicity and diagnosis of the parasites of man. Laboratory will consist of a lecture on techniques, demonstrations and practical work.

528-314B IMMUNOBIOLOGY. (3 credits; Prerequisite: Biology 177-201D or by permission of the Department; 3 hours lectures). A comprehensive study of the fundamental principles of immunobiology.

528-315B THE PATHOGENIC FUNGI. (3 credits; Prerequisite: Microbiology 528-311A. Open to Microbiology students or by permission of the Department; 2 hours lectures, 3 hours laboratory every other week). *Alternate years, offered in 1978-79.* A study of the morphological, cultural and physiological characteristics of the pathogenic fungi, their pathogenic activities and the etiology and epidemiology of fungus diseases of importance in human and veterinary medicine.

528-422A PATHOGENIC BACTERIA. (4 credits; Prerequisites: Microbiology 528-311A, 314B; open to Microbiology students or by permission of the Department; 3 hours lectures, 3 hours labs). A systematic survey of the major groups of pathogenic bacteria emphasizing principles of taxonomy, mechanisms of pathogenicity, modes of transmission, and control.

528-423A MICROBIAL PHYSIOLOGY. (3 credits; Prerequisite: Microbiology 528-311A; open to Microbiology students or by permission of the Department. 3 hours lectures). A broad introduction to the physiology of microorganisms. The chemical activities of microbes will be studied from a basic knowledge of microbiology and biochemistry.

528-424A FUNDAMENTAL VIROLOGY. (3 credits; Prerequisite: Microbiology 528-311A; open to Microbiology students or by permission of the Department. 2 hours lectures). A study of the fundamental properties of viruses and their interaction with host cells. Emphasis will be on phenomena occurring at the cellular level.

528-471A CURRENT TOPICS IN MICROBIOLOGY AND IMMUNOLOGY. (3 credits; open only to U3 Honours students). Seminars and discussions on current topics in Microbiology and Immunology.

528-472B CURRENT TOPICS IN MICROBIOLOGY AND IMMUNOLOGY. (3 credits; open only to U3 Honours students). Seminars and discussions on current topics in Microbiology and Immunology.

528-501D ADVANCED MICROBIOLOGICAL TECHNIQUES. (6 credits; open only to selected U3 Honours students; 2 hours lectures, 6 hours laboratory). A laboratory course on advanced techniques and instrumentation used in Microbiology. The laboratory periods will consist of fundamental experiments in Microbial Physiology, Immunology and Virology.

528-525B PATHOGENIC VIRUSES. (2 credits; Prerequisite: Microbiology 528-424A; open only to U3 Microbiology Honours students or by permission of the Department; 3 hours lecture). A study of the properties and activities of the major groups of mammalian viruses and the epidemiology of viral infections.

528-527B INFECTIOUS IMMUNOLOGY. (3 credits; open only to U3 Honours students or by permission of the Department, 2 hours lectures, 3 hours laboratory). A comprehensive study of immunity in infectious diseases emphasizing the mechanisms of host resistance, immunodeficiency, immunoprophylaxis, adverse immune reactions and sero-diagnostic techniques.

PATHOLOGY (546)

546-300A PRINCIPLES OF DISEASE. (3 credits; Prerequisite: A university-level general biology course; not open to U1 students). An introduction to the study of diseases with emphasis on changes in normal structure and function and their causes at the host, tissue and cellular level. Students are expected to participate in seminars and a major paper is required.

Professor H. Sheldon

PHARMACOLOGY AND THERAPEUTICS (549)

549-461D GENERAL PHARMACOLOGY. (6 credits; Prerequisite: Suitable preparation in biochemistry and physiology and permission of the Department). A course covering basic interactions between chemical agents and living processes.

PHYSICS (198)

Professors – C.S. LAM, *(Chairman);* R.E. BELL; M. COHEN *(Faculty of Medicine);* A.P. CONTOGOURIS; F.T. HEDGECOCK; W.F. HITSCHFELD; M.P. LANGLEBEN; B. MARGOLIS; S.K. MARK; J.S. MARSHALL; W.M. MARTIN *(Assistant Chairman);* E.R. POUNDER; J.M. ROBSON; R.T. SHARP; D.G. STAIRS; E.J. STANSBURY; R. STEVENSON *(on leave);* P.R. WALLACE; M.J. ZUCKERMANN

Associate Professors – J.R. ADDISON; G.L. AUSTIN; J.E. CRAWFORD; S. DAS GUPTA *(on leave);* R. HARRIS *(on leave);* R. HENZI; J.E. KITCHING; J.K.-P. LEE; J.F. MATHISON; R.B. MOORE; T.F. MORRIS; W.B. MUIR; P.M. PATEL *(on leave);* D.G. RYAN; J.O. STROM-OLSEN *(on leave);* N. de TAKACSY; J.M. TRISCHUK; D. WALSH

Honorary Associate Professor – A.I. McPHERSON

Honorary Lecturer – P.C. LANDRY *(Faculty of Education)*

Readers – R.W. COCHRANE; Y-H Shing

Curator, Rutherford Museum – F. R. TERROUX

Rutherford Physics Building, Room 108
3600 University Street,
Montreal, P.Q. Canada,
H3A 2T8.
Telephone 392-5130

Physics is in many ways the parent of the other natural sciences and its discoveries and laws continually affect their development. Its range and scope extend in space and time from subnuclear particles to the universe itself. The subfields of physics such as mechanics, thermodynamics, electricity, atomic physics and quantum mechanics, to mention but a few, permeate all other scientific disciplines.

There are two main undergraduate programs in Physics at McGill: the Major and the Honours. The Major program offers a broad training in classical and modern physics and yet leaves room for the student to take a meaningful sequence of courses in two other areas. Flexibility and accessibility are two features of the Major program: to enable the student to take advantage of this, the Department has prepared a number of options consisting of the Major core and sequences from other disciplines. An example would be an option in Meteorology. Those interested should ask their Advisers. The Honours program is more highly specialized and the courses are more demanding. High standing in collegial mathematics and physics is a requirement for admission. The Honours program is appropriate for

students who wish to make an in-depth study of the subject in preparation for graduate work and an academic or professional career.

For students lacking some of the college level courses in physics and for students wishing to transfer into Physical Sciences after completing a collegial program in another area the Department offers transitional courses in its - 100 series.

Many aspects of physics permeate other scientific fields, and people trained in physics are employed in industry, government, and educational systems where they find many challenges as teachers, researchers, administrators and in the rapidly developing area of scientific business.

SCIENCE FRESHMAN PROGRAM

The courses 198-101AB, and -102A,B are intended for students wishing to proceed in Biological Science but lacking one or more of the elements of the CEGEP program in Health Sciences. Similarly courses 198-120A,B, -121A,B, -122A,B are intended for students who wish to proceed in Physical Sciences but who lack some of the prerequisites. Finally 198-110A,B is intended for students who have satisfactorily completed the CEGEP Health Sciences sequences and who now wish to proceed in Physical Sciences or in Engineering.

HONOURS PROGRAM

High standing in Mathematics and Physics and satisfactory performance in a placement examination are required for admission to Honours. The placement examination is held about seven days after the commencement of lectures. Students may register in Honours after they have obtained provisional Honours forms from the Department. This registration will be confirmed if they succeed in the placement examination.

In addition to a sufficient number of electives, the Department prescribes a total of 75 credits distributed over the three years as follows:

U1: Mathematics 189-247A, -248A, -249B, -325B; Physics 198-251A, -253A, -259D, -261B, -262B. 25 credits.

U2: Physics 198-328A, -329A, -351A, -352A, -355A, -357D, -359B, -362B, -363B. 26 credits.

U3: Physics 198-459D, -551A, -562A and four o Physics 198-454B, -514B, -557A, -558A -559B, -567B, -572B; Mathematics 189 360A or other approved 3-credit courses. 2 credits.

NOTE: Mathematics 189-360A is a recommende option for Honours Physics students in either the U or U3 year. This course is normally offered in alter nate years.

A student whose average in the *required* courses in any year falls below GPA 2.8, or whose mark in any individual *required* course falls below 55% may not register in the Honours program the following year except with the permission of the Department.

MAJOR PROGRAM

The Department's requirements, in addition to a sufficient number of electives are:

A) A core of 40 credits as follows: Mathematics 189-222A,B -223A, -315A,B; Physics 198-231A,B, -232A,B, -233A, -235B, -328A, -329A, -346D, -432A, -439A,B

B) 15 credits chosen from the following list: Geological Sciences 186-504B; Mathematics 189-314A,B, -316B, -317A, -319B; Physics 198-214B, -219A, -314A, -331A, -334A, -337B, -341B, -413A, -431A, -434B, -437B, -438B; -449B; Computer Science 308-200A,B; one approved course 3 credits, not listed above.

Mathematics 189-222A,B, -223A, -315A,B and Physics 198-235B must be completed in U1. While the other courses may be taken at any time subject to prerequisite conditions, it is strongly recommended that they be taken in the year indicated by the course number.

C) Students who wish to place more emphasis on laboratory work and to undertake laboratory projects, and who complete the electronics course in the Fall term of their U2 year, may then take 198-359B in the Winter term and 198-459D in their U3 year, providing sufficient equipment is available.

MAJOR IN PHYSIOLOGY AND PHYSICS

See Department of Physiology, page 200.

FACULTY PROGRAMS

For details, see Faculty Programs, page 143.

MINOR PROGRAM

A Minor program in Electrical Engineering for Physics Major students has recently been approved; for details, consult the Physics Department.

Course Descriptions

NOTE: Honours courses are indicated when the fifth character of the six digit course number is 5 or higher.

198-101A,B GENERAL PHYSICS FOR BIOLOGICAL SCIENCES AND PRE-MEDICAL STUDENTS. (4 credits; 3 hours lectures; 2 hours laboratory). The object of this course is to give the students a basic understanding of the principles of physics, illustrating these, where possible, with

current examples of their use in biology and medicine.
Professor Austin and Staff

198-102A,B ELECTROMAGNETISM FOR BIOLOGICAL SCIENCES AND PRE-MEDICAL STUDENTS. (4 credits; 3 hours lectures; 2 hours laboratory; Prerequisite: 198-101; Corequisite: 189-120). Electric field and potential. D.C. circuits and measurements. Capacitance. Magnetic field and induction. Semiconductor devices and their application. Feedback and control systems. Electromagnetic waves.

These courses, 101A,B and 102A,B together satisfy:

a) physics requirements for Medical School;
b) minimum B.Sc. requirements for post-matriculation physics.

Professor Langleben and Staff

198-110A,B MECHANICS AND ELECTROMAGNETISM. (3 credits; 3 hours lectures). This course is intended for those students who have completed nine collegial credits of physics in Health Sciences or the equivalent and now wish to transfer into Physical Sciences or Engineering at McGill. It includes the elements of mechanics and electromagnetism treated with the use of calculus.
Dr. Cochrane

198-120A,B WAVES, OPTICS. (3 credits; 3 hours lectures, 3 hours laboratory in alternate weeks; Corequisites: 189-120, 198-121). Wave phenomena and optics.
Professor

198-121A,B MECHANICS. (3 credits; 3 hours lectures, 3 hours laboratory in alternate weeks; Corequisite: 189-120). The basic laws and principles of mechanics – a mathematical treatment.
Professor

198-122A,B ELECTRICITY AND MAGNETISM. (3 credits; 3 hours lectures, 3 hours laboratory in alternate weeks; Prerequisite: 198-121, 189-121). The basic laws of electromagnetism; electrical measurements; direct current circuits.
Professor

198-200D IDEAS AND CONCEPTS OF MODERN PHYSICS (6 credits, three hours lectures; Science students must have permission of their Adviser. See 'Science Courses for Arts Students'). This course which is non-mathematical in character and requires no specific prior training in physics will attempt to give the non-specialist an introduction to the conceptual structure of modern physics and will deal with the following topics; the concept of fields as introduced by Maxwell in electromagnetism; the evolution of thermodynamics and the statistical description of matter, the direction of time, order and disorder; the evolution of the restricted and general theories of relativity, new ideas of time, the introduction of the quantum hypothesis, wave and particle characteristics of matter, the uncertainty principle; the quantum interpretation of matter, of nuclei and of fundamental particles, the evolution of the physicist's picture of the cosmos, ' big-bang'' vs steady state theories, stars and galaxies, stellar collapse, pulsars and black holes. The impact of changing models of the physical world and the new concepts involved in contemporary thought.
Professor Wallace

198-214B ASTROPHYSICS. (3 credits). An introduction to astronomy and astrophysics with emphasis placed on methods of observations. Astronomy of time and position; solar system; stars; stellar structure and evolution, galaxies.
Professor Pounder

198-217B PHYSICS AND THE LIFE SCIENCES. (3 credits, 3 hours lectures; Prerequisites: Biological Sciences CEGEP certificate or permission of instructor). The examination of biological material using radiation including optical and electron microscopy. X-ray and neutron crystallography, radiation measurements in biological matter.
Professor Moore

198-219A STATISTICAL TREATMENT OF EXPERIMENTAL DATA. (3 credits; 3 hours lectures). Errors in physical measurement. Probability distributions. Fitting of experimental data. Design of experiments.
Professor Langleben

198-224B PHYSICS OF MUSIC. (3 credits; 2 hours, conference 1 hour). An introductory course requiring little mathematical background. Topics include harmonic motion, waveforms and wave motion; vibrating strings and air columns; loudness, pitch and timbre; selected string, woodwind, brass, percussion and keyboard instruments; dissonance and scales; recording and reproduction of music; acoustics.
Professor Moore

198-231A,B MECHANICS. (4 credits; 3 hours lectures, laboratory alternate weeks, *Text.* Skinner, *Mechanics).* Kinematics. Newton's Laws. Conservation Laws and Symmetry Principles, Two-body Problems. Motion of a Rigid Body. Oscillating Systems. Lagrange's Equations.
Professor Crawford

198-232A,B ELECTRICITY AND MAGNETISM. (4 credits; 3 hours lectures, laboratory alternate weeks). Electrical measurements; network theorems, resonant circuits, Electric and magnetic properties of matter. Electromagnetic theory, propagation of electromagnetic waves.
Professors Martin and Hedgcock

198-233A THERMAL PHYSICS. (4 credits; 3 hours lectures, laboratory alternate weeks). Temperature, heat, work, first law of thermodynamics, kinetic theory. The second law of thermodynamics, statistical mechanics, probability distributions.
Dr. Cochrane

198-235B MATHEMATICAL PHYSICS. (3 credits; 3 hours lecture; Prerequisite: Mathematics 189-223A; Corequisite: Mathematics 189-315B). Harmonic motion of simple and continuous systems with examples from mechanics and from electrical circuits; the motion of "imperfect" or perturbed systems; linear response; the discussion of heat flow, fluid flow, and electrical conductivity in two dimensional systems.
Professor Harris

198-251A CLASSICAL MECHANICS I. (3 credits; 3 hours lectures). Kinematics, Newton's laws, conservation laws, dissipative forces. Properties of matter. Harmonic oscillators, central conservative forces, orbits. Accelerated frames of reference.
Professor Pounder

198-253A THERMAL PHYSICS. (2 credits; 2 hours lectures). Energy, work and heat; first law. Temperature, entropy and the second law. Absolute zero; the third law. Thermodynamic potentials and chemical potential. Maxwell's relations, equilibrium conditions, phase transitions. Heat engines and refrigerators. Ideal gas, van der Waals' equation Liquids and solids. Radiation. Chemical equilibrium; law of mass action. Introduction to statistical mechanics.
Professor

198-259D LABORATORY. (3 credits).
Professor Lee

198-261B CLASSICAL MECHANICS II. (2 credits; 2 hours lectures). Special relativity, many-body systems, collisions, rigid-body dynamics, small oscillations and normal modes.
Professor Pounder

198-262B ELECTROMAGNETISM I. (3 credits; 3 hours lectures). Fundamental laws of electric and magnetic fields in both integral and differential form. Methods of problem solution. Properties of matter; dielectric polarization, conductivity, dia-para-and ferromagnetism. Maxwell's equations. AC circuit theory.
Professor Sharp.

198-309A DESCRIPTIVE PHYSICAL OCEANOGRAPHY. (3 credits; Prerequisites: Mathematics 189-120A,B and 121A,B). Properties of sea water. Time and space distribution of ocean properties. Water masses and currents.
Professor D'Anglejan (Marine Sciences)

198-314A ASTROPHYSICS II. (3 credits; 3 hours lectures; Prerequisite: Physics 198-214B). Topics introduced in 198-214B are treated in more detail and depth. Stellar spectra and classification; Saha ionization formula; introduction to theory of stellar atmospheres; equations of stellar structure and the mass-luminosity relation; nuclear energy generations; the Hertzsprung-Russell diagram
Professor Crawford

198-319B DYNAMIC OCEANOGRAPHY. (3 credits; Prerequisites: Physics 198-309A, 198-231A). Equations of motion, geostrophy, diffusive processes, boundary layers, wind-driven circulation, thermohaline circulation, gravity waves, Kelvin waves, tides in oceans and estuaries, general field techniques.
Professor Ingram (Marine Sciences)

198-328A ELECTRONICS FOR PHYSICISTS. (3 credits; 3 hours lectures; Prerequisite: Physics 198-232A,B; Corequisite: Physics 198-329A). Introduction to solid state devices. Amplifiers, feedback, digital circuits. Examples from modern instrumentation.
Professor

198-329A ELECTRONICS LABORATORY. (1 credit; 3 hours; Corequisite: Physics 198-328A).
Professor

198-331A CLASSICAL MECHANICS. (3 credits; 3 hours lectures; Prerequisite: Physics 198-231A,B). Special relativity; Lorentz transformations, 4 vectors, 4 momenta, relativistic kinematics; mechanics, generalized coordinates, Lagrange equations, Hamiltonians, rigid bodies; small oscillations, coupled oscillators, waves. (Knowledge of computing methods is advisable).
Professor Contogouris

198-334A TOPICS IN APPLIED PHYSICS. (3 credits; 3 hours lectures; Prerequisites: Physics 198-231A,B, -232A,B). Waves and resonances in physical systems; superposition, interference and diffraction; examples from mechanics, electronics, geophysics. Information theory: band widths, signal to noise ratio; examples from communications. Plane wave transmission. Matter waves in solid earth, oceans and atmosphere; acoustic waves.
Professor Austin

198-337B NUCLEAR ENERGY AND ITS APPLICATIONS. (3 credits; 3 hours lectures). Concepts of nuclear structure with emphasis towards the understanding of nuclear energy sources. Neutron Physics. Fission. Neutron cycle in a reactor, and criticality. Slowing down and diffusion of neutrons. Elementary reactor theory. Critical size. Shielding. Breeding. Comparison of various nuclear power systems. Uses of radioisotopes.
Professor Robson

198-339B ELECTRONICS FOR CHEMISTS. This course is suitable for other Physical Science and Biological Science students as well. (4 credits; 3 hours lectures, 3 hours laboratory alternate weeks; Prerequisite: Physics 232A,B). Semi-conductor diodes and transistors, transistor amplifiers; circuits with feedback, Pulse circuits, and pulse logic.
Professor Ryan

198-341B STATISTICAL MECHANICS. (3 credits; 3 hours lectures; Prerequisites: 198-231A,B 233A). Ideal gases, density of states, quantum statistics, Bose-Einstein gas, Fermi-Dirac gas, degeneracy, interacting gases, radiation, fluctuations.
Professor

198-346D QUANTUM PHYSICS. (6 credits; 3 hours lectures; Prerequisite: Physics 198-231A,B). Experimental origins of quantum mechanics. Basic postulates. Uncertainty principle; measurement. The Schroedinger equation, eigensolutions, the harmonic oscillator, angular momentum, matrix mechanics. Identical particles, the exclusion principles, spin, statistics. The hydrogen atom.
Professor Mathison

198-351A CLASSICAL MECHANICS. (3 credits, 3 hours lectures). Lagrangian mechanics; Variational methods and Hamiltonian mechanics; transformation theory and the Hamilton-Jacobi equation. Small vibrations treated first in matrix form as an eigenvalue problem. Group theory and symmetry classification of eigenvectors and eigenvalues.
Professor Margolis

198-352A ELECTROMAGNETISM II. (2 credits; 2 hours lectures). Maxwell's Equations. Linearly and circularly polarized electromagnetic waves. Electromagnetic waves in conducting and nonconducting media. Reflection and refraction. Radiation pressure.

198-355A MATHEMATICAL PHYSICS. (3 credits; 3 hours). Application of mathematical methods in physics. Green's functions; differential equations of mathematical physics; eigenvalue problems
Professor Sharp

198-357D QUANTUM PHYSICS. (6 credits; 3 hours lectures). Classical electron theory. Quantum Theory of the electron. One-electron problems. Several-electron problems. Radiation from an atom.
Professor Mark

198-359B LABORATORY. (3 credits; 4 hours). A laboratory in general physics for Honours students.
Professor

198-362B STATISTICAL MECHANICS. (2 credits; 2 hours lectures). Quantum states and ensemble averages. Calculations of thermodynamic quantities. The laws of thermodynamics. Fermi-Dirac, Bose-Einstein and Boltzmann distribution functions. Applications to classical kinetic theory, solid state physics, nuclear physics and astronomy.
Professor

198-363B CONTINUUM MECHANICS. (3 credits; 3 hours lectures). Vectors and cartesian tensors. Stress and strain tensors. Constitutive equation for fluids. Fluid Dynamics. The Navier-Stokes equation Elasticity, elastic waves. (Not open to students who have taken 198-365B).
Professor

198-413A TOPICS IN THE PHYSICAL BASIS OF PHYSIOLOGY. (3 credits; 3 hours lectures; for Majors in Physics, Chemistry, Mathematics or Physiology and Physics or the permission of the instructor). The physical basis for the operation of cells (neurons) in the peripheral and central nervous system. We will examine the forces responsible for transmembrane ion movement and their role in the generation of electrical potentials and anatomical features of neurons responsible for their cable-like electrical behaviour; the mode of transmission of information along this cable-like structure and the mechanisms involved in the transmission of information between neurons.
Professor Mackey (Physiology)

198-431A APPROXIMATE METHODS IN QUANTUM MECHANICS. (3 credits; 3 hours lectures; Prerequisite: Physics 198-346D). Approximate solutions of the Schrödinger equation. The Variational Method. Spectral lines, selection rules and perturbation theory.
Professor Morris

198-432A THEORY AND APPLICATIONS OF ELECTROMAGNETISM. (3 credits; 3 hours lectures; Prerequisite: Physics 198-232A,B). Laplace's equation in electricity and magnetism. Maxwell's equations and wave propagation. Application to transmission lines and antennae.
Professor Wallace

198-434B PHYSICAL AND QUANTUM OPTICS. (3 credits; 3 hours lectures; Prerequisite: 198-432A). Geometric optics. Polarization. Lasers, diffraction and coherence. Holography. Scattering. Optical properties of materials.
Professor

198-437B NUCLEAR AND PARTICLE PHYSICS. (3 credits; 3 hours lectures; Corequisite: Physics 198-346D). Simple properties of nuclei and particles. Radioactivity and its applications. Particle interactions with application to astrophysics. Experimental high-energy physics. Accelerators and typical experiments. Quarks.
Professor Contogouris

198-438B SOLID STATE PHYSICS. (3 credits; 3 hours lectures; Corequisite: Physics 198-346D). Structure of solids. Thermal vibrations in crystals. Electrons in metals, semi-conductors and insulators. Selected topics from magnetism, semi-conducting devices, superconductivity, etc.
Professor

198-439A,B LABORATORY. (3 credits; 4 hours laboratory; Prerequisite: Physics 198-328A,B). Prescribed laboratory work.
Professor

198-449B LABORATORY. (3 credits; 4 hours laboratory; Prerequisite: Physics 198-328, -439A). Supervised project work.
Professor

198-454B OPTICS. (3 credits; 3 hours lectures). Geometrical optics, lenses, electromagnetism and physical optics, diffraction theory, image formation, holography.
Professor Morris

198-459D LABORATORY. (6 credits; 4 hours laboratory). This laboratory will include experiments

associated with electromagnetic theory, as well as the optional courses in U3.
Professor

198-465D MATHEMATICAL PHYSICS FOR CHEMISTS. (4 credits; 2 hours lectures; Prerequisites: Mathematics 189-314A and 315B). Advanced dynamics, including theory of vibrations. Continuous systems. Eigenfunctions and eigenvalues.
Professor de Takacsy

198-514B GENERAL RELATIVITY. (3 credits; 3 hours lectures). Transition from special to general relativity. Non-Euclidian geometry. The basic laws of Physics in co-variant form, Einstein's equations. Newton's theory of gravitation as an approximation. Propagation of gravitation. Rigorous solutions of the field equations. Cosmology.
Professor Henzi

198-551A QUANTUM THEORY. (3 credits; 3 hours lectures). General formulation, scattering theory, WKBJ approximation, time-dependent perturbation, theory and applications, angular momentum, relativistic wave equations.
Professor Contogouris

198-557A NUCLEAR PHYSICS. (3 credits; 3 hours lectures). General nuclear properties, nucleon-nucleon interaction and scattering theory, radioactivity, nuclear models, nuclear reactions.
Professor

198-558A SOLID STATE PHYSICS. (3 credits; 3 hours lectures). Properties of crystals, lattice vibrations and thermal properties of insulators, free electron model and band structure, semi-conductors, metals, optical properties.
Professor

198-559B ADVANCED STATISTICAL MECHANICS. (3 credits; 3 hours lectures). Maxwell-Boltzmann statistics; perfect classical gas; equipartition of energy; law of corresponding states. Bose-Einstein statistics; phonons and photons; superfluidity. Fermi-Dirac statistics; Pauli paramagnetism; white dwarf-stars. Polymers; one-dimensional Ising model. Boltzmann equation; fluctuations; rate of change of entropy; Fokker-Planck equations; Brownian motion; viscosity.
Professor Zuckermann

198-562A ELECTROMAGNETIC THEORY. (3 credits; 3 hours lectures; Prerequisites: U1 or U2 honours physics, or with permission of instructor). Electrostatics, dielectrics, magnetostatics, time-varying fields, relativity, radiating systems, fields of moving charges.
Professor Morris

198-567B PARTICLE PHYSICS. (3 credits; 3 hours lectures). Basic interactions and symmetries, kinematics, scattering theory, phase space, symmetry and statistics, boson and baryon spectra, experimental techniques.
Professor Stairs

198-572B APPLICATIONS OF ELECTROMAGNETIC THEORY (3 credits; Prerequisite: 198-562A). Scattering processes, wave propagation in various media, wave guides, transmission lines and resonant systems, scalar diffraction theory, plasmas, magnetohydrodynamics.
Professor Morris

PHYSIOLOGY (552)

Professors – J. MILIC-EMILI *(Chairman);* R.I. BIRKS; T.M.S. CHANG; B.A. COOPER; P. GOLD; K. KRNJEVIC; F.C. MacINTOSH; G. MELVILL-JONES
Associate Professors – H.K. CHANG; M.W. COHEN; M.M. FROJMOVIC *(on leave 1977-78);* L. GLASS; V. KLISSOURAS; W.S. LAPP *(on leave 1977-78)* ; M. LEVY; M.C. MACKEY; G. MANDL; G. MISEROCCHI: J. OUTERBRIDGE: C. POLOSA; P. SEKELJ; A. WECHSLER; R.L. WILLIAMS
Assistant Professors – A.W. CHAWLA; P.A.L. KONGSHAVN; K. LUKOWIAK; P. NOBLE; S. POTASHNER; D.G.D. WATT; P. WELDON
Lecturers – E. CHIRITO; G. TOLIS; C. COLE
Associate Members – J. CHALLIS *(Obstetrics and Gynaecology)* ; R.F.P. CRONIN *(Medicine)*; B. DUBROVSKY (Psychiatry); L. ENGEL *(Medicine)* ; H.L. GOLDSMITH *(Medicine)* ; C.A. Telephone 392-4209.

Physiology has its roots in many of the basic sciences including biology, chemistry, mathematics, and physics. As one of the central biomedical sciences, physiology overlaps with other biomedical sciences such as anatomy, biochemistry, pathology and pharmacology, and with psychology and biomedical engineering, and is one of the prime contributors of basic scientific knowledge to the clinical medical sciences.

The Department of Physiology at McGill is engaged in studies ranging from the cell and molecular to the population level in a variety of invertebrates and vertebrates, including man. A wide range of interest and expertise in physiology is represented by the staff of the Department, including cardiovascular, respiratory, renal, exercise, neurophysiology, immunology, biophysics and biomathematics. A number of faculty members in the Department have formal or informal liaisons with basic science (Mathematics, physics, electrical engineering, chemistry) and

clinical departments (medicine, surgery, pediatrics, neurology, psychiatry, anesthesia), reflecting and reinforcing the close ties which physiology maintains with other disciplines.

Graduates at the B.Sc. level have found rewarding career opportunities in secondary school science teaching, government service, and laboratory technical assistance, e.g. in pharmaceutical houses, hospitals, and institutions of higher learning. Further, physiology is an excellent background for medicine or dentistry or for other post-graduate work, e.g. in physiology, experimental medicine, pharmacology and physiological psychology.

The programs offered in physiology differ in their orientation but they all contain a common, in depth, core of material covering cardiovascular, respiratory, renal, neurophysiology and immunology. The specified U1 courses are identical for all programs except the Joint Major and Joint Honours Program in Immunology and thus afford the student maximal flexibility before deciding on a particular program to follow in U2 and U3. Consult the Departmental secretary in Room 1137 for an adviser.

FACULTY PROGRAM

For details see Faculty Programs page 143.

MAJOR IN PHYSIOLOGY AND PHYSICS (71 credits).

U1: 26 credits: Physiology 552-211D*; Mathematics 189-222A,B -223A, -315A,B; Physics 198-232A,B, -233A, -235B.

U2: 26 credits: Physiology 552-311; Mathematics 189-319B; Physics 198-328A,B or -339B, -231A, -413A; and 2 of Mathematics 189-317A; Physics 198-334B, -341B.

U3: 22 credits: Physiology 552-457A and 458B; Physics 198-346D, 6 credits in Physiology and 6 Credits in Physics to be selected in consultation with Physiology and Physics.

*The corequisite course Biology 177-201D is waived for this program only.

HONOURS PROGRAMS IN PHYSIOLOGY

Admission and Continuation:

All admissions to Honours programs will be in U2, and a student must have a U1 GPA of 3.1, with no less than 70% in Physiology 211D. Admission to U3 requires a U2 CGPA of 3.2 with no less than 70% in required U2 Physiology courses. Decisions on borderline cases for admission to U3 will be heavily influenced by student standing in required U2 Physiology courses.

The Department reserves the right to restrict the number of entering students in the Honours programs. Students who do not maintain Honours standing may transfer their registration to the Faculty Program in Physiology.

Application for admission to Honours must be made before September 1. All candidates will be interviewed for admission during the period 1-10 September. Consult the Department for specific times.

Graduation: To graduate from an Honours Physiology Program the student will have a CGPA of 3.2 with a mark no less than 70% in all required Physiology courses

Honours Programs in Physiology (73-74 Credits).

U1: 29 credits: Biology 177-201D; Chemistry 180-204A,B -212A,B, -214B, -222A,B; Mathematics 189-231A,B; Physiology 552-211D.

U2: 24-25 credits: Biochemistry 507-302D; Biology 177-301B*, -309A; Physiology 552-311D.

Neurophysiology option (in addition to the above): Anatomy 504-321A; Physiology 552-351B.

Physiology option (as with Neurophysiology option):** Anatomy 504-261A, -312B.

U3 20-21 credits: Neurophysiology option: Biochemistry 507-455B or -456B; Mathematics 189-323A; Physiology 552-453A, -455D.

Physiology option: Physiology 552-459D, Experimental Medicine 516-512A and 12 credits in upper level Physiology courses.

*Section 2B followed by section 1A and 1B

**Students in the Physiology option may replace the sequence 189-231A,B and 177-309A with 189-222A,B and 189-315A,B.

INTERDEPARTMENTAL HONOURS IN IMMUNOLOGY

The Departments of Biochemistry, Microbiology and Immunology, and Physiology offer an interdepartmental Honours program in Immunology. Physiology students interested in the program should contact Dr. W.S. Lapp.

Details of this program may be found on page 182 of the Announcement.

Course Descriptions

552-201A PHYSIOLOGY OF MAN: CONTROL SYSTEMS. (3 credits; 2 or 3 hours lecture with a demonstration or laboratory on alternate weeks; Prerequisites: Collegial courses in Biology or Anatomy, and in Chemistry and Physics, with Organic Chemistry (212 or equivalent) as a pre- or co-requisite.) Physiology of body fluids, blood, muscle, neural and endocrine control, special senses, defense mechanisms, reproduction. (For students in

the School of Physical and Occupational Therapy, the School of Nursing, the Faculty of Education, and other Students with permission of the department).
Professor MacIntosh and Staff

552-202B PHYSIOLOGY OF MAN: BODY FUNCTIONS. (3 credits; 2 or 3 hours lecture with a demonstration or laboratory on alternate weeks; Prerequisites: Collegial courses in Biology or Anatomy and in Chemistry and Physics, with Organic Chemistry (212 or equivalent) as a pre- or co-requisite). Physiology of the cardiovascular, respiratory, excretory and digestive systems; organic and energy metabolism; nutrition; exercise enivronmental stress. (For students in the School of Physical and Occupational Therapy, the School of Nursing, The Faculty of Education, and other students with permission of the department). (Not open to students who took 552-201A in 1976-77 or earlier).
Professor MacIntosh and Staff

Physiology 201A and 202B are companion courses and it is recommended that they be taken in that sequence, but they may be taken in separate years or in the reverse sequence.

552-211D MAMMALIAN PHYSIOLOGY WITH EMPHASIS ON THE PHYSIOLOGY OF MAN. (6 credits; 3 hours lectures, with 3 hours laboratory every second week in both terms; Prerequisites: As for Physiology 201A and 202B; Biology 201D if not already taken must be taken concurrently). For students in the Faculty of Science, and for other students with permission of the Department.
Professor Weldon and Staff

552-311D INTERMEDIATE PHYSIOLOGY. (6 credits; 3 hours of lectures, alternating with 2 hours of lectures and 3 hours laboratory, per week; Prerequisites: Physiology 211D, permission of the instructor). The Physiology of: 1)the Nervous System, 2) the Immune System, 3) the Respiratory System, 4) the Cardiovascular System, and 5) the Renal System. Restricted enrolment.
Professor Miserocchi and Staff

552-312D SELECTED TOPICS IN INTERMEDIATE PHYSIOLOGY. (3 credits, with timetable to include one half the hours of Physiology 311D; Prerequisites: Physiology 211D, permission of the instructor). Any combination of three of the topics listed in 311D except the Nervous System; or a combination of the Nervous System and one other topic. Restricted enrolment.
Professor Miserocchi and Staff

552-313D SELECTED TOPICS IN INTERMEDIATE PHYSIOLOGY. (3 credits, with timetable to include one half of Physiology 311D; Prerequisites: Physiology 312D, permission of the instructor). The remainder of the topics in Physiology 311D not previously taken in Physiology 312D. Restricted enrolment.
Professor Miserocchi and Staff

552-351B EXPERIMENTAL NEUROPHYSIOLOGY. (3 credits; 2 hours lecture, 3 hours laboratory or demonstration; Prerequisites: Physiology 211D, Anatomy 421A and concurrent enrolment in 311D or 312D. This course is primarily for Physiology Honours students, but is open to a limited number of others). The course is aimed at providing the student with an understanding of modern experimental techniques in neurophysiology.
Professor Potashner

552-411A MOLECULAR PHYSIOLOGY. (3 credits; modular instruction, seminars and projects; Prerequisites: Physiology 211D, 311D (or concurrently): Chemistry 222, 204, 214; Biochemistry 451B recommended). Principles of molecular interactions in and at membranes and cells, including a discussion of experimental techniques; and their application to structure-function relationships in cell adhesion, blood clotting and thrombosis, immunophysiology and other selected areas. Restricted enrolment. *Not offered in 1977-78.*
Professor Frojmovic

552-419D PROJECT AND SEMINAR IN IMMUNOLOGY (7 hours lab, 2 hours seminar weekly; Enrolment restricted to U3 Honours Immunology students). Individual research projects in Immunology under the guidance of staff members in the three participating departments: Physiology, Biochemistry, and Microbiology and Immunology. The students will meet to discuss their research projects in a seminar format during the winter term. They will be evaluated on their laboratory and seminar performance, and assigned a letter grade.
Professors Gold, Gordon and Shuster.

552-453A ADVANCED NEUROPHYSIOLOGY. (6 credits; 2 hours lecture and 8 hours laboratory weekly; Prerequisite: Physiology 351B. Enrolment restricted to Physiology Honours students (Neuro Option]. A systematic coverage of peripheral synaptic mechanisms. The Laboratory will consist of a quantitative investigation of neuromuscular transmission in amphibia and peripheral reflexes in Aplysia using intracellular electrical recording techniques.
Professors Cohen and Lukowiak

552-454A NEUROSCIENCE RESEARCH SEMINAR (3 credits; 2 hours seminar; Prerequisite: Permission of the Department). Selected topics on the mechanisms of synaptic transmission. The first term only of 455D. Students will be required to give a verbal presentation and to write an essay on a topic covered in the seminars.
Professor Krnjevic

552-455D NEUROSCIENCE RESEARCH SEMINAR. (6 credits; 2 hours seminar; Prerequisite: Permission of the Department). Selected topics in the neurosciences will be covered with the participation of staff, invited speakers, and students. The first term will concentrate on mechanisms of synaptic transmission, and the second term on motor and

sensory mechanisms in the central nervous system. Students will be required to give a verbal presentation and to write an essay each term on one of the topics covered in that term.
Professors Krnjevic and Mandl

552-456B NEUROSCIENCE RESEARCH SEMINAR (3 credits; 2 hours seminar; Prerequisite: Permission of the Department). Selected topics on motor and sensory mechanisms in the central nervous system. The second term only of 455D. Students will be required to give a verbal presentation and to write an essay on a topic covered in the Seminars.
Professor Mandl

552-457A,B EXPERIMENTAL PHYSIOLOGY. (3 credits). Individual project work under Faculty supervision. This course is primarily for U3 students in the Honours Physiology Programs.
Prof. Wechsler, Staff and Graduate Students

552-458A,B EXPERIMENTAL PHYSIOLOGY. (3 credits). Individual project work under Faculty supervision. This course is primarily for U3 students in the Honours Physiology Programs.
Professor Wechsler and Staff

552-459D PHYSIOLOGY SEMINAR. (6 credits; 2 hours seminar; Prerequisite: Permission of the Department). Selected topics in mammalian physiology will be covered with the participation of staff, invited speakers, and students. Students will be required to write one essay per term on topics covered in that term. The course is open to Physiology Honours students and to other selected students.
Professor Milic-Emili

552-461D EXPERIMENTAL PHYSIOLOGY. (6 credits). Individual project work under Faculty supervision. This course is primarily for U3 students in the Honours Physiology Programs.
Professor Wechsler, Staff and Graduate Students

552-502A EXERCISE PHYSIOLOGY. Offered in conjunction with Faculty of Education. (3 credits; Prerequisite: Physiology 311D). The course deals with questions related to the behaviour of physiological processes in response to physical effort. In particular it explores such areas as structural basis of muscle contraction, neural control of muscle, mechanics and energetics of muscle contraction, fuel utilization, fatigue, physiological adjustments during exercise and influence of training and heredity.
Professor Klissouras

552-508A ADVANCED RENAL PHYSIOLOGY. Offered in conjunction with the Department of Experimental Medicine. (3 credits; Physiology 311D or the equivalent is a necessary prerequisite). Lectures and discussion groups cover in depth most of the major aspects of kidney physiology such as control of the renal circulation, acidification of the urine and tubular transport of electrolytes and non-electrolytes. Admission by permission of the instructor.
Professors Levy and Seely

552-513B CELLULAR IMMUNOLOGY. (3 credits; 3 hours lectures; Prerequisites: 528-314B, 507-503A, and permission of the instructor). This course deals with cellular interactions, regulation and effector mechanisms of the normal immune response.
Professors Gold and Lapp

552-515A PHYSIOLOGY OF BLOOD I: HEMOSTASIS AND RBC DESTRUCTION. Offered in conjunction with the Department of Medicine, Division of Experimental Medicine. (3 credits: Prerequisite: Physiology 311D). A course providing in-depth information in some of the most important areas of hemostasis, thrombosis, blood coagulation, immuno-haematology and erythrocyte destruction.
Professor Cooper

552-516B PHYSIOLOGY OF BLOOD II: OXYGEN TRANSPORT AND NUTRITIONAL ANEMIA. Offered in conjunction with the Department of Medicine, Division of Experimental Medicine. (3 credits; Prerequisite 311D). In-depth study of metabolism of iron, vitamin B12 and folate, cell maturation, oxygen transport and control of erythropoiesis.
Professor Cooper

552-517B PHYSIOLOGICAL SUPPORT SYSTEMS. (3 credits; Prerequisite: Permission of instructor). Physiological, bioengineering, chemical, and clinical basis of physiological support systems including basic principles, compartmental and membrane transport, rheology, fluid dynamics, blood-surface interaction, enzyme engineering, and biomaterials. Examples include artificial kidneys, liver support systems, oxygenators cardiac support systems, artificial cells, and vascular substitutes.
Professor Chang

516-502A ADVANCED ENDOCRINIOLOGY See Experimental Medicine, a division of the Department of Medicine, page 170.

516-503B ADVANCED ENDOCRINOLOGY See Experimental Medicine, a division of the Department of Medicine, page 170.

516-507D ADVANCED APPLIED RESPIRATORY PHYSIOLOGY See Experimental Medicine, a division of the Department of Medicine, page 170.

516-512A PHYSICAL METHODS IN BIOLOGICAL RESEARCH See Experimental Medicine, a division of the Department of Medicine, page 170.

399-551B FLUID MECHANICAL ASPECTS OF RESPIRATORY PHYSIOLOGY See Biomedical Engineering, page 170.

PSYCHOLOGY (204)

Professors – D. BINDRA *(Chairman)*; A.S. BREGMAN; M.C. CORBALLIS; VIRGINIA DOUGLAS; G.A. FERGUSON; D.O. HEBB; W.E. LAMBERT; J. MACNAMARA; R. MELZACK; P.M. MILNER; E.G. POSER; M.S. RABINOVITCH; MURIEL STERN; G.R. TUCKER

Associate Professors – D. DONDERI; R. KANUNGO; A.A.J. MARLEY; R.O. PIHL; J.O. RAMSAY; T.R. SHULTZ; D.M. TAYLOR; N. WHITE

Assistant Professors – FRANCES ABOUD; A.G. BAKER; I. BINIK; M.S. CUMMINS; C.L. OLSON; W.E. PIPER; A. ZOLOVICK

Lecturer – A. ROSNER

Honorary and Part-time Appointments – D.G. DOEHRING; F. GENESEE; ERIKA GUTBRODT; R. KANUNGO; J. MACDOUGALL; R.B. MALMO; SUSAN MATTINGLY; BRENDA MILNER; BLOSSOM WIGDOR; J. WRIGHT; S. YULIS

Clinical Consultants – S.BENAROYA; N. GREENBERG; P. GREGOIRE; R. KACHANOFF; G.NEMETH; A. SCHWARTZMAN; A. SURKIS

Room W/1, Stewart Biology Building,
1205 McGregor Street,
Montreal, P.Q., Canada H3A 1B1.
Telephone: 392-4708

Psychology is the scientific study of man's mind and behaviour. It is both a social and biological science. As a social science, psychology studies man in his interactions with other members of his own species. As a biological science, it regards man as the product of evolution and so studies him in biological perspective, comparing and contrasting his behaviour with that of other species.

The data of psychology are collected within the psychological laboratory by the use of experimental methods in the study of behaviour, and outside the laboratory by systematic observation of the behaviour of man and lower animals. The combination of experimentation and observation results in a knowledge of man's behaviour as he perceives his world, learns, directs his behaviour towards certain goals, and reacts to stress, frustration, and other men. Experimentation, laboratory techniques, observational procedures, measurement, and statistical methods are important tools of the psychologist in the study of behaviour.

Psychology has many interdisciplinary aspects. The study of many psychological problems involves knowledge drawn from other disciplines such as biology, physiology, linguistics, sociology, philosophy, and mathematics. For this reason a student with varied interests can frequently find a place for these interests in psychology.

Psychology is a young science so that explanations of the processes underlying observed phenomena are often theoretical and speculative. The major objectives of psychological study are to reduce the discrepancy between theory and fact and to provide better answers about why man thinks and behaves as he does.

Although a number of undergraduate courses in psychology have applied implications, applied training is in no way the purpose of the undergraduate curriculum. The purpose of that curriculum is to introduce the student to an understanding of the basic core of psychological knowledge, theory, and method, regardless of questions of practical application.

The B.A. or B.Sc. with a Major or Honours degree in psychology is not a professional qualification. It does not qualify the individual to carry on professional work in psychology. In the Province of Québec the minimum requirement for membership in the Corporation of Psychologists of the Province of Québec, the professional association governing the work of psychologists in the Province, is an M.A. or M.Sc. degree, or other equivalent degree. All students planning to practise in the Province of Québec will be examined on their proficiency in French before being admitted to the professional association. Undergraduate courses in psychology may prove of considerable value to students planning careers in professional fields other than psychology, such as medicine, education, social work, communication disorders, or business and industry.

Students who are interested in psychology as a career must pursue graduate studies. Persons who hold graduate degrees in psychology, usually the Ph.D., may find employment in universities, research institutes, hospitals, community agencies, government departments, large corporations, or may act as self employed consultants. At the graduate level, psychology has many specialized branches including social psychology, physiological psychology, experimental psychology, clinical psychology, child psychology, industrial psychology, community psychology, educational psychology, and others. As indicated below McGill undergraduates may pursue an undergraduate Major program in a wide variety of areas of specialization.

Although requirements for admission to graduate studies in psychology vary from one university to another, both the Honours and Major degrees in psychology may qualify the student for admission to many graduate schools, provided, of course, that sufficiently high marks are obtained.

The essential difference between the Honours and the Major program is that higher standards are required of Honours students. Honours students also have an opportunity to work in small groups closely with staff members.

PSYCHOLOGY INFORMATION MEETINGS

All students entering Psychology undergraduate programs are required to attend an information meeting that will be held at 10:00 a.m. on Wednesday, August 31 in Room S1/4 of the Stewart Biology Building for Arts students, and at 10:00 a.m. on Thursday, September 1 in Room S1/4 of the Stewart Biology Building for Science students. Before attending the meeting, students must read the

Announcement of the Faculties of Arts and Science and the 1977-78 edition of the Psychology Department Handbook. The latter will be available in the Departmental Advising Office, N7/28 Stewart Biological Sciences Building from about the beginning of July. Out-of-town residents may have a copy of the Handbook mailed to them upon written request to the Psychology Department.

The main purpose of the information meeting is to instruct students about filling in the Study Plan Forms and to provide further information about Psychology programs. After the meeting, students may meet individually with advisers in order to have their Study Plan Forms approved for registration. In exceptional cases, students who are unable to attend the information meeting may consult an adviser earlier. Call the Departmental Advising Office at 392-4694 for further information. Students must read the Announcement and the Handbook before seeing an adviser.

PROGRAM INFORMATION

The Psychology Department offers 13 different options in its 54 credit programs. Except where otherwise stated, each of these programs may be taken as Major, Honours, or Faculty programs. The differences between these three categories of programs are outlined below. The descriptions of the 6 options available in the B.Sc. program follow. See page 118 for descriptions of the options available only in the B.A. program.

PREREQUISITES

It is expected that most students who major in Psychology will have taken introductory Psychology and Statistics at the collegial level. In the first year all major students must take Psychological Statistics at the collegial level. In the first year all major students must take Psychological Statistics (204-305A or B). Those students who have not taken a collegial level statistics course must also take Psychology 204-204A or B in addition to the other courses in their program.

Psychology 204-201D, or its equivalent, is normally a prerequisite for all 300,400 and 500 level courses in psychology.

MAJOR PROGRAM

The following options are available in the Major program in Psychology:

1. General psychology
2. Experimental Psychology
3. Child Psychology
4. Personality and Abnormal Psychology
5. Psychobiology
6. Quantitative Psychology

Call the Chief Adviser, Mr. Arnold Rosner, (392-4694) to be assigned to an adviser. In the first year of any of the above programs all Major students take Psychology 204-305A,B. Detailed descriptions of the programs will be found starting on page 207 . Students majoring in psychology must obtain a minimum grade of C in all 54 credits required by their program. A grade lower than C may be made up taking another equivalent course (if there is one), by successfully repeating the course, or by successfully writing a supplemental examination (if there is one). Students are reminded that at least 54 credits in their program must be in their Faculty.

HONOURS PROGRAM

Honours in Psychology prepares students for graduate study, and so emphasizes practice in the research techniques which are used in graduate school and professionally later on. Honours students take Psychology 204-380D in the first year of their program (normally U2) and they take Psychology 204-480D and 204-481D in the second year (normally U3). These courses have limited enrolments, and admission to Honours is selective. There is normally room for 30-35 new Honours students each year. Students with a cumulative grade point average of 2.8 or better, are eligible to apply; however, during the past several years it has been possible to accept very few students with averages below 3.5.

Students are accepted into Honours at the beginning of U2, and the two-year sequence of Honours courses continues through U3.

Applications can be obtained from the general office of the Department of Psychology, Room W8/1, Stewart Building. The applications must be completed and returned to the general office by September 1 of the year for which admission to Honours is sought. Candidates will be advised of the Department's decision by letter shortly after September 1.

FACULTY PROGRAMS

A Faculty Program in Psychology is a sequence of courses which represents a lesser degree of specialization than a Major or an Honours program. A Faculty Program may be made up of any of the Major programs with the substitution of 6 credits from U2 Psychology courses for Psychology 204-211D and 204-305A or B. The joint program in psychology and mathematics is also a Faculty Program. For further details see program information at beginning of the Science section (see page 143).

PROGRAM DESCRIPTIONS

The courses in the programs are ordered sequentially so that it will normally take three years to complete a program. The Major and Faculty Programs all include 18 credits in each of U1,U2, and U3. Students may, with the consent of their Academic Adviser, substitute up to 6 credits in a program. Any further changes must be approved by the Associate Dean of the Faculty.

When selecting optional program courses from other departments, it is the student's responsibility to see that he or she has taken the appropriate prequisites and/or obtained permission of the department where necessary.

None of the B.A. or B.Sc. programs provides professional training. They are all intended to give the student a general academic background in the interest area indicated by their titles. Those who are interested in practising psychology professionally must obtain graduate degrees at least at the Master's level, and should preferably continue on to the Ph.D. The Honours programs are most specifically designed to train students who intend to go to graduate school. However, it is important to remember that admission to graduate studies is highly competitive, and that no degree guarantees entry to advanced study. Students with a Major in psychology may also, if they have chosen their courses appropriately and obtained high enough standing, be admitted to graduate studies, although they may sometimes be required to complete a qualifying year. Students in Faculty Programs who decide to go into graduate study in psychology will most probably have to complete a qualifying year first. Further information about advanced study in Psychology may be obtained from the American Psychological Association's Handbook on the topic. It is usually on sale in the University Bookstore.

GRADUATE STUDY

The adviser to Major students will, whenever possible, assist students in planning their courses to coinside with their professional aims. Most graduate schools require not only a record of high achievement, but also adequate performance on some entrance examinations such as the Graduate Record Examination and the Miller Analogies Tests, as well as letters of recommendation.

FACULTY PROGRAMS

For details, see Faculty Programs, page 143.

MAJOR PROGRAMS

Note: Students in the Faculty of Science who select arts courses must have a total of at least 54 credits in science courses among the 90 credits for the B.Sc. degree. Students are expected to have whatever prerequisites are described in the Announcement.

GENERAL PSYCHOLOGY OPTION

This program is intended to give maximum flexibility to students in choosing their own courses. In this 54 credit program at least 36 and as many as 54 credits must be in psychology courses. The program must include Psychology 204-305A,B and 9 credits in 400 level psychology courses. If fewer than 54 credits in psychology are taken, then the difference between that number and 54 must be made up by selecting courses in other departments from the following list (the list may not be up to date in September 1977; the relevant department should be consulted before choosing.

Anatomy 504-321A; Anthropology 141-202A, -203B, -206D, -228A, -303B, -305B, -312A, -316B, -321A, -428B, -437B, -440A; Biochemistry 507-455B; Biology 177-111A,112B (Science students may take only one of these for credit) 177-201D, -205D, -274A, -303A, -305A, -325A, -326B, -351B, -352A, -370B, -372B, -385B, -386A, -391A, -392B, -394B, -476B, -488A, -493B, -588A; Computer Science 308-220A,B; Geography 183-214A, -215B, -217B, -300B; Linguistics 104-200A,B/104-201A,B, -230A, -241B, -321B; Mathematics 189-120A,B, 121A,B, 189-217A, -218B, -223A, -224A,B, -314A,B, -317A, -318A, -323A,B, -324A,B, -327B, -328B, -417A, -423A, -424B, -447B; Philosophy 107-210A, -211B, -313D, -321D, -322D, -510B; Physiology 552-201A,202B, 552-211D; Sociology 166-210A or -212A, -222A, -223B, -225B, -227A, -247B, -303A, -309A, -417B.

EXPERIMENTAL PSYCHOLOGY OPTION

U1 Courses: Psychology 204-211D, 305A, B; plus 12 credits selected from 200 and 300 level courses for which you have the prerequisites.

U2 Courses: At least 9 credits from: Psychology 204-300A, 301B, 302A, 303B, 308D; plus enough credits from the following list to make up 18: Psychology 204-311A, 309B, 340A, 335A, 336B, 341B, 342B.

U3 Courses: Psychology 204-400B, 403A; plus 12 credits selected from: Psychology 204-401D, 416A, 417B, 404B, 406B, 407A, 423A, 424B, 425A, 430B, 450D.

NOTE: The former cognition and thinking option has been subsumed under the Experimental Psychology Option. Students particularly interested in the broad area of cognitive psychology (human problem solving, intelligent action, language, thinking, etc.) as a background for education, assessment of intelligence mental retardation, and so on, are encouraged to take the following courses: Psychology 301B, 302A, 303B, 311A, 340A, 341B, 401D, 404B, 407A, and 425A. They are also strongly encouraged to take courses in linguistics, philosophy (especially logic), and mathematics (eg: calculus, algebra, mathematical logic, computability and mathematical linguistics.)

CHILD PSYCHOLOGY OPTION

Students are encouraged to choose their electives from outside the Psychology Department.

U1 Courses: Psychology 204-211D, 305A,B, 304D; plus 3 credits selected from: Psychology 204-300A, 301B, 302A, 303B; plus 3 credits, selected from Sociology, Anthropology, Linguistics, and Biology.

U2 Courses: Psychology 204-413D, or 414D; plus 6 credits selected from Psychology 204-300A, 301B, 302A, 303B, 306A, 315B; plus 3 credits selected, from psychology courses; plus 3 credits, selected from Sociology, Anthropology, Linguistics, and Biology.

U3 Courses: Psychology 204-413D, or 414D; plus 6 credits, selected from any 400 level courses in psychology; plus 6 credits, selected from Sociology, Anthropology, and Biology.

PERSONALITY AND ABNORMAL PSYCHOLOGY OPTION

Students are encouraged to choose their electives from outside the Psychology Department.

U1 Courses: Psychology 204-305A,B; plus 9 credits to be selected from: Psychology 204-211D, 300A, 301B, 302A, 303B, 308D; plus 6 credits to be selected from departments other than psychology, in consultation with adviser.

U2 Courses: Psychology 204-332A, 337A, 338B; plus 3 credits to be selected from: Psychology 204-211D, 300A, 301B, 302A, 303B, 308D (which have not already been taken); plus 6 credits to be selected from departments other than psychology, in consultation with adviser.

U3 Courses: 6 credits to be selected from: Psychology 204-408A, 412A, 434B, 451D, 458B, 491D; plus 12 credits from 400 level psychology courses. Students are advised not to take both 451D and 491D.

PSYCHOBIOLOGY OPTION

U1 Courses: Psychology 204-305A, B plus 15 credits selected from: Psychology 204-201D*, 211 D, 300A, 301B; Biology 177-205D; Physiology 552-211D or 201A, 202B. *Must be taken by students who have not taken two terms of introductory psychology at the CEGEP level or its equivalent. May not be taken by students who have met this requirement.

U2 Courses: Psychology 204-308D plus at least 9 credits selected from: (6 psychology credits from U1 list may be substituted) Psychology 204-302A, 303B, 306A, 311A, 337A, 342D; plus at least 6 credits selected from: Biology 177-201D, 305A, 318B, 386A, 389B, 391A, 392B; Anatomy 504-321A; Computer Science 308-220A,B, 421A.

U3 Courses: At least 6 credits selected from: Psychology 204-422A, 423A, 424B; plus 12 credits selected from: (6 credits from the U2 list may be substituted) Psychology 204-404B, 407A, 430B; Biology 177-588A, 493B; Pharmacology 549-461D.

QUANTITATIVE PSYCHOLOGY OPTION

U1 Courses: Mathematics 189-222A,B, 245A,B Computer Science 308-200A,B, or 220A,B; plus 6 credits to be selected from Psychology 204-201D, 302A, 303B.

U2 Courses: Mathematics 189-323A,B, 324A,B; plus 3 credits selected from Mathematics 189-314A,B, 317A, 318A, 327B, 328B; plus 9 credits selected from Psychology courses (other than 204-204A,B; 305A,B), which must include Psychology 204-302A, 303B if not taken in U1.

U3 Courses: Psychology 204-335A, 336B; Mathematics 189-423A, 424B, 417A, 447B; plus 6 credits selected from psychology courses other than Psychology 204-204A,B, 305A,B.

Course Descriptions

NOTE: Prerequisites: A basic two-semester introductory course in psychology is a prerequisite for all psychology courses with the following exceptions: 204-201D, 204A,B, 203A, 206B, 305A,B. All 200 and 300 courses are open to students other than Major and Honours students in psychology provided the prerequisites are met and unless otherwise specified. Due to sabbatic leaves and other considerations some courses may not be given in a particular year.

For more detailed information about courses in psychology see *Handbook of Courses and Programs in Psychology* which is on sale in the Departmental Advising Office, N7/28 Stewart Biological Sciences Building.

NOTE: A course is restricted to Honours students when the fifth character of the six digit course number is 7 or higher.

204-201D BASIC ISSUES IN PSYCHOLOGY. (6 credits; 2 lectures, 1 conference,). This course deals with the social and biological basis of motivation, emotion, perception, learning, and thinking, with special emphasis on the nature of man and his relation to society.
NOTE: This course is required of all students majoring in psychology who have not had an introductory psychology course, and is also required for particular Major programs in psychology, at the discretion of their advisers. (This course is not open to students who have taken 204-200D).
Professor Melzack

204-203A EMOTION. (3 credits; 2 lectures, 1 conference). A review of the available knowledge bearing on the explanation of the behaviour and experience that characterize emotional states, such as anger, elation, anxiety and depression. Implications of current psycho-physiological research on emotion for the problems of health, the arts, and social life will be explored.
NOTE: This course has no prerequisites; it is designed for students in areas other than psychology. Students in psychology Honours and Major programs may take this course as an elective but may not use credit in this course towards meeting requirements of prescribed programs.
Professor Cummins

204-204A,B INTRODUCTION TO PSYCHOLOGICAL STATISTICS. (3 credits; 2 lectures, 1 conference. Required of all Majors in Psychology and students intending to enter Honours in Psychology). The statistical analysis of psychological data; frequency distributions; graphic representation; measures of central tendency and variability; elementary sampling theory and tests of significance. *Text.* Ferguson: *Statistical Analysis in Psychology and Education,* 4th ed.
NOTE: This course s a prerequisite for Psychology 204-305A,B, 406B, 417B, 453D.
NOTE: Students who have taken certain equivalent courses elsewhere in the university may not take this course. A list of these equivalent courses is available in the Department Handbook.
Professor Ferguson

204-206B COMPUTER AND MAN. (3 credits, 2 lectures, 1 conference). This is an introductory course on the question of whether human intelligence can be analyzed using concepts derived from computers. It considers the basic structure of computers, programming, principles of artificial intelligence and computer-based psychological theories. Comparison s made with Plaget's theory of intelligence.
NOTE: This course has no prerequisites; it is designed for students in areas other than psychology. Students in psychology Honours and Major programs may take this course as an elective but may not use credit in this course towards meeting requirements of prescribed programs.
Professor Bregman

204-211D LABORATORY METHODS IN PSYCHOLOGY. (3 credits; 1 lecture, 1 conference plus independent laboratory work. This course is recommended for students planning a career in psychology). Training in laboratory methods is given by requiring students o prepare and present demonstrations of psychoogical experiments. *Text.* Johnson & Solso. *An Introduction to Experimental Design in Psychology: A Case Approach,* 1971.
Professor Donderi

204-300A MOTIVATION I. (3 credits; 2 lectures, 1 conference). Motivation is considered in terms of the internal and external factors which act to direct behaviour. Basic principles of motivation are developed, based on the behaviour of both animals and humans. Emphasis is on the evolutionary development of behaviour, and therefore the material considered is mainly from animals. *Texts.* Cofer: *Motivation and Emotion:* Bindra and Stewart: (Eds.) *Motivation.*
NOTE: This course is prerequisite for Psychology 204-309B.
Professor

204-301B LEARNNG. (3 credits; 2 lectures, 1 conference). A survey of contemporary approaches to research on learnng. Topics will include historical background, theories of learning, biological limits, and the application of learning paradigms to practical problems.
Professor Baker

204-302A PERCEPTION I. (3 credits; 2 lectures, 1 conference) Perception is the organization of sensory input into a representation of the environment. Perception depends both on the structure and function of sensory systems, and on previous patterns of sense impressions and response. Topics discussed will be among the following: the coding of perceptual attributes, perceptual constancies, perception and the moving observer, perceptual development, sensory-motor rearrangement, the role of attention and other cognitive influences on perception.
Professor Marley

204-303B THINKING. (3 credits; 2 lectures, 1 conference). An introduction to the study of higher mental processes. Topics such as: development of thought and language, problem solving, concept formation, imagery, artificial intelligence.
Professor Marley

204-304D CHILD PSYCHOLOGY. (6 credits; 2 lectures, 1 conference). A study of current theory and knowledge about psychological processes in children, with particular attention to the development of intelligence, language and social behaviour.
NOTE: This course is a prerequisite for 204-412A.
Professor Rabinovitch

204-305A,B PSYCHOLOGICAL STATISTICS. (3 credits; 3 lectures; Prerequisite: Psychology 204-204A or B or equivalent). An introduction to the design and analysis of experiments, including analysis of avariance, trend analysis, nonparametric statistics, and multiple regression. *Text.* Ferguson: *Statistical Analysis in Psychology and Education, 4th* ed.
NOTE: Required of all students who propose to enter an Honours or Majors program in psychology. Students who have taken certain equivalent courses elsewhere in the university may not take this course. A list of these equivalent courses is available in the Department Handbook.
Professor Olson

204-306A. COMPARATIVE PSYCHOLOGY. (3 credits; 2 lectures, 1 conference. The course is open to U1 students with the permission of the instructor. An introductory biology course is recommended). This course is basically about animals, the way they behave, the mechanisms underlying their behaviour, and some possible connections between the behaviour of animals and the behaviour of humans. Particular emphasis will be placed upon primate (nonhuman and human) behaviour from an ethological viewpoint.
Professor Cummins

204-308D PHYSIOLOGICAL PSYCHOLOGY. (6 credits; 2 lectures, 1 conference). The neural basis of motor and sensory functions, motivation, atten-

tion, and learning. *Text.* Milner: *Physiological Psychology.*
Professor Milner

204-309B MOTIVATION II. (3 credits; 2 lectures, 1 conference; Prerequisite: Psychology 204-300A). *Not given in 1977-78.* The development of motivation in individual organisms is studied, with emphasis on the relationship between emotional and motivated behaviour. Human data are considered, including material from the personality theory and abnormal behaviour literature. Reading consists of assignments made during the course.
Professor White

204-310A HUMAN INTELLIGENCE (3 credits; 2 lectures, 1 conference; Prerequisite: Psychology 204-204A,B or any equivalent course). An introduction to the measurement, structure, development, theory and brain correlates of human intelligence; the role of environment and heredity in its formation; social, cultural, sex, and race differences, will be explored.
Professor Ferguson

204-311A HUMAN BEHAVIOUR AND THE BRAIN. (3 credits; 2 lectures, 1 conference). The course primarily concerns the behavioural effects of abnormalities of the nervous system. The effects of various types of brain lesions on perception, cognition, language, learning, and emotion are described. For the most part, studies involving human patients will be considered, but experiments involving brain lesions in monkeys and other primates will also be introduced.
Professor

204-313A PSYCHOLOGY OF ADOLESCENTS. (3 credits; 2 lectures, 1 conference. *Not given 1977-78.* Prerequisite: Psychology 204-304D or permission of instructor). This course will examine topics of research on adolescents with the goal of familiarizing students with the adolescent's cognitive and moral development, search for identity, family relationships and development of independence, sexual attitudes and behaviour, peer influences, education, socialization, and deviations including drug use, alienation and delinquency. This course is not open to students who have taken 204-415A or 204-415D.
Professor

204-321A INTRODUCTORY ENDOCRINOLOGY. (3 credits; 3 lectures. Prerequisites: Chemistry 180-212A,B or equivalent, Biology 177-201D and permission of instructor). An introductory course emphasizing the general principles of endocrine physiology. Topics include evolution of the endocrine reflex, anatomy of the endocrine glands, physiology of endocrine secretions, pituitary-target gland interrelationships, regulation of endocrine secretions, biosynthesis and metabolism of hormones, reproductive physiology, clinical pathologies of the endocrine glands and physiology of invertebrate hormones.
Professor Zolovick

204-330A INTRODUCTION TO SOCIAL PSYCHOLOGY. (3 credits; 2 lectures, 1 conference). Introduction to basic concepts and theories in the area of social cognition, attitudes, and interpersonal processes.
NOTE: This course is prerequisite for 204-331B.
Professor Taylor

204-331B SELECTED TOPICS IN SOCIAL PSYCHOLOGY. (3 credits; Prerequisite: Psychology 204-330A No lectures will be given). An intensive study of selected research areas in social psychology. Topics will be selected each year that reflect the interests of the instructor and students. The course will emphasize independent study and student-led seminars in which students present and discuss papers which they have prepared.
Professor Taylor

204-332A INTRODUCTION TO PERSONALITY. (3 credits; 2 lectures, 1 conference). A broad survey of theories of personality. The student is introduced to most of the major theoretical positions.
NOTE: This course is prerequisite for Psychology 204-433B.
Professor Aboud

204-335A FORMAL MODELS OF PSYCHOLOGICAL PROCESSES. (3 credits; 2 lectures, 1 conference; Prerequisite: An elementary understanding of computer science probability theory, and finite mathematics, e.g. Computer Science 308-200 A,B, and Mathematics 189-205A, or permission of instructor). *Not given in 1977-78.* An introduction to formal theories in psychology, and to related experiments. The content of the course will be partially determined by the interests of the class. Topics such as: individual and group decision making, pattern recognition, problem solving, language processing, mathematical learning theory will be discussed.
Professor Marley

204-336B MEASUREMENT OF PSYCHOLOGICAL PROCESSES. (3 credits, 3 lectures. Prerequisites: Psychology 204-204A,B introductory calculus and matrix algebra at the level of, for example; Mathematics 189-223 or -224). The properties of measurements and techniques for the measurement of psychophysical variables such as brightness and loudness and of attitudinal variables such as similarity, preference, and utility. The content is to provide data analysis tools of immediate value to experimenters and emphasis will be on current problems in experimental psychology.
Professor Ramsay

204-337A INTRODUCTION TO ABNORMAL PSYCHOLOGY. (3 credits; 2 lectures, 1 conference). A survey of the genetic, physiological and environmental origins of intellectual and emotional disorders.
NOTE This course is prerequisite for 204-338B.
Professor Pihl

204-338B BEHAVIOUR PROBLEMS. (3 credits; Prerequisite: Psychology 204-337A; 2 lectures and 1 conference). An introduction to psychotic behaviour problems, character disorders, experimental methods of pathology and behaviour modification.
NOTE: This course is prerequisite for Psychology 204-491D.
Professor Pihl

204-340A THE PSYCHOLOGY OF LANGUAGE. (3 credits; Prerequisite: An introductory course in Psychology or Linguistics; 2 lectures, 1 conference). The nature of the psychological processes involved in speech and language is considered in relation to maturational and environmental factors. *(Text:* Slobin: *Psycholinguistics.*
Professor Tucker

204-341B SELECTED TOPICS IN PSYCHOLINGUISTICS. (3 credits; 2 lectures, 1 conference). The course will discuss the psychological aspects of bilingualism in individual, school and society.
Professor MacNamara

204-342B HORMONES AND BEHAVIOUR. (3 credits; 2 lectures, 1 conference; Prerequisite: Psychology 204-321A). The role of hormones in organization of CNS function, as effectors of behaviour, in expression of behaviours and in mental illness.
Professor Zolovick

204-380D SEMINAR ON EXPERIMENTAL PROBLEMS. (6 credits; 3 hour seminar. For Honours students only). Honours students present current literature reports in individual program areas, for discussion. Then each student starts an original investigation in collaboration with an individual staff member.
Staff

204-400B CONTEMPORARY PSYCHOLOGICAL THEORY. (3 credits; 2 lectures, 1 conference; Prerequisite: Psychology 204-403A). Recent progress towards the integration of psychological knowledge into a coherent framework is discussed with reference to theoretical ideas and experimental evidence in the areas of learning,, motivation, perception, thinking, personality, and mental abnormality.
Professor Stern

204-401D COGNITIVE PROCESSES. (6 credits; 2 lectures, 1 conference; Prerequisites: Psychology 204-301B, 302A, 303B, 340A). The study of the acquisition, storage, transformation and use of knowledge. Theories based on associationist, stimulus-response, Gestalt, computer and logical models of thought (e.g. Piaget) are evaluated. Application to processes of concept formation, problem solving, language and memory.
Professor Bregman

204-402D EXPERIMENTAL PSYCHOPATHOLOGY. (6 credits; 3 hour seminar. Prerequisites: Psychology 204-337A, 338B and permission of the instructor). The course is suggested only for those interested in the application of concepts and models from experimental psychology to clinical problems. The focus will be on trying to understand the nature of psychopathology – not on therapy or behaviour change. Course content will vary from year to year but representative topics might include: animal models of psychopathology, experimental studies of anxiety and psychopathy, genetics and schizophrenia, and epidemiological studies of behaviour disorders.
Professor Binik

204-403A MODERN PSYCHOLOGY IN HISTORICAL PERSPECTIVE. (3 credits; 3 lectures). A survey of the social and ideological influences on psychology from its philosophical beginnings through the period of the schools to its modern situation.
Professor Ramsay

204-404B ATTENTION AND MEMORY. (3 credits; 2 lectures, 1 conference. This course is restricted to U3 students). A critical examination of recent research on how man selects, codes, stores and retrieves information. Phenomena of visual and auditory storage, coding and rehearsal in memory, imagery, the nature of forgetting and mechanisms of retrieval are discussed in relation to information processing models.
Professor Corballis

204-405D AGING. (6 credits; Prerequisite; Psychology 204-304D or permission of instructor; 2 lectures, 1 conference). A review and discussion of the available knowledge on how the process of aging effects the individual's intellectual and personality functioning with attention to the interacting processes. Research as related to intellectual and perceptual changes, memory and adaptive capacity will be assessed and problems related to research in this field considered.
Professor Widgor

204-406B PSYCHOLOGICAL TESTS AND MEASUREMENT. (3 credits; Prerequisite: Psychology 204-204A or B or its equivalent. 2 lectures, 1 conference). An introduction to the theory and practice of psychological and educational measurement. Special attention will be paid to the theoretical problems involved in the use of measurement techniques and statistics in psychology. A wide variety of tests will be discussed in the areas of clinical, social, educational, and personality psychology.
Professor MacNamara

204-407A PERCEPTION II. (3 credits; 2 lectures, 1 conference. Prerequisite: Psychology 204-302A). Advanced topics in perception, including modern approaches to psychophysics; the role of experience in perception; comparative, developmental and cross cultural perspectives; lateralized perceptual processes; perceptual adaptation and aftereffects; perceptual systems in subhuman primates; illusions and visual perception.
Professor

204-408A PRINCIPLES OF BEHAVIOUR MODIFICATION. (3 credits; Prerequisites: Psychology 204-337A and 204-301B or permission of instructor; 2 lectures, 1 conference). An introduction to theory and research relevant to the modification of human behaviour. Emphasis will be on those studies in which specific behaviour – sub-optimal or maladaptive – is altered in accordance with contemporary principles of learning. Some opportunity for field work may be available. *Text.* Kanfer & Phillips: *Learning Foundations of Behavior Therapy.*
Professor Poser

204-409B PATTERN RECOGNITION AND COMPREHENSION. (3 credits; Prerequisites: Psychology 204-302A, 303B or permission of instructor). The course presents contemporary psychological theory and data concerning how information about the world is acquired, represented and comprehended. Several of the following areas will be considered in depth: the structure of motor programs; speech processing; form and pattern recognition; representation of knowledge in long term memory.
Professor Marley

204-411D ADVANCED SOCIAL PSYCHOLOGY. (6 credits; 3 lectures. 1 conference). A broad coverage of various sources of influence that shape personalities and give structure to human behaviour. The attempts of social philosophers to explain man's social nature are constrasted with contemporary, more experimental approaches, e.g. cognitive, learning-theory, group process, and cultural.
Professor Lambert

204-412A DEVIATIONS IN CHILD DEVELOPMENT. (3 credits; Prerequisite: Psychology 204-304D; 2 lectures, 1 conference). This course will consider deviations in perceptual, cognitive, social and emotional development. Emphasis will be on research and theory which underline the complex interactions among constitutional and environmental factors which lead to such disorders as brain injury, psychosis, mental retardation, learning difficulties and behaviour problems. *Text.* Quay & Werry (Eds.) *Psychopathological Disorders of Childhood, 1972.*
Professor Douglas

204-413D COGNITIVE DEVELOPMENT. (6 credits; 2 lectures, 1 conference. Prerequisite: Psychology 204-304D). Advanced study of cognitive processes and their development in childhood. The child's developing conception of object, space, time, causality, logic and number. The relation of cognitive development to learning and problem solving, perceptual development, language development, and intelligence testing.
NOTE: This course is not available to students who have taken Psychology 204-410D.
Professor Shultz

204-414D SOCIAL DEVELOPMENT. (6 credits; 2 lectures, 1 conference. Prerequisite: Psychology 204-304D). Advanced study of the development of social behaviour and social cognition in children. Socialization, interpersonal attachment, aggression, moral development, sex-typing, achievement, group processes, and the impact of mass media. The role of processes such as identification, imitation, social reinforcement, role-taking, and causal attribution of social behaviour.
NOTE: This course is not available to students who have taken Psychology 204-410D.
Professor Aboud

204-417B. SEMINAR IN ADVANCED ISSUES IN CLASSICAL AND INSTRUMENTAL CONDITIONING. (3 credits; Prerequisites: Psychology 204-301B, 204A,B). The course will cover some contemporary issues in classical and instrumental conditioning including learned helplessness, associationist learning theories, selective attention, frustration, the value of the distinction between instrumental and classical conditioning and correlation learning. Students will be expected to make at least two verbal presentations to the class, participate in discussions of the weekly reading, prepare a term paper and write a final examination.
Professor Baker

204-418B PSYCHOLOGICAL BASES OF SEXUAL BEHAVIOUR. (3 credits; 2 lectures, 1 conference). This course is designed to provide a conceptual framework to be applied to present theories and research on sex. Emphasis is on methodological issues in the study of sexual behaviour, personality and ethological theories of psychosexual development, clinical sexual problems and the social and ethical issues present in this area.
NOTE: This course is restricted to U3 Honours and Major students.
Professor Yulis

204-419B SELECTED TOPICS IN COMMUNITY PSYCHOLOGY. (3 credits; 2 lectures, 1 conference. *Not given, 1977-78.* Prerequisites: Basic two-term course in introductory psychology plus two additional psychology courses). Emphasis of the course will be on the study of social and community interventions by psychologists in an emerging role as systems change-agents. Subject matter will centre on issues in clinical psychology having social and political import.
Professor

204-422B NEUROCHEMICAL BASIS OF BEHAVIOUR. (3 credits; 2 lectures, 1 conference. Prerequisite: Psychology 204-308D). Anatomical, biochemical and physiological aspects of aminergic systems in the CNS and current theories regarding function of these systems in the mediation of behaviour.
Professor Zolovick

204-423A ADVANCED PHYSIOLOGICAL PSYCHOLOGY I. (3 credits; 2 lectures, 1 conference; Prerequisite: Psychology 204-308D or permission of instructor). Topics covered in this course will be

centred around the problems of motivation, emotion, and reinforcement, and the role of the limbic system in these functions. Student participation in a seminar format will be encouraged, in an attempt to study these problems in terms of the research and theories which bear on them.
Professor White

204-424B ADVANCED PHYSIOLOGICAL PSYCHOLOGY II. (3 credits; 2 lectures, 1 conference; Prerequisite: Psychology 204-308D or permission of instructor). Several systems will be chosen from the following list for detailed study, as far as possible, by a seminar approach. Motor system, somatosensory system, auditory system, physiological bases of learning. The neural modelling of behavioural processes will be emphasized.
Professor Milner

204-425A LANGUAGE AND THOUGHT (3 credits; Prerequisite: a course in psycholinguistics or in linguistics or in the philosophy of language; 2 lectures, 1 conference). The meaning of meaning, the psychological nature of linguistic competence, the relations between language and thought, between language and logic, machine translation, the learning of language by infants – these are among the topics which will be discussed in the light of contemporary theory and research in psychology, linguistics and philosophy. The course is for students with a serious interest in language.
Professor MacNamara

204-428B HUMAN COMMUNICATION AND ITS DISORDERS. (3 credits; 3 lectures. Prerequisites: Linguistics 104-200A,B, 201A,B; Psychology 204-304D or 337A). An examination of the acquisition, maturation and function of language skills in children and adults. The unique relationships among hearing, speech, and language functions will be explored. The lecture seminar topics will include the analysis of both normal and aberrant communication behaviours.
Professor Mattingly

204-430B CONSTITUTIONAL FACTORS IN BEHAVIOUR. (3 credits; Seminar). Individual differences in motivational and temperamental characteristics will be examined in relation to constitutional-experimental interactions with special reference to genetic factors, blood-chemistry variables, and environmental influences.
Professor Stern

204-433B SELECTED TOPICS IN PERSONALITY. (3 credits; Prerequisite: Psychology 204-332A; 2 lectures, 1 conference). An intensive study of selected aspects of personality functioning as viewed from different theoretical perspectives. These include such topics as: sense of responsibility, forms of love, perception of freedom and choice, need for achievement and independence, acquisition of self-knowledge and self-evaluation, flexibility, and creativity.
Professor Aboud

204-434B SELECTED TOPICS ON PSYCHOTHERAPY AND BEHAVIOUR THERAPY. (3 credits; 2 lectures, 1 conference: Prerequisite: Psychology 204-337A). This course will briefly evaluate the therapeutic intervention strategies with neurotics. Approaches to individual, marital and group therapy will also be discussed. The difficulties in specifying objectives for intervention, ethical issues, and research on the therapeutic efficacy will be discussed.
Professor Wright

204-450D EXPERIMENTAL PROBLEMS. (6 credits; Prerequisites: Psychology 204-300A, 301B, or 302A and permission of instructor). Practical experience in research methods. The class is divided into sections of 10-12 students which meet for 3 hours each week. Specific procedures may vary among sections, but in addition to class meetings students carry out one or more research projects and write a thesis based on one of them. Primarily for Major and Special students who intend to proceed to graduate studies.
NOTE: Students will be admitted on the basis of a written application on forms available from the Department (Room W8/1). Applications must be submitted by September 1.
Staff

204-451D STUDY OF THE INTELLECTUALLY AND EMOTIONALLY HANDICAPPED. (6 credits; 1 lecture, 1 conference, 4 hours laboratory; Prerequisite: Permission of instructor). *Not given in 1977-78.* The effects of environmental and emotional development will be examined. Students will participate in a service and research project in community programs dealing with children from disadvantaged environments who have educational and emotional handicaps.
Professor Douglas

204-455D RESEARCH METHODS IN PSYCHOLINGUISTICS. (6 credits; 3 hour seminar. Restricted to graduate and final year students in psychology and linguistics). Various research approaches used by psychologists and linguists will be critically evaluated. Each student will select and conduct a major research project which he or she will discuss with other seminar members during the course of the year. The use of basic, relevant methodological tools will be reviewed and the effects of experimenter expectancy will be discussed.
Professor Tucker

204-457A PSYCHOLOGICAL PROBLEMS OF THE PHYSICALLY HANDICAPPED CHILD. (3 credits; limited to final year psychology students; 3 lectures, 1 conference). This course will be concerned with the psychological development of deaf and physically handicapped children.
Professor MacDougall

204-458B METHODS OF BEHAVIOUR CHANGE. (3 credits; Prerequisites: Psychology 204-408A and permission of instructor; I lecture, 2 conferences). Various techniques of behaviour change will be evaluated in the light of their practical efficacy. In the course of supervised field work, in hospitals and schools, students will have an opportunity to apply some of these techniques systematically.
Professor Poser

204-480D CONTEMPORARY PSYCHOLOGICAL THEORY. (6 credits. For Honours students only. 2 lectures, 1 conference). Recent progress towards the integration of psychological knowledge into a coherent framework is discussed with reference to theoretical ideas and experimental evidence in the areas of learning, motivation, perception, thinking, personality, and mental abnormality.
Staff

204-481D EXPERIMENTAL PROBLEMS. (6 credits; 2 hours plus laboratory; for Honours students only). A seminar on current problem areas. Supervised investigation of a special field.
Staff

204-491D ADVANCED STUDY IN BEHAVIOURAL DISORDERS. (6 credits; Prerequisites: Psychology 204-337A and 338B and permission of instructor; I-2 hours lecture or tutorial per week plus a field experience requirement). A critical examination of topics in abnormal and clinical psychology. Emphasis will be on analysis of theoretical positions and empirical findings as they relate to both etiology and treatment.
Professor Piper

204-492A/493B. SEMINARS IN SPECIAL TOPICS. (3 credits each). These seminars are offered by special arrangement between interested professors and students. A student may not register in more than one of these seminars in an academic year. Restricted to U3 students.
Staff

Courses in the Faculty of Management

The Faculty of Management offers the following courses in the Behavioural Sciences: 280-221A, Social Psychology (3 credits); 280-222B, Organizational Behaviour (3 credits); 272-420A, Group Dynamics and Interpersonal Relations (3 credits); 272-421B, Strategies of Management and Organization Development (3 credits); 275-458A, Consumer Behaviour (3 credits); 275-495A, Marketing Research (3 credits).

Where appropriate to a student's program, and with the permission of the program adviser, one or more of these courses may be taken for credit by students enrolled in programs in psychology. Programs in such fields as personnel management, administrative behaviour, and consumer behaviour are also available to students through a cooperative arrangement between the Faculty of Management and the Department of Psychology.

Students who plan to take courses in the Faculty of Management must pick up section slips from the Management Department, Room 453, Samuel Bronfman Building.

4 ALPHABETICAL LIST OF STAFF

ABOUD, F.E., B.A.(Tor.), M.A., Ph.D. (McG.)
Psychology

ADAMS, C.J., B.A.(Baylor), Ph.D. (Chic.)
Religious Studies; Middle East Studies

ADDISON, J.R., B.Sc., B.Eng., M.Sc., Ph.D.(McG.)
Physics

ALI KHAN, Z., B.Sc. (Bilar), M.Sc. (Karachi), Ph.D.(Tulane) **Microbiology and Immunology**

AMASUNO, M., Lic.Fil., Dr.Fil.(Salamanca)
Hispanic Studies

ANANTHA, K., B.A., M.Sc., Ph.D. (Madr.)
Computer Science

ANDERSON, H.S., A.B., M.Litt., Ph.D.(Pitt.)
English

ANDERSON, W., B.Eng., Ph.D.(McG.)
Mathematics

ANGENOT, M., L.Phil. & Lett., Dr.Phil. & Lett.(Brussels) **French Language and Literature**

ARMSTRONG, W.R., M.A. (N.Z.), M.Sc. (Lond.), Ph.D.(Vic., Wellington) **Geography**

ARNOLD, A., D.Lett.(Frib.) **German**

CALENDAR OF DATES FOR SESSION 1977-1978

1977

May 9 to June 17	Summer Session Part 1
May 23	Victoria Day Administrative offices will be closed
June 7 and June 8	Convocations
June 24	St. Jean Baptiste Day Administrative Offices will be closed
July 1	Canada Day Administrative Offices will be closed
July 4 to August 12	Summer Session Part 2
Sept. 5	Labour Day Administrative Offices will be closed
Sept. 9	Registration in all years for Undergraduate Management students
Sept. 12	First day of lectures for all Undergraduate Management students
Sept. 26 to Sept. 30	Change of course period for all Undergraduate Management courses
Sept. 27	Late registration
Oct. 10	Thanksgiving. Lectures cancelled Administrative Offices will be closed
Oct. 14	Deadline for withdrawing (W) from 'A' courses
Nov. 8	Convocation
Nov. 25	Deadline for withdrawing (W) from 'D' courses
Dec. 9	Last day of lectures for fall term
Dec. 12 to Dec. 23	EXAMINATIONS in first term Management courses
Dec. 24 to Jan. 1, 1978 incl	Administrative offices closed

1978

Jan. 2	Administrative offices reopen
Jan. 13	Winter term registration or new students
Jan. 16	First day of lectures for all Management Students for winter term
Jan. 23 to Jan. 27	Change of course period for 'B' courses in Management
Feb. 10 and 11	Midterm weekend holiday (Montreal campus) Lectures cancelled
Feb. 17	Last day to withdraw (W) from 'B' courses in Management
Mar. 24 to Mar. 27 (inclusive)	Easter. Administrative offices will be closed from 5:00 p.m., Mar. 23until 9:00 a.m., Mar. 28. Lectures cancelled for this period.
Apr. 14	Last day of lectures for B' term and 'D' courses in Management
Apr. 17 to May 5	EXAMINATIONS in Maragement courses
June 6 and 7	Convocations

2 GENERAL INFORMATION

THE FACULTY OF MANAGEMENT

In establishing the Faculty of Management in 1968 McGill University recognized the academic importance of the inter-disciplinary studies that had, up to that time, been carried on in two of its schools – the old School of Commerce in the Faculty of Arts and Science, and the newer Graduate School of Business in the Faculty of Graduate Studies and Research.

Since then both the graduate and undergraduate programs have been completely revised, to the enrichment of both.

A sum from one of McGill's major campaigns in 1956 had been set aside and ear-marked for a Management Building, but it was not sufficient to enable construction to proceed. To the great good fortune of the University, the late Samuel Bronfman, while a Governor of the University, made the key donation which enabled McGill to plan and build the Samuel Bronfman Building. It is located next to the Redpath and McLennan Libraries, on the border of the Campus and fully accessible to the community we serve.

The Howard I. Ross Management Library, named for the first Dean of the Faculty and Chancellor of the University, occupies the complete second floor of the Bronfman Building, and consists of over 184,000 books, periodicals and pamphlets in the fields of Economics, Business, Industrial Relations, and Management. These materials are readily available on the shelves and in files in the library reading room. The facilities of the McLennan Library, and the many other University Libraries are also available to students.

AIMS OF THE B.COM PROGRAM

Management means getting things accomplished as effectively as possible. The ideal manager is a well-rounded person, with strong character, good judgment, breadth of vision and thorough competence in the management skills – behavioural and quantitative – which are being developed in this age of rapid technological change.

When everything is changing at such a fantastic pace, it is no longer possible to train good managers by simply passing on to them wisdom developed in a past age. Experience can still be a great teacher, but only if intelligently interpreted and applied. Our concepts must not be static, we must develop managers who can meet new challenges as they arise.

The different qualities required in a competent manager are teachable in varying degrees. Our aim is to give students an opportunity to master new management techniques. We believe there are certain management skills which constitute "core" subjects which every manager should have – but beyond these, we encourage students to follow lines of interest through which they will emerge broadly educated. A good manager must be able to understand and to work with both the generalists and specialists that are required in our complex society.

SUMMARY OF PROGRAMS OFFERED THROUGH THE FACULTY OF MANAGEMENT

Bachelor of Commerce Degree – A three-year program of full-time study (which can also be pursued on a part-time evening basis) designed to prepare the student for the B.Com. degree.

Evening Certificate and Diploma Courses – Courses offered jointly by the Faculty and the Centre for Continuing Education in Accounting, Business and Management, and related subjects to enable qualified evening students to earn the Certificate and/or Diploma awarded by the Centre. Courses to assist evening students to meet the requirements of certain professional societies. *(See Calendar of the Centre for Continuing Education).*

Master of Business Administration Degree – A two-year program of full or part-time study leading to the Master of Business Administration degree awarded through the Faculty of Graduate Studies and Research, for qualified students holding an undergraduate degree.

McGill Management Institute – The Institute offers a series of courses, seminars, and other training activities for business executives.

3 APPLICATIONS AND ADMISSIONS

The academic year at McGill runs from mid-September until early May, with approximately two weeks vacation at Christmas. The normal period of admission is in September; however it is possible for a student to commence his/her program in either January or the Summer Session.

Students wishing to enter the Bachelor of Commerce program in September must apply in writing, before March 1, to:

Admissions Office,
McGill University,
F. Cyril James Building,
845 Sherbrooke St., West,
Montreal, PQ H3A 2T5

Students presently enrolled in another Faculty of the University wishing to transfer to the Bachelor of Commerce program in September must apply in writing not later than July 1st to:

Associate Dean,
Faculty of Management,
McGill University,
1001 Sherbrooke St., West,
Montreal, PQ H3A 1G5

Students wishing to enter the program in January must submit applications by November 1st. Further information regarding non-September admissions, course-sequences, etc., can be obtained from the Undergraduate Program Adviser. All applications must be accompanied by a non-refundable fee of $15.00 payable by certified cheque or money order in Canadian funds made out to McGill University.

GENERAL INFORMATION FOR NON-CANADIAN STUDENTS

To be eligible to study in Canada, students must first obtain a student visa from a Canadian Embassy or Consulate in their area and must present to the Embassy or Consulate both their letters confirming acceptance at McGill and proof that they are capable of assuming all financial responsibilities during their stay.

A pamphlet describing immigration regulations in detail and containing notes and guidance to students from other countries is available from Canadian immigration officers, Canadian Embassies and British Consular offices, or from the Immigration Branch, Department of Citizenship and Immigration, Ottawa, Canada. Local immigration officers will be ready to give advice and help.

A useful handbook entitled *University Study in Canada* can be obtained from Canadian Embassies, Consulates, and the Office of the High Commissioners and Trade Commissioners. A leaflet entitled *Notes for Foreign Students Who Wish to Attend a Canadian University* may be obtained from The Association of Universities and Colleges of Canada, 151 Slater St., Ottawa, Ontario K1P 5N1.

Further information may also be found in the McGill University *General Announcement*, available at the Registrar's Office.

ENTRANCE QUALIFICATIONS

1. Québec Students

Students who have satisfactorily completed the CEGEP or College Equivalent program which includes four one-term courses Mathematics: 101, 103, 105, and 203 will be considered for admission to the first year of the B. Com program. The Faculty is not bound to accept all candidates who have satisfied minimum admission requirements.

The University recognizes and stresses the desirability of students in their CEGEP program receiving as broadly based a background as possible in Mathematics and the Social Sciences before proceeding to a Bachelor of Commerce degree. To this end, the student is strongly discouraged from overemphasizing his/her Commerce orientation while in the pre-university program. Those students who select Accounting as their Management Concentration Group and who intend to qualify as C.A.'s after graduating, are urged to include two courses in Micro and Macro Economics in their CEGEP program.

2. Non-Québec Students

Students from outside the Province of Québec, who have not quite completed the equivalent of CEGEP graduation may under certain circumstances be admitted to the program; they will be required to take correspondingly more credits for their degree than those students admitted under the conditions of 1) above.

Applicants whose mother tongue is not English, and who have not completed a CEGEP program in the Province of Québec, must submit acceptable evidence of facility in English before an application for admission can be considered. The Faculty endeavours to enable a wide range of students, from many different countries, to enrol in the Bachelor of Commerce program; nevertheless, a reasonably high competence in reading English and in writing either English or French is expected from all students. Although lectures, texts, and reference material will, in general, be in English, students will be permitted to write their examinations and term papers in French.

3. Advanced Standing

If a student feels that he/she merits admission with advanced standing on the basis of his/her academic background, he/she may apply for such advanced standing in his/her initial application for admission to the Faculty.

4. Mature Student Admission Policy

Residents of Canada who will be 23 years of age or older by September 1 (for admission to the Fall Session) or January 1 (for admission to the Winter Session) and who lack the academic background normally required for admission may apply for entrance as mature students.

Individuals interested in being considered for entrance under this policy should contact the Admissions Office for further information.

5. Readmission

A student wishing to return to the Faculty after an absence of a portion of an academic year or more must apply in writing to the Associate Dean.

4 FEES

The University reserves the right to make changes without notice in the published scale of fees.

Fees are refundable under special conditions described in the *General Announcement.*

The tuition fees for the Bachelor of Commerce program are $19.00 per credit plus $70.00 Student Services fees and $33.00 Students' Societies fees.

The schedule of fees for Part-time, Special and Visiting students is given in the *General Announcement.*

REGULATIONS FOR PAYMENT OF FEES

NEW STUDENTS

Students entering the University for the first time are required to pay the first instalment of their fees either by mail or in person at the Accounting Office within 10 days after registration and the second instalment before January 15, 1978.

RETURNING STUDENTS

Students who have completed one or more years and intend to register in the succeeding year must pay one half of the total sessional fee by mail or in person to the Accounting Office before August 19, 1977, otherwise they will not be permitted to register. Instructions for paying fees in advance will be mailed to all returning students, either with their Sessional Reports of Standing or a short time later. Students who have been notified by the University of the award of a scholarship, bursary or student loan, and who require this award for payment of the first instalment of fees, must obtain from the Student Aid Office, McGill University, a *Permit to Delay Payment of Fees.*

The second instalment is due by January 15, 1978. A late payment fee is charged for payment after this date.

LATE REGISTERING STUDENTS

Students registering late must pay their fees at the time of registration.

As soon as possible after the prescribed dates for the payment of fees the Chief Accountant will send to the Registrar's Office a list of the registered students who have not paid their fees. Reports of standing, transcripts of record and diplomas will be withheld until such time as the fees are paid or a satisfactory arrangement is made with the Chief Accountant.

SPECIAL FEES AND PENALTIES

Application for Admission (for new students only)	$15.00
Late registration	25.00
Late payment (after specified date)	
First 30 days	10.00
After 30 days	25.00
Graduation fee	15.00
Duplicate diploma	10.00
Certified transcript of students' record:	
First copy with each order	2.00
Additional copies, made at same time, each	.50
Re-reading examination paper	10.00
Changes in course, each change after specified change of course period	5.00

5 SCHOLARSHIPS, PRIZES, MEDALS AND FINANCIAL AID

Full information is given in the *Undergraduate Scholarships and Awards Announcement,* which may be obtained from the Registrar's Office.

CANADA PERMANENT TRUST. – Two annual prizes of $500 and $300, awarded by the Faculty of Management to students entering their final year of the B.Com. program, for excellence in the first two years of their program.

THE CHARTERED ACCOUNTANTS STUDENTS SOCIETY OF QUEBEC. – Prize in Accountancy and auditing.

CLARKSON, GORDON & CO. PRIZE. – $100, awarded at the end of the Final year to the student who obtains the highest standing in Accounting and Auditing.

PROFESSOR J.A. COOTE PRIZE. – Value $100. Awarded to a student in Organizational Behaviour and Personnel.

FINANCIAL EXECUTIVES INSTITUTE. – Silver Medal in Finance.

L.J. FORGET & COMPANY AWARD. – Value $400, established in 1973 by L.J. Forget & Company. Awarded annually by the Scholarships Committee of the Faculty of Management for excellence in the Finance courses in the Bachelor of Commerce Program.

DR. RICHARD GELFAND PRIZE. – $100 to a student in Marketing.

STEPHEN S. GOLDBLOOM MEMORIAL PRIZE. – Value $100. Established by friends and classmates in memory of Stephen S. Goldbloom, a second-year Management student active in Campus student life and a student representative on the Board of Governors, who passed away during the summer of 1975. To be awarded to a student graduating in the Faculty of Management with good academic standing having made a notable contribution to student life.

JOSEPH H. JACOBS PRIZE. – Value $90, established under the will of the late Joseph H. Jacobs, is awarded as a prize for Second year Accountancy.

LADDIE MILLEN MEMORIAL PRIZE. – Established by Mr. J. Ernest Millen in memory of his son, Laddie Millen, who was killed in action in World War I. Three prizes will be available annually to Industrial Relations students in the Bachelor of Commerce Program. The awards will be in the amounts of $500, $300, and $200, representing first, second and third prize for a competitive essay on an Industrial Relations topic. The subject of the essay will be determined each year by a committee of Industrial Relations faculty members and will be available from the Director of the Industrial Relations Centre. The prize winning essay will be selected by this committee, which will include the Dean of the Faculty of Management and the Director of the Industrial Relations Centre. Deadline each year for submission of essays to the Director of the Industrial Relations Centre will be May 15th. If, in the opinion of the committee, no essay is considered satisfactory for a prize at any particular level, the award at that level will not be granted.

MARSH AND MCLENNAN AWARD. – An annual scholarship of $570, covering full tuition, awarded to a student entering the final year of the B.Com. program, for excellence in the first two years of the program.

MISAWA HOMES PRIZE IN INTERNATIONAL BUSINESS. – $100 to be awarded to a student in the final year of the B.Com. program for outstanding performance in the International Business Management Elective Group. To be awarded on recommendation of the International Business Group Adviser and the Chairman of the Faculty of Management Scholarships Committee.

PRICE WATERHOUSE & CO. AWARD. – Value $250, awarded by the Scholarships Committee of the Faculty of Management to a student in the B.Com. program completing his Second year and proceeding to his final year and planning to continue his studies with a practising firm of chartered accountants. The winner must have high standing in the Second year examinations and outstanding academic record, ability, and other qualifications.

TOUCHE ROSS & CO. AWARD. – An award of $250 to a student who has completed the Second year, will be entering the final year in the B.Com. program, and who intends on graduation to qualify as a Chartered Accountant. Awarded on high standing in the Second year and on academic record, ability and personality and other characteristics considered to be suitable.

HYMAN HERBERT STEIN AWARD. – Approximately $250, in memory of the late Hyman Herbert Stein, B.Com. 1925, for an award for a student entering the Second year of the three-year Commerce Program. Awarded at the discretion of the Dean of the Faculty, and ability and financial need will be taken into consideration when making the award.

SILVERMAN MERIT AWARDS. – A limited number of scholarships valued at $850 annually, are available to outstanding applicants to the B.Com. program, tenable over the usual three years of the program, provided high standing is maintained. Application through the Office of the Associate Dean, Faculty of Management.

SIR EDWARD BEATTY GOLD MEDAL. – A gold medal endowed by the late Sir Edward Beatty, former Chancellor of the University, awarded to the student in the B.Com. program with the highest distinction in Economics. Awarded, at present on the aggregate marks for the three full year courses. Principles of Economics (or Honours alternatives), Money and Banking, and Economic Analysis (or Honours alternatives).

FACULTY OF MANAGEMENT PRIZES. – The Faculty of Management awards 3 prizes of $100 each to students in their final year registered in the areas of Computers and Systems, Small Business, and Quantitative Methods.

6 STUDENT SERVICES AND RESIDENTIAL FACILITIES

Full information concerning Student Services and Residential Facilities is given in the *General Announcement* available from the Registrar's Office.

MANAGEMENT UNDERGRADUATE SOCIETY

The Management Undergraduate Society (M.U.S.) represents all undergraduate students in the Faculty of Management, and is charged with representing the students' views both inside and outside the Faculty. Activities sponsored by the M.U.S. include Focus on Business Week (F.O.B.), a Faculty newspaper, a Faculty yearbook and several clubs, each representing an elective group. The clubs (Marketing Club, Finance Club, Computer Club, Investment Club, Organizational Behaviour Club, Industrial Relations Club) organize career information sessions, tours, guest speakers as well as other activities to complement and supplement regular classes.

7 B. COM. PROGRAM REQUIREMENTS

ACADEMIC REQUIREMENTS FOR GRADUATION

a) A student is graduated upon satisfactory completion of the full number of credits indicated in his/her letter of acceptance, subject to the curriculum requirements. For students entering with a CEGEP Diploma, the number of credits will generally be 90. Students from outside the Province of Québec who have not completed the equivalent of CEGEP graduation may be admitted to the program, but will require more than 90 credits for their degree.

b) All students are expected to conform to the curriculum set out below. A student wishing to depart from that program must obtain written permission from the Associate Dean.

c) Students in a Major or General program who graduate with a CGPA of 3.5 or better will be awarded their degrees with "Great Distinction"; those with a CGPA between 3.3 and 3.49 will receive their degrees with "Distinction".

RESIDENCE REQUIREMENTS

a) A student who has transferred with advanced standing to the Faculty of Management from another Faculty within this University, is required to complete a minimum of 60 credits while registered in the Bachelor of Commerce program, including such required courses as are deemed necessary, to become eligible for the degree of Bachelor of Commerce.

b) Completion of the degree requirements normally will require three years of study. A maximum of four years is permitted, however, for completion of the requirements for the degree. In exceptional circumstances, this maximum requirement may be extended by the Associate Dean.

ACADEMIC COUNSELLING

All undergraduate students are required to meet with a Faculty Adviser prior to registration to complete a Study Plan Form. Students entering the Faculty for the first time are required to make an appointment with a Faculty Adviser to be held during the two week period prior to registration, and should call 392-5854 after receiving their letter of admission to the Faculty to arrange their appointment.

Other students will meet with their Faculty Adviser at the end of the winter term (April-May). NO STUDENT WILL BE PERMITTED TO REGISTER WITHOUT HAVING COMPLETED A STUDY PLAN FORM.

Students wishing general information about the program, or encountering difficulties (academic or personal) during the session, should contact Ms. Lesley Richardson.

REGISTRATION

1. **ACADEMIC COUNSELLING.** All undergraduate students are required to meet with a Faculty Adviser prior to registration to complete a Study Plan Form. NO STUDENT WILL BE PERMITTED TO REGISTER WITHOUT HAVING COMPLETED A STUDY PLAN FORM.

2. **REGISTRATION.** All students must register during the normal registration period as indicated in the Calendar of Dates of the University.

3. **LATE REGISTRATION.** Students who fail to register during the normal registration period may do so later on the date designated by the University for late registration upon payment of a late registration fee of $25.00.

4. **CHANGE OF COURSE.** Students who wish to change the courses for which they are registered within the change of course period must apply to the Senior Academic Adviser. Permission may be granted provided that such changes do not involve conflicts in timetable nor destroy the sequence of courses. Course cards must be obtained from the Student Affairs Office.

5. **WITHDRAWALS.** Students wishing to withdraw from a course after the change of course deadline must obtain permission of the Senior Academic Adviser. A "W" will be indicated on the transcript, but will not be counted in the GPA if withdrawal takes place before October 14, 1977 for A courses and February 17, 1978 for B courses and November 25, 1977 for D courses.

   Students whose circumstances require them to withdraw from their complete program should report to the Student Affairs Office.

   Students who obtain approval from the Senior Academic Adviser to withdraw after this period will have a WF (withdrew failing) indicated on their transcript. Approval will be granted only in exceptional circumstances, and will generally not be approved during the last month of classes. The GPA will not include the WF.

6. **VERIFICATION OF PROGRAM.** Each student is responsible for his or her registration in the proper courses and programs. Verification forms will be sent to the student in October and February (exact dates will be announced during the change of course periods.) It is the student's responsibility to check the verification form for errors and return it, signed, to the Student Affairs Office. Students who expect to graduate in January or June of the current academic year or November of the following academic year should check the expected date of graduation on the form. It is the responsibility of the student to ensure that he/she has met all Departmental and Faculty requirements to graduate.

GENERAL INFORMATION

CREDITS

a) In general, a course lasting one term (13 weeks) with three hours of lectures per week (and laboratory periods and conferences, where appropriate) will carry a weight of three credits. Similarly, a three-hours-a-week course lasting through both the Fall and Winter (26 weeks) will carry a weight of six credits. Most of the courses in the program are three-credit courses.

b) Students wishing to make up deficiencies in their background, or to accelerate their progress to the degree, may apply to the Associate Dean to take summer courses, either at this University or at some other institution. Credit will be granted for such work only if it fits intelligently into the student's overall program, and if privilege of doing such work for credit has previously been approved in writing by the Associate Dean. Only grades considered the equivalent of C or better will be accepted in work done at another institution.

COURSE LOADS

a) A full-time student in satisfactory standing will normally have a course load of 15 credits per term.

b) Entering students may be authorized by the Associate Dean to take up to 18 credits per term if their record upon entering the program warrants it.

c) Full-time students whose grade point average the preceding year was 3.0 or better may take 18 credits per term.

d) Full-time students on probationary standing will have a course load of 12 credits per term, and may add to this a repeated course in which a grade of D or F was obtained at the first attempt. A student on probation is not permitted to hold any executive position in campus organizations, nor engage in intercollegiate sports.

e) Only full-time students in satisfactory standing will be eligible to register for Honours programs, or to compete for prizes, scholarships, or bursaries.

EXAMINATIONS

a) Students may write examinations in English or French.

b) Final examinations in all courses are held during an examination period immediately following the end of lectures. In some courses, there is no final examination; standing in these courses is determined by the instructor on the basis of term work or class tests.

c) No student will be permitted to write an examination in any course unless he has fulfilled the requirements of the course to the satisfaction of the instructor.

d) Supplemental examinations are no longer offered in day-time undergraduate courses administered by the Faculty of Management. A student wishing to up-grade his/her standing in a course may repeat the course in a subsequent term, and will be required to complete all course requirements to the satisfaction of the instructor.

e) Students whose circumstances suggest they deserve deferred examination privileges (such as cases of authenticated medical reasons, personal affliction, etc.) should apply in writing to the Associate Dean within SEVEN days of the final examination for such deferred examination privileges. If approved, such a deferred examination will generally be written within two weeks of the original final examination date, although special arrangements may be made where a student has an authenticated case of long-term illness.

f) In a case where a student feels that an error has been made in arriving at his final grade, he will complete a Verification Request Form

in the Student Affairs Office, requesting the instructor to carry out a detailed check that all questions have been marked, that class work has been adequately counted toward the final grade, and that the final grade has correctly been computed on the basis of the term work, final examination, etc. The Verification Request for a Fall term course must be made before the end of the following January, and for Winter or Summer Session courses must be made before the end of the following September. No fee will be required of the student for this verification.

If the student still feels that an error is present in his/her grade, he/she will complete a Re-read Request Form in the Student Affairs Office, requesting that a formal re-read in his/her paper be undertaken. On this form, the student will state the reason that he/she feels the mark is not justified, and will indicate his/her understanding of the marking scheme and his/her term grade earned, to the best of his/her knowledge. The student will pay a $10 fee for this re-read.

A second reader will be appointed, and will review the examination paper and several other papers in the same general mark range, and will be concerned with actual errors of marking, whether they be errors of omission or judgement. The recommendation of the second reader will stand, whether this recommendation involves an up-grading or a down-grading of the original mark. In a case where the original mark has been up-graded, the $10 re-read fee will be refunded to the student.

LETTER GRADES

The following letter grade and rating will be used in assessing course results:

A	(80% – 100%)	4	Satisfactory
B	(65% – 79%)	3	
C	(55% – 64%)	2	
D	(45% – 54%)	1	Conditional Pass
F	(less than 45%)	0	Failure

K -incomplete; see incomplete courses section below

KF -failed to meet the extended deadline for submission of work in a course; counts as a failure in the GPA and CGPA

K* -further extension granted

J -absent; the student is registered for a course but does not write the examination or do other required work. The J will be calculated as a failure in the GPA and CGPA.

W -withdrew; a course dropped, with permission after the change of course period before the withdraw deadline. Does not enter into the GPA calculation.

WF -withdrew failing; a course dropped, with special permission after Faculty deadline for Withdrawal from Course. Does not enter into GPA calculation.

L -deferred; see section on deferred exams.

Q -course continued in next term.

INCOMPLETE COURSES

If, in the instructor's opinion, there is sufficient reason to permit a delay in the submission of required term work, an extension of deadline of up to four months after the end of the course may be granted. In this case, the instructor will submit a grade of "K" (incomplete). If a new grade is submitted within the deadline by the instructor, this will appear on the student's Faculty reports and verification forms following the K and will replace the K on the student's official transcript.

If the required work is not completed before the deadline, the grade KF will be recorded. (KF denotes a failed course and has the same effect on the GPA as an F).

In exceptional circumstances, and with the approval of the Associate Dean, the four month deadline may be extended further, in which case the grade of "K*" will appear.

A student who has not, without accepted reason, participated or written the final examination in a course for which he or she has registered may be given a grade of J (absent). In the calculation of the GPA, this is treated as an F.

GRADING AND CREDIT SYSTEM

A grade of C or better is required for all courses which are prerequisite to further courses in the student's program. In addition, students will be required to obtain a satisfactory grade (C or better) in all core courses. The only exception will be that one D in each academic year will be tolerated in the student's core program, provided that course is not a prerequisite to further courses in his/her program. If two or more D's are obtained in core courses, the excess over the single allowable D must be improved. A failure carries no credit towards the degree. A grade of D is considered a pass only when it is a terminal course.

GRADE POINT AVERAGE

A grade point average (a weighted average of the ratings obtained in all courses taken during the preceding session, with the number of credits per course serving as the weight for the course) will be computed in May of each year.

The cumulative grade point average (CGPA) will include all courses taken by the student from the beginning of his program. A student is required to have a CGPA of 2.0 or better upon graduation.

The student's standing will be determined on the basis of his annual grade point average (GPA) as follows:

Satisfactory standing – 2.0 or better

Probationary standing – 1.5 – 1.99 for U2-U3 students; 1.2-1.99 for U1 students.

Unsatisfactory standing – less than 1.5 for U2-U3 students; less than 1.2 for U1 students. This includes students who have failed to improve their probationary standing after one term.

The cumulative grade point average (CGPA) will include all courses taken by the student from the beginning of his program.

PROBATIONARY STANDING

A student on probationary standing registers for a maximum of 12 credits of new course material per term, and must achieve by the end of that year either a CGPA of 2.0 or better, or a GPA for that year of 2.5 or better. Otherwise the student's standing becomes unsatisfactory. A student on probation is not permitted to hold any executive positions in campus organizations, nor engage in inter-collegiate sports.

UNSATISFACTORY STANDING

A student whose standing is unsatisfactory will be required to withdraw from the Faculty unless there are extenuating circumstances, in which case he/she may appeal to the Associate Dean for permission to continue.

ACADEMIC RECORD

a) The student's transcript will include a listing of the courses taken and the letter grades obtained.

b) If a letter grade of D or F is subsequently improved upon, both the initial and final grade will appear on the transcript.

SUMMER SESSION

Each summer, from mid-May to mid-August, most Primary and Secondary Core courses and several elective courses are offered by the Faculty of Management for full credit. They are available to Management students, and to students from other faculties and universities with the necessary course prerequisites. In addition, the University offers a number of courses in various disciplines at different levels during the summer. Information on Management Summer courses is available from the Office of the Associate Dean or from the Summer Session Office, F. Cyril James Building.

LANGUAGE POLICY

The language of instruction at McGill is English. Students may if they wish write term papers and answers to examinations in French, but competence in English is essential to success at the University. It is recommended that students who lack fluency in English take a course in English as a second language at McGill's Summer Session or elsewhere before embarking on a university program of studies.

PLAGIARISM

In submitting work in their courses, students should remember that plagiarism is considered to be an extremely serious offence. If a student has any doubt as to what might be considered "plagiarism" in preparing an essay or term paper, he or she should consult the instructor of the course to obtain appropriate guidelines.

SPECIAL FACILITIES

Students with visual or other disabilities should consult the Office of the Associate Dean about the possibility of special examination facilities.

8. CURRICULUM FOR THE BACHELOR OF COMMERCE PROGRAM

I. GENERAL PROGRAM

1. PRIMARY CORE (42 CREDITS)
2. SECONDARY CORE (12 CREDITS)
3. CONCENTRATION (18 CREDITS)
4. NON-MANAGEMENT ELECTIVES (12 CREDITS)
5. FREE ELECTIVES (6 CREDITS)

II. B. COM. WITH MAJOR

1. PRIMARY CORE (42 CREDITS)
2. MAJOR REQUIREMENTS AS PER DISCIPLINE
3. UNRESTRICTED ELECTIVES

III B. COM. WITH HONOURS

1. PRIMARY CORE (42 CREDITS)
2. HONOURS REQUIREMENTS AS PER DISCIPLINE
3. UNRESTRICTED ELECTIVES

IV. B. COM. WITH FOOD SERVICES ADMINISTRATION OPTION.

1. PRIMARY CORE (42 CREDITS)
2. CONCENTRATION (18 CREDITS)
3. FOOD ADMINISTRATION COURSES (30 CREDITS)

CURRICULUM FOR THE B. COM. — GENERAL PROGRAM

The student who has been admitted to a 90 credit program will follow the curriculum set out below. A student wishing to depart from this program must obtain written permission from the Associate Dean. The FIVE components of the program are:

PRIMARY CORE

A total of 42 credits is taken in common by all students in the program. This involves 33 credits offered by the Faculty, and 9 credits offered by other Departments. Courses normally taken in the first year (U1) are Accounting I, Social Psychology, Organizational Behaviour, Principles of Economics (Economics Department), Statistics I and II, Applied Matrix Algebra (Mathematics Department). Courses normally taken in the second year (U2) are – Organizational Theory or Policy, Managerial Economics, Finance I, Marketing Management, Management Information Systems, Operations Research.

SECONDARY CORE

Students are required to complete 12 credits from the following courses which comprise the Secondary Core:

Accounting II, Business Law (6 credits), Business in Society, Computer Based Information Systems, Finance II, Introduction to Industrial Relations, International Business, Marketing Management II, Organizational Theory or Policy

Students who completed Marketing and Society prior to September, 1977 will be permitted to count this course towards their Secondary Core requirements.

Students who complete Joint Concentration Groups are exempted from the Secondary Core.

Note: A given course cannot be counted towards the fulfillment of *both* Secondary Core and a Management Concentration Group.

MANAGEMENT CONCENTRATION GROUP

Each student will elect a total of 18 credits chosen from one of the nine Management Concentration Groups listed below. The elective courses from the Group, together with the breadth provided by the Cores listed above, should enable the student to develop some depth in one particular area in Management.

Accounting
Computers and Systems
Finance
Industrial Relations
International Business
Marketing
Organizational Behaviour and Personnel
Entrepreneurship, Corporate Policy and Smaller Business
Management Science

JOINT CONCENTRATION GROUPS

The student wishing to complete the requirements of two management concentration groups (18 and 15 non-overlapping credits) will be permitted to do so, and will be waived his/her Secondary Core course requirements. He/she must obtain the approval of his/her program from two Faculty Advisers, one from each of the areas involved. A statement will appear on the student's transcript indicating the Concentrations completed.

NON-MANAGEMENT ELECTIVES

Each student is required to complete a certain amount of course material outside the Faculty of Management. The number of credits required is determined by the student's pre-university background.

1. A student with a non-commerce background at CEGEP will be required to take 12 credits outside the Faculty of Management.
2. A student with a commerce background at CEGEP will be required to take 18 credits outside the Faculty of Management.

The student may register for any courses offered in the University outside the Faculty of Management, for which he or she has the required prerequisites, to satisfy the non-Management elective requirements.

UNRESTRICTED ELECTIVES

The remainder of the student's program, usually a total of 6 credits, will be chosen from the complete range of University course offerings, to complete the 90 credits needed for the degree.

EXEMPTIONS

A student who completes core course material with sufficiently high standing before entering the three-year program will, if the courses are judged by the Faculty to be the equivalent of core courses, be granted exemption from the corresponding Primary Core course. A student may replace the exempted course with any elective or higher level course offered in the Faculty for which he/she has the necessary prerequisites. It must be emphasized, however, that while the exemption absolves the student from the need to repeat the course material, he/she receives no reduction in the number of credits needed for the degree.

HONOURS PROGRAMS

HONOURS IN ECONOMICS

Adviser: Professor Handa

An Honours program is available in Economics, as well as a Joint Honours program in Economics and Accounting. The difference between the Honours and Major programs in Economics is not one of quantity but rather of quality, the Honours program involving study in greater depth.

Students who register with the Economics Department for their Honours program at the beginning of their U1 year will take the introductory Honours course, Introduction to Economic Theory, in place of Principles of Economics. However, a student who decides at the beginning of his/her U2 year that he/she wishes to follow the Honours program may be permitted to do so by the Economics Department if he/she has achieved sufficiently high standing in the general course, Principles of Economics. In his/her U2 year, the Honours Economics student will take three Honours courses: History of Economic Thought, Macroeconomics, Economic Statistics. In the final year, he/she will choose three Honours Economics courses.

JOINT HONOURS IN ECONOMICS AND ACCOUNTING

The Joint Honours program in Economics and Accounting will involve all the requirements of the Honours in Economics, with only two Honours Economics courses chosen in the final year. In addition, the student will complete 18 credits in Accounting – courses 271-311, 271-312 and 271-313 and any other three courses in the Accounting Group.

MAJOR PROGRAMS

Major programs are at present available in Economics, Industrial Relations, Management Information Systems, Mathematics and Psychology. Although the requirements for these programs vary from one discipline to another, they all require a student to complete 42 credits of Primary Core in this Faculty and the remainder of their program conforming to the requirements of the relevant department.

Because of the heavier demands of Major programs, a student desiring to pursue a program of this type must declare his/her intention no later than the beginning of his/her second year but preferably at the very beginning of the program. The student is then assigned to an adviser from the appropriate department and a suitable program is worked out.

MAJOR IN ECONOMICS

Adviser: Professor Fenichel

The Major Program in Economics will involve a total of 30 credits, including Economics 154-200D, -300A, -310B, as well as at least 18 credits from other -200, -300 and -400 level courses in Economics. All Major students in Economics will be exempted from the Core course Managerial Economics (280-393).

Statistics I and II may be replaced by 154-317D Economic Statistics in the U1 year, and bring the total of Economics credits in the Major program to 36. For further information, please contact the Economics Department.

MAJOR IN INDUSTRIAL RELATIONS

Adviser: Professor Goldenberg

The Major Program in Industrial Relations allows the student to study the main socio-political and economic forces that affect employer-employee relations at both the macro and micro levels from a practical as well as a theoretical perspective. A wide range of electives, in addition to the required courses, provides the student with considerable flexibility in planning his or her program.

Of the 54 credits required for the Major in Industrial Relations, 18 overlap with the B.Com. Primary Core. These are:

280-221	Social Psychology (3 credits)
280-222	Intro. to Org. Behaviour (3 credits)
280-271	Statistics I (3 credits)
280-272	Statistics II (3 credits)
154-200	Principles of Economics (6 credits)

The following courses constitute a compulsory core in Industrial Relations as such.

279-294	Introduction to Industrial Relations (3 credits)
279-394	Collective Bargaining (3 credits)
279-491	Industrial Relations in Practice (6 credits)
279-492	Public Policy in Ind. Rel. (3 credits)
279-494	Labour Law (3 credits)
279-501	Human Resources in Industrial Society (3 credits)
154-306	Labour Economics and Institutions (6 credits)

At least 9 additional credits must be selected among the following courses to complete the Major requirement:

279-393	Labour Relations in Québec (3 credits)
278-688	Labour Relations in the Public Sector (3 credits)
279-500	Labour and Industrial Relations Theory (3 credits)
154-426	Labour Economics (6 credits)
166-312	Industrial Sociology (3 credits)
272-423	Personnel Administration (3 credits)
272-425	Salary Administration (3 credits)
278-489	Independent Studies in Management (Research project under the guidance of a staff member. U3 students only. Minimum CGPA of 3.0 required. 3 credits)

The choice of courses must be made in consultation with the Major adviser.

MAJOR IN MANAGEMENT INFORMATION SYSTEMS

Adviser: Professor Howson

The Major in Management Information Systems enables the student to concentrate on computer-based information systems courses within the

framework of the Management program. The Computers and Systems Group of the Faculty of Management provides the student with the knowledge of systems analysis and design, and control and management of the computer resource. The School of Computer Science enhances the program by providing the student with the more technical and theoretical aspects of computer systems. Reflecting the many facets of the impact of computer technology, the program also provides flexibility to encourage students to take electives in other departments, from Psychology to Electrical Engineering, that focus on particular aspects of computers and information systems of interest to the student.

All students who wish to major in Management Information Systems must register with the Major adviser.

The basic requirements of the Major are as follows:

1. Primary Core (42 credits)

(Note: This includes two courses which are part of the Major program, Management Information Systems (280-331) and Accounting (280-211) or 280-212). These should be taken in U1.

2. Required Major Courses from Faculty of Management (12 credits)

   (a) 273-332 Computer-Based Information Systems (3 credits)
   (b) 273-333 Systems Analysis & Modelling (3 credits)
   (c) 273-431 Information Systems Design (3 credits)
   (d) 273-432 Information Systems Administration (3 credits)

3. Required Major Courses from School of Computer Science (9 credits)

   (a) 308-210 Computer Structure & Assembly Language (3 credits)
   (b) 308-230 Computers in Data Processing (3 credits)
   (c) 308-315 Information Structures (3 credits)

4. Optional Courses (9 credits)

Optional courses selected, subject to the approval of the Major Adviser, from the Computers and Systems Group of the Faculty of Management, School of Computer Science course offerings or relevant options in other disciplines (such as Electrical Engineering, Psychology, Sociology, etc.)

5. Unrestricted Electives (18 credits)

The unrestricted electives may be any courses within or outside the Faculty of Management.

MAJOR IN MATHEMATICS

Adviser: Professor S. Melamed

The Major Program in Mathematics involves a program of which 54 credits will be in Mathematics or allied courses, including at least 36 credits taken in the Mathematics Department from an approved list. The various areas of emphasis within the program are Probability and Statistics, Applied Mathematics, Computer Science, and Actuarial Science. Such students will complete the Primary Core program, but will replace Statistics I and II by courses 189-323 and -324.

MAJOR IN PSYCHOLOGY

Adviser: Mr. Arnold Rosner

The Major Program in Psychology involves a 54-credit course sequence involving 30 credits taken in Psychology, one course in Sociology, and seven courses taken in the Faculty of Management. Some of the Management courses are in fact part of the Primary Core, and the remaining Management courses are chosen from a designated list of the Faculty's elective offerings.

OPTION IN FOOD SERVICES ADMINISTRATION

This option has been designed to provide the specialized knowledge needed for a career in the Hospitality Industry. There is a body of administration and operational management concepts and principles that is common to the function of management in any industry. The challenge of a specialized option is to develop in the student the perspective, flexibility and creativity that will enable him or her to meet the vocational aspects of the specialization as well as providing the knowledge and ability to function in the constantly changing environment of management problems and decisions inherent in a complex multi-segmented growing industry. The option has been designed to integrate the general managerial principles and concepts and the specific hospitality applications of these principles and concepts into a core of knowledge that will permit the graduate to be creatively employed with the greatest possible advantage to himself/herself, to the community in which he/she lives, and the industry in which he/she works. The student follows the program as set out below:

Primary Core

as in present B. Com. program
done in U1 and U3 at McGill campus.
(total 42 credits)

Management Concentration Group

complete requirements of any of the 9 Groups
done in U1 and U3 at McGill campus.
(total 18 credits)

Non-Management & Unrestricted Electives

complete 8 required & 2 elective 3 credit courses below
done in U2 at Macdonald College

Required

Food Service Production
Food Facility Layout, Planning & Engineering
Basic Nutrition
Food Service Industry Administration
Food Standards 1
Food Standards 2
Food Microbiology and Sanitation
Food Administration Project

Electives (choose 2)

Instructional Communications 1
Food Products Development
Economics of Agriculture
Farm Production Economics
Renewable Resources Survey
Rural Sociology
Communication Extension Methods
Recreation Resource Management

MANAGEMENT CONCENTRATION GROUPS

ACCOUNTING
COMPUTERS AND SYSTEMS
ENTREPRENEURSHIP, CORPORATE POLICY AND SMALLER BUSINESS
FINANCE
INDUSTRIAL RELATIONS
INTERNATIONAL BUSINESS
MANAGEMENT SCIENCE
MARKETING
ORGANIZATIONAL BEHAVIOUR AND PERSONNEL

Each of the Management Concentration Groups offered has a minimum of 18 credits to be taken from the Group. The student will note that a considerable degree of choice is present within each Group.

In general, the student will begin taking courses from his/her Group by his/her U2 year; however, a student entering U1 year with some exemptions from the Primary Core program may so arrange his/her program to be able to begin his/her Group in his/her U1 year.

An adviser is appointed each year for each Management Concentration Group to assist students in the general question of choosing a Group, and to provide students with additional information for intelligent course selection. See ACADEMIC COUNSELLING.

ACCOUNTING GROUP

Adviser: Professor Marshall

The Accounting Group is made up of nine courses in Accounting (1-9 below) and three courses in related subjects (10-12 below). It is designed primarily to provide a reasonably analytical introduction to accounting and cognate subjects for students seeking careers in industry, government service or the accountancy profession. Students are expected to begin their specialty in U1 with Accounting 280-212; however, those students with a grade B or better in 280-211 who wish to concentrate in Accounting may request special consideration from the Faculty Advisor in Accounting. This special consideration would involve additional work during the summer vacation.

1. FINANCIAL ACCOUNTING I 271-311 (3 credits)
2. FINANCIAL ACCOUNTING II 271-312 (3 credits)
3. FINANCIAL ACCOUNTING III 271-414 (3 credits)
4. BUSINESS TAXATION 271-412 (3 credits)
5. SYSTEMS AND AUDITING 271-413 (3 credits)
6. MANAGEMENT ACCOUNTING I 271-313 (3 credits)
7. MANAGEMENT ACCOUNTING II 271-415 (3 credits)
8. MANAGEMENT ACCOUNTING III 271-416 (3 credits)
9. ACCOUNTING THEORY 271-411 (3 credits)
10. COMPUTER BASED INFORMATION SYSTEMS 273-332 (3 credits)
11. SYSTEMS ANALYSIS AND MODELLING 273-333 (3 credits)
12. INFORMATION SYSTEMS ADMINISTRATION 273-432 (3 credits)

Students who intend to enter the accountancy profession as Chartered Accountants or who are preparing for careers in industry or government service should take courses 1 to 7 above. Students intending to continue studies after graduation towards a professional accounting diploma may gain exemptions from the required professional qualifying courses if they so desire. The program for such students, entering the B.Com. program with no exemptions would be as given below. It is not necessary to take all these courses as degree requirements, but this program would provide the maximum exemptions available for professional accounting diploma requirements.

Primary Core

U1 Accounting 280-212;
Principles of Economics;
Social Psychology;
Introduction to Organizational Behaviour;
Statistics I and II,
Applied Matrix Algebra

U2 Finance I, Managerial Economics,
Management Information Systems,
Operations Research

U3 Marketing Management I,
Organizational Theory

Secondary Core

U3 Computer Based Information Systems, Entrepreneurship and Corporate Policy, Business Law (6 credits)

Management Concentration Group

U2 Financial Accounting I and II
Management Accounting I and II

U3 Financial Accounting III
Systems & Auditing
Business Taxation,

Non-Management Elective

U1 6 credits
U2 6 credits
U3 6 credits if required

Free Electives

U3 3 credits, if necessary

PROFESSIONAL ACCOUNTING DIPLOMAS
(C.A., C.G.A., R.I.A.)

McGill B.Com. graduates who wish to qualify for a professional accounting diploma are required to register with the respective Order or Corporation, to follow a specified program of studies which is available through the McGill Centre for Continuing Education, and to write a final professional examination. Related work experience under the control of the Order or Corporation is also required.

For further information, students should consult the Centre for Continuing Education, Strathcona Hall, 772 Sherbrooke Street, West, and the Association of their choice. Their offices are located as follows:

The Order of Chartered Accountants of Québec,
680 Sherbrooke West, 7th Floor,
Montreal H3A 2S3
Telephone: 288-3256

Corporation of Industrial Accountants of Québec,
1509 Sherbrooke Street, West, Suite 15,
Montreal H3G 1L7.
Telephone: 932-7144

The Corporation of Certified General Accountants,
5165 Queen Mary Rd., Suite 512,
Montreal H3W 1X9
Telephone: 487-3544

LANGUAGE REQUIREMENT FOR PROFESSIONS

Québec law now requires that candidates seeking admission to provincially-recognized professional corporations* must possess a working knowledge of the French language, i.e. be able to communicate verbally and in writing in that language.

To demonstrate this capability, a candidate will normally be required to pass an examination set by the Régie de la langue française, unless he or she can show that three years of instruction in a French post-primary school have been completed. The professional corporation will require this proof of attendance or of succesful completion of the Régie examination.

This examination shall test the candidate's mastery of oral and written comprehension and expression in French. The contents may vary in accordance with the current terminological requirements of the profession or professional group. Examinations will take place four times a year, and they may be attempted an unlimited number of times.

In special cases where the candidate can clearly demonstrate to the Régie by means of an interview that a true mastery of French exists, the examination requirement may be waived.

Information on the testing program of the Régie may be obtained by writing to: Régie de la langue française, 800, Place Victoria, 16ieme étage, Montréal, P.Q., H4Z 1G8, Telephone 873-6571.

Students who need to acquire a functional level of proficiency in French may register in courses at either the French Language Centre, 3438 McTavish Street, Telephone 392-5727, for courses during the day, or at the Centre for Continuing Education, 772 Sherbrooke Street West, Telephone 392-4901, for courses in the evening.

Students already proficient in French but who wish to keep up practice may register in courses at the Department of French Language and Literature, 3460 McTavish Street, Telephone 392-4577, or at the Centre d'études canadiennes-françaises, 3475 Peel Street.

* McGill degrees and diplomas currently give access to corporations regulating the activities of the following professional groups:

Advocates
Agrologist
Architects
Chartered Accountants
Chartered Administrators
Chartered Appraisers
Chemists
Dentists
Dietitians
Engineers
Industrial Administration Accountants
Industrial Relations Counsellors
Licensed General Accountants
Notaries
Nurses
Occupational Therapists
Physicians
Physiotherapists
Psychologists
Social Workers
Speech Therapists & Audiologists
Urbanists
Vocational Guidance Counsellors

COMPUTERS AND SYSTEMS GROUP

Adviser: Professor Howson

The objectives of the group concentration is to provide students with a technical and conceptual foundation in the design and development of computer-based information systems for control and management of the organization. The group concentration is a basic program for both the developer and user of information systems. For students strongly interested in a career in the field, it is recommended that the Major in Management Information Systems be considered.

Students are required to take the two courses in Category A, one course in Category B, and at least three courses from Category C. The Core Course 280-331 should be taken in U1.

CATEGORY A:

273-332 COMPUTER BASED INFORMATION SYSTEMS (3 credits)
273-431 INFORMATION SYSTEMS DESIGN (3 credits)

CATEGORY B:

308-210 COMPUTER STRUCTURE AND ASSEMBLY LANGUAGE (3 credits)
308-230 COMPUTERS IN DATA PROCESSING (3 credits)

CATEGORY C:

273-333 SYSTEMS ANALYSIS AND MODELLING (3 credits)
273-432 INFORMATION SYSTEMS ADMINISTRATION (3 credits)
273-433 CONTROL AND VERIFICATION OF COMPUTER SYSTEMS (3 credits)
273-434 ADVANCED TOPICS – COMPUTER SYSTEMS APPLICATIONS (3 credits)
273-435 MINICOMPUTERS, MICROPROCESSORS AND THEIR APPLICATIONS (3 credits)

or one other option in Category B

OTHER RECOMMENDED COURSES

1. Non-Management Electives

Given by the School of Computer Science (At least two of these courses strongly recommended as non-management electives for students interested in starting a career in the systems field)

308-230 INTRODUCTION TO BUSINESS DATA PROCESSING (3 credits)
308-315 INFORMATION STRUCTURES (3 credits)
308-320 FILES AND DATA BASES (3 credits)
308-300 PROGRAMMING LANGUAGES (3 credits)

2. Unrestricted Electives

271-313 MANAGEMENT ACCOUNTING (3 credits)

FINANCE GROUP

Advisers: Professors Eger, Fewings, Fowler, Rorke

Students completing the Finance Concentration are strongly recommended to satisfy the Secondary Core requirements by taking:

Finance II
Computer Based Information Systems
Business Law

In addition, courses may be selected as follows:

CATEGORY B	6 credits
CATEGORY C	6 credits
CATEGORY D	6 credits

Students completing the Finance Concentration with a joint concentration *other than Accounting* may choose courses according to the following:

CATEGORY A	3 credits
CATEGORY B	6 credits
CATEGORY C	3 credits
CATEGORY D	6 credits

Students completing the Finance Concentration jointly with an *Accounting* Concentration may choose courses as follows:

CATEGORY A	3 credits
CATEGORY B	6 credits
CATEGORY C	9 credits

NOTE: Students selecting courses with a possible Finance Concentration in mind are advised to pay careful attention to prerequisites and their timing to ensure flexibility. Such students are advised to choose course 280-212 instead of course 280-211 in Accounting because the latter does not meet all the prerequisite requirements of the first 5 courses in Category D above without additional work during the summer. Students are advised to carefully consider which courses in Category D they intend to complete in their U-2 year.

As a transition provision, previous calendar regulations may be followed by students who have completed Finance II prior to September 1977.

Subject to the transition provision, a grade of C or better is required in every course to be counted in the Finance Concentration credits as outlined above and in every course required as a prerequisite to such a course:

CATEGORY A

274-342 Finance II (3 credits)

CATEGORY B

274-441 Investments and Portfolio Management (3 credits)
274-443 Applied Corporate Finance (3 credits)

CATEGORY C

274-442 Capital Markets and Institutions (3 credits)
274-444 Insurance and Risk Management (3 credits)
274-482 International Financial Management (3 credits)

274-445 Real Estate Finance (3 credits)
278-484 Intermediate Business Law (3 credits)
271-412 Business Taxation (3 credits)
271-415 Management Accounting II (3 credits)
271-416 Management Accounting III (3 credits)
Others with adviser approval

CATEGORY D

{271-311 Financial Accounting I
271-312 Financial Accounting II}

or

{271-313 Management Accounting I and another course from Category C}

or (with an adviser's permission)

{271-213 Accounting II and another course from Category C}

INDUSTRIAL AND LABOUR RELATIONS GROUP

Adviser: Professor Goldenberg

The objective of this concentration is to provide a general understanding of the factors affecting employer-employee relations, both at the micro-level and in relation to the socio-economic context in which they occur. Students interested in more intensive study of this area are urged to consider the Major Program in Industrial Relations.

Students in the Industrial and Labour Relations Concentration are required to take all courses in Category A and must select at least 9 credits from the courses in Category B.

CATEGORY A:

279-294 Introduction to Industrial Relations (3 credits)
279-394 Collective Bargaining (3 credits)
279-492 Public Policy in Industrial Relations (3 credits)

CATEGORY B:

279-393 Labour Relations in Québec (3 credits)
279-491 Industrial Relations in Practice (6 credits)
279-500 Labour and Industrial Relations Theory (3 credits)
278-688 Labour Relations in the Public Sector (3 credits)
272-423 Personnel Administration (3 credits)
272-425 Salary Administration (3 credits)
279-494 Labour Law (3 credits)
279-501 Human Resources in Industrial Society (by permission of the instructor)(3 credits)

The following courses are recommended as Non-Management Electives:

154-306 Labour Economics and Institutions (6 credits)
166-312 Industrial Sociology (3 credits)

INTERNATIONAL BUSINESS GROUP

Adviser: Professor Wright

The objective of the group is to help the student develop conceptual and analytical skills necessary to formulate feasible and effective management policies in an international setting.

The International Business Group may be elected *only* as a joint concentration i.e., the student choosing the International Business Group must also satisfy the requirements of another Management concentration group.

The program requirements for the International Business Management concentration group are as follows:

(a) At least 12 credits from among the following courses offered by the Management and Law Faculties.

1. INTRODUCTION TO INTERNATIONAL BUSINESS 278-382 (3 credits)
2. INTERNATIONAL BUSINESS POLICY 278-383 (3 credits)
3. INTERNATIONAL MARKETING MANAGEMENT 278-483 (3 credits)
4. INTERNATIONAL FINANCIAL MANAGEMENT 278-482 (3 credits)
5. THE MULTINATIONAL CORPORATION: LAW, ECONOMICS, AND MANAGEMENT 492-437 (3 credits)

Courses 1 and 2 will normally be taken in the U2 year. Courses 3, 4, or 5 will be taken in the final year. (Course 5 is open only to U-3 students with permission from the Admissions Officer, Faculty of Law).

(b) At least three credits of upper-level international or area courses offered by the Economics Department. Appropriate courses include the following:

1. THE MODERN ECONOMIC HISTORY OF SOUTH ASIA 154-301 (3 credits)
2. POLITICAL ECONOMY OF DEPENDENCE IN THE WESTERN HEMISPHERE 154-312 (6 credits)
3. ECONOMIC DEVELOPMENT 154-313 (6 credits)
4. AFRICAN ECONOMIC DEVELOPMENT 154-314 (3 credits)
5. ECONOMIC DEVELOPMENT OF CHINA 154-315 (3 credits)
6. ECONOMIC DEVELOPMENT OF RUSSIA AND THE USSR 154-331 (3 credits)
7. ECONOMIC HISTORY OF CHINA AND JAPAN 154-341 (3 credits)
8. ECONOMIC HISTORY OF LATIN AMERICA 154-402 (3 credits)
9. ECONOMIC DEVELOPMENT IN LATIN AMERICA 154-403 (3 credits)
10. COMPARATIVE ECONOMIC SYSTEMS 154-421 (6 credits)

11. INTERNATIONAL TRADE AND FINANCE 154-423 (6 credits)
12. INTERNATIONAL ECONOMIES 154-453 (6 credits)

(c) At least three credits of upper-level international or area courses offered by the Political Science Department. Appropriate courses include the following:

1. POLITICS OF LATIN AMERICA 160-319 (6 credits)
2. REFORM AND REVOLUTION IN SOUTH ASIA 160-322 (3 credits)
3. POLITICS AND GOVERNMENT IN EAST ASIA 160-323 (3 credits)
4. POLITICS AND GOVERNMENT IN AFRICA 160-324 (6 credits)
5. EUROPEAN GOVERNMENT AND POLITICS 160-328 (6 credits)
6. THE POLITICAL SYSTEM OF THE USSR 160-329 (3 credits)
7. NON-WESTERN POLITICAL PHILOSOPHY 160-332 (6 credits)
8. CONTEMPORARY INTERNATIONAL SYSTEMS: LATIN AMERICA 160-343 (3 credits)
9. CONTEMPORARY INTERNATIONAL SYSTEMS: EUROPE 160-344 (3 credits)
10. INTERNATIONAL ORGANIZATION 160-345 (3 credits)
11. POLITICS AND FOREIGN POLICY OF ISRAEL 160-347 (3 credits)
12. CONTEMPORARY INTERNATIONAL SYSTEMS: THE MIDDLE EAST 160-348 (3 credits)
13. CONTEMPORARY INTERNATIONAL SYSTEMS: ASIA 160-349 (3 credits)

The Economics and Political Science courses may be taken at any time; it is recommended, however, that they be taken as early in the student's program as possible. The student should try, where feasible, to take an Economics course and a Political Science course both of which focus on the same geographic region, thus, acquiring an interdisciplinary familiarity with a given area. With permission of the adviser, a suitable upper-level course of foreign or international content from another field such as History, Sociology, or Law may be substituted for the Political Science option.

MARKETING GROUP

Adviser: Professor Cooper

The Marketing Group offers a wide variety of Marketing courses to enable the student to tailor his/her program to meet individual needs, interests and career aspirations. A minimum of 18 credits must be selected from the list of Marketing electives.

Marketing Research is a required course and should be taken in U2. The student is also required to take a minimum of one course from *each* of the four categories (A to D) listed below, plus a minimum of one other Marketing course from any of the categories.

REQUIRED:

1. Marketing Research – 275-451 (3 credits)

CATEGORY A

2. Consumer Behaviour – 275-452 (3 credits)
3. Marketing Management II – 275-354 (3 credits)
4. Marketing Effectiveness – 275-356 (3 credits)

CATEGORY B

5. Advertising Management – 275-453 (3 credits)
6. Sales Management – 275-455 (3 credits)
7. Physical Distribution – 275-353 (3 credits)

CATEGORY C

8. Industrial Marketing – 275-456 (3 credits)
9. Retail Management – 275-459 (3 credits)
10. International Marketing Management – 278-483 (3 credits)
11. Industrial Purchasing – 275-460 (3 credits)

CATEGORY D

12. Marketing Planning I 275-357 (3 credits)
13. Marketing Planning II – 275-358 (3 credits)
14. Advanced Topics in Marketing Research 275-457 (3 credits)
15. Quantitative Analysis for Marketing Decisions 275-458 (3 credits)
16. Marketing and Society – 275-351 (3 credits)

The sequencing of courses is as follows:

Marketing Research:	U2
Category A:	U2
Category B:	U2 or U3
Category C:	U3
Category D:	U3

Certain courses in Categories B, C and D may require prerequisites in other Categories and the student is advised to plan the sequence of courses carefully. Marketing Management I (the primary core or equivalent) is a prerequisite for all other Marketing courses.

Note: Marketing Management II can be counted *either* as a Secondary Core course *or* a Marketing elective but *not both*. Students treating Marketing Management II as a Secondary Core course must take another course in Category A.

ORGANIZATIONAL BEHAVIOUR AND PERSONNEL GROUP

Adviser: Prof. Gorn

CATEGORY A:

Students must take at least 6 credits from this category.

1. Group Dynamics and Interpersonal Relations 272-420 (3 credits)
2. Strategies of Organizational Development 272-421 (3 credits)
3. Creativity, Innovations and Management 272-422 (3 credits)
4. Seminar in Organizational Strategy 276-465 (3 credits)

5. Leadership Style and Organizational Stress 272-521 (3 credits)
6. Personnel Administration 272-423 (3 credits)
7. Salary Administration 272-425 (3 credits)

CATEGORY B:

8. Introduction to Industrial Relations 279-294 (3 credits)
9. Collective Bargaining 279-394 (3 credits)
10. Labour Relations In Practice 279-393 (3 credits)
11. **Industrial Sociology 166-312 (3 credits)
12. Consumer Behaviour 275-452 (3 credits)
13. Marketing Research 275-451 (3 credits)
14. *Nature and Measurement of Human Abilities 204-310 (3 credits)
15. *Psychological Tests and Measurement 204-406 (3 credits)
16. **Applied Sociology 166-337 (3 credits)
17. **The Study of Organizations 166-420 (3 credits)
18. Human Resources in Industrial Society 279-501 (3 credits)

*** Offered by the Psychology Department**
****Offered by the Sociology Department**

Students in this group choosing Psychological Tests and Measurement and/or Nature and Measurement of Human Abilities will not be required to take Introductory Psychology, but should notify the course instructors that Introductory Psychology has not, in fact, been taken. Students are also strongly advised to take at least one course in Industrial Relations.

ENTREPRENEURSHIP, CORPORATE POLICY AND SMALLER BUSINESS GROUP

Adviser: Professor Pugsley

The student takes the following *three* courses:

1. Accounting II 271-213 (3 credits)
2. Entrepreneurship and Corporate Policy 276-463 (3 credits)
3. Smaller Business 276-464 (3 credits)

In addition, it is recommended to take a total of nine credits chosen from the following:

4. Strategic Planning 276-466 (3 credits)
5. Business Taxation – 271-412 (3 credits)
6. Seminar in Organizational Strategy 276-465 (3 credits)
7. Creativity, Innovation and Management 272-422 (3 credits)
8. Business Law 278-384 (6 credits)
9. Sales Management 275-455 (3 credits)
10. Leadership Style and Organizational Stress 272-521 (3 credits)
11. Intermediate Business Law 278-484 (3 credits)
12. International Business Policy 278-383 (3 credits)

(Note: If Entrepreneurship and Corporate Policy 276-463 is taken towards Secondary Core requirements, then the student must choose 12 credits from courses 4 — 12.)

The student is recommended to consider one or two approved economics courses among his/her electives.

Unlike the other groups which, by their names, suggest a relationship with particular professions or departments of sizeable corporations, this group is intended for the student who is inclined toward small business and the objective of hopefully coming to own such a business, with the rewards and hazards this usually involves. Because the group spans several areas rather than concentrating and examining in depth as the other group selections do, some measure of coordination is necessary. The student in this group therefore, may, depending on the other courses he/she has chosen, be required to do a project study in his/her final year on some particular small or medium-sized company or industry that consists mostly of small business units, and this project report will be supervised by the group adviser.

MANAGEMENT SCIENCE GROUP (QUANTITATIVE METHODS)

Adviser: Professor Yalovsky

1. APPLIED DETERMINISTIC OPTIMIZATION 277-679 (3 credits)
2. APPLIED SEQUENTIAL OPTIMIZATION 277-680 (3 credits)
3. SIMULATION OF MANAGEMENT SYSTEMS 277-678 (3 credits)
4. SAMPLE SURVEY METHODS & ANALYSIS 277-632 (3 credits)
5. APPLIED MULTIVARIATE DATA ANALYSIS 277-676 (3 credits)
6. APPLIED TIME SERIES ANALYSIS FOR MANAGERIAL FORECASTING 277-675 (3 credits)
7. REGRESSION MODELS IN MANAGEMENT 277-634 (3 credits)
8. APPLIED DECISION ANALYSIS 277-633 (3 credits)
9. OPERATIONS MANAGEMENT 277-472 (3 credits)
10. TOPICS IN QUANTITATIVE ANALYSIS 277-471 (3 credits)
11. Courses in other DEPARTMENTS (up to 6 credits)

The student must choose a total of 18 credits from the above list. Students who want to acquire a better theoretical foundation in Management Sciences are urged to take courses in the Mathematics Department and the School of Computer Science. Students who want to follow a program of more applied studies are urged to consider courses 1-10. Courses 1-8 are currently offered jointly with MBA students in the Faculty. Students having an interest

in applications of Management Sciences in fields allied with Management are encouraged to consider quantitative course selections in other Faculties such as Economics, Engineering, etc.

All courses selected from outside the Faculty should be chosen in consultation with the Group Adviser and with his formal approval. Students are encouraged to select courses for their non-Management electives which contribute to Management Sciences. For instance, a Major program in Mathematics may be developed by students having an interest in a better preparation in Mathematics. Details of the Major requirements can be obtained from the Group Adviser.

9 UNDERGRADUATE COURSES OF INSTRUCTION

SPECIAL NOTE

Course numbers are seven characters in length (see illustration below).

280 – 3	2	3	B	
F1	F2	F3	F4	F5

Field 1 – Involves a three-digit number designating the department or group within the University offering the course. In the Faculty of Management the following association of numbers and subject areas will be used.

271	Accounting
272	Behavioural Science
273	Computers and Systems
274	Finance
275	Marketing
276	Policy
277	Management Science
278	General
279	Industrial Relations
280	Primary Core

Field 2 – is a number which designates the level at which the course is usually taken.

Number	Year usually taken in
2	U1
3	U2
4	U3

Field 3 – designates the subject area, being the third digit of Field 1 for elective courses.

Field 4 – designates the sequential number of the course in that subject and year.

Field 5 – is a letter designating the time of year the course is given.

A:	duration Fall term only
B:	duration Winter term only
D:	duration through Fall and Winter terms
L:	duration Summer Session Part I
C:	duration Summer Session Part II

When no term is designated the course is in some years offered in the first term and in others in the second, or in both. An up-to-date schedule should be consulted.

The number of credits that a course carries is not indicated in the course number; in the following course descriptions the course credits are indicated separately.

Example: The course number 280-323B denotes a course offered by the Faculty of Management, part of the Primary Core, usually taken in the U2 year, in Behavioural Science, the third course in that subject, given in the second term. This corresponds to Organizational Theory.

PRIMARY CORE COURSE DESCRIPTIONS

All Management courses are sectioned. Slips must be picked up in Room 453 before Registration.

154-200 ECONOMIC ANALYSIS AND APPLICATIONS. (6 credits). An introduction to the study of economics, including price theory, national income determination, money and banking, international economic relations, and economic policy.
(Offered by the Economics Department)

189-224 APPLIED MATRIX ALGEBRA. (3 credits). Matrix addition and multiplication. Partitioning into blocks. Trace and determinant. Simultaneous linear equations. Rank and inverse. Symmetric matrices, and their eigenvalues and eigenvectors; reduction to diagonal form. Positive definite and semi-definite matrices quadratoc forms. Applications to and examples in operations research, linear programming and statistics, with use of the computer. *Intended for students interested in applications of matrix algebra to Management, Social Science, and similar fields.*

280-211 ACCOUNTING I. (3 credits). For students not intending to specialize in the subject. An introduction to business accounting, considered as an information system serving the decision needs of investors and lenders (financial reporting).

280-212 ACCOUNTING FOR SPECIALISTS. (3 credits). For students intending to specialize in the subject. An introduction to the elements of financial accounting and accounting theory.

280-221 SOCIAL PSYCHOLOGY. (3 credits). Method and theories of analysing individual and small group behaviour. Topics include person perception, social motivation, attitudes, conformity, group structure, group dynamics and leadership

phenomena. Experimental approach to social behaviour is emphasized.

280-222 INTRODUCTION TO ORGANIZATIONAL BEHAVIOUR. (3 credits). *(Prerequisite: 280-221).* The social psychology of organizations, the relationship of man to the organization in which he works, his motivation, attitudes and involvement in his work. Theories of perception, motivation and leadership as they relate to organizational problems.

280-271 STATISTICS I. (3 credits). *(Prerequisite: 6 credits in calculus).* The course introduces the student to statistical concepts and methodology, demonstrates their application to management problems, and constitutes a foundation for further study in the subject. Topics include: descriptive statistics and statistical inference; probability theory, random processes, some important discrete and continuous probability distributions, sampling distributions, introduction to decision theory, index numbers.

280-272 STATISTICS II. (3 credits). *(Prerequisite: 280-271).* Decision theory, hypothesis testing and estimation, goodness-of-fit tests, analysis of variance, sample surveys and experimental design, simple and multiple regression and correlation analysis, time series.

280-323 ORGANIZATIONAL THEORY. (3 credits). *(Prerequisites: 280-221, 222).* The organization as a unit of analysis. Analysis of organizations as distinctive collectivities through an understanding of theories and problems of organization. Contributions of psychology, sociology and economics towards solving organizational problems of adaptation authority and power, conflict resolution, etc.

280-331 MANAGEMENT INFORMATION SYSTEMS. (3 credits). This course provides an introduction to computer systems and program flowcharting. Specific emphasis is placed on developing the ability to program (in Fortran) and utilise the resources available on the McGill time-sharing system. Problems of implementing computer systems in the organization are discussed.

280-341 FINANCE I. (3 credits). *(Prerequisites: 280-271, 280-211 or 212, 154-200D).* An introduction to financial management and the role of finance, both within the firm and the economy as a whole. The institutional framework of the firm is discussed, including legal forms, taxes, financing instruments and the capital markets. An introduction to the analytics of finance is presented including the pricing of financial instruments, simple models of capital market equilibrium, the financial structure of the firm, cost of capital, dividend policy, investment criteria for new capital spending proposals, and working capital management.

280-352 MARKETING MANAGEMENT I. (3 credits). An introduction to marketing principles and management, focusing on the problems of the marketing manager in the measurement of market opportunities and the allocation of the marketing effort. Emphasis is on decision-making in a marketing context. Topics covered include: the marketing concept; marketing strategies; marketing research; buyer behaviour; product and price policies; advertising, distribution and sales force decision. The course relies on lectures, text material and case studies.

280-373 BASIC OPERATIONS RESEARCH. (3 credits). *(Prerequisite: 280-271).* Topics covered include: Introduction to Decision Analysis and Risk Attitudes, Linear Programming and Simulation. The course stresses the formulation of problems and their solution by standard methods or by computer packages.

280-393 MANAGERIAL ECONOMICS. (3 credits). *(Prerequisite: 154-200).* The course focuses on the application of economic theory to management problems and the economic foundations of marketing, finance, and production. Attention is given to the following topics: price and cost analysis, demand and supply analysis.

ELECTIVE COURSES IN THE FACULTY OF MANAGEMENT

NOTE: Elective courses in a particular area always have as prerequisite that area's core courses (Core Course Descriptions section); students not in the Faculty of Management may ask permission of the instructor if they wish to have the prerequisite waived. Whenever other prerequisites exist they are listed.

All Management courses are sectioned. Slips must be picked up in Room 453 before Registration.

271-213 ACCOUNTING II. (3 credits). *(Prerequisite 280-211 or 280-212).* This course is intended for those who do not intend to become Accounting specialists, but desire some further knowledge of the subject. The course will deal with Accounting as an aid to Management in the planning and control of operations (Managerial Accounting).

271-311 FINANCIAL ACCOUNTING I. (3 credits). *(Prerequisite: 280-212 or permission of Instructor).* A detailed examination of the problems of measurement, recording and reporting of assets and related revenues and expenses.

271-312 FINANCIAL ACCOUNTING II. (3 credits). *(Prerequisite: 271-311).* A continuation of Financial Accounting I, examining problems of liabilities and owner's equity.

271-313 MANAGEMENT ACCOUNTING I. (3 credits). *(Prerequisite: 280-211 or 280-212).* Cost accounting, budgeting and budgetary control, standard costing, breakeven analysis, variable costing, costs for decision-making.

271-411 ACCOUNTING THEORY. (3 credits). *(Prerequisite: 271-312).* The course will focus on developing a cohesive body of postulates which describe the discipline of accounting. A normative model (as opposed to positive) will provide the foundation for this endeavor.

271-412 BUSINESS TAXATION. (3 credits). *(Prerequisite: 271-312).* An examination of Federal income tax and its impact on business operations. The material will cover the tax treatment of individuals, partnerships and corporations, and consideration will also be given to international aspects. Proposals for tax changes since the Carter Commission Report will be reviewed and emphasis will be placed on concepts underlying the most recent legislation.

271-413 SYSTEMS AND AUDITING. (3 credits). *(Prerequisite: 271-312).* The principles of accounting systems design and auditing.

271-414 FINANCIAL ACCOUNTING III. (3 credits). *(Prerequisite:* 271-312). Advanced topics in financial accounting.

271-415 MANAGEMENT ACCOUNTING II. (3 credits). *(Prerequisite:* 271-313). A critical evaluation of accounting control systems and some related quantitative business controls. Conceptual and measurement problems in evaluating performance, including problems of decentralization. Control of the data-information flow.

271-416 MANAGEMENT ACCOUNTING III. (3 credits). *(Prerequisite:* 280-373). A survey of planning and decision concepts and models with a view to specifying the relevant data or information for planning and a number of common classes of business decisions.

272-420 GROUP DYNAMICS AND INTERPERSONAL RELATIONS. (3 credits). Students will explore theory, research, and applications relating to group dynamics in task-oriented groups. Students will increase their level of awareness of group dynamics and their skills at functioning in work groups. Teaching/learning methods will include lecture and discussion, learning cells, skill development exercises (role plays, video-tape analysis) and training laboratories (task group development and interpersonal sensitivity).

272-421 STRATEGIES OF ORGANIZATIONAL DEVELOPMENT. (3 credits). Organizational Development is a process of planned change in an organization's culture (i.e. the learned and shared assumptions about the norms that regulate member behaviour); a long-range effort to improve the organization's problem-solving and renewal processes – utilizing the applied behavioural sciences and experience based learning. Students will examine theory, strategies, and techniques of organizational diagnosis and intervention – and will interact with consultants from various Montreal and Canadian organizations as they present case studies of their on-going O.D. projects

272-422 CREATIVITY, INNOVATION, AND MANAGEMENT. (3 credits). The course will deal with what we know about creativity, the process of innovation, the management of creativity, and the implications of innovation for modern management. The accent will be on studies of actual innovations, of creative individuals and organizations, interviews with creative managers, case studies and field studies.

272-423 PERSONNEL ADMINISTRATION. (3 credits). This course is designed to introduce students to the various issues involved in personnel administration. The concepts and methods used by the staff personnel unit in building and maintaining an effective work force in an industrial organization will be discussed. Topics include the development of the ability to design the personnel subsystem within the firm and the problems encountered in such areas as recruitment, selection, motivation, communication and management training. Both a theoretical and case approach will be used.

272-425 SALARY ADMINISTRATION. (3 credits). This course is designed to expose the students to total compensation systems in business and service organizations. The emphasis is on understanding the various compensation theories and their relation to compensation policies within organizations. Behavioural effects of different types of compensation plans and how to make compensation plans more effective with the use of behavioural science knowledge will be discussed. Some of the topics that are covered in the course are: nature of financial motivation, compensation theories, job design and job analysis, compensation practices, designing a compensation package, pay and organizational effectiveness.

272-521 LEADERSHIP STYLE AND ORGANIZATIONAL STRESS. (3 credits). This course tries to provide an analytic model of action in which the relationship will be emphasized (at a manifest and latent level) between an individual's leadership style, symptom formation and decision making processes in organizations. For that reason such themes will be emphasized as conceptual frameworks of human development, the relationship between psychopathology and leadership, and the nature of power, authority and motivation. Material will be mainly case studies, literature and historical studies of political and business leaders.

273-332 COMPUTER BASED INFORMATION SYSTEMS. (3 credits). Methodology, techniques and components of systems design and programming, with emphasis on management information systems.

273-333 SYSTEMS ANALYSIS AND MODELLING. (3 credits). Theoretical approaches to systems analysis are investigated. Analytical, algorithmic

and heuristic optimization methods are considered from the viewpoint of management decision-making. Emphasis is placed on developing programs to solve related problems.

273-431 INFORMATION SYSTEMS DESIGN. (3 credits). *(Prerequisite:* 273-332 and 273-333). Methods and procedures of designing business information systems are discussed. A comprehensive case study extending throughout the term emphasizes the application of the methodology.

273-432 INFORMATION SYSTEMS ADMINISTRATION. (3 credits). *(Prerequisite:* 273-332). This course is concerned with the management of the design and implementation of information systems. Systems to service functional requirements of the organization, concepts of total information systems will be considered. The case study method will be used.

273-433 CONTROL AND VERIFICATION OF COMPUTER SYSTEMS. (3 credits). *(Prerequisites: 272-332; 273-431; 308-210).* The course will consider, at an advanced level, problems and methods of establishing effective controls of computer systems, evaluation of controls, and computer aids to evaluation and auditing.

273-434 ADVANCED TOPICS – COMPUTER SYSTEMS APPLICATIONS. (3 credits). *(Prerequisites: 273-332; 273-431; 308-210).* This is an advanced seminar for senior students. Topics will be selected from current issues such as data base applications, on-line systems, privacy and computers, etc.

273-435 MINICOMPUTERS, MICROPROCESSORS AND THEIR APPLICATIONS. (3 credits). *(Prerequisite: 273-332, 273-333, 273-431).* The course provides students with exposure to analysis, design and implementation of business applications using minicomputers and microprocessors. It also discusses relevant hardware and software developments.

274-342 FINANCE II. (3 credits). *(Prerequisite: 280-341; 280-272).* A presentation of the modern theory of Finance. A foundation is established here from which students may pursue further specialization or from which specialists in other areas may appreciate their interaction with the Finance function. The theory covers three interrelated finance functions: capital budgeting, corporate finance (including cost of capital, capital structure, and dividend policy), and portfolio theory.

274-441 INVESTMENTS AND PORTFOLIO MANAGEMENT. (3 credits). *(Prerequisites: 274-342).* The course examines the application of investment principles and security analysis to the selection and comparison of equity and fixed income securities in the current economic and financial environment. Also covered are: determinants of stock prices, growth models and portfolio diversification.

274-442 CAPITAL MARKETS AND INSTITUTIONS. (3 credits). This course studies the functions of the capital market through flow of funds analysis and an examination of portfolio activities of financial intermediaries. Also covered are: Securities regulations and ethical considerations, the term structure of interest rates and risk and rates of return in debt and equity markets.

274-443 APPLIED CORPORATE FINANCE. (3 credits). *(Prerequisites: 274-342).* Conceptual models and quantitative techniques studies in earlier courses are extended and/or applied to decision problems faced by managers in the Corporate Finance areas. Such problems include the management of working capital, capital budgeting, capital rationing, capital structure, dividend policy, the cost of capital, mergers and acquisitions, leasing, option valuation, and insurance. The course is intended to enhance the ability of students to consider Corporate Finance problems in terms of conceptual models and applicable quantitative techniques.

274-444 INSURANCE AND RISK MANAGEMENT. (3 credits). *(Prerequisite: 274-342).* The aim of the course is to provide the student with a comprehensive view of the insurance industry, linking both the actuarial and investment functions (liability generation and asset selection). Building on the theoretical foundations provided in Finance II, this course extends the concepts of utility theory and risk management, describes the function of the insurance industry and shows how portfolio theory can be applied to the industry's investment decisions. Finally, recent developments showing how the risk of assets and liabilities can be selected to minimize the overall risk for a given return are discussed.

275-351 MARKETING AND SOCIETY. (3 credits). *(U3 students only).* The course stresses the two way relationship between marketing and social change. A variety of marketing management tasks and responsibilities are examined but primarily in terms of the social issues and the social concerns associated with such decisions. Particular attention is paid to consumerism, government regulation, business ethics, corporate social responsibility, social marketing, and marketing's role in a world of resource shortages.

275-353 PHYSICAL DISTRIBUTION. (3 credits). Systems approach to physical distribution; traffic management; plant and warehouse location; inventory control; information flows and order processing; supply scheduling; total cost planning; organizational patterns.

275-354 MARKETING MANAGEMENT II. In this course, each of the decision areas in marketing will be probed in depth. Its main emphasis will be on the use of marketing theory and concepts in the solution of realistic marketing problems. It will focus on decision making in a marketing context using cases, some of which will be computer assisted, and readings.

275-357 MARKETING PLANNING I. (3 credits). *(Course is intended for students in Marketing Concentration in U3. This course is a prerequisite for Marketing Planning II; however, students are not required to take Marketing Planning II).*

Marketing Planning is a two-part full year course, designed as a capstone to previous marketing courses providing a transition into actual business experience.

Marketing Planning I is a lecture seminar in which case histories, and later actual "live" problems are introduced into the class and "solved" with the help of the instructor.

Students "solve" similar problems assigned to them as home projects, to reinforce and measure learning.

It is assumed that each student has had sufficient marketing background to know where to find materials, data, etc., and what generally to be looking for. The course will emphasize judgement and initiative through assignments deliberately phrased in the vagueness of actual business problems that need to be *defined first,* then attacked in a logical and thorough manner' and finally recommendations or solutions proposed in full-scale "client" presentations.

275-358 MARKETING PLANNING II. (3 credits). *(Prerequisite: Marketing Planning I).* In Marketing Planning II the class operates as "McGill Marketing Enterprises" a marketing consultant company. The class is divided into "operating" groups of 3-5 students. Each operating group is assigned to an actual business project working with a client much the same as a marketing consultant or advertising company.

Classes are management review sessions where each group's problem and progress is monitored and controlled by the instructor and the class, again much as a marketing company's management reviews its operating groups.

The "solutions" are presented to the appropriate clients in full-scale business presentations in which the class attends as audience.

Emphasis is geared progressively in each of the courses toward real-life problems and practical solutions.

275-450 MARKETING EFFECTIVENESS. (3 credits). *(Prerequisite: Accounting I and Finance I).* This course is designed to familiarize students with a variety of managerial tools and techniques useful in the determination of marketing opportunity, the allocation of marketing effort and the development of marketing plans. Students will be required first to master these techniques and then to evaluate them critically. They will also be required to search the literature in one or more areas for other techniques that offer more promise.

275-451 MARKETING RESEARCH. (3 credits). *(Prerequisite: Statistics I and II).* Problem definition, research design, collection of marketing information from primary, secondary and tertiary sources. Sample design; survey techniques; experimental design; coding and tabulating. Analysis of data, including statistical techniques. Marketing information systems. Product, distribution, motivation, sales, etc. research. Forecasting and planning; market research for marketing decisions. A term paper (project) is required.

275-452 CONSUMER BEHAVIOUR. (3 credits). A study of basic factors influencing consumer behaviour. Attention is focused on psychological, sociological and economic variables including motivation, learning, attitude, personality, small groups, social class, demographic factors and culture, to analyze their effects on purchasing behaviour.

275-453 ADVERTISING MANAGEMENT. (3 credits). *(Prerequisite: Consumer Behaviour or a non-introductory Psychology or Sociology course).* Surveys advertising and promotion in Canadian social, economic and management contexts. Examines activities as they relate to advertisers, the advertising agency' suppliers and media. Stresses advertising by objectives and the creative approach to developing strategy and tactics as part of the marketing concept. Real examples from current campaigns are the focal point of class discussions.

275-455 SALES MANAGEMENT. (3 credits). This course explores the various responsibilities of the sales manager as they relate to his sales force. These include the selection process, training alternatives, compensation and incentive plans, supervision and evaluation, and budgeting and forecasting. Case studies, discussions of problems, and a field-work team project are used.

275-456 INDUSTRIAL MARKETING. (3 credits). *(Prerequisite: Marketing Management II).* This course focuses on decision-making and management of the marketing effort in an industrial product context. The student gains an understanding of the industrial marketing environment and of the problems faced by the industrial marketing manager. Topics covered include: the industrial marketing system; industrial purchasing; researching the industrial market; product, price distribution, selling and advertising decisions; strategies for industrial markets. A combination of lecture and case discussions are used.

275-457 ADVANCED TOPICS IN MARKETING RESEARCH. (3 credits). *(Prerequisite: 275-451).* The purpose of this course is to expose students to one or more of the following specialized areas in marketing research: (i) location studies, (ii) experimental design, and (iii) quantitative analysis of marketing data. Students will be required to design an actual study and to collect and analyze the data.

275-458 QUANTITATIVE ANALYSIS FOR MARKETING DECISIONS. (3 credits). *Prerequisite: 275-451).* Study the nature of market response by presenting models of market response and evaluate them in the context of understanding, describing

and exploring marketing problems. Explore the particular marketing problem areas of advertising, pricing' personal selling and product planning. Relevant problems will be structured, analyzed and studied from a management science point of view. The interaction between each marketing variable will be considered. The problems of implementation of the management science approach in the real world of marketing organizations will be discussed.

275-459 RETAIL MANAGEMENT. (3 credits). Principles and methods of management as applied to retailing' including location, organization, personnel, buying, inventory control, selling and advertising, services, expenses and profits.

275-460 INDUSTRIAL PURCHASING. (3 credits). *(U3 status students only).* Industrial Purchasing provides the student with a greater understanding of purchasing functions, techniques, and organization. The course is divided into two parts: the first part dealing with the firm's purchasing relations with the outside world; the second part with internal decisions, processes and organization. The course consists of a mixture of lectures, discussions and cases.

276-463 ENTREPRENEURSHIP AND CORPORATE POLICY. (3 credits). Selected business case problems embracing the top management viewpoint in medium-sized to larger-sized companies; sizing up situations; formulating policies and planning programs of action; organizing administrative personnel and putting plans into action; control, day-to-day administrative problems, follow-up and re-appraisal. Emphasis is on basic objectives, and how each department can contribute most efficiently to the overall aims of the firm.

276-464 SMALLER BUSINESS. (3 credits). *(Prerequisite: 276-463).* Much the same kind of coverage as in Corporate Policy, but concerned specifically with Small Business, which has different problems – identification of initial opportunity, finance to get started, early survival, etc. – from the corporations in later stages of development considered in Corporate Policy.

276-465 SEMINAR IN ORGANIZATIONAL STRATEGY. (3 credits). *(Open to U3 students only).* This course takes a careful look at the concept of strategy and how organizations go about making strategy. The course will run in seminar form and will revolve around a set of readings and a field project. Groups will study local organizations and write papers on their strategy – past, present and future.

276-466 STRATEGIC PLANNING. (3 credits). *(Prerequisite: U3 only).* The course aims to provide the student with both pragmatic and theoretical bases for understanding and applying planning methodologies; demonstrating planning successes and failures; and indicating that although research proof is only gradually developing, sufficient hypotheses exist for testing the effectiveness of long-range planning.

276-565 BUSINESS IN SOCIETY I. (3 credits). *(Open to U3 students only).* An examination of the underlying ideals and beliefs of the traditional capitalist system; management styles and corporate policies and responsibilities that are compatible with the capitalist ideal; expressed critcisms and concerns about the existing system; traditional approaches, such as anti-trust laws, to making the systems more effective.

276-567 BUSINESS IN SOCIETY II. (3 credits). *(Open to U3 students only).* An examination of the emerging capitalist ideology; management styles and corporate policies and responsibilities that may be encompassed within the general framework of business morality (perceived as behaviour extending beyond the law, reflecting a level of aspiration rather than a level of duty); new approaches to making business more "responsive" to the needs of society.

277-471 SELECTED TOPICS IN QUANTITATIVE ANALYSIS. (3 credits). *Open to final year students with a strong background in quantitative methods.*

277-472 OPERATIONS MANAGEMENT. (3 credits). This course takes the point of view of general managers, rather than specialists, on the structure and analysis of operating problems of departments of organizations. It consists of background readings and a series of class discussions of twenty-four cases. The cases present operational problems that concern general managers in a variety of types of organizations.

277-632 SAMPLE SURVEY METHODS AND ANALYSIS. (3 credits). *(Prerequisite: 280-272).* This course deals with the design of surveys and the analysis of survey data with particular emphasis on applications in management. Topics covered include: design of sample surveys, sampling procedures including simple random, stratified, systematic and unequal probability sampling; multistage and cluster sampling; judgement sampling; ratio and regression estimation; procedures for non-response and non-sampling errors; introduction to experimental methods and experimental design.

277-633 APPLIED DECISION ANALYSIS. (3 credits). *(Prerequisite: 280-272 or 280-373).* The course covers the canonical decision model; utility theory and preference analysis including the expected utility axioms, multiattribute utility functions, dominance principles, and methods of preference assessment; role of information in decision-making including classical and Bayesian decision analysis, valuation of information and methods of probability assessment; group decision-making including group preference functions and topics from game theory; case applications of decision analysis to various areas of management.

277-634 REGRESSION MODELS IN MANAGEMENT. (3 credits). *(Prerequisite: 280-272).* This course deals with the applications of major econometric methods to management, with particular emphasis on finance, accounting, marketing and managerial economics. Each case or study is made up of theoretical hypotheses about the relationship, its statistical measurement and a judgment on its reliability. Topics covered include: tools for measuring statistical relationships, analysis of demand and cost-output relationships, price and profit models as well as multi-equation models. The course stresses the use of computer programs as an aid in management metrics.

277-671 STATISTICS FOR BUSINESS DECISIONS. (3 credits). *(Prerequisite: Statistics II).* Simple and multiple regression, polynomial regression, stepwise regression, best set of independent variables. Matrix approach to regression. Introduction to design of experiments. One way analysis of variance with and without replication. Analysis of covariance. Multiple comparison procedures. Non-parametric statistical methods. One and multi-sample problems. Tests of randomness. As well as the usual homework exercises, additional problems using statistical computer programs available on the McGill system are assigned.

277-675 APPLIED TIME SERIES ANALYSIS FOR MANAGERIAL FORECASTING. (3 credits). *(Prerequisite: 280-272).* This course is devoted to applications of time series analysis to business problems. Starting with the elementary ratio-to-moving average methods, the course deals successively with the Census 2 method, with the methodology introduced recently by Box and Jenkins, with spectral analysis and with time-series regression techniques. Computational aspects and management applications of the methodology are emphasized. The students are expected to participate by preparing and presenting case studies.

277-676 APPLIED MULTIVARIATE DATA ANALYSIS. (3 credits). *(Prerequisite: 280-272).* This course is devoted to the application of multivariate analysis to problems in Behavioural Science, Marketing, Economics and Finance. Computational aspects of the methodology are emphasized and the students will be expected to prepare and present actual cases. The following topics will be discussed: multiple regression and analysis, discriminant analysis, classification procedures, multidimensional scaling, cluster analysis.

277-678 SIMULATION OF MANAGEMENT SYSTEMS. (3 credits). *(Prerequisite: 280-272, 280-373).* This course is devoted to the methods and skills of building simulation models for Management Systems. It stresses the construction of useful models, the design of simulation experiments and the analysis of the results for making decisions. The students are expected to design a complete simulation of a real problem using a standard simulation language.

277-679 APPLIED DETERMINISTIC OPTIMIZATION. (3 credits). *(Prerequisite: 280-373).* Topics include Linear Programming and extensions to more general decision problems such as Quadratic and Non-Linear Models, Network Analysis, and models of discrete decision making. The course stresses the solution of complex management problems using efficient optimization tools of Operations Research. The students will work on real management cases to apply the techniques acquired.

277-680 APPLIED SEQUENTIAL OPTIMIZATION. (3 credits). *(Prerequisite: 277-679).* This course is devoted to the application of Dynamic Programming to a variety of decision-making contexts, both in deterministic and probabilistic environments. Topics include Dynamic Inventory Scheduling with uncertain demand, unbounded horizon problems, problems in replacement and maintenance, etc...

278-381 MANAGEMENT IN THE PUBLIC SECTOR I. (3 credits). Management in the Public Sector is a course on decision making in the public sector. It stresses the analysis of the executive decision making structure of the government and the processes for policy development and decision making. It also stresses the interface between the public sector and the private sector.

278-382 INTRODUCTION TO INTERNATIONAL BUSINESS. (3 credits). The course seeks to familiarize the management student with the expanded world of the international businessman by examining the underlying concepts of international economic theory; developing a framework for examining country environmental constraints (educational, sociological, economic, political-legal) and relating them to the operations of multinational enterprise; studying the relationship between the international firm and the nation state, with particular reference to Canadian foreign ownership policies; and examining selected topics such as the role of multinational enterprise in economic development and planned economies.

278-383 INTERNATIONAL BUSINESS POLICY. (3 credits). *(Prerequisite: 278-382).* This course develops and applies conceptual approaches to general management policy and strategy formulation in multinational enterprises. Attention is focused first on the strategic planning process. The various aspects of management policy studied includes marketing strategy, location strategy, technology transfer, labour policy, ownership strategy and planning for international divestment. Emphasis is placed also on developing the students practical skill using case studies and negotiating international business arrangements.

278-384 BUSINESS LAW. (6 credits). Topics cover the meaning, classification and sources of law. Civil Law versus Common Law, other systems, Procedural Law, Contracts, protection of creditors, Breach of Contract, Special Contracts, Leases, Mandates, Loans Guarantees, Pledges, Proprietorship, Partnerships, Corporations, Government Regulation of Business, Labour Management Relations, Insurance and Bankruptcy, Patents, Negotiable Instruments, Property and Taxation.

278-385 MANAGEMENT IN THE PUBLIC SECTOR II. (3 credits). *(Prerequisite: 278-381.)* This course will stress decision-making in the public sector. In particular, it will look at the structures of decision making in the government at the Cabinet, Departmental and Regulatory Agency levels. Particular stress will be placed upon a simulation project based around a current problem.

278-386 COMMUNICATIONS. (3 credits). This course will be both theoretical and practical. The theory will relate to how people deal with other people in organizations involving encoding, transmission, receiving and decoding of messages. It will examine the knowledge, skills, attitudes and habits that are used in reading, writing, speaking and listening as well as nonverbal communications. It will analyse how to think clearly, and the theory of General Semantics. Students will study leadership skills in chairing a meeting. It will examine writing skills in detail.

278-480 REAL ESTATE INVESTMENT ANALYSIS. (3 credits). *(Prerequisite: Finance I or permission of instructor).* This is an applied micro course which examines risk-return relationships. Identification of risk and methods of treating risk are undertaken. Analysis of investment measurement techniques, financial arrangements, ownership patterns and tax strategy are the avenues which are analyzed on a risk-return relationship. A real estate investment model enables the student to simulate a variety of strategies on the computer.

278-482 INTERNATIONAL FINANCIAL MANAGEMENT. (3 credits). *(Prerequisites: 280-341).* This course examines operational problems of financial management in the multinational enterprise: forecasting adversities in the international financial environment; determining the firm's exposure to foreign exchange rate changes; protecting against exchange losses; transfer pricing and profit remittance policies; multinational capital budgeting; use of Eurodollar and overseas sources of capital; consolidation of financial statements; etc.

278-483 INTERNATIONAL MARKETING MANAGEMENT. (3 credits). An examination of the opportunities and constraints that confront the marketing manager of a firm seeking to extend its activities across national boundaries and into foreign markets. The world market environment is viewed as one composed of diverse and complex elements linked by unifying trends that reward an integrated international marketing approach. Considered in turn are the modifications in product, pricing, channel and communications policies that must be made when a firm enters foreign markets either through exporting, licensing, or manufacturing abroad. Particular attention is paid to the strategic and tactical aspects of international trade and export marketing in the Canadian context.

278-484 INTERMEDIATE BUSINESS LAW. (3 credits). *(Prerequisite: 278-384).* Purpose is to provide an overview of certain legal corporate principles management students should be aware of and understand. However, emphasis will be on legal requirements of corporate organization and various methods of corporate financing. Course will cover: outline of basic principles of Canadian Company Law, with quick study of Federal and Quebec Company legislation; analysis of legal requirements of corporate financing including brief study of securities legislation and a prospectus.

278-485 REAL ESTATE FINANCE. (3 credits). *(Prerequisite: Finance I or permission of instructor).* This course examines sources of mortgage funds in the residential and non-residential mortgage markets. The student is introduced to housing and mortgage market theory and application on a residential basis in a regional context. Questions of effect of monetary policy' introduction of variable interest rates and the implications of a secondary mortgage complete the study of the residential mortgage market. Non-residential mortgage financing is introduced by examining the commitment process of institutional lenders. The commitment lending process is linked with long term lending and leasing concepts.

278-486 LAND LAW. (3 credits). *(To be taken concurrently with Business Law).* The objectives of the course are to provide students with a background sufficient to understand most of the transactions in the types of property encountered in urban development.

278-487 REAL ESTATE VALUATION. (3 credits). *(Prerequisite: Real Estate Finance).* This course examines the traditional methods of real estate appraisal. The practical relationship of appraisal to feasibility and market analysis is considered in detail. Procedures, practices and problems of assessment and expropriation are reviewed. The impact of the statistical methods on the appraisal profession are also examined.

278-489 INDEPENDENT STUDIES IN MANAGEMENT. (3 credits). *(Open to U3 students only).* Research, reading or field projects, permitting independent study under the guidance of a staff member specializing in the field of interest. Projects have to be arranged individually with instructors. A detailed student proposal must be submitted to the instructor

and the Associate Dean during the second week of term. CGPA of at least 3.0 required.

278-490 BUSINESS ETHICS. (3 credits). This course intends to provide a conceptual framework that will facilitate ethical perception, understanding, reflection and decision-making. Emphasis will be placed on fundamental ethical principles, particularly the notion of justice, in order to nurture practical judgment relative to specific ethical problems of business.

278-581 HEALTH CARE ORGANIZATION. (3 credits). Overview and study of the present Canadian Health Care Systems, their components, organization, financing and management uncertainties. Interaction and interface between the health system and other social systems: roles of various levels of government and of the private sector. Close to half the course focuses on the Québec Health Care System: its recent evolution, present organization and foreseeable directions.

278-582 HOSPITAL ORGANIZATION AND MANAGEMENT. (3 credits). The hospital in relation with the outside world: consumer categories of hospital services, relationships with other health organizations, financing, legal framework and professional content. Organization of the hospital: immediate legal and functional aspects. Organization and functioning of major hospital departments and performance evaluations. Management problems and practices associated with blue-collar workers, medical and paramedical professionals.

492-437 COMPARATIVE COMPANY LAW AND THE MULTINATIONAL COMPANY. (3 credits). *(Open to undergraduates with permission from the Faculty of Law Admissions Officer).* This course provides a multidisciplinary overview of the relationship between law, economics, and management, with particular reference to the multinational corporation. The course deals on a comparative basis with the legal concept of a corporation, the objectives of multinational corporate management, the economic effects of international corporate activity, and alternative governmental approaches toward control of multinational firms. Emphasis is placed on the multinational corporation in the European Economic Community and on the relevance of EEC law and economics to Canada.
(Offered by the Faculty of Law)

279-294 INTRODUCTION TO INDUSTRIAL RELATIONS. (3 credits). An introduction to labour-management relations, the structure, function and government of labour unions, labour legislation, the collective bargaining process, and the public interest in industrial relations.

279-393 LABOUR RELATIONS IN QUEBEC. (3 credits). *(Prerequisite: 279-294).* Students in this course will study the evolution of industrial relations policy and practice in Quebec against the background of the rather unique socio-cultural, economic and political climate that has characterized this province at various stages of its industrial development. In addition to providing a historical perspective, the course will emphasize contemporary events and problems. The latter will form the primary subject matter of student research projects.

279-394 COLLECTIVE BARGAINING. (3 credits). *(Prerequisite: 279-294).* This course is designed for those students who wish to study principles in collective bargaining in Canada and abroad. It deals with the structure of the bargaining parties and the structure of bargaining itself. It is problem-oriented and relies on empirical data and case problems.

279-491 INDUSTRIAL RELATIONS IN PRACTICE. (6 credits). *(Prerequisite: 279-294).* The object of this course is to give the students an opportunity to apply the knowledge that they have gained in their Industrial Relations Program. Students will be encouraged to come to grips with a wide range of problems in industrial relations theory, policy and practice. This is achieved by means of guided reading and small discussion groups, mock collective bargaining sessions, contact with practitioners in the field and problem-oriented research assignments. (Compulsory for Final Year Industrial Relations Majors. Others by permission of the instructor.)

279-492 PUBLIC POLICY IN INDUSTRIAL RELATIONS. (3 credits). *(Prerequisite: 279-294).* Collective bargaining and public policy towards industrial relations. Emphasis is placed on recent public investigations into labour relations in the federal and provincial jurisdictions; international comparisons are included.

279-494 LABOUR LAW. (3 credits). General introduction to the basic concepts of labour law which are relevant to the practice of industrial relations. Course will review the historical development of labour law in certain social and legal systems and examine more fully the culmination of this development in the legislative enactments and jurisprudence of the Canadian jurisdictions and certain comparative foreign models. Course open to Industrial Relations students only.

279-500 LABOUR AND INDUSTRIAL RELATIONS THEORY. (3 credits). *(Prerequisite: 279-294).* The objective of this course is to provide students with background understanding of modern industrial relations systems and perspective with regard to the nature of the labour movement. The course will be concerned with the history of thought regarding the labour movement during the last two centuries. Changes in economic and social institutions will be examined as part of the evolving context within which the labour movement has developed. Central to the course will be the conflicting theories which have

emerged to explain the development of labour's economic and political institutions.

279-501 HUMAN RESOURCES IN INDUSTRIAL SOCIETY. (3 credits). *(Open to U3 students. Introductory statistics helpful but not mandatory).* Covers the fundamentals of "manpower" analysis and policymaking for the human resources of Canada and Québec. Introduces a fundamental framework for manpower analysis and policy formations. Reviews occupational forecasting in "manpower" estimation and, provides an introduction to further human resource analysis.

278-688 LABOUR RELATIONS IN THE PUBLIC SECTOR. *(Prerequisite: Industrial Relations 279-294 or 278-687).* This course covers labour relations in federal, provincial and municipal, as well as in the quasi-public services such as hospitals, schools and government agencies and boards. Students will examine some of the more contentious current issues in public service labour relations and compare and analyse the alternative methods that have so far been evolved to deal with them.

NON-MANAGEMENT ELECTIVES

The following departments have suggested that the courses listed below might prove to be of interest to Management students as non-management electives. This list is not at all exhaustive and students should consult other Faculty Calendars for other course offerings and details of the courses below.

CATHOLIC STUDIES:

415-395	Christian Values and Human Actions
415-494	Ethics in Practise
415-595	Philosophy of Catholic Education

ECONOMICS:

154-200D	Introduction to Applied Political Economy
154-211D	Canadian Economic History
154-302D	Money and Banking
154-304D	Canadian Economic Policy
154-305D	Government and Business
154-306D	Labour Economics and Institutions
154-321D	The Québec Economy
154-400D	Theory of the Firm
154-404D	Transportation
154-408D	Public Finance
154-423D	International Trade and Finance
154-458D	Money and Banking

EDUCATION:

These courses examine formal schooling in relation to the needs of other sectors of society focusing on the outcomes of the educational process as well as its structure and organization. These courses are offered not only to undergraduates in the Faculty of Education but also to students of the Faculty of Arts, Schools of Social Work and Nursing among others.

413-403	Education of Minority Groups
413-405	The Critical Spirit and Education
413-406	Introduction to Comparative Education
413-407	Education and Society in Québec
413-408	Human Values and Education
414-203	Education and Society
414-205	Sociology of Education
414-208	The Development of Personality and Social Behaviour in the School-age Child
414-305	Non-Verbal Communication
414-308	Sociology of the Classroom
414-377	Adolescence and the Process of Education
414-456	Application of Psychological Principles and Educational Problems
414-492	Psychology and Instructional Design

(The two last courses listed above are probably more suitable for students who have had some background in Psychology).

Reading Efficiency Course: The course emphasizes speed and comprehension, as well as study skills such as note-taking, spelling, and remembering. (non-credit).

427-305	Experiences in Communications (Limited Enrolment)

FRENCH LANGUAGE:

Placement tests and section slips are required for all the following French courses:

127-201	Intensive Beginners French
127-205	Elementary French (to be approved)
127-211	Oral and Written French I
127-321	Oral and Written French II
127-400	(formerly 341D) Français Fonctionnel
127-401	Français Fonctionnel Intensive
127-405	Français Fonctionnel Option écrit

GEOGRAPHY:

183-110	Geographical Perspectives on world environmental problems
183-112	Geography of contemporary world problems
183-203	An introduction to environmental studies
183-216	Geography of Location
183-217	Introduction to Urban Geography
183-309	Canada: Its Geographic Formations
183-311	Geographic Attributes of the Canadian Economy
183-313	Geography of Reaction
183-315	Geography of Tourism
183-327	Water Resources and Land Use
183-401	Geography of Northern Lands
183-422	The Urban Climatic Environment

HISTORY:

101-341 Themes in the Social and Economic History of the United States, 1830-1940. (Prerequisite: History 211 and 221 or consent of Instructor) (Not offered in 1977/78).

101-442 The Beginnings of Industrial Society in Canada. (Prerequisite: History 202D or consent of Instructor (not offered in 1977/78).

101-443 Communications, Society, and Public Policy in Canada. (Prerequisite: History 202 or consent of Instructor).

MATHEMATICS:

189-217 Abstract Algebra I
189-218 Abstract Algebra II
189-316 Functions of a Complex Variable
189-318 Mathematical Logic
189-328 Computability and Mathematical Linguistics
189-338 Topics in History and Philosophy of Mathematics
189-348 Topics in Geometry

PHYSICS:

198-200 Ideas and Concepts of Modern Physics (Permission of Instructor)
198-214 Astrophysics
198-224 Physics of Music
198-217 Physics of the Life Sciences (Prerequisite: Biological Sciences, CEGEP *or* permission of Instructor).

The following two courses do require some background in science:

198-309 Descriptive Physical Oceanography. (Prerequisite: 189-120,121.)
198-337 Nuclear Energy and its Applications (Prerequisite: U1 Majors Physics or equivalent).

In addition, for students interested in acquiring a general grounding in physics, we offer two streams of CEGEP equivalent courses:

198-101,
198-102, Biological Sciences Stream

198-120,
198-121
198-122 Physical Sciences stream.

PSYCHOLOGY:

See Psychology Handbook for details of courses in Organizational Psychology.

SOCIOLOGY:

166-235 Technology and Society
166-321 Industrial Sociology
166-337 Applied Sociology
166-410 Service Organizations
166-417 The Sociology of the Professions
166-410 The Study of Organizations.

INTRODUCTION

"Education ends only with life itself",

Professor John Cox
McGill University 1891

The acceptance of this fact is well documented and the present demand for alternate knowledge, in what is becoming an increasingly mobile society, is resulting in more and more people returning to university. These rather prosaic reasons do not form the only motivating force, as people seem genuinely interested in widening their range of ideas and developing their minds.

It should also not be presumed that this is necessarily a new or innovative trend, as Continuing Education at McGill commenced in a minor way as early as the mid 1800's. It started with a few small classes and grew slowly to 1,000 students in 1940. Paralleling the general trend throughout Canada it has since expanded enormously to some 12,500 students at the present time.

Courses as diverse as Chinese Civilization and Quantum Physics have been offered, but the primary emphasis at the Centre is upon part-time study programs leading to diplomas and certificates. Full time students are enrolled in some courses for degree credits, as are part-time students who have been accepted by faculties as candidates for degress.

The majority of lectures are held in the evenings on the down-town campus. However, off campus courses are also held, reaching as far afield as Fort Chimo and the Gaspé. In addition, Macdonald College offers and administers a side range of evening courses, both interest and technical, at their West Island Campus.

The Administrative Offices of the Centre are located at Strathcona Hall, 772 Sherbrooke Street West at the corner of McGill College Avenue. All services are available from 9 a.m. to 5 p.m. Monday to Friday. The Information Office (Room 101) is also open during the term until 8:30 p.m.

With classes available in the Fall, Winter and Summer, there is an opportunity for all to attend.

CALENDAR FOR 1977-78 SESSION

1977

Monday, 4 July	Preregistration for Education (refer Education section)
Monday, 22 August and Tuesday, 23 August	Registration for returning Language students and Translation Program
Wednesday, 24 August to Friday, 26 August	Registration for French and other Languages
Monday, 29 August to Wednesday, 31 August	Registration for English and other Languages
Monday, 29 August to Friday, 2 September	Registration for Education Courses
Tuesday, 30 August to Friday, 2 September	Registration for Management Certificate Program, Liberal Arts, Community Services and Engineering
Wednesday, 31 August to Friday, 2 September	Registration for Diplomas in Management & Chartered Accountancy Programs
Monday, 5 September	Labour Day All administrative offices closed. No evening lectures
Monday, 12 September	All Continuing Education courses commence
Monday, 10 October	Thanksgiving Day. All administrative offices closed. No evening lectures
Monday, 21 November to Friday, 25 November	Preregistration for January Courses for returning students
Friday, 2 December	Final lecture for Fall Courses in Languages
Friday, 9 December	Final lecture in Diplomas in Management Chartered Accountancy, Liberal Arts, Community Services, Management Certificate and Engineering Programs
Monday, 12 December	Final examinations for Diplomas in Management, Chartered Accountancy Programs & Management Certificate Programs
Friday, 16 December	Final lecture in Education courses
Thursday, 22 December to Monday, 2 January	All administrative offices closed

1978

Monday, 2 January	All continuing courses resume except Liberal Arts and Languages
Tuesday, 3 January to Friday, 6 January	Registration for all Continuing Education courses
Monday, 9 January	Courses resume in Liberal Arts & 'Z' courses in Languages
Monday, 16 January	All continuing Education courses commence
Friday, 24 March Good Friday	All administrative offices closed no evening lectures
Monday, 27 March	Easter Monday. All Administrative offices closed. All classes meet.
Monday, 10 April	Last lecture in all courses
Monday, 17 April	Final examinations
Monday, 24 April to Friday, 28 April	Registration for summer courses
Monday, 1 May Saturday, 6 May	Examinations in Chartered Accountancy Program
Monday, 1 May	Courses commence in Languages
Monday, 8 May	Courses commence in Diploma Management Programs
Monday, 15 May	Courses commence in Chartered Accountancy Program

ANDRÉ J. MAJOR, B.A.(ST.P.C.) LL.L.(Ottawa)
Associate Director (Professional Development)

2 GENERAL INFORMATION

2.1 REGISTRATION

The following information refers to the Centre as a whole. For specific information please refer to the department.

Registration must be made in person or by proxy during the official registration periods listed below.

Fall and Winter Registration will take place in REDPATH HALL. Summer Registration and Pre-registration will take place in STRATHCONA HALL.

All Education Registration will take place in STRATHCONA HALL. For details of Education Pre-registration refer to Department's introduction section.

FALL 1977 REGISTRATION

RETURNING LANGUAGE STUDENTS

Monday 22 August and Tuesday 23 August	9:00 am – 6:30 pm

FRENCH AND OTHER LANGUAGES

Wednesday 24 August and Thursday 25 August	9:00 am – 8:00 pm
Friday 26 August	9:00 am – 4:00 pm

ENGLISH AND OTHER LANGUAGES

Monday 29 August to Wednesday 31 August	9:00 am – 8:00 pm

EDUCATION (STRATHCONA HALL)

Monday 29 August to Friday 2 September	9:00 am – 8:00 pm

MANAGEMENT CERTIFICATE PROGRAMS
ENGINEERING
LIBERAL ARTS
COMMUNITY SERVICES

Tuesday 30 August to Thursday 1 September	9:00 am – 8:00 pm
Friday 2 September	9:00 am – 4:00 pm

CHARTERED ACCOUNTANCY PROGRAM
MANAGEMENT GRADUATE

Wednesday 31 August and Thursday 1 September	9:00 am – 8:00 pm
Friday 2 September	9:00 am – 4:00 pm

PREREGISTRATION WINTER 1978
(STRATHCONA HALL)
for all returning students

Monday 21 November to Thursday 24 November	12:00 noon – 6:30 pm
Friday 25 November	12:00 noon – 4:00 pm

WINTER 1978

FRENCH AND OTHER LANGUAGES

Tuesday 3 January and Wednesday 4 January	9:00 am – 8:00 pm

ENGLISH AND OTHER LANGUAGES

Thursday 5 January and Friday 6 January	9:00 am – 8:00 pm

ALL OTHER COURSES

Tuesday 3 January to Friday 6 January — 9:00am – 8:00pm

In no case will telephone applications be accepted or commitments be made by telephone for acceptance into a course. A student is registered and accepted into a course only when he has received a student card of admission.

2.2 LATE REGISTRATION

Late registration is subject to availability in the course. Registration after the second lecture will only be permitted in exceptional circumstances at the discression of the associate director.

2.3 ADMISSION – CERTIFICATE AND DIPLOMA PROGRAMS

Students wishing to follow a Certificate or Diploma Program must complete an "application for acceptance into a program". For details of the procedure to be followed contact the department administering the particular program.

2.4 EVALUATION OF TRANSCRIPTS

Students may have transcripts evaluated for acceptance into a program and/or for credits and exemptions within a program. A fee of $10.00 (non-refundable) is payable for evaluation of non-McGill transcripts.

NOTE:

The University reserves the right to restrict registration in any class, to make substitutions or additions to the published list of instructors and to cancel any class for which an insufficient number of registrations has been received.

2.5 FEES

The fees as indicated for each course are payable at time of registration. Students who have applied and been accepted before the date of registration into a degree program will be charged $19.00 per credit.

PENALTIES

Late Registration	$10.00 (non-refundable)
Refunds	5.00 (see refunds)
Transfers	5.00 (see transfers)
Instalment on fees	5.00 (with special permission)
Returned or void cheques	5.00

The Centre for Continuing Education is not responsible for any fees payable to an external association or institute.

2.6 REFUNDS

To obtain a refund, the Student Card of Admission, library card and any material handed out in class must reach the Centre for Continuing Education before the third lecture in the course is given; this can be done by mail or in person. A refund, less $5.00 per course, will be mailed within 4 weeks. In limited enrolment courses of twelve lectures or less, the refund will be pro rata, less the regular charge of $5.00. No refund will be made to a student who registers after the second lecture in a course.

Allowances cannot be made for a change of personal plans including transfer from Montreal or for additional commitments which a student may accept after arranging his course schedule.

2.7 TRANSFERS

Students may transfer from one class to another prior to the date of the third lecture in both courses, provided that registration for the new course is still open. A charge of $5.00 will be made for a transfer from one course to another or from one section of a course to another section. A transfer cannot be made by speaking to the instructor or telephoning the Centre; the student must bring his Student Card of Admission to the Centre.

2.8 WITHDRAWALS

Ceasing to attend a class or notifying the lecturer does not constitute a withdrawal, nor can telephone calls be accepted as notification of withdrawal.

A student is held responsible for all courses in which he registers unless he officially withdraws in writing and returns his student card prior to the completion of 50% of the course.

No refund is payable and no record of registration will appear on the students academic record.

Students who wish to withdraw after the deadline may, under special circumstances, withdraw with permission and will receive a "W" on their record. In no event will withdrawals be permitted after the 3rd last lecture.

In order to conform with the policy for day students, students at the Centre registered in part time degree programs requesting withdrawal from a course and having no record of the course appear on the transcript, must do so, both with the Faculty and Centre for Continuing Education within the stipulated time period.

2.9 LIMITED CLASS

The size of a class will be limited in courses where the progress of the student is dependent upon his participation and upon the individual attention he receives from the lecturer. It will also be limited in courses where equipment determines the number of students who can be accommodated. In all such

cases, enrolment is on a "first come, first served" basis.

2.10 SENIOR CITIZENS

Senior citizens may register for courses offered by the Centre upon payment of 20% of the course fee indicated.

Courses having LIMITED registration will only be available to Senior Citizens AFTER the final date of registration when enrolment numbers have been determined. A late registration fee will not be charged in the case of limited classes.

2.11 CANCELLED COURSES

When a course is cancelled by the Centre for Continuing Education (whether due to insufficient registrations or not) students will be entitled to a full refund of course fees paid. Presentation of the student card is necessary for the claim and must be made within two months of the cancellation of the course.

2.12 EXAMINATIONS AND GRADING SYSTEM

EXAMINATIONS

An examination will be available in the majority of courses. Examinations may be written in English or French. Students will be notified by mail of their results. No examination results will be given by telephone, **they will be posted in Strathcona Hall three to four weeks after the date of the final examination.**

Students who are seeking credit for a Diploma or Certificate who are unable to write the final examination for reasons of health must submit a medical certificate to the Centre.

Examinations are an integral part of the students evaluation and only in exceptional circumstances will reasons other than serious illness (supported by medical evidence) by accepted for deferment.

Students are reminded that cheating or any other breach of University examination regulations is considered a serious offence which could lead to expulsion from the University.

GRADING SYSTEM

The Centre uses the grading system common to the University. Certain programs have further requirements. Students should refer to the information on their program. An evaluation process is available in all courses.

Unless otherwise noted the grading will be as follows:

UNDERGRADUATE LEVEL

A	(80 – 100%)	Satisfactory Pass
B	(65 – 79%)	
C	(55 – 64%)	
*D	(45 – 54%)	Conditional Pass
F	(0 –44%)	Failure
P		Pass

GRADUATE LEVEL

A	(80 – 100%)	Pass
B	(65 – 79%)	
F	(0 – 64%)	Failure
P		Pass

CR	CREDIT GRANTED	A student admitted to a program receives credit for the course passed on previous qualifications, resulting in fewer credits or courses necessary for completion of the program.
EX	EXEMPTION GRANTED	A student admitted to a program is exempted from the particular course but must substitute another to obtain the requisite credits.
J	ABSENT, FAILED	A student is registered, does not write the examination or do other essential work and has no valid reason.
K	INCOMPLETE	A student has valid reasons for not having completed essential term papers or research.
L	DEFERRED	A student's final examination has been deferred with approval of the associate director.
NC	NON CREDIT COURSE	Indicates a non credit course for which marks are not given.
W	WITHDREW	A student drops a course with permission of the associate director.

*Although D is a passing grade, it will not permit entry into a subsequent course for which it is a prerequisite, nor will it be recognized if the course is a requisite of the student's program.

2.13 CONVOCATION

A Spring Convocation will be held for students who have successfully completed the following programs of study through the Centre for Continuing Education:

Diploma in Translation; Certificates of Proficiency in English, French, German, Italian, Russian, Spanish, Translation; Certificate of Advanced Technology in Dyeing and Finishing; Certificates in Management and Computing Languages.

Applications must reach the Centre by 31 March with a cheque for $10.00 made payable to McGill University; from 31 March until 15 May an additional $5.00 late fee will be charged and any applications received after 15 May will not be accepted for Spring Convocation in that year.

Candidates in other Certificate and Diploma programs offered through the Centre receive their diplomas at the Convocation of their respective faculties. These convocations are held in June and November.

2.14 TRANSCRIPTS

Transcripts may be obtained upon written request. Fees are $2.00 for the first official and one unofficial transcript and 50 cents for each additional unofficial transcript, provided the order is given at one time. Students entire record will appear on the transcript. Official transcripts will only be sent to Academic Institutions.

2.15 REREADS

Students may request verification of marks. This ensures that all question have been marked, calculations carried out correctly and class work adequately counted toward the final evaluation.

If dissatisfied a formal reread may be requested. The reread request form together with a cheque for $25.00 must be completed within 30 days of the posting of the final mark at Strathcona Hall.

For details of both procedures contact the department administering the course.

2.16 CREDITS AND CERTIFICATE CREDITS

Courses which indicate a number of credits in brackets after their title have been approved by the Academic Policy Committee of Senate for inclusion in a degree program. However, students may not count such courses towards the fullfilment of a degree unless:

i) They have been formally admitted to a degree program,

and

ii) The specific course has been approved for inclusion in their program by the Associate Dean of the relevant faculty.

Courses which indicate a number of certificate credits in brackets after their title have been approved by the Senate Committee on Continuing Education for inclusion in a certificate program. Students may count these and degree credit courses towards the fullfilment of a certificate provided that

i) They have been formally admitted to a certificate program,

and

ii) The specific courses have been approved by the Associate Director for inclusion in their certificate program.

2.17 UNIVERSITY SERVICES

2.17.1 BOOKSTORE

Required textbooks and some of the suggested reference texts may be purchased at the McGill University Bookstore, located in the Bronfman Building, 1001 Sherbrooke St. West.

In addition to the regular hours the bookstore will open as follows:

12 – 15 September	9:00 a.m. – 7:30 p.m.
16 September	9:00 a.m. – 4:30 p.m.
9 – 22 September	9:00 a.m. – 7:30 p.m.
23 September	9:00 a.m. – 4:30 p.m.

The bookstore will also open Saturday morning 9:00 am to 12 noon, on 17 September.

2.17.2 UNIVERSITY CENTRE

The University Centre is located at 3480 McTavish Street. Cafeteria and Grillroom services are available to Continuing Education students up to 7 p.m.

2.17.3 PARKING

Parking facilities are limited. Students may park in the garage of the McIntyre Medical Sciences building (entrance on Peel Street) on presentation of their student card and payment of $1.00 for the evening. When available parking is permitted on the Campus after 5 p.m. on payment of $2.00 for the evening.

2.17.4 LIBRARIES

Students may use McGill University libraries. The student's registration card must be presented to the circulation desk of the McLennan Library to obtain a McLennan Library card.

For details of other libraries available to students, refer to the information in the individual departments.

2.18 MISCELLANEOUS

2.18.1 CANCELLATION OF LECTURES

Lectures are cancelled by the Centre in cases of emergency. Cancellations for CONTINUING EDUCATION courses will be announced over the radio (stations CJAD, CBM, CFCF & CKGM) whenever

possible. In such cases lectures will be made up at a time mutually convenient to the students and lecturer.

2.18.2 NOTICES

Students should consult the Continuing Education notice board in the building in which their classes are held. They should also consult the notice boards in Strathcona Hall.

2.18.3 TIMETABLES

A schedule of rooms and buildings will be handed out to all students at time of registration. A master list will be posted on the notice board in Strathcona Hall and will also be found on the Continuing Education notice boards in all buildings.

2.18.4 CHANGE OF ADDRESS

Students should inform the Centre in writing of any change of address and telephone number after registration. The student's number and course number(s) must be indicated.

2.18.5 INCOME TAX RECEIPTS

Official receipts for income tax purposes will be mailed in February of each year to all students. Receipts will be mailed to the address on record and students are urged to inform the Centre in writing of any change of address.

2.18.6 SMOKING

Smoking is strictly forbidden in all classrooms at all times.

Students may smoke in the corridors and are asked to use the containers provided.

2.19 Language Requirement for Professions

Quebec law now requires that candidates seeking admission to provincially-recognized Quebec professional corporations must posess a working knowledge of the French language, i.e. be able to communicate orally and in writing in that language.

To demonstrate this capability, a candidate will normally be required to pass an examination set by the Régie de la langue française, unless he or she can show that three years of instruction in a French post-primary school have been completed. The professional corporation will require this proof of attendance or of successful completion of the Régie examination.

This examination shall test the candidate's mastery of oral and written comprehension and expression in French. The contents may vary in accordance with the current terminological requirements of the profession or professional group. Examinations will take place four times a year, and they may be attempted an unlimited number of times.

In special cases where the candidate can clearly demonstrate to the Régie by means of an interview that a true mastery of French exists, the examination requirement may be waived.

Information on the testing program of the Régie may be obtained by writing to: Régie de la langue française, 800, Place Victoria, 16 étage, Montréal, Québec, H4Z 1G8, Telephone 873-6571.

A pamphlet intitled "French Language Requirements for Professionals in Quebec" is available from the Centre for Continuing Education. Those McGill students who are enrolled in the professional programs and wish to prepare themselves for the provincial government test, should contact the Language Department at 392-4901 for information concerning the Centre's testing facilities and course offerings.

*McGill degrees and diplomas currently give access to corporations regulating the activities of the following professional groups:

Advocates
Agrologists
Architects
Chartered Accountants
Chartered Administrators
Chartered Appraisers
Chemists
Dentists
Dietitians
Engineers
Registered Industrial Accountants
Industrial Relations Counsellors
Certified General Accountants
Notaries
Nurses
Occupational Therapists
Physicians
Physiotherapists
Psychologists
Social Workers
Speech Therapists & Audiologists
Urbanists
Vocational Guidance Counsellors

The Centre for Continuing Education offers programs for the following professional groups:

Certified General Accountants
Chartered Accountants
Chartered Administrators
Chartered Appraisers
Registered Industrial Accountants

3 CHARTERED ACCOUNTANCY PROGRAM

DAVID GOBEIL
Associate Director
392-6708

3.1 PROFESSIONAL REQUIREMENTS

Membership in the Order of Chartered Accountants of Quebec (C.A.) entitles one to practice the profession of Public Accountancy in the Province of Quebec. It also provides admission to the accounting profession, composed of numerous accountants working in industry, government and education.

Admission is based upon meeting the following requirements as indicated in the Chartered Accountants Act (Bill 264):

1) possession of a university degree from a recognized institution.
2) completion of an articling period with a firm of Chartered Accountants which is registered with the Order.
3) possession of a Graduate Diploma in Public Accountancy.
4) passing of the Uniform Final Examinations given by the Order.
5) a working knowledge of French.

Those students not meeting the minimum grade requirements will be required to enter the Qualifying Program.

Further information can be obtained from:

The Order of Chartered Accountants of Quebec
680 Sherbrooke Street West, Suite 700
Montreal, Quebec H3A 2S3
Tel: (514) 288-3256

3.2 ADMISSION TO PROGRAMS

Application for admission to the programs must be made in person at our offices at least four weeks prior to the registration period. Students must provide us with an unofficial transcript of marks indicating courses in progress, if any. At the same time, arrangements should be made to forward an official transcript confirming the awarding of a degree. A program of studies form will be prepared and the student must present it at registration time.

McGill University offers the Program for the Graduate Diploma in Public Accounting to Bachelor of Commerce, Major in Accountancy, or those with other university degrees who have completed the Qualifying Program.

3.3 COUNSELLING

Counselling will be available by appointment only. There will be no counselling during the registration period.

3.4 EXAMINATIONS

An examination is held at the end of each course unless specifically exempted. Candidates who fail to pass a course may be permitted to write a supplemental examination. To qualify for supplemental privileges, students must first write the final examination in the course and obtain at least 40%. Candidates who fail to pass the supplemental examination will be required to repeat the course.

Students will receive written confirmation of their examination or course results after each term. As the results of each course become available, they will be posted on the Notice Board in Strathcona Hall by STUDENT NUMBER. Results cannot be obtained by telephone.

3.5 REREADS

Students may request verification of marks. This ensures that all questions have been marked, calculations carried out correctly and class work adequately counted toward the final evaluation. If dissatisfied, a formal reread may be requested. The reread request form together with a cheque for $25.00 must be completed within 30 days of the posting of the final mark at Strathcona Hall. For details of both procedures contact the Department administering the course.

3.6 GRADING SYSTEMS

The department uses the Graduate Level Grading System common to the Centre. For further details see page 9 of the General Information.

3.7 LIBRARIES

Full library privileges are available to all students registered in the C. A. Program at the following locations:

1) Howard Ross Library of Management
Samuel Bronfman Building
1001 Sherbrooke St. West

2) McLennan Library
McGill Campus

For further information see page 10 of the General Information.

3.8 REGISTRATION

See page 7 of the General Information for registration dates and times.

3.9 PRE-REGISTRATION

Pre-registration for the Winter Term will be available to all students previously registered in the C.A. Program from 21 to 25 November 1977, 12 noon to 6:30 p.m. at the Centre for Continuing Education, 772 Sherbrooke St. West. Students should register on the assumption that they pass the courses in

which they are registered, with a guarantee of a full refund or transfer at no charge if they do not.

3.10 TIMETABLE

A listing of instructors, books, building and rooms will be distributed at time of registration. Please ask for a copy.

3.11 REGULATIONS & PROCEDURES

Please see General Information.

IT IS THE RESPONSIBILITY OF EACH STUDENT TO READ, UNDERSTAND AND ABIDE BY THE REGULATIONS AND PROCEDURES PRINTED IN THIS BOOKLET.

3.12 REGULATIONS IN THE C.A. PROGRAM 1977-1978

1. (A) Students who first enrolled in a C.A. course after the summer of 1974 have a limit set on the number of failures that they may have during their studies. Each student will be allowed to fail no more than one-third of the courses he is required to complete.
For example, if a student is required to complete 7 courses he will be allowed 7/3 = 2 1/3 failures, being excluded from the program when he has failed 3 courses.
(Final + Supplemental = 1 Failure).

   (B) Commencing in September 1974, no student may repeat a course more than ONCE. On the Second Failure, a student will be excluded from the program.
(Final + Supplemental = 1 Failure).

2. **SUPPLEMENTALS**

   A student with a final course mark of 40% or better has the right to sit a supplemental exam on payment of the required $20.00 fee. This right will be forfeited if the exam is not written at the appropriate time:

Date of Final Examination	Date of Supplemental
July 1977	December 1977
December 1977	May 1978
May 1978	July 1978

   Those students wishing to sit the supplemental must apply in writing or at Strathcona Hall, 772 Sherbrooke St. West, at least three weeks prior to the exam period and provide proof of eligibility.

3. **WITHDRAWALS**

   Students are not permitted to withdraw from a course after the **Tenth** lecture. Students who do not write the final examination will receive a grade of "J" (Absent) which constitutes a failure.

   For further details on Withdrawals see General Information.

4. **COURSE LOAD**

   Each student is expected to do a minimum of two to three hours study for each classroom hour and plans should be made accordingly.

   Students are allowed to register for a maximum of two courses in the Fall and Winter Terms, and a maximum of four courses in the summer over a ten-week period. Students who expect to take three or four courses in the summer should do so as full time students.

   Students carrying supplemental examinations are advised to reduce the maximum number of registrations accordingly.

5. **PROGRAM APPROVAL**

   Prior to each registration, a Program Approval Form will be available. This form must be completed by the student and submitted to the Associate Director for approval.

6. **FRENCH LANGUAGE REQUIREMENT**

   See General Information for further details.

3.13 COURSE STRUCTURE

QUALIFYING PROGRAM

The Qualifying Program (Level I) consists of 14 courses which provide the foundation courses upon which the final professional courses are based. Most of these courses would have been completed in a Bachelor of Commerce, Major in Accounting.

LEVEL I

	601-501	Financial Accounting I
	601-502	Financial Accounting II
	601-503	Financial Accounting III
	601-521	Managerial Accounting I
	601-531	Auditing I
	601-541	Taxation I
*	274-641	Finance I
*	273-631	Data Processing & Computers
*	277-674	Survey of Basic Mathematics
*	277-613	Basic Management Statistics
*	279-691	Economic Environment of the Firm
*	279-692	Economic Analysis of Business
	601-551	Law I
	601-561	Management Policy

All courses indicated by an asterisk are also courses in the Diploma in Management/M.B.A. Program.

DIPLOMA PROGRAM

The Program consists of 9 courses. Level II is composed of the courses which cover the basic professional skills and accounting knowledge; Level III is composed of the courses which are most volatile as to content due to their coverage of current developments.

LEVEL II

602-604	Financial Accounting IV
602-622	Managerial Accounting II
602-628	Accounting Case Analysis
602-632	Auditing II
602-652	Law II

LEVEL III

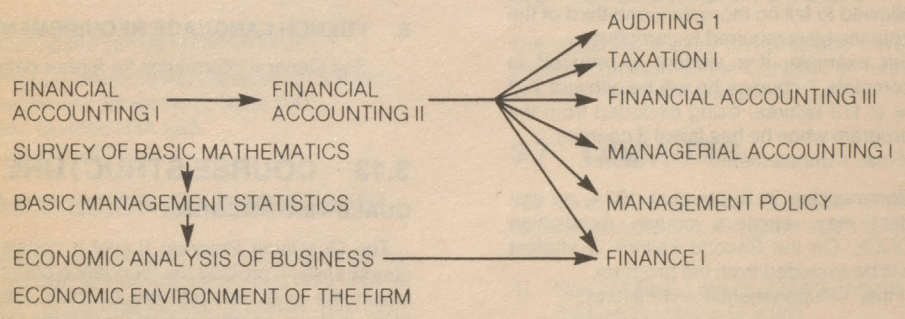
603-605	Financial Accounting V
603-634	Auditing III
603-638	Computer Systems-Audit & Control
603-642	Taxation II

3.14 CA EXAMINATION SUMMER SCHOOL

The Centre for Continuing Education offers a summer school for students writing their C.A. Examinations in September. The 1977 C.A. Examination Summer School commences 1 August 1977 and runs for three weeks. This intensive Uniform Final Examination review program is optional but highly recommended. There are approximately ten days of lectures on the C.A. Syllabus and five days of practice exam writing techniques. The fee for 1977 will be $300.00 and application forms may be obtained at the Centre for Continuing Education.

3.15 COURSE PREREQUISITES

– The Qualifying Program must be completed prior to commencing the Diploma Program.



(PREREQUISITES INDICATED BY ARROWS)

Level II of the Diploma Program must be completed prior to Level III, and students cannot begin Level III courses more than 12 months prior to the Uniform Final Examinations that they intend to write.

3.16 SUMMER PROGRAM 1978

Qualifying Program:

During the Summer of 1978 students will be able to complete a maximum of three courses during a six-week period beginning 15 May. A second six-week session will be offered in July to enable students to complete in the evening one of the courses joint with the Diploma in Management. All Level I courses will be offered except Financial Accounting I, Managerial Accounting I, Auditing I and Law I. The timetable will be available by January 1978.

Diploma Program:

Level II – Those students who have completed the Qualifying Program will be able to do any four (4) of the Level II courses over a ten-week period from 15 May to 21 July 1978 with exams the next week.

Level III – Those students who plan to write the Uniform Final Examinations in September 1978 must have completed all of the Level II courses by May 1978. All four (4) Level III courses may be taken over a ten-week period from 15 May to 21 July 1978 with exams the week of 24 July 1978.

3.17 EXAMINATION DATES

Fall Term: 12 – 22 December 1977
Winter Term: M.B.A. – 17 – 28 April 1978
C.A. – 1 – 6 May 1978

NOTE: Unless otherwise indicated all courses will be repeated in January 1978.

3.18 COURSE DESCRIPTIONS

LEVEL I – QUALIFYING PROGRAM

(1) FINANCIAL ACCOUNTING I

601-501X-81 Thursdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September & 16 January

Introduction to accounting principles and concepts; measurement of accounting income; preparation of financial statements; balance sheet classifications; depreciation; manufacturing statements. (Previously called Accounting IA).

(2) FINANCIAL ACCOUNTING II

601-502X-61 Tuesdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September & 16 January
PREREQUISITE: Financial Accounting I

A detailed review of the accounting for current and long term assets and liabilities, intangibles and shareholders' equity; determination of accounting income and the treatment of prior period adjustments and extraordinary items; working capital and flow of funds; financial statement presentation; partnerships. Current practices and the relevant CICA recommendations will be reviewed in terms of theoretical concepts and principles. (Previously called Accounting II).

(3) FINANCIAL ACCOUNTING III

601-503X-71 Wednesdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September & 16 January
PREREQUISITE: Financial Accounting II

The underlying concepts and accounting treatment of intercorporate investments, business combinations, purchases and pooling of interests, including a detailed examination of the CICA recommendations. Reorganizations; valuation of business enterprises; branches – domestic & foreign; consignments; installment sales; estate and trust accounting. (Previously called Accounting III).

(4) MANAGERIAL ACCOUNTING I

601-521X-61 Tuesdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September & 16 January
PREREQUISITE: Financial Accounting II

Introduction to cost accounting. Elements of cost; job order and process cost systems; budgeting; standard costs and analysis of variances; cost/volume/profit relationships; variable costing; relevant costs.

(5) AUDITING I

601-531X-51 Mondays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September & 16 January
PREREQUISITE: Financial Accounting II

An introduction to: the nature and purpose of auditing, appointment, remuneration, powers, duties and responsibilities of an auditor; internal control; audit programs; financial statement presentation; procedures for verification of items in financial statements; audit reports.

(6) TAXATION I
(Not offered in January 1978)

601-541X-61 Tuesdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September
PREREQUISITE: Financial Accounting II

Basic principles of tax law; residence; meaning and computation of taxable income; computation of personal tax; foreign tax credits; capital gains; partnerships; trusts; administration and enforcement; case decisions; Revenue Department bulletins, circulars and rulings; appeals.

(7) FINANCE I

274-641X-51 Mondays 6 – 9 p.m.
274-641X-61 Tuesdays 6 – 9 p.m.
274-641X-81 Thursdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September
PREREQUISITE: Financial Accounting II & Economic Analysis of Business

An introduction to financial management and the role of finance, both within the firm and the economy as a whole. The institutional framework of the firm is discussed, including legal forms, taxes, financing instruments and the capital markets. An introduction to the analytics of finance is presented including the pricing of financial instruments, simple models of capital market equilibrium, the financial structure of the firm, cost of capital, dividend policy, investment criteria for new capital spending proposals, and working capital management.

(8) DATA PROCESSING AND COMPUTERS

273-631X-61 Tuesdays 6 – 9 p.m. (Cobol)
273-631X-71 Wednesdays 6 – 9 p.m. (Cobol)

FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September

The course covers a variety of topics including computer concepts, programming systems, time-sharing, file organization and modern applications of the computer. Instruction will be given in the use of one or more programming languages and students will be assigned problems involving actual use of the computer.

Note: C.A. students are required to complete Cobol and NOT Fortran.

(9) SURVEY OF BASIC MATHEMATICS

277-674X-51 Mondays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September

The first part of the course will be spent in an intensive review of basic mathematics including algebra, graphs, functions and logarithms. The last part of the course will introduce the student to calculus including limits, functions of one variable, differentiation, integration and applications; and to matrix algebra including determinants and solutions of simultaneous linear equations. The material covered in this course will be adequate to enable students to follow the usual mathematical applications in business, economics, statistics and operations research.

(10) BASIC MANAGEMENT STATISTICS

277-613X-51 Mondays 6 – 9 p.m.
277-613X-71/2 Wednesdays 6 – 9 p.m.
277-613X-91 Fridays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39hours) beginning week of 12 September
PREREQUISITE: College-entrance mathematics or Survey of Basic Mathematics

Topics covered include: descriptive statistical analysis, common probability distributions (binominal, Poisson, normal), sampling procedures, sampling distributions, estimation, hypothesis testing, distribution-free procedures (tests of goodness of fit and independence), simple and multiple regression, correlation, one-way analysis of variance, classical time series analysis, Bayesian probability analysis. The course stresses the use of computer programs as an aid in statistical analysis.

(11) ECONOMIC ENVIRONMENT OF THE FIRM

279-691X-61 Tuesdays 6 – 9 p.m.
279-691X-71 Wednesdays 7 – 10 p.m. **(John Abbot College Kirkland Campus)**
279-691X-81/2 Thursdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September

This course examines the main macro-economic mechanisms, i.e. income determination and the multiplier theory as well as fiscal policy; the level of investment, the demand for money and the rate of interest as well as the Canadian banking system and deposit creation; the general equilibrium of product and money markets, and monetary and fiscal policies; the dynamics of investment, the employment sector, and the price level and inflation; the balance of payments and international trade as well as methods of dealing with balance-of-payments disequilibria.

(12) ECONOMIC ANALYSIS OF BUSINESS

279-692X-51 Mondays 6 – 9 p.m.
279-692X-71/2 Wednesdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September
PREREQUISITE: Basic Management Statistics

This course is primarily devoted to demonstrating the applications of economic theory and methodology in solving business problems. The following topics are discussed in some detail: demand, production, cost analysis, pricing, growth, concentration, profitability, and resource allocation of the firm. Marketing and sales forecasting techniques are also introduced briefly, and attention is given to opportunities for the application of incremental analysis

(13) LAW I

601-551X-51 Mondays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September & 16 January

Sources and administration of law; the Canadian Constitution and the division of powers; the Quebec Civil Code comprising the law of persons, the law of property, obligations, contracts, sale, lease and hire, mandate, suretyship, hypothecs and prescription.

(14) MANAGEMENT POLICY

601-561X-71 Wednesday 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September & 16 January
PREREQUISITE: Financial Accounting II

This is an integrating course which examines the theory of organizations, goals, behaviour of individuals and groups, organization structure and design. It looks also at the role of top management in the formulation and administration of policy. (Previously called Management II)

LEVEL II DIPLOMA PROGRAM

(15) FINANCIAL ACCOUNTING IV

602-604X-81 Thursdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September & 16 January
PREREQUISITE: Level I

Advanced topics in financial accounting including: earnings per share; diversified operations reporting; foreign currency translation; statement of changes in financial position; shareholders' equity – retained earnings, extraordinary items, prior period adjustments; financial statement presentation and footnotes; interim reporting and subsequent events and contingencies; accounting for prospectuses, pension costs and corporate income taxes; specialized accounting – financial institutions, fund, real estate, construction, lease, extractive industries and franchises. Detailed study of the relevant CICA and Canada Business Corporations Act requirements. (Previously called Accounting IV).

(16) MANAGERIAL ACCOUNTING II

602-622X-61 Tuesdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September & 16 January
PREREQUISITE: Level 1

This course continues the study of cost accounting and management control systems. Particular topics in cost accounting include budgeting, standard costing, analysis of variance, cost-volume-profit relationships. Under management control systems such topics as responsibility accounting, divisional performance measurement, relevant cost analysis, capital budgeting and decision theory are examined. The roles of decision theory, linear programming, network analysis and simulation are examined as they apply to Managerial Accounting. (Previously called Management Control Systems.)

(17) ACCOUNTING CASE ANALYSIS

602-628X-71 Wednesdays 6 p.m.
FEE: $57.00
DURATION: 13 sessions beginning week of 12 September & 16 January
PREREQUISITE: Financial Accounting IV and Auditing II either completed or in progress.

The objective of this course is to enable the student to apply his technical knowledge to complex accounting problems faced by the professional accountant. He will be required to interrelate the knowledge obtained from the study of individual subject areas in order to identify problems, analyse data and formulate recommendations for action. Considerable emphasis will be placed on developing the student's ability to communicate results to a client succinctly and coherently.

(18) AUDITING II

602-632X-71 Wednesdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September & 16 January
PREREQUISITE: Level I

This course is to continue the examination of the role of the attest auditor. The topics covered include professional practice, auditing standards, evaluation of internal control, audit techniques and procedures, and audit reporting.

(19) LAW II

602-652X-51 Mondays 6 – 9 p.m.
602-652X-81 Thursdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September & 16 January.
PREREQUISITE: Level I

This course examines the federal and provincal legislation governing corporations, bankruptcy and securities. The rights and responsibilities of the corporation, its shareholders, directors and officers are examined as well as the various requirements for changes to the corporation. The conditions of bankruptcy and insolvency are examined as well as the rights and responsibilities of the participants, particularly the trustee. The requirements of the various security legislations are examined from the point of view of the professional accountant.

LEVEL III

(20) FINANCIAL ACCOUNTING V (Not offered in January 1978)

603-605X-61 Tuesdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September
PREREQUISITE: Level II.

The theory underlying current Canadian accounting practice. Considerable emphasis will be given to the CICA accounting recommendations and exposure drafts, and to the current literature required by the C.A. syllabus. Topics will include: Accounting principles and conventions; financial reporting objectives and requirements; current and long term tangible and intangible assets and liabilities; intercorporate investments, business combinations, consolidations and goodwill; valuation and measurement of

income; general price-level and current value accounting; published forecasts and other current developments.

(21) AUDITING III

603-634Y-81 Thursdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 16 January 1978
PREREQUISITE: Level II

This course examines special audit investigations and current auditing developments. Specific topics include: the management audit, prospectus assignments, feasibility studies, business valuations, fraud and bankruptcy investigations, insurance losses and financial forecasts.

(22) COMPUTER SYSTEMS-AUDIT & CONTROL

603-638Y-71 Wednesdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 16 January 1978.
PREREQUISITE: Level II.

This course explores the changes in internal control and audit procedures required in a computer environment. As well as examining the control over computerized accounting systems, emphasis is placed upon the implementation of management control systems. Control verification procedures are examined as applied during the attest audit, and the use of the computer as an audit tool is explored. The student is expected to develop the expertise to perform the attest audit and to serve as management adviser. (previously called Computers II).

(23) TAXATION II (Not offered in January 1978)

603-642X-51 Mondays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September.
PREREQUISITE: Level II.

Federal corporate taxation; computation of income, taxable income and tax; corporate distributions and reorganizations; deferred compensation; non-residents and international; administration and enforcement. Federal and provincial sales taxes.

4 COMMUNITY SERVICES

MRS. J. HOLLANDER

Program Co-ordinator

392-4905

4.1 INTRODUCTION

Courses in this section of the Announcement come under the headings of Occupational Preparation and Social Work.

4.2 LIBRARIES

All students registered in the Community Services Department have full library privileges at the McLennan Library upon presentation of their student card of admission and receipt of a Library Card.

4.3 TIMETABLE

A listing of instructors, textbooks, buildings and room numbers for all courses will be distributed at time of registration. Please ask for a copy.

4.4 REGULATIONS AND PROCEDURES

Please see General Information

IT IS THE RESPONSIBILITY OF EACH STUDENT TO READ, UNDERSTAND AND ABIDE BY THE REGULATIONS AND PROCEDURES PRINTED IN THIS ANNOUNCEMENT.

4.5 COURSE DESCRIPTIONS

(1) INTRODUCTION TO DENTAL ASSISTING

640-101Z-61 Tuesday 7 – 9 p.m.
FEE: $155.00
DURATION: 25 lectures (50 hours) beginning 20 September
PREREQUISITE: High School Matriculation

This lecture series is introductory in nature and assumes no experience on the part of the student. Chairside assisting, some responsibilities for assisting the dental specialist, home care patient education and the proper handling and care of instruments will be taught.

(2) MEDICAL SECRETARIES

640-102Z-61 Tuesdays 6 – 8 p.m.
640-102Z-81 Thursdays 6 – 8 p.m.
FEE: $135.00
DURATION: 25 lectures (50 hours) beginning week of 19 September
PREREQUISITE: High School Matriculation, Secretarial training

First hour – basic anatomy and physiology by a qualified medical practitioner. Second hour – medical office procedure with emphasis on medical terminology. Considerable homework is required.

(3) LEGAL SECRETARIES

640-103X-61 Tuesdays 6 – 8 p.m.
FEE: $65.00
DURATION: 12 lectures (24 hours) beginning 20 September
PREREQUISITE: High School Matriculation, Secretarial training

This course is designed to give secretaries working in a law firm and those who wish to obtain a legal background and introduction to basic legal concepts applicable in Canada and the Province of Quebec, including an introduction to the substantive law and basic rules of civil procedure.

(4) ADVANCED LEGAL SECRETARIES

640-203Y-61 Tuesdays 6 – 8 p.m.
FEE: $65.00
DURATION: 12 lectures (24 hours) beginning 17 January
PREREQUISITE: Introductory course

This course is designed to complement the introductory course with more emphasis placed on the rules of civil procedure and instruction in the drafting of various civil and corporate forms commonly used in law firms.

(5) FUNCTIONAL FRENCH FOR SOCIAL WORKERS

646-301X-61 Tuesdays 6 – 8 p.m.
FEE: $75.00
DURATION: 12 sessions (24 hours) beginning 20 September

The purpose of this course is to facilitate communication between Anglophone social workers and the Francophone community. Instruction will be mainly in the form of discussions on matters pertaining to Social Work practice. Class Limited.

(6) METHODS OF COMMUNITY ORGANIZATION

646-406X-76 Wednesdays 8 – 10 p.m.
FEE: $75.00
DURATION: 12 lectures (24 hours) beginning 21 September

This course is designed to develop an understanding of the organizing process and to enrich the student's repertoire of direct organizing skills. Emphasis is on community organization process, organizing strategy, leadership development and the integration of community organization theory and practice.

(7) ISSUES IN SOCIAL SERVICE DELIVERY

646-405Y 76 Wednesdays 8 – 10 p.m.
FEE: $75.00
DURATION: 12 lectures (24 hours) beginning 18 January

The aim of this course is to develop an understanding of issues in service delivery with particular emphasis on citizen participation, use of para-professionals, designing neighbourhood councils, agency accountability etc. Planning theory, neighbourhood assessment and planning process are some of the issues to be addressed.

(8) AFTER BASIC SKILLS

646-407X-02 Tuesdays 4:30 – 6:30 p.m.
FEE: $75.00
DURATION: 12 lecture/discussions (24 hours) beginning 20 September

The goal of this course is to improve the creative skills of the social worker. It will provide an opportunity to assess one's own skills and working situation in order to put them together in the most effective way. How to present a case to supervisors, doctors, school principals, multi-disciplinary teams etc., what to include and/or omit, how to work within the system and other problems will be discussed.

4.6 TIMETABLE – COMMUNITY SERVICES

TUESDAY

(6) 646-406X-76 Methods of Community Organization
(7) 646-405Y-76 Issues in Social Service Delivery

THURSDAY

6:00 – 8:00

(2) 640-102Z-81 Medical Secretaries

5 EDUCATION

PROFESSOR R. BOULIANNE

Associate Director

392-4757

5.1 INTRODUCTION

PROGRAMS FOR THE PROFESSIONAL DEVELOPMENT OF TEACHERS

The Education Department of the Centre for Continuing Education offers courses in the following programs: Bachelor of Education for Certified Teachers (Elementary Education); Quebec Diploma in Special Education; Quebec Diploma in Reading Instruction; Quebec Educational Media Diploma; Quebec Kindergarten Diploma; Certificate in Second Language Teaching; Teacher Certification Program.

These programs meet the Provincial standards in regard to the up-grading of teacher classification (Regulation 5). *Therefore teachers who register for courses and wish to have them considered for purposes of scolarité are advised to apply for admission to one of these programs.*

For application forms apply to:

The Student Affairs Office
McGill Faculty of Education
3700 McTavish
Montreal, PQ
H3A 1Y2
392-8899

5.2 INFORMATION

REGULATIONS AND PROCEDURES

It is the responsibility of each student to read, understand, and abide by the regulations and procedures printed in this booklet. Please see General Information.

5.2.1 REGISTRATION

LOCATION: Strathcona Hall, 772 Sherbrooke St. West, Room 108. Students are encouraged to register for both Fall and Winter Session courses in Education prior to 2 September.

4 July to 25 August	Monday – Thursday 10 am – 3pm
29 August to 2 September	Monday – Friday 9 am – 8 pm
3 October to 1 December	Monday – Thursday 10 am – 3 pm
21 November to 24 November	Monday – Thursday 12 noon – 6:30 pm
25 November	Friday 12 noon – 4 pm
3 January to 6 January	Tuesday – Friday 9 am – 8 pm
16 January to 3 March	Monday – Thursday 10 am – 3 pm

5.2.2 FEES

Fees for Fall Session courses are payable on the date of registration, but arrangements may be made for payment of Winter Session courses. Personal cheques and money orders are acceptable and should be made payable to McGill University.

Students registered with the Faculty of Education will be required to pay $57.00 for a 3 credit course and $114.00 for a 6 credit course.

PLEASE READ CAREFULLY THE SECTION CONCERNING WITHDRAWALS AND TRANSFERS FROM COURSES OR COURSE SECTIONS.

5.2.3 LIBRARIES

Library privileges are available to all students registered in the Education Department of the Centre for Continuing Education in the following Libraries.

1) Education Library
   Faculty of Education
   3700 McTavish Street

2) McLennan Library
   McGill Campus

Students requiring the services of McLennan Library must first obtain a library card. This will be issued upon presentation of your Centre for Continuing Education Student Card of Admission. For further information, please call 392-4936.

5.2.4 CURRICULUM LAB

The materials in the Curriculum Lab may be used in the Curriculum Lab but they are not available on a loan basis for evening students.

5.2.5 GRADING SYSTEMS

Courses are graded either by letter grades or in percent, with the following correspondences: A(80-100%), B(65-79%), C(55-64%), D(45-54%), F(0-44%). Grades A, B, C are termed satisfactory passes, D is a conditional pass, and F is a failure. For further details see Section 3 of the General Information.

5.2.6 SUPPLEMENTAL EXAMINATIONS

It should be noted that supplemental examinations are not necessarily available in all courses and that in fact no supplemental examinations are offered in Art, Music, Second Languages and Reading. It is therefore the student's responsibility to check with the individual instructors to ascertain whether or not supplementals will be available.

If a student fails a course or obtains a conditional pass (45-54%), he may be permitted to sit a supplemental, repeat the course or substitute another course. It should be emphasized that these privileges are within the discretion of the Committee on Admission, Standing and Promotion. If permission is granted, the student must normally clear the failure

or conditional pass within 16 months of terminating the original course. In order to be eligible to write a supplemental examination, the candidate must apply in writing to the Associate Director and attach an examination fee of $20.00.

5.2.7 TIMETABLE

A listing of instructors, building and room numbers for all courses will be available by September. Please obtain a copy from the Centre.

An evaluation process will be conducted in all courses. Students who do not wish to avail themselves of this opportunity are not obliged to do so.

5.3 EDUCATION CALENDAR

Monday 4 July	Open registration for Fall and Winter courses in Education Programs begins. For further details see registration on page 7.
Monday 12 September	Courses commence in Education Programs
Monday 19 September	Courses commence in Special Education Program
Monday 5 December	Courses commence in Special Education Program 2nd Term
Thursday 15 Dec	Final lecture of classes in Education
Monday 9 January	Courses commence in Education Programs
Monday 6 March	Courses commence in Special Education Program 3rd Term
Thursday 27 April	Final lecture of classes in Education
Thursday 6 May	Final lecture of classes in Educational Media and Special Education Programs

5.4 COURSE NUMBER

The first digits of the course number are used to designate the department or teaching unit from which the course originates. The code used is as follows:

412 – Counsellor Education
414 – Educational Psychology & Sociology
414 – Special Education
415 – Catholic Studies
417 – Education in Science
426 – Education in Art
427 – Education in English
427 – Reading
428 – Education in Mathematics
429 – Education in Music
431 – Education in Second Languages
432 – Educational Media
434 – Physical Education
435 – Student Teaching

5.5 PROGRAMS

5.5.1 BACHELOR OF EDUCATION FOR CERTIFIED TEACHERS

(Elementary Education)

This 90 credit B.Ed. degree was designed for teachers who are certified to teach in elementary schools and who wish to upgrade their qualifications and *scolarité* to degree status. Candidates may transfer a maximum of 30 credits from other institutions. This program is available on a part-time as well as on a full-time basis.

The program combines academic and professional courses. Candidates may satisfy the professional requirements of the degree by concurrently following a 30 credit diploma program in Special Education, Reading, Educational Media, Kindergarten, or Second Language Teaching. These diploma programs are described below.

The admission requirements are: Quebec teacher certification or its equivalent; a minimum of 13 years of schooling.

Candidates enrolled in this 90 credit program must complete course work within the following general pattern:

1. Thirty (30) academic credits in five (5) subject areas relevant to elementary education: 12 credits in one subject; 9 credits in a second subject; 3 credits in each of three other subject areas. (viz: Art, English, French, Mathematics, Music, Physical Education, Science, Social Studies, Religion).
2. Fifteen (15) credits of *academic electives* chosen in consultation with departmental adviser.
3. Fifteen (15) credits as *free electives* (courses selected by candidate after consultation with departmental adviser).
4. Thirty (30) credits in a prescribed "education package" as prepared by the Faculty of Education. At the present time, these packages are available in Reading, Kindergarten, Special Education, Educational Media, and Second Language Teaching as described below.

   or

   Fifteen (15) credits as selected by the candidate and fifteen (15) education credits as determined by the Department of Elementary Education.

Further information regarding this program may be obtained from the office of:

Senior Adviser, B.Ed. (Cert. Teach.)
Faculty of Education
3700 McTavish Street
Montréal, Québec H3A 1Y2
392-8871.

5.5.2 QUEBEC DIPLOMA IN SPECIAL EDUCATION

The Diploma in Special Education is required by teachers wishing to work with children who have learning and/or behavioural problems and who have been classified as exceptional children for Ministry of Education purposes. However, courses leading to the diploma have been found useful also to "regular" class teachers interested in children with learning and/or behavioural problems or physical handicaps.

Teachers having a degree, a diploma in Special Education and a clinical experience are qualified under present regulations to teach in a "free-flow" situation.

All eligible candidates may follow this diploma program concurrently as part of the B.Ed. for Certified Teachers.

The admission requirements are: a teacher authorization (Permit, Diploma, P.T.A., etc.) from the Quebec Ministry of Education; a recommendation from a school principal or Special Education Director who has the most recent knowledge of the teacher's competence.

Students not intending to work for the Diploma may take any courses for which they have an appropriate background of training and experience. However, priority will be given to teachers who have been appointed already to a Special Education assignment.

Candidates for the Diploma must take courses 414-340, 414-341, 414-342, 414-343, 414-344, 414-440, 414-441, 414-442 and *two* of 414-443, 414-444, 414-445, 414-446.

Beginning candidates should take 414-340, 414-341, 414-342, and 414-343 before attempting any other courses.

Further information regarding this program may be obtained from:

Special Education Office
Faculty of Education
3700 McTavish
Montréal, Québec H3A 1Y2
392-8809

5.5.3 QUEBEC DIPLOMA IN READING INSTRUCTION

The Diploma in Reading Instruction is a 30-credit program which consists of a sequence of ten courses. This diploma program is intended to train practicing teachers in more effective developmental and corrective teaching of reading.

This program must be completed within five (5) years, that is, no course will be counted if it was completed more than five years before the completion of the last course which is to be counted toward the diploma.

All eligible candidates may follow this diploma program concurrently as part of the B.Ed. for Certified Teachers.

The admission requirements are: transcripts showing prior collegial studies; evidence of successful teaching experience; a recommendation from a school principal.

Candidates must take seven compulsory and three elective courses. The compulsory courses are: either 427-223 and 427-233 *or* 427-233 and 427-523; the corrective reading courses 427-224 and 427-234 *or* 427-234 and 427-577 (reading instruction courses at the same level is a prerequisite for a corrective reading course); either 427-344 or 427-345; 427-533 and 427-576. The remaining three courses in the diploma sequence are to be elected by the student with the advice and consent of reading faculty members.

Further information regarding this program may be obtained from:

The Director, Reading Centre,
Faculty of Education,
3700 McTavish Street,
Montréal, Québec H3A 1Y2
392-8888

5.5.4 QUEBEC EDUCATIONAL MEDIA DIPLOMA

The Educational Media program is a 30 credit program for Quebec certified teachers leading to the Quebec Educational Media diploma. It is designed to provide media communication skills to classroom teachers, developers of instructional materials, media coordinators and others interested in the design, production, evaluation, utilization and administration of instructional media.

The courses are offered in the evening and in the summer by the Educational Media Centre of the Faculty of Education. Students enrolled in the program are given access to the television, film, photography and other audio-visual facilities of the Centre for the production and presentation of instructional materials.

All eligible candidates may follow this diploma program concurrently as part of the B.Ed. for Certified Teachers.

The admission requirement is a teaching authorization (Permit, Diploma, P.T.A. etc.,) from the Quebec Ministry of Education.

Media courses are open to non-diploma students but priority is given to Media diploma students in limited registration courses.

Candidates for the diploma must take 432-204, 432-209 and 432-405 and a minimum of 12 credits from 432-205, 432-303, 432-304, 432-306, 432-309, 432-403, 432-404, 432-406, 432-409, 432-440, 432-470. A maximum of six credits from

approved courses in other programs may be taken with the advice and consent of the program director.

Further information regarding this program may be obtained from:

The Director, Educational Media Centre
Faculty of Education
3700 McTavish Street
Montreal, Quebec H3A 1Y2
392-8876

5.5.5 QUEBEC KINDERGARTEN DIPLOMA

This Diploma Program is designed for certified elementary school teachers who wish to become Kindergarten Specialists. This 30-credit program includes courses in Child Development, Art, Music, Creative Movement and Dramatics, Teaching Methods and Materials for children of the 5-8 age group.

All eligible candidates may follow this program concurrently as part of the B.Ed. for Certified Teachers.

The admission requirements are: Quebec teacher certification or its equivalent; at least 13 years of schooling.

Candidates must take the following seven compulsory courses: 414-214 (6 credits), 414-314, 427-328, 427-327, 433-312, 429-212, and 426-322. Six credits may be selected, in consultation with a departmental adviser, from the following courses: 414-340, 414-341, 414-342, 414-440, 414-441, 414-442, 414-443, 427-223, 427-224.

Further information regarding this program may be obtained from:

Program Director
Kindergarten Diploma
Faculty of Education
3700 McTavish Street
Montreal, Quebec H3A 1Y2
392-8898

5.5.6 CERTIFICATE IN SECOND LANGUAGE TEACHING

This 30-credit program is open to certified teachers who wish to specialize in the teaching of French as a second language. Applicants will be assessed on their oral and written proficiency in the language concerned.

Compulsory courses (18 credits) include an academic language or literature course, two professional courses in teaching methods and applied linguistics, and a year-round practicum to be taken when all other course work is completed.

Four elective courses (12 credits) deal with applications of psycholinguistics, sociolinguistics, evaluation, technology, etc. to second language teaching.

All eligible candidates may follow this program concurrently as part of the B.Ed. for Certified Teachers.

Anyone interested in beginning or pursuing courses leading to this Certificate should contact the Department of Education in Second Languages (392-8863).

Candidates who wish to benefit from the financial advantages provided through the Ministry of Education for this program are advised to contact their local school authorities for information on procedures to be followed.

Further information regarding this program may be obtained from the office of:

The Chairman,
Department of Education in Second Languages,
Faculty of Education,
3700 McTavish Street,
Montreal, Quebec H3A 1Y2
392-8863 or 8861

5.5.7 TEACHER CERTIFICATION PROGRAM

This program of psycho-pedagogy was inaugurated at the request of the Ministry of Education of Quebec to serve the needs of uncertified teachers who are currently teaching in the school system.

The admission requirements are: a currently valid Quebec Provincial Teaching Authorization; a contract to teach full time in a recognized institution.

Candidates must complete 30 credits of course work selected in consultation with a program adviser according to the following pattern: an appropriate psychology (3 credits); Quebec Education, including School Law (3 credits); a subject methodology (3 credits); supportive teaching strategies or second subject methodology (3 credits); field experience (6 credits); educational theory or teaching strategy electives (12 credits).

Further information regarding this program may be obtained from:

Senior Adviser, Part Time Programs
Faculty of Education
3700 McTavish
Montreal, P.Q. H3A 1Y2
392-8871

5.5.8 CERTIFICATE IN MORAL AND RELIGIOUS FORMATION

A 30-credit program in Moral and Religious Formation has been designed and is awaiting university approval.

Further information regarding this program may be obtained from:

Program Director,
Certificate in Moral and Religious Formation,
Faculty of Education,
3700 McTavish Street,
Montreal, P.Q. H3A 1Y2
392-8810
392-8811

DURATION: 13weeks (30 hours)

This course draws on the fields of learning theory, developmental psychology, and measurement to focus on the tasks of constructing instructional materials. Areas to be considered include behaviour analysis, concept formation, and test construction.

SEMINAR IN SPECIAL TOPICS (3 credits)

414-495Y-71 Wednesdays 6 – 8 p.m. beginning 11 January
DURATION: 15 weeks (30 hours)

The content of the seminar will vary from year to year and will be announced prior to registration. The seminar may be given by a single instructor or by a group, as the occasion warrants. Permission must be obtained from the department before registration

414 – SPECIAL EDUCATION

EDUCATION OF EXCEPTIONAL CHILDREN (3 credits)

414-340X-81/2 Thursdays 6 – 9 p.m. beginning 22 September
414-340X-83 Thursdays 6 – 9 p.m. beginning 22 September
414-340X-64 Tuesdays 4:30 – 7:30 p.m. beginning 20 September PSBGM – Herbert Symonds School
DURATION: 10 weeks (30 hours)

Introduction to the education of exceptional children; characteristics, classification, needs of exceptional children developmental and corrective programs; areas of current research.

GENERAL METHODS IN SPECIAL EDUCATION (3 credits)

414-341Y-81/2/3 Thursdays 6 – 9 p.m. beginning 8 December
414-341Y-64 Tuesdays 4:30 – 7:30 p.m. beginning 6 December PSBGM – Herbert Symonds School
DURATION: 10 weeks (30 hours)

Class organization, teaching methods, assessments of educational level, setting objectives, grouping, individual programming, and reporting.

ORGANIZATION OF SPECIAL EDUCATION PROGRAMS (3credts)

414-342Y-81/2/3 Thursdays 6 – 9 p.m. beginning 9 March
414-342Y-64 Tuesdays 4:30 – 7:30 p.m. beginning 7 March PSBGM – Herbert Symonds School
DURATION: 10 weeks (30 hours)

Needs of EMR, slow-learning and emotionally disturbed children; characteristics, school programs, evaluation of progress, integration into the community.

INTRODUCTION TO DIAGNOSIS AND ASSESSMENT (3 credits)

414-343X-61/2/3 Tuesdays 6 – 9 p.m. beginning 20 September
414-343X-84 Thursdays 4:30 – 7:30 p.m. beginning 22 September PSBGM – Herbert Symonds School
DURATION: 10 weeks (30 hours)

Principles and procedures in the evaluation of pupil growth and achievement. Emphasis on the use and interpretation of tess to be given by the class teacher.

PRACTICUM IN DIAGNOSIS AND ASSESSMENT (3 credits)

414-344Y-81/2 Thursdays 6 – 9 p.m. beginning 8 December
414-344Y-63 Tuesdays 6 – 9 p.m. beginning 7 March
414-344Y-84 Thursdays 4:30 – 7:30 p.m. beginning 9 March
PSBGM – Herbert Symonds School
DURATION: 10 weeks (30 hours)

A supervised practicum in the use of various tests and measures in learning problems of children ; developing prescriptive teaching programs. (Prerequisite: 414-343.)

COGNITIVE AND PSYCHOMOTOR PROBLEMS OF EXCEPTIONAL CHILDREN (3 credits)

414-440X-61/2 Tuesdays 6 – 9 p.m. beginning 20 September
414-440X-83 Thursdays 4:30 – 7:30 p.m. beginning 22 September
PSBGM – Herbert Symonds School
414-440Y-61 Tuesdays 6 – 9 p.m. beginning 6 December
DURATION: 10 weeks (30 hours)

Teaching methods appropriate to individual and small group instruction to overcome a variety of learning problems. Emphasis on perceptual difficulties. (prerequisite: 414-341 & 414-342)

BEHAVIOURAL PROBLEMS OF EXCEPTIONAL CHILDREN (3 credits)

414-441X-81/2 Thursdays 6 – 9 p.m. beginning 22 September
414-441Y-61 Tuesdays 4:30 – 7:30 p.m. beginning 6 December
PSBGM – Herbert Symonds School
414-441Y-62 Tuesdays 6 – 9 p.m. beginning 7 March
DURATION: 10 weeks (30 hours)

Teaching methods appropriate to the needs of pupils with emotional and behaviour problems. Methods presented will include modification techniques.

PSYCHOLOGY OF LEARNING PROBLEMS (3 credits)

414-442X-61 Tuesdays 4:30 – 7:30 p.m. beginning 20 September
PSBGM – Herbert Symonds School
414-442Y-61 Tuesdays 6 – 9 p.m. beginning 6 December
414-442Y-82/3 Thursdays 6 – 9 p.m. beginning 9 March
DURATION: 10 weeks (30 hours)

The Learning Process: personality development; perceptual dysfunction, behaviour disorders and other handicapping conditions related to learning

SCHOOL-HOME-COMMUNITY RELATIONS IN SPECIAL EDUCATION (3 credits)

414-443X-71 Wednesdays 6 – 9 p.m. beginning 21 September
414-443Y-71 Wednesdays 4:30 – 7:30 p.m. beginning 7 December
PSBGM – Herbert Symonds School
414-443Y-72 Wednesday 6 – 9 p.m. beginning 8 March
DURATION: 10 weeks (30 hours)

Influence of home and community on the child, teacher-parent interviews, reporting, co-operation with hospital clinics, other professionals, etc.

MATERIALS IN SPECIAL EDUCATION (3 credits)

414-444Y-71/2 Wednesdays 6 – 9 p.m. beginning 7 December
414-444Y-73 Wednesdays 4:30 – 7:30 p.m. beginning 8 March
PSBGM – Herbert Symonds School
DURATION: 10 weeks (30 hours)

A critical examination of materials available for special education programs, commercial and teacher-made materials; the application of A-V techniques to Special Education.

VOCATIONAL HABILITATION OF EXCEPTIONAL CHILDREN (3 credits)

414-445Y-71 Wednesdays 6 – 9 p.m. beginning 8 March
DURATION: 10 weeks (30 hours)

Vocational requirements of non-academic children, vocational preparation as a responsibility of the special class teacher, placement services, follow-up.

SPECIAL TOPIC: CULTURALLY DISADVANTAGED (3 credits)

414-446X-71 Wednesdays 4:30 – 7:30 p.m. beginning 21 September
PSBGM – Herbert Symonds

SPECIAL TOPIC: INDIVIDUALIZED PROGRAMS (3 credits)

414-446Y-71/2 Wednesdays 6 – 9 p.m. beginning 7 December

SPECIAL TOPIC: GIFTED (3 credits)

414-446Y-73 Wednesdays 4:30 – 7:30 p.m. beginning 8 March
PSBGM – Herbert Symonds School

SPECIAL TOPIC: BEHAVIOUR MODIFICATION (3 credits)

414-446Y-84 Thursdays 4:30 – 7:30 p.m. beginning 9 March
PSBGM – Herbert Symonds School
DURATION: 10 weeks (30 hours)

A seminar or workshop approach to selected topics in the field of Special Education. Examples of possible topics include Language Development, Educable Retarded Adolescents, and Behaviour Modification.

415 – Catholic Studies

ψ **IN SEARCH OF MAN (3 credits)**

415-208Y-61 Tuesdays 8 – 10 p.m. beginning 10 January
DURATION: 15 weeks (30 hours)

An exploration of man's place in the world; his role as a knower; his dynamic responses to his environment; his ultimate nature as a human person.

ψ **GUIDE TO READING THE BIBLE (3 credits)**

415-290X-61 Tuesdays 8 – 10 p.m. beginning 13 September
DURATION: 14 weeks (30 hours)

A basic introduction to the Judaeo-Christian Scriptures with the emphasis upon reading and existential interpretation.

RELIGIOUS RESPONSE IN THE ELEMENTARY SCHOOL (3 credits)

415-341Y-61 Tuesdays 6 – 8 p.m. beginning 10 January
DURATION: 15 weeks (30 hours)

In harmony with the discoveries of developmental religious and moral phases in the life of the elementary school child, this course explores developing programs and procedures in the elementary school.

ψ **VARIETIES OF CHRISTIAN WITNESS (3 credits)**

415-397X-61 Tuesdays 6 – 8 p.m. beginning 13 September
DURATION: 14 weeks (30 hours)

An exploration of divergent paths of Christian Witness as exemplified in the lives and writings of Thomas Merton, contemplative-critic, and Teihard de Chardin, philosopher-scientist.

417 – Education in Science

ψ **BACKGROUND SCIENCE FOR ELEMENTARY SCHOOL TEACHERS (3 credits)**

417-241Y-51 Mondays 6:30 – 9 p.m. beginning 9 January
DURATION: 12 weeks (30 hours)
RESTRICTION: Maximum 25 students

This course presents science as a means of exploring and explaining our environment. A study of some of the fundamental concepts common to most elementary programs – an elective.

CURRICULUM AND INSTRUCTION IN ELEMENTARY SCIENCE (3 credits)

417-442X-51 Mondays 6:30 – 9 p.m. beginning 12 September
DURATION: 12 weeks (30 hours)
RESTRICTION: Maximum 25 students

A survey of modern curricula and teaching strategies in use at the elementary school levels and the design of suitable exploratory activities using simple equipment to give children some appreciation of the nature of science.

426 – Education in Art

ψ **STUDIO ART – DRAWING (3 credits)**

426-204X-61 Tuesdays 7 – 10 p.m. beginning 11 October
426-204Y-61 Tuesdays 7 – 10 p.m. beginning 10 January
DURATION: 10 weeks (30 hours)

Development of sound draughtsmanship; exploration of various forms of graphic expression; various media.

ψ **STUDIO ART – PAINTING (3 credits)**

426-205X-81 Thursdays 7 – 10 p.m. beginning 13 October
426-205Y-81 Thursdays 7 – 10 p.m beginning 12 January
DURATION: 10 weeks (30 hours)

An investigation of media, tools, techniques primarily through studies of natural forms, the human figure.

ψ **GRAPHICS I (3 credits)**

426-206X-51 Mondays 6 – 9 p.m. beginning 19 September
426-206Y-51 Mondays 6 – 9 p.m. beginning 16 January
DURATION: 12 weeks (36 hours)
RESTRICTION: Maximum 12 students

NOTE: The Monday and Tuesday night graphics classes will be held as workshops. Each

student will work at his or her own appropriate level and no student will be permitted to register for more than one level at a time. Priority will be given on Monday nights to Graphics I level students, but, numbers permitting, students at other levels may also join this class. Students at any level may join the Tuesday night workshop up to a maximum of 12 students.

An introduction to some graphic media; monoprints; collagraphy, linocuts, woodcuts, etc. A practical study of the various elementary processes. Exhibition of students' work required at the end of the course.

ψ GRAPHICS II (3 credits)

426-207X-61 Tuesdays 6 – 9 p.m. beginning 27 September
426-207Y-61 Tuesdays 6 – 9 p.m. beginning 17 January
DURATION: 12 weeks (36 hours)
RESTRICTION: Maximum 12 students

Graphics II, III, IV, V, VI will be a combined workshop with a total of 12 students. See 426-206, NOTE.

A study in further graphic media techniques. These may include line engraving, dry point, relief, etching, intaglio, and related processes. Exhibition of students' work required at the end of the course.

ψ GRAPHICS III (3 credits)

426-394X-61 Tuesdays 6 – 9 p.m. beginning 27 September
426-394Y-61 Tuesdays 6 – 9 p.m. beginning 17 January
DURATION: 12 weeks (36 hours)
RESTRICTION: Maximum 12 students

Graphics II, III, IV, V, VI will be a combined workshop with a total of 12 students. See 426-206, NOTE.

A continuation in studies of graphic techniques. These may include variations on previous learned techniques, silk screen, viscosity printing, multiple plate work, etc. Exhibition at the end of the course is required.

ψ GRAPHICS IV (3 credits)

426-395X-61 Tuesdays 6 – 9 p.m. beginning 27 September
426-395Y-61 Tuesdays 6 – 9 p.m. beginning 17 January
DURATION: 12 weeks (36 hours)
RESTRICTION: Maximum 12 students

Graphics II, III, IV, V, VI will be a combined workshop with a total of 12 students. See 426-206, NOTE.

A more advanced study of various graphic media. The student will be expected to be familiar with the standard processes studied in the preceding courses. At this stage the student should begin to concentrate on developing a personal style, incorporating the necessary techniques to make his personal statement.

ψ GRAPHICS V (3 credits)

426-494X-61 Tuesdays 6 – 9 p.m. beginning 27 September
426-494Y-61 Tuesdays 6 – 9 p.m. beginning 17 January
DURATION: 12 weeks (36 hours)
RESTRICTION: Maximum 12 students

Graphics II, III, IV, V, VI will be a combined workshop with a total of 12 students. See 426-206, NOTE.

An extension of skills learned in Graphics I – IV. Techniques explored may be engraving, silk screen, relief, intaglio, collagraphy, dry point, combination printing. The student will be expected to explore those areas which most closely correspond to his particular graphics style. An exhibition of students' work is required at the end of the course.

ψ GRAPHICS VI (3 credits)

426-495X-61 Tuesdays 6 – 9 p.m. beginning 27 September
426-495Y-61 Tuesdays 6 – 9 p.m. beginning 17 January
DURATION: 12 weeks (36 hours)
RESTRICTION: Maximum 12 students

Graphics II, III, IV, V, VI will be a combined workshop with a total of 12 students. See 426-206, NOTE.

A further extension of skills learned in Graphics I-V. The student is expected to have mastered basic graphic skills and be able to work independently. A competent development of personal style experimentation with, and control over the chosen medium is expected.

ψ INTRODUCTION TO CERAMICS (3 credits)

426-208X-61 Tuesdays 7 – 10 p.m. beginning 11 October
426-208Y-61 Tuesdays 7 – 10 p.m. beginning 10 January
DURATION: 10 weeks (30 hours)
RESTRICTION: Maximum 12 students

A consciousness of the medium is developed through basic ceramic processes; hand building experiences and introduction to wheel thrown constructions.

ψ CERAMICS II (3 credits)

426-209X-81 Thursdays 7 – 10 p.m. beginning 13 October
426-209Y-81 Thursdays 7 – 10 p.m. beginning 12 January
DURATION: 10 weeks (30 hours)
RESTRICTION: Maximum 12 students.

A continuation and concentration of wheel projects. Elementary clay and glaze preparations. (prerequisite: 426-208)

ψ CERAMICS III (3 credits)

426-300X-81 Thursdays 7 – 10 p.m. beginning 13 October
426-300Y-81 Thursdays 7 – 10 p.m. beginning 12 January
DURATION: 10 weeks (30 hours)
RESTRICTION: Maximum 12 students

Ceramics II-IV will be a combined workshop with a total of 12 students.

Chemistry of glazes, formation of slips, engobes and glaze. Firing and maintenance of kiln equipment. (prerequisite: 426-209)

ψ CERAMICS IV (3 credits)

426-309X-81 Thursdays 7 – 10 p.m. beginning 13 October
426-309Y-81 Thursdays 7 – 10 p.m. beginning 12 January

DURATION: 10 weeks (30 hours)
RESTRICTION: Maximum 12 students

Ceramics II-IV will be a combined workshop with a total of 12 students

Chemistry of glazes. Emphasis placed on lab work. Firing and maintenance of kiln and equipment. (prerequisite: 426-300)

ψ BASIC ART MEDIA (3 credits)

426-241X-51 Mondays 6 – 9 p.m. beginning 12 September
DURATION: 10 weeks (30 hours)
RESTRICTION: Maximum 20 students. Not open to students who have taken 426-296

A course designed for the classroom teacher to develop sensitivity to visual design. A program of experimentation in a variety of art media suitable for application to art in the classrooms of elementary schools.

ψ BASIC DESIGN (3 credits)

426-296X-61 Tuesdays 7 – 10 p.m. beginning 4 October
DURATION: 10 weeks (30 hours)
RESTRICTION: Maximum 20 students

Exploration of the basic elements of visual art through two dimensional compositions and three dimensional constructions. Investigation of materials and tools and the processes of manipulating and relating materials.

ψ DESIGN II (3 credits)

426-297Y-61 Tuesdays 7 – 10 p.m. beginning 7 February
DURATION: 10 weeks (30 hours)
RESTRICTION: Maximum 20 students

Further rendering of two and three dimensional compositions (426-296) investigating the potential of basic geometric and organic forms, spatial relationships and invironment. (prerequisite: 426-296)

ART CURRICULUM AND INSTRUCTION – LATER CHILDHOOD (3 credits)

426-332Y-51 Mondays 6 – 9 p.m. beginning 9 January
DURATION: 10 weeks (30 hours)
RESTRICTION: Maximum 20 students

To prepare teachers to understand and guide the visual art of children from nine to twelve years of age. (Prerequisite: 426-241 or equivalent.)

427 – Reading

READING INSTRUCTION – EARLY CHILDHOOD (3 credits

427-223X-71 Wednesdays 6 – 8 p.m. beginning 14 September
427-223X-62 Tuesdays 4:30 – 7:30 p.m. beginning 20 September PSBGM – Van Horne School
427-223Y-71/2 Wednesdays 6 – 8 p.m. beginning 18 January
427-223Y-73 Wednesdays 4:30 – 7:30 p.m. beginning 18 January SSPRSB – Chambly County High School
427-223Y-94 Saturdays & Sundays beginning January – Quebec City
DURATION: 30 hours

Methods and materials for the teaching of reading in the primary grades.

CORRECTIVE READING INSTRUCTION – EARLY CHILDHOOD (3 credits)

427-224Y-51 PRACTICUM

Instructor's permission required to register. 427-223 prerequisite.

READING INSTRUCTION – LATER CHILDHOOD (3 credits)

427-233X-71 Wednesdays 6 – 8 p.m. beginning 14 September
427-233X-72/3 Wednesdays 6 – 8 p.m. beginning 14 September
427-233X-74 Wednesdays 4:30 – 7:30 p.m. beginning 21 September SSPRSB – Chambly County High School
427-233Y-71 Wednesdays 5 – 7 p.m. beginning 18 January

427-233Y-62 Tuesdays 4:30 – 7:30 p.m. beginning 17 January PSBGM – Van Horne School
DURATION: 30 hours

Methods and materials for the teaching of reading in the upper elementary grades

CORRECTIVE READING INSTRUCTION – LATER CHILDHOOD (3 credits)

427-234Y-51 PRACTICUM

Instructor's permission required to register. 427-233 prerequisite

ψ **CHILDREN'S LITERATURE (3 credits)**

427-344X-51 Mondays 4:30 – 7:30 p.m. beginning 19 September Chateauguay
427-344X-82 Thursdays 4:30 – 6:30 p.m. beginning 15 September Lakeshore – John Rennie High School
427-344X-93 Saturdays & Sundays beginning September – Quebec City
427-344Y-81/2 Thursdays 6 – 8 p.m. beginning 19 January
427-344Y-63 Tuesdays 4:30 – 7:30 p.m. beginning 17 January PSBGM – Van Horne School
DURATION: 30 hours

Selection and use of literature suitable for children in the elementary school.

ψ **LITERATURE FOR YOUNG ADULTS (3 credits)**

427-345X-81/2 Thursdays 6 – 8 p.m. beginning 15 September
427-345X-93 Saturdays & Sundays beginning September Quebec City
DURATION: 30 hours

A study of the strategies of developing reading habits and tastes among high school students. The selection of works in a variety of genres suitable to different abilities and interests will be discussed.

INTRODUCTION TO READING DIAGNOSIS (3 credits)

427-309X-51 Mondays 4:30 – 6:30 p.m. beginning 12 September
DURATION: 13 weeks (30 hours)

This course is to explain the pragmatic and theoretical developments of various reading tests and remediation techniques. This course will use test manuals, articles from research and pedagogical journals and professional texts. Competency in administering tests and in applying instructional techniques will be developed. (prerequisite: Reading Instruction core courses or permission of program director).

SPECIAL TOPIC: EFFECTIVE CLASSROOM COMMUNICATION (3 credits)

427-446X-61 Tuesdays 5 – 7 p.m. beginning 13 September
DURATION: 14 weeks (30 hours)

This course presents a general theory of effective communication in human relationships, particularly between teacher and students. Specific methods presented will be helpful in: 1) Developing responsibility and independence in students 2) Resolving classroom conflicts through problem solving 3) Working out a "contract" which defines rules for classroom behaviour 4) Non-evaluative listening.

SPECIAL TOPIC: LANGUAGE, SPEECH & HEARING DEVELOPMENT – EARLY CHILDHOOD (3 credits)

427-446Y-51 Mondays 5 – 8 p.m. beginning 16 January
DURATION: 10 weeks (30 hours)

An overview of language acquisition and hearing/language/speech problems in children from birth through early childhood. Procedures will be presented for fostering normal development, detecting or preventing problems in hearing, speech, and language, and helping children with these difficulties. The role of the classroom teacher will be stressed.

READING INSTRUCTION – HIGH SCHOOL (3 credits)

427-523Y-51 Mondays 5 – 7 p.m. beginning 9 January
427-523Y-92 Saturdays & Sundays beginning January Quebec City
DURATION: 30 hours

Methods and materials for the teaching of developmental reading at the high school level.

INTEGRATED LANGUAGE ARTS (3 credits)

427-533X-61 Tuesdays 6 – 8 p.m. beginning 13 September
427-533X-72 Wednesdays 4:30 – 7:30 p.m. beginning 21 September SSPRSB – Chambly County High School
427-533X-63 Tuesdays 4:30 – 7:30 p.m. beginning 30 September PSBGM – Van Horne School
427-533Y-61 Tuesdays 6 – 8 p.m. beginning 17 January
DURATION: 30 hours

Methods and materials for integrating reading, listening, writing, speaking aspects of communications instruction.

READING IN THE CONTENT FIELDS (3 credits

427-576X-51 Mondays 4:30 – 6:30 p.m. beginning 12 September
427-576X-52/3 Mondays 6 – 8 p.m. beginning 12 September
427-576Y-51 Mondays 6 – 8 p.m. beginning 9 January
427-576Y-82 Thursdays 4:30 – 6:30 p.m. beginning 19 January
Lakeshore – John Rennie High School
427-576Y-73 Wednesdays 4:30 – 7:30 p.m. beginning 5 April
SSPRSB – Chambly County High School
DURATION: 30 hours

An exploration of reading instruction in secondary programs in the content fields; survey of remedial and developmental reading instruction throughout the elementary and secondary schools, together with review of research in secondary reading.

CORRECTIVE READING INSTRUCTION AT THE HIGH SCHOOL LEVEL (3 credits)

427-577Y-51 PRACTICUM

Instructor's permission required to register. 427-523 prerequisite

427 – Education in English

ψ **CREATIVE DRAMATICS FOR THE CLASSROOM (3 credits)**

427-594X-71 Wednesdays 6 – 8 p.m. beginning 14 September
427-594Y-61 Tuesdays 4:30 – 6:30 p.m. beginning 17 January
DURATION: 15 weeks (30 hours)
RESTRICTION: Maximum 25 students

A course in Creative Drama and in the use of Improvisional Techniques in the pursuit of child development. Theories of creative drama will be considered, but the emphasis will be on practical activities and exercise.

ψ **IMPROVISATION & THEATRE ARTS FOR THE CLASSROOM (3 credits)**

427-595Y-71 Wednesdays 6 – 8 p.m. beginning 18 January
DURATION: 15 weeks (30 hours)
RESTRICTION: Maximum 25 students

A course beyond the introduction level to provide further perspectives on the teaching of drama and the techniques of improvisation. Instruction and practice in play production will be included. (prerequisite: 427-594)

428 – Education in Mathematics

ψ **BACKGROUND MATHEMATICS FOR ELEMENTARY SCHOOL TEACHERS (3 credits)**

428-241X-61 Tuesdays 6:30 – 8:30 p.m. beginning 13 September
DURATION: 14 weeks (30 hours)

A course specially designed for elementary school teachers to provide the basic foundations, insight and understanding of the Quebec modern elementary mathematics program. Recommended for all elementary school teachers.

ψ **GEOMETRY FOR ELEMENTARY SCHOOL TEACHERS (3 credits)**

428-243Y-61 Tuesdays 6:30 – 8:30 p.m. beginning 10 January
DURATION: 15 weeks (30 hours)

A course specially designed for elementary school teachers to provide the basic foundations, insight and understanding of the geometry found in the Quebec modern elementary mathematics program.

PERSPECTIVES ON ELEMENTARY MATHEMATICS EDUCATION (3 credits)

428-443Y-61 Tuesdays 6 – 8 p.m. beginning 10 January
DURATION: 15 weeks (30 hours)

A course to provide a deeper perspective of modern elementary mathematics education through a study of the active learning approach, use of structured materials, modern mathematics projects and research.

MATHEMATICAL DEVELOPMENT IN ELEMENTARY SCHOOL CHILDREN (3 credits)

428-445X-51 Mondays 7 – 9 p.m. beginning 12 September
DURATION: 14 weeks (30 hours)
RESTRICTION: Maximum 25 students

A study designed for "free flow" teachers, of the development of mathematical thought in elementary school aged children. The sequencing of mathematical concepts is also analysed. All processes are interpreted with reference to contemporary elementary mathematics curricula including those approved for use in Quebec. (prerequisite: 428-322 or 428-332)

DIAGNOSIS AND REMEDIATION IN MATHEMATICS FOR ELEMENTARY SCHOOL TEACHERS (3 credits)

428-447Y-51 Mondays 7 – 9 p.m. beginning 9 January
DURATION: 15 weeks (30 hours)
RESTRICTION: Maximum 25 students

An introductory analysis of procedures used for diagnosis and remediation in mathematics at the

elementary school level. Attention is given to formal and informal techniques and practice is given in preparing tests and analyzing results. (prerequisite: 428-445)

429 – Education in Music

ψ **BASIC MUSICIANSHIP FOR CLASSROOM TEACHERS I (3 credits)**

429-201X-51 Mondays 5 – 7 p.m. beginning 12 September
429-201Y-61 Tuesdays 5 – 7 p.m. beginning 10 January
DURATION: 15 weeks (30 hours)
RESTRICTION: Maximum 17 students

Introduction to the elements of music theory through techniques of aural training, sight, singing, keyboard and written applications to be presented as the classroom teacher should teach such elements of music to elementary school students.

ψ **UKULELE FOR CLASSROOM TEACHERS (1 credit)**

429-204X-71 Wednesdays 5 – 6 p.m. beginning 14 September
DURATION: 15 weeks (15 hours)
RESTRICTION: Maximum 20 students

Students need not have any previous experience in music. The objectives of the course are to teach the basic skills of Ukulele playing (picing and strumming), to present ear training indirectly, to teach the basic concepts of theory, and to increase the enjoyment of music. Musical learning obtained may be transferred to the guitar at a later date.

UKULELE II (non credit)

650-212Y-71 Wednesdays 5 – 6 p.m. beginning 11 January
DURATION: 15 weeks (15 hours)
RESTRICTION: Maximum 20 students

Continuation of Ukulele I. Concentration on the following: picing, fast picing in the classroom, working with minor modes and use of songs with more complicated chord structures. (prerequisite: 429-204).

ψ **BASIC MUSICIANSHIP FOR CLASSROOM TEACHERS II (3 credits)**

429-301Y-71 Wednesdays 6 – 8 p.m. beginning 11 January
DURATION: 15 weeks (30 hours)

Advanced course in the study of the elements of music theory through techniques of aural training, sight singing, keyboard, and written applications to be presented as the classroom teacher should teach such elements of music to elementary school students. (Prerequisites: 429-201 and permission of instructor.)

MUSIC CURRICULUM AND INSTRUCTION – EARLY CHILDHOOD (3 credits)

429-322X-61 Tuesdays 6 – 8 p.m. beginning 13 September
DURATION: 15 weeks (30 hours)

Understanding of the musical development of children at this level by class participation in listening, singing, playing instruments, creating and moving to music. Materials and methods of planning the above experiences.

MUSIC CURRICULUM AND INSTRUCTION – LATER CHILDHOOD (3 credits)

429-332Y-61 Tuesdays 6 – 8 p.m. beginning 10 January
DURATION: 15 weeks (30 hours)

Materials, methods, planning and organizing of musical experiences for later childhood classes through class participation in singing, playing, moving, creating; reading music and listening activities.

431 – Education in Second Language

PSYCHOLINGUISTICS AND SECOND LANGUAGE TEACHING (3 credits)

431-305X-61 Tuesdays 6 – 8 p.m. beginning 13 September
DURATION: 15 weeks (30 hours)

Exploration of areas in psycholinguistics relevant to second language teaching: theories of language acquisition, relationship between first and second language learning, student motivation and individual differences in second language learning, problems of meaning; various educational aspects of bilingualism. (Prerequisites: Introductory course in general or applied linguistics; permission of instructor). Course is given in English.

DIFFICULTIES ANTICIPATED IN SECOND-LANGUAGE TEACHING (3 credits)

431-307X-81 Thursdays 6 – 8 p.m. beginning 15 September
DURATION: 14 weeks (30 hours)

Study of error-analysis; nature and sources of linguistic transfer and its implication for second language teaching; introduction to contrastive linguistics with special applications to the areas that are within the objectives of the various programs of the different school levels. Collection of samples of pupils' second language oral and written production, analysis of errors and planning relevant remedial exercises to be used with these pupils. Course offered in French. (Prerequisites: One basic course in general or applied linguistics). Language proficiency test required.

TEACHING FRENCH AS A SECOND LANGUAGE – ELEMENTARY SCHOOL (6 credits)

431-544Z-71 Wednesdays 6 – 8 p.m. beginning 14 September
DURATION: 30 weeks (60 hours)

Principles of second language teaching. An intensive study of the curriculum: objectives and development; lesson planning, micro-teaching; second language teaching strategies and techniques. Instructor's permission to register required. Course is given in French. Language proficiency test required.

TEACHING ENGLISH AS A SECOND LANGUAGE – SECONDARY SCHOOL (6 credits)

431-558Z-51 Mondays 6 – 8 p.m. beginning 12 September
DURATION: 27 weeks (60 hours)
RESTRICTION: Maximum 25 students

Principles of ESL teaching. Objectives and curriculum. Language skills at secondary level; examination and preparation of classroom materials. Lesson planning, training in microteaching situations. Course is given in English.

432 – Educational Media

EDUCATIONAL MEDIA I (3 credits)

432-204X-61 Mondays 7 – 9 p.m. beginning 12 September
432-204Y-61 Tuesdays 7 – 9 p.m. beginning 10 January
DURATION: 14 weeks (30 hours)
RESTRICTION: Maximum 20 students

Application of educational media to the elementary and secondary school teaching and learning situations; rationale and underlying principles, the sources, selection production, effective utilization and evaluation of the media.

FILM PRODUCTION AND FILM CRITICISM (3 credits)

432-205X-61 Tuesdays 7 – 9 p.m. beginning 13 September
DURATION: 14 weeks (30 hours)
RESTRICTION: Maximum 15 students

A study of the educational uses of motion-pictures with an emphasis on super 8mm film production utilization

MEDIA AND INSTRUCTIONAL DESIGN (3 credits)

432-209Y-51 Mondays 7 – 9 p.m. beginning 9 January
DURATION: 15 weeks (30 hours)

The examination and application of the systematic planning techniques necessary in the design, development and validation of effective instructional materials.

PHOTOGRAPHY I (3 credits)

432-303X-71 Wednesdays 7 – 9 p.m. beginning 14 September
DURATION: 14 weeks (30 hours)
RESTRICTION: Maximum 20 students

An introduction to the history, utilization, research, and principles of photography as it relates to education, with an emphasis on developing the visual literacy and basic photographic techniques of teachers. The course will consist of lectures, seminars and production exercises.

EDUCATIONAL TELEVISION (3 credits)

432-306X-81 Thursdays 6 – 9 p.m. beginning 15 September
DURATION: 10 weeks (30 hours)
RESTRICTION: Maximum 15 students

This course will survey the development of ETV with particular reference to current topics including children's TV programs, cable and closed circuit ETV. Short TV productions will take place in class to encourage a critical analysis of the potential of portable TV equipment for local teacher and student production.

PHOTOGRAPHY II (3 credits)

432-403Y-81 Thursdays 7 – 9 p.m. beginning 12 January
DURATION: 15 weeks (30 hours)
RESTRICTION: Maximum 15 students

A continuation of the study and application of photography in education with an emphasis on the development of intermediate level photographic skills. (Prerequisite: 432-303)

CONTEMPORARY DEVELOPMENTS IN EDUCATIONAL MEDIA (3 credits)

432-404Y-81 Thursdays 5 – 7 p.m. beginning 12 January
DURATION: 15 weeks

A critical examination of current trends in educational technology including educational television, simulation and gaming computer-assisted instructions, systems analysis, programmed instruction, etc.

INDEPENDENT PROJECT (6 credits)

432-405Z-51 by arrangement with EMC Director
DURATION: 60 hours

An intensive media production undertaken by the student after consultation with and the approval of the Director of the Library-Media program.

MANAGEMENT OF EDUCATIONAL MEDIA SERVICES (3 credits)

432-406X-81 Wednesdays 5 – 7 p.m. beginning 14 September
DURATION: 14 weeks (30 hours)

An examination of the development and management of media services at the school and district level. The design of instructional facilities, the administration of materials, equipment and production services, budgeting, personnel management, and the promotion of effective media utilization will be studied.

SPECIAL TOPICS IN EDUCATIONAL MEDIA: PROGRAMMED INSTRUCTION (3 Credits)

432-409X-61 Tuesdays 5 – 7 p.m. beginning 13 September
DURATION: 14 weeks (30 hours)

Seminars and workshops which examine specific topics in Educational Media. The topics will be chosen to reflect current concerns in the field, to exploit the expertise of guest lecturers, or to meet the media needs of special interest groups, and will vary from year to year.

MEDIA CURRICULUM AND INSTRUCTION: ELEMENTARY (3 credits)

432-440Y-71 Wednesdays 7 – 9 p.m. beginning 11 January
DURATION: 15 weeks (30 hours)

An examination of the effect of mass media on children and education, and the concepts and methods related to developing visual literacy. A materials centered workshop approach to teaching elementary school children how to utilize and produce media materials as part of their curricular and extra-curricular activities.

434 – Physical Education

ψ **FOUNDATIONS OF MOVEMENT EDUCATION (3 credits)**

434-224X-61 Tuesdays 6 – 9 p.m. beginning 13 September
DURATION: 10 weeks (30 hours)
RESTRICTION: Maximum 25 students

Personal and creative activity in manipulative, non-manipulative and expressive motor activity; the study of basic movement education concepts, principle of movement and the role of movement education in the life of the developing child.

ψ **INTRODUCTION TO COMMUNITY RECREATION (3 credits)**

434-291Y-71 Wednesdays 6:30 – 9:30 p.m. beginning 18 January
DURATION: 10 weeks (30 hours)

The need for, scope of, and problems associated with community recreation will be studied. The relationship between the organizational structure and programs offered by a recreation agency will be examined. Students will study the different types of recreation agencies within a community and consider means to coordinate their services.

MOVEMENT EDUCATION – CURRICULUM AND INSTRUCTION – EARLY CHILDHOOD (3 credits)

434-321Y-71 Wednesdays 6 – 9 p.m. beginning 25 January
DURATION: 10 weeks (30 hours)
RESTRICTION: Maximum 25 students

Offered to Diploma in Education students.

PHYSICAL EDUCATION CURRICULUM AND INSTRUCTION – LATER CHILDHOOD (3 credits)

434-332X-71 Wednesdays 5 – 8 p.m. beginning 14 September
DURATION: 10 weeks (30 hours)

Offered to B.Ed. students with the exception of Physical Education majors.

SCIENTIFIC PRINCIPLES OF ATHLETIC TRAINING (3 credits)

434-495X-71 Wednesdays 6 – 9 p.m. beginning 14 September
DURATION: 10 weeks (30 hours)

Application of physiological and kinesiological principles in the selection, administration and evaluation of athletic conditioning programs; specific topics studied will include circulorespiratory training, intermittent training, isometric training, weight training, calisthenic principles and circuit training methods.

ψ **PHYSICAL EDUCATION FOR EXCEPTIONAL CHILDREN (3 credits)**

434-496Y-61 Tuesdays 6 – 9 p.m. beginning 17 January
DURATION: 10 weeks (30 hours)

Identification, evaluation, and remediation techniques basic to the development of effective physical education programs for educable mentally retarded children and children with specific learning disabilities; Progressive motor learning experiences related to body image, spatial relations, eye-hand coordination, and balance will be developed, applied and evaluated. Consent of instructor required.

495 – Law

ENVIRONMENTAL LAW FOR CITIZENS (3 credits)

495-472X-61 Tuesdays 6 – 8 p.m. beginning 20 September

DURATION: 13 weeks (26 hours and project)

This course will delve into the basic legal aspects of environmental issues. Federal and provincial statutes, municipal legislation, court system and citizen action will be discussed.

6 ENGINEERING

MRS. EVA ST-PIERRE
Program Co-ordinator
392-4935

6.1 INTRODUCTION

The 1977-78 evening program in Engineering offers two Certificate Programs, one in Textile Technology and one in Computer Programming. Graduate level courses leading to an M. Eng., and general interest courses are also offered.

6.2 APPLICATION FOR ADMISSION

Students wishing to follow a Certificate Program must complete an "application for acceptance into a program". For details of the procedure to be followed contact the department.

6.3 CONVOCATION

Please see Page 10.

6.4 COUNSELLING

Counselling is available during regular office hours prior to registration. No counselling will be done during the official registration period.

6.5 LIBRARIES

All students registered in the Engineering Department have full library privileges at McLennen Library and the Engineering Library upon presentation of their student card of admission.

6.6 PREREQUISITES

It is the responsibility of each student to ensure that he has completed the prerequisites listed for the course(s) for which he intends to register.

6.7 REGISTRATION

Please see page 7 of the General Information

6.8 REGULATIONS AND PROCEDURES

Please see Page 11.

6.9 TIMETABLE

A listing of instructors, textbooks, buildings and room numbers for all courses will be distributed at time of registration. Please ask for a copy.

IT IS THE RESPONSIBILITY OF EACH STUDENT TO READ, UNDERSTAND AND ABIDE BY THE REGULATIONS AND PROCEDURES PRINTED IN THIS BOOKLET.

6.10 TEXTILE TECHNOLOGY

The Centre for Continuing Education in co-operation with the Canadian Association of Textile Colourists and Chemists (CATCC) Quebec Section, and the Department of Chemical Engineering offers courses which lead to the "Certificate of Advanced Technology in Dyeing and Finishing". The aim of the program is to introduce the student to the underlying scientific and engineering principles of textile processing, with particular emphasis on dyeing and finishing.

These courses are not restricted to people who wish to qualify for the Certificate but may also be of interest to people in related colour using industries such as paints and plastics.

CERTIFICATE OF ADVANCED TECHNOLOGY IN DYEING AND FINISHING

PROGRAM REQUIREMENTS

Six courses will be offered in all. There will be an examination at the completion of each course and a mark of "C" must be attained in order to qualify for the certificate. Students who successfully complete all six courses will be awarded the McGill Certificate of Advanced Technology in Dyeing and Finishing. These students will also receive a certificate from the CATCC (Quebec Section).

Students entering the program should have completed High School or CATCC's textile courses 101, 102, and 103. Others with several years of relevant industrial experience at the supervisory level are eligible to take thses courses.

The six courses which make up the program are:

Engineering Principles
Polymers and Fibres
Colour Physics and Colour Measurement
Chemistry of Dyestuffs and Auxiliaries
Colouration Systems and Physical Chemistry of Dyeing
Testing and Analytical Procedures

Prospective students seeking further information should contact:

Mr. F. Peach
CATCC (Quebec)
Telephone: 878-1581
Local: 459

6.10.1 COURSES TO BE OFFERED IN 1977-78 ARE:

ENGINEERING PRINCIPLES

662-200X-61	Tuesdays 6 – 9 p.m.
FEE:	$100.00
DURATION:	15 lectures (45 hours) beginning 13 September

Fundamental principles and laws of engineering physics, fluid mechanics, thermodynamics and transfer processes. Application of the laws of conservation of mass and energy to steady and transient processes. Properties of liquids and gases with selected practical examples. Hydrostatics, fluid flow, friction losses, pumping. Properties and strength of materials, stress and strain calculations,

safety factors. Selected unit operations and processes of relevance to the class population (e.g. drying, extraction, absorption, etc.). Examples and practical applications of principles covered involving only simple mathematics explained where necessary.

POLYMERS AND FIBRES

662-201Y-81 Thursdays 6 – 9 p.m.
FEE: $100.00
DURATION: 15 lectures (45 hours) beginning 19 January

This course will deal with the nature of Polymers and of polymerization reactions. Methods of characterizing polymers will be discussed e.g. viscosity and D.P. determination. Relationships between polymer structure and physical properties will be dealt with and special reference will be made to natural and synthetic polymers used as textile fibres.

6.11 COMPUTER PROGRAMMING

6.11.1 McGILL CERTIFICATE IN COMPUTER PROGRAMMING

PROGRAM REQUIREMENTS

Students may qualify for a McGill Certificate in Computer Programming by completing 4 core courses and 3 electives from those listed below. In order to progress in the Certificate Program at least a "C" must be attained in each course. Students wishing exemptions in equivalent courses must apply in writing, but a minimum of 6 courses must be taken at McGill, a minimum of 5 being in the evening. A grade of "B" or better must be obtained in the course for which exemption is requested.

Registration is limited to 35 students per class and the course fee contains a laboratory fee for use of the computer and keypunches. As all courses involve a considerable amount of practical work, students will not be allowed to register for more than 2 courses per term. Students usually find it necessary to spend an extra evening at the University in order to complete the computer assignments.

CORE

Introduction to Programming
Computers in Data Processing I
Computer Structure and Assembly Language Programming
Applications in Fortran

ELECTIVES

Computers in Data Processing II
PL/1
Computer Systems and Organization
Mini Computers
Computer-Aided Programming of Numerically Controlled Machine Tools
Computing Methods I
Computing Methods II

6.11.2 COURSE DESCRIPTIONS

* **INTRODUCTION TO PROGRAMMING**

664-100X-51 Mondays 6 – 8 p.m.
664-100X-81 Thursdays 6 – 8 p.m.
FEE: $90.00
DURATION: 12 lectures plus labs (30 hours) beginning week of 12 September
PREREQUISITE: High School Mathematics

Basic computer and programming concepts are taught, including data preparation, the rudiments of the FORTRAN language, flowcharting, problem solving on the computer, and the strategies for performing a number of frequently encountered tasks.

* **APPLICATIONS IN FORTRAN**

664-200X-51 Wednesdays 6 – 8 p.m.
FEE: $90.00
DURATION: 12 lectures plus labs (30 hours) beginning week of 12 September
PREREQUISITE: Introduction to Programming

This course will include Arrays, Subprograms, Data representation and Structures; Numeric and Non-numeric computation.

* **COMPUTER STRUCTURE AND ASSEMBLY LANGUAGE PROGRAMMING**

664-202X-71 Wednesdays 6 – 8 p.m.
FEE: $90.00
DURATION: 12 lectures plus labs (30 hours) beginning week of 12 September
PREREQUISITE: Introduction to Programming

Computer structure, machine language, instruction execution, addressing techniques and digital representation of data. Symbolic coding and assembly systems, program segmentation and linkage.

COMPUTER-AIDED PROGRAMMING OF NUMERICALLY CONTROLLED MACHINE TOOLS

664-203X-81 Thursdays 6 – 8 p.m.
FEE: $90.00
DURATION: 12 lectures plus labs (30 hours) beginning week of 12 September
PREREQUISITE: Introduction to Programming plus some knowledge of machine tool technology.

This course is designed to give an overall view of computer-assisted program preparation for numerically controlled machine tools. Most of the course will deal with the APT language but other languages will be surveyed. Students will be required to write and run working programs.

PL/1

664-300X-81 Thursdays 6 – 8 p.m.
FEE: $90.00
DURATION: 12 lectures plus labs (30 hours) beginning week of 12 September
PREREQUISITE: Applications in Fortran or Computers in Data Processing I

The course will be based primarily on the text Programming Language/one by Bates and Douglas. Advantage will however be taken of students previous experience to compare the language features of FORTRAN, COBOL and PL/1.

COMPUTERS IN DATA PROCESSING II

664-301X-51 Mondays 6 – 8 p.m.
FEE: $90.00
DURATION: 12 lectures plus labs (30 hours) beginning week of 12 September
PREREQUISITE: Computers in Data Processing I

This is a follow-up to Computers in Data Processing I. Students will be introduced initially to the Operating System and given reasonably comprehensive instruction in Job Control Language. A number of jobs will be assigned which require the use of system utilities. Sort/merge techniques and various non-sequential storage techniques will be discussed and a number of jobs assigned which require accessing and updating of the various types of files.

* **COMPUTER SYSTEMS AND ORGANIZATION**

664-310X-61 Tuesdays 6 – 8 p.m.
FEE: $90.00
DURATION: 12 lectures plus labs (30 hours) beginning week of 12 September
PREREQUISITE: Assembler

Hardware concepts. Operating system software – resource allocation dispatching, processors, access methods, job control language, batch processing, multiprogramming, multiprocessing, time sharing.

COMPUTERS IN DATA PROCESSING I

664-201Y-51 Thursdays 6 – 8 p.m.
FEE: $90.00
DURATION: 12 lectures plus labs (30 hours) beginning week of 16 January
PREREQUISITE: Introduction to Programming

The course covers the basic concept in COBOL using a structured programming approach and then applies the COBOL concepts to typical data processing problems involved with sequential file handling.

6.11.3 GRADUATE LEVEL

COMPUTING METHODS I

305-507X-61 Tuesdays 6 – 8 p.m.
FEE: $90.00
DURATION: 12 lectures plus labs (30 hours) beginning week of 12 September
PREREQUISITE: A knowledge of FORTRAN and advanced calculus including matrices

Interpolation, numerical integration, function evaluation, roots of equations of one and several variables, matrices, smoothing and Chebyshev, least square and spline fitting.

COMPUTING METHODS II

305-608Y-61 Tuesdays 6 – 8 p.m.
FEE: $90.00
DURATION: 12 lectures plus labs (30 hours) beginning week of 16 January
PREREQUISITE: Computing Methods I

An extension of Computing Methods I. Solutions to ordinary differential equations (predictor-corrector and Runge-Kutta) Monte Carlo methods, linear programming, regression analysis and eigenvalues.

*Courses marked with an asterisk will be repeated in January.

6.11.4 COURSE LIST BY EVENING AND TIME

Monday 6 – 8

664-100X-51	Introduction to Programming
664-301X-51	Computers in Data Processing II
664-201Y-51	Computers in Data Processing I

Tuesday 6 – 8

664-310X-61	Computer Systems and Organization
304-507X-61	Computing Methods I
305-608Y-81	Computing Methods II

Wednesday 6 – 8

664-200X-71	Applications in Fortran
664-202X-71	Computer Structure and Assembly Language Programming

Thursday 6 – 8

664-100X-81	Introduction to Programming
664-203X-81	Computer-Aided Programming of Numerically Controlled Machine Tools
664-300X-81	PL/1

6.12 MASTER OF ENGINEERING COURSES

The Centre for Continuing Education in co-operation with the Department of Electrical Engineering offers the following graduate level courses which can be credited in the program for The Master of Engineering, Power Systems Option. The requirements of the M.Eng., program B, are the successful completion of nine graduate level courses and an engineering project. The pass mark accepted by the Faculty of Graduate Studies and Research is 65% or a grade of "B".

Prospective M.Eng. students seeking further information should contact:

Power Option Coordinator
Department of Electrical Engineering
McGill University
392-5415

Master of Engineering courses are also offered in the late afternoon and early evening by the

Dept. of Civil Engineering	– 392-5963
Dept. of Chemical Engineering	– 392-5432
Dept. of Mechanical Engineering	– 392-5473

For further information please call the individual Department.

6.12.1 COURSE DESCRIPTIONS

APPLICATION PROBLEMS IN POWER SYSTEMS

660-501Y-51 Mondays and Wednesdays 6 – 8 p.m.
FEE: $100.00
DURATION: 20 lectures (40 hours) beginning 16 January
PREREQUISITE: B. Eng., or Equivalent

Subjects covered will include a brief review of synchronous machines, transformers, induction motors, transmission and distribution systems and such equipment as are encountered in utility and industrial plants. Detailed treatment will be given to short-circuit calculations, circuit breaker selections, system and equipment grounding, system overvoltage and overcurrent. Other subjects include thermal overload characteristics of apparatus, unbalanced loads and the effects of harmonics on power systems.

CONTROL RECTIFIER CIRCUITS

304-564X-56 Mondays and Wednesdays 8 – 10 p.m.
FEE: $100.00
DURATION: 20 lectures (40 hours) beginning 12 September
PREREQUISITE: B.Eng., or equivalent

Simple polyphase rectifiers. Thyristor characteristics. Fully and semi-controlled bridges, interphase transformers. Commutation, regulation and equivalent circuits. Harmonic content. Active loads. Cycloconverters.

HVAC POWER TRANSMISSION

304-663X-61 Tuesdays and Thursdays 6 – 8 p.m.
FEE: $100.00
DURATION: 20 lectures (40 hours) beginning 13 September
PREREQUISITE: B.Eng., or Equivalent

Design considerations of EHV and UHV power transmission systems: audible noise, radio interference, environmental aspects of transmission lines. Coordination of system overvoltages with external and internal insulation strengths leading to economic insulation structures based on quantitative evaluation of reliability.

SUBSTATION APPARATUS

304-665X-66 Tuesdays and Thursdays 8 – 10 p.m.
FEE: $100.00
DURATION: 20 lectures (40 hours) beginning 13 September
PREREQUISITE: B. Eng., or Equivalent

Description and analysis of major apparatus used in modern power systems: circuit breakers, switches, bushings. Electrical connection of substations; principles of equipment selection based on stresses, reliability and economic requirements. Substation protection. Physical arrangement of substations.

HVDC POWER TRANSMISSION

304-664Y-61 Tuesdays and Thursdays 6 – 8 p.m.
FEE: $100.00
DURATION: 20 Lectures (40 hours) beginning 17 January
PREREQUISITE: B. Eng., or Equivalent

Principles of HVDC power, transmission: HVDC transmission circuits, bridge convertor operation, thyristor valve developments, control of HVDC systems, protection of lines and convertor stations, harmonic filtering, modelling techniques for performance studies.

POWER SYSTEM OPERATION

304-666Y-51 Mondays and Wednesdays 6 – 8 p.m.

FEE: $100.00
DURATION: 20 lectures (40 hours) beginning 16 January
PREREQUISITE: B.Eng., or Equivalent

Power system optimality criteria: economic, environmental, reliability factors. Short and long-term load forecasting; simulation of river flows; economic operations of hydroelectric thermal and hydro-steam systems. Planning of additional equipment by the global and marginal approaches. Siting of new plants. Planning on interconnections; maintenance scheduling.

MODERN TECHNIQUES FOR POWER SYSTEM ANALYSIS

304-667Y-56 Mondays and Wednesday 8 – 10 p.m.
FEE: $125.00 (includes $25 for computer)
DURATION: 20 lectures (40 hours) beginning 16 January
PREREQUISITE: B.Eng., or Equivalent

Mathematical descriptions of power systems suitable for computer analysis, and solutions algorithms. Topics will include: matrix algebra, incidence and network matrices, sparse matrix techniques, phase and component representation, short circuit studies, Diakoptics, load flow studies, transient and dynamic stability studies, contingency analysis, state estimation, system identification.

6.12.2 COURSE LIST BY EVENING AND TIME

Monday and Wednesday 6 – 8 p.m.

660-501Y-51 Applications Problems in Power Systems
304-666Y-51 Power System Operations

Monday and Wednesday 8 – 10 p.m.

304-564X-56 Control Rectifier Circuits
304-667Y-56 Modern Techniques for Power System Analysis

Tuesday and Thursday 6 – 8 p.m.

304-663X-61 HVAC Power Transmission
304-664Y-61 HVDC Power Transmission

Tuesday and Thursday 8 – 10 p.m.

304-665X-66 Substation Apparatus

6.13 GENERAL UNDERGRADUATE LEVEL COURSES

INDUSTRIAL INSTRUMENTATION

660-003Z-61 Tuesday 6 – 8 p.m.
FEE: $125.00
DURATION: 25 lectures (50 hours) beginning 13 September
PREREQUISITE: High School Graduation

(In co-operation with the Instrument Society of America, Montreal Chapter)

This introductory course covers industrial process measurements and automatic process control. The first half of the course describes the principles of, and hardware for, taking pressure, level, temperature, flow and analytical measurements, while the second half describes transmission of signals, automatic control theory, final control elements and computer applications.

DESIGN FOR PLASTICS

660-004X-51 Mondays 6 – 8 p.m.
FEE: $60.00
DURATION: 12 lectures (24 hours) beginning 12 September
PREREQUISITE: High School Graduation

This course will cover the Industrial Designer's approach to plastic design. The subject will be treated so as to clarify the various functions of product performance, materials, tooling and processes, in their relationship to the desired comprehensive result. The importance of appearance and color will be stressed. Actual case histories will be used for illustrative purposes, showing industrial, commercial and domestic applications.

INDUSTRIAL WATER POLLUTION CONTROL

660-005X-81 Thursdays 6 – 9 p.m.
FEE: $100.00
DURATION: 15 lectures (45 hours) beginning 15 September
PREREQUISITE: CEGEP Graduation

The following topics will be dealt with in detail: Environmental and Analytical Aspects; Treatment Processes; Industrial Applications. The course emphasizes industrial practise. Examples and problems discussed are based on actual cases, e.g. Oil Refinery Wastewater Treatment Plant; API Separator Design, etc.

6.14 GRADUATE LEVEL COURSES

RELIABILITY ENGINEERING

660-503X-81 Thursdays 6 – 9 p.m.
FEE: $100.00
DURATION: 13 weeks (39 hours) beginning 15 September
PREREQUISITE: B.Eng.

This course should be of interest to engineers working in the various disciplines of engineering. The Probability theory that would be necessary, as background, will be reviewed in the course. Combinational reliability, reliability models for two or more states and standby systems, failure models, system reliability and its improvement. Fault free analysis.

7 LANGUAGES

PROFESSOR P.D. STEWART
Associate Director
392-4901

7.1 INTRODUCTION

The Centre's Languages Department offers courses leading to the following Certificates of Proficiency and Diploma:

Certificate of Proficiency:

English	Italian
French	Russian
German	Spanish
	Translation

Diploma: Translation

Non-certificate courses:

Arabic	Hungarian
Chinese	Japanese
Greek (Modern)	Portuguese

With the exception of Translation courses, all courses offered in the Languages Department are open to any interested person who has the required degree of language competence; there are no academic requirements for admission.

7.2 REGULATIONS AND PROCEDURES

For Regulations and Procedures concerning Registration dates, Refunds, Transfers, Bookstore, etc. please see General Information.

7.3 TIMETABLE

At the time of registration, a listing of instructors, textbooks, buildings and room numbers for all courses will be distributed. Please ask for a copy.

IT IS THE RESPONSIBILITY OF EACH STUDENT TO READ, UNDERSTAND AND ABIDE BY THE REGULATIONS AND PROCEDURES PRINTED IN THIS BOOKLET.

7.4 FRENCH LANGUAGE REQUIREMENTS

On 1 July 1976 the following section of the Official Language Act came into effect:

21. No professional corporation shall issue a permit to a person who does not have a working-knowledge of the French language determined in accordance with the standards established for that purpose by regulation of the Lieutenant-Governor in Council.

A pamphlet entitled "French Language Requirements for Professionals in Quebec" is available from the Centre for Continuing Education.

7.5 PROGRAM REQUIREMENTS

7.5.1 CERTIFICATE OF PROFICIENCY IN ENGLISH AND FRENCH

Candidates for the Certificate of Proficiency in English and in French must complete a total of 270 class-hours if they begin at level One. The 270 hours consist of forty-five hours at Levels One to Four inclusive, plus ninety hours at Level Five. The ninety hour requirement at Level Five includes one oral course and one written course.

Students passing these two Fifth Level courses with a minimum of 75% in each course will be awarded the Certificate of Proficiency.

Students will be exempted from Levels One, Two, Three or Four according to the results of the classification test. The requirement of Level Five must be completed by all candidates for the Certificate.

All five levels of English and French are offered three times each year. Terms begin in September, in January and in May. During the January and May terms, only twice-a-week courses are offered.

7.5.2 CERTIFICATE OF PROFICIENCY IN GERMAN ITALIAN RUSSIAN AND SPANISH

Candidates for the Certificate of Proficiency in German, Italian, Russian or Spanish must complete a total of 200 class-hours if they begin at Level One.

Students passing the Fourth Level course with a minimum of 75% will be awarded the certificate.

Those who have studied these languages at some other institution may be exempted from one or more levels depending on the progress they have made but must take at least 100 hours at the upper levels at the McGill Centre for Continuing Education.

7.5.3 CERTIFICATE OF PROFICIENCY AND DIPLOMA IN TRANSLATION

Prerequisite for Admission: A considerable degree of fluency and correctness in both English and French, especially written.

Applicants for admission must take the entrance examination which is held each year in June. The examination fee is $10.00 (non-refundable). Information regarding admission and exact date may be obtained in April. Applicants will be notified by mail of their admission which is valid only for the year the examination is taken. No dictionaries are permitted at this examination.

After completing First and Second Year, students will normally elect to specialize in English or in French. The Third and Fourth Year courses include French and English sections.

The Certificate of Proficiency in Translation will be awarded to students who pass the Third Year course with a minimum of 70%. The Certificate of Proficiency is prerequisite to registration in Fourth Year. An attendance requirement of not less than 4/5 of all classes held during the year is mandatory.

The Diploma in Translation will be awarded to students who pass the Fourth Year course with a minimum of 70% and the attendance requirement of not less than 4/5 of all classes held during the year.

Students who do not sit a final examination or who are absent from the program for one or more years and wish to be re-admitted must apply in writing to the Committee on Translation Courses before 1 August. Applicants should include their phone numbers. Applications will be judged individually. The decisions of the Committee will be final.

7.6 Convocation

Students who expect to receive the Certificate of Proficiency (any language in which it is offered), or the Certificate or Diploma in Translation, are required to apply before 31 March. Applications available at the Centre must be accompanied by $10.00 (cash or money order only) as well as proof of qualification. After 31 March a late fee of $5.00 will be charged, and no applications will be accepted after 15 May.

7.7 Classification Tests for English and French Courses

All new students must take a classification test before they are allowed to register for courses. Exceptions will be made if it can b proved that the student has no knowledge of the language. The fee for the test is $5.00 (non-refundable).

Candidates are required to apply for the test in person between 1 July and 29 July, Monday to Thursday inclusive, from 9:00 a.m. to 7:00 p.m., Friday from 9:00 a.m. to 4:00 p.m. The card obtained at this time gives the date of choice, time and location and must be presented the night of the designated test. No applicant can be admitted without it.

Applicants will be notified by mail of the level at which they have been classified a few days after the test. They must then register for courses as soon as possible.

Taking the test will not automatically guarantee a place in a course.

The tests for ENGLISH COURSES will be held on the following dates:

Tuesday	2 August 1977 at 7:00 p.m.
Monday	8 August 1977 at 7:00 p.m.
Wednesday	10 August 1977 at 7:00 p.m.
Tuesday	16 August 1977 at 7:00 p.m.

The tests for FRENCH COURSES will be held on the following dates:

Monday	1 August 1977 at 7:00 p.m.
Tuesday	9 August 1977 at 7:00 p.m.
Monday	15 August 1977 at 7:00 p.m.

The location of the test will be given on the application form.

7.8 COURSE DATES

week of 12 September	1977 – X and Z courses commence
week of 28 November	1977 – X courses terminate (12 weeks)*
week of 12 December	1977 – Z courses final week before mid-term *
week of 9 January	1978 – Z courses recommence
week of 16 January	1978 – Y courses commence
week of 6 March	1978 – Z courses (45 hour once-a-week) terminate *
week of 20 March	1978 – Z courses (50 and 100 hour) terminate *
week of 3 April	1978 – Y courses terminate (12 weeks) *

* subject to change

7.9 EXAMINATIONS

There is an examination at the end of all language courses, which is compulsory for all students who plan to register in the following courses:

The official dates of examinations will be as follows:

all 100-hour courses	week of 27 March
all 50-hour courses	week of 27 March
all 45-hour twice-a-week courses	week of 28 November
all 45-hour once-a-week courses	week of 6 March or 13 March
Translation courses	to be announced

7.10 GRADING SYSTEM

The Centre uses the grading system common to the University, which is as follows:

Percentage Grades: 80-100 (A), 65-79 (B), 55-64 (C), 45-54 (D), 0-44 (F) J – Absent, W – Withdrew with Approval, K – Incomplete

Although D is a passing grade, it will not permit entry into a subsequent course for which it is a prerequisite, nor will it be recognized if the course is a requisite of the student's program.

7.11 CREDIT

In special circumstances, students registered in a degree program at McGill University may apply to their Faculty for permission to have courses taken in the Centre's Languages Department for credit. Courses of 45 to 50 hours will be counted for 3 credits and courses of 90 to 100 hours will be counted for 6 credits. In the case of withdrawal from a course taken for credit, students must 1) return their Card of Admission to the Centre, and 2) notify their Faculty in writing. Withdrawal will be authorized only if it takes place before the sixth week of the course.

7.12 LIBRARIES

All students registered in the Languages Department have full library privileges at McLennan and Redpath Libraries. It is necessary to present the Student Card of Admission in order to receive a library card. Please phone 392-4936 regarding their business hours.

7.13

ARABIC

FIRST LEVEL, INTENSIVE

681-210Z 61 Tue and Thu 6 – 8 p.m.
FEE: $165.00
DURATION: 100 hours including 25 hours in the laboratory (25 weeks) beginning 13 September

This course, planned for beginners, provides basic instruction in Arabic grammar and the rudiments of reading and writing in classical and modern Arabic, through the audio-visual method.

CHINESE

FIRST LEVEL, INTENSIVE

682-210Z 51 Mon and Wed 6 – 8 p.m.
FEE: $165.00
DURATION: 100 hours including 25 hours in the laboratory (25 weeks) beginning 12 September

This course aims to teach the basic structure and vocabulary of Mandarin Chinese through the audio-visual method. Speaking, reading and writing skills will be equally stressed. By the end of the course students should have mastered the basic grammatical construction for reading and speaking. They should also be able to recognize 400 single and 1200 compound characters.

ENGLISH

INTENSIVE COURSES

FEE: $165.00

45 hours (once-a-week courses: 23 weeks)
beginning week of 12 September

FIRST LEVEL, INTENSIVE
– Class limited to 20 students

684-210X 51 Mon and Wed 6 – 10 p.m.
PREREQUISITE: A mark between 20 and 30 in the Classification Test

This course is designed to cover First and Second Levels in one session. Only students who are classified at First level but already have a basic knowledge of English will be admitted.

FIRST LEVEL, REGULAR
– Classes limited to 20 students

684-211X 51/2 Mon and Wed 6 – 8 p.m.
684-211X 57 Mon and Wed 8 – 10 p.m.
684-211X 61 Tue and Thu 6 – 8 p.m.
684-211X 67 Tue and Thu 8 – 10 p.m.

SECOND LEVEL, REGULAR
– Classes limited to 25 students

684-221X 51/ 2/3 Mon and Wed 6 – 8 p.m.
684-221X 57/ 8/9 Mon and Wed 8 – 10 p.m.
684-221X 61/ 2/3 Tue and Thu 6 – 8 p.m.
684-221X 67/8 Tue and Thu 8 – 10 p.m.

One period per week, ending in March

684-221Z 81 Thursdays 6 – 8 p.m.

THIRD LEVEL, INTENSIVE
– Classes limited to 25 students

684-230X 51 Mon and Wed 6 – 10 p.m.
684-230X 61 Tue and Thu 6 – 10 p.m.
PREREQUISITE: A mark between 50 and 65 in the Classification Test or a mark of at least 70% in the Second Level

This course is designed to cover Third and Fourth Levels in one session. Only students qualified for Third Level will be admitted. Promotion to Fifth Level is based on a mark of at least 65%

THIRD LEVEL, REGULAR
– Classes limited to 25 students

684-231X 51/2 Mon and Wed 6 – 8 p.m.
684-231X 57/ 8/9 Mon and Wed 8 – 10 p.m.
684-231X 61/2 Tue and Thu 6 – 8 p.m.
684-231X 67/ 8/9 Tue and Thu 8 – 10 p.m.

One period per week, ending in March

684-231Z 67 Tuesdays 8 – 10 p.m.

FOURTH LEVEL, REGULAR
– Classes limited to 25 students

684-241X 51/2/3 Mon and Wed 6 – 8 p.m.
684-241X 57/8 Mon and Wed 8 – 10 p.m.
684-241X 61/2/3 Tue and Thu 6 – 8 p.m.
684-241X 67/8 Tue and Thu 8 – 10 p.m.

One period per week, ending in March

684-241Z 71 Wednesdays 6 – 8 p.m.
684-241Z 87 Thursdays 8 – 10 p.m.

FIFTH LEVEL, REGULAR
– Classes limited to 25 students

ATTENDANCE REQUIREMENT: Not less than 2/3 of lectures
PREREQUISITE: Students from THIRD LEVEL, INTENSIVE, a mark of 65% or better

Students entering the Fifth Level may choose the course best suited to their needs among the following:

ENGLISH COMPOSITION

684-351X 51 Mon and Wed 6 – 8 p.m.
684-351X 57 Mon and Wed 8 – 10 p.m.
684-351X 61 Tue and Thu 6 – 8 p.m.
684-351X 67 Tue and Thu 8 – 10 p.m.

One period per week, ending in March

684-351Z 77 Wednesdays 8 – 10 p.m.

The purpose of this course is to encourage students to increase their overall ability in English by acquiring more skill in written expression. The basic principles of composition – unity, coherence and adequate development of the subject matter – will be taught and practised. In addition paraphrasing, letter and report writing, summarizing and précis writing will be covered.

ENGLISH BUSINESS WRITING

684-352X 57 Mon and Wed 8 – 10 p.m.
684-352X 61 Tue and Thu 6 – 8 p.m.

One period per week, ending in March

684-352Z 61 Tuesdays 6 – 8 p.m.

This course offers a detailed study of the composition of various types of business letters and includes a review of English grammar and syntax. Business phrases, terminology, idioms and usage are given particular attention. Difficulties experienced by those learning English as a second language are discussed and explained. Students are expected to prepare written assignments which will be corrected and returned.

ENGLISH CONVERSATION

684-353X 51/2 Mon and Wed 6 – 8 p.m.
684-353X 61/2 Tue and Thu 6 – 8 p.m.
684-353X 67 Tue and Thu 8 – 10 p.m.

This course is intended for advanced students who want intensive practice in spoken English but feel they still require help with grammar and syntax. Written work will be assigned every week.

LIVING ENGLISH (ORAL)

684-354X 61 Tue and Thu 6 – 8 p.m.

One period per week, ending in March

684-354Z 67 Tuesdays 8 – 10 p.m.

This course is designed to improve vocabulary, pronunciation, idiom and sentence structure. This is achieved by reading texts from modern English and American authors and also scenes from modern plays in order to familiarize students with modern spoken English. Discussing, reading aloud or acting out scenes, dialogues and short stories will provide the opportunity in class for active student participation.

ENGLISH – POST CERTIFICATE COURSES

ADVANCED COMPOSITION I

684-361X 61/2 Tue and Thu 6 – 8 p.m.
PREREQUISITE: Certificate of Proficiency or score of 90% in the Classification Test

ADVANCED COMPOSITION II

684-361Y 61 offered in January 1978

This course is designed for those who wish to improve their written communication ability. Building on acquired basic composition skills, the course material and assignments will focus on matters of style and appropriateness of expression.

ADVANCED BUSINESS WRITING

684-362X 51 Mon and Wed 6 – 8 p.m.
PREREQUISITE: Certificate of Proficiency or score of 90% in the Classification Test

This course offers training in how to express ideas effectively in business situations. The aim is to increase fluency and to enlarge the vocabulary suitable for use in business communication both written and oral. An important feature of the course is the writing of business letters, memoranda, and reports, which are corrected and returned.

FEE: $95.00
DURATION: 45 hours (12 weeks) beginning 17 January
PREREQUISITE: 45 hours of Portuguese or equivalent

This course will be conducted entirely in Portuguese and its aims are to speed up fluency, to achieve correctness of pronunciation, and to give a review of grammatical structures. Oral and written exercises will be given. Readings will be taken from modern Portuguese and Brazilian literature.

RUSSIAN

Counselling: Students who need assistance in deciding the level at which they should register may telephone the Department of Russian and Slavic Studies (392-4610 or 4616) between 9 a.m. and 5 p.m. after 15 August.

All classes limited to 25 students

FIRST LEVEL, INTENSIVE

696-210Z 61 Tue and Thu 6 – 8 p.m.
FEE: $165.00
DURATION: 100 hours including 25 hours in the laboratory (25 weeks) beginning 13 September

In this course the direct method will be used with instruction largely in Russian from the very beginning. The Russian Minimum Word List used at Moscow University will guide the choice of vocabulary. At the end of the course most students will be able to converse easily in Russian, to read a Soviet newspaper and to write straight-forward letters in Russian.

FIRST LEVEL, REGULAR

696-211Z 51 Mondays 6 – 8 p.m.
FEE: $100.00
DURATION: 50 hours (25 weeks) beginning 12 September

This course will begin with the general characteristics of the Russian language, the alphabet, the phonetic value of letters, and the basic rules of grammar. It will include reading, oral and written exercises, and a gradual introduction to Russian culture and civilization.

SECOND LEVEL, REGULAR

696-221Z 71 Wednesday 6 – 8 p.m.
FEE: $100.00
DURATION: 50 hours (25 weeks) beginning 14 September
PREREQUISITE: 50 hours of Russian or equivalent

This course consists of grammatical drills and oral exercises, reading and translation of selected texts by modern Soviet Russian authors.

THIRD LEVEL, REGULAR

696-231Z 57 Mondays 8 – 10 p.m.
FEE: $100.00
DURATION: 50 hours (25 weeks) beginning 12 September
PREREQUISITE: 100 hours of Russian or equivalent

This course is intended to help students acquire a greater degree of aural comprehension and fluency in Russian while continuing the review of grammar.

FOURTH LEVEL, REGULAR

696-241Z 61 Tuesdays 6 – 8 p.m.
FEE: $100.00
DURATION: 50 hours (25 weeks) beginning 13 September
PREREQUISITE: 150 hours of Russian or equivalent
ATTENDANCE REQUIREMENT: Not less than 2/3 of lectures

This course will be conducted entirely in Russian with emphasis on conversation. Points of grammar and syntax will be explained as the need arises. Discussions will be based in part on readings in Russian civilization and folklore. Those who wish to apply for the Certificate of Proficiency are required to complete additional reading and written work.

SPANISH

Counselling: Students who need assistance in deciding the level at which they should register may telephone the Department of Hispanic Studies (392-4600 or4601) between 9 a.m. and 5 p.m.after 15 August.

All classes limited to 25 students

FIRST LEVEL, REGULAR

697-211X 51/2 Mon and Wed 6 – 8 p.m.
FEE: $95.00
DURATION: 45 hours (12 weeks) beginning 12 September

697-211Z 51 Mondays 6 – 8 p.m.
697-211Z 67 Tuesdays 8 – 10 p.m.
697-211Z 71 Wednesdays 6 – 8 p.m.
697-211Z 87 Thursdays 8 – 10 p.m.
FEE: $100.00
DURATION: 50 hours (25 weeks) beginning week of 12 September

In this course, frequent and systematic drill is used to develop rapid response to spoken Spanish and to enable the student to read quickly. Use of the language laboratory is an integral part of the course.

SECOND LEVEL, REGULAR

697-221Y 51 Mon and Wed 6 – 8 p.m.
FEE: $95.00
DURATION: 45 hours (12 weeks) beginning 16 January

697-221Z 51 Mondays 6 – 8 p.m.
697-221Z 71 Wednesday 6 – 8 p.m.
FEE: $100.00
DURATION: 50 hours (25 weeks) beginning week of 12 September
PREREQUISITE: 45 hours of Spanish or equivalent

This course will be conducted entirely in Spanish and its aims are to speed up fluency, to achieve correctness of pronunciation and to give a review of

grammatical structures. Oral and written exercises will be given. Readings will be taken from modern Spanish and Spanish-American literature.

THIRD LEVEL, REGULAR

697-231Z 61/2 Tuesdays 6 – 8 p.m.
FEE: $100.00
DURATION: 50 hours (25 weeks) beginning 13 September
PREREQUISITE: 95 hours of Spanish or equivalent

This course includes a review of grammar, phonetics, conversation, and cultural material, and will concentrate on readings in Spanish-American literature.

FOURTH LEVEL, REGULAR

697-241Z 61 Tuesdays 6 – 8 p.m.
FEE: $100.00
DURATION: 50 hours (25 weeks) beginning 13 September
PREREQUISITE: 145 hours of Spanish or equivalent
ATTENDANCE REQUIREMENT: Not less than 2/3 of lectures

This course will be similar to Third Level but will be devoted to readings in Spanish literature.

TRANSLATION

All classes limited
FEE: $120.00
DURATION: 50 hours (25 weeks) beginning week of 12 September
ATTENDANCE REQUIREMENT: Not less than 4/5 of all classes held during the year
EVALUATION: The breakdown of the final mark will be as follows:
30% homework
30% mid-term examination
40% final examination

FIRST YEAR – METHODOLOGY AND PRACTICE OF TRANSLATION

698-311Z 51/2 Mondays 6 – 8 p.m.
698-311Z 61/2 Tuesdays 6 – 8 p.m.
698-311Z 71 Wednesdays 6 – 8 p.m.

This course will consist of one hour of French and one hour of English. It will be an introduction to the basic principles of translation through careful analysis of selected texts and practice work leading to improved skills in both French and English.

SECOND YEAR-TECHNICAL TRANSLATION I

698-321Z 61/2 Tuesday 6 – 8 p.m.
698-321Z 71/2 Wednesday 6 – 8 p.m.

As in First Year, this course will consist of one hour of French and one hour of English. The fields covered will be commercial correspondence, banking and finance.

THIRD YEAR -TECHNICAL TRANSLATION II

FRENCH SECTION

698-331Z 51 Mondays 6 – 8 p.m.
698-331Z 77 Wednesdays 8 – 10 p.m.
698-331Z 81 Thursdays 6 – 8 p.m.

ENGLISH SECTION

698-332Z 81 Thursdays 6 – 8 p.m.

In this course the full period will be devoted to the language of the students' choice. The fields covered will be legal terminology, insurance, advertising and public relations.

FOURTH YEAR-GENERAL AND LITERARY TRANSLATION

PREREQUISITE: Certificate of Proficiency in Translation

FRENCH SECTION

698-341Z 51 Mondays 6 – 8 p.m.
698-341Z 57 Mondays 8 – 10 p.m.

ENGLISH SECTION

698-342Z 71 Wednesdays 6 – 8 p.m.

The material covered will be prose of literary quality ranging from the critical essay to the descriptive or psychological novel. Students will be encouraged to undertake the translation of major contemporary works as personal research projects.

8 LIBERAL ARTS

MRS. J. HOLLANDER

Program Co-ordinator

392-4905

8.1 INTRODUCTION

Courses shown as credit courses are open to all but credit will be given only to students already registered in a degree program. A wide variety of topics is included in this section as follows:

ARCHAEOLOGY
CANADIAN STUDIES
CLASSICS
FINE AND APPLIED ARTS
HUMAN BEHAVIOUR
LITERATURE AND DRAMA
POLITICAL SCIENCE
RELIGIOUS STUDIES
SHORT-TERM COURSES (to be announced)
SPECIAL COURSES FOR WOMEN

An evaluation process will be conducted in all courses. Students who do not wish to avail themselves of this opportunity are not obliged to do so.

8.2 TIMETABLE

A listing of instructors, textbooks, buildings and room numbers for all courses will be distributed at time of registration. Please ask for a copy.

8.3 LIBRARIES

Library privileges are available to all students registered in Liberal Arts courses at:

McLennan Library
Redpath Undergraduate Library

8.4 REGULATIONS AND PROCEDURES

Please see General Information

IT IS THE RESPONSIBILITY OF EACH STUDENT TO READ, UNDERSTAND AND ABIDE BY THE REGULATIONS AND PROCEDURES PRINTED IN THIS BOOKLET

*Asterisk indicates **section** will be repeated in January.

ARE YOU INTERESTED IN RECEIVING NOTICES OF SPECIAL SHORT-TERM COURSES THAT WILL BE OFFERED DURING THE COMING YEAR? SEND YOUR NAME AND ADDRESS TO:

CENTRE FOR CONTINUING EDUCATION
772 SHERBROOKE STREET WEST, ROOM 206
MONTREAL, PQ
H3A 1G1

8.5 ARCHAEOLOGY

(1) BIBLICAL ARCHAEOLOGY

670-211X-61 Tuesdays 6 – 8 p.m.
FEE: $65.00
DURATION: 13 lectures (26 hours) beginning 20 September

This course will introduce Biblical Archaeology in the environment of the Ancient Near East. The civilization of Palestine from the Natufians of 7000 B.C. to the time of Jesus will be surveyed. It will tie together the history of early Israel in the light of new discoveries in archaeology and new understandings of the ancient literature. Illustrated with slides. This course should be of interest to travellers.

(2) SUMER – THE WORLD'S FIRST CIVILIZATION

670-212Y-61 Tuesdays 6 – 8 p.m.
FEE: $65.00
DURATION: 13 lectures (26 hours) beginning 17 January

Urban civilization began with the dynamic Sumerians in southeastern Mesopotamia. This course will introduce this fascinating people – their thriving business, literature, art, architecture and social institutions. Students will learn some cuneiform from the world's earliest written texts. Illustrated with slides. Of interest to travellers.

(3) ANCIENT EGYPT

670-221X-71 Wednesdays 6 – 8 p.m.
FEE: $65.00
DURATION: 13 lectures (26 hours) beginning 21 September

The fascinating story of the ancient Egyptians. This course will trace the history, art, architecture and literature of Egypt from prehistoric times through the New Kingdom. It will encourage a fresh look at source materials as well as recently discovered archaeological data.

(4) ARCHAEOLOGY TECHNIQUES

670-226 X-91 Fridays 7 – 9 p.m.
FEE: $65.00
DURATION: 13 lectures (26 hours) beginning 16 September

An introduction to the methods and techniques of archaeological field work, excavation and interpretation. Scientific methods of dating and conservation will also be discussed. Part of the course will be devoted to work done on major sites on the Greek mainland and Crete. There will be some practical work and research into archaeological techniques.

(5) THE PHOENICIANS

670-227Y-71 Wednesdays 6 – 8 p.m.
FEE: $65.00
DURATION: 13 lectures (26 hours) beginning 18 January

The Phoenicians were one of the great peoples of the Ancient World. They were world navigators, traders and explorers. Only the Romans were their

rivals. Recent archaeology has been reconstructing their fabulous cities and commercial empire. The 13 lectures, illustrated with slides, will outline their history and literature, their art and achitecture. Of interest to travellers.

8.6 CANADIAN STUDIES

(6) CANADIAN ART HISTORY

674-100X-61 Tuesdays 6 – 8 p.m.
FEE: $70.00
DURATION: 13 lectures (26 hours) beginning 13 September

An environmental approach to the study of Canadian painting, sculpture, architecture. Special emphasis on the influences of geography, history and settlement patterns. A study of the Canadian work of art with comparisons and contrasts to American and European works of the same period.

(7) CONTEMPORARY CANADIAN ART

674-102Y-61 Tuesdays 6 – 8 p.m.
FEE: $70.00
DURATION: 13 lectures (26 hours) beginning 17 January

A Study of the art scene from the Group of Seven to the present time. This course will include discussion of painting, sculpture, graphic arts, some comparisons with the art of other countries important in today's movements and "schools" of art. It will attempt to bring the contemporary scene to a more personal level and come to grips with problems found in 20th century art.

(8) ESKIMO AND NORTH AMERICAN INDIAN ART

674-103X-81 Thursdays 6 – 8 p.m.
FEE: $70.00
DURATION: 13 lectures (26 hours) beginning 15 September

A study of the many art forms of the Eskimo and North American Indian from earliest discovery to the present time. Comparisons will be made with the art of other cultures considering social, historical and geographical influences.

(9) HISTORY OF CANADA TO 1867

674-500X-81 Thursdays 6 – 8 p.m.
FEE: $75.00
DURATION: 13 lectures (26 hours) beginning 15 September

A survey of the economic, political, military and social development of Canada from the pre-Columbian discoveries to Confederation. Particular attention will be given to the growth of French-Canadian institutions, the fur trade, the emergence of English-Canada, Maritime particularism, French-English relations and political tensions of the early nineteenth century.

(10) HISTORY OF CANADA SINCE 1867

674-501Y-81 Thursdays 6 – 8 p.m.
FEE: $75.00
DURATION: 13 lectures (26 hours) beginning 19 January

An historical survey of contemporary Canada with special reference to Western expansion. Maritime development, Canadian American relations, Quebec society, and Canada in two world wars. The development of modern political parties will be examined as well as the impact of urbanization and economic change.

(11) CANADIAN ECONOMIC GEOGRAPHY

674-505Y-56 Mondays 8 – 10 p.m.
FEE: $75.00
DURATION: 13 lectures (26 hours) beginning 16 January

This course is concerned with the historical, political and physical factors associated with the economic geography of Canada. Landforms and climate, export staples will be studied. The emergence of a national core periphery structure will be dealt with as well as the roles of transportation, industrialization and urbanization in the development of the Canadian economy.

(12) ENVIRONMENTAL LAW FOR CITIZENS (3 credits)

495-472X-61 Tuesdays 6 – 8 p.m.
FEE: $75.00
DURATION: 13 lectures (26 hours) plus individual work projects beginning 20 September

This course will delve into the basic legal aspects of environmental issues. Environmental problems will be discussed from the points of view of federal and provincial jurisdictions, civil and criminal remedies, case histories, citizen action, court system, legal standing to sue and environmental impact assessment.

8.7 CLASSICS – LITERATURE, HISTORY AND DRAMA

(13) GREEK CIVILIZATION – Part I

(from its beginnings to the Persian wars) (3 credits).

114-200X-51 Mondays 6 – 8 p.m. plus modular instructional periods
FEE: $75.00
DURATION: 13 lectures (26 hours) beginning 12 September

A survey of Greek civilization from its beginnings in the Bronze Age down through the Persian Wars, including art and architecture, literature, philosophy and religion, archaeology and history. This and 114-202Y are companion courses but may be taken separately. Both should be of interest to travellers to Greece.

(14) INTRODUCTION TO GREEK MYTHOLOGY (3 credits)

114-203X-71	Wednesdays 6 – 8 p.m. plus modular instructional periods
FEE:	$75.00
DURATION:	13 lectures (26 hours) beginning 14 September

The Gods and Heroes of the Greeks. This course will consider the origins, formation and transmission of the Greek myths. It will examine the more important myths as they appear in literary sources (Homer, Hesiod and the dramatists) and as they are represented in Greek art. Some attention will also be paid to the more common themes of Greek myth, as well as to the cultural values and religious attitudes which they reflect.

(15) GREEK CIVILIZATION – Part II (fifth century B.C. and later) (3 credits)

114-202Y-51	Mondays 6 – 8 p.m. plus modular instructional periods
FEE:	$75.00
DURATION:	13 lectures (26 hours) beginning 16 January

A survey of Greek civilization of the 5th century B.C. including art and architecture, drama, philosophy and religion, archaeology and history.

(16) ROMAN LITERATURE AND SOCIETY (3 credits)

114-208Y-71	Wednesdays 6 – 8 p.m.plus modular instructional periods
FEE:	$75.00
DURATION:	13 lectures (26 hours) beginning 18 January

Life and Society in the Roman Empire as reflected in contemporary authors of varying genres (epic, history, philosophy, satire and the novel). This course will examine various aspects of Roman social life during the first two centuries of the Empire. Topics to be discussed include social structure and class, education and learning, religion and superstition, relaxation and amusement, and city and country life.

8.8 FINE AND APPLIED ARTS

(17) ART IN PERSPECTIVE

670-100X-71	Wednesdays 6 – 8 p.m.
FEE:	$70.00
DURATION:	13 lectures (26 hours) beginning 14 September

A study of the visual arts since Antiquity with particular emphasis on the art of the last two centuries, aiming at a deeper understanding of the work of art as individual, historical and cultural expression.

(18) IMPRESSIONISM AND SYMBOLISM

670-103Y-71	Wednesdays 6 – 8 p.m.
FEE:	$70.00
DURATION:	13 lectures (26 hours) beginning 18 January

The crucial developments in painting during the second half of the 19th Century, mainly in France. The rapid succession of new schools in visual arts and the culmination in the emergence of modern art at the turn of the century. Works of masters like Manet, Monet, Degas, Cezanne, and Van Gogh will be systematically analyzed and discussed.

(19) ART OF LISTENING – PART I

670-106X-81	Thursdays 5:30 – 7:30 p.m.
670-106X-86	Thursdays 8 – 10 p.m.
FEE:	$65.00
DURATION:	13 lectures (26 hours) beginning 15 September

A non-technical course for the listener designed to expand his perception and appreciation of music from the Baroque to the Twentieth Century and to develop his awareness of those structural and stylistic aspects important in the understanding and enjoyment of music. Emphasis is upon non-technical analysis, relevant currents in the sister arts and works to be played by the Montreal Symphony Orchestra. Illustrated with tape recordings, slides, instruments. Class Limited.

(20) ART OF LISTENING – PART II

670-107Y-86	Thursdays 8 – 10 p.m.
FEE:	$65.00
DURATION:	13 lectures (26 hours) beginning 19 January

A more in-depth examination of the musical and non-musical forces behind the masterworks of composers from Bach to Stravinsky. New areas to be discussed include the prelude, symphonic poem, rhapsody, chamber music, art song, program music and opera along with works to be performed in Montreal's coming music season. Class Limited.
Note: If there is sufficient demand for a second class, one will be offered from 5:30 – 7:30 p.m.

(21) ENJOYING OPERA

670-223X-56	Mondays 8 – 10 p.m.
FEE:	$65.00
DURATION:	13 lectures (26 hours) beginning 12 September

This course is designed to develop and/or increase the understanding and appreciation of major operatic styles from the origins of opera to the twentieth century. A wide variety of selections will be heard and discussed, with special emphasis given to the works of Mozart, Verdi, Wagner, Strauss, and the operas aired on the CBC.

(22) BASIC INTERIOR DESIGN – PART I

671-103X-51	Mondays 6 – 8 p.m.
671-103X-71	Wednesdays 6 – 8 p.m.
FEE:	$70.00
DURATION:	13 lectures (26 hours) beginning week of 12 September

Students will learn to plan an entire project including the establishment of a critical path, the planning of a house and each individual area of the house. There will be practical excercises in order to learn how to compile a portfolio.

(23) BASIC INTERIOR DESIGN - PART II

671-104Y-51	Mondays 6 – 8 p.m.
671-104Y-71	Wednesdays 6 – 8 p.m.
FEE:	$70.00
DURATION:	13 lectures (26 hours) beginning week of 16 January

The subject of the second half of this course will be: Materials, Colours, Lighting and Furniture. The general method of presentation for Part I and Part II will be audio-visual and the student will be asked to work on some practical exercises.

(24) RESIDENTIAL INTERIOR DESIGN – PART I

671-105X-61	Tuesdays 6 – 8 p.m.
FEE:	$70.00
DURATION:	13 lectures (26 hours beginning 13 September

A practical course for people working in, or intending to work in, Interior Design or related design fields. Included will be: creating a design concept, measuring, room maps, elementary perspective, architectural effects, floor coverings, furniture arrangements, mirrors, painting and papering, and what a home does for and to its people.

(25) RESIDENTIAL INTERIOR DESIGN – PART II

671-106Y-61	Tuesdays 6 – 8 p.m.
FEE:	$70.00

This course is for beginners, intermediates or advanced students. It will begin with assigned projects to introduce the medium and its potentials for luminosity, colour, form, description, pattern, texture, drawing from nature and imagination. The balance of the course will emphasize the conception and development of an individual piece of work. Students will provide their own materials. Class Limited.

(31) MIXED MEDIA ON PAPER

671-109Y-81 Thursdays 6 – 9 p.m.
FEE: $75.00
DURATION: 13 classes (39 hours) beginning 19 January

A course designed to study a variety of visual feelings in a single piece of work. Using pencil, watercolour, pastel, gouache, charcoal and more, specific assignments based on life study will focus on texture and space made possible through the manipulation of varied media.

(32) FUNDAMENTALS OF DIRECTION: FILM AND TV

671-203Z-66 Tuesdays 8 – 10 p.m.
FEE: $135.00
DURATION: 26 lectures (52 hours) beginning 12 September

Basic directing techniques, Screenings of great directors' works. Putting it all together. Visualization, research, casting, shooting script, rehearsals, creating tension, rhythm, sound, montage. The human equation. Screenings, lectures, seminars, student projects, field trips.

(33) EFFECTIVE TELEVISION COMMUNICATION

671-204X-51 Mondays 6 – 9 p.m.
FEE: $150.00
DURATION: 13 classes (39 hours) beginning 12 September

This course is designed for people who are presently responsible for (or those who are interested in) some aspect of television communication in a non-commercial environment. The student is introduced to the theory, equipment, techniques and practices of television production. Practical experience constitutes 60% of the course time.

8.9 HUMAN BEHAVIOUR

(34) PSYCHOLOGICAL DEVELOPMENT – I

672-201X-51 Mondays 6 – 8 p.m.
FEE: $70.00
DURATION: 13 lectures (26 hours) beginning 12 September

This course is designed for the interests of the general public, with or without a specialized background in psychology. It will follow the processes of psychological development from birth to maturity in the areas of social behaviour, personality and emotion. Format will consist of readings, films and discussion.

(35) PSYCHOLOCIAL DEVELOPMENT – II

672-202Y-51 Mondays 6 – 8 p.m.
FEE: $70.00
DURATION: 13 lectures (26 hours) beginning 16 January

This is a continuation course of Psychological Development – I although it may be taken separately. Consideration will be given to processes of psychological development from birth to maturity in the areas of intelligence, perception and language. Format similar to Part I.

(36) HUMAN RELATIONS I

672-230Z-51 Mondays 6 – 8 p.m.
FEE: $125.00
DURATION: 26 lectures (52 hours) beginning 19 September

This course is a broad introduction to human relations, stressing understanding of inter-personal experiences. Topics include perception, motivation, reaction to conflict, problem solving, group operations and communication, group pressures, conformity and independence, leadership, people and technology. Class limited. Second Section from 8 – 10 p.m. if required. Registrations accepted for 6 p.m. on first come, first served basis only.

(37) HUMAN RELATIONS II

672-231Z-71 Wednesday 6 – 8 p.m.
FEE: $125.00
DURATION: 26 lectures (52 hours) beginning 14 September
PREREQUISITE: Introduction to Psychology or Human Relations I or Equivalent

This course will develop and apply principles learned previously to increase self-understanding through psychological tests and interviews, observing and reporting on group discussions, etc. It will help participants apply knowledge about self and human interaction to formation of personal and career plans. Class limited.

(38) EXPLORING SOCIAL ISSUES THROUGH DRAMATIC GAMES

672-232X-71 Wednesdays 6 – 8 p.m.
FEE: $65.00
DURATION: 13 sessions (26 hours) beginning 21 September

In this learning by doing course participants experience dramatic ways to explore contempory social issues. Responsibility to self, family and community will be studied through varied forms of role play and

simulation games plus discussion. The topic is serious; the sociodramatic method is fun.

(39) AN UNDERSTANDING OF CRIMINAL LAW – PART I

672-271X-66	Tuesdays 8 – 10 p.m.
FEE:	$65.00
DURATION:	13 lectures (26 hours) beginning 20 September

An introduction to many aspects of criminal law for the layman. It will cover: constitutional aspects, types of offences, serious offences, sexual offences, other offences, parties to offences, defences.

(40) AN UNDERSTANDING OF CRIMINAL LAW – PART II

672-272Y-66	Tuesdays 8 – 10 p.m.
FEE:	$65.00
DURATION:	13 lectures (26 hours) beginning 17 January

This part of the course will continue with the following topics: juvenile offenders, deviant behaviour, arrest, arraignment, bail, preliminary inquiry, sentencing, confinement of individuals in mental institutions, social implications of conviction and criminal record.

8.10 LITERATURE AND DRAMA

(41) TWENTIETH CENTURY LITERATURE – PART I

670-200X-76	Wednesdays 8 – 10 p.m.
FEE:	$65.00
DURATION:	13 lectures (26 hours) beginning 14 September

Short stories, novels, plays and poetry by major twentieth century writers. Selection of texts will be discussed at the first meeting. The course will be conducted using a mixture of lecture and class discussion.

(42) TWENTIETH CENTURY LITERATURE – PART II

670-201Y-76	Wednesdays 8 – 10 p.m.
FEE:	$65.00
DURATION:	13 lectures (26 hours) beginning 18 January

A variety of modern writers and genres, demonstrating major literary themes of today. The course is a continuation of Part I but may be taken separately. The format of the course remains the same, but different works will be studied. Texts will be discussed at the first meeting of the course.

(43) THE ECOLOGICAL CHALLENGE

670-235X-81	Thursdays 6 – 8 p.m.
FEE:	$65.00
DURATION:	13 lectures (26 hours) beginning 15 September

This course will explore ecological themes in literature. Topics to be discussed will include the historical perspective of our ecological crisis, cultural attitudes toward wilderness, wildlife (endangered species), pollution etc.

(44) HISTORY OF CINEMA

670-224Z-01	Saturdays 9 a.m. – 12 noon
FEE:	$150.00
DURATION:	20 sessions (60 hours) beginning 1 October

A survey of the major trends in the history of the cinema from 1895 to the present, including the early French and American cinema, the Soviet cinema of Vertov, Eisenstein, Pudovkin, German Expressionism, Italian Neo-Realism, the Nouvelle Vague and the verité movement. The course will consist of a film screening of approximately 2 hours plus a lecture each week.

8.11 POLITICAL SCIENCE

(45) THE ARAB WORLD IN THE INTERNATIONAL SYSTEM

670-215Y-81	Thursdays 6 – 8 p.m.
FEE:	$65.00
DURATION:	13 lectures (26 hours) beginning 19 January

This course will study the social and intellectual history of the Arab world, explaining the ideologies and trends today. Presently counting 21 countries, stretching from the Indian Ocean to the Atlantic, with a population of 130 million, the Arab world plays an important part in the Third World (non alignment, OAU).

(46) THE NEW INTERNATIONAL RELATIONS

670-218X-81	Thursdays 6 – 8 p.m.
FEE:	$65.00
DURATION:	13 lectures (26 hours) beginning 22 September

An attempt to explain some changes taking place in the international arena. Balance of power, economic theories of imperialism and war, conflict theories, game simulation theories and others will be covered.

(47) REPORT FROM CHINA

***670-219X-71**	Wednesday 6 – 8 p.m.
FEE:	$70.00
DURATION:	13 lectures (26 hours) beginning 14 September

An up-to-date picture of politics, work, economics, and social development in modern China. Among topics to be covered are: industry, health care, mass political campaigns, the Cultural Revolution, foreign policy, "self-reliance", the role of women, education. Well illustrated with films and slides made by the lecturer during his two year stay in Peking.

(48) NATURE AND ORIGINS OF CONTEMPORARY SOVIET SOCIETY

670-225Y-86	Thursday 8 – 10 p.m.
FEE:	$65.00
DURATION:	13 lectures (26 hours) beginning 19 January

This course will analyze the political and economic factors which have determined the evolution of contemporary Soviet society. Starting with the structural causes of the Russian Revolution, economic and political implications of industrialization, it will include immediate causes of the two revolutions of 1917, mass unrest as a backdrop to the Bolshevik seizure of power, Stalinism as a social system, internal and external constraints in an underdeveloped country, the question of determinism and voluntarism, and the relationship between party and class.

8.12 RELIGIOUS STUDIES

(49) WORLD RELIGIONS – I (3 credits)

260-252X-81	Thursdays 6 – 8 p.m.
FEE:	$75.00
DURATION:	13 lectures (26 hours) beginning 15 September

Introduction to the study of religion and consideration of origins, scriptures and philosophies of Hinduism and Buddhism. Sources and methods for the teaching of religion; also for general interest.

(50) WORLD RELIGIONS – II (3 credits)

260-253Y-81	Thursdays 6 – 8 p.m.
FEE:	$75.00
DURATION:	13 lectures (26 hours) beginning 19 January

Religious traditions of Islam and the Far East. Sources and methods for the teaching of religion; also for general interest.

(51) SCIENCE, RELIGION AND REVOLUTION (3 credits)

260-441Y-71	Wednesdays 6 – 8 p.m.
FEE:	$75.00

9 MANAGEMENT CERTIFICATE PROGRAMS

EDWARD BURNETT
Associate Director
392-6704

9.1 INTRODUCTION

The Certificate, Professional and Undergraduate programs offered by this department of the Centre for Continuing Education are designed for part-time students of high calibre and educational promise. The programs offered in the fall, winter and summer are built in such a way that students will be afforded the opportunity to fulfil the requirements of the McGill University Certificates offered by this department as well as proceed towards the Bachelor of Commerce degree in the Faculty of Management. Students will also be able to meet the requirements of various professional groups. Students are urged to keep both their academic and professional goals in mind as they choose their courses.

The staff of the Certificate Department are ready to help you with your course choice plans and to assist you in meeting professional or undergraduate requirements. The Bachelor of Commerce is a fairly long commitment. Students should seek admission to the degree program as early in their education as possible. See page concerning the Bachelor of Commerce for part-time studens. Careful reading of the following should ensure that a student can fulfil his or her own needs as well as complete the requirements of McGill and Cooperating Associations.

9.2 GENERAL INFORMATION

9.2.1 ADMISSION

All students proceeding towards McGill programs offered by this department must be admitted and have the required program of courses approved by an adviser. For Certificate programs the admission procedure is to contact the department and complete an application form. Students who have had their sequence of courses approved will not be affected by any changes in the programs in subsequent years regardless of when they started taking courses. Students who have not had their programs approved will be governed by the regulations in force at the time of application.

For admission to the Bachelor of Commerce program for part-time students please see page 74.
The cooperating professional associations govern their own admission as noted in their section within this announcement.

Students are asked to register their intent in taking courses at the Centre. For example, your primary aim may be to achieve a McGill Certificate, a Bachelor of Commerce or the recognition of an External Association.

Students should note that providing this information does not constitute admission to the program. The application fee which includes evaluation of transcripts of your previous education in order to achieve advanced standing in a program, is $10.00 (non-refundable).

The reason for this regulation is to ensure that students have adequate guidance in meeting the requirements of certificates, degrees and associations.

9.2.2 CONVOCATION

See page 10.

9.2.3 COUNSELLING

Certain associations will be available for consultation during registration but there will be no academic counselling during the registration periods. Further information and help in course choice is available by calling 392-6704, before the registration period.

9.2.4 COURSE EVALUATIONS

In order to keep in touch with your needs the Centre seeks continuous feedback on its courses. To this end students are invited to evaluate their courses each term.

9.2.5 EXAMINATIONS

An examination is held at the end of each course unless specifically excepted. Final examinations for fall courses will be held from:

12 December to 23 December 1977

Final examinations for winter courses will be held from:

17April to 28 April 1978

STUDENTS SHOULD NOT MAKE ANY OTHER COMMITMENTS DURING THIS PERIOD.

Students who do not attend final examinations must normally repeat the course. Other commitments accepted after registration will not normally be considered as an excuse. If a student cannot sit a final examination he must submit a written explanation to the department.

Students will receive written confirmation of their examination or course results after each term. As the results of each course become available, they will be posted on the notice board in Strathcona Hall by STUDENT number. Results can NOT be obtained by telephone.

9.2.6 REREADS

See General Information page 10.

9.2.7 SUPPLEMENTAL EXAMINATIONS

Supplemental examination privileges are available to students obtaining a final mark of 40% or more in a course.

Students must write their supplemental examination at the next examination period where the appropriate examination is offered or forfeit their supplemental privileges. The fee for each supplemental examination attempted is $20.00 payable to McGill University.

Those students wishing to sit a supplemental must apply in writing or in person to the Associate Director, Management Certificate Programs, 772 Sherbrooke Street West, at least three weeks prior to the examination period. Proof of eligibility to write a supplemental must be presented at the time of application.

Candidates who do not reach a program passing grade on a supplemental examination will be required to repeat the course.

9.2.8 EVALUATION OF TRANSCRIPTS

See page 8.

9.2.9 FRENCH LANGUAGE REQUIREMENTS

Please see page 11 for information and pamphlet.

This pamphlet will be of particular interest to students planning to complete the requirements of professional associations included in Schedule 1 of the Professional Code of the Province of Quebec.

Within this department these are:

Certified General Accountants of Quebec (page 79)
Chartered Administrators of Quebec (page 81)
Chartered Appraisers of Quebec (page 81)
Industrial Accountants of Quebec (page 81)

9.2.10 GRADING SYSTEM

Unless otherwise noted in the description of an individual course or program, the grading system will be as indicated on page 9 of the General Information.

9.2.11 LIBRARIES

Full library privileges are available to all registered students at the following locations:

The Howard Ross Library of Management
2nd Floor

Samuel Bronfman Building
1001 Sherbrooke Street West

The McLennan Library
McGill Campus

9.2.12 PREREQUISITES

It is the responsibility of each student to ensure that he has completed the prerequisites listed for the course (or courses) for which he intends to register.

9.2.13 REGISTRATION

Students may only register for courses in the registration period immediately prior to the term in which they are held. Please see page 7 for dates.

9.2.14 REGULATIONS AND PROCEDURES

See General Information page 7.

9.2.15 TIMETABLE

It is our intention to offer the courses listed on pages whenever possible, however a more accurate final timetable of instructors, text books, buildings and room numbers for all courses will be available at the time of each registration, fall, winter and summer. Please ask for a copy. This list will contain the latest information and will be more accurate about timing of courses than this announcement. It will also include any new courses added or developed. Students may, with permission be able to include these to complete program requirements. To the extent possible the final timetable will give you the information you need for your individual choice and timing. It is often possible to provide sections beyond the basic offerings noted herein. Do inquire.

IT IS THE RESPONSIBILITY OF EACH STUDENT TO READ, UNDERSTAND AND ABIDE BY THE RULES AND PROCEDURES PRINTED IN THIS BOOKLET.

THIS DEPARTMENT OFFERS THE FOLLOWING:

McGILL CERTIFICATES

Administration
Appraisal of Real Estate
Banking
Business Communications
Insurance Brokerage
Marketing
Systems Design
Transportation

UNDERGRADUATE PROGRAM

Bachelor of Commerce for part-time students in the Faculty of Management.

Montreal Personnel Association
Trust Companies Institute of Canada

9.3 McGILL CERTIFICATE PROGRAMS

CONDITIONS

For admission to a McGill Certificate program please see page 70.

Candidates normally will be CEGEP graduates or mature students. All McGill Certificate programs require the completion of 48 credits within a period of seven years. The registration form requires students to state the program they intend to complete. The period allowed for completion will be calculated from this registration date. Courses taken before 1977/78 will be counted towards a students program within the intent of the 7 years completion requirement.

TO HELP YOU LOCATE THE COURSE DESCRIPTION, THE NUMBER IN BRACKETS BESIDE A COURSE TITLE REFERS TO THE NUMERICAL LISTING OF THE SECTION ON COURSE DESCRIPTIONS COMMENCING ON PAGE 91.

(31)	Physical Distribution	3
(68)	Marketing Planning I	3
(69)	Marketing Planning II	3
(71)	Quantitative Analysis for Marketing Decisions	3
(72)	Shopping Centres and Downtown Retail Locations	3
(73)	Professional Selling	3
(73A)	Marketing for the Small Business	3

Students enrolled in the B.Com. degree program must take (25) Marketing Management prior to taking other elective Marketing courses.

Other students may take Marketing electives without the introductory core course unless otherwise stated in the course description.

9.3.7 McGILL CERTIFICATE IN MANAGEMENT (Systems Design)

Students may qualify for the McGill Certificate by completing 48 credits as follows:

27 credits as follows:		Credits
(1)	Introduction to Financial Accounting	3
(21)	Management Information Systems	3
(22)	Computer Based Information Systems	3
(23)	Information Systems Design	3
(62)	Information Systems Adminstration	3
(63)	Control and Verification of Computer Systems	3
(64)	Advanced Topics – Computer Systems Applications	3
(79)	Production and Operations Management	3
(81)	Independent Studies in Management	3

15 credits as follows:

(6)	Introduction to Management Accounting	3
(15)	Social Psychology	3
(16)	Introduction to Organizational Behaviour	3
(32)	Business Administration I	3
(43)	Communication Skills for Managers	3

6 credits from:

Any of the credit courses from this Department (course descriptions starting on page 91). Please enquire about suitable alternatives.

9.3.8 McGILL CERTIFICATE IN MANAGEMENT (Transportation)

Students may qualify for the McGill Certificate by completing 48 credits as follows:

27 credits as follows:		Credits
(1)	Introduction to Financial Accounting	3

(6)	Introduction to Management Accounting	3
(31)	Physical Distribution	3
(34)	Management Policy	3
(74)	Road Transport Management	3
	or	
(75)	Air Transportation Management	3
(76)	Transportation Policy	3
(86)	Transportation Law and Government Regulations	3
(87)	Transportation Economics I	3
(88)	Transportation Economics II	3

15 Credits from the B. Com. Primary Core courses 15

6 credits from this Department (course descriptions starting on page 91). The courses recommended below may also be included.

(74)	Road Transport Management	3
(75)	Air Transportation Management	3
	Canadian Economic Geography	3

(See Liberal Arts Department page 60).

Students considering completing this McGill Certificate in Management should note the program offered by the C.I.T.T. on page 78. In general, completion of Traffic & Transportation I & II will enhance the student's development in the industry and enrich his academic training in the Certificate.

9.4 BACHELOR OF COMMERCE FOR PART-TIME STUDENTS

The B. Com. program for part-time students in the Faculty of Management has been designed to be of assistance to those students who, for various reasons, cannot attend the university during the daytime. The evening courses are offered during the fall, winter and summer.

The courses listed below offered by the Centre for Continuing Education are accepted with the credit shown by the Faculty of Management. All students accepted into the B.Com. for part-time students must obtain a course approval form and present it when registering with the Centre for Continuing Education.

In order to be accepted for the fall 1977 session, students must apply by 30 May. For acceptance for the winter 1978 session, students must apply by 15 November.

All students will be advised and have their programs approved by the Faculty of Management. The courses will only be part of a degree program if you have been accepted by the Faculty of Management.

All correspondence and enquiries should be addressed to:

Office of the Associate Dean
Faculty of Management
Samuel Bronfman Building
Telephone: 392-5854

Each student will be required to complete 42 credits of Bachelor of Commerce Primary Core material as listed below.

	Primary Core Courses	Credits
	(1) Introduction to Financial Accounting	3
	(15) Social Psychology	3
	(16) Introduction to Organizational Behaviour	3
ψ	(17) Organizational Theory	3
	or	
ψ	(34) Management Policy	3
	(21) Management Information Systems	3
	(24) Finance I	3
	(25) Marketing Management	3
ψψ	(39) Survey of Basic Mathematics I	3
ψψ	(40) Survey of Basic Mathematics II	3
	(41) Statistics I	3
	(42) Statistics II	3
	(56) Principles of Economics I (Macro)	3
	(57) Principles of Economics II (Micro)	3
	(58) Managerial Economics	3
	(77) Basic Operations Research	3

Secondary Core Courses

Students will choose 12 credits from the list below:

	(6) Introduction to Management Accounting	3
ψ	(17) Organizational Theory	3
	(22) Computer Based Information Systems	3
	(25A) Marketing Management II	
ψ	(34) Management Policy	3
	(54) Law I	3
	(55) Law II	3
	(59) Introduction to Industrial Relations	3
	(65) Finance II	3
	(80) Introduction to International Business	3
	(—) Business and Society (not offered in 1977/78	

ψ The student is required to choose either one of these courses to fulfill the Primary core requirements; if he wishes to complete both of these courses three credits will count towards his Primary Core and the other three credits will apply to his Secondary Core requirements.

ψψ This course will count only 3 credits towards a B. Com. primary core, the other 3 credits being applied to B. Com secondary core or elective.

Students must complete the primary and secondary core courses towards the B. Com. and with their adviser choose appropriate electives from the following list:

B. COM. ELECTIVE COURSES		Credits
(2)	Financial Accounting I	3
(3)	Financial Accounting II	3
(4)	Financial Accounting III	3
(5)	Financial Accounting IV	3

(7)	Management Accounting – Cost Determination and Analysis	3
(8)	Management Accounting – Planning and Control	3

(86)	Transportation Law and Government Regulations	3
(87)	Transportation Economics I	3
(88)	Transportation Economics II	3
(90)	Land Economics	3

9.5 COOPERATIVE PROGRAMS

Membership in the association cooperating with McGill in offering some of these programs is recommended and in some cases required for students proceeding towards the designation offered by the association. For credit towards McGill Certificates in Management a minimum mark of 55% in each course is required as noted in the section on Examinations. Students must know the regulations of their association especially with regard to pass/fail marks and other examination conditions.

The following organizations have accepted the Centre's courses as credit towards the completion of their program as follows:

9.5.1 ADMINISTRATIVE MANAGEMENT SOCIETY

To receive recognition from A.M.S. as a Certified Administrative Manager (C.A.M.) (Quebec) students must complete a total of 60 credits from the list below.

Students wishing to obtain the (C.A.M.) (International) Certificate will be required to write the Association's qualifying examination.

The Society offers the annual A.M.S. prize to the student graduating with the highest Grade Point Average.

Special Requirements

1) A minimum of two years business experience unless specifically exempted.

2) Membership in the Corporate Administrative Managers of Quebec. For particulars write: Mr. H.N. Black, Domtar Ltd. P.O. Box 7210, Montreal, Quebec H3C 3M1. (Tel: 282-5431)

List of Courses		Credits
(1)	Introduction to Financial Accounting	3
(6)	Introduction to Management Accounting	3
(15)	Social Psychology	3
(16)	Introduction to Organizational Behaviour	3
(17)	Organizational Theory	3
(18)	Group Dynamics and Interpersonal Relations	3
(19)	Personnel Administration	3
(43)	Communication Skills for Managers	3
(21)	Management Information Systems	3
(22)	Computer Based Information Systems	3
(23)	Information Systems Design	3
(24)	Finance I	3
(65)	Finance II	3
(25)	Marketing Management	3
(26)	Marketing Research	3
(41)	Statistics I	3
(42)	Statistics II	3
(54)	Law I	3
(55)	Law II	3
(56)	Principles of Economics I (Macro)	3
(57)	Principles of Economics II (Micro)	3
(62)	Information Systems Administration	3

9.5.2 APPRAISAL INSTITUTE OF CANADA

The title "Canadian Residential Appraiser" (C.R.A.) will be awarded to students who successfully complete Years 1, 2, and 3 as outlined below, and who have satisfied the membership requirements of the Institute.

The title "Accredited Appraiser Canadian Institute" (A.A.C.I.) will be awarded to students who successfully complete the Certificate program and satisfy the requirements as set out by the Institute.

A pamphlet describing the sequence of courses accepted by the Institute and giving further information regarding membership, exemption fees, etc. may be obtained from Mr. David A. Hughes, The Appraisal Institute of Canada, Montreal Chapter, 1400 Sauvé Street West, Suite 279, Montreal, Quebec H4N 1C5 (Telephone: 339-1500)

In cooperation with the Centre for Continuing Education, the Appraisal Institute of Canada accepts the McGill Certificate in Management (Appraisal of Real Estate) as equivalent to the total AIC academic program. In order to gain acceptance, registration at the local chapter level is a requirement. The Institute suggests that students use the following format and sequence in fulfilling the McGill Certificate Requirements.

Year I		Credits
(47)	Appraisal of Real Estate I	6
(85)	Building Construction and Cost Estimating	3
(38)	Mathematics of Finance	3
Year II		
(48)	Appraisal of Real Estate II	6
(1)	Introduction to Financial Accounting	3
(57)	Principles of Economics II (Micro)	3
Year III		
(83)	Appraisal of Real Estate III	6
(90)	Land Economics	3
(54)	Law I	3
Year IV		
(41)	Statistics I	3
(42)	Statistics II	3
(6)	Introduction to Management Accounting	3
(25)	Marketing Management	3

9.5.3 ASSOCIATION FOR SYSTEMS MANAGEMENT

The Certificate of the Association for Systems Management is offered by the Montreal Chapter of the Association for Systems Management in cooperation with the Centre for Continuing Education. Qualifications for admission to the program are two years business experience and at least high school standing. The Certificate is offered by the Association when the student completes the McGill Certificate in Management (Systems Design). See page 73. Student membership in the Association for Systems Management is recommended. Further information may be obtained from the Association for Systems Management, Mr. John Frena, Vice President, Education, Management Systems, McGill University, 845 Sherbrooke St. West, Montreal, Quebec H3A 2A7 (Tel: 392-5023)

9.5.4 CANADIAN ASSOCIATION FOR PHYSICAL DISTRIBUTION MANAGEMENT

This association is interested in education in the Physical Distribution industry. They actively support and guide relevant courses offered through the Centre for Continuing Education. For further information on their aims, educational activities and membership regulations write to CAPDM, Director of Education, P.O. Box 983, Adelaide Street, Postal Station, Toronto, Ontario M5C 2K4 (Telephone: (Moncton, N.B.), (506-855-0038.)

9.5.5 CANADIAN CREDIT INSTITUTE

The Institute in cooperation with the Centre for Continuing Education offers an opportunity for students to take some of the courses leading to the M.C.I. designation. The specialized subjects of Credit Management are, however, only available by correspondence study conducted through the Institute.

Students who wish to follow the courses available through the university program should register with the Institute before enrolling with McGill.

On successfully passing the university examinations in the equivalent subjects in the McGill program, a transcript of marks should be forwarded to the Institute with a request for exemption.

The following is a list of the McGill courses which correspond to those of the Institute:

C.C.I. COURSE	*McGILL EQUIVALENT*		*CREDITS*
Accounting	(1)	Introduction to Financial Accounting	3
		and	
	(2)	Financial Accounting I	3
Commercial Law	(54)	Law I	3
		and	
	(55)	Law II	3
Quebec Civil Code	(54)	Law I	3

Economics	(56)	Principles of Economics I (Macro)	3
		and	
	(57)	Principles of Economics II (Micro)	3
Marketing	(25)	Marketing Management	3
		and	
	(26)	Marketing Research	3
Business Administration	(32)	Business Administration I	3
		and	
	(16)	Introduction to Organizational Behaviour	3

Further information regarding membership, exemption fees, etc, may be obtained from Miss Hilda Witte, Montreal Chapter. The Canadian Credit Institute, P.O. Box 631, Station "A" Montreal, Quebec H3C 2T8, (Telephone: 270-7111)

9.5.6 CANADIAN INSTITUTE OF MANAGEMENT

The Canadian Institute of Management through the Centre for Continuing Education offers a program of management development leading to the Certificate in Management and Administration (C.I.M.)

Purpose

The purpose of this program is to complement the increasing specialization in our society by developing the manager's general business understanding. This should therefore be of interest to managers who have technical or specialized expertise but who want to deepen their knowledge of other management areas to assist them in coping with our changing environment. This program should also increase the effectiveness of middle and senior managers employed in the industrial, service, and governmental sectors of the economy, and is based on management development needs identified through research sponsored by the Institute. The Institute also offers the Professional Manager (P.Mgr.) designation to its qualified senior members.

Membership

Students who wish to qualify for the C.I.M. designation must register with the Institute. Students must apply for credit for courses taken prior to membership. Students must also satisfy any individual course prerequisites.

Members may transfer with full credits to any city across Canada where C.I.M. courses are offered.

Fees

Information on membership fee and professional requirements may be obtained during registration from: The Canadian Institute of Management, P.O. Box 1238, Station 'B', Montreal, Quebec H3B 3K3 (Telephone: 845-6612)

PROGRAM

Students may qualify for the Certificate in Management and Administration (C.I.M.) by completing the following program:

NATIONAL C.I.M. COURSE	*McGILL EQUIVALENT*		*CREDITS*

9.5.11 CORPORATION OF CHARTERED ADMINISTRATORS OF QUEBEC

This Corporation admits to membership holders of a Bachelor of Commerce with a major in a functional area. Students completing the Bachelor of Commerce for part-time students in the Centre for Continuing Education, Faculty of Management will be eligible to become a Chartered Administrator of Quebec. For further information on their aims, educational activities and membership regulations write to: Mr. Andre Tanguay, Administrateur Général, The Professional Corporation of Chartered Administrators of Quebec, 360 est, Boulevard Charest, Québec, Québec G1K 3H4 (Telephone: (418) 523-4068)

9.5.12 CORPORATION OF CHARTERED APPRAISERS OF QUEBEC

In cooperation with the Corporation of Chartered Appraisers of Quebec, the Centre for Continuing Education offers courses leading to this professional recognition. Successful candidates, upon completion of all requirements of the Corporation, will be allowed to use the title C. App.(Chartered Appraiser) or E.A. (Evaluateur Agrée).

The academic requirements of the Corporation of Chartered Appraisers of Quebec are a Bachelor of Commerce degree with a major in Real Estate Appraisal. Students may meet these requirements by completing:

1) A B. Com.and the required concentration of Real Estate listed below or its equivalent.
   or
2) The concentration courses listed below and then continuing to complete a B. Com in the part-time program.

The required courses making up the major in Real Estate Appraisal are available through the Centre for Continuing Education and are as follows:

McGILL COURSE		Credits
(54)	Law I	3
(47)	Appraisal of Real Estate I	6
(48)	Appraisal of Real Estate II	6
(83)	Appraisal of Real Estate III	6
(85)	Building Construction and Cost Estimating	3
(90)	Land Economics	3

Further information on membership, regulation, course recognition, etc. is available through: Mr. Gilles Dion, Directeur-administratif, Corporation Professionnelle des Evaluateurs Agrées du Québec, Place du Canada, Montreal, Quebec H3B 2N2 (Telephone: 861-9729).

9.5.13 CORPORATION OF INDUSTRIAL ACCOUNTANTS OF QUEBEC

The Centre for Continuing Education in cooperation with the Corporation of Industrial Accountants of Quebec offers the following program towards the designation Registered Industrial Accountant (R.I.A.).

Students who wish to follow this program must register with the Corporation . Information regarding the regulations for professional experience requirements and training may be obtained from: The Corporation of Industrial Accountants of Quebec, 1509 Sherbrooke Street West, Suite 1, Montreal, Quebec H3G 1L7 (Telephone 932-7144).

The Corporation of Industrial Accountants of Quebec conducts its own qualifying examinations for the diploma of Registered Industrial Accountant (R.I.A.). The Corporation has adopted a policy of granting exemption from some of their examinations to students who successfully complete equivalent courses in the McGill program. The remaining Corporation examinations must be written by all students after satisfactory completion of the appropriate McGill course.

The Corporation conducts its own mandatory examinations in January and May. The word MANDATORY in the following tables signifies the corporation examinations.

R.I.A. PROGRAM 1977/78

Students should follow the sequence of courses in the levels as noted

R.I.A. COURSE	LEVELS 1	2	3	4	5	McGILL EQUIVALENTS

9.5.14 INSTITUTE OF CANADIAN BANKERS

The Centre for Continuing Education in cooperation with the Institute of Canadian Bankers offers the following programs towards the designation FICB Fellow of the Institute of Canadian Bankers and a program of Continuing Education for Bankers who already have their FICB.

The Institute sponsors programs designed specifically for staff members of Canadian banks. Its purpose is to cooperate with universities in providing formal education for men and woman who wish to prepare themselves for responsible positions in banking.

Further details may be obtained from: The I.C.B. Co-ordinator, Suite 3920, Place Victoria, P.O. Box 9, Stock Exchange Tower, Montreal, Quebec H4Z 1A3 (Telephone:878-3148).

The Institute of Canadian Bankers will recognize many electives at universities across Canada. McGill will not offer all these electives in 1977 – 78. Students who wish to take any other option than those listed below must obtain permission from the I.C.B. Registrar prior to the university registration date.

Fellow of the Institute of Canadian Bankers (FICB)

ICB students should complete the FICB Core Courses below and choose 18 credits from the list of ICB Optional Courses. No more than 12 credits from any one section may be taken.

Continuing Education Program for FICB's

In order to complete the Continuing Education Program for FICB's, students who have already obtained their FICB may continue to select courses that they have not already taken from the list of ICB Optional courses below.

Diplomas are Offered in 1) Finance and Accounting, 2) Humam Resources Management, 3) Economics, 4) Marketing, 5) Quantitative Methods. These will be awarded on completion of a minimum of 18 credits from one stream plus 12 further credits from the same stream or any other stream. ICB offers also a Diploma in International Studies and one in General Management. Further information and a final program approval must be obtained from the ICB registrar.

9.5.16 INSTITUTE OF INTERNAL AUDITORS

The Centre for Continuing Education in cooperation with the Institute of Internal Auditors offers the following program of courses leading to the title Certified Internal Auditor (C.I.A.). The Institute conducts its own two day examinations in four parts to be held in September, 1977 and in May 1978 and subsequent years. The four parts are as follows:

Part I, Principles of Internal Auditing; Part II, Internal Audit Techniques; Part III, Principles of Management; Part IV, Disciplines Related to Internal Auditing.

Students must take a minimum of two parts of this examination at the first sitting and complete the remainder within three years. In order to be accepted as a candidate by the Institute students should complete the following sequence of courses:

McGill Course		Credits
(1)	Introduction to Financial Accounting	3
(2)	Financial Accounting I	3
(3)	Financial Accounting II	3
(7)	Management Accounting-Cost Determination and Analysis	3
(8)	Management Accounting-Planning and Control	3
(11)	Introduction to Auditing	3
(12)	Operational Auditing	3
(14)	Taxation I	3
(28)	Finance I	3
(34)	Management Policy	3
(43)	Communication Skills for Managers	3
(54)	Law I	3
(56)	Principles of Economics I (Macro)	3
(63)	Control and Verification of Computer Systems	3
(77)	Basic Operations Research	3
(79)	Production and Operations Management	3

Students wishing further information about the examinations, registration, etc. should contact the Institute of Internal Auditors, Montreal Chapter, P.O. Box 1310, Place Bonaventure, Montreal, Quebec H5A 1H1.

9.5.17 INSURANCE BROKERS' ASSOCIATION OF THE PROVINCE OF QUEBEC

The Centre for Continuing Education in cooperation with the Insurance Brokers' Association of the Province of Quebec offers the course leading to the AIB designation. The CIB course (82) is not offered in 1977/78.

The final examination for (46) General Insurance I is the examination set by the Insurance Brokers' Association of the Province of Quebec for the title of Associate Insurance Broker (AIB).

The final examination for (82) General Insurance II is the examination set by the Insurance Brokers' Association of the Province of Quebec for the title of Chartered Insurance Broker (CIB).

Society examinations are held in April or May. Students should note that the passing grade for these examinations is 60%. These examinations are accepted as a credit towards the McGill Certificate in Management under the normal grading system (see page 9).

Further information on the Associations membership requirements may be obtained from: The Insurance Brokers' Association of the Province of Quebec, 550 Sherbrooke St. West, Suite 1570, Montreal, Quebec H3A 1C8 (Telephone: 842-2591).

9.5.18 INSURANCE INSTITUTE OF CANADA

In co-operation with The Insurance Institute of Canada, The Centre for Continuing Education offers a series of evening courses fulfilling the requirements of this Program. Candidates must have completed their Associateship (A.I.I.C.) prior to entry. Complete details may be obtained from The Insurance Institute of Canada.

The Management Education Program is made up of seven core courses outlined below and three options. No more than two options may be chosen from the same stream. Business Administration must be taken first and Business Strategy last. Students may take the remaining courses in the order they prefer.

Mandatory Subjects

INSURANCE INSTITUTE COURSE	*McGILL EQUIVALENT*		*CREDITS*
Business Administration	(32)	Business Administration I	3
		and	
	(33)	Business Administration II	3
Business Strategy	(34)	Management Policy	3
		and	
	(35)	Business Strategy	3

Marketing	(25)	Marketing Management	3
		and

* **(8) MANAGEMENT ACCOUNTING – PLANNING AND CONTROL (3 credits)**

271-415X-81 Thursdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 15 September
PREREQUISITE: Management Accounting – Cost Determination and Analysis

Decision models and their relationship to planning and control; certainty and uncertainty, determination of cost behaviour patterns, cost control, analysis of variances, cost accounting and quantitative techniques; preparation and use of budgets, behavioural aspects of budgeting, simulation of operating budgets, decentralization and measurement of performance, transfer pricing.

(9) MANAGEMENT ACCOUNTING CONTROL SYSTEMS (3 credits)

621-420X-91 Fridays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 16 September
PREREQUISITE: Management Accounting – Planning and Control

A case method course emphasizing written and oral analysis of management control system problems with special emphasis on the use of logical and orderly analytical approaches to solving them. Subtopics include strategic planning and an understanding of the links between management control and the various business areas. This course is designed to be taken in conjunction with Management Accounting Cases in the winter term.

(10) MANAGEMENT ACCOUNTING CASES (3 credits)

621-421Y-81 Thursdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 19 January 1978
PREREQUISITE:
1. Management Accounting – Planning and Control
2. Management Accounting Control Systems

A case method course emphasizing written and oral analysis of management control system problems with special emphasis on the use of logical and orderly analytical approaches to solving them. Subtopics include analysis of performance, types of responsibility centres and design and evaluation of management control systems.

* **(11) INTRODUCTION TO AUDITING (3 credits)**

271-413X-51 Mondays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 12 September
PREREQUISITE: Financial Accounting II

Nature and purpose of auditing; powers, duties and responsibilities of an auditor; internal control; audit programs; financial statement presentation; procedures for verification of items in financial statements; audit reports.

* **(12) OPERATIONAL AUDITING (3 credits)**

621-430X-91 Fridays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 16 September
PREREQUISITE: Introduction to Auditing

The practice of internal auditing is presented in this course covering the auditors role in the organization, the standards of the profession, the audit techniques available and the reporting of audit findings.

* **(13) EXTERNAL AUDITING (3 credits)**

621-431X-51 Mondays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 12 September
PREREQUISITE: Introduction to Auditing

Auditing standards; auditor's legal rights and responsibilities; problems relating to : Incorporated business; consolidated statements, prospectuses; events subsequent to balance sheet date; audit of E.D.P. systems; audits requiring special considerations; investigations and special reports; current developments in auditing standards.

* **(14) TAXATION I (3 credits)**

271-412X-81 Thursdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 15 September
PREREQUISITE: Financial Accounting II

Introduction to principles of taxation; determination of taxable income and taxes payable – individual and corporate; corporate distributions; section 85 rollovers; amalgamations ; bankruptcy; deferred compenstion: non-residents and international; trusts; partnerships; assessments and appeals; sales taxes.

* **(15) SOCIAL PSYCHOLOGY (3 credits)**

280-221X-51 Mondays 6 – 9 p.m.
280-221X-81 Thursdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 12 September and 15 September

Method and theories of analysing individual and small group behaviour. Topics include person perception, social motivation, attitudes, conformity, group structure, group dynamics and leadership phenomena. Experimental approach to social behaviour is emphasized.

* **(16) INTRODUCTION TO ORGANIZATIONAL BEHAVIOUR (3 credits)**

280-222X-81 Thursdays 6 – 9 p.m.
280-222X-91 Fridays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 15 September and 16 September
PREREQUISITE: Social Psychology

The social psychology of organizations, the relationship of man to the organization in which he works, his motivation, attitudes and involvement in his work. Theories of perception, motivation and leadership as they relate to organizational problems.

(17) ORGANIZATIONAL THEORY (3 credits)

280-323Y-91 Fridays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 20 January 1978
PREREQUISITE: Introduction to Organizational Behaviour

The organization as a unit of analysis. Organizations as distinctive collectives, theories and problems of organization. Contributions of psychology, sociology, and other fields of knowledge towards solving organizational problems of authority, power, conflict resolution, adaptation, development, etc.

(18) GROUP DYNAMICS AND INTERPERSONAL RELATIONS (3 credits)

272-420X-71 Wednesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 14 September
PREREQUISITE: Introduction to Organizational Behaviour

Students will explore theory, research, and applications relating to group dynamics in task-oriented groups. Students will increase their level of awareness of group dynamics and their skills at functioning in work groups. Teaching/learning methods will include lecture and discussion, learning cells, skill development exercises (role plays, videotape analysis) and training laboratories (task group development and interpersonal sensitivity).

(19) PERSONNEL ADMINISTRATION (3 credits)

272-423X-91 Fridays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 16 September
PREREQUISITE: Introduction to Organizational Behaviour

This course is designed to introduce students to the various issues involved in personnel administration. The concepts and methods used by the staff personnel unit in building and maintaining an effective work force in an industrial organization will be discussed. Topics include the development of the ability to design the personnel subsystem within the firm and the problems encountered in such areas as recruitment, selection, motivation, communication and management training. Both a theoretical and case approach will be used.

(20) SALARY ADMINISTRATION (3 credits)

272-425Y-81 Thursdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 19 January 1978
PREREQUISITE: Introduction to Organizational Behaviour

This course is designed to expose the students to total compensation systems in business and service organizations. The emphasis is on understanding the various compensation theories and their relation to compensation policies within organizations. Behavioural effects of different types of compensation plans and how to make compensation plans more effective with the use of behavioural science knowledge will be discussed. Some of the topics that are covered in the course are: Nature of financial motivation, compensation theories, job design and job analysis, compensation practices, designing a compensation package, pay and organizational effectiveness.

* **(21) MANAGEMENT INFORMATION SYSTEMS (3 credits)**

280-331X-51 Mondays 6 – 9 p.m.
FEE: $110.00
DURATION: 13 lectures – 39 hours beginning 12 September

This course provides an introduction to computer systems and program flowcharting. Specific emphasis is placed on developing the ability to program (in Fortran) and utilize the resources available on the McGill time-sharing system. Problems of implementing computer systems in the organization are discussed.

* **(22) COMPUTER BASED INFORMATION SYSTEMS (3 credits)**

273-332X-71 Wednesdays 6 – 9 p.m.
FEE: $110.00
DURATION: 13 lectures – 39 hours beginning 14 September
PREREQUISITE: Management Information Systems

Methodology, techniques and components of systems design and programming, with emphasis on management information systems.

* **(23) INFORMATION SYSTEMS DESIGN (3 credits)**

273-431X-51 Mondays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 12 September
PREREQUISITE: Computer Based Information Systems

Methods and procedures of designing business information systems are discussed. A comprehensive case study extending throughout the term emphasizes the application of the methodology.

* **(24) FINANCE I (3 credits)**

280-341X-81 Thursdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 15 September
PREREQUISITE:
1. Statistics I
2. Introduction to Financial Accounting
3. Principles of Economics I (Macro)
4. Principles of Economics II (Micro).

An introduction to financial management and the role of finance, both within the firm and the economy as a whole. The institutional framework of the firm is discussed, including legal forms, taxes, financing instruments and the capital markets. An introduction to the analytics of finance is presented including the pricing of financial instruments, simple models of capital market equilibrium, the financial structure of the firm, cost of capital, dividend policy, investment criteria for new capital spending proposals, and working capital management.

* **(25) MARKETING MANAGEMENT (3 credits)**

280-352X-71 Wednesdays 6 – 9 p.m.
280-352X-82 Thursdays 6 – 9 p.m. (Saidye Bronfman Centre) beginning 13 October
280-352X-91 Fridays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 14 September and 16 September

An introduction to marketing principles and management, focusing on the problems of the marketing manager in the measurement of market opportunities and the allocation of the marketing effort. Emphasis is on decision-making in a marketing context. Topics covered include: the marketing concept; marketing strategies; marketing research; buyer behaviour; product and price policies; advertising, distribution and sales force decision. The course relies on lectures, text material and case studies.

(25a) MARKETING MANAGEMENT II (3 credits)

275-354Y-71 Wednesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures 39 hours beginning 18 January 1978

In this course, each of the decision areas in marketing will be probed in depth. Its main emphasis will be on the use of marketing theory and concepts in the solution of realistic marketing problems. It will focus on decision making in a marketing context using cases, and readings.

(26) MARKETING RESEARCH (3 credits)

275-451X-61 Tuesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 13 September
PREREQUISITE:
1. Marketing Management
2. Statistics I
3. Social Psychology

Problem definition, research design, collection of marketing information from primary, secondary and tertiary sources. Sample design; survey techniques; experimental design; coding and tabulating. Analysis of data, including statistical techniques. Marketing information systems. Product, distribution, motivation, sales, etc. research. Forecasting and planning; market research for marketing decisions.

* **(27) ADVERTISING MANAGEMENT (3 credits)**

275-453X-51 Mondays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 12 September

Surveys advertising and promotion in Canadian social, economic and management contexts. Examines activities as they relate to advertisers, the advertising agency, suppliers and media. Stresses advertising by objectives and the creative approach to developing strategy and tactics as part of the marketing concept. Real examples from current campaigns are the focal point of class discussions.

(28) RETAIL MANAGEMENT (3 credits)

275-459Y-71 Wednesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 18 January 13978

Principles and methods of management as applied to retailing, including location, organization, personnel, buying, inventory control, selling and advertising, services, expenses and profits.

* **(29) INDUSTRIAL MARKETING (3 credits)**

275-456X-71 Wednesdays 6 – 9 p.m.
FEE: $95.00

DURATION: 13 lectures – 39 hours beginning 14 September
PREREQUISITE: Marketing Management

The course focusses on decision-making and management of the marketing effort in an industrial product context. The student gains an understanding of the industrial marketing environment and of the problems faced by the industrial marketing manager. Topics covered include: the industrial marketing system; industrial purchasing; researching the industrial market; product, price distribution, selling and advertising decisions: strategies for industrial markets. A combination of lecture and case discussions are used.

(30) SALES MANAGEMENT (3 credits)

275-455X-61 Tuesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 13 September
PREREQUISITE: Marketing Management

This course explores the various responsibilities of the sales manager as they relate to his sales force. These include the selection process, training alternatives, compensation and incentive plans, supervision and evaluation, and budgeting and forecasting. Case studies, discussions of problems, and a field-work team project are used.

(31) PHYSICAL DISTRIBUTION (3 credits)

275-353X-61 Tuesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 13 September
PREREQUISITE: Marketing Management

Systems approach to physical distribution; traffic management; plant and warehouse locations and operations; inventory control; information flows and data processing; total cost planning and supply management; organizational patterns.

(32) BUSINESS ADMINISTRATION I (3 credits)

626-200X-61 Tuesdays 6 – 9 p.m.
626-200X-62 Tuesdays 6 – 9 p.m. (Saidye Bronfman Centre) beginning 13 October
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 13 September

Management practice in business administration through the case method, emphasizing the financial function and the integration of management processes with policy.

(33) BUSINESS ADMINISTRATION II (3 credits)

626-201Y-61 Tuesdays 6 – 9 p.m.
626-201Y-62 Tuesdays 6 – 9 p.m. (Saidye Bronfman Centre) beginning 17 January 1978
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 17 January 1978
PREREQUISITE: Business Administration I

A general approach to business administration, management practice, marketing and personnel. Presents concepts to deal with a range of cases drawn from varied industries where analysis and decision making are required.

(34) MANAGEMENT POLICY (3 credits)

626-210X-51 Mondays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 12 September

Management of Organizations, the position of the Chief Executive Officer; the process of determining strategy and its application in organizations. Organization design for the accomplishment of policy; internal, social and governmental environments in the development and management of policy. Canadian professional management in the present and future.

A course using extensive case preparation supplemented by lectures.

(35) BUSINESS STRATEGY (3 credits)

626-303X-51 Mondays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 16 January 1978
PREREQUISITE:
1. Management Policy
2. Core Courses of F.I.C.B.

The main objective of this course is the formulation and implementation of long-range decisions. These decisions should take into account the broader socio-economic background and should also ensure integration of the needs of the various corporate functional areas. Emphasis will be placed on the inter-relationship of these functional areas, as this is the only course that will integrate the knowledge acquired by the bankers in previously taken courses in more specific disciplines.

It is expected that this course will develop an awareness of the factors involved in the determination and implementation of corporate strategy and an understanding of the concept of corporate citizenship.

(36) REMEDIAL MATHEMATICS I

627-000X-71 Wednesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 14 September

A remedial course strongly recommended along with Remedial Mathematics II for those students who are required to take Mathematics of Finance,

but who have never taken logarithms and progressions in intermediate or elementary algebra or who have forgotten them. The associative, distributive and commutative laws: Fundamental operations; factoring and simplification of algebraic expressions; equations of the first degree in one and two unknowns; quadratic equations, indices, logarithms, progressions, simple graphs, linear interpolation.

(37) REMEDIAL MATHEMATICS II

627-001Y-71 Wednesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 18 January 1978
PREREQUISITE: Remedial Mathematics I

A continuation of Remedial Mathematics I covering: Set theory and elementary matrices; functional notation; sigma notation; properties of polynomials including factor theorem; progressions, binomial theorem; factorial notation; inequalities and determinants.

* **(38) MATHEMATICS OF FINANCE (3 credits)**

627-201X-71 Wednesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 14 September
PREREQUISITE:
1. Remedial Mathematics I
2. Remedial Mathematics II

Simple and compound interest; discount equated time; equation of value annuities certain; perpetuities, sinking funds; bonds; amortization tables; depletion; depreciation and capitalized cost.

(39) SURVEY OF BASIC MATHEMATICS I (3 credits)

627-203X-81 Thursdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 15 September
PREREQUISITE:
1. Remedial Mathematics I
2. Remedial Mathematics II

Students are required to take both Survey of Basic Mathematics I & II to complete program requirements in this subject.

The first of the courses will complete an intensive review of basic mathematics including algebra, graphs, functions and logarithms, and a start will be made to calculus including limits etc. (see Survey of Basic Mathematics II)

The material covered in Survey of Basic Mathematics I & II will enable students to follow the usual mathematical applications in business, economics, statistics and operations research.

(40) SURVEY OF BASIC MATHEMATICS II (3 credits)

627-204Y-81 Thursdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 19 January 1978
PREREQUISITE: Survey of Basic Mathematics I

A continuation of Survey of Basic Mathematics I will proceed with calculus including limits, functions of one variable, differentiation, integration and applications; and to matrix algebra including determinants and solutions of simultaneous linear equations.

* **(41) STATISTICS I (3 credits)**

280-271X-81 Thursdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 15 September
PREREQUISITE:
1. Survey of Basic Mathematics I
2. Survey of Basic Mathematics II

The course introduces the student to statistical concepts and methodology, demonstrates their application to management problems, and constitutes a foundation for further study in the subject. Topics include: Descriptive statistics and statistical inference; probability theory, random processes, some important discrete and continuous probability distributions, sampling distributions, introduction to decision theory, index numbers.

(42) STATISTICS II (3 credits)

280-272Y-81 Thursdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 19 January 1978
PREREQUISITE: Statistics I

Decision theory, hypothesis testing and estimation, goodness-of-fit tests, analysis of variance, sample surveys and experimental design, simple and multiple regression and correlation analysis, time series.

* **(43) COMMUNICATION SKILLS FOR MANAGERS (3 credits)**

278-386X-81 Thursdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 15 September
PREREQUISITE: A practical knowledge of English

This course will be both theoretical and practical. The theory will relate to how people deal with other people in organizations; involving encoding, transmission, receiving and decoding of messages. It will examine the knowledge, skills, attitudes and habits that are used in reading, writing, speaking and listening as well as non-verbal communications. It will

analyse how to think clearly and the theory of General Semantics. Students will study leadership skills in chairing a meeting. It will examine writing skills in detail.

The following two courses are offered on the McGill Campus but registration takes place through the Canadian Institute of Traffic and Transportation. For further information please contact Ms. B.A. Parkin, Canadian Institute of Traffic and Transportation, 44 Victoria Street, Suite 2120, Toronto, Ontario M5C 1Y2 Telephone: (416) 363-5696

(44) CANADIAN INSTITUTE OF TRAFFIC AND TRANSPORTATION YEAR I

628-001Z-51 Mondays 6 – 8 p.m.
DURATION: 22 weeks – 45 hours

The areas of study are: Regulation of transportation; Canadian transportation facilities; intermediate transportation agencies; transport rates, tolls and tariffs; freight tariffs.

(45) CANADIAN INSTITUTE OF TRAFFIC AND TRANSPORTATION YEAR II

628-002Z-51 Mondays 6 – 8 p.m.
DURATION: 22 weeks – 45 hours

The areas of study are: International rates; class and commodity tariffs; export and import rates; contracts; sales and bills of lading; marine insurance on cargo; warehousing; Canadian customs; damage prevention and damage claims; materials handling; unitization devices; physical distribution; business travel arrangements.

(46) GENERAL INSURANCE I (BROKERS)
(4.5 certificate credits)

628-007Z-71 Wednesdays 6 – 9 p.m.
FEE: $160.00
DURATION: 30 lectures - 60 hours beginning 14 September

The law, theory and practice of insurance, policy construction and interpretation for all major classes of insurance including atuomobile, fire, crime, liability and life. This course will use the Insurance Brokers' Association text book and is designed for entrants into the practice of insurance, but will also be helpful for non-professionals who desire a general understanding of insurance.

(47) APPRAISAL OF REAL ESTATE I
(6 certificate credits)

628-009Z-81 Thursdays 6 – 9 p.m.
FEE: $190.00
DURATION: 26 lectures – 78 hours beginning 15 September

A program of lectures, problems and case studies designed to commence professional training in real estate appraising. Subjects include the nature of real property and value, the appraisal process, site analysis and valuation, property inspection, building materials and equipment. Cost approach, depreciation and the legal aspects of real estate.

(48) APPRAISAL OF REAL ESTATE II
(6 certificate credits)

628-010Z-51 Mondays 6 – 9 p.m.
FEE: $190.00
DURATION: 26 lectures – 78 hours beginning 12 September

Primary emphasis will be placed on income and operating expense analysis, methods and techniques of capitalization, mortgage equity capitalization, residual techniques, market data approach, and the appraisal of lease interest. Emphasis will be placed upon practical urban appraisal problems.

(49) INTRODUCTION TO TRAVEL COUNSELLING
(In co-operation with the Canadian Institute of Travel Counsellors (Quebec))

628-015Z-51 Mondays and Wednesdays 6 – 9 p.m.
FEE: $160.00
DURATION: 13 lectures – 52 hours plus 8 extra hours beginning 12 September

This is an introductory course for new employees working for a travel agency or for those interested in entering this field of work. The course will survey world tourism and the complete travel service offered by an agency. Practical topics include: Ticketing, documentation, geography, as applied to individuals and groups; air, steamship, train, car rentals, etc. form individual parts of the course. Guest lecturers will discuss specialized topics and problems related to travel. A certificate will be awarded by the C.I.T.C. (Quebec) to successful students. A course material fee of $30.00 is charged to students and is payable to the C.I.T.C. (Quebec).

(50) A PRACTICAL COURSE IN PUBLIC RELATIONS MANAGEMENT I (3 certificate credits)
(In co-operation with the Canadian Public Relations Society (Quebec) Inc.)

628-020X-51 Mondays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 12 September

Why and how business and other organizations seek the goodwill of general and specific "publics". How news handling, employee and investor communications, community relations and other aspects of a co-ordinated program fulfil a public relations policy. Case studies and guest lecturers. The course is designed both for students and practitioners seeking broader PR career knowledge and for

executives who need an understanding of the public relations function.

(51) A PRACTICAL COURSE IN PUBLIC RELATIONS MANAGEMENT II (3 certificate credits)

628-021Y-51 Mondays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 16 January 1978
PREREQUISITE: A Practical Course in Public Relations Management I

This Part II is a continuation of Part I and examines the operation of public relations in business, government and corporate communications. A certificate by the affiliated organization is given upon successful completion of Part II.

(52) INTERNAL COMMUNICATIONS MANAGEMENT I (3 certificate credits)
(In co-operation with the International Association of Business Communicators – Canada, District 1)

628-022X-61 Tuesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 13 September
PREREQUISITE: An interview is required for admission. For more information contact 392-6704

The purpose of this course is to examine the expanding role and scope of the internal communicator in industry, business, government and institutions. It is designed to provide an introduction to the wide range of practical skills needed by today's professional in communications management. Techniques and topics explored will include basic journalism, graphics and design, various media production processes, and communications theory, policy and administration.

(53) INTERNAL COMMUNICATIONS MANAGEMENT II (3 certificate credits)
(In co-operation with the International Association of Business Communicators – Canada, District 1)

628-022Y-61 Tuesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 17 January 1978

An extension of internal Communications Management I, this course should be taken by those interested in expanding their management skills in business communications. Lecturers will identify specific problems and developments related to publications, audiovisual programs and support communications systems. The course will be structured around a combination of lectures, seminars, workshops and case studies involving individual and team projects. A certificate in Internal Communications Management will be issued by the affiliated organization upon successful completion of both courses.

* **(54) LAW I (3 credits)**

628-201X-71 Wednesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 14 September

Introduction to law; the Canadian Constituiton and the division of powers; the Quebec Civil Code comprising the law of persons, the law of property, wills and successions, civil responsibility and contracts.

* **(55) LAW II (3 credits)**

628-202X-71 Wednesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 14 September
PREREQUISITE: Law I

Special contracts under the Quebec Civil Code including the law of sale, lease and hire, mandate and deposit; creditors' rights including privileges and hypothecs and bankruptcy; business associations including the law of partnerships and corporations; banking and bills of exchange and labour law.

* **(56) PRINCIPLES OF ECONOMICS I (Macro) (3 credits)**

629-201X-61 Tuesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 13 September

Introduction to the basic forces at work in our economic system; the concepts of national output and income; aggregate employment and the general level of prices; the role of money and the banking system; fiscal and monetary policies; international economics; economic growth and development.

* **(57) PRINCIPLES OF ECONOMICS II (Micro) (3 credits)**

629-202X-91 Fridays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 16 September

Economic analysis of the firm, its environment and behaviour; price-production policies; market behaviour and performance under varying conditions of competition and monopoly; application of microeconomic theory to economic problems of the firm in the context of managerial decision-making.

(58) MANAGERIAL ECONOMICS (3 credits)

280-393X-51 Mondays 6 – 9 p.m.
FEE: $95.00

DURATION: 13 lectures – 39 hours beginning 12 September
PREREQUISITE:
1. Principles of Economics I (Macro)
2. Principles of Economics II (Micro)

The course focuses on the application of economic theory to management problems and the economic foundations of marketing, finance, and production. Attention is given to the following topics: Price and cost analysis, demand and supply analysis.

(59) INTRODUCTION TO INDUSTRIAL RELATIONS (3 credits)

279-294X-61 Tuesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 13 September

An introduction to labour-management relations, the structure, function and government of labour unions, labour legislation, the collective bargaining process, and the public interest in industrial relations.

(60) COLLECTIVE BARGAINING (3 credits)

279-394Y-61 Tuesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 17 January 1978
PREREQUISITE: Introduction to Industrial Relations

This course is designed for those students who wish to study principles in collective bargaining in Canada and abroad. It deals with the structure of the bargaining parties and the structure of bargaining itself. It is problem-oriented and relies on empirical data and case problems.

9.7 SPECIALIZED COURSES

The Centre is ready to develop specialized courses to meet student needs. The following courses are normally offered to students who are advanced in their program. Due to the small numbers of students involved special arrangements may have to be made in order to make sure the course can take place.

Students are invited to register and show their interest in these courses but should have alternative plans ready in the event of a postponement or cancellation.

If the Centre is unable to offer the course students will be informed as soon as possible and transfers or refunds will be made with no cost and as little inconvenience to the student as possible.

The successful offering of these courses is seen as a cooperative activity between the student and the Centre. Courses that are necessary for students to complete their programs will only be postponed if the numbers are too small to form a class regardless of financial considerations. Compulsory courses will not be postponed more than two terms.

* **(61) TAXATION II (3 credits)**

621-441Y-96 Saturdays 9 a.m. to 12 noon
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 21 January 1978
PREREQUISITE: Taxation I

The development and application of topics presented in the introductory income tax course; tax planning matters are dealt with throughout; corporate reorganizations and liquidations; purchase and sale of a business; surplus stripping and estate planning; primary emphasis is on the corporation and its shareholders.

(62) INFORMATION SYSTEMS ADMINISTRATION (3 credits)

273-432X-71 Wednesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 14 September
PREREQUISITE: Computer Based Information Systems

This course is concerned with the management of the design and implementation of information systems. Systems to service functional requirements of the organization, concepts of total information systems will be considered. The case study method will be used.

(63) CONTROL AND VERIFICATION OF COMPUTER SYSTEMS (3 credits)

273-433Y-81 Thursdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 19 January 1978
PREREQUISITE: Information Systems Design

The course will consider, at an advanced level, problems and methods of establishing effective controls of computer systems, evaluation of controls, and computer aids to evaluation and auditing.

(64) ADVANCED TOPICS – COMPUTER SYSTEMS APPLICATIONS (3 credits)

273-434Y-96 Saturdays 9 a.m. – 12 noon
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 21 January 1978
PREREQUISITE:
1. Computer Based Information Systems
2. Information Systems Design

This is an advanced seminar for senior students. Topics will be selected from current issues such as data base applications, on-line systems, privacy and computers, etc.

(65) FINANCE II (3 credits)

274-342X-81 Thursdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 15 September
PREREQUISITE: Finance I

A presentation of the modern theory of finance. A foundation is established here from which students may pursue further specialization or from which specialists in other areas may appreciate their interaction with the finance function. The theory covers three interrelated finance functions: Capital budgeting, corporate finance (including cost of capital, capital structure, and dividend policy), and portfolio theory.

(66) INVESTMENTS AND PORTFOLIO MANAGEMENT (3 credits)

274-441X-91 Fridays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 16 September
PREREQUISITE:
1. Finance I
2. Finance II

The course examines the application of investment principles and security analysis to the selection and comparison of equity and fixed income securities in the current economic and financial environment. Also covered are: Determinants of stock prices, growth models and portfolio diversification.

(67) CAPITAL MARKETS AND INSTITUTIONS (3 credits)

274-442Y-71 Wednesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 18 January 1978
PREREQUISITE: Finance I

This course studies the functions of the capital markets through flow of funds analysis and an examination of portfolio activities of financial intermediaries. Also covered are: Securities regulations and ethical considerations, the term structure of interest rates and risk and rates of return in debt and equity markets.

(67a) FINANCE (4A) (3 certificate credits)

624-001X-61 Tuesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 13 September
PREREQUISITE: All previous courses in the C.I.M. program

A case history course in Financial Management illustrating problems in financing a business. Cash flow; source and application of funds; budgeting; short and long term funding; sources of credits, borrower and lender points of view; financial analysis of new business opportunities. Interpretation of financial statements as a prelude to policy formulation. Classes proceed by lectures, discussions and case study presentation.

(68) MARKETING PLANNING I (3 credits)

275-357X-71 Wednesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 14 September
PREREQUISITE:
1. Marketing Management I
2. Marketing Management II

Marketing Planning is a two-part full year course, designed as a capstone to previous marketing courses providing a transition into actual business experience.

Marketing Planning I is a lecture seminar in which case histories, and later actual 'live' problems are introduced into the class and 'solved' with the help of the instructor. Students 'solve' similar problems assigned to them at home projects, to reinforce and measure learning.

It is assumed that each student has had sufficient marketing background to know where to find materials, data, etc., and what generally to be looking for. The course will emphasize judgement and initiative through assignments deliberately phrased in the vagueness of actual business problems that need to be defined first, then attacked in a logical and thorough manner and finally recommendations or solutions proposed in full-scale 'client' presentations.

(69) MARKETING PLANNING II (3 credits)

275-358Y-71 Wednesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 18 January 1978
PREREQUISITE: Marketing Planning I

In Marketing Planning II the class operates as 'McGill Marketing Enterprises' a marketing consultant company. The class is divided into 'operating' groups of 3 – 5 students. Each operating group is assigned to an actual business project working with a client much the same as a marketing consultant or advertising company.

Classes are management review sessions where each group's problem and progress is monitored and controlled by the instructor and the class, again much as a marketing company's management reviews its operating groups.

The 'solutions' are presented to the appropriate clients in full-scale business presentations in which the class attends as audience.

Emphasis is geared progressively in each of the courses toward real-life problems and practical solutions.

(70) CONSUMER BEHAVIOUR (3 credits)

275-452X-81 Thursdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 15 September

A study of basic factors influencing consumer behaviour. Attention is focused on psychological, sociological and economic variables including motivation, learning, attitude, personality, small groups social class, demographic factors and culture, to analyze their effects on purchasing behaviour. Theory, cases and projects.

(71) QUANTITATIVE ANALYSIS FOR MARKETING DECISIONS (3 credits)

275-458X-91 Fridays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 16 September
PREREQUISITE: Marketing Research

A study of the nature of market response by presenting models of market response and evaluate them in the context of understanding, describing and exploring marketing problems. Explore the particular marketing problem areas of advertising, pricing, personal selling and product planning. Relevant problems will be structured, analyzed and studied from a management science point of view. The interaction between each marketing variable will be considered. The problems of implementation of the management science approach in the real world of marketing organizations will be discussed.

(72) SHOPPING CENTRES AND DOWNTOWN RETIAL LOCATIONS (3 certificate credits)

625-009X-71 Wednesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 14 September

Retail locations with an emphasis on shopping centres from the point of view of the retailer, developer and mortgage lender. Major topics include: Economics of shopping centres; department store and discount department store policies; financing of shopping centres and commercial buildings; utilization of shopping centre economic reports; downtown locations; tenant mix in shopping centres; leases; architectural trends in shopping centres; promotion of shopping centres; parking and ratio.

* **(73) PROFESSIONAL SELLING (3 certificate credits)**

625-010X-61 Tuesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 13 September

A refresher course for experienced salespersons and managers. A basic theoretical course for new salespersons and a guide to non-salespersons in determining if they should pursue a career in selling.

Topics: types of selling jobs and qualifications, buyer motivation, product knowledge, basic selling techniques (prospecting, the approach, sales presentations, objections, closing), time and territory management, sales management.

At additional cost there will be an optional all day seminar (Saturday) devoted to selling skills using role playing on video tape.

(73a) MARKETING FOR THE SMALL BUSINESS (3 certificate credits)

625-011X-61 Tuesday 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures 39 hours beginning 13 September

This course is designed to give management in small businesses and organizations an understanding of the elements of marketing. Emphasis is on the practical uses of marketing techniques in today's business environment.

Groups will be formed to focus on their real life problems and develop their own market opportunities through participation of class members in seminars.

(74) ROAD TRANSPORTATION MANAGEMENT (3 certificate credits)

626-003X-81 Thursdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 15 September
PREREQUISITE:
1. Transportation Economics I
2. Transportation Economics II
3. Appropriate Business Experience

This course will study motor carrier operations. It is designed to provide students with specialized knowledge of the history of trucking and contemporary practice in this vital, growing industry. Topics include: rate negotiations; tariffs, truck terminal functions; insurance coverage for vehicle and cargo; decision making in sales and marketing; freight flow analysis and balanced operations; warehouse planning; scheduling; dispatching for city and linehaul; operating authority; equipment purchasing policy; accounting systems (payable/receivables/interlining); computer applications; safety; claims; labour organization; personnel policy and practices.

(75) AIR TRANSPORT MANAGEMENT (3 certificate credits)

626-002X-71 Wednesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 14 September

PREREQUISITE:
1. Transportation Economics I
2. Transportation Economics II
3. Transportation Policy
4. Appropriate Business Experience

From the point of view of marketing airline, airport, air freight and passenger services the course will deal with topics in air transport management tracing the growth of aviation and related socio-economic trends. Topics include the anatomy of an airline; organization and planning; financial management and pricing system; scheduling and fleet operations; airport management information systems; traffic forecasting and future demands; aviation law; insurance; role of government; ICAO, IATA and non scheduled operators; and current economic problems in aviation.

(75a) POLICY AND ADMINISTRATION (4B) (3 certificate credits)

626-005Y-61 Tuesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 17 January 1978
PREREQUISITE: All previous courses in the C.I.M. program

This course integrates material studied in the first three and a half years of the C.I.M. program. It seeks to apply these techniques and concepts to the analysis of complex business problems at the 'general management level'.

Through group discussions of cases in policy formulation the student is expected to assess objectives, develop strategies, and point the way to help the individual parts of the company coordinate in getting the job done.

(76) TRANSPORTATION POLICY (3 credits)

626-306Y-51 Mondays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 16 January 1978
PREREQUISITE: Management Policy

The course is designed to provide students with new perspectives of major policy decisions facing Canadian transport. Executives of transportation companies will be guest lecturers. Management policies of each mode, their competitive position, their planning and current technology will be examined.

Government policy and Canadian transport will be discussed as well as transportation from the view of the user and transportation as it relates to our society in general. Case studies and a major term paper will be included.

(77) BASIC OPERATIONS RESEARCH (3 credits)

280-373X-71 Wednesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 14 September
PREREQUISITE: Statistics I

Topics covered include: introduction to decision analysis and risk attitudes, linear programming and simulation. The course stresses the formulation of problems and their solution by standard methods or by computer packages.

(79) PRODUCTION AND OPERATIONS MANAGEMENT(3 certificate programs)

627-008Y-61 Tuesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 17 January 1978
PREREQUISITE:
1. Remedial Mathematics I
2. Remedial Mathematics II

Principles and analysis related to the effective utilization of the factors of production to manufacturing and service industries. Topics covered are processes and process planning, location, facility design and layout, work measurement and production standards, production-inventory systems, scheduling and control, quality control, maintenance.

(80) INTRODUCTION TO INTERNATIONAL BUSINESS (3 credits)

278-382X-51 Mondays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 12 September

This course seeks to familarize the management student with the expanded world of the international businessman by examining the underlying concepts of international economic theory; developing a framework for examining country environmental constraints (educational, sociological, economic, political-legal) and relating them to the operations of multinational enterprise; studying the relationship between the international firm and the nation state, with particular reference to Canadian foreign ownership policies; and examining selected topics such as the role of multinational enterprise in economic development and planned economies.

(81) INDEPENDENT STUDIES IN MANAGEMENT (3 credits)

278-489X-91 Fridays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 16 September
PREREQUISITE:
1. Core Courses in Systems Certificate
2. Permission of Systems Adviser

Research, reading or field projects, permitting independent study under the guidance of a staff member specializing in the field of interest. Projects have to be arranged individually with instructors. A

detailed student proposal must be submitted to the instructor and the Associate Director during the second week of classes.

(82) GENERAL INSURANCE II (BROKERS) (4.5 certificate credits)

628-008Z-81 Thursdays 6 – 9 p.m.
FEE: $160.00
DURATION: 30 lectures – 60 hours (not offered in 1977/78)

The classes of insurance covered in the preliminary course will be dealt with more extensively and in greater depth. The course is oriented towards the application of insurance knowledge and features risk analysis and designing an insurance program.

(83) APPRAISAL OF REAL ESTATE III (6 certificate credits)

628-011Z-51 Mondays 6 – 9 p.m.
FEE: $190.00
DURATION: 26 lectures – 78 hours beginning 12 September
PREREQUISITE:
1. Appraisal of Real Estate I
2. Appraisal of Real Estate II

The third year program will be devoted primarily to case studies selected to give the student a wide exposure to a variety of appraisal problems confronted in the course of normal practice. Time will be devoted to the preparation of a narrative appraisal report. Concentration will be on the practical aspects of what is required in a proper narrative report, where the information can be found, how it should be analysed and presented in the report and how a typical narrative report should be organized and written.

(84) EFFECTIVE SPEAKING AND SPEECH PREPARATION (3 certificate credits)

628-024X-71 Wednesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 14 September
PREREQUISITE: A practical knowledge of English

For business and professional people, this course offers a workshop approach to developing and improving the speaking skills required in management positions. Through practice, observation and evaluation, class members learn how to organize and present their thoughts in a logical and persuasive manner, how to respond to questioning and how to assess audience reaction. A variety of speaking situations are covered, including the public platform, radio and TV interviews, conferences, seminars and group meetings.

(85) BUILDING CONSTRUCTION AND COST ESTIMATING (3 certificate credits)

628-025Y-61 Tuesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 17 January 1978

An introductory course primarily for students following the Appraisal of Real Estate courses. The material is broad and general in scope and is designed to provide the student with a better appreciation and knowledge of basic design, materials and construction. Various costing methods such as the use of cost manuals and unit in place costing will be explored.

(86) TRANSPORTATION LAW AND GOVERNMENT REGULATIONS (3 credits)

628-205X-81 Thursdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 15 September

Law as it relates to all modes of public transportation in Canada; law of the carriage of goods and the rights and liabilities of the carriers, shippers and consignees; the National Transportation Act and the legal consequences of the declared national transportation policy.

This course assumes a background such as contained in the C.I.T.T. courses on page 78.

(87) TRANSPORTATION ECONOMICS I (3 credits)

629-206X-61 Tuesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 13 September

The role of freight purchases in the organization of industry; the market structure of carriers and users; the cost structure of carriers; the role of supply and demand in transportation prices; cost-oriented and demand-oriented pricing; economics of discriminatory and administered pricing (restriction of trade); western economic opportunity conference of 1st ministers and changes in transportation legislation.

(88) TRANSPORTATION ECONOMICS II (3 credits)

629-207Y-61 Tuesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 17 January 1978
PREREQUISITE: Transportation Economics I

Economics of International Air Transportation scheduled and chartered; inter-city air, bus, rail and private transportation; urban transit; rationalization of the transportation industry, inter-model consolidations; mergers and recapitalizations; concepts of

user charges; cost allocation; public versus private ownership.

(89) MONEY AND BANKING
(3 certificate credits)

629-300Y-71 Wednesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 18 January 1978
PREREQUISITE:
1. Principles of Economics I (Macro)
2. Principles of Economics II (Micro)

Principles of money, banking, and central banking covering the nature of money, measurement of money supply, determination of the quantity of money; sources of bank funds, uses of bank funds; nature of central banking, monetary policy and the international payments system.

(90) LAND ECONOMICS (3 credits)

629-301X-61 Tuesdays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 13 September
PREREQUISITE:
1. Principles of Economics II (Micro)
2. Principles of Economics I (Macro) Recommended Although not Required

Primary emphasis on urban land economics and use. Specific topics are the pattern of land values and their determinants, land development patterns, land use competition theory, land use succession, the locational criteria of industrial, warehousing, wholesaling, retailing and residential land uses in metropolitan areas. Also an introduction to agricultural land economics and mineral values of land.

(91) GOVERNMENT AND BUSINESS
(3 certificate credits)

629-302X-91 Fridays 6 – 9 p.m.
FEE: $95.00
DURATION: 13 lectures – 39 hours beginning 16 September
PREREQUISITE:
1. Principles of Economics I (Macro)
2. Principles of Economics II (Micro)

Forms of government regulation of business in Canada. Problems of maintaining effective competition. Experience in Canada and other countries will be examined. Role of government in economy, oligopoly and market power, competition policy and social control of business. Reading will cover leading law cases as well as relative economic literature.

9.8 COURSE LIST BY SUBJECT

ACCOUNTING

1. Introduction to Financial Accounting
2. Financial Accounting I
3. Financial Accounting II
4. Financial Accounting III
5. Financial Accounting IV
6. Introduction to Management Accounting
7. Management Accounting – Cost Determination and Analysis
8. Management Accounting – Planning and Control
9. Management Accounting – Control Systems
10. Management Accounting Cases
11. Introduction to Auditing
12. Operational Auditing
13. External Auditing
14. Taxation I
61. Taxation II

BEHAVIOURAL SCIENCE

15. Social Psychology
16. Introduction to Organizational Behaviour
17. Organizational Theory
18. Group Dynamics and Interpersonal Relations
19. Personnel Administration
20. Salary Administration

COMPUTER SYSTEMS

21. Management Information Systems
22. Computer Based Information Systems
23. Information Systems Design
62. Information Systems Administration
63. Control and Verification of Computer Systems
64. Advanced Topics – Computer Systems Applications

FINANCE

24. Finance I
65. Finance II
66. Investments and Portfolio Management
67. Capital Markets and Institutions
67A. Finance (4A)

MARKETING

25. Marketing Management
25A. Marketing Management II
26. Marketing Research
27. Advertising Management
28. Retail Management
29. Industrial Marketing
30. Sales Management
31. Physical Distribution
68. Marketing Planning I
69. Marketing Planning II
70. Consumer Behaviour
71. Quantitative Analysis for Marketing Decisions
72. Shopping Centres and Downtown Retail Locations

73. Professional Selling
73A. Marketing for the Small Business

POLICY

32. Business Administration I
33. Business Administration II
34. Management Policy
35. Business Strategy
74. Road Transport Management
75. Air Transportation Management
75A. Policy & Administration (4B)
76. Transportation Policy

QUANTITATIVE METHODS

36. Remedial Mathematics I
37. Remedial Mathematics II
38. Mathematics of Finance
39. Survey of Basic Mathematics I
40. Survey of Basic Mathematics II
41. Statistics I
42. Statistics II
77. Basic Operations Research
79. Production and Operations Management

GENERAL

43. Communication Skills for Managers
44. Canadian Institute of Traffic and Transportation Year I
45. Canadian Institute of Traffic and Transportation Year II
46. General Insurance I (Brokers)
47. Appraisal of Real Estate I
48. Appraisal of Real Estate II
49. Introduction to Travel Counselling
50. A Practical Course in Public Relations Management I
51. A Practical Course in Public Relations Management II
52. Internal Communications Management I
53. Internal Communications Management II
54. Law I
55. Law II
80. Introduction to International Business
81. Independent Studies in Management
82. General Insurance II (Brokers)
83. Appraisal of Real Estate III
84. Effective Speaking & Speech Preparation
85. Building Construction and Cost Estimating
86. Transportation Law and Government Regulations.

ECONOMICS

56. Principles of Economics I (Macro)
57. Principles of Economics II (Micro)
58. Managerial Economics
59. Introduction to Industrial Relations
60. Collective Bargaining
87. Transportation Economics I
88. Transportation Economics II
89. Money and Banking
90. Land Economics
91. Government and Business

9.9 COURSE LIST BY EVENING AND TIME
(FOR FALL TERM ONLY)

Monday 6:00 p.m.

(1) Introduction to Financial Accounting
(6) Introduction to Management Accounting
(11) Introduction to Auditing
(13) External Auditing
(15) Social Psychology
(21) Management Information Systems
(23) Information Systems Design
(27) Advertising Management
(34) Management Policy
(35) Business Strategy
(44) Canadian Institute of Traffic and Transportation Year I
(45) Canadian Institute of Traffic and Transportation Year II
(48) Appraisal of Real Estate II
(49) Introduction to Travel Counselling
(50) Practical Course in Public Relations Management I
(58) Managerial Economics
(80) Introduction to International Business
(83) Appraisal of Real Estate III

Tuesday 6:00 p.m.

(2) Financial Accounting I
(3) Financial Accounting II
(26) Marketing Research
(30) Sales Management
(31) Physical Distribution
(32) Business Administration I
(52) Internal Communications Management I
(56) Principles of Economics I (Macro)
(59) Introduction to Industrial Relations
(67A) Finance (4A)
(73) Professional Selling
(73A) Marketing for the Small Business
(87) Transportation Economics I
(90) Land Economics

Wednesday 6:00 p.m.

(4) Financial Accounting III
(7) Management Accounting – Cost Determination and Analysis
(18) Group Dynamics and Interpersonal Relations
(22) Computer Based Information Systems
(25) Marketing Management
(25A) Marketing Management II
(29) Industrial Management
(36) Remedial Mathematics I
(38) Mathematics of Finance
(46) General Insurance I (Brokers)

(49) Introduction to Travel Counselling
(54) Law I
(55) Law II
(62) Information Systems Administration
(68) Marketing Planning I
(72) Shopping Centres and Downtown Retail Locations
(75) Air Transport Management
(77) Basic Operations Research
(84) Effective Speaking and Speech Preparation

Thursday 6 – 9 p.m.

(5) Financial Accounting IV
(8) Management Accounting – Planning and Control
(14) Taxation I
(15) Social Psychology
(16) Introduction to Organizational Behaviour
(24) Finance I
(39) Survey of Basic Mathematics I
(41) Statistics I
(43) Communication Skills for Managers
(47) Appraisal of Real Estate I
(65) Finance II
(70) Consumer Behaviour
(74) Road Transport Management
(86) Transportation Law and Government Regulations

Friday 6:00 p.m.

(9) Management Accounting Control Systems
(12) Operational Auditing
(16) Introduction to Organizational Behaviour
(19) Personnel Administration
(25) Marketing Management
(57) Principles of Economics II (Micro)
(66) Investments and Portfolio Management
(71) Quantitative Analysis for Marketing Decisions
(81) Independent Studies in Management
(91) Government and Business

9.10 COURSES CREDITED FROM OTHER DEPARTMENTS

Courses from other departments of the Centre for Continuing Education accepted as elective credits in the McGill Certificate in Management Programs are as follows:

114-200 Greek Civilization – Part I (3 credits page 61
114-202 Greek Civilization – Part II (3 credits) page 62
114-203 Introduction to Greek Mythology (3 credits) page 62
114-208 Roman Literature and Society (3 credits) page 62
495-472 Environmental Law for Citizens (3 credits) page 61
674-505 Canadian Economic Geography (3 credits) page 61
260-252 World Religions I (3 credits) page 66
260-253 World Religions II (3 credits) page 66
260-441 Science, Religion and Revolution (3 credits) page 66
260-471 Moral Issues Today (3 credits) page 66
684-351 English Composition (3 credits) page 53
684-352 English Business Writing (3 credits) page 53
684-361 Advanced English Composition (3 credits) page 53
684-362 Advanced Business Writing (3 credits) page 53
686-351 French Composition (3 credits) page 54
686-352 French Business Writing (3 credits) page 54

10 MANAGEMENT GRADUATE

PROFESSOR W.H. ELLIS

Associate Director

392-6700

10.1 INTRODUCTION

This section of the Centre offers courses leading to the Diploma in Management, the MBA first year, and the Diploma in Management (Tourism).

10.2 APPLICATION FOR ADMISSION

Students wishing to follow a Diploma Program must complete an "application for acceptance into a program". For details of the procedure to be followed contact the department administering the particular program.

10.3 CONVOCATION

Candidates who expect to receive the Diploma at Spring Convocation 1978 are required to complete application forms, available at the Centre For Continuing Education. The completed forms and payment of $15.00 must reach the Centre by 1st March 1978.

Candidates who expect to receive the Diploma at Fall Convocation must return the completed forms and payment to the Centre by 30 July 1978.

Students who pay the fee for obtaining the Diploma but fail to meet the graduation requirements do not have to pay again when they become eligible candidates at a subsequent convocation. Another application form, however, is required for submission to the Centre by the dates given above.

10.4 COUNSELLING

Counselling will be available by appointment only up to 19 August. There will be no counselling during the registration period.

10.5 EXAMINATIONS

An examination is held at the end of each course unless specifically exempted. Students will receive written confirmation of their examination or course results after each term. As the results of each course become available, they will be posted on the Notice Board in Strathcona Hall by STUDENT NUMBER. Results cannot be obtained by telephone.

Fall Examinations – 12 December to 22 December 1977

Winter Examinations – 17 April to 28 April 1978

STUDENTS SHOULD NOT MAKE ANY OTHER COMMITMENTS DURING THIS PERIOD.

10.5.1 REREADS

Students may request verification of marks. This ensures that all questions have been marked, calculations carried out correctly and class work adequately counted toward the final evaluation.

If dissatisfied, a formal reread may be requested. The reread request form together with a cheque for $25.00 must be completed within 30 days of the posting of the final mark at Strathcona Hall. For details of both procedures contact the Department administering the course.

10.5.2 SUPPLEMENTALS

To qualify for supplemental privileges , students must first write the final examination in the course and obtain at least 40%. Candidates who do not pass the supplemental examination will be required to repeat the course. Students must write their supplemental at the next examination period where the appropriate examination is offered or forfeit their supplemental privilege.

Students wishing to apply for a supplemental may do so in writing or in person at Strathcona Hall, 772 Sherbrooke Street West at least three weeks prior to the examination period. There is a charge of $20.00 for each supplemental payable to McGill University.

Date of Final	Date of Supplemental
June/August 1977	December 1977
December 1977	April 1978
April 1978	June 1978

10.6 GRADING SYSTEM

The Centre uses the grading system common to the University. Unless otherwise noted in the description of an individual course or program, the grading system will be as indicated on page 9 of the General Information.

A mark of 65% or better is a passing grade at the graduate level.

10.7 LIBRARIES

Full library privileges are available to all students registered in the Diploma in Management Programs at the following locations:

1) Howard Ross Library of Management
   Samuel Bronfman Building
   1001 Sherbrooke Street West

2) McLennan Library
   McGill Campus

For further information see page 10 of the General Information.

10.8 PREREQUISITES

It is the responsibility of each student to ensure that he has completed the prerequisites listed for the course (courses) for which he intends to register.

10.9 REGISTRATION

See page 7 of the General Information for registration dates and times.

10.10 REGULATIONS AND PROCEDURES

See General Information for details.

10.11 SUMMER PROGRAM

All courses in the M.B.A. I Direct Entry Program will be offered during the summer. The first session will be held from May to June and the second session from July to August. This factor should be kept in mind by students who wish to plan a program that would allow them to complete the Diploma Program as expeditiously as possible.

10.12 TIMETABLE

A listing of instructors, books, buildings and room numbers will be distributed at the time of registration. Please ask for a copy.

10.13 TUITION FEES

Students who have been reclassified into the first year of the M.B.A. Program pay tuition fees at the rate of $19 per credit (i.e. $57 per course). This reduced rate is possible because the University receives grants for degree students from the Quebec Department of Education.

10.14 WITHDRAWALS

Students are not permitted to withdraw from a course after the tenth lecture. Students who do not write the final examination will receive a grade of "J" (Absent) which constitutes a failure.

For further details on Withdrawals see General Information.

10.15 DIPLOMA IN MANAGEMENT PROGRAM
(In Cooperation with the Faculty of Management)

To meet the demand for the more advanced and broader training required by those graduates whose work is primarily administrative and managerial, the Centre for Continuing Education, in cooperation with the Faculty of Management, offers a series of courses leading to a Diploma in Management. While these courses are intended primarily for those interested in obtaining the Diploma, all courses are open to any graduate interested in an individual course.

10.15.1 ADMISSION REQUIREMENTS

1) Applicants must have a university degree with good standing from an approved university (exception indicated in next paragraph). Arrangements must be made for an official transcript to be mailed to the Associate Director, Management – Graduate Diploma Programs preferably before the registration period. This also applies to McGill graduates.

2) Students who do not have a university degree but are C.A.'s, Registered Professional Engineers, graduates of recognized Technical Colleges or those holding the H.N.C. may be admitted on a provisional basis. After completing two subjects their records will be reviewed and those who have distinguished themselves may be given permission to pursue the program as regular students on approval of the Faculty of Management.

3) TEST FOR COLLEGE-ENTRANCE MATHEMATICS

All students entering the Diploma in Management Program for credit must demonstrate an adequate knowledge of college entrance mathematics by successfully completing either:
1) Survey of Basic Mathematics 277-674 or 2) the Test for College-Entrance Mathematics.

Students failing the Test must enrol in Survey of Basic Mathematics 277-674 and successfully complete it before registering for any Diploma courses except Behavioural Science, Organizational Theory and Design, Economic Environment of the Firm and Accounting – A Management Approach.

Students who wish to sit the Test on any of the given dates mentioned below may obtain a sample test, supplemental notes and an application form from the Centre upon request. There will be a $5.00 fee (Non-refundable) for the Mathematics Test.

Wednesday 3 August 1977
Thursday 17 November 1977
Thursday 13 April 1978

4) Students who have completed post-graduate level courses at a recognized university may apply for transfer of credits. An official description of the courses taken elsewhere and the marks obtained must be submitted before completing the first year of the program.

5) Students who have completed some of the required courses at the undergraduate level at McGill or elsewhere may substitute elective courses. In requesting exemption from required courses, the student must submit an official description of the content of the course he regards as equivalent and a transcript of his marks.

6) Students must obtain a mark of not less than 65% in each course. Candidates are permitted to repeat any course once only. No candidate who has failed more than three courses on the first attempt will be granted the Diploma.

7) A maximum of four credits may be granted for post-graduate courses taken outside McGill. Students are required, therefore, to complete the six remaining courses at McGill in order to be eligible for the Diploma.

8) The Diploma may be obtained in two years but the student is advised to spread the work over a longer period not exceeding seven years.

10.15.2 NON-DIRECT ENTRY/GENERAL DIPLOMA

CORE COURSES

Students wishing to qualify for the Diploma in Management must complete at least one course in each of the five groups listed below:

I. (2) Basic Management Statistics
(7) Introduction to Modelling Methods

II. (3) Accounting – A Management Approach
(8) Finance I

III. (9) Economic Environment of the Firm
(4) Economic Analysis of Business

IV. (6) Behavioural Science
(11) Organizational Theory and Design

V. (5) Data Processing and computers
(10) Marketing Management I

All Diploma candidates must take, in addition to the above five required "core" courses, five electives from within the above "core" or from the list below:

(12) Introduction to International Business
(13) International Financial Management
(14) International Marketing Management
(15) Agrimarketing
(16) Agribusiness Management
(17) Health Care Organization: Canadian Institutions and Agencies
(18) Hospital Organization and Management
(19) Sales Management
(20) Investment Analysis
(21) Industrial Production
(22) Personnel and Industrial Relations
(23) Geography of Tourism
(24) Sociology of Tourism
(25) Management Applications in Tourism
(26) Hotel, Motel and Restaurant Management
(27) Recreation
(28) Resort Area Development
(29) Travel Agency Management

Students who wish to choose other electives from the graduate programs in Continuing Education will be given special consideration.

10.16 M.B.A. I PROGRAM

10.16.1 I. ADMISSION REQUIREMENTS

a. An undergraduate degree from an accredited college or university with a Grade Point Average of at least 3.0 out of a possible 4.0 or at least a B average.
b. Graduates from an accredited institution who have a G.P.A. of at least 3.4 may apply for advanced standing in the program.
c. *Credits:* A student with a McGill Bachelor of Commerce degree, or equivalent, or a Bachelor of Engineering degree with a Minor in Management, and with a CGPA of 3.4 or better, may be eligible for credit for up to five half courses in M.B.A. I.

The student will be expected to complete the remaining M.B.A. I courses on a part-time evening basis while working during the day in a job related to the program.

The student will be required to write a research paper during second year in addition to carrying a full load of courses.

d. The Graduate Management Admission Test (G.M.A.T.) and the Test of English as a Foreign Language. The latter is required only for foreign students whose first language is not English.

10.16.2 II. RECLASSIFICATION AS M.B.A.I STUDENTS

a. Candidates who have a university degree but are not accepted for direct admission into the M.B.A. I program may register in the Diploma in Management program in the Centre for Continuing Education. After they have completed FOUR of the M.B.A. I courses, with an average of 70% or over, they may apply for reclassification as an M.B.A. I candidate.
b. An acceptable score in the Graduate Management Admission Test

10.16.3 III. TEST FOR COLLEGE-ENTRANCE MATHEMATICS

All students entering the M.B.A. I Program for part-time students must demonstrate an adequate knowledge of college-entrance mathematics by successfully completing (1) Survey of Basic Mathematics 277-674 or (2) the Test for College-Entrance Mathematics. For further information see Diploma in Management Program – Admission Requirements No. 3 Page 109.

10.16.4 MB.A. I

The Diploma courses that must be taken by those who aspire to entry into the second year of the MBA are indicated below. It must be emphasized, however, that successful completion of this program does not automatically guarantee admission. Acceptance is dependent upon the student's overall

average in the Diploma Program, the number of openings and the competition for openings in any given year.

Students who successfully complete the ten required courses for M.B.A. I will be eligible to receive the Diploma in Management. For details see Convocation on page 108.

Prerequisite: Survey of Basic Mathematics

(2) Basic Management Statistics
(3) Accounting – A Management Approach
(4) Economic Analysis of Business
(5) Data Processing and Computers
(6) Behavioural Science
(7) Introduction to Modelling Methods
(8) Finance I
(9) Economic Environment of the Firm
(10) Marketing Management I
(11) Organizational Theory and Design
OR
(12) Introduction to International Business

All application forms and supporting documents must be received by

30 June for admission in September
15 November for admission in January
15 March for admission in summer courses

Application forms may be obtained from the address below:

Miss Brenda E. Martin
Supervisor, Part-Time Programs
Faculty of Management
1001 Sherbrooke St. W.
Montreal, Quebec H3C 1G5
or telephone (514)392-5938

10.17 M.B.A. II PROGRAM

Each year Qualified students are admitted directly into the second year of the M.B.A. program, on either a full-time or part-time basis.

Candidates can qualify for admission into the M.B.A. II program in either of the following ways:

1. Successful completion of the first year full-time program.
2. Students who have received the Diploma in Management and have completed all the required courses with an average of 70% or better, but have not been reclassified as M.B.A. I students, may apply for admission into the M.B.A. II program. A passing mark of 65% is required in all courses.
3. C.A.GRADUATES SINCE 1969

   University graduates who have obtained their C.A. diploma since 1969 may qualify for entry into the second year of the M.B.A. program after completing an approved program of four courses with at least a 70% average.
4. In some cases, where the candidate has obtained the Diploma in Management and has completed all but one of the required courses with a high average (70% +), he may be permitted to enter the M.B.A. II program and allowed to carry the remaining course for one year.

A satisfactory score in the Graduate Management Admission Test is also necessary in each of the above alternatives

Further information and application forms regarding the M.B.A. II program may be obtained from Miss Brenda Martin at the address indicated previously.

NOTE: Unless otherwise indicated all courses will be repeated in January 1978.

10.18 COURSE DESCRIPTIONS

(1) SURVEY OF BASIC MATHEMATICS

277-674X-51 Mondays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September

The first part of the course will be spent in an intensive review of basic mathematics including algebra, graphs, functions and logarithms. The last part of the course will introduce the student to calculus including limits, functions of one variable, differentiation, integration and applications; and to matrix algebra including determinants and solutions of simultaneous linear equations. The material covered in this course will be adequate to enable students to follow the usual mathematical applications in business, economics, statistics and operations research.

(2) BASIC MANAGEMENT STATISTICS

277-613X-51 Mondays 6 – 9 p.m.
277-613X-71/2 Wednesdays 6 – 9 p.m.
277-613X-91 Fridays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September
PREREQUISITE: College-entrance mathematics or Survey of Basic Mathematics

Topics covered include: descriptive statistical analysis, common probability distributions (binominal, Poisson, normal), sampling procedures, sampling distributions, estimation, hypothesis testing, distribution-free procedures (tests of goodness of fit and independence), simple and multiple regression, correlation, one-way analysis of variance, classical time series analysis, Bayesian probability analysis. The course stresses the use of computer programs as an aid in statistical analysis.

(3) ACCOUNTING – A MANAGEMENT APPROACH

271-611X-61/2 Tuesdays 6 – 9 p.m.
271-611X-63 Tuesdays 7 – 10 p.m. (John Abbott College-Kirkland Campus)
271-611X-81/2 Thursdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September

This course focuses on the internal use of accounting data by management for planning and control purposes and in the decision-making process. Covered are the basic concepts of financial accounting, the analysis and interpretation of financial statements, cost and control concepts, budgeting and the measurement of performance.

(4) ECONOMIC ANALYSIS OF BUSINESS

279-692X-51 Mondays 6 – 9 p.m.
279-692X-71/2 Wednesdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September
PREREQUISITE: Basic Management Statistics

This course is primarily devoted to demonstrating the applications of economic theory and methodology in solving business problems. The following topics are discussed in some detail: demand, production, cost analysis, pricing, growth, concentration, profitability, and resource allocation of the firm. Marketing and sales forecasting techniques are also introduced briefly, and attention is given to opportunities for the application of incremental analysis.

(5) DATA PROCESSING AND COMPUTERS

273-631X-61 Tuesdays 6 – 9 p.m. (Cobol)
273-631X-71 Wednesdays 6 – 9 p.m. (Cobol)
273-631X-72 Wednesdays 6 – 9 p.m. (Fortran)
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September

The course covers a variety of topics including computer concepts, programming systems, time-sharing, file organization and modern applications of the computer. Instruction will be given in the use of one or more programming languages and students will be assigned problems involving actual use of the computer.

(6) BEHAVIOURAL SCIENCE

272-621X-51 Mondays 6 – 9 p.m.
272-621X-61 Tuesdays 6 – 9 p.m.
272-621X-81 Thursdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September

The implications for management and the essential concepts of social psychology such as motivation, perception, attitude change and organization, group and organizational dynamics will be the major emphasis of the course. Classroom discussion and student participation is encouraged.

(7) INTRODUCTION TO MODELLING METHODS

277-612X-51 Mondays 6 – 9 p.m.
277-612X-61 Tuesdays 6 – 9 p.m.
277-612X-91 Fridays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September
PREREQUISITE: College entrance mathematics or Survey of Basic Mathematics

Topics covered include: Introduction to Decision Analysis and Risk Attitudes, Inventory Control, Elementary Queueing Models, Simulation, Linear Programming Models and Extensions. The course stresses the formulation of problems and their solution by standard methods or computer packages.

(8) FINANCE I

274-641X-51 Mondays 6 – 9 p.m.
274-641X-61 Tuesdays 6 – 9 p.m.
274-641X-81 Thursdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September
PREREQUISITE: Accounting 271-611 and Economic Analysis of Business 279-692

An introduction to financial management and the role of finance, both within the firm and the economy as a whole. The institutional framework of the firm is discussed, including legal forms, taxes, financing instruments and the capital markets. An introduction to the analytics of finance is presented including the pricing of financial instruments, simple models of capital market equilibrium, the financial structure of the firm, cost of capital, dividend policy, investment criteria for new capital spending proposals, and working capital management.

(9) ECONOMIC ENVIRONMENT OF THE FIRM

279-691X-61 Tuesdays 6 – 9 p.m.
279-691X-71 (John Abbott College Wednesdays 7 – 10 p.m. Kirkland Campus)
279-691X-81/2 Thursdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September

This course examines the main macro-economic mechanisms, i.e. income determination and the multiplier theory as well as fiscal policy; the level of investment, the demand for money and the rate of

interest as well as the Canadian banking system and deposit creation; the general equilibrium of product and money markets, and monetary and fiscal policies; the dynamics of investment, the employment sector, and the price level and inflation; the balance of payments and international trade as well as methods of dealing with balance-of-payments disequilibria.

(10) MARKETING MANAGEMENT I

275-651X-51 Mondays 6 – 9 p.m.
275-651X-81 Thursdays 6 – 9 p.m.
275-651X-91 Fridays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September
PREREQUISITE: Economic Analysis of Business and Accounting – A Management Approach

A combination of lectures, and case studies involving team-work will be used. Lectures and text material will cover the marketing concept, law, buyer, behaviour, product-policy, advertising, pricing, distribution, research, and marketing planning. Canadian content will be used where appropriate. Case studies at weekly intervals will provide opportunities for involvement in problem-solving.

(11) ORGANIZATIONAL THEORY AND DESIGN

272-623X-51 Mondays 6 – 9 p.m.
272-623X-61 Tuesdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September

The course is aimed at studying how organizations are designed. The focus is on the relationship between the nature of the external environment of the organization, the technology it uses, and the management style, the goals, the organizational structure, the behaviour of individuals and groups in the organization, and its performance. A systems view is adopted. Implications for effective design of organizations are drawn.

(12) INTRODUCTION TO INTERNATIONAL BUSINESS

278-686X-51 Mondays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning week of 12 September

This course seeks to develop conceptual and analytic skills necessary to formulate feasible and effective management policies in multinational environments. It examines both levels of the international businessman's world: the environment (economic, political and social) within which he will be operating, and the new dimensions of his traditional management operations. A combination of lectures, discussions and case studies will be used.

(13) INTERNATIONAL FINANCIAL MANAGEMENT

274-649X-61 Tuesdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning 13 September
PREREQUISITE: Finance I

This course examines operational problems of financial management in the multi-national enterprise; forecasting adversities in the international finance environment; managing foreign exchange risk; transfer pricing and profit remittance policy; multinational capital budgeting; use of Euro Dollars and overseas sources of capital; consolidation of financial statements.

(14) INTERNATIONAL MARKETING MANAGEMENT

275-660Y-51 Mondays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning 16 January 1978

This course will analyse the major forms of international marketing; the impact of differing environments upon marketing policies and strategies; the segmentation of multinational markets; the development of international channel systems; the roles of marketing in developing countries, in communist countries and in integrated markets and trade blocs.

(15) AGRIMARKETING

334-640X-81 Thursdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning 15 September

This course will deal with agriculture and food marketing, management, and policy. The course will include detailed study of marketing functions, commodity marketing, retail and food service marketing encompassing the total Canadian agriculture and food system from producer to consumer.

(16) AGRIBUSINESS MANAGEMENT

334-650Y-81 Thursdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning 19 January 1978

A course in management and agricultural business dealing with the agribusiness firm engaged in agricultural production and marketing and related farm supply business. The focus of the course is on agribusiness organization, operation, financial management and agribusiness policy in today's complex and changing international environment.

(17) HEALTH CARE ORGANIZATION: CANADIAN INSTITUTIONS AND AGENCIES

278-581X-81 Thursdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning 15 September

The course is devoted to the evolution and present organization of the Canadian Health Care System as influenced by sociological, economic, political and technical factors at both Federal and Provincial levels. A major portion of the course focuses on Quebec.

(18) HOSPITAL ORGANIZATION AND MANAGEMENT

278-582X-51 Mondays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning 12 September

A program of lectures, problems and case studies centered on (1) the relationships between providers of health services as they relate to hospital centres (2) a typology of hospital centers and (3) the organization and functioning of a most complex hospital centre.

(19) SALES MANAGEMENT

606-630Y-51 Monday 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning 16 January 1978

An analytical study of the techniques and policies employed in the operation of a sales organization. The approach is from the viewpoint of the sales manager of an enterprise. Extensive use will be made of case materials in considering the problems of recruiting, training, controlling and managing the sales force. Sales appeals, quotas, and sales analysis and forecasting will also be discussed.

(20) INVESTMENT ANALYSIS

606-430X-51 Monday 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning 12 September

This course deals with security analysis and investment techniques, covering the different types and classes of securities. The sources of information, methods of compiling statistics, and assessment of comparative values are discussed, together with portfolio objectives and differing philosophies of investment management. Broad economic trends and international political climates affecting security values are analysed.

(21) INDUSTRIAL PRODUCTION

606-820X-61 Tuesdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning 13 September

An examination of the Production System and its sub-systems. The design of Production Systems (Layout of facilities, Job Design) and Operations Planning and Control constitute the principal topics. Traditional concepts and analytical techniques will be developed concurrently.

(22) PERSONNEL AND INDUSTRIAL RELATIONS

606-930Y-71 Wednesdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning 18 January 1978

This course will be concerned with the general area of industrial relations, which includes an examination of the personnel function in modern industry. The use of behavioural science in industry will be discussed and analysed. Trade unionism and its functions in the United States and Canada will be examined as well as the nature of industrial conflict and the role of the state in law and dispute settlement machinery.

10.19 DIPLOMA IN MANAGEMENT (TOURISM)

This Diploma in Management Program will enable qualified university graduates to pursue studies in the field of Tourism. It will provide a career opportunity for individuals who aspire to managerial positions in a rapidly growing industry.

10.19.1 ADMISSION REQUIREMENTS

1) Applicants must have a university degree with good standing from an approved university. Arrangements must be made for an official transcript to be mailed to the Associate Director, Management – Graduate Diploma Programs preferably before the registration period. This also applies to McGill graduates.

2) Students who have completed post-graduate level courses at a recognized university may apply for transfer of credits. An official description of the courses taken elsewhere and the marks obtained must be submitted before completing the first year of the program.

3) Students who have completed some of the required courses at the undergraduate level at McGill or elsewhere may substitute elective courses. In requesting exemption from required courses, the student must submit an official

description of the content of the course he regards as eqivalent and a transcript of his marks.

4) Students must obtain a mark of not less than 65% in each course. Candidates are permitted to repeat any course once only. No candidate who has failed more than three courses on the first attempt will be granted the Diploma.

5) A maximum of four credits may be granted for post-graduate courses taken outside McGill. Students are required, therefore, to complete the six remaining courses at McGill in order to be eligible for the Diploma.

6) The Diploma may be obtained in two years but the student is advised to spread the work over a longer period not exceeding seven years.

CORE COURSES

Students wishing to qualify for the Diploma in Management (Tourism) must complete a total of ten courses, seven of which are "core" courses with three being selected from the group of electives.

(3) Accounting – A Management Approach
(8) Finance I
(9) Economic Environment of the Firm
(10) Marketing Management I
(23) Geography of Tourism
(24) Sociology of Tourism
(25) Management Applications in Tourism

The first four courses are offered as part of the Diploma in Management (M.B.A. I) Program.

ELECTIVES

(select any three)

(26) Hotel, Motel and Restaurant Management
(27) Recreation
(28) Resort Area Development
(29) Travel Agency Management

10.19.2 COURSE DESCRIPTIONS

(3) Accounting – A Management Approach
(8) Finance I
(9) Economic Environment of the Firm
(10) Marketing Management I

For course descriptions on the above see the Diploma in Management Program.

(23) GEOGRAPHY OF TOURISM

608-830X-51 Mondays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning 12 September

The contribution of geography to the description, explanation and interpretation of tourism and recreation, with special attention to spatial patterns, – local, national and international; to the organization and functioning of the international tourist system; and to local and regional impacts – ecological, cultural, social, economic and political

(24) SOCIOLOGY OF TOURISM

608-835X-81 Thursdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning 15 September

The purpose of this course is to gain a better understanding of tourism as a social phenomenon. This will be done by examining the effects of tourism on host countries as well as on tourists themselves. Areas covered will include tourism psychology and motivation, the social significance of tourism, theories of social change, the economics of tourism, tourism development, tourism demand, the marketing of tourism and the future of tourism

(25) MANAGEMENT APPLICATIONS IN TOURISM

608-610X-71 Wednesdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning 14 September
PREREQUISITE: Accounting – A Management Approach

The principles and philosophy of tourism development will be covered with emphasis on financial, organizational, and decision-making theories as they relate to management. The impact of cultural differences on business organizations will be an integral part of the course

(26) HOTEL, MOTEL AND RESTAURANT MANAGEMENT

608-840X-71 Wednesdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning 14 September

The organization of hotel operations, departmental breakdown and responsibilities of hotels and motels are covered along with the fiscal aspects of management. Emphasis will be placed on the functions of organization, supervision, and human relationships. Accounting – A Management Approach or the equivalent would be useful background for this course.

(27) RECREATION

608-855Y-71 Wednesdays 6 – 9 p.m.
FEE: $57.00
DURATION: 13 lectures (39 hours) beginning 18 January 1978

A study of the future requirements for leisure and recreation and of their fulfilment through the provision of appropriate tourist facilities. The role and

character of outdoor recreation is related to the physical characteristics of Canada.

(28) RESORT AREA DEVELOPMENT

608-860Y61	Tuesdays 6 – 9 p.m.
FEE:	$57.00
DURATION:	13 lectures (39 hours) beginning 17 January 1978

A comprehensive examination will be made of the interrelationships of the marketing, financial and physical aspects of tourist destination development within a region. A management approach will be emphasized in dealing with the development of tourist centres and resort areas. Accounting – A Management Approach or the equivalent would be useful background for this course.

(29) TRAVEL AGENCY MANAGEMENT

608-870X61	Tuesdays 6 – 9 p.m.
FEE:	$57.00
DURATION:	13 lectures (39 hours) beginning 13 September

The course will deal with the fundamental management principles for competent, effective and profitable travel agency operations. Among the topics covered will be office organization, financial administration, employee development, and performance evaluation. Accounting – A Management Approach or the equivalent would be useful background for this course.

10.20 COURSE LIST BY EVENING AND TIME:

Mondays 6 – 9 p.m.

(1) Survey of Basic Mathematics
(2) Basic Management Statistics
(4) Economic Analysis of Business
(6) Behavioural Science
(7) Introduction to Modelling Methods
(8) Finance I
(10) Marketing Management I
(11) Organizational Theory and Design
(12) Introduction to International Business (September)
(18) Hospital Organization and Management
(19) Sales Management (January)
(20) Investment Analysis (September)
(23) Geography of Tourism
(14) International Marketing Management (January)

Tuesdays 6 – 9 p.m.

(3) Accounting – A Management Approach
(5) Data Processing and Computers
(6) Behavioural Science
(7) Introduction to Modelling Methods
(8) Finance I
(9) Economic Environment of the Firm
(11) Organizational Theory and Design
(13) International Financial Management (September)
(21) Industrial Production (September)
(28) Resort Area Development (January)
(29) Travel Agency Management (September)

Wednesdays 6 – 9 p.m.

(2) Basic Management Statistics
(4) Economic Analysis of Business
(5) Data Processing and Computers
(9) Economic Environment of the Firm (John Abbott)
(22) Personnel and Industrial Relations (January)
(25) Management Applications in Tourism
(26) Hotel, Motel and Restaurant Management (September)
(27) Recreation (January)

Thursdays 6 – 9 p.m.

(3) Accounting – A Management Approach
(6) Behavioural Science
(8) Finance I
(9) Economic Environment of the Firm
(10) Marketing Management I
(15) Agrimarketing (September)
(16) Agribusiness Management (January)
(17) Health Care Organization: Canadian Institutions and Agencies (September)
(24) Sociology of Tourism

Fridays 6 – 9 p.m.

(2) Basic Management Statistics
(7) Introduction to Modelling Methods
(10) Marketing Management I

11 PROFESSIONAL DEVELOPMENT DEPT.

ANDRE J. MAJOR
Associate Director
392-6702

11 INTRODUCTION

The Professional Code of the Province of Quebec requires the members of the thirty-eight professions which are regulated thereby to maintain their professional competence at a level that will ensure the protection of the public through quality of service.

The Professional Development Department of the Centre for Continuing Education, in cooperation with the various professional bodies and the McGill faculties concerned with professional education, will from time to time be offering seminars, lectures and refresher courses for the purpose of retraining, upgrading and perfecting professionals and generally keeping them abreast of the latest developments in their respective disciplines.

Announcements will be made as such seminars, lectures and refresher courses are made available.

2 HISTORY

2.1 THE UNIVERSITY

The Hon. James McGill, a leading merchant and prominent citizen of Montreal, who died in 1813, bequeathed forty-six acresof land and £10,000 to the already existing 'Royal Institution for the Advancement of Learning' upon condition that the latter erect "upon the said tract or parcel of land, an University or College, for the purpose of education and the advancement of learning in this Province"; and further upon condition that "one of the Colleges to be comprised in the said University shall be named and perpetually be known and distinguished by the appellation of 'McGill College'.

Owing to a lack of funds and persistent opposition the complete University which had been planned by the Royal Institution was not built, but after years of litigation and effort a Royal Charter was granted in 1821 and the University of McGill College was opened in 1829 with what remained of James McGill's legacy as its endowment, and teaching then started in the Faculties of Medicine and Arts. The Medical Faculty grew steadily, and after an amended Charter was secured in 1852 a new era of progress began for the Faculty of Arts with the appointment in 1855 of Sir William Dawson as Principal, a position which he held for thirty-eight years.

Since 1855 the University has grown vigorously, presently comprising twelve Faculties and eight Schools. In 1899 the Royal Victoria College was opened, a gift of Baron Strathcona, to provide separate teaching and residential facilities for women students. Gradually, however, classes for men and women were merged, and now the University is wholly coeducational. In 1907 Macdonald College was established at Ste. Anne de Bellevue, as a residential college for Agriculture, Household Science, and, originally, the School for Teachers, which is now the Faculty of Education and located on the Montreal campus. The University's general development was greatly facilitated by the generosity of Sir William Macdonald, whose gifts to the University include a Physics Building, a Chemistry and Mining Building, and an Engineering Building, in addition to the college named after him.

At present some twenty thousand students are taking regular university courses. New buildings have been erected or acquired to provide the undergraduate and research facilities needed by the increased student body, and include residences, gymnasium, swimming pools and winter stadium as well as a University Centre and a concert hall.

The University is also active in providing courses and programs to the community through the Centre for Continuing Education where over thirteen thousand students are registered.

2.2 FACULTY OF DENTISTRY

The history of the McGill Faculty of Dentistry dates back to 1903. Its origin, however, goes back to 1892 when the Association of Dental Surgeons of the Province of Québec founded, in Montreal, a dental school known as the Dental College of the Province of Québec. Instruction in this College was in both English and French and the College was located on Phillips Square. This College became associated with Bishop's University in Lennoxville,

Québec, four years later as a department in the Faculty of Medicine of that University, but remained situated in Montreal. In this way the clinical training was provided by the College and the academic training by the University. The first D.D.S. degree in the Province of Québec was granted by Bishop's University.

In 1903 the McGill University Faculty of Medicine minutes read "that this Faculty is in favour of the establishment of a Department of Dental Medicine.... " By a later entry we learn that the McGill Dental School was established in June 1904 as a department in the Faculty of Medicine and continued as such until 1920 when it became known as the Faculty of Dentistry.

The Faculty of Dentistry has always been closely associated with the Montreal General Hospital, having its first dental clinic in the old morque of that Hospital. In 1923 an annex was built onto the old Montreal General Hospital as a temporary dental clinic and there the clinic remained until the new Hospital was built in 1955, and all facilities moved to these quarters, which were subsequently enlarged and modernized in 1972.

Clinical teaching in the Faculty is mainly carried out in the dental clinic at the Montreal General Hospital, complemented by rotations to other teaching hospitals. Pre-clinical teaching laboratories are housed in the Strathcona Anatomy and Dentistry Building, on campus, and some basic science subjects are still taught in conjunction with the Faculty of Medicine.

3 GENERAL INFORMATION

3.1 ADMISSION PROCEDURES AND REQUIREMENTS

Application for admission to the Faculty of Dentistry must be made upon the University and Faculty forms which may be obtained from the Administrative Assistant of the Faculty. As the number of students in each class is limited, application should be made early and in any case not later than the *first of March*. Each application must be a accompanied by a *non-returnable fee of $15.00* in the form of a cheque or money order payable to McGill University. Students registered at McGill are exempt from this fee.

Admission is selective, and students are reminded that fulfillment of the minimum requirements by no means guarantees acceptance. At the present time, the majority of applicants have met more than the minimum requirements and for this reason students are usually accepted from the second year of University or higher.

The minimum requirement for admission to the study of dentistry is the satisfactory completion of EITHER a) a collegiat program in the Province of Quebec with a D.C.S. which must include full courses (two semesters) in Biology, General Chemistry, Organic Chemistry, Mathematics and Physics. These would normally include Biology 301, 401, Chemistry 101, 201, 202 and 302, basic courses in Mathematics and Physics; which would normally include Mathematics 101, 103 and Physics 101, 102; OR b) two full years in a university program, or equivalent, leading to the B.A. or B.Sc. degree and must include at least one full year course (two semesters) in each of the following subjects:

- General Biology or Zoology (half year of Botany and half year of Zoology will be accepted, but not one year of Botany alone)
- Inorganic or General Chemistry, with laboratory
- Organic Chemistry, with laboratory
- Mathematics
- Physics, with laboratory

The results of all prerequisite subjects *must* be submitted to this Faculty prior to *June 30* for September registration.

It is recommended that a course in Mammalian Physiology be completed by all applicants prior to admission to the Faculty.

Canadian applicants are requested to undertake the Canadian Dental Association Aptitude Test and have the results sent to the Faculty. Detailed information may be obtained from the Administrator, Dental Aptitude Test Program, The Canadian Dental Association, 1815 Alta Vista Drive, Ottawa, Ontario K1G 3Y6.

Candidates applying from the United States should take the American Dental Assoication Aptitude Test and have the results sent to the Faculty of Dentistry.

A reservation fee of $50.00 is payable by the applicant within ten days of the receipt of notice that the student has been accepted for admission. This fee will be credited towards the applicant's University fees, but *will not be returned* if the student fails to register.

3.2 ENTRANCE TO ADVANCED STANDING

Due to space limitations, applications from transfer students and graduates of foreign dental schools will be considered for admission to the Faculty only if space permits.

3.3 AWARD OF McGILL B.Sc. DEGREE

On the successful completion of the second year of the Dental program, students who have entered this Faculty from the Faculty of Science at McGill University may, under certain circumstances, apply for their B.Sc. degree. Students wishing to be considered must submit a written application to the office of the Associate Dean of Science at least four months before convocation.

3.4 PROFESSIONAL PRACTICE
